[The bank] asserted that the indorsement on the back of the check was a conditional indorsement and ineffective under 3-206(b), [which states:]

An indorsement stating a condition to the right of the indorsee to receive payment does not affect the right of the indorsee to enforce the instrument. A person paying the instrument or taking it for value or collection may disregard the condition, and the rights and liabilities of that person are not affected by whether the condition has been fulfilled.

...[T]he bank asserts the fault of the United States Treasury..., in failing to make the check payable to both Gill and Wisner. To the extent that the indorsement was conditional, the bank contends that it was unenforceable; to the extent that it was restrictive, it maintains that the restrictions were waived by the indorser when he deposited the full amount of the check into his own checking account.

Wisner...[stated that it] was owed \$13,200.50 by Gill for seeds, chemicals, crop supplies and agricultural seed technology fees. [It] further stated that Gill never paid the \$13,200.50 he owed and that Wisner did not receive a cashier's check issued in that amount by Richland State Bank....According to [the bank teller], Gill asked to deposit the entire amount in his account. She further stated that the bank was unaware that the indorsement was written by someone other than Gill.

...The court found that the typed indorsement placed on the check was the indorsement of the maker, not Gill. However, when Gill signed below the indorsement, he made it his own indorsement. The court concluded that Gill had the legal power and authority to verbally instruct that the entire proceeds be deposited into his account. The court stated that as long as the indorsement was his own, whether it was restrictive or conditional, Gill had the power to ignore it, strike it out or give contrary instructions. The court further concluded that the bank acted properly when it followed the verbal instructions given by Gill to the teller and the written instructions on his deposit slip to deposit the entire proceeds into

Gill's account. Consequently, the court gave summary judgment in favor of the bank. Wisner appeals....

Discussion

Wisner contends that the trial court erred in holding that the bank could disregard what Wisner characterizes as a special and restrictive indorsement on the back of the check. It claims that under UCC 3-206, the amount paid by the bank had to be "applied consistently with" the indorsement and that the bank's failure to comply with the indorsement made it liable to Wisner. According to Wisner, Gill was not entitled to deposit the amount due to Wisner by virtue of his own special indorsement and the bank converted the check under 3-420 by crediting the full amount to Gill's account.

The bank argues that the indorsement was conditional and thus could be ignored pursuant to 3-206(b). It also asserts that nothing on the check indicated that the indorsement was written by someone other than Gill. Since the check was made payable to Gill, the indorsement was not necessary to his title and could be ignored, struck out or simply waived. The bank also claims that Wisner had no ownership interest in the check, did not receive delivery of the check, and had no claim for conversion under 3-420.

We agree with the bank that the true problem in this case is the failure of the government to issue the check jointly to Gill and Wisner as co-payees. Had the government done so, there would be no question as to Wisner's entitlement to a portion of the proceeds from the check.

Although the writing on the back of the check is referred to as an indorsement, we note that, standing alone, it does not truly conform to the definition found in 3-204(a) [which states]:

"Indorsement" means a signature, other than that of a signer as maker, drawer, or acceptor, that alone or accompanied by other words is made on an instrument for the purpose of (i) negotiating the instrument, (ii) restricting payment of the instrument, or (iii) incurring indorser's liability on the instrument, but regardless of the intent of the signer, a signature and its accompanying words is an indorsement unless the accompanying words, terms of the instrument, place of the signature, or other circumstances unambiguously indicate that the signature was made for a purpose other than indorsement.

This paragraph was placed on the back of the check by the government as the maker or drawer of the check. Consequently, the bank argues that Gill as sole payee could waive, ignore or strike out the language.

Although the Louisiana jurisprudence contains no similar case dealing with the Uniform Commercial Code, we may look to other jurisdictions for guidance...In [Citation, a New Jersey case] (1975), the drawer of a check placed instructions on the backs of several checks...that the instruments not be deposited until a specific future date. However, the payee presented some of the checks prior to the date specified on the back. The court found that the drawer did not have the capacity to indorse the instruments; as a result the typed instructions on the backs of the checks could not be indorsements. Instead, they were “merely requests to plaintiff who may or may not comply at its own pleasure. The instructions are neither binding on plaintiff nor the subsequent holders.” In other words, the payee could ignore the instructions.

In the instant case, the payee did precisely that. Gill ignored the writing on the back of the check and instructed the teller at the defendant bank to do the same through verbal and written instructions.

Wisner argues that by affixing his signature under the writing on the back of the check, Gill made it his own indorsement. Furthermore, it asserts that it was a restrictive indorsement, not a conditional one which could be disregarded pursuant to 3-206. Wisner relies upon the provisions of 3-206 for the proposition that the check had a restrictive indorsement and that the bank converted the check because it failed to apply the amount it paid consistently with the indorsement. However, Comment 3 to 3-206 states, in pertinent part:

This Article does not displace the law of waiver as it may apply to restrictive indorsements. The circumstances under which a restrictive indorsement may be waived by the person who made it is not determined by this Article.

Not all jurisdictions recognize a doctrine of waiver of restrictive indorsements. [Citing cases from various jurisdictions in which a bank customer effectively requested the bank to disregard a restrictive indorsement; some cases affirmed the concept that the restriction could be waived (disregarded), others did not.]...

In two cases arising under pre-UCC law, Louisiana recognized that indorsements could be ignored or struck out. In [Citation] (1925), the Louisiana Supreme Court held that the holder of a check could erase or strike out a restrictive indorsement on a check that was not necessary to the holder's title. In [Citation] (1967), the court

stated that an erroneous indorsement could be ignored and even struck out as unnecessary to the plaintiff's title.

Like the trial court, we find that when Gill affixed his signature under the writing on the back of the check, he made it his own indorsement. We further find that the indorsement was restrictive, not conditional. As Gill's own restrictive indorsement, he could waive it and direct that the check, upon which he was designated as the sole payee, be deposited in his account in its entirety.

Affirmed.

CASE QUESTIONS

1. Notice that the check was made payable to Chad Gill—he was the named payee on the front side of the check. To avoid the problems here, if the drawer (the US government) wanted to control the uses to which the check could be put, how should it have named the payee?
2. The court held that when Gill “affixed his signature under the writing on the back of the check, he made it his own indorsement.” But why wasn't it the indorsement of the drawer—the US government?
3. If the language on the back was considered his own conditional indorsement (the instrument was not valid unless the stated conditions were met), how could the condition be disregarded by the bank?
4. If it was his own restrictive indorsement, how could it be disregarded by the bank?
5. What recourse does Wisner have now?

23.5 Summary and Exercises

Summary

Negotiation is the transfer of an instrument in such a form that the transferee becomes a holder. There are various methods for doing so; if the procedures are not properly adhered to, the transfer is only an assignment.

An instrument payable to the order of someone must be negotiated by indorsement and delivery to the transferee. The indorsement must convey the entire instrument. An instrument payable to bearer may be negotiated simply by delivery to the transferee.

Those who sign the instrument have made a contract and are liable for its breach. Makers and acceptors are primary parties and are liable to pay the instrument. Drawers and indorsers are secondary parties and are conditionally liable. Signatories are liable under a warranty theory.

Various forms of indorsement are possible: blank or special, restrictive or unrestrictive, qualified or unqualified.

Between drawer and drawee, liability for a forged instrument—one signed without authority—usually falls on the drawee who paid it. There are, however, several exceptions to this rule: where an imposter induces the maker or drawer to issue an instrument in the name of the payee, where the instrument is made to a fictitious payee (or to a real person who is intended to have no interest in it), and where the instrument is made by an employee authorized generally to deal in such paper

EXERCISES

1. Mal, a minor, purchased a stereo from Howard for \$425 and gave Howard a negotiable note in that amount. Tanker, a thief, stole the note from Howard, indorsed Howard's signature and sold the note to Betty. Betty then sold the note to Carl; she did not indorse it. Carl was unable to collect on the note because Mal disaffirmed the contract. Is Betty liable to Carl on a contract or warranty theory? Why?
2. Would the result in Exercise 1 be different if Betty had given a qualified indorsement? Explain.
3. Alphonse received a check one Friday from his employer and cashed the check at his favorite tavern, using a blank indorsement. After the tavern closed that evening, the owner, in reviewing the receipts for the evening, became concerned that if the check was stolen and cashed by a thief, the loss would fall on the tavern. Is this concern justified? What can the owner of the tavern do for protection?
4. Martha owns a sporting goods store. She employs a bookkeeper, Bob, who is authorized to indorse checks received by the store and to deposit them in the store's bank account at Second Bank. Instead of depositing all the checks, Bob cashes some of them and uses the proceeds for personal purposes. Martha sues the bank for her loss, claiming that the bank should have deposited the money in the store's account rather than paying Bob. Is the bank liable? Explain.
5. Daniel worked as a writer in order to support himself and his wife while she earned her MBA degree. Daniel's paychecks were important, as the couple had no other source of income. One day, Daniel drove to Old Faithful State Bank to deposit his paycheck. Standing at a counter, he indorsed the check with a blank indorsement and then proceeded to fill out a deposit slip. While he was completing the slip, a thief stole the check and cashed it. Whose loss? How could the loss be avoided?
6. You are the branch manager of a bank. A well-respected local attorney walks into the bank with a check for \$100,000 that he wants to deposit in the general account his firm has at your bank. The payee on the check is an elderly widow, Hilda Jones, who received the check from the profit-sharing plan of her deceased husband, Horatio Jones. The widow indorsed the check "Pay to the order of the estate of Horatio Jones. Hilda Jones." The attorney produces court documents showing that he is the executor of the estate. After the attorney indorses the check, you deposit the check in the attorney's account. The attorney later withdraws the \$100,000 and spends it on a pleasure trip, in violation of his duties as executor. Discuss the bank's liability.
7. Stephanie borrows \$50,000 from Ginny and gives Ginny a negotiable note in that amount. Ginny sells the note to Roe for \$45,000. Ginny's

indorsement reads, “For valuable consideration, I assign all of my rights in this note to Roe. Ginny.” When Stephanie refuses to pay the note and skips town, Roe demands payment from Ginny, claiming contract liability on the basis of her signature. Ginny argues that she is not liable because the indorsement is qualified by the language she used on the note. Who is correct? Explain.

8. The state of California issued a check that read, “To Alberto Cruz and Roberta Gonzales.” Alberto endorsed it “Pay to the order of Olivia Cruz.” What rights does Olivia get in the instrument?

9.
 - a. Bill’s weekly paycheck was stolen by a thief. The thief indorsed Bill’s name and cashed the check at the drawee bank before Bill’s employer had time to stop payment. May the drawee bank charge this payment against the drawer’s account? Explain.
 - b. Would the result change in (a) if Bill had carelessly left his check where it could easily be picked up by the thief? Explain.
 - c. Would the result change in (a) if the bank had specific regulations that tellers were not to cash any check without examining the identification of the person asking for cash?
 - d. Would the result change if Bill’s employer had carelessly left the check where it could be found by the thief?

SELF-TEST QUESTIONS

1. A person who signs a negotiable instrument with a blank endorsement has
 - a. warranty liability
 - b. contract liability
 - c. both of the above
 - d. neither of the above

2. “For deposit” is an example of
 - a. a special indorsement
 - b. a restrictive indorsement
 - c. a qualified indorsement
 - d. a blank indorsement

3. “Pay to the order of XYZ Company” is an example of
 - a. a special indorsement
 - b. a restrictive indorsement
 - c. a qualified indorsement
 - d. a blank indorsement

4. The indorser’s signature alone is
 - a. a special indorsement
 - b. a restrictive indorsement
 - c. a qualified indorsement
 - d. a blank indorsement

5. Generally, liability for a forged instrument falls on
 - a. the drawer
 - b. the drawee
 - c. both of the above
 - d. neither of the above

6. State whether each of the following is (1) blank or special, (2) restrictive or nonrestrictive, or (3) qualified or unqualified:

- a. "Pay to David Murphy without recourse."
- b. "Ronald Jackson"
- c. "For deposit only in my account at Industrial Credit Union."
- d. "Pay to ABC Co."
- e. "I assign to Ken Watson all my rights in this note."

SELF-TEST ANSWERS

1. c
2. b
3. a
4. d
5. b

6.
 - a. special, nonrestrictive, qualified
 - b. blank, nonrestrictive, unqualified
 - c. special, nonrestrictive, unqualified
 - d. special, restrictive, unqualified
 - e. special, restrictive, unqualified

Chapter 24

Holder in Due Course and Defenses

LEARNING OBJECTIVES

After reading this chapter, you should understand the following:

1. What a holder in due course is, and why that status is critical to commercial paper
2. What defenses are good against a holder in due course
3. How the holder-in-due-course doctrine is modified in consumer transactions

In this chapter, we consider the final two questions that are raised in determining whether a holder can collect:

1. Is the holder a holder in due course?
2. What defenses, if any, can be asserted against the holder in due course to prevent collection on the instrument?

24.1 Holder in Due Course

LEARNING OBJECTIVES

1. Understand why the concept of holder in due course is important in commercial transactions.
2. Know what the requirements are for being a holder in due course.
3. Determine whether a payee may be a holder in due course.
4. Know what the shelter rule is and why the rule exists.

Overview of the Holder-in-Due-Course Concept

Importance of the Holder-in-Due-Course Concept

A holder is a person in possession of an instrument payable to bearer or to the identified person possessing it. But a holder's rights are ordinary, as we noted briefly in [Chapter 22 "Nature and Form of Commercial Paper"](#). If a person to whom an instrument is negotiated becomes nothing more than a holder, the law of commercial paper would not be very significant, nor would a negotiable instrument be a particularly useful commercial device. A mere holder is simply an assignee, who acquires the assignor's rights but also his liabilities; an ordinary holder must defend against claims and overcome defenses just as his assignor would. The holder in due course is really the crux of the concept of commercial paper and the key to its success and importance. What the holder in due course gets is an instrument free of claims or defenses by previous possessors. A holder with such a preferred position can then treat the instrument almost as money, free from the worry that someone might show up and prove it defective.

Requirements for Being a Holder in Due Course

Under Section 3-302 of the Uniform Commercial Code (UCC), to be a holder in due course (HDC), a transferee must fulfill the following:

1. Be a holder of a negotiable instrument;
2. Have taken it:
 - a) for value,

b) in good faith,

c) without notice

(1) that it is overdue or

(2) has been dishonored (not paid), or

(3) is subject to a valid claim or defense by any party, or

(4) that there is an uncured default with respect to payment of another instrument issued as part of the same series, or

(5) that it contains an unauthorized signature or has been altered, and

3. Have no reason to question its authenticity on account of apparent evidence of forgery, alteration, irregularity or incompleteness.

The point is that the HDC should honestly pay for the instrument and not know of anything wrong with it. If that's her status, she gets paid on it, almost no matter what.

Specific Analysis of Holder-in-Due-Course Requirements

Holder

Again, a holder is a person who possesses a negotiable instrument "payable to bearer or, the case of an instrument payable to an identified person, if the identified person is in possession." Uniform Commercial Code, Section 1-201(20). An instrument is payable to an identified person if she is the named payee, or if it is indorsed to her. So a holder is one who possesses an instrument and who has all the necessary indorsements.

Taken for Value

Section 3-303 of the UCC describes what is meant by transferring an instrument "for value." In a broad sense, it means the holder has given something for it, which sounds like consideration. But "value" here is not the same as consideration under contract law. Here is the UCC language:

An instrument is issued or transferred for value if any of the following apply:

- (1) The instrument is issued or transferred for a promise of performance, to the extent the promise has been performed.
- (2) The transferee acquires a security interest or other lien in the instrument other than a lien obtained by judicial proceeding.
- (3) The instrument is issued or transferred as payment of, or as security for, an antecedent claim against any person, whether or not the claim is due.
- (4) The instrument is issued or transferred in exchange for a negotiable instrument.
- (5) The instrument is issued or transferred in exchange for the incurring of an irrevocable obligation to a third party by the person taking the instrument.

1. *For a promise, to the extent performed.* Suppose A contracts with B: “I’ll buy your car for \$5,000.” Under contract law, A has given consideration: the promise is enough. But this executory (not yet performed) promise given by A is not giving “value” to support the HDC status because the promise has not been performed.

Lorna Love sells her car to Paul Purchaser for \$5,000, and Purchaser gives her a note in that amount. Love negotiates the note to Rackets, Inc., for a new shipment of tennis rackets to be delivered in thirty days. Rackets never delivers the tennis rackets. Love has a claim for \$5,000 against Rackets, which is not an HDC because its promise to deliver is still executory. Assume Paul Purchaser has a defense against Love (a reason why he doesn’t want to pay on the note), perhaps because the car was defective. When Rackets presents the note to Purchaser for payment, he refuses to pay, raising his defense against Love. If Rackets had been an HDC, Purchaser would be obligated to pay on the note regardless of the defense he might have had against Love, the payee. See *Carter & Grimsley v. Omni Trading, Inc.*, [Section 24.3 "Cases"](#), regarding value as related to executory contracts.

A taker for value can be a partial HDC if the consideration was only partly performed. Suppose the tennis rackets were to come in two lots, each worth \$2,500, and Rackets only delivered one lot. Rackets would be an HDC only to the extent of \$2,500, and the debtor—Paul Purchaser—could refuse to pay \$2,500 of the promised sum.

The UCC presents two exceptions to the rule that an executory promise is not value. Section 3-303(a)(4) provides that an instrument is issued or transferred for value if the issuer or transferor gives it in exchange for a negotiable instrument, and Section 3-303(5) says an instrument is transferred for value if the issuer gives it in exchange for an irrevocable obligation to a third party.

2. *Security interest.* Value is not limited to cash or the fulfillment of a contractual obligation. A holder who acquires a lien on, or a security interest in, an instrument other than by legal process has taken for value.

3. *Antecedent debt.* Likewise, taking an instrument in payment of, or as security for, a prior claim, whether or not the claim is due, is a taking for value. Blackstone owes Webster \$1,000, due in thirty days. Blackstone unexpectedly receives a refund check for \$1,000 from the Internal Revenue Service and indorses it to Webster. Webster is an HDC though he gave value in the past.

The rationale for the rule of value is that if the holder has not yet given anything of value in exchange for the instrument, he still has an effective remedy should the instrument prove defective: he can rescind the transaction, given the transferor's breach of warranty.

In Good Faith

Section 3-103(4) of the UCC defines **good faith**¹ as "honesty in fact and the observance of reasonable commercial standards of fair dealing."

Honesty in Fact

"Honesty in fact" is subjectively tested. Suppose Lorna Love had given Rackets, Inc., a promissory note for the tennis rackets. Knowing that it intended to deliver defective tennis rackets and that Love is likely to protest as soon as the shipment arrives, Rackets offers a deep discount on the note to its fleet mechanic: instead of the \$1,000 face value of the note, Rackets will give it to him in payment of an outstanding bill of \$400. The mechanic, being naive in commercial dealings, has no suspicion from the large discount that Rackets might be committing fraud. He has acted in good faith under the UCC test. That is not to say that no set of circumstances will ever exist to warrant a finding that there was a lack of good faith.

1. Defined in the Uniform Commercial Code as "honesty in fact and the observance of reasonable commercial standards of fair dealing."

Observance of Reasonable Commercial Standards of Fair Dealing

Whether reasonable commercial standards were observed in the dealings is objectively tested, but buying an instrument at a discount—as was done in the tennis rackets example—is not commercially unreasonable, necessarily.

Without Notice

It obviously would be unjust to permit a holder to enforce an instrument that he knew—when he acquired it—was defective, was subject to claims or defenses, or had been dishonored. A purchaser with knowledge cannot become an HDC. But proving knowledge is difficult, so the UCC at Section 3-302(2) lists several types of notice that presumptively defeat any entitlement to status as HDC. Notice is not limited to receipt of an explicit statement; it includes an inference that a person should have made from the circumstances. The explicit things that give a person notice include those that follow.

Without Notice That an Instrument Is Overdue

The UCC provides generally that a person who has notice that an instrument is overdue cannot be an HDC. What constitutes notice? When an inspection of the instrument itself would show that it was due before the purchaser acquired it, notice is presumed. A transferee to whom a promissory note due April 23 is negotiated on April 24 has notice that it was overdue and consequently is not an HDC. Not all paper contains a due date for the entire amount, and demand paper has no due date at all. In Sections 3-302(a)(2) and 3-304, the UCC sets out specific rules dictating what is overdue paper.

Without Notice That an Instrument Has Been Dishonored

Dishonor² means that instrument is not paid when it is presented to the party who should pay it.

Without Notice of a Defense or Claim

A purchaser of an instrument cannot be an HDC if he has notice that there are any defenses or claims against it. A defense is a reason why the would-be obligor will not pay; a claim is an assertion of ownership in the instrument. If a person is fraudulently induced to issue or make an instrument, he has a claim to its ownership and a defense against paying.

2. Failure to pay or refusal to accept a note, a bill, or another commercial obligation.

Without Notice of Unauthorized Signature or Alteration

This is pretty clear: a person will fail to achieve the HDC status if he has notice of alteration or an unauthorized signature.

Without Reason to Question the Instrument's Authenticity Because of Apparent Forgery, Alteration, or Other Irregularity or Incompleteness as to Call into Question Its Authenticity

This also is pretty straightforward, though it is worth observing that a holder will flunk the HDC test if she has notice of unauthorized signature or alteration, or if she *should* have notice on account of apparent irregularity. So a clever forgery would not by itself defeat the HDC status, unless the holder had notice of it.

Payee as Holder in Due Course

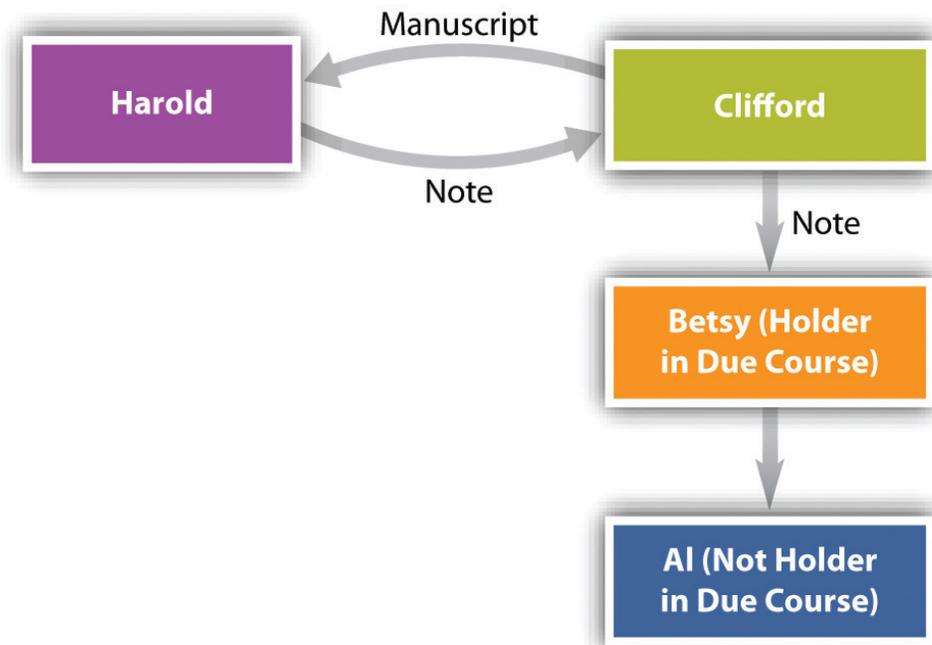

The payee can be an HDC, but in the usual circumstances, a payee would have knowledge of claims or defenses because the payee would be one of the original parties to the instrument. Nevertheless, a payee may be an HDC if all the prerequisites are met. For instance, Blackstone fraudulently convinces Whitestone into signing a note as a comaker, with Greenstone as the payee. Without authority, Blackstone then delivers the note for value to Greenstone. Having taken the note in good faith, for value, without notice of any problems, and without cause to question its validity because of apparent irregularities, Greenstone is an HDC. In any event, typically the HDC is not the payee of the instrument, but rather, is an immediate or remote transferee of the payee.

The Shelter Rule

There is one last point to mention before we get to the real nub of the holder-in-due-course concept (that the sins of her predecessors are washed away for an HDC). The **shelter rule**³ provides that the transferee of an instrument acquires the same rights that the transferor had. Thus a person who does not himself qualify as an HDC can still acquire that status if some previous holder (someone “upstream”) was an HDC.

On June 1, Clifford sells Harold the original manuscript of Benjamin Franklin's autobiography. Unknown to Harold, however, the manuscript is a forgery. Harold signs a promissory note payable to Clifford for \$250,000 on August 1. Clifford negotiates the note to Betsy on July 1 for \$200,000; she is unaware of the fraud. On August 2, Betsy gives the note to Al as a token of her affection. Al is Clifford's friend and knows about the scam (see [Figure 24.1 "The Shelter Rule"](#)). May Al collect?

3. Under Article 3 of the Uniform Commercial Code, the transferee of an instrument acquires the same rights his or her transferor had.

Figure 24.1 *The Shelter Rule*

Begin the analysis by noting that Al is not an HDC. Why? For three reasons: he did not take the instrument for value (it was a gift), he did not take in good faith (he knew of the fraud), and he had notice (he acquired it after the due date). Nevertheless, Al is entitled to collect from Harold the full \$250,000. His right to do so flows from UCC, Section 3-203(b): “Transfer of an instrument, whether or not the transfer is a negotiation, vests in the transferee any right of the transferor to enforce the instrument, including any right as a holder in due course, but the transferee cannot acquire rights of a holder in due course by a direct or indirect transfer from a holder in due course if the transferee engaged in fraud or illegality affecting the instrument.”

By virtue of the shelter rule, Al as transferee from Betsy acquires all rights that she had as transferor. Clearly Betsy is an HDC: she paid for the instrument, she took it in good faith, had no notice of any claim or defense against the instrument, and there were no apparent irregularities. Since Betsy is an HDC, so is Al. His knowledge of the fraud does not undercut his rights as HDC because he was not a party to it and was not a prior holder. Now suppose that after negotiating the instrument to Betsy, Clifford repurchased it from her. He would not be an HDC—and would not acquire all Betsy’s rights—because he had been a party to fraud and as a prior holder had notice of a defense. The purpose of the shelter rule is “to assure the holder in due course a free market for the paper.” Uniform Commercial Code, Section 3-203, Comment 2.

KEY TAKEAWAY

The holder-in-due-course doctrine is important because it allows the holder of a negotiable instrument to take the paper free from most claims and defenses against it. Without the doctrine, such a holder would be a mere transferee. The UCC provides that to be an HDC, a person must be a holder of paper that is not suspiciously irregular, and she must take it in good faith, for value, and without notice of anything that a reasonable person would recognize as tainting the instrument. A payee may be an HDC but usually would not be (because he would know of problems with it). The shelter rule says that a transferee of an instrument acquires the same rights her transferor had, so a person can have the rights of an HDC without satisfying the requirements of an HDC (provided she does not engage in any fraud or illegality related to the transaction).

EXERCISES

1. Summarize the requirements to be a holder in due course.
2. Why is the status of holder in due course important in commercial transactions?
3. Why is it unlikely that a payee would be a holder in due course?
4. What is the shelter rule, and why does it exist?

24.2 Defenses and Role in Consumer Transactions

LEARNING OBJECTIVE

1. Know to what defenses the holder in due course is not subject.
2. Know to what defenses the holder in due course is subject.
3. Understand how the holder-in-due-course doctrine has been modified for consumer transactions and why.

Defenses

We mentioned in [Section 24.1 "Holder in Due Course"](#) that the importance of the holder-in-due-course status is that it promotes ready transferability of commercial paper by giving transferees confidence that they can buy and in turn sell negotiable instruments without concern that somebody upstream—previous holders in the chain of distribution—will have some reason not to pay. The holder-in-due-course doctrine makes the paper almost as readily transferable as cash. Almost, but not quite. We examine first the defenses to which the holder in due course (HDC) is *not subject* and then—the “almost” part—the defenses to which even HDCs are subject.

Holder in Due Course Is Not Subject to Personal Defenses

An HDC is *not* subject to the obligor’s **personal defenses**⁴. But a holder who is not an HDC is subject to them: he takes a negotiable instrument subject to the possible personal claims and defenses of numerous people.

In general, the personal defenses—to which the HDC is *not* subject—are similar to the whole range of defenses for breach of simple contract: lack of consideration; failure of consideration; duress, undue influence, and misrepresentation that does not render the transaction void; breach of warranty; unauthorized completion of an incomplete instrument; prior payment. Incapacity that does not render the transaction void (except infancy) is also a personal defense. As the Uniform Commercial Code (UCC) puts it, this includes “mental incompetence, guardianship, ultra vires acts or lack of corporate capacity to do business, or any other incapacity apart from infancy. If under the state law the effect is to render the obligation of the instrument entirely null and void, the defense may be asserted against a holder in due course. If the effect is merely to render the obligation voidable at the election of the obligor, the defense is cut off.” Uniform Commercial Code, Section 3-305, Comment 1. James White and Robert Summers, in their hornbook on the UCC,

4. In negotiable-instrument law, defenses that are not good against a holder in due course.

opine that unconscionability is almost always a personal defense, not assertable against an HDC. James White and Robert Summers, Uniform Commercial Code, 2/e, 575 (1980). But again, the HDC takes free only from personal defenses of parties with whom she has not dealt. So while the payee of a note can be an HDC, if he dealt with the maker, he is subject to the maker's defenses.

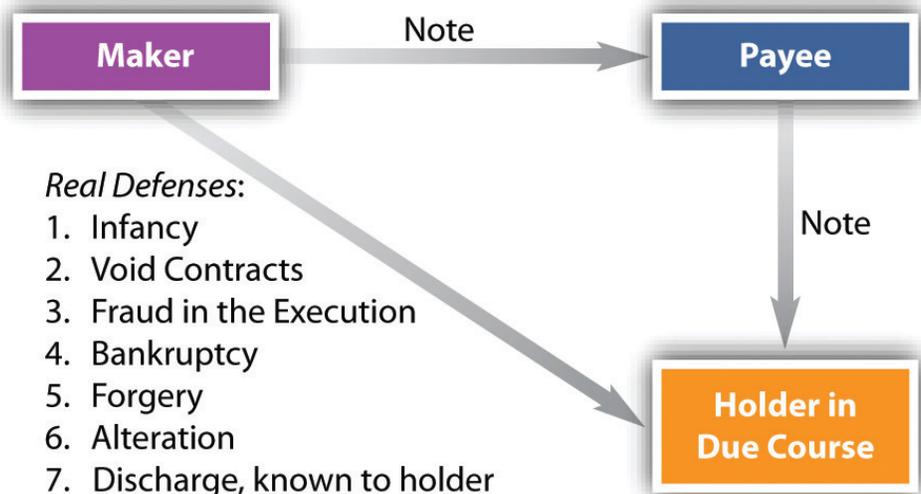

Holder in Due Course Is Subject to Real Defenses

An HDC in a nonconsumer transaction is not subject to personal defenses, but he is subject to the so-called **real defenses**⁵ (or “universal defenses”)—they are good against an HDC.

The real defenses good against any holder, including HDCs, are as follows (see [Figure 24.2 "Real Defenses"](#)):

1. Unauthorized signature (forgery) (UCC, Section 3-401(a))
2. Bankruptcy (UCC, Section 3-305(a))
3. Infancy (UCC, Section 3-305(a))
4. Fraudulent alteration (UCC, Section 3-407(b) and (c))
5. Duress, mental incapacity, or illegality that renders the obligation void (UCC, Section 3-305(a))
6. Fraud in the execution (UCC, Section 3-305(a))
7. Discharge of which the holder has notice when he takes the instrument (UCC, Section 3-601)

Figure 24.2 *Real Defenses*

5. In negotiable-instrument law, defenses that are good against a holder in due course.

Analysis of the Real Defenses

Though most of these concepts are pretty clear, a few comments by way of analysis are appropriate.

Forgery

Forgery is a real defense to an action by an HDC. As we have noted, though, negligence in the making or handling of a negotiable instrument may cut off this defense against an HDC—as, for example, when a drawer who uses a rubber signature stamp carelessly leaves it unattended. And notice, too, that Section 3-308 of the UCC provides that signatures are presumed valid unless their validity is specifically denied, at which time the burden shifts to the person claiming validity. These issues are discussed in *Triffin v. Somerset Valley Bank*, in [Section 24.3 "Cases"](#) of this chapter.

Bankruptcy

Drawers, makers, and subsequent indorsers are not liable to an HDC if they have been discharged in bankruptcy. If they were, bankruptcy would not serve much purpose.

Infancy

Whether an infant's signature on a negotiable instrument is a valid defense depends on the law of the state. In some states, for instance, an infant who misrepresents his age is estopped from asserting infancy as a defense to a breach of contract. In those states, infancy would not be available as a defense against the effort of an HDC to collect.

Fraudulent Alteration

Under Section 3-407 of the UCC, "fraudulent alteration" means either (1) an unauthorized change in an instrument that purports to modify in any respect the obligation of a party or (2) an unauthorized addition of words or numbers or other change to an incomplete instrument relating to the obligation of a party. An alteration fraudulently made discharges a party whose obligation is affected by the alteration unless that party assents or is precluded from asserting the alteration. But a nonfraudulent alteration—for example, filling in an omitted date or giving the obligor the benefit of a lower interest rate—does not discharge the obligor. In any case, the person paying or taking the instrument may pay or collect "according to its original terms, or in the case of an incomplete instrument that is altered by unauthorized completion, according to its terms as completed. If blanks are filled or

an incomplete instrument is otherwise completed, subsection (c) places the loss upon the party who left the instrument incomplete by permitting enforcement in its completed form. This result is intended even though the instrument was stolen from the issuer and completed after the theft.” A moral here: don’t leave instruments lying around with blanks that could be filled in.

Void Contract

A void contract is distinguished from a voidable contract; only the former is a real defense.

Fraud in the Execution

You may recall that this is the rather unusual situation in which a person is tricked into signing a document. Able holds out a piece of paper for her boss and points to the signature line, saying, “This is a receipt for goods we received a little while ago.” Baker signs it. It is not a receipt; it’s the signature line on a promissory note. Able has committed fraud in the execution, and the note is void.

Discharge of Which the Holder Has Notice

If the holder knows that the paper—a note, say—has already been paid, she cannot enforce it. That’s a good reason to take back any note you have made from the person who presents it to you for payment.

Consumer Transactions and Holders in Due Course

The holder-in-due-course doctrine often worked considerable hardship on the consumer, usually as the maker of an installment note.

For example, a number of students are approached by a gym owner who induces them to sign one-year promissory notes for \$150 for a one-year gym membership. The owner says, “I know that right now the equipment in the gym is pretty rudimentary, but then, too, \$150 is about half what you’d pay at the YMCA or Gold’s Gym. And the thing is, as we get more customers signing up, we’re going to use the money to invest in new equipment. So within several months we’ll have a fully equipped facility for your use.” Several students sign the notes, which the owner sells to a **factor**⁶ (one that lends money to another, taking back a negotiable instrument as security, usually at about a 20 percent discount). The factor takes as an apparent HDC, but the gym idea doesn’t work and the owner declares bankruptcy. If this were a commercial transaction, the makers (the students) would

6. One that lends money to another, taking back a negotiable instrument as security.

still owe on the notes even if there was, as here, a complete failure of consideration (called “paying on a dead horse”). But the students don’t have to pay.

Whether the gym owner here committed fraud is uncertain, but the holder-in-due-course doctrine did often work to promote fraud. Courts frequently saw cases brought by credit companies (factors) against consumers who bought machines that did not work and services that did not live up to their promises. The ancient concept of an HDC did not square with the realities of modern commerce, in which instruments by the millions are negotiated for uncompleted transactions. The finance company that bought such commercial paper could never have honestly claimed (in the sociological sense) to be wholly ignorant that many makers will have claims against their payees (though they could and did make the claim in the legal sense).

Acting to curb abuses, the Federal Trade Commission (FTC) in 1976 promulgated a trade regulation rule that in effect abolished the holder-in-due-course rule for consumer credit transactions. Under the FTC rule titled “Preservation of Consumers’ Claims and Defenses,”¹⁶ *Code of Federal Regulations*, Section 433. the creditor becomes a mere holder and stands in the shoes of the seller, subject to all claims and defenses that the debtor could assert against the seller. Specifically, the rule requires the seller to provide notice in any consumer credit contract that the debtor is entitled to raise defenses against any subsequent purchaser of the paper. It also bars the seller from accepting any outside financing unless the loan contract between the consumer and the outside finance company contains a similar notice. (The required notice, to be printed in no less than ten-point, boldface type, is set out in [Figure 24.3 "Notice of Defense"](#).) The effect of the rule is to ensure that a consumer’s claim against the seller will not be defeated by a transfer of the paper. The FTC rule has this effect because the paragraph to be inserted in the consumer credit contract gives the holder notice sufficient to prevent him from becoming an HDC.

The rule applies only to consumer credit transactions. A **consumer transaction**⁷ is defined as a purchase of goods or services by a natural person, not a corporation or partnership, for personal, family, or household use from a seller in the ordinary course of business. Uniform Commercial Code, Section 2-201(11). Purchases of goods or services for commercial purposes and purchases of interests in real property, commodities, or securities are not affected. The rule applies to any credit extended by the seller himself (except for credit card transactions) or to any “purchase money loan.” This type of loan is defined as a cash advance to the consumer applied in whole or substantial part to a purchase of goods or services from a seller who either (a) refers consumers to the creditor or (b) is affiliated with the creditor. The purpose of this definition is to prevent the seller from making an end run around the rule by arranging a loan for the consumer through an outside finance company.

7. A transaction in which an individual incurs an obligation primarily for personal, family, or household purposes.

The rule does not apply to a loan that the consumer arranges with an independent finance company entirely on his own.

The net effect of the FTC rule is this: the holder-in-due-course doctrine is virtually dead in consumer credit contracts. It remains alive and flourishing as a legal doctrine in all other business transactions.

Figure 24.3 *Notice of Defense*

NOTICE

ANY HOLDER OF THIS CONSUMER CREDIT CONTRACT IS SUBJECT TO ALL CLAIMS AND DEFENSES WHICH THE DEBTOR COULD ASSERT AGAINST THE SELLER OF GOODS OR SERVICES OBTAINED PURSUANT HERETO OR WITH THE PROCEEDS HEREOF. RECOVERY HEREUNDER BY THE DEBTOR SHALL NOT EXCEED AMOUNTS PAID BY THE DEBTOR HEREUNDER.

KEY TAKEAWAY

The privileged position of the HDC stands up against the so-called personal defenses, which are—more or less—the same as typical defenses to obligation on any contract, *not including*, however, the real defenses. Real defenses are good against any holder, including an HDC. These are infancy, void obligations, fraud in the execution, bankruptcy, discharge of which holder has notice, unauthorized signatures, and fraudulent alterations. While a payee may be an HDC, his or her rights as such are limited to avoiding defenses of persons the payee did not deal with. The shelter rule says that the transferee of an instrument takes the same rights that the transferor had. The Federal Trade Commission has abrogated the holder-in-due-course doctrine for consumer transactions.

EXERCISES

1. What purpose does the holder-in-due-course doctrine serve?
2. What defenses is an HDC not subject to? What defenses is an HDC subject to?
3. What is the Shelter Rule, and what purpose does it serve?
4. For what transactions has the FTC abolished the holder-in-due-course doctrine and why?
5. Under what circumstances is a forged signature valid?

24.3 Cases

Executory Promise as Satisfying “Value”

Carter & Grimsley v. Omni Trading, Inc.

716 N.E.2d 320 (Ill. App. 1999)

Lytton, J.

Facts

Omni purchased some grain from Country Grain, and on February 2, 1996, it issued two checks, totaling \$75,000, to Country Grain. Country Grain, in turn, endorsed the checks over to Carter as a retainer for future legal services. Carter deposited the checks on February 5; Country Grain failed the next day. On February 8, Carter was notified that Omni had stopped payment on the checks. Carter subsequently filed a complaint against Omni...alleging that it was entitled to the proceeds of the checks, plus pre-judgment interest, as a holder in due course....[Carter moved for summary judgment; the motion was denied.]

Discussion

Carter argues that its motion for summary judgment should have been granted because, as a holder in due course, it has the right to recover on the checks from the drawer, Omni.

The Illinois Uniform Commercial Code (UCC) defines a holder in due course as:

“the holder of an instrument if:

(1) the instrument when issued does not bear such apparent evidence of forgery or alteration or is not otherwise so irregular or incomplete as to call into question its authenticity, and (2) the holder took the instrument (i) for value,...

Section 3-303(a) of the UCC also states that:

(a) “An instrument is issued or transferred for value if: (1) the instrument is issued or transferred for a promise of performance, **to the extent that the promise has been performed** * * *.” (emphasis added)

Carter contends that in Illinois a contract for future legal services should be treated differently than other executory contracts. It contends that when the attorney-client relationship is created by payment of a fee or retainer, the contract is no longer executory. Thus, Carter would achieve holder in due course status. We are not persuaded.

A retainer is the act of a client employing an attorney; it also denotes the fee paid by the client when he retains the attorney to act for him. [Citation] We have found no Illinois cases construing section 3-303(a) as it relates to a promise to perform future legal services under a retainer. The general rule, however, is that “an executory promise is not value.” [Citation] “[T]he promise does not rise to the level of ‘value’ in the commercial paper market until it is actually performed.” [Citation]

The UCC comment to section 303 gives the following example:

“Case # 2. X issues a check to Y in consideration of Y’s promise to perform services in the future. Although the executory promise is consideration for issuance of the check it is value only to the extent the promise is performed.

We have found no exceptions to these principles for retainers. Indeed, courts in other jurisdictions interpreting similar language under section 3-303 have held that attorneys may be holders in due course only to the extent that they have actually performed legal services prior to acquiring a negotiable instrument. See [Citations: Pennsylvania, Florida, Massachusetts]. We agree.

This retainer was a contract for future legal services. Under section 3-303(a)(1), it was a “promise of performance,” not yet performed. Thus, no value was received, and Carter is not a holder in due course.

Furthermore, in this case, no evidence was presented in the trial court that Carter performed any legal services for Country Grain prior to receiving the checks. Without an evidentiary basis for finding that Carter received the checks for services performed, the trial court correctly found that Carter failed to prove that it was a holder in due course. [Citations]

Conclusion

Because we have decided that Carter did not take the checks for value under section 3-303(a) of the UCC, we need not address its other arguments.

The judgment of the circuit court of Peoria County is affirmed.

Holdridge, J., dissenting.

I respectfully dissent. In a contractual relationship between attorney and client, the payment of a fee or retainer creates the relationship, and once that relationship is created the contract is no longer executory. [Citation] Carter's agreement to enter into an attorney-client relationship with Country Grain was the value exchanged for the checks endorsed over to the firm. Thus, the general rule cited by the majority that "an executory promise is not value" does not apply to the case at bar. On that basis I would hold that the trial court erred in determining that Carter was not entitled to the check proceeds and I therefore dissent.

CASE QUESTIONS

1. How did Carter & Grimsley obtain the two checks drawn by Omni?
2. Why—apparently—did Omni stop payments on the checks?
3. Why did the court determine that Carter was not an HDC?
4. Who is it that must have performed here in order for Carter to have been an HDC, Country Grain or Carter?
5. How could making a retainer payment to an attorney be considered anything other than payment on an executory contract, as the dissent argues?

The "Good Faith and Reasonable Commercial Standards" Requirement

Buckeye Check Cashing, Inc. v. Camp

825 N.E.2d 644 (Ohio App. 2005)

Donovan, J.

Defendant-appellant Shawn Sheth appeals from a judgment of the Xenia Municipal Court in favor of plaintiff-appellee Buckeye Check Cashing, Inc. (“Buckeye”). Sheth contends that the trial court erred in finding that Buckeye was a holder in due course of a postdated check drawn by Sheth and therefore was entitled to payment on the instrument despite the fact that Sheth had issued a stop-payment order to his bank.

In support of this assertion, Sheth argues that the trial court did not use the correct legal standard in granting holder-in-due-course status to Buckeye. In particular, Sheth asserts that the trial court used the pre-1990 Uniform Commercial Code (“UCC”) definition of “good faith” as it pertains to holder-in-due-course status, which defined it as “honesty in fact.” The definition of “good faith” was extended by the authors of the UCC in 1990 to also mean “the observance of reasonable commercial standards of fair dealing.” The post-1990 definition was adopted by the Ohio legislature in 1994.

Sheth argues that while Buckeye would prevail under the pre-1990, “honesty in fact” definition of “good faith,” it failed to act in a commercially reasonable manner when it chose to cash the postdated check drawn by Sheth. The lower court...adjudged Buckeye to be a holder in due course and, therefore, entitled to payment. We conclude that the trial court used the incorrect “good faith” standard when it granted holder-in-due-course status to Buckeye because Buckeye did not act in a commercially reasonable manner when it cashed the postdated check drawn by Sheth. Because we accept Sheth’s sole assignment of error, the judgment of the trial court is reversed.

On or about October 12, 2003, Sheth entered into negotiations with James A. Camp for Camp to provide certain services to Sheth by October 15, 2003. To that end, Sheth issued Camp a check for \$1,300. The check was postdated to October 15, 2003.

On October 13, 2003, Camp negotiated the check to Buckeye and received a payment of \$1,261.31. Apparently fearing that Camp did not intend to fulfill his end of the contract, Sheth contacted his bank on October 14, 2003, and issued a stop-payment order on the check. Unaware of the stop-payment order, Buckeye deposited the check with its own bank on October 14, 2003, believing that the check would reach Sheth’s bank by October 15, 2003. Because the stop-payment order was in effect, the check was ultimately dishonored by Sheth’s bank. After an unsuccessful attempt to obtain payment directly from Sheth, Buckeye brought suit.

Sheth’s sole assignment of error is as follows:

“The trial court erred by applying the incorrect legal standard in granting holder in due course status to the plaintiff-appellee because the plaintiff-appellee failed to follow commercially reasonable standards in electing to cash the check that gives rise to this dispute.”

[UCC 3-302] outlines the elements required to receive holder-in-due-course status. The statute states:

...‘holder in due course’ means the holder of an instrument if both of the following apply:

“(1) The instrument when issued or negotiated to the holder does not bear evidence of forgery or alteration that is so apparent, or is otherwise so irregular or incomplete as to call into question its authenticity;

“(2) The holder took the instrument under all of the following circumstances:

(a) For value;

(b) **In good faith;**

(c) Without notice that the instrument is overdue or has been dishonored or that there is an uncured default with respect to payment of another instrument issued as part of the same series;

(d) Without notice that the instrument contains an unauthorized signature or has been altered;

(e) Without notice of any claim to the instrument as described in [3-306];

(f) Without notice that any party has a defense or claim in recoupment described in [UCC 3-305(a); emphasis added].

At issue in the instant appeal is whether Buckeye acted in “good faith” when it chose to honor the postdated check originally drawn by Sheth....UCC 1-201, defines “good faith” as “honesty in fact and the observance of reasonable commercial standards of fair dealing.” Before the Ohio legislature amended UCC 1-201 in 1994, that section did not define “good faith”; the definition of “good faith” as “honesty in fact” in UCC 1-201 was the definition that applied[.]...

“Honesty in fact” is defined as the absence of bad faith or dishonesty with respect to a party’s conduct within a commercial transaction. [Citation] Under that standard, absent fraudulent behavior, an otherwise innocent party was assumed to have acted in good faith. The “honesty in fact” requirement, also known as the “pure heart and empty head” doctrine, is a subjective test under which a holder had to subjectively believe he was negotiating an instrument in good faith for him to become a holder in due course. Maine [Citation, 1999].

In 1994, however, the Ohio legislature amended the definition of “good faith” to include not only the subjective “honesty in fact” test, but also an objective test: “the observance of reasonable commercial standards of fair dealing.” Ohio UCC 1-201(20). A holder in due course must now satisfy both a subjective and an objective test of good faith. What constitutes “reasonable commercial standards of fair dealing” for parties claiming holder-in-due-course status, however, has not heretofore been defined in the state of Ohio.

In support of his contention that Buckeye is not a holder in due course, Sheth cites a decision from the Supreme Court of Maine, [referred to above] in which the court provided clarification with respect to the objective prong of the “good faith” analysis:

“The fact finder must therefore determine, first, whether the conduct of the holder comported with industry or ‘commercial’ standards applicable to the transaction and second, whether those standards were reasonable standards intended to result in fair dealing. Each of those determinations must be made in the context of the specific transaction at hand. If the fact finder’s conclusion on each point is ‘yes,’ the holder will be determined to have acted in good faith even if, in the individual transaction at issue, the result appears unreasonable. Thus, a holder may be accorded holder in due course where it acts pursuant to those reasonable commercial standards of fair dealing—even if it is negligent—but may lose that status, even where it complies with commercial standards, if those standards are not reasonably related to achieving fair dealing.” [Citation]

Check cashing is an unlicensed and unregulated business in Ohio. [Citation] Thus, there are no concrete commercial standards by which check-cashing businesses must operate. Moreover, Buckeye argues that its own internal operating policies do not require that it verify the availability of funds, nor does Buckeye apparently have any guidelines with respect to the acceptance of postdated checks. Buckeye asserts that cashing a postdated check does not prevent a holder from obtaining holder-in-due-course status and cites several cases in support of this contention. All of the cases cited by Buckeye, however, were decided prior to the UCC’s addition of the objective prong to the definition of “good faith.”

Under a purely subjective “honesty in fact” analysis, it is clear that Buckeye accepted the check from Camp in good faith and would therefore achieve holder-in-due-course status. When the objective prong of the good faith test is applied, however, we find that Buckeye did not conduct itself in a commercially reasonable manner. While not going so far as to say that cashing a postdated check prevents a holder from obtaining holder-in-due-course status in every instance, the presentation of a postdated check should put the check cashing entity on notice that the check might not be good. Buckeye accepted the postdated check at its own peril. Some attempt at verification should be made before a check-cashing business cashes a postdated check. Such a failure to act does not constitute taking an instrument in good faith under the current objective test of “reasonable commercial standards” enunciated in [the UCC].

We conclude that in deciding to amend the good faith requirement to include an objective component of “reasonable commercial standards,” the Ohio legislature intended to place a duty on the holders of certain instruments to act in a responsible manner in order to obtain holder-in-due-course status. When Buckeye decided to cash the postdated check presented by Camp, it did so without making any attempt to verify its validity. This court in no way seeks to curtail the free negotiability of commercial instruments. However, the nature of certain instruments, such as the postdated check in this case, renders it necessary for appellee Buckeye to take minimal steps to protect its interests. That was not done. Buckeye was put on notice that the check was not good until October 15, 2003. “Good faith,” as it is defined in the UCC and the Ohio Revised Code, requires that a holder demonstrate not only honesty in fact but also that the holder act in a commercially reasonable manner. Without taking any steps to discover whether the postdated check issued by Sheth was valid, Buckeye failed to act in a commercially reasonable manner and therefore was not a holder in due course.

Based upon the foregoing, Sheth’s single assignment of error is sustained, the judgment of the Xenia Municipal Court is reversed, and this matter is remanded to that court for further proceedings in accordance with law and consistent with this opinion.

Judgment reversed, and cause remanded.

CASE QUESTIONS

1. Who was Camp? Why did Sheth give him a check? Why is the case titled *Buckeye v. Camp*?
2. How does giving someone a postdated check offer the drawer any protection? How does it give rise to any “notice that the check might not be good”?
3. If Camp had taken the check to Sheth’s bank to cash it, what would have happened?
4. What difference did the court discern between the pre-1990 UCC Article 3 and the post-1990 Article 3 (that Ohio adopted in 1994)?

The Shelter Rule

Triffin v. Somerset Valley Bank

777 A.2d 993 (N.J. Ct. App. 2001)

Cuff, J.

This case concerns the enforceability of dishonored checks against the issuer of the checks under Article 3 of the Uniform Commercial Code (UCC), as implemented in New Jersey[.]

Plaintiff [Robert J. Triffin] purchased, through assignment agreements with check cashing companies, eighteen dishonored checks, issued by defendant Hauser Contracting Company (Hauser Co.). Plaintiff then filed suit...to enforce Hauser Co.’s liability on the checks. The trial court granted plaintiff’s motion for summary judgment. Hauser Co. appeals the grant of summary judgment....We affirm.

In October 1998, Alfred M. Hauser, president of Hauser Co., was notified by Edwards Food Store in Raritan and the Somerset Valley Bank (the Bank), that several individuals were cashing what appeared to be Hauser Co. payroll checks. Mr. Hauser reviewed the checks, ascertained that the checks were counterfeits and contacted the Raritan Borough and Hillsborough Police Departments. Mr. Hauser concluded that the checks were counterfeits because none of the payees were employees of Hauser Co., and because he did not write the checks or authorize anyone to sign those checks on his behalf. At that time, Hauser Co. employed Automatic Data Processing, Inc. (ADP) to provide payroll services and a facsimile signature was utilized on all Hauser Co. payroll checks.

Mr. Hauser executed affidavits of stolen and forged checks at the Bank, stopping payment on the checks at issue. Subsequently, the Bank received more than eighty similar checks valued at \$25,000 all drawn on Hauser Co.'s account.

Plaintiff is in the business of purchasing dishonored negotiable instruments. In February and March 1999, plaintiff purchased eighteen dishonored checks from four different check cashing agencies, specifying Hauser Co. as the drawer. The checks totaled \$8,826.42. Pursuant to assignment agreements executed by plaintiff, each agency stated that it cashed the checks for value, in good faith, without notice of any claims or defenses to the checks, without knowledge that any of the signatures were unauthorized or forged, and with the expectation that the checks would be paid upon presentment to the bank upon which the checks were drawn. All eighteen checks bore a red and green facsimile drawer's signature stamp in the name of Alfred M. Hauser. All eighteen checks were marked by the Bank as "stolen check" and stamped with the warning, "do not present again." ...

Plaintiff then filed this action against the Bank, Hauser Co.,...Plaintiff contended that Hauser Co. was negligent in failing to safeguard both its payroll checks and its authorized drawer's facsimile stamp, and was liable for payment of the checks.

The trial court granted plaintiff's summary judgment motion, concluding that no genuine issue of fact existed as to the authenticity of the eighteen checks at issue. Judge Hoens concluded that because the check cashing companies took the checks in good faith, plaintiff was a holder in due course as assignee. Judge Hoens also found that because the checks appeared to be genuine, Hauser Co. was required, but had failed, to show that plaintiff's assignor had any notice that the checks were not validly drawn....

Hauser Co. argues that summary judgment was improperly granted because the court failed to properly address Hauser Co.'s defense that the checks at issue were invalid negotiable instruments and therefore erred in finding plaintiff was a holder in due course.

As a threshold matter, it is evident that the eighteen checks meet the definition of a negotiable instrument [UCC 3-104]. Each check is payable to a bearer for a fixed amount, on demand, and does not state any other undertaking by the person promising payment, aside from the payment of money. In addition, each check appears to have been signed by Mr. Hauser, through the use of a facsimile stamp, permitted by the UCC to take the place of a manual signature. [Section 3-401(b) of the UCC] provides that a "signature may be made manually or by means of a device or machine...with present intention to authenticate a writing." It is uncontroverted

by Hauser Co. that the facsimile signature stamp on the checks is identical to Hauser Co.'s authorized stamp.

Hauser Co., however, contends that the checks are not negotiable instruments because Mr. Hauser did not sign the checks, did not authorize their signing, and its payroll service, ADP, did not produce the checks. Lack of authorization, however, is a separate issue from whether the checks are negotiable instruments. Consequently, given that the checks are negotiable instruments, the next issue is whether the checks are unenforceable by a holder in due course, because the signature on the checks was forged or unauthorized.

[Sections 3-203 and 3-302 of the UCC] discuss the rights of a holder in due course and the rights of a transferee of a holder in due course. Section 3-302 establishes that a person is a holder in due course if:

(1) the instrument when issued or negotiated to the holder does not bear such apparent evidence of forgery or alteration or is not otherwise so irregular or incomplete as to call into question its authenticity; and

(2) the holder took the instrument for value, in good faith, without notice that the instrument is overdue or has been dishonored or that there is an uncured default with respect to payment of another instrument issued as part of the same series, without notice that the instrument contains an unauthorized signature or has been altered, without notice of any claim to the instrument described in 3-306, and without notice that any party has a defense or claim in recoupment described in subsection a. of 3-305.

Section 3-203 deals with transfer of instruments and provides:

a. An instrument is transferred when it is delivered by a person other than its issuer for the purpose of giving to the person receiving delivery the right to enforce the instrument.

b. Transfer of an instrument, whether or not the transfer is a negotiation, vests in the transferee any right of the transferor to enforce the instrument, including any right as a holder in due course, but the transferee cannot acquire rights of a holder in due course by a transfer, directly or indirectly, from a holder in due course if the transferee engaged in fraud or illegality affecting the instrument....

Under subsection (b) a holder in due course that transfers an instrument transfers those rights as a holder in due course to the purchaser. The policy is to assure the holder in due course a free market for the instrument.

The record indicates that plaintiff has complied with the requirements of both sections 3-302 and 3-203. Each of the check cashing companies from whom plaintiff purchased the dishonored checks were holders in due course. In support of his summary judgment motion, plaintiff submitted an affidavit from each company; each company swore that it cashed the checks for value, in good faith, without notice of any claims or defenses by any party, without knowledge that any of the signatures on the checks were unauthorized or fraudulent, and with the expectation that the checks would be paid upon their presentment to the bank upon which the checks were drawn. Hauser Co. does not dispute any of the facts sworn to by the check cashing companies.

The checks were then transferred to plaintiff in accordance with section 3-303, vesting plaintiff with holder in due course status. Each company swore that it assigned the checks to plaintiff in exchange for consideration received from plaintiff. Plaintiff thus acquired the check cashing companies' holder in due course status when the checks were assigned to plaintiff. Moreover, pursuant to section 3-403(a)'s requirement that the transfer must have been made for the purpose of giving the transferee the right to enforce the instrument, the assignment agreements expressly provided plaintiff with that right, stating that "all payments [assignor] may receive from any of the referenced Debtors...shall be the exclusive property of [assignee]." Again, Hauser Co. does not dispute any facts relating to the assignment of the checks to plaintiff.

Hauser Co. contends, instead, that the checks are per se invalid because they were fraudulent and unauthorized. Presumably, this argument is predicated on section 3-302. This section states a person is not a holder in due course if the instrument bears "apparent evidence of forgery or alteration" or is otherwise "so irregular or incomplete as to call into question its authenticity."

In order to preclude liability from a holder in due course under section 3-302, it must be apparent on the face of the instrument that it is fraudulent. The trial court specifically found that Hauser Co. had provided no such evidence, stating that Hauser Co. had failed to show that there was anything about the appearance of the checks to place the check cashing company on notice that any check was not valid. Specifically, with respect to Hauser Co.'s facsimile signature on the checks, the court stated that the signature was identical to Hauser Co.'s authorized facsimile signature. Moreover, each of the check cashing companies certified that they had no knowledge that the signatures on the checks were fraudulent or that there were

any claims or defenses to enforcement of the checks. Hence, the trial court's conclusion that there was no apparent evidence of invalidity was not an abuse of discretion and was based on a reasonable reading of the record.

To be sure, section 3-308(a) does shift the burden of establishing the validity of the signature to the plaintiff, but only if the defendant specifically denies the signature's validity in the pleadings. The section states:

In an action with respect to an instrument, the authenticity of, and authority to make, each signature on the instrument is admitted unless specifically denied in the pleadings. If the validity of a signature is denied in the pleadings, the burden of establishing validity is on the person claiming validity, but the signature is presumed to be authentic and authorized unless the action is to enforce the liability of the purported signer and the signer is dead or incompetent at the time of trial of the issue of validity of the signature.

Examination of the pleadings reveals that Hauser Co. did not specifically deny the factual assertions in plaintiff's complaint.

Hence, the trial court's conclusion that there was no apparent evidence of invalidity was not an abuse of discretion and was based on a reasonable reading of the record.

In conclusion, we hold that Judge Hoens properly granted summary judgment. There was no issue of material fact as to: (1) the status of the checks as negotiable instruments; (2) the status of the check cashing companies as holders in due course; (3) the status of plaintiff as a holder in due course; and (4) the lack of apparent evidence on the face of the checks that they were forged, altered or otherwise irregular. Moreover, Hauser Co.'s failure to submit some factual evidence indicating that the facsimile signature was forged or otherwise unauthorized left unchallenged the UCC's rebuttable presumption that a signature on an instrument is valid. Consequently, the trial court properly held, as a matter of law, that plaintiff was a holder in due course and entitled to enforce the checks. Affirmed.

CASE QUESTIONS

1. Why did the plaintiff, Mr. Triffin, obtain possession of the dishonored checks? Regarding the plaintiff, consider this:
<http://caselaw.findlaw.com/nj-supreme-court/1332248.html>.
2. Section 4-401 of the UCC says nobody is liable on an instrument unless the person signed it, and Section 4-403(a) provides that “an unauthorized signature is ineffective” (except as the signature of the unauthorized person), so how could Hauser Co. be liable at all? And why did the court never discuss plaintiff’s contention that the defendant “was negligent in failing to safeguard both its payroll checks and its authorized drawer’s facsimile stamp”?
3. Why didn’t the Hauser Co. specifically deny the authenticity of the signatures?
4. Obviously, the plaintiff must have known that there was something wrong with the checks when he bought them from the check-cashing companies: they had been dishonored and were marked “Stolen, do not present again.” Did he present them again?
5. While the UCC does not require that the transferee of an instrument acted in good faith in order to collect on the instrument as an HDC (though he can’t have participated in any scam), it disallows a person from being an HDC if he takes an instrument with notice of dishonor. Surely the plaintiff had notice of that. What does the UCC require that transformed Mr. Triffin—via the shelter rule—into a person with the rights of an HDC?
6. If the plaintiff had not purchased the checks from the check-cashing companies, who would have taken the loss here?
7. What recourse does the defendant, Hauser Co., have now?
8. Authors’ comment: How this scam unfolded is suggested in the following segment of an online guide to reducing financial transaction fraud.

Recommendations: It is clear from this case that if a thief can get check stock that looks genuine, your company can be held liable for losses that may occur from those counterfeit checks. Most companies buy check stock from vendors that sell the identical check stock entirely blank to other companies, totally uncontrolled, thus aiding the forgers. Many companies opt for these checks because they are less expensive than controlled, high security checks (excluding legal fees and holder in due course judgments). Forgers buy the check stock, and using a \$99

scanner and Adobe Illustrator, create counterfeit checks that cannot be distinguished from the account holder's original checks. This is how legal exposure to a holder in due course claim can be and is created. Companies should use checks uniquely designed and manufactured for them, or buy from vendors such as SAFEChecks (<http://www.safechecks.com>) that customize every company's check and never sells check stock entirely blank without it first being customized for the end user. Frank Abagnale and Greg Litster, *Holder in Due Course and Check Fraud*, TransactionDirectory.com.

24.4 Summary and Exercises

Summary

A holder is a holder in due course (HDC) if he takes the instrument without reason to question its authenticity on account of obvious facial irregularities, for value, in good faith, and without notice that it is overdue or has been dishonored, or that it contains a forgery or alteration, or that that any person has any defense against it or claim to it. The HDC takes the paper free of most defenses; an ordinary holder takes the paper as an assignee, acquiring only the rights of the assignor.

Value is not the same as consideration; hence, a promise will not satisfy this criterion until it has been performed. The HDC must have given something of value other than a promise to give.

Good faith means (1) honesty in fact in the conduct or transaction concerned and (2) the observance of reasonable commercial standards of fair dealing. Honesty in fact is a subjective test, but the observance of reasonable commercial standards is objective.

Notice is not limited to receipt of an explicit statement of defenses; a holder may be given notice through inferences that should be drawn from the character of the instrument. Thus an incomplete instrument, one that bears marks of forgery, or one that indicates it is overdue may give notice on its face. Certain facts do not necessarily give notice of defense or claim: that the instrument is antedated or postdated, that the instrument was negotiated in return for an executory promise, that any party has signed for accommodation, that an incomplete instrument has been completed, that any person negotiating the instrument is or was a fiduciary, or that there has been default in payment of interest or principal.

A person who could not have become an HDC directly (e.g., because he had notice of a defense or claim) may become so if he takes as transferee from an HDC as long as he was not a party to any fraud or illegality affecting the instrument or had not previously been a holder with notice of a defense or claim. This is the shelter rule.

Holders in due course are not immune from all defenses. A real, as opposed to a personal, defense may be asserted against the HDC. Personal defenses include fraud in the inducement, failure of consideration, nonperformance of a condition precedent, and the like. Real defenses consist of infancy, acts that would make a contract void (such as duress), fraud in the execution, forgery, and discharge in bankruptcy. A 1976 trade regulation rule of the Federal Trade Commission abolishes the holder-in-due-course rule for consumer transactions.

EXERCISES

1. Mike signed and delivered a note for \$9,000 to Paul Payee in exchange for Paul's tractor. Paul transferred the note to Hilda, who promised to pay \$7,500 for it. After Hilda had paid Paul \$5,000 of the promised \$7,500, Hilda learned that Mike had a defense: the tractor was defective. How much, if anything, can Hilda collect from Mike on the note, and why?
2. In Exercise 1, if Hilda had paid Paul \$7,500 and then learned of Mike's defense, how much—if any of the amount—could she collect from Mike?
3. Tex fraudulently sold a boat, to which he did not have title, to Sheryl for \$30,000 and received, as a deposit from her, a check in the amount of \$5,000. He deposited the check in his account at First Bank and immediately withdrew \$3,000 of the proceeds. When Sheryl discovered that Tex had no title, she called her bank (the drawee) and stopped payment on the check. Tex, in the meantime, disappeared. First Bank now wishes to collect the \$3,000 from Sheryl, but she claims it is not an HDC because it did not give value for the check in that the payment to Tex was conditional: the bank retained the right to collect from Tex if it could not collect on the check. Is Sheryl correct? Explain.
4. Corporation draws a check payable to First Bank. The check is given to an officer of Corporation (known to Bank), who is instructed to deliver it to Bank in payment of a debt owed by Corporation to Bank. Instead, the officer, intending to defraud Corporation, delivers the check to Bank in payment of his personal debt. Bank has received funds of Corporation that have been used for the personal benefit of the officer. Corporation asserts a claim to the proceeds of the check against Bank. Is Bank an HDC of the check?
5. Contractor contracted with Betty Baker to install a new furnace in Baker's business. Baker wrote a check for \$8,000 (the price quoted by Contractor) payable to Furnace Co., which Contractor delivered to Furnace Co. in payment of his own debt to it. Furnace Co. knew nothing of what went on between Contractor and Baker. When Contractor did not complete the job, Baker stopped payment on the check. Furnace Co. sued Baker, who defended by claiming failure of consideration. Is this a good defense against Furnace Co.?
6. Benson purchased a double-paned, gas-filled picture window for his house from Wonder Window, making a \$200 deposit and signing an installment contract, which is here set out in its entirety:

October 3, 2012

I promise to pay to Wonder Window or order the sum of \$1,000 in five equal installments of \$200.

[Signed] Benson

Wonder Window negotiated the installment contract to Devon, who took the instrument for value, in good faith, without notice of any claim or defense of any party, and without question of the instrument's authenticity. After Benson made three payments, the window fogged up inside and was unacceptable. Benson wants his money back from Wonder Window, and he wants to discontinue further payments. Can he do that? Explain.

7. The Turmans executed a deed of trust note (a note and mortgage) dated November 12, 2012, for \$100,000 payable to Ward's Home Improvement, Inc. The note was consideration for a contract: Ward was to construct a home on the Turmans' property. The same day, Ward executed a separate written assignment of the note to Robert L. Pomerantz, which specifically used the word "assigns." Ward did not endorse the note to Pomerantz or otherwise write on it. Ward did not complete the house; to do so would require the expenditure of an additional \$42,000. Pomerantz maintained he is a holder in due course of the \$100,000 note and demanded payment from the Turmans. Does he get paid? Explain. *Turman v. Ward's Home Imp., Inc.*, 1995 WL 1055769, Va. Cir. Ct. (1995).

SELF-TEST QUESTIONS

1. Which defeats a person from being an HDC?
 - a. She takes the paper in return for a promise by the maker or drawer to perform a service in the future.
 - b. She subjectively takes it in good faith, but most people would recognize the deal as suspect.
 - c. The instrument contains a very clever, almost undetectable forged signature.
 - d. The instrument was postdated.
 - e. All these are grounds to defeat the HDC status.

2. Personal defenses are
 - a. good against all holders
 - b. good against holders but not HDCs
 - c. good against HDCs but not holders
 - d. not good against any holder, HDC or otherwise
 - e. sometimes good against HDCs, depending on the facts

3. Fraud in the inducement is a _____ defense.
 - a. real
 - b. personal

4. A person would not be an HDC if she
 - a. was notified that payment on the instrument had been refused
 - b. knew that one of the prior indorsers had been discharged
 - c. understood that the note was collateral for a loan
 - d. purchased the note at a discount

5. Rock Industries agreed to sell Contractor gravel to repair an airport drain field. Contractor was uncertain how many loads of gravel would be needed, so he drew a check made out to “Rock Industries” as the payee but left the amount blank, to be filled in on the job site when the last load of gravel was delivered. Five truckloads, each carrying ten tons of gravel, were required, with

gravel priced at \$20 per ton. Thus Contractor figured he'd pay for fifty tons, or \$1,000, but Rock Industries had apparently filled in the amount as \$1,400 and negotiated it to Fairchild Truck Repair. Fairchild took it in good faith for an antecedent debt. Contractor will

- a. be liable to Fairchild, but only for \$1,000
- b. be liable to Fairchild for \$1,400
- c. not be liable to Fairchild because the check was materially altered
- d. not be liable to Fairchild because it did not give "value" for it to Rock Industries

Chapter 25

Liability and Discharge

LEARNING OBJECTIVES

After reading this chapter, you should understand the following:

1. The liability of an agent who signs commercial paper
2. What contract liability is imposed when a person signs commercial paper
3. What warranty liability is imposed upon a transferor
4. What happens if there is payment or acceptance by mistake
5. How parties are discharged from liability on commercial paper

In Chapter 22 "Nature and Form of Commercial Paper", Chapter 23 "Negotiation of Commercial Paper", and Chapter 24 "Holder in Due Course and Defenses", we focused on the methods and consequences of negotiating commercial paper when all the proper steps are followed. For example, a maker gives a negotiable note to a payee, who properly negotiates the paper to a third-party holder in due course. As a result, this third party is entitled to collect from the maker, unless the latter has a real defense.

In this chapter, we begin by examining a question especially important to management: personal liability for signing company notes and checks. Then we look at the two general types of liability—contract and warranty—introduced in Chapter 23 "Negotiation of Commercial Paper". We conclude the chapter by reviewing the ways in which parties are discharged from liability.

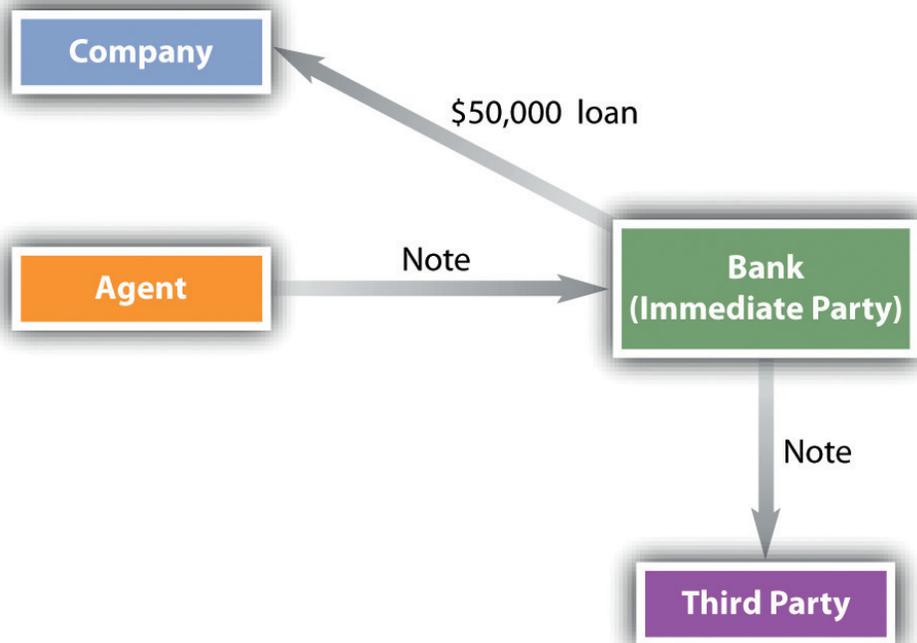

25.1 Liability Imposed by Signature: Agents, Authorized and Unauthorized

LEARNING OBJECTIVES

1. Recognize what a signature is under Article 3 of the Uniform Commercial Code.
2. Understand how a person's signature on an instrument affects liability if the person is an agent, or a purported agent, for another.

The liability of an agent who signs commercial paper is one of the most frequently litigated issues in this area of law. For example, Igor is an agent (treasurer) of Frank N. Stein, Inc. Igor signs a note showing that the corporation has borrowed \$50,000 from First Bank. The company later becomes bankrupt. The question: Is Igor personally liable on the note? The unhappy treasurer might be sued by the bank—the immediate party with whom he dealt—or by a third party to whom the note was transferred (see [Figure 25.1 "Signature by Representative"](#)).

Figure 25.1 *Signature by Representative*

There are two possibilities regarding an agent who signs commercial paper: the agent was authorized to do so, or the agent was not authorized to do so. First, though, what is a signature?

A “Signature” under the Uniform Commercial Code

Section 3-401 of the Uniform Commercial Code (UCC) provides fairly straightforwardly that “a signature can be made (i) manually or by means of a device or machine, and (ii) by the use of any name, including any trade or assumed name, or by any word, mark, or symbol executed or adopted by a person with the present intention to authenticate a writing.”

Liability of an Agent Who Has Authority to Sign

Agents often sign instruments on behalf of their principals, and—of course—because a corporation’s existence is a legal fiction (you can’t go up and shake hands with General Motors), corporations can only act through their agents.

The General Rule

Section 3-402(a) of the UCC provides that a person acting (or purporting to act) as an agent who signs an instrument binds the principal to the same extent that the principal would be bound if the signature were on a simple contract. The drafters of the UCC here punt to the common law of agency: if, under agency law, the principal would be bound by the act of the agent, the signature is the authorized signature of the principal. And the general rule in agency law is that the agent is not liable if he signs his own name and makes clear he is doing so as an agent. In our example, Igor should sign as follows: “Frank N. Stein, Inc., by Igor, Agent.” Now it is clear under agency law that the corporation is liable and Igor is not. Uniform Commercial Code, Section 3-402(b)(1). Good job, Igor.

Incorrect Signatures

The problems arise where the agent, although authorized, signs in an incorrect way. There are three possibilities: (1) the agent signs only his own name—“Igor”; (2) the agent signs both names but without indication of any agency—“Frank N. Stein, Inc., / Igor” (the signature is ambiguous—are both parties to be liable, or is Igor merely an agent?); (3) the agent signs as agent but doesn’t identify the principal—“Igor, Agent.”

The UCC provides that in each case, the agent is liable to a holder in due course (HDC) who took the instrument without notice that the agent wasn’t intended to be

liable on the instrument. As to any other person (holder or transferee), the agent is liable unless she proves that the original parties to the instrument did not intend her to be liable on it. Section 3-402(c) says that, as to a *check*, if an agent signs his name without indicating agency status but the check has the principal's identification on it (that would be in the upper left corner), the authorized agent is not liable.

Liability of an “Agent” Who Has No Authority to Sign

A person who has no authority to sign an instrument cannot really be an “agent” because by definition an agent is a person or entity authorized to act on behalf of and under the control of another in dealing with third parties. Nevertheless, unauthorized persons not infrequently purport to act as agents: either they are mistaken or they are crooks. Are their signatures binding on the “principal”?

The General Rule

An unauthorized signature is not binding; it is—as the UCC puts it—“ineffective except as the signature of the unauthorized signer.” Uniform Commercial Code, Section 3-403. So if Crook signs a Frank N. Stein, Inc., check with the name “Igor,” the only person liable on the check is Crook.

The Exceptions

There are two exceptions. Section 4-403(a) of the UCC provides that an unauthorized signature may be ratified by the principal, and Section 3-406 says that if negligence contributed to an instrument's alteration or forgery, the negligent person cannot assert lack of authority against an HDC or a person who in good faith pays or takes the instrument for value or for collection. This is the situation where Principal leaves the rubber signature stamp lying about and Crook makes mischief with it, making out a check to Payee using the stamp. But if Payee herself failed to exercise reasonable care in taking a suspicious instrument, both Principal and Payee could be liable, based on comparative negligence principles. Uniform Commercial Code, Section 3-406(b).

KEY TAKEAWAY

Under the UCC, a “signature” is any writing or mark used by a person to indicate that a writing is authentic. Agents often sign on behalf of principals, and when the authorized agent makes clear that she is so signing—by naming the principal and signing her name as “agent”—the principal is liable, not the agent. But when the agent signs incorrectly, the UCC says, in general, that the agent is personally liable to an HDC who takes the paper without notice that the agent is not intended to be liable. Unauthorized signatures (forgeries) are ineffective as to the principal: they are effective as the forger’s signature, unless the principal or the person paying on the instrument has been negligent in contributing to, or in failing to notice, the forgery, in which case comparative negligence principles are applied.

EXERCISES

1. Able signs his name on a note with an entirely illegible squiggle. Is that a valid signature?
2. Under what circumstances is an agent clearly not personally liable on an instrument?
3. Under what circumstances is a forgery effective as to the person whose name is forged?

25.2 Contract Liability of Parties

LEARNING OBJECTIVE

1. Understand that a person who signs commercial paper incurs contract liability.
2. Recognize the two types of such liability: primary and secondary.
3. Know the conditions that must be met before secondary liability attaches.

Two types of liability can attach to those who deal in commercial paper: contract liability and warranty liability. Contract liability is based on a party's signature on the paper. For contract liability purposes, signing parties are divided into two categories: primary parties and secondary parties.

We discuss here the liability of various parties. You may recall the discussion in Chapter 22 "Nature and Form of Commercial Paper" about accommodation parties. An *accommodation party* signs a negotiable instrument in order to lend his name to another party to the instrument. The Uniform Commercial Code (UCC) provides that such a person "may sign the instrument as maker, drawer, acceptor, or indorser" and that in whatever capacity the person signs, he will be liable in that capacity. Uniform Commercial Code, Section 3-419.

Liability of Primary Parties

Two parties are primarily liable: the maker of a note and the acceptor of a draft. They are required to pay by the terms of the instrument itself, and their liability is unconditional.

Maker

By signing a promissory note, the maker promises to pay the instrument—that's the maker's contract and, of course, the whole point to a note. The obligation is owed to a person entitled to enforce the note or to an indorser that paid the note. Uniform Commercial Code, Section 3-412.

Acceptor

Recall that *acceptance* is the drawee's signed engagement to honor a draft as presented. The drawee's signature on the draft is necessary and sufficient to accept, and if that happens, the drawee as acceptor is primarily liable. The acceptance must be written on the draft by some means—any means is good. The signature is usually accompanied by some wording, such as “accepted,” “good,” “I accept.” When a bank *certifies* a check, that is the drawee bank's acceptance, and the bank as acceptor becomes liable to the holder; the drawer and all indorsers prior to the bank's acceptance are discharged. So the holder—whether a payee or an indorsee—can look only to the bank, not to the drawer, for payment. Uniform Commercial Code, Section 3-414(b). If the drawee varies the terms when accepting the draft, it is liable according to the terms as varied. Uniform Commercial Code, Section 3-413(a)(iii).

Liability of Secondary Parties

Unlike primary liability, secondary liability is conditional, arising only if the primarily liable party fails to pay. The parties for whom these conditions are significant are the drawers and the indorsers. By virtue of UCC Sections 3-414 and 3-415, drawers and indorsers engage to pay the amount of an unaccepted draft to any subsequent holder or indorser who takes it up, again, *if* (this is the conditional part) the (1) the instrument is dishonored and, in some cases, (2) notice of dishonor is given to the drawer or indorser.

Drawer's Liability

If Carlos writes (more properly “draws”) a check to his landlord for \$700, Carlos does not expect the landlord to turn around and approach him for the money: Carlos's bank—the drawee—is supposed to pay from Carlos's account. But if the bank dishonors the check—most commonly because of insufficient funds to pay it—then Carlos is liable to pay according to the instrument's terms when he wrote the check or, if it was incomplete when he wrote it, according to its terms when completed (subject to some limitations). Uniform Commercial Code, Section 3-414. Under the pre-1997 UCC, Carlos's liability was conditioned not only upon dishonor but also upon notice of dishonor; however, under the revised UCC, notice is not required for the drawer to be liable unless the draft has been accepted and the acceptor is not a bank. Most commonly, if a check bounces, the person who wrote it is liable to make it good.

The drawer of a noncheck draft may disclaim her contractual liability on the instrument by drawing “without recourse.” Uniform Commercial Code, Section 3-414(d).

Indorser's Liability

Under UCC Section 3-415, an indorser promises to pay on the instrument according to its terms if it is dishonored or, if it was incomplete when indorsed, according to its terms when completed. The liability here is conditioned upon the indorser's receipt of *notice of dishonor* (with some exceptions, noted in [Section 25.2 "Contract Liability of Parties"](#) on contract liability of parties. Indorsers may disclaim contractual liability by indorsing "without recourse." Uniform Commercial Code, Section 3-415(b).

Conditions Required for Liability

We have alluded to the point that secondary parties do not become liable unless the proper conditions are met—there are conditions precedent to liability (i.e., things have to happen before liability “ripens”).

Conditions for Liability in General

The conditions are slightly different for two classes of instruments. For an unaccepted draft, the drawer's liability is conditioned on (1) presentment and (2) dishonor. For an accepted draft on a nonbank, or for an indorser, the conditions are (1) presentment, (2) dishonor, and (3) notice of dishonor.

Presentment

Presentment¹ occurs when a person entitled to enforce the instrument (creditor) demands *payment* from the maker, drawee, or acceptor, or when a person entitled to enforce the instrument (again, the creditor) demands *acceptance* of a draft from the drawee. Uniform Commercial Code, Section 3-501.

The common-law tort that makes a person who wrongfully takes another's property liable for that taking is **conversion**²—it's the civil equivalent of theft. The UCC provides that “the law applicable to conversion of personal property applies to instruments.” Uniform Commercial Code, Section 3-420. Conversion is relevant here because if an instrument is presented for payment or acceptance and the person to whom it is presented refuses to pay, accept, or return it, the instrument is converted. An instrument is also converted if a person pays an instrument on a forged indorsement: a bank that pays a check on a forged indorsement has converted the instrument and is liable to the person whose indorsement was forged. There are various permutations on the theme of conversion; here is one example from the Official Comment:

1. A holder's demand for payment from a payor.
2. Wrongful possession or disposition of another's property as if it were one's own.

A check is payable to the order of A. A indorses it to B and puts it into an envelope addressed to B. The envelope is never delivered to B. Rather, Thief steals the envelope, forges B's indorsement to the check and obtains payment. Because the check was never delivered to B, the indorsee, B has no cause of action for conversion, but A does have such an action. A is the owner of the check. B never obtained rights in the check. If A intended to negotiate the check to B in payment of an obligation, that obligation was not affected by the conduct of Thief. B can enforce that obligation. Thief stole A's property not B's. Uniform Commercial Code, Section 3-420, Official Comment 1.

Dishonor

Dishonor³ generally means failure by the obligor to pay on the instrument when presentment for payment is made (but return of an instrument because it has not been properly indorsed does not constitute dishonor). The UCC at Section 3-502 has (laborious) rules governing what constitutes dishonor and when dishonor occurs for a note, an unaccepted draft, and an unaccepted documentary draft. (A documentary draft is a draft to be presented for acceptance or payment if specified documents, certificates, statements, or the like are to be received by the drawee or other payor before acceptance or payment of the draft.)

Notice of Dishonor

Again, when acceptance or payment is refused after presentment, the instrument is said to be dishonored. The holder has a right of recourse against the drawers and indorsers, but he is usually supposed to give notice of the dishonor. Section 3-503(a) of the UCC requires the holder to give notice to a party before the party can be charged with liability, unless such notice is excused, but the UCC exempts notice in a number of circumstances (Section 3-504, discussed in [Section 25.2 "Contract Liability of Parties"](#) on contract liability). The UCC makes giving notice pretty easy: it permits any party who may be compelled to pay the instrument to notify any party who may be liable on it (but each person who is to be charged with liability must actually be notified); notice of dishonor may "be given by any commercially reasonable means including an oral, written, or electronic communication"; and no specific form of notice is required—it is "sufficient if it reasonably identifies the instrument and indicates that the instrument has been dishonored or has not been paid or accepted." Uniform Commercial Code, Section 3-503(b). Section 3-503(c) sets out time limits when notice of dishonor must be given for collecting banks and for other persons. An oral notice is unwise because it might be difficult to prove. Usually, notice of dishonor is given when the instrument is returned with a stamp ("NSF"—the dreaded "nonsufficient funds"), a ticket, or a memo.

3. Refusal to pay or accept an instrument when it is presented.

Suppose—you'll want to graph this out—Ann signs a note payable to Betty, who indorses it to Carl, who in turn indorses it to Darlene. Darlene indorses it to Earl, who presents it to Ann for payment. Ann refuses. Ann is the only primary party, so if Earl is to be paid he must give notice of dishonor to one or more of the secondary parties, in this case, the indorsers. He knows that Darlene is rich, so he notifies only Darlene. He may collect from Darlene but not from the others. If Darlene wishes to be reimbursed, she may notify Betty (the payee) and Carl (a prior indorser). If she fails to notify either of them, she will have no recourse. If she notifies both, she may recover from either. Carl in turn may collect from Betty, because Betty already will have been notified. If Darlene notifies only Carl, then she may collect only from him, but he must notify Betty or he cannot be reimbursed. Suppose Earl notified only Betty. Then Carl and Darlene are discharged. Why? Earl cannot proceed against them because he did not notify them. Betty cannot proceed against them because they indorsed subsequent to her and therefore were not contractually obligated to her. However, if, mistakenly believing that she could collect from either Carl or Darlene, Betty gave each notice within the time allowed to Earl, then he would be entitled to collect from one of them if Betty failed to pay, because they would have received notice. It is not necessary to receive notice from one to whom you are liable; Section 3-503(b) says that notice may be given by any person, so that notice operates for the benefit of all others who have rights against the obligor.

There are some deadlines for giving notice: on an instrument taken for collection, a bank must give notice before midnight on the next banking day following the day on which it receives notice of dishonor; a nonbank must give notice within thirty days after the day it received notice; and in all other situations, the deadline is thirty days after the day dishonor occurred. Uniform Commercial Code, Section 3-503(c).

Waived or Excused Conditions

Presentment and notice of dishonor have been discussed as conditions precedent for imposing liability upon secondarily liable parties (again, drawers and indorsers). But the UCC provides circumstances in which such conditions may be waived or excused.

Presentment Waived or Excused

Under UCC Section 3-504(a), presentment is excused if (1) the creditor cannot with reasonable diligence present the instrument; (2) the maker or acceptor has repudiated the obligation to pay, is dead, or is in insolvency proceedings; (3) no presentment is necessary by the instrument's terms; (4) the drawer or indorsers waived presentment; (5) the drawer instructed the drawee not to pay or accept; or (6) the drawee was not obligated to the drawer to pay the draft.

Notice of Dishonor Excused

Notice of dishonor is not required if (1) the instrument's terms do not require it or (2) the debtor waived the notice of dishonor. Moreover, a waiver of presentment is also a waiver of notice of dishonor. Delay in giving the notice is excused, too, if it is caused by circumstances beyond the control of the person giving notice and she exercised reasonable diligence when the cause of delay stopped. Uniform Commercial Code, Section 3-504.

In fact, in real life, presentment and notice of dishonor don't happen very often, at least as to notes. Going back to presentment for a minute: the UCC provides that the "party to whom presentment is made [the debtor] may require exhibition of the instrument,...reasonable identification of the person demanding payment,...[and] a signed receipt [from the creditor (among other things)]" (Section 3-501). This all makes sense: for example, certainly the prudent contractor paying on a note for his bulldozer wants to make sure the creditor actually still has the note (hasn't negotiated it to a third party) and is the correct person to pay, and getting a signed receipt when you pay for something is always a good idea. "Presentment" here is listed as a condition of liability, but in fact, most of the time there is no presentment at all:

[I]t's a fantasy. Every month millions of homeowners make payments on the notes that they signed when they borrowed money to buy their houses. Millions of college graduates similarly make payments on their student loan notes. And millions of drivers and boaters pay down the notes that they signed when they borrowed money to purchase automobiles or vessels. [Probably] none of these borrowers sees the notes that they are paying. There is no "exhibition" of the instruments as section 3-501 [puts it]. There is no showing of identification. In some cases...there is no signing of a receipt for payment. Instead, each month, the borrowers simply mail a check to an address that they have been given. Gregory E. Maggs, "A Complaint about Payment Law Under the U.C.C.: What You See Is Often Not What You Get," *Ohio State Law Journal* 68, no. 201, no. 207 (2007), <http://ssrn.com/abstract=1029647>.

The Official Comment to UCC Section 5-502 says about the same thing:

In the great majority of cases presentment and notice of dishonor are waived with respect to notes. In most cases a formal demand for payment to the maker of the note is not contemplated. Rather, the maker is expected to send payment to the holder of the note on the date or dates on which payment is due. If payment is not made when due, the holder usually makes a demand for payment, but in the normal case in which presentment is waived, demand is irrelevant and the holder can proceed against indorsers when payment is not received.

KEY TAKEAWAY

People who sign commercial paper become liable on the instrument by contract: they contract to honor the instrument. There are two types of liability: primary and secondary. The primarily liable parties are makers of notes and drawees of drafts (your bank is the drawee for your check), and their liability is unconditional. The secondary parties are drawers and indorsers. Their liability is conditional: it arises if the instrument has been presented for payment or collection by the primarily liable party, the instrument has been dishonored, and notice of dishonor is provided to the secondarily liable parties. The presentment and notice of dishonor are often unnecessary to enforce contractual liability.

EXERCISES

1. What parties have primary liability on a negotiable instrument?
2. What parties have secondary liability on a negotiable instrument?
3. Secondary liability is conditional. What are the conditions precedent to liability?
4. What conditions may be waived or excused, and how?

25.3 Warranty Liability of Parties

LEARNING OBJECTIVES

1. Understand that independent of contract liability, parties to negotiable instruments incur warranty liability.
2. Know what warranties a person makes when she transfers an instrument.
3. Know what warranties a person makes when he presents an instrument for payment or acceptance.
4. Understand what happens if a bank pays or accepts a check by mistake.

Overview of Warranty Liability

We discussed the contract liability of primary and secondary parties, which applies to those who sign the instrument. Liability arises a second way, too—by warranty. A negotiable instrument is a type of property that is sold and bought, just the way an automobile is, or a toaster. If you buy a car, you generally expect that it will, more or less, work the way cars are supposed to work—that’s the implied warranty of merchantability. Similarly, when an instrument is transferred from A to B for consideration, the transferee (B) expects that the instrument will work the way such instruments are supposed to work. If A transfers to B a promissory note made by Maker, B figures that when the time is right, she can go to Maker and get paid on the note. So A makes some implied warranties to B—transfer warranties. And when B presents the instrument to Maker for payment, Maker assumes that B as the indorsee from A is entitled to payment, that the signatures are genuine, and the like. So B makes some implied warranties to Maker—presentment warranties. Usually, claims of breach of warranty arise in cases involving forged, altered, or stolen instruments, and they serve to allocate the loss to the person in the best position to have avoided the loss, putting it on the person (or bank) who dealt with the wrongdoer. We take up both transfer and presentment warranties.

Transfer Warranties

Transfer warranties are important because—as we’ve seen—contract liability is limited to those who have actually signed the instrument. Of course, secondary liability will provide a holder with sufficient grounds for recovery against a previous indorser who did not qualify his indorsement. But sometimes there is no indorsement, and sometimes the indorsement is qualified. Sometimes, also, the holder fails to make timely presentment or notice of dishonor, thereby discharging

a previous indorsee. In such cases, the transferee-holder can still sue a prior party on one or more of the five implied warranties.

A person who receives consideration for transferring an instrument makes the five warranties listed in UCC Section 3-416. The warranty may be sued on by the immediate transferee or, if the transfer was by indorsement, by any subsequent holder who takes the instrument in good faith. The warranties thus run with the instrument. They are as follows:

1. *The transferor is entitled to enforce the instrument.* The transferor warrants that he is—or would have been if he weren't transferring it—entitled to enforce the instrument. As UCC Section 3-416, Comment 2, puts it, this “is in effect a warranty that there are no unauthorized or missing indorsements that prevent the transferor from making the transferee a person entitled to enforce the instrument.” Suppose Maker makes a note payable to Payee; Thief steals the note, forges Payee's indorsement, and sells the note. Buyer is not a holder because he is not “a person in possession of an instrument drawn, issued, or indorsed to him, or to his order, or to bearer, or in blank,” so he is not entitled to enforce it. “Person entitled to enforce” means (i) the holder, (ii) a non-holder in possession of the instrument who has the rights of a holder [because of the shelter rule]” (UCC, Section 3-301). Buyer sells the note to Another Party, who can hold Buyer liable for breach of the warranty: he was not entitled to enforce it.
2. *All signatures on the instrument are authentic and authorized.* This warranty would be breached, too, in the example just presented.
3. *The instrument has not been altered.*
4. *The instrument is not subject to a defense or claim in recoupment of any party that can be asserted against the warrantor.* “Recoupment” means to hold back or deduct part of what is due to another. The Official Comment to UCC Section 3-416 observes, “[T]he transferee does not undertake to buy an instrument that is not enforceable in whole or in part, unless there is a contrary agreement. Even if the transferee takes as a holder in due course who takes free of the defense or claim in recoupment, the warranty gives the transferee the option of proceeding against the transferor rather than litigating with the obligor on the instrument the issue of the holder-in-due-course status of the transferee.”
5. *The warrantor has no knowledge of any insolvency proceeding commenced with respect to the maker or acceptor or, in the case of an unaccepted draft, the drawer.* The UCC Official Comment here provides the following: “The transferor does not warrant against difficulties of collection, impairment of the credit of the obligor or even insolvency [only knowledge of insolvency]. The transferee is expected to determine

such questions before taking the obligation. If insolvency proceedings...have been instituted against the party who is expected to pay and the transferor knows it, the concealment of that fact amounts to a fraud upon the transferee, and the warranty against knowledge of such proceedings is provided accordingly.”Uniform Commercial Code, Section 3-416, Official Comment 4.

Presentment Warranties

A payor paying or accepting an instrument in effect takes the paper from the party who presents it to the payor, and that party has his hand out. In doing so, the presenter makes certain implied promises to the payor, who is about to fork over cash (or an acceptance). The UCC distinguishes between warranties made by one who presents an unaccepted draft for payment and warranties made by one who presents other instruments for payment. The warranties made by the presenter are as follows.Uniform Commercial Code, Section 3-417.

Warranties Made by One Who Presents an Unaccepted Draft

1. *The presenter is entitled to enforce the draft or to obtain payment or acceptance.* This is “in effect a warranty that there are no unauthorized or missing indorsements.”Uniform Commercial Code, Section 3-417, Comment 2. Suppose Thief steals a check drawn by Drawer to Payee and forges Payee’s signature, then presents it to the bank. If the bank pays it, the bank cannot charge Drawer’s account because it has not followed Drawer’s order in paying to the wrong person (except in the case of an imposter or fictitious payee). It can, though, go back to Thief (fat chance it can find her) on the claim that she breached the warranty of no unauthorized indorsement.
2. *There has been no alteration of the instrument.* If Thief takes a check and changes the amount from \$100 to \$1,000 and the bank pays it, the bank can recover from Thief \$900, the difference between the amount paid by the bank and the amount Drawer (customer) authorized the bank to pay.Uniform Commercial Code, Sections 3-417(2) and (b). If the drawee accepts the draft, the same rules apply.
3. *The presenter has no knowledge that the signature of the drawer is unauthorized.* If the presenter doesn’t know Drawer’s signature is forged and the drawee pays out on a forged signature, the drawee bears the loss. (The bank would be liable for paying out over the forged drawer’s signature: that’s why it has the customer’s signature on file.)

These rules apply—again—to warranties made by the presenter to a drawee paying out on an unaccepted draft. The most common situation would be where a person has a check made out to her and she gets it cashed at the drawer's bank.

Warranties Made by One Who Presents Something Other Than an Unaccepted Draft

In all other cases, there is only one warranty made by the presenter: that he or she is a person entitled to enforce the instrument or obtain payment on it.

This applies to the presentment of accepted drafts, to the presentment of dishonored drafts made to the drawer or an indorser, and to the presentment of notes. For example, Maker makes a note payable to Payee; Payee indorses the note to Indorsee, Indorsee indorses and negotiates the note to Subsequent Party. Subsequent Party presents the note to Maker for payment. The Subsequent Party warrants to Maker that she is entitled to obtain payment. If she is paid and is *not* entitled to payment, Maker can sue her for breach of that warranty. If the reason she isn't entitled to payment is because Payee's signature was forged by Thief, then Maker can go after Thief: the UCC says that "the person obtaining payment [Subsequent Party] and a prior transferor [Thief] warrant to the person making payment in good faith [Maker] that the warrantor [Subsequent Party] is entitled to enforce the instrument." Uniform Commercial Code, Section 3-417(d). Or, again, Drawer makes the check out to Payee; Payee attempts to cash or deposit the check, but it is dishonored. Payee presents the check to Drawer to make it good: Payee warrants he is entitled to payment on it.

Warranties cannot be disclaimed in the case of checks (because, as UCC Section 3-417, Comment 7, puts it, "it is not appropriate to allow disclaimer of warranties appearing on checks that normally will not be examined by the payor bank"—they're machine read). But a disclaimer of warranties is permitted as to other instruments, just as disclaimers of warranty are usually OK under general contract law. The reason presentment warranties 2 and 3 don't apply to makers and drawers (they apply to drawees) is because makers and drawers are going to know their own signatures and the terms of the instruments; indorsers already warranted the wholesomeness of their transfer (transfer warranties), and acceptors should examine the instruments when they accept them.

Payment by Mistake

Sometimes a drawee pays a draft (most familiarly, again, a bank pays a check) or accepts a draft by mistake. The UCC says that if the mistake was in thinking that there was no stop-payment order on it (when there was), or that the drawer's

signature was authorized (when it was not), or that there were sufficient funds in the drawer's account to pay it (when there were not), "the drawee may recover the amount paid...or in the case of acceptance, may revoke the acceptance." Uniform Commercial Code, Section 3-418. Except—and it's a big exception—such a recovery of funds does not apply "against a person who took the instrument in good faith and for value." Uniform Commercial Code, Section 3-418(c). The drawee in that case would have to go after the forger, the unauthorized signer, or, in the case of insufficient funds, the drawer. Example: Able draws a check to Baker. Baker deposits the check in her bank account, and Able's bank mistakenly pays it even though Able doesn't have enough money in his account to cover it. Able's bank cannot get the money back from Baker: it has to go after Able. To rephrase, in most cases, the remedy of restitution will not be available to a bank that pays or accepts a check because the person receiving payment of the check will have given value for it in good faith.

KEY TAKEAWAY

A transferor of a negotiable instrument warrants to the transferee five things: (1) entitled to enforce, (2) authentic and authorized signatures, (3) no alteration, (4) no defenses, and (5) no knowledge of insolvency. If the transfer is by delivery, the warranties run only to the immediate transferee; if by indorsement, to any subsequent good-faith holder. Presenters who obtain payment of an instrument and all prior transferors make three presenter's warranties: (1) entitled to enforce, (2) no alteration, (3) genuineness of drawer's signature. These warranties run to any good-faith payor or acceptor. If a person pays or accepts a draft by mistake, he or she can recover the funds paid out unless the payee took the instrument for value and in good faith.

EXERCISES

1. What does it mean to say that the transferor of a negotiable instrument warrants things to the transferee, and what happens if the warranties are breached? What purpose do the warranties serve?
2. What is a presenter, and to whom does such a person make warranties?
3. Under what circumstances would suing for breach of warranties be useful compared to suing on the contract obligation represented by the instrument?
4. Why are the rules governing mistaken payment not very often useful to a bank?

25.4 Discharge

LEARNING OBJECTIVE

1. Understand how the obligations represented by commercial paper may be discharged.

Overview

Negotiable instruments eventually die. The obligations they represent are discharged (terminated) in two general ways: (1) according to the rules stated in Section 3-601 of the Uniform Commercial Code (UCC) or (2) by an act or agreement that would discharge an obligation to pay money under a simple contract (e.g., declaring bankruptcy).

Discharge under the Uniform Commercial Code

The UCC provides a number of ways by which an obligor on an instrument is discharged from liability, but notwithstanding these several ways, under Section 3-601, no discharge of any party provided by the rules presented in this section operates against a subsequent holder in due course unless she has notice when she takes the instrument.

Discharge in General

Discharge by Payment

A person primarily liable discharges her liability on an instrument to the extent of payment by paying or otherwise satisfying the holder, and the discharge is good even if the payor knows that another has claim to the instrument. However, discharge does not operate if the payment is made in bad faith to one who unlawfully obtained the instrument (and UCC Section 3-602(b) lists two other exceptions).

Discharge by Tender

A person who tenders full payment to a holder on or after the date due discharges any subsequent liability to pay interest, costs, and attorneys' fees (but not liability for the face amount of the instrument). If the holder refuses to accept the tender, any party who would have had a right of recourse against the party making the

tender is discharged. Mario makes a note payable to Carol, who indorses it to Ed. On the date the payment is due, Mario (the maker) tenders payment to Ed, who refuses to accept the payment; he would rather collect from Carol. Carol is discharged: had she been forced to pay as indorser in the event of Mario's refusal, she could have looked to him for recourse. Since Mario did tender, Ed can no longer look to Carol for payment. Uniform Commercial Code, Section 3-603(b).

Discharge by Cancellation and Renunciation

The holder may discharge any party, even without consideration, by marking the face of the instrument or the indorsement in an unequivocal way, as, for example, by intentionally canceling the instrument or the signature by destruction or mutilation or by striking out the party's signature. The holder may also renounce his rights by delivering a signed writing to that effect or by surrendering the instrument itself. Uniform Commercial Code, Section 3-604.

Discharge by Material and Fraudulent Alteration

Under UCC Section 3-407, if a holder materially and fraudulently alters an instrument, any party whose contract is affected by the change is discharged. A payor bank or drawee paying a fraudulently altered instrument or a person taking it for value, in good faith, and without notice of the alteration, may enforce rights with respect to the instrument according to its original terms or, if the incomplete instrument was altered by unauthorized completion, according to its terms as completed.

- Example 1: Marcus makes a note for \$100 payable to Pauline. Pauline fraudulently raises the amount to \$1,000 without Marcus's negligence and negotiates it to Ned, who qualifies as a holder in due course (HDC). Marcus owes Ned \$100.
- Example 2: Charlene writes a check payable to Lumber Yard and gives it to Contractor to buy material for a deck replacement. Contractor fills it in for \$1,200: \$1,000 for the decking and \$200 for his own unauthorized purposes. Lumber Yard, if innocent of any wrongdoing, could enforce the check for \$1,200, and Charlene must go after Contractor for the \$200.

Discharge by Certification

As we have noted, where a drawee certifies a draft for a holder, the drawer and all prior indorsers are discharged.

Discharge by Acceptance Varying a Draft

If the holder assents to an acceptance varying the terms of a draft, the obligation of the drawer and any indorsers who do not expressly assent to the acceptance is discharged. Uniform Commercial Code, Section 3-410.

Discharge of Indorsers and Accommodation Parties

The liability of indorsers and accommodation parties is discharged under the following three circumstances. Uniform Commercial Code, Section 3-605.

Extension of Due Date

If the holder agrees to an extension of the due date of the obligation of the obligor, the extension discharges an indorser or accommodation party having a right of recourse against the obligor to the extent the indorser or accommodation party proves that the extension caused her loss with respect to the right of recourse.

Material Modification of Obligation

If the holder agrees to a material modification of the obligor's obligation, other than an extension of the due date, the modification discharges the obligation of an indorser or accommodation party having a right of recourse against the obligor to the extent the modification causes her loss with respect to the right of recourse.

Impairment of Collateral

If the obligor's duty to pay is secured by an interest in collateral and the holder impairs the value of the interest in collateral, the obligation of an indorser or accommodation party having a right of recourse against the obligor is discharged to the extent of the impairment.

The following explanatory paragraph from UCC Section 3-605, Official Comment 1, may be helpful:

Bank lends \$10,000 to Borrower who signs a note under which she (in suretyship law, the "Principal Debtor") agrees to pay Bank on a date stated. But Bank insists that an accommodation party also become liable to pay the note (by signing it as a co-maker or by indorsing the note). In suretyship law, the accommodation party is a "Surety." Then Bank agrees to a modification of the rights and obligations between it and Principal Debtor, such as agreeing that she may pay the note at some date after the due date, or that she may discharge her \$10,000 obligation to

pay the note by paying Bank \$3,000, or the Bank releases collateral she gave it to secure the note. Surety is discharged if changes like this are made by Bank (the creditor) without Surety's consent to the extent Surety suffers loss as a result. Section 3-605 is concerned with this kind of problem with Principal Debtor and Surety. But it has a wider scope: it also applies to indorsers who are not accommodation parties. Unless an indorser signs without recourse, the indorser's liability under section 3-415(a) is that of a surety. If Bank in our hypothetical case indorsed the note and transferred it to Second Bank, Bank has rights given to an indorser under section 3-605 if it is Second Bank that modifies rights and obligations of Borrower.

Discharge by Reacquisition

Suppose a prior party reacquires the instrument. He may—but does not automatically—cancel any indorsement unnecessary to his title and may also reissue or further negotiate the instrument. Any intervening party is thereby discharged from liability to the reacquiring party or to any subsequent holder not in due course. If an intervening party's indorsement is cancelled, she is not liable even to an HDC. Uniform Commercial Code, Section 3-207.

Discharge by Unexcused Delay in Presentment or Notice of Dishonor

If notice of dishonor is not excused under UCC Section 3-504, failure to give it discharges drawers and indorsers.

KEY TAKEAWAY

The potential liabilities arising from commercial paper are discharged in several ways. Anything that would discharge a debt under common contract law will do so. More specifically as to commercial paper, of course, payment discharges the obligation. Other methods include tender of payment, cancellation or renunciation, material and fraudulent alteration, certification, acceptance varying a draft, reacquisition, and—in some cases—unexcused delay in giving notice of presentment or dishonor. Indorsers and accommodation parties' liability may be discharged by the same means that a surety's liability is discharged, to the extent that alterations in the agreement between the creditor and the holder would be defenses to a surety because right of recourse is impaired to the surety.

EXERCISES

1. What is the most common way that obligations represented by commercial paper are discharged?
2. Parents loan Daughter \$6,000 to attend college, and she gives them a promissory note in return. At her graduation party, Parents ceremoniously tear up the note. Is Daughter's obligation terminated?
3. Juan signs Roberta's note to Creditor as an accommodation party, agreeing to serve in that capacity for two years. At the end of that term, Roberta has not paid Creditor, who—without Juan's knowledge—gives Roberta an extra six months to pay. She fails to do so. Does Creditor still have recourse against Juan?

25.5 Cases

Breach of Presentment Warranties and Conduct Precluding Complaint about Such Breach

Bank of Nichols Hills v. Bank of Oklahoma

196 P.3d 984 (Okla. Civ. App. 2008)

Gabbard, J.

Plaintiff, Bank of Nichols Hills (BNH), appeals a trial court judgment for Defendant, Bank of Oklahoma (BOK), regarding payment of a forged check. The primary issue on appeal is whether BOK presented sufficient proof to support the trial court's finding that the [UCC] § 3-406 preclusion defense applied. We find that it did, and affirm.

Facts

Michael and Stacy Russell owned a mobile home in Harrah, Oklahoma. The home was insured by Oklahoma Farm Bureau Mutual Insurance Company (Farm Bureau). The insurance policy provided that in case of loss, Farm Bureau "will pay you unless another payee is named on the Declarations page," that "Loss shall be payable to any mortgagee named in the Declarations," and that one of Farm Bureau's duties was to "protect the mortgagee's interests in the insured building." The Declarations page of the policy listed Conseco Finance as the mortgagee. Conseco had a mortgage security interest in the home.

In August 2002, a fire completely destroyed the mobile home. The Russells submitted an insurance claim to Farm Bureau. Farm Bureau then negotiated a \$69,000 settlement with the Russells, issued them a check in this amount payable to them and Conseco jointly, and mailed the check to the Russells. Neither the Russells nor Farm Bureau notified Conseco of the loss, the settlement, or the mailing of the check.

The check was drawn on Farm Bureau's account at BNH. The Russells deposited the check into their account at BOK. The check contains an endorsement by both Russells, and a rubber stamp endorsement for Conseco followed by a signature of a Donna Marlatt and a phone number. It is undisputed that Conseco's endorsement

was forged. Upon receipt, BOK presented the check to BNH. BNH paid the \$69,000 check and notified Farm Bureau that the check had been paid from its account.

About a year later, Conseco learned about the fire and the insurance payoff. Conseco notified Farm Bureau that it was owed a mortgage balance of more than \$50,000. Farm Bureau paid off the balance and notified BNH of the forgery. BNH reimbursed Farm Bureau the amount paid to Conseco. BNH then sued BOK.

Both banks relied on the Uniform Commercial Code. BNH asserted that under § 4-208, BOK had warranted that all the indorsements on the check were genuine. BOK asserted an affirmative defense under § 3-406, alleging that Farm Bureau's own negligence contributed to the forgery. After a non-jury trial, the court granted judgment to BOK, finding as follows:

- Conseco's endorsement was a forgery, accomplished by the Russells;
- Farm Bureau was negligent in the manner and method it used to process the claim and pay the settlement without providing any notice or opportunity for involvement in the process to Conseco;
- Farm Bureau's negligence substantially contributed to the Russells' conduct in forging Conseco's endorsement; and
- BOK proved its affirmative defense under § 3-406 by the greater weight of the evidence.

From this judgment, BNH appeals.

Analysis

It cannot be disputed that BOK breached its presentment warranty to BNH under § 4-208. Section 4-208 provides as follows: "(a) If an unaccepted draft is presented [in this case, by BOK] to the drawee [BNH] for payment or acceptance and the drawee pays or accepts the draft, (i) the person obtaining payment or acceptance, at the time of presentment, and (ii) a previous transferor of the draft, at the time of transfer, warrant to the drawee that pays or accepts the draft in good faith, that: (1) The warrantor is, or was, at the time the warrantor transferred the draft, a person entitled to enforce the draft or authorized to obtain payment or acceptance of the draft on behalf of a person entitled to enforce the draft; (2) The draft has not been altered; and (3) The warrantor has no knowledge that the signature of the purported drawer of the draft is unauthorized. (b) A drawee making payment may recover from a warrantor damages for breach of warranty.... (c) If a drawee asserts a claim for breach of warranty under subsection (a) of this section based on an unauthorized indorsement of the draft or an alteration of the draft, the warrantor may defend by proving that...the drawer [here, Farm Bureau] is precluded under

Section 3-406 or 4-406 of this title from asserting against the drawee the unauthorized indorsement or alteration.” Thus the primary issue raised is whether BOK established a preclusion defense under 3-406 [that BNH is precluded from complaining about BOK’s breach of presentment warranty because of its own negligence].(a) A person whose failure to exercise ordinary care substantially contributes to an alteration of an instrument or to the making of a forged signature on an instrument is precluded from asserting the alteration or the forgery against a person who, in good faith, pays the instrument or takes it for value or for collection. BNH asserts that the evidence fails to establish this defense because the mailing of its check to and receipt by the insured “is at most an event of opportunity and has nothing to do with the actual forgery.”

Section 3-406 requires less stringent proof than the “direct and proximate cause” test for general negligence. The parties do not address Section 3-406(b), which states that the person asserting preclusion may be held partially liable under comparative negligence principles for failing to exercise ordinary care in paying or taking the check. They also do not address any possible negligence by either bank in accepting the forged check without confirming the legitimacy of Consec’s indorsement. Conduct is a contributing cause of an alteration or forgery if it is a substantial factor in bringing it about, or makes it “easier for the wrongdoer to commit his wrong.” The UCC Comment to § 3-406 notes that the term has the meaning as used by the Pennsylvania court in *Thompson* [Citation].

In *Thompson*, an independent logger named Albers obtained blank weighing slips, filled them out to show fictitious deliveries of logs for local timber owners, delivered the slips to the company, accepted checks made payable to the timber owners, forged the owners’ signatures, and cashed the checks at the bank. When the company discovered the scheme, it sued the bank and the bank raised § 3-406 as a defense. The court specifically found that the company’s negligence did not have to be the direct and proximate cause of the bank’s acceptance of the forged checks. Instead, the defense applied because the company left blank logging slips readily accessible to haulers, the company had given Albers whole pads of blank slips, the slips were not consecutively numbered, haulers were allowed to deliver both the original and duplicate slips to the company’s office, and the company regularly entrusted the completed checks to the haulers for delivery to the payees without the payees’ consent. The court noted:

While none of these practices, in isolation, might be sufficient to charge the plaintiff [the company] with negligence within the meaning of § 3-406, the company’s course of conduct, viewed in its entirety, is surely sufficient to support the trial judge’s determination that it substantially contributed to the making of the unauthorized signatures....[T]hat conduct was ‘no different than had the plaintiff

simply given Albers a series of checks signed in blank for his unlimited, unrestrictive use.’

The UCC Comment to § 3-406 gives three examples of conduct illustrating the defense. One example involves an employer who leaves a rubber stamp and blank checks accessible to an employee who later commits forgery; another example involves a company that issues a ten dollar check but leaves a blank space after the figure which allows the payee to turn the amount into ten thousand dollars; and the third example involves an insurance company that mails a check to one policyholder whose name is the same as another policyholder who was entitled to the check. In each case, the company’s negligence substantially contributed to the alterations or forgeries by making it easier for the wrongdoer to commit the malfeasance.

In the present case, we find no negligence in Farm Bureau’s delivery of the check to the Russells. There is nothing in the insurance policy that prohibits the insurer from making the loss-payment check jointly payable to the Russells and Conseco. Furthermore, under § 3-420, if a check is payable to more than one payee, delivery to one of the payees is deemed to be delivery to all payees. The authority cited by BOK, in which a check was delivered to one joint payee who then forged the signature of the other, involve cases where the drawer knew or should have known that the wrongdoer was not entitled to be a payee in the first place. See [Citations].

We also find no negligence in Farm Bureau’s violation of its policy provisions requiring the protection of the mortgage holder. Generally, violation of contract provisions and laxity in the conduct of the business affairs of the drawer do not per se establish negligence under this section. See [Citations].

However, evidence was presented that the contract provision merely reflected an accepted and customary commercial standard in the insurance industry. Failure to conform to the reasonable commercial standards of one’s business has been recognized by a number of courts as evidence of negligence. See, e.g., [Citations].

Here, evidence was presented that Farm Bureau did not act in a commercially reasonable manner or in accordance with reasonable commercial standards of its business when it issued the loss check to the insured without notice to the mortgagee. BOK’s expert testified that it is standard practice in the industry to notify the lender of a loss this size, in order to avoid exactly the result that occurred here. Mortgagees often have a greater financial stake in an insurance policy than do the mortgagors. That was clearly true in this case. While there was opinion testimony to the contrary, the trial court was entitled to conclude that Farm Bureau did not act in a commercially reasonable manner and that this failure was

negligence which substantially contributed to the forgery, as contemplated by § 3-406.

We find the trial court's judgment supported by the law and competent evidence. Accordingly, the trial court's decision is affirmed. Affirmed.

CASE QUESTIONS

1. How did BOK breach its presentment warranty to BNH?
2. What part of the UCC did BOK point to as why it should not be liable for that breach?
3. In what way was Farm Bureau Mutual Insurance Co. negligent in this case, and what was the consequence?

Presentment, Acceptance, Dishonor, and Warranties

Messing v. Bank of America

821 A.2d 22 (Md. 2003)

At some point in time prior to 3 August 2000, Petitioner, as a holder, came into possession of a check in the amount of Nine Hundred Seventy-Six Dollars (\$976.00) (the check) from Toyson J. Burruss, the drawer, doing business as Prestige Auto Detail Center. Instead of depositing the check into his account at his own bank, Petitioner elected to present the check for payment at a branch of Mr. Burruss' bank, Bank of America, the drawee. Petitioner's choice could be viewed as an attempt at risk shifting. Petitioner, an attorney, may have known that he could have suffered a fee charged by his own bank if he deposited a check into his own account and then the bank on which it was drawn returned it for insufficient funds, forged endorsement, alteration, or the like. Petitioner's action, viewed against that backdrop, would operate as a risk-shifting strategy, electing to avoid the risk of a returned-check fee by presenting in person the check for acceptance at the drawee bank. On 3 August 2000, Petitioner approached a teller at Bank of America...in Baltimore City and asked to cash the check. The teller, by use of a computer, confirmed the availability of funds on deposit, and placed the check into the computer's printer slot. The computer stamped certain data on the back of the check, including the time, date, amount of the check, account number, and teller number. The computer also effected a hold on the amount of \$976.00 in the customer's account. The teller gave the check back to the Petitioner, who endorsed it. The teller then asked for Petitioner's identification. Petitioner presented his

driver's license and a major credit card. The teller took the indorsed check from Petitioner and manually inscribed the driver's license information and certain credit card information on the back of the check.

At some point during the transaction, the teller counted out \$976.00 in cash from her drawer in anticipation of completing the transaction. She asked if the Petitioner was a customer of Bank of America. The Petitioner stated that he was not. The teller returned the check to Petitioner and requested, consistent with bank policy when cashing checks for non-customers, that Petitioner place his thumbprint on the check. [The thumbprint identification program was designed by various banking and federal agencies to reduce check fraud.] Petitioner refused and the teller informed him that she would be unable to complete the transaction without his thumbprint.

...Petitioner presented the check to the branch manager and demanded that the check be cashed notwithstanding Petitioner's refusal to place his thumbprint on the check. The branch manager examined the check and returned it to the Petitioner, informing him that, because Petitioner was a non-customer, Bank of America would not cash the check without Petitioner's thumbprint on the instrument....Petitioner left the bank with the check in his possession....

Rather than take the check to his own bank and deposit it there, or returning it to Burruss, the drawer, as dishonored and demanding payment, Petitioner,...[sued] Bank of America (the Bank)...Petitioner claimed that the Bank had violated the Maryland Uniform Commercial Code (UCC) and had violated his personal privacy when the teller asked Petitioner to place an "inkless" thumbprint on the face of the check at issue....

...[T]he Circuit Court heard oral arguments..., entered summary judgment in favor of the Bank, dismissing the Complaint with prejudice. [The special appeals court affirmed. The Court of Appeals—this court—accepted the appeal.]

[Duty of Bank on Presentment and Acceptance]

Petitioner argues that he correctly made "presentment" of the check to the Bank pursuant to § 3-111 and § 3-501(a), and demands that, as the person named on the instrument and thus entitled to enforce the check, the drawee Bank pay him....In a continuation, Petitioner contends that the teller, by placing the check in the slot of her computer, and the computer then printing certain information on the back of the check, accepted the check as defined by § 3-409(a)....Thus, according to Petitioner, because the Bank's computer printed information on the back of the

check, under § 3-401(b) the Bank “signed” the check, said “signature” being sufficient to constitute acceptance under § 3-409(a).

Petitioner’s remaining arguments line up like so many dominos. According to Petitioner, having established that under his reading of § 3-409(a) the Bank accepted the check, Petitioner advances that the Bank is obliged to pay him, pursuant to § 3-413(a)...Petitioner extends his line of reasoning by arguing that the actions of the Bank amounted to a conversion under § 3-420,...Petitioner argues that because the Bank accepted the check, an act which, according to Petitioner, discharged the drawer, he no longer had enforceable rights in the check and only had a right to the proceeds. Petitioner’s position is that the Bank exercised unauthorized dominion and control over the proceeds of the check to the complete exclusion of the Petitioner after the Bank accepted the check and refused to distribute the proceeds, counted out by the teller, to him.

We turn to the Bank’s obligations, or lack thereof, with regard to the presentment of a check by someone not its customer. Bank argues, correctly, that it had no duty to the Petitioner, a non-customer and a stranger to the Bank, and that nothing in the Code allows Petitioner to force Bank of America to act as a depository bank...

Absent a special relationship, a non-customer has no claim against a bank for refusing to honor a presented check. [Citations] This is made clear by § 3-408, which states:

A check or other draft does not of itself operate as an assignment of funds in the hands of the drawee available for its payment, and the drawee is not liable on the instrument until the drawee accepts it.

Once a bank accepts a check, under § 3-409, it is obliged to pay on the check under § 3-413. Thus, the relevant question in terms of any rights Petitioner had against the Bank [regarding presentment] turns not on the reasonableness of the thumbprint identification, but rather upon whether the Bank accepted the check when presented as defined by § 3-409. As will be seen *infra* [below] the question of the thumbprint identification is relevant only to the issue of whether the Bank’s refusal to pay the instrument constituted dishonor under § 3-502, a determination which has no impact in terms of any duty allegedly owed by the Bank to the Petitioner.

The statute clearly states that acceptance becomes effective when the presenter is notified of that fact. The facts demonstrate that at no time did the teller notify Petitioner that the Bank would pay on the check. Rather, the facts show that:

[T]he check was given back to [Petitioner] by the teller so that he could put his thumbprint signature on it, not to notify or give him rights on the purported acceptance. After appellant declined to put his thumbprint signature on the check, he was informed by both the teller and the branch manager that it was against bank policy to honor the check without a thumbprint signature. Indignant, [Petitioner] walked out of the bank with the check.

As the intermediate appellate court correctly pointed out, the negotiation of the check is in the nature of a contract, and there can be no agreement until notice of acceptance is received. As a result, there was never acceptance as defined by § 3-409(a), and thus the Bank, pursuant to § 3-408 never was obligated to pay the check under § 3-413(a). Thus, the answer to Petitioner's second question [Did the lower court err in finding the Bank did not accept the...check at issue, as "acceptance" is defined in UCC Section 3-409?] is "no."

"Conversion" under § 3-420.

Because it never accepted the check, Bank of America argues that the intermediate appellate court also correctly concluded that the Bank did not convert the check or its proceeds under § 3-420. Again, we must agree. The Court of Special Appeals stated:

"Conversion," we have held, "requires not merely temporary interference with property rights, but the exercise of unauthorized dominion and control to the complete exclusion of the rightful possessor." [Citation] At no time did [Respondent] exercise "unauthorized dominion and control [over the check] to the complete exclusion of the rightful possessor," [Petitioner].

[Petitioner] voluntarily gave the check to [Respondent's] teller. When [Petitioner] indicated to the teller that he was not an account holder, she gave the check back to him for a thumbprint signature in accordance with bank policy. After being informed by both [Respondent's] teller and branch manager that it was [Respondent's] policy not to cash a non-account holder's check without a thumbprint signature, [Petitioner] left the bank with the check in hand.

Because [Petitioner] gave the check to the teller, [Respondent's] possession of that check was anything but "unauthorized," and having returned the check, within minutes of its receipt, to [Petitioner] for his thumbprint signature, [Respondent] never exercised "dominion and control [over it] to the complete exclusion of the rightful possessor," [Petitioner]. In short, there was no conversion.

D. “Reasonable Identification” under § 3-501(b)(2)(ii) and “Dishonor” under § 3-502

We now turn to the issue of whether the Bank’s refusal to accept the check as presented constituted dishonor under § 3-501 and § 3-502 as Petitioner contends. Petitioner’s argument that Bank of America dishonored the check under § 3-502(d) fails because that section applies to dishonor of an accepted draft. We have determined, *supra*, [above] that Bank of America never accepted the draft. Nevertheless, the question remains as to whether Bank of America dishonored the draft under § 3-502(b)...

(2) Upon demand of the person to whom presentment is made, the person making presentment must (i) exhibit the instrument, (ii) give reasonable identification...

(3) Without dishonoring the instrument, the party to whom presentment is made may (i) return the instrument for lack of a necessary indorsement, or (ii) refuse payment or acceptance for failure of the presentment to comply with the terms of the instrument, an agreement of the parties, or other applicable law or rule.

The question is whether requiring a thumbprint constitutes a request for “reasonable identification” under § 3-501(b)(2)(ii). If it is “reasonable,” then under § 3-501(b)(3)(ii) the refusal of the Bank to accept the check from Petitioner did not constitute dishonor. If, however, requiring a thumbprint is not “reasonable” under § 3-501(b)(2)(ii), then the refusal to accept the check may constitute dishonor under § 3-502(b)(2). The issue of dishonor is arguably relevant because Petitioner has no cause of action against any party, including the drawer, until the check is dishonored.

Respondent Bank of America argues that its relationship with its customer is contractual, [Citations] and that in this case, its contract with its customer, the drawer, authorizes the Bank’s use of the Thumbprint Signature Program as a reasonable form of identification.

According to Respondent, this contractual agreement allowed it to refuse to accept the check, without dishonoring it pursuant to § 3-501(b)(3)(ii), because the Bank’s refusal was based upon the presentment failing to comply with “an agreement of the parties.” The intermediate appellate court agreed. We, however, do not.

...Bank and its customer cannot through their contract define the meaning of the term “reasonable” and impose it upon parties who are not in privity with that contract. Whether requiring a thumbprint constitutes “reasonable identification” within the meaning of § 3-501(b)(2)(ii) is therefore a broader policy consideration,

and not, as argued in this case, simply a matter of contract. We reiterate that the contract does not apply to Petitioner and, similarly, does not give him a cause of action against the Bank for refusing to accept the check. This also means that the Bank cannot rely on the contract as a defense against the Petitioner, on the facts presented here, to say that it did not dishonor the check.

Petitioner, as noted, argues that requiring a thumbprint violates his privacy, and further argues that a thumbprint is not a reasonable form of identification because it does not prove contemporaneously the identity of an over the counter presenter at the time presentment is made. According to Petitioner, the purpose of requiring “reasonable identification” is to allow the drawee bank to determine that the presenter is the proper person to be paid on the instrument. Because a thumbprint does not provide that information at the time presentment and payment are made, Petitioner argues that a thumbprint cannot be read to fall within the meaning of “reasonable identification” for the purposes of § 3-501(b)(2)(ii).

Bank of America argues that the requirement of a thumbprint has been upheld, in other non-criminal circumstances, not to be an invasion of privacy, and is a reasonable and necessary industry response to the growing problem of check fraud. The intermediate appellate court agreed, pointing out that the form of identification was not defined by the statute, but that the Code itself recognized a thumbprint as a form of signature, § 1-201(39), and observing that requiring thumbprint or fingerprint identification has been found to be reasonable and not to violate privacy rights in a number of non-criminal contexts....

We agree with [Petitioner] that a thumbprint cannot be used, in most instances, to confirm the identity of a non-account checkholder at the time that the check is presented for cashing, as his or her thumbprint is usually not on file with the drawee at that time. We disagree, however, with [Petitioner’s] conclusion that a thumbprint signature is therefore not “reasonable identification” for purposes of § 3-501(b)(2).

Nowhere does the language of § 3-501(b)(2) suggest that “reasonable identification” is limited to information [Bank] can authenticate at the time presentment is made. Rather, all that is required is that the “person making presentment must...give reasonable identification.” § 3-501(b)(2). While providing a thumbprint signature does not necessarily confirm identification of the checkholder at presentment—unless of course the drawee bank has a duplicate thumbprint signature on file—it does assist in the identification of the checkholder should the check later prove to be bad. It therefore serves as a powerful deterrent to those who might otherwise attempt to pass a bad check. That one method provides identification at the time of presentment and the other identification after the

check may have been honored, does not prevent the latter from being “reasonable identification” for purposes of § 3-501(b)(2) [Citation].

[So held the lower courts.] We agree, and find this conclusion to be compelled, in fact, by our State’s Commercial Law Article.

The reason has to do with warranties. The transfer of a check for consideration creates both transfer warranties (§ 3-416(a) and (c)) and presentment warranties (§ 3-417(a) and (e)) which cannot be disclaimed. The warranties include, for example, that the payee is entitled to enforce the instrument and that there are no alterations on the check. The risk to banks is that these contractual warranties may be breached, exposing the accepting bank to a loss because the bank paid over the counter on an item which was not properly payable....In such an event, the bank would then incur the expense to find the presenter, to demand repayment, and legal expenses to pursue the presenter for breach of his warranties.

In short, when a bank cashes a check over the counter, it assumes the risk that it may suffer losses for counterfeit documents, forged endorsements, or forged or altered checks. Nothing in the Commercial Law Article forces a bank to assume such risks. *See* [Citations] To the extent that banks are willing to cash checks over the counter, with reasonable identification, such willingness expands and facilitates the commercial activities within the State....

Because the reduction of risk promotes the expansion of commercial practices, we... conclude that a bank’s requirement of a thumbprint placed upon a check presented over the counter by a non-customer is reasonable. [Citations] As the intermediate appellate court well documented, the Thumbprint Program is part of an industry wide response to the growing threat of check fraud. Prohibiting banks from taking reasonable steps to protect themselves from losses could result in banks refusing to cash checks of non-customers presented over the counter at all, a result which would be counter to the direction of § 1-102(2)(b).

As a result of this conclusion, Bank of America in the present case did not dishonor the check when it refused to accept it over the counter. Under § 3-501(b)(3)(ii), Bank of America “refused payment or acceptance for failure of the presentment to comply with...other applicable law or rule.” The rule not complied with by the Petitioner-presenter was § 3-502(b)(2)(ii), in that he refused to give what we have determined to be reasonable identification. Therefore, there was no dishonor of the check by Bank of America’s refusal to accept it. The answer to Petitioner’s third question is therefore “no,” [Did Bank dishonor the check?].

Judgment of the court of special appeals affirmed; costs to be paid by petitioner.

Eldridge, J., concurring in part and dissenting in part.

I cannot agree with the majority's holding that, after the petitioner presented his driver's license and a major credit card, it was "reasonable" to require the petitioner's thumbprint as identification.

Today, honest citizens attempting to cope in this world are constantly being required to show or give drivers' licenses, photo identification cards, social security numbers, the last four digits of social security numbers, mothers' "maiden names," 16 digit account numbers, etc. Now, the majority takes the position that it is "reasonable" for banks and other establishments to require, in addition, thumbprints and fingerprints. Enough is enough. The most reasonable thing in this case was petitioner's "irritation with the Bank of America's Thumbprint Signature Program." Chief Judge Bell has authorized me to state that he joins this concurring and dissenting opinion.

CASE QUESTIONS

1. Petitioner claimed (a) he made a valid presentment, (b) Bank accepted the instrument, (c) Bank dishonored the acceptance, and (d) Bank converted the money and owes it to him. What did the court say about each assertion?
2. There was no dispute that there was enough money in the drawer's account to pay the check, so why didn't Petitioner just deposit it in his own account (then he wouldn't have been required to give a thumbprint)?
3. What part of UCC Article 3 became relevant to the question of whether it was reasonable for Bank to demand Petitioner's thumbprint?
4. How do the presentment and transfer warranties figure into the majority opinion?
5. What did the dissenting judges find fault with in the majority's opinion? What result would have obtained if the minority side had prevailed?

Breach of Transfer Warranties and the Bank's Obligation to Act in Good Faith

PNC Bank v. Robert L. Martin

2010 WL 3271725, U.S. Dist. Ct. (Ky. 2010)

Coffman, J.

This matter is before the court on plaintiff PNC Bank's motion for summary judgment. The court will grant the motion as to liability and damages, because the defendant, Robert L. Martin, fails to raise any genuine issue of material fact, and the evidence establishes that Martin breached his transfer warranties and account agreement with PNC....

I. Background

Martin, an attorney, received an e-mail message on August 16, 2008, from a person who called himself Roman Hidotashi. Hidotashi claimed that he was a representative of Chipang Lee Song Manufacturing Company and needed to hire a lawyer to collect millions of dollars from past-due accounts of North American customers. Martin agreed to represent the company.

On September 8, 2008, Martin received a check for \$290,986.15 from a purported Chipang Lee Song Manufacturing Company customer, even though Martin had yet to commence any collections work. The check, which was drawn on First Century Bank USA, arrived in an envelope with a Canadian postmark and no return address. The check was accompanied by an undated transmittal letter. Martin endorsed the check and deposited it in his client trust account at PNC. Martin then e-mailed Hidotashi, reported that he had deposited the check, and stated that he would await further instructions.

Hidotashi responded to Martin's e-mail message on September 9, 2008. Hidotashi stated that he had an "immediate need for funds" and instructed Martin to wire \$130,600 to a bank account in Tokyo. Martin went to PNC's main office in Louisville the next morning and met with representative Craig Friedman. According to Martin, Friedman advised that the check Martin deposited had cleared. Martin instructed Friedman to wire \$130,600 to the Tokyo account.

Martin returned to PNC later the same day. According to Martin, Friedman accessed Martin's account information and said, "I don't understand this. The check was cleared yesterday. Let me go find out what is going on." Friedman returned with PNC vice president and branch manager Sherry Jennewein, who informed Martin that the check was fraudulent. According to Martin, Jennewein told him that she wished he had met with her instead of Friedman because she never would have authorized the wire transfer.

First Century Bank, on which the check was drawn, dishonored the check. PNC charged Martin's account for \$290,986.15. PNC, however, could not recover the \$130,600 the bank had wired to the Tokyo account. Martin's account, as a result, was left overdrawn by \$124,313.01.

PNC commenced this action. PNC asserts one count for Martin's alleged breach of the transfer warranties provided in Kentucky's version of the Uniform Commercial Code and one count for breach of Martin's account agreement. PNC moves for summary judgment on both counts.

II. Discussion

A. Breach of transfer warranties

PNC is entitled to summary judgment on its breach-of-transfer-warranties claim because the undisputed facts establish Martin's liability.

Transfer warranties trigger when a person transfers an instrument for consideration. UCC § 3-416(a)). A transfer, for purposes of the statute, occurs when an instrument is delivered by a person other than its issuer for the purpose of giving to the person receiving delivery the right to enforce the instrument. § 3-203(a). Martin transferred an instrument to PNC when he endorsed the check and deposited it in his account, thereby granting PNC the right to enforce the check. [Citation] Consideration, for purposes of the statute, need only be enough to support a simple contract. [Citation] Martin received consideration from PNC because PNC made the funds provisionally available before confirming whether First Century Bank would honor the check.

As a warrantor, Martin made a number of representations to PNC, including representations that he was entitled to enforce the check and that all signatures on the check were authentic and authorized. [UCC] § 3-416(a). Martin breached his warranties twofold. First, he was not entitled to enforce the check because the check was a counterfeit and, as a result, Martin had nothing to enforce. Second, the drawer's signature was not authentic because the check was a counterfeit.

Martin does not dispute these facts. Instead, Martin argues, summary judgment is inappropriate because Friedman and Jennewein admitted that PNC made a mistake when Friedman said that he thought the check cleared and Jennewein said that she never would have authorized the wire transfer. Friedman's and Jennewein's statements are immaterial facts. The transfer warranties placed the risk of loss on Martin, regardless of whether PNC, Martin, or both of them were at fault. [Citation] Martin, in any event, fails to support Friedman's and Jennewein's statements with

firsthand deposition testimony or affidavits, so the statements do not qualify as competent evidence. [Citation]

Martin claims that the risk of loss falls on the bank. But the cases Martin cites in support of that proposition suffer from two defects. First, all but one of the cases were decided before the Kentucky General Assembly adopted the Uniform Commercial Code. Martin fails to argue, much less demonstrate, that his cases are good law. Second, Martin's cases are inapposite even if they are good law. [UCC] § 3-416(a) addresses whether a transferor or transferee bears the risk of loss. Martin's cases address who bears the risk of loss as between other players: a drawee bank and a collecting agent [Citation]; a drawer and a drawee bank [Citation]; and an execution creditor and drawee bank [Citation—all of these cases are from 1910–1930]. The one modern case that Martin cites is also inapposite because the case involves a drawer and a drawee bank. [Citation]

In sum, the court must grant summary judgment in PNC's favor on the breach-of-transfer-warranties claim because the parties do not contest any material facts, which establish Martin's liability.

B. Breach of Contract

PNC is also entitled to summary judgment on its breach-of-contract claim because the undisputed facts establish Martin's liability.

To support its allegation that a contract existed, PNC filed copies of Martin's account agreement and Martin's accompanying signature card. Under the agreement's terms, Martin agreed to bind himself to the agreement by signing the signature card. Martin does not dispute that the account agreement was a binding contract, and he does not dispute the account agreement's terms.

Martin's account agreement authorized PNC to charge Martin's account for the value of any item returned to PNC unpaid or any item on which PNC did not receive payment. If PNC's charge-back created an overdraft, Martin was required to pay PNC the amount of the overdraft immediately.

The scam of which Martin was a victim falls squarely within the charge-back provision of the account agreement. The check was returned to PNC unpaid. PNC charged Martin's account, leaving it with an overdraft. Martin was obliged to pay PNC immediately.

As with the breach-of-transfer-warranties claim, Martin cannot defend against the breach-of-contract claim by arguing that PNC made a mistake. The account agreement authorized PNC to charge back Martin's account "even if the amount of the item has already been made available to you." The account agreement, as a result, placed the risk of loss on Martin. Any mistake on PNC's part was immaterial because PNC always had the right to charge back Martin's account. [Citation]

C. Martin's Counterclaims

Martin has asserted counterclaims for violations of various Uniform Commercial Code provisions; negligence and failure to exercise ordinary care; negligent misrepresentation; breach of contract and breach of the implied covenants of good faith and fair dealing; detrimental reliance; conversion; and negligent retention and supervision. Martin argues that "[t]o the extent that either party should be entitled to summary judgment in this case, it would be Martin with respect to his counterclaims against PNC." Martin, however, has not moved for summary judgment on his counterclaims, and the court does not address them on PNC's motion.

D. Damages

PNC's recovery under both theories of liability is contingent on PNC's demonstrating that it acted in good faith. PNC may recover for breach of the transfer warranties only if it took the check in good faith. § 3-416(b). Moreover, PNC must satisfy the implied covenant of good faith and fair dealing, which Kentucky law incorporates in the account agreement. [Citation] Good faith, under both theories, means honesty in fact and the observance of reasonable commercial standards of fair dealing. That means "contracts impose on the parties thereto a duty to do everything necessary to carry them out." [Citation]

The undisputed evidence establishes that PNC acted in good faith. PNC accepted deposit of Martin's check, attempted to present the check for payment at First Century Bank, and charged back Martin's account when the check was dishonored. Martin cannot claim that PNC lacked good faith and fair dealing when PNC took actions permitted under the contract. [Citation] Although PNC might have had the ability to investigate the authenticity of the check before crediting Martin's account, PNC bore no such obligation because Martin warranted that the check was authentic. [UCC] § 3-416(a). Friedman's and Jennewein's statements do not impute a lack of good faith to PNC, even if Martin could support the statements with competent evidence. The Uniform Commercial Code and the account agreement place the risk of loss on Martin, even if PNC made a mistake.

Martin suggests that an insurance carrier might have already reimbursed PNC for the loss. Martin, however, presents no evidence of reimbursement, which PNC, presumably, would have disclosed in discovery.

PNC, therefore, may recover from Martin the overdraft value of \$124,313.01, which is the loss PNC suffered as a result of Martin's breach of the transfer warranties and breach of contract. [UCC] § 3-416(b)...

III. Conclusion

For the foregoing reasons, IT IS ORDERED that PNC's motion for summary judgment is granted...to the extent that...PNC is permitted to recover \$124,313.01 from Martin....

CASE QUESTIONS

1. How did Martin come to have an overdraft of \$124,313.01 in his account?
2. Under what UCC provision did the court hold Martin liable for this amount?
3. The contract liability the court discusses was *not* incurred by Martin on account of his signature on the check (though he did indorse it); what was the contract liability?
4. If the bank had not taken the check in good faith (honesty in fact and observing reasonable commercial standards), what would the consequence have been, and why?
5. Is a reader really constrained here to say that Mr. Martin got totally scammed, or was his behavior reasonable under the circumstances?

25.6 Summary and Exercises

Summary

As a general rule, one who signs a note as maker or a draft as drawer is personally liable unless he or she signs in a representative capacity and either the instrument or the signature shows that the signing has been made in a representative capacity. Various rules govern the permutations of signatures when an agent and a principal are involved.

The maker of a note and the acceptor of a draft have primary contract liability on the instruments. Secondarily liable are drawers and indorsers. Conditions precedent to secondary liability are presentment, dishonor, and notice of dishonor. Under the proper circumstances, any of these conditions may be waived or excused.

Presentment is a demand for payment made on the maker, acceptor, or drawee, or a demand for acceptance on the drawee. Presentment must be made (1) at the time specified in the instrument unless no time is specified, in which case it must be at the time specified for payment, or (2) within a reasonable time if a sight instrument.

Dishonor occurs when acceptance or payment is refused after presentment, at which time a holder has the right of recourse against secondary parties if he has given proper notice of dishonor.

A seller-transferor of any commercial paper gives five implied warranties, which become valuable to a holder seeking to collect in the event that there has been no indorsement or the indorsement has been qualified. These warranties are (1) good title, (2) genuine signatures, (3) no material alteration, (4) no defenses by other parties to the obligation to pay the transferor, and (5) no knowledge of insolvency of maker, acceptor, or drawer.

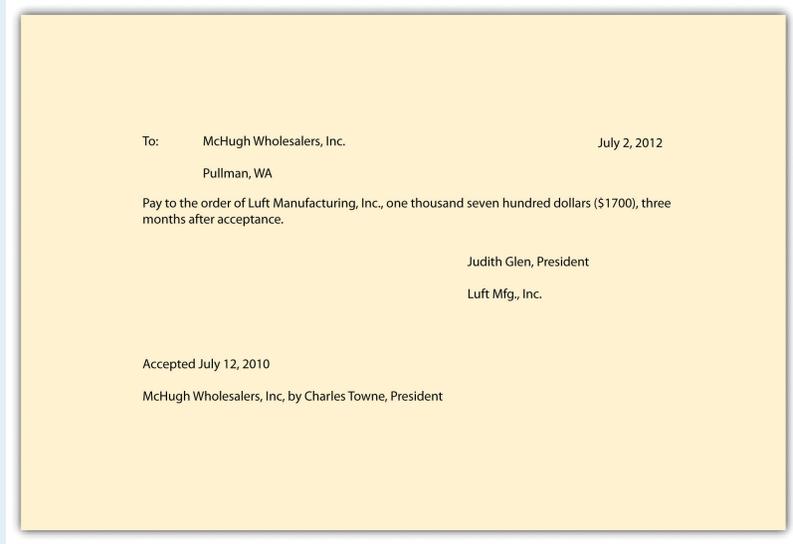

A holder on presentment makes certain warranties also: (1) entitled to enforce the instrument, (2) no knowledge that the maker's or drawer's signature is unauthorized, and (3) no material alteration.

Among the ways in which the parties may be discharged from their contract to honor the instrument are the following: (1) payment or satisfaction, (2) tender of payment, (3) cancellation and renunciation, (4) impairment of recourse or of collateral, (5) reacquisition, (6) fraudulent and material alteration, (7) certification, (8) acceptance varying a draft, and (9) unexcused delay in presentment or notice of dishonor.

EXERCISES

- Howard Corporation has the following instrument, which it purchased in good faith and for value from Luft Manufacturing, Inc.

Figure 25.2

Judith Glen indorsed the instrument on the back in her capacity as president of Luft when it was transferred to Howard on July 15, 2012.

- Is this a note or a draft?
 - What liability do McHugh and Luft have to Howard? Explain.
- An otherwise valid negotiable bearer note is signed with the forged signature of Darby. Archer, who believed he knew Darby's signature, bought the note in good faith from Harding, the forger. Archer transferred the note without indorsement to Barker, in partial payment of a debt. Barker then sold the note to Chase for 80 percent of its face amount and delivered it without indorsement. When Chase presented the note for payment at maturity, Darby refused to honor it, pleading forgery. Chase gave proper notice of dishonor to Barker and to Archer.
 - Can Chase hold Barker liable? Explain.

- b. Can Chase hold Archer liable? Explain.
 - c. Can Chase hold Harding liable? Explain.
3. Marks stole one of Bloom's checks, already signed by Bloom and made payable to Duval, drawn on United Trust Company. Marks forged Duval's signature on the back of the check and cashed it at Check Cashing Company, which in turn deposited it with its bank, Town National. Town National proceeded to collect on the check from United. None of the parties was negligent. Who will bear the loss, assuming Marks cannot be found?
4. Robb stole one of Markum's blank checks, made it payable to himself, and forged Markum's signature on it. The check was drawn on the Unity Trust Company. Robb cashed the check at the Friendly Check Cashing Company, which in turn deposited it with its bank, the Farmer's National. Farmer's National proceeded to collect on the check from Unity. The theft and forgery were quickly discovered by Markum, who promptly notified Unity. None of the parties mentioned was negligent. Who will bear the loss, assuming the amount cannot be recovered from Robb? Explain.
5. Pat stole a check made out to the order of Marks, forged the name of Marks on the back, and made the instrument payable to herself. She then negotiated the check to Harrison for cash by signing her own name on the back of the instrument in Harrison's presence. Harrison was unaware of any of the facts surrounding the theft or forged indorsement and presented the check for payment. Central County Bank, the drawee bank, paid it. Disregarding Pat, who will bear the loss? Explain.
6. American Music Industries, Inc., owed Disneyland Records over \$340,000. As evidence of the debt, Irv Schwartz, American's president, issued ten promissory notes, signing them himself. There was no indication they were obligations of the corporation, American Music Industries, Inc., or that Irv Schwartz signed them in a representative capacity, but Mr. Schwartz asserted that Disneyland knew the notes were corporate obligations, not his personally. American paid four of the notes and then defaulted, and Disneyland sued him personally on the notes. He asserted he should be allowed to prove by parol evidence that he was not supposed to be liable. Is he personally liable? Explain. *Schwartz v. Disneyland Vista Records*, 383 So.2d 1117 (Fla. App. 1980).
7. Alice Able hired Betty Baker as a bookkeeper for her seamstress shop. Baker's duties included preparing checks for Able to sign and reconciling the monthly bank statements. Baker made out several checks to herself, leaving a large space to the left of the amount written, which Able noticed when she signed the checks. Baker took the signed

checks, altered the amount by adding a zero to the right of the original amount, and cashed them at First Bank, the drawee. Able discovered the fraud, Baker was sent to prison, and Able sued First Bank, claiming it was liable for paying out on altered instruments. What is the result?

8. Christina Reynolds borrowed \$16,000 from First Bank to purchase a used Ford automobile. Bank took a note and a secured interest in the car (the car is collateral for the loan). It asked for further security, so Christina got her sister Juanita to sign the note as an accommodation maker. Four months later, Christina notified Bank that she wished to sell the Ford for \$14,000 in order to get a four-wheel drive Jeep, and Bank released its security interest. When Christina failed to complete payment on the note for the Ford, Bank turned to Juanita. What, if anything, does Juanita owe?

SELF-TEST QUESTIONS

1. Drawers and indorsers have
 - a. primary contract liability
 - b. secondary liability
 - c. no liability
 - d. none of the above

2. Conditions(s) needed to establish secondary liability include
 - a. presentment
 - b. dishonor
 - c. notice of dishonor
 - d. all of the above

3. A demand for payment made on a maker, acceptor, or drawee is called
 - a. protest
 - b. notice
 - c. presentment
 - d. certification

4. An example of an implied warranty given by a seller of commercial paper includes a warranty
 - a. of good title
 - b. that there are no material alterations
 - c. that signatures are genuine
 - d. covering all of the above

5. Under UCC Article 3, discharge may result from
 - a. cancellation
 - b. impairment of collateral
 - c. fraudulent alteration
 - d. all of the above

SELF-TEST ANSWERS

1. b
2. d
3. c
4. d
5. d

Chapter 26

Legal Aspects of Banking

LEARNING OBJECTIVES

After reading this chapter, you should understand the following:

1. Banks' relationships with their customers for payment or nonpayment of checks;
2. Electronic funds transfers and how the Electronic Fund Transfer Act affects the bank-consumer relationship;
3. What a wholesale funds transfer is and the scope of Article 4A;
4. What letters of credit are and how they are used.

To this point we have examined the general law of commercial paper as found in Article 3 of the UCC. Commercial paper—notwithstanding waves of digital innovation—still passes through bank collection processes by the ton every day, and Article 3 applies to this flow. But there is also a separate article in the UCC, Article 4, “Bank Deposits and Collections.” In case of conflict with Article 3 rules, those of Article 4 govern.

A discussion of government regulation of the financial services industry is beyond the scope of this book. Our focus is narrower: the laws that govern the operations of the banking system with respect to its depositors and customers. Although histories of banking dwell on the relationship between banks and the national government, the banking law that governs the daily operation of checking accounts is state based—Article 4 of the UCC. The enormous increase in noncheck banking has given rise to the Electronic Fund Transfer Act, a federal law.

26.1 Banks and Their Customers

LEARNING OBJECTIVES

1. Understand how checks move, both traditionally and electronically.
2. Know how Article 4 governs the relationship between a bank and its customers.

The Traditional Bank Collection Process The Traditional System in General

Once people mostly paid for things with cash: actual bills. That is obviously not very convenient or safe: a lost ten-dollar bill is almost certainly gone, and carrying around large quantities of cash is dangerous (probably only crooks do much of that). Today a person might go for weeks without reaching for a bill (except maybe to get change for coins to put in the parking meter). And while it is indisputable that electronic payment is replacing paper payment, the latter is still very significant. Here is an excerpt from a Federal Reserve Report on the issue:

In 2008, U.S. consumers had more payment instruments to choose from than ever before: four types of paper instruments—cash, check, money order, and travelers checks; three types of payment cards—debit, credit, and prepaid; and two electronic instruments—online banking bill payment (OBPP) and electronic bank account deductions (EBAD) using their bank account numbers. The average consumer had 5.1 of the nine instruments in 2008, and used 4.2 instruments in a typical month. Consumers made 52.9 percent of their monthly payments with a payment card. More consumers now have debit cards than credit cards (80.2 percent versus 78.3 percent), and consumers use debit cards more often than cash, credit cards, or checks individually. However, paper instruments are still popular and account for 36.5 percent of consumer payments. Most consumers have used newer electronic payments at some point, but these only account for 9.7 percent of consumer payments. Security and ease of use are the characteristics of payment instruments that consumers rate as most important. Kevin Foster, et al., *The 2008 Survey of Consumer Payment Choice*, Federal Reserve Bank of Boston, Public Policy Discussion Paper No. 09-10, p. 2 (April 2010), <http://www.bos.frb.org/economic/ppdp/2009/ppdp0910.pdf>.

Americans still wrote some thirty billion checks in 2006. Scott Schuh, *Overview of the Survey of Consumer Payment Choice (SCPC) Program*, Federal Reserve Bank of Boston, p.

5 (May 2010). <http://www.bos.frb.org/economic/cprc/presentations/2010/Schuh050610.pdf>. You can readily imagine how complex the bank collection process must be to cope with such a flood of paper. Every check written must eventually come back to the bank on which it is drawn, after first having been sent to the landlord, say, to pay rent, then to the landlord's bank, and from there through a series of intermediate banks and collection centers.

Terminology

To trace the traditional check-collection process, it is necessary to understand the terminology used. The bank upon which a check is written is the **payor bank**¹ (the drawee bank). The **depository bank**² is the one the payee deposits the check into. Two terms are used to describe the various banks that may handle the check after it is written: collecting banks and intermediary banks. All banks that handle the check—except the payor bank—are **collecting banks**³ (including the depository bank); **intermediary banks**⁴ are all the collecting banks except the payor and depository banks. A bank can take on more than one role: Roger in Seattle writes a check on his account at Seattle Bank and mails it to Julia in Los Angeles in payment for merchandise; Julia deposits it in her account at Bank of L.A. Bank of L.A. is a depository bank and a collecting bank. Any other bank through which the check travels (except the two banks already mentioned) is an intermediary bank.

Collection Process between Customers of the Same Bank

If the depository bank is also the payor bank (about 30% of all checks), the check is called an “on-us” item and UCC 4-215(e)(2) provides that—if the check is not dishonored—it is available by the payee “at the opening of the bank’s second banking day following receipt of the item.” Roger writes a check to Matthew, both of whom have accounts at Seattle Bank; Matthew deposits the check on Monday. On Wednesday the check is good for Matthew (he may have been given “provisional credit” before then, as discussed below, the bank could subtract the money from his account if Roger didn’t have enough to cover the check).

Collection Process between Customers of Different Banks

Roger in Seattle writes a check on Seattle Bank payable to Julia in L.A. Julia deposits it in her account at L.A. Bank, the depository bank. L.A. Bank must somehow present the check to Seattle Bank either directly or through intermediary banks. If the collecting banks (again, all of them except Seattle Bank) act before the midnight deadline following receipt, they have acted “seasonably” according to UCC 4-202. When the payor bank—Seattle Bank—gets the check it must pay it, unless the check is dishonored or returned (UCC 4-302).

1. The bank upon which a check is drawn; the drawee.
2. The bank into which a check is deposited by its payee.
3. A bank that collects the amount of a check for its customer from the payor bank.
4. A bank that handles checks, but not including payor and depository banks.

Physical Movement of Checks

The physical movement of checks—such as it still occurs—is handled by three possible systems.

The Federal Reserve System’s regional branches process checks for banks holding accounts with them. The Feds charge for the service, and prior to 2004 it regularly included check collection, air transportation of checks to the Reserve Bank (hired out to private contractors) and ground transportation delivery of checks to paying banks. Reserve Banks handle about 27 percent of US checks, but the air service is decreasing with “Check 21,” a federal law discussed below, that allows electronic transmission of checks.

Correspondent banks⁵ are banks that have formed “partnerships” with other banks in order to exchange checks and payments directly, bypassing the Federal Reserve and its fees. Outside banks may go through a correspondent bank to exchange checks and payments with one of its partners.

Correspondent banks may also form a **clearinghouse corporation**⁶, in which members exchange checks and payments in bulk, instead of on a check-by-check basis, which can be inefficient considering that each bank might receive thousands of checks in a day. The clearinghouse banks save up the checks drawn on other members and exchange them on a daily basis. The net payments for these checks are often settled through Fedwire, a Federal Reserve Board electronic funds transfer (EFT) system that handles large-scale check settlement among US banks. Correspondent banks and clearinghouse corporations make up the private sector of check clearing, and together they handle about 43 percent of US checks.

The Electronic System: Check 21 Act

Rationale for the “Check Clearing for the 21st Century Act”

After the events of September 11, 2001, Congress felt with renewed urgency that banks needed to present and clear checks in a way not dependent upon the physical transportation of the paper instruments by air and ground, in case such transportation facilities were disrupted. The federal Check Clearing for the 21st Century Act (Public Law 108-100)—more commonly referred to as “Check 21 Act”—became effective in 2004.

Basic Idea of Check 21 Act

Check 21 Act provides the legal basis for the electronic transportation of check data. A bank scans the check. The data on the check is already encoded in

5. Those banks that form a partnership to exchange checks among themselves, bypassing the Federal Reserve and its fees.

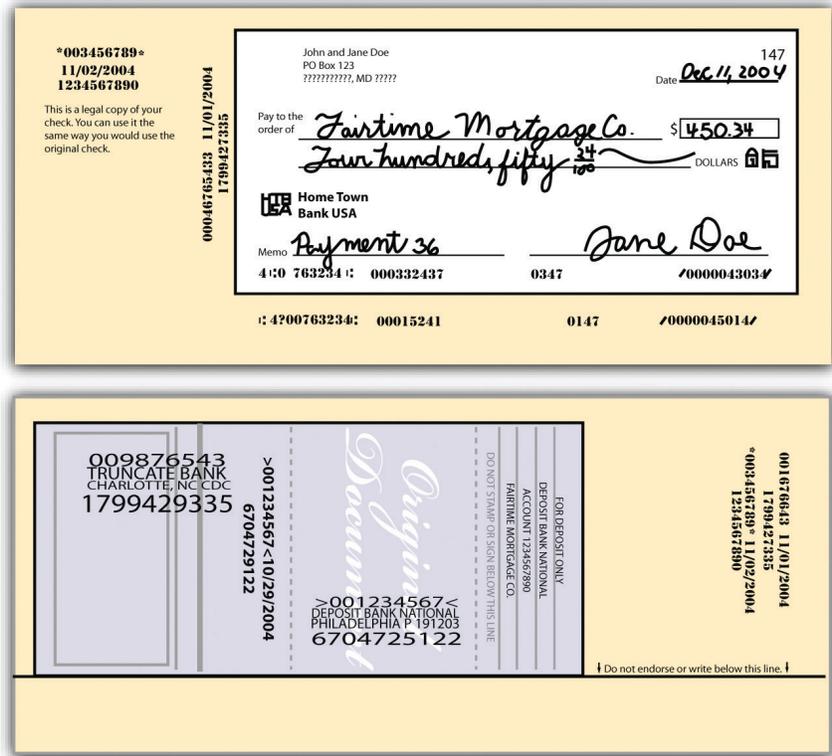

6. An office where banks exchange checks and drafts and settle accounts, owned by the member banks participating.

electronically readable numbers and the data, now separated (“truncated”) from the paper instrument (which may be destroyed), is transmitted for processing. “The Act authorizes a new negotiable instrument, called a **substitute check**⁷, to replace the original check. A substitute check is a paper reproduction of the original check that is suitable for automated processing in the same manner as the original check. The Act permits banks to provide substitute checks in place of original checks to subsequent parties in the check processing stream....Any financial institution in the check clearing process can truncate the original check and create a substitute check. United States Treasury, *The Check Clearing for the 21st Century Act: Frequently Asked Questions*, October 2004, http://www.justice.gov/ust/eo/private_trustee/library/chapter07/docs/check21/Check21FAQs-final.pdf. However, in the check collection process it is not required that the image be converted to a substitute check: the electronic image itself may suffice.

For example, suppose Roger in Seattle writes a check on Seattle Bank payable to Julia in L.A. and mails it to her. Julia deposits it in her account at L.A. Bank, the depository bank. L.A. Bank truncates the check (again, scans it and destroys the original) and transmits the data to Seattle Bank for presentation and payment. If for any reason Roger, or any appropriate party, wants a paper version, a substitute check will be created (see [Figure 26.1 "Substitute Check Front and Back"](#)). Most often, though, that is not necessary: Roger does not receive the actual cancelled checks he wrote in his monthly statement as he did formerly. He receives instead a statement listing paid checks he’s written and a picture of the check (not a substitute check) is available to him online through his bank’s website. Or he may receive his monthly statement itself electronically, with pictures of the checks he wrote available with a mouse click. Roger may also dispense with mailing the check to Julia entirely, as noted in the discussion of electronic funds transfers.

7. A paper reproduction of an electronically copied check the image of which is transferred if requested, instead of the paper check.

Figure 26.1 *Substitute Check Front and Back*

Front and back of a substitute check (not actual size).

Images from Federal Reserve Board: http://www.federalreserve.gov/pubs/check21/consumer_guide

Substitute checks are legal negotiable instruments. The act provides certain warranties to protect recipients of substitute checks that are intended to protect recipients against losses associated with the check substitution process. One of these warranties provides that “[a] bank that transfers, presents, or returns a substitute check...for which it receives consideration warrants...that...[t]he substitute check meets the requirements of legal equivalence” (12 CFR § 229.52(a)(1)). The Check 21 Act does not replace existing state laws regarding such instruments. The Uniform Commercial Code still applies, and we turn to it next.

Two notable consequences of the Check 21 Act are worth mentioning. The first is that a check may be presented to the payor bank for payment very quickly, perhaps in less than an hour: the customer’s “float” time is abbreviated. That means be sure you have enough money in your account to cover the checks that you write. The second consequence of Check 21 Act is that it is now possible for anybody—you at

home or the merchant from whom you are buying something—to scan a check and deposit it instantly. “Remote deposit capture” allows users to transmit a scanned image of a check for posting and clearing using a web-connected computer and a check scanner. The user clicks to send the deposit to the desired existing bank account. Many merchants are using this system: that’s why if you write a check at the hardware store you may see it scanned and returned immediately to you. The digital data are transmitted, and the scanned image may be retrieved, if needed, as a “substitute check.”

UCC Article 4: Aspects of Bank Operations

Reason for Article 4

Over the years, the states had begun to enact different statutes to regulate the check collection process. Eighteen states adopted the American Bankers Association Bank Collection Code; many others enacted Deferred Posting statutes. Not surprisingly, a desire for uniformity was the principal reason for the adoption of UCC Article 4. Article 4 absorbed many of the rules of the American Bankers Association Code and of the principles of the Deferred Posting statutes, as well as court decisions and common customs not previously codified.

Banks Covered

Article 4 covers three types of banks: depository banks, payor banks, and collecting banks. These terms—already mentioned earlier—are defined in UCC Section 4-105. A depository bank is the first bank to which an item is transferred for collection. Section 4-104 defines “item” as “an instrument or a promise or order to pay money handled by a bank for collection or payment[,],...not including a credit or debit card slip.” A payor bank is any bank that must pay a check because it is drawn on the bank or accepted there—the drawee bank (a depository bank may also be a payor bank). A collecting bank is any bank except the payor bank that handles the item for collection.

Technical Rules

Detailed coverage of Parts 2 and 3 of Article 4, the substantive provisions, is beyond the scope of this book. However, Article 4 answers several specific questions that bank customers most frequently ask.

1. What is the effect of a “pay any bank” indorsement? The moment these words are indorsed on a check, only a bank may acquire the rights of a holder. This restriction can be lifted whenever (a) the check has been

returned to the customer initiating collection or (b) the bank specially indorses the check to a person who is not a bank (4-201).

2. May a depository bank supply a missing indorsement? It may supply any indorsement of the customer necessary to title unless the check contains words such as “payee’s indorsement required.” If the customer fails to indorse a check when depositing it in his account, the bank’s notation that the check was deposited by a customer or credited to his account takes effect as the customer’s indorsement. (Section 4-205(1)).
3. Are any warranties given in the collection process? Yes. They are identical to those provided in Article 3, except that they apply only to customers and collecting banks (4-207(a)). The customer or collecting bank that transfers an item and receives a settlement or other consideration warrants (1) he is entitled to enforce the item; (2) all signatures are authorized authentic; (3) the item has not been altered; (4) the item is not subject to a defense or claim in recoupment; (5) he has no knowledge of insolvency proceedings regarding the maker or acceptor or in the case of an unaccepted draft, the drawer. These warranties cannot be disclaimed as to checks.
4. Does the bank have the right to a charge-back against a customer’s account, or refund? The answer turns on whether the settlement was provisional or final. A settlement is the proper crediting of the amount ordered to be paid by the instrument. Someone writes you a check for \$1,000 drawn on First Bank, and you deposit it in Second Bank. Second Bank will make a “provisional settlement” with you—that is, it will provisionally credit your account with \$1,000, and that settlement will be final when First Bank debits the check writer’s account and credits Second Bank with the funds. Under Section 4-212(1), as long as the settlement was still provisional, a collecting bank has the right to a “charge-back” or refund if the check “bounces” (is dishonored). However, if settlement was final, the bank cannot claim a refund.

What determines whether settlement is provisional or final? Section 4-213(1) spells out four events (whichever comes first) that will convert a payor bank’s provisional settlement into final settlement: When it (a) pays the item in cash; (b) settles without reserving a right to revoke and without having a right under statute, clearinghouse rule, or agreement with the customer; finishes posting the item to the appropriate account; or (d) makes provisional settlement and fails to revoke the settlement in the time and manner permitted by statute, clearinghouse rule, or agreement. All clearinghouses have rules permitting revocation of settlement within certain time periods. For example an item cleared before 10 a.m. may be returned and the settlement revoked before 2 p.m. From this section it should be

apparent that a bank generally can prevent a settlement from becoming final if it chooses to do so.

Relationship with Customers

The relationship between a bank and its customers is governed by UCC Article 4. However, Section 4-103(1) permits the bank to vary its terms, except that no bank can disclaim responsibility for failing to act in good faith or to exercise ordinary care. Most disputes between bank and customer arise when the bank either pays or refuses to pay a check. Under several provisions of Article 4, the bank is entitled to pay, even though the payment may be adverse to the customer's interest.

Common Issues Arising between Banks and Their Customers

Payment of Overdrafts

Suppose a customer writes a check for a sum greater than the amount in her account. May the bank pay the check and charge the customer's account? Under Section 4-401(1), it may. Moreover, it may pay on an altered check and charge the customer's account for the original tenor of the check, and if a check was completed it may pay the completed amount and charge the customer's account, assuming the bank acted in good faith without knowledge that the completion was improper.

Payment of Stale Checks

Section 4-404 permits a bank to refuse to pay a check that was drawn more than six months before being presented. Banks ordinarily consider such checks to be "stale" and will refuse to pay them, but the same section gives them the option to pay if they choose. A corporate dividend check, for example, will be presumed to be good more than six months later. The only exception to this rule is for certified checks, which must be paid whenever presented, since the customer's account was charged when the check was certified.

Payment of Deceased's or Incompetent's Checks

Suppose a customer dies or is adjudged to be incompetent. May the bank honor her checks? Section 4-405 permits banks to accept, pay, and collect an item as long as it has no notice of the death or declaration of incompetence, and has no reasonable opportunity to act on it. Even after notice of death, a bank has ten days to pay or certify checks drawn on or prior to the date of death unless someone claiming an interest in the account orders it to refrain from doing so.

Stop Payment Orders

Section 4-403 expressly permits the customer to order the bank to “stop payment” on any check payable for her account, assuming the stop order arrives in enough time to reasonably permit the bank to act on it. An oral stop order is effective for fourteen days; a follow-up written confirmation within that time is effective for six months and can be renewed in writing. But if a stop order is not renewed, the bank will not be liable for paying the check, even one that is quite stale (e.g., *Granite Equipment Leasing Corp. v. Hempstead Bank*, 326 N.Y.S. 2d 881 (1971)).

Wrongful Dishonor

If a bank wrongfully dishonors an item, it is liable to the customer for all damages that are a direct consequence of (“proximately caused by”) the dishonor. The bank’s liability is limited to the damages actually proved; these may include damages for arrest and prosecution. See [Section 26.4 "Cases"](#) under “Bank’s Liability for Paying over Customer’s ‘Stop Payment’ Order” (*Meade v. National Bank of Adams County*).

Customers’ Duties

In order to hold a bank liable for paying out an altered check, the customer has certain duties under Section 4-406. Primarily, the customer must act promptly in examining her statement of account and must notify the bank if any check has been altered or her signature has been forged. If the customer fails to do so, she cannot recover from the bank for an altered signature or other term if the bank can show that it suffered a loss because of the customer’s slowness. Recovery may also be denied when there has been a series of forgeries and the customer did not notify the bank within two weeks after receiving the first forged item. See [Section 26.4 "Cases"](#) under “Customer’s Duty to Inspect Bank Statements” (the *Planters Bank v. Rogers* case).

These rules apply to a payment made with ordinary care by the bank. If the customer can show that the bank negligently paid the item, then the customer may recover from the bank, regardless of how dilatory the customer was in notifying the bank—with two exceptions: (1) from the time she first sees the statement and item, the customer has one year to tell the bank that her signature was unauthorized or that a term was altered, and (2) she has three years to report an unauthorized indorsement.

The Expedited Funds Availability Act In General

In addition to UCC Article 4 (again, state law), the federal Expedited Funds Availability Act—also referred to as “Regulation CC” after the Federal Reserve regulation that implements it—addresses an aspect of the relationship between a bank and its customers. It was enacted in 1988 in response to complaints by consumer groups about long delays before customers were allowed access to funds represented by checks they had deposited. It has nothing to do with electronic transfers, although the increasing use of electronic transfers does speed up the system and make it easier for banks to comply with Regulation CC.

The Act’s Provisions

The act provides that when a customer deposits a cashier’s check, certified check, or a check written on an account in the same bank, the funds must be available by the next business day. Funds from other local checks (drawn on institutions within the same Federal Reserve region) must be available within two working days, while there is a maximum five-day wait for funds from out-of-town checks. In order for these time limits to be effective, the customer must endorse the check in a designated space on the back side. The FDIC sets out the law at its website: <http://www.fdic.gov/regulations/laws/rules/6500-3210.html>.

KEY TAKEAWAY

The bank collection process is the method by which checks written on one bank are transferred by the collecting bank to a clearing house. Traditionally this has been a process of physical transfer by air and ground transportation from the depository bank to various intermediary banks to the payor bank where the check is presented. Since 2004 the Check 21 Act has encouraged a trend away from the physical transportation of checks to the electronic transportation of the check’s data, which is truncated (stripped) from the paper instrument and transmitted. However, if a paper instrument is required, a “substitute check” will recreate it. The UCC’s Article 4 deals generally with aspects of the bank-customer relationship, including warranties on payment or collection of checks, payment of overdrafts, stop orders, and customers’ duties to detect irregularities. The Expedited Funds Availability Act is a federal law governing customer’s access to funds in their accounts from deposited checks.

EXERCISES

1. Describe the traditional check-collection process from the drawing of the check to its presentation for payment to the drawee (payor) bank
2. Describe how the Check 21 Act has changed the check-collection process.
3. Why was Article 4 developed, and what is its scope of coverage?

26.2 Electronic Funds Transfers

LEARNING OBJECTIVES

1. Understand why electronic fund transfers have become prevalent.
2. Recognize some typical examples of EFTs.
3. Know that the EFT Act of 1978 protects consumers, and recognize what some of those protections—and liabilities—are.
4. Understand when financial institutions will be liable for violating the act, and some of the circumstances when the institutions will not be liable.

Background to Electronic Fund Transfers

In General

Drowning in the yearly flood of billions of checks, eager to eliminate the “float” that a bank customer gets by using her money between the time she writes a check and the time it clears, and recognizing that better customer service might be possible, financial institutions sought a way to computerize the check collection process. What has developed is electronic fund transfer (EFT), a system that has changed how customers interact with banks, credit unions, and other financial institutions. Paper checks have their advantages, but their use is decreasing in favor of EFT.

In simplest terms, EFT is a method of paying by substituting an electronic signal for checks. A “debit card,” inserted in the appropriate terminal, will authorize automatically the transfer of funds from your checking account, say, to the account of a store whose goods you are buying.

Types of EFT

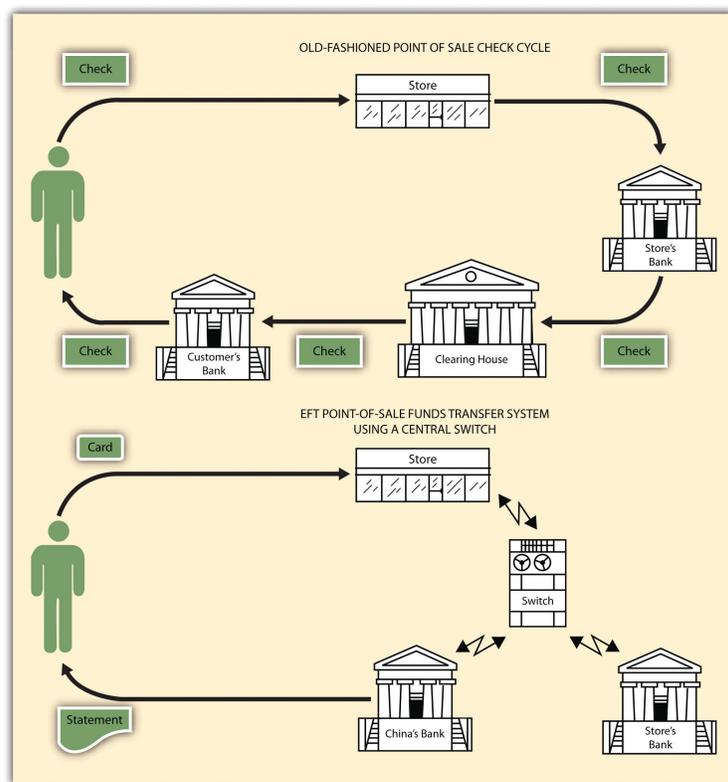

You are of course familiar with some forms of EFT:

- The automated teller machine (ATM) permits you to electronically transfer funds between checking and savings accounts at your bank with a plastic ID card and a personal identification number (PIN), and to obtain cash from the machine.

- Telephone transfers or computerized transfers allow customers to access the bank's computer system and direct it to pay bills owed to a third party or to transfer funds from one account to another.
- Point of sale terminals located in stores let customers instantly debit their bank accounts and credit the merchant's account.
- Preauthorized payment plans permit direct electronic deposit of paychecks, Social Security checks, and dividend checks.
- Preauthorized withdrawals from customers' bank accounts or credit card accounts allow paperless payment of insurance premiums, utility bills, automobile or mortgage payments, and property tax payments.

The "short circuit" that EFT permits in the check processing cycle is illustrated in Figure 26.2 "How EFT Replaces Checks".

Figure 26.2 How EFT Replaces Checks

Unlike the old-fashioned check collection process, EFT is virtually instantaneous: at one instant a customer has a sum of money in her account; in the next, after insertion of a plastic card in a machine or the transmission of a coded message by telephone or computer, an electronic signal automatically debits her bank checking account and posts the amount to the bank account of the store where she is making

a purchase. No checks change hands; no paper is written on. It is quiet, odorless, smudge proof. But errors are harder to trace than when a paper trail exists, and when the system fails (“our computer is down”) the financial mess can be colossal. Obviously some sort of law is necessary to regulate EFT systems.

Electronic Fund Transfer Act of 1978

Purpose

Because EFT is a technology consisting of several discrete types of machines with differing purposes, its growth has not been guided by any single law or even set of laws. The most important law governing consumer transactions is the **Electronic Fund Transfer Act of 1978**⁸, FDIC, “Electronic Fund Transfer Act of 1978,” <http://www.fdic.gov/regulations/laws/rules/6500-1350.html>. whose purpose is “to provide a basic framework establishing the rights, liabilities, and responsibilities of participants in electronic fund transfer systems. The primary objective of [the statute], however, is the provision of individual consumer rights.” This federal statute has been implemented and supplemented by the Federal Reserve Board’s Regulation E, Comptroller of the Currency guidelines on EFT, and regulations of the Federal Home Loan Bank Board. (Wholesale transactions are governed by UCC Article 4A, which is discussed later in this chapter.)

The EFT Act of 1978 is primarily designed to disclose the terms and conditions of electronic funds transfers so the customer knows the rights, costs and liabilities associated with EFT, but it does not embrace every type of EFT system. Included are “point-of-sale transfers, automated teller machine transactions, direct deposits or withdrawal of funds, and transfers initiated by telephone or computer” (EFT Act Section 903(6)). Not included are such transactions as wire transfer services, automatic transfers between a customer’s different accounts at the same financial institution, and “payments made by check, draft, or similar paper instrument at electronic terminals” (Reg. E, Section 205.2(g)).

Consumer Protections Afforded by the Act

Four questions present themselves to the mildly wary consumer facing the advent of EFT systems: (1) What record will I have of my transaction? (2) How can I correct errors? (3) What recourse do I have if a thief steals from my account? (4) Can I be required to use EFT? The EFT Act, as implemented by Regulation E, answers these questions as follows.

8. Federal law that provides a basic framework establishing the rights, liabilities, and responsibilities of participants in electronic fund transfer systems.

1. Proof of transaction. The electronic terminal itself must be equipped to provide a receipt of transfer, showing date, amount, account number, and certain other information. Perhaps more importantly, the bank or

other financial institution must provide you with a monthly statement listing all electronic transfers to and from the account, including transactions made over the computer or telephone, and must show to whom payment has been made.

2. **Correcting errors.** You must call or write the financial institution whenever you believe an error has been made in your statement. You have sixty days to do so. If you call, the financial institution may require you to send in written information within ten days. The financial institution has forty-five days to investigate and correct the error. If it takes longer than ten days, however, it must credit you with the amount in dispute so that you can use the funds while it is investigating. The financial institution must either correct the error promptly or explain why it believes no error was made. You are entitled to copies of documents relied on in the investigation.
3. **Recourse for loss or theft.** If you notify the issuer of your EFT card within two business days after learning that your card (or code number) is missing or stolen, your liability is limited to \$50. If you fail to notify the issuer in this time, your liability can go as high as \$500. More daunting is the prospect of loss if you fail within sixty days to notify the financial institution of an unauthorized transfer noted on your statement: after sixty days of receipt, your liability is unlimited. In other words, a thief thereafter could withdraw all your funds and use up your line of credit and you would have no recourse against the financial institution for funds withdrawn after the sixtieth day, if you failed to notify it of the unauthorized transfer.
4. **Mandatory use of EFT.** Your employer or a government agency can compel you to accept a salary payment or government benefit by electronic transfer. But no creditor can insist that you repay outstanding loans or pay off other extensions of credit electronically. The act prohibits a financial institution from sending you an EFT card “valid for use” unless you specifically request one or it is replacing or renewing an expired card. The act also requires the financial institution to provide you with specific information concerning your rights and responsibilities (including how to report losses and thefts, resolve errors, and stop payment of preauthorized transfers). A financial institution may send you a card that is “not valid for use” and that you alone have the power to validate if you choose to do so, after the institution has verified that you are the person for whom the card was intended.

Liability of the Financial Institution

The financial institution’s failure to make an electronic fund transfer, in accordance with the terms and conditions of an account, in the correct amount or in a timely

manner when properly instructed to do so by the consumer makes it liable for all damages proximately caused to the consumer, except where

- 1) the consumer's account has insufficient funds;
- 2) the funds are subject to legal process or other encumbrance restricting such transfer;
- 3) such transfer would exceed an established credit limit;
- 4) an electronic terminal has insufficient cash to complete the transaction; or
- 5) a circumstance beyond its control, where it exercised reasonable care to prevent such an occurrence, or exercised such diligence as the circumstances required.

Enforcement of the Act

A host of federal regulatory agencies oversees enforcement of the act. These include the Comptroller of the Currency (national banks), Federal Reserve District Bank (state member banks), Federal Deposit Insurance Corporation regional director (nonmember insured banks), Federal Home Loan Bank Board supervisory agent (members of the FHLB system and savings institutions insured by the Federal Savings & Loan Insurance Corporation), National Credit Union Administration (federal credit unions), Securities & Exchange Commission (brokers and dealers), and the Federal Trade Commission (retail and department stores) consumer finance companies, all nonbank debit card issuers, and certain other financial institutions. Additionally, consumers are empowered to sue (individually or as a class) for actual damages caused by any EFT system, plus penalties ranging from \$100 to \$1,000. Section 26.4 "Cases", under "Customer's Duty to Inspect Bank Statements" (*Commerce Bank v. Brown*), discusses the bank's liability under the act.

KEY TAKEAWAY

Eager to reduce paperwork for both themselves and for customers, and to speed up the check collection process, financial institutions have for thirty years been moving away from paper checks and toward electronic fund transfers. These EFTs are ubiquitous, including ATMs, point-of-sale systems, direct deposits and withdrawals and online banking of various kinds. Responding to the need for consumer protection, Congress adopted the Electronic Fund Transfers Act, effective in 1978. The act addresses many common concerns consumers have about using electronic fund transfer systems, sets out liability for financial institutions and customers, and provides an enforcement mechanism.

EXERCISES

1. Why have EFTs become very common?
2. What major issues are addressed by the EFTA?
3. If you lose your credit card, what is your liability for unauthorized charges?

26.3 Wholesale Transactions and Letters of Credit

LEARNING OBJECTIVES

1. Understand what a “wholesale transaction” is; recognize that UCC Article 4A governs such transactions, and recognize how the Article addresses three common issues.
2. Know what a “letter of credit” (LC) is, the source of law regarding LCs, and how such instruments are used.

Wholesale Funds Transfers

Another way that money is transferred is by commercial fund transfers or **wholesale funds transfers**⁹, which is by far the largest segment of the US payment system measured in amounts of money transferred. It is trillions of dollars a day. Wholesale transactions are the transfers of funds between businesses or financial institutions.

Background and Coverage

It was in the development of commercial “wholesale wire transfers” of money in the nineteenth and early twentieth centuries that businesses developed the processes enabling the creation of today’s consumer electronic funds transfers. Professor Jane Kaufman Winn described the development of uniform law governing commercial funds transfers:

Although funds transfers conducted over funds transfer facilities maintained by the Federal Reserve Banks were subject to the regulation of the Federal Reserve Board, many funds transfers took place over private systems, such as the Clearing House for Interbank Payment Systems (“CHIPS”). The entire wholesale funds transfer system was not governed by a clear body of law until U.C.C. Article 4A was promulgated in 1989 and adopted by the states shortly thereafter. The Article 4A drafting process resulted in many innovations, even though it drew heavily on the practices that had developed among banks and their customers during the 15 years before the drafting committee was established. While a consensus was not easy to achieve, the community of interests shared by both the banks and their customers permitted the drafting process to find workable compromises on many thorny issues. Jane Kaufman Winn, *Clash of the Titans: Regulating the Competition between Established and Emerging Electronic Payment Systems*,

9. Transfers of large sums of money—tens of millions of dollars—between businesses or financial institutions.

<http://www.law.washington.edu/Directory/docs/Winn/Clash%20of%20the%20Titans.htm>.

All states and US territories have adopted Article 4A. Consistent with other UCC provisions, the rights and obligations under Article 4A may be varied by agreement of the parties. Article 4A does not apply if any step of the transaction is governed by the Electronic Fund Transfer Act. Although the implication may be otherwise, the rules in Article 4A apply to any funds transfer, not just electronic ones (i.e., transfers by mail are covered, too). Certainly, however, electronic transfers are most common, and—as the Preface to Article 4A notes—a number of characteristics of them influenced the Code’s rules. These transactions are characterized by large amounts of money—multimillions of dollars; the parties are sophisticated businesses or financial institutions; funds transfers are completed in one day, they are highly efficient substitutes for paper delivery; they are usually low cost—a few dollars for the funds transfer charged by the sender’s bank.

Operation of Article 4A

The UCC “Prefatory Note” to Article 4A observes that “the funds transfer that is covered by Article 4A is not a complex transaction.” To illustrate the operation of Article 4A, assume that Widgets International has an account with First Bank. In order to pay a supplier, Supplies Ltd., in China, Widgets instructs First Bank to pay \$6 million to the account of Supplies Ltd. in China Bank. In the terminology of Article 4A, Widgets’ instruction to its bank is a “payment order.” Widgets is the “sender” of the payment order, First Bank is the “receiving bank,” and Supplies Ltd. is the “beneficiary” of the order.

When First Bank performs the purchase order by instructing China Bank to credit the account of Supplies Limited, First Bank becomes a sender of a payment order, China Bank becomes a receiving bank, and Supplies Ltd. is still the beneficiary. This transaction is depicted in [Figure 26.3 "Funds Transfer"](#). In some transactions there may also be one or more “intermediary banks” between First and Second Bank.

Frequently Occurring Legal Issues in Funds Transfers

Three legal issues that frequently arise in funds transfer litigation are addressed in Article 4A and might be mentioned here.

Responsibility for Unauthorized Payments

First, who is responsible for unauthorized payment orders? The usual practice is for banks and their customers to agree to security procedures for the verification of payment orders. If a bank establishes a commercially reasonable procedure, complies with that procedure, and acts in good faith and according to its agreement with the customer, the customer is bound by an unauthorized payment order. There is, however, an important exception to this rule. A customer will not be liable when the order is from a person unrelated to its business operations.

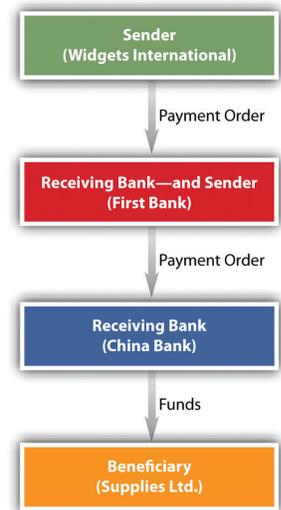

Error by Sender

Second, who is responsible when the sender makes a mistake—for instance, in instructing payment greater than what was intended? The general rule is that the sender is bound by its own error. But in cases where the error would have been discovered had the bank complied with its security procedure, the receiving bank is liable for the excess over the amount intended by the sender, although the bank is allowed to recover this amount from the beneficiary.

Bank Mistake in Transferring Funds

Third, what are the consequences when the bank makes a mistake in transferring funds? Suppose, for example, that Widgets (in the previous situation) instructed payment of \$2 million but First Bank in turn instructed payment of \$20 million. First Bank would be entitled to only \$2 million from Widgets and would then attempt to recover the remaining \$18 million from Supplies Ltd. If First Bank had instructed payment to the wrong beneficiary, Widgets would have no liability and the bank would be responsible for recovering the entire payment. Unless the parties agree otherwise, however, a bank that improperly executes a payment order is not liable for consequential damages.

Figure 26.3 Funds Transfer

Letters of Credit

Because international trade involves risks not usually encountered in domestic trade—government control of exports, imports, and currency; problems in verifying goods' quality and quantity; disruptions caused by adverse weather, war; and so on—merchants have over the years devised means to minimize these risks, most notably the letter of credit (“LC”). Here are discussed the definition of letters of credit, the source of law governing them, how they work as payments for exports and as payments for imports.

Definition

A **letter of credit**¹⁰ is a statement by a bank (or other financial institution) that it will pay a specified sum of money to specific persons if certain conditions are met. Or, to rephrase, it is a letter issued by a bank authorizing the bearer to draw a stated amount of money from the issuing bank (or its branches, or other associated banks or agencies). Originally, a letter of credit was quite literally that—a letter addressed by the buyer's bank to the seller's bank stating that the former could vouch for their good customer, the buyer, and that it would pay the seller in case of the buyer's default. An LC is issued by a bank on behalf of its creditworthy customers, whose application for the credit has been approved by that bank.

Source of Law

Letters of credit are governed by both international and US domestic law.

International Law

Many countries (including the United States) have bodies of law governing letters of credit. Sophisticated traders will agree among themselves by which body of law they choose to be governed. They can agree to be bound by the UCC, or they may decide they prefer to be governed by the Uniform Customs and Practice for Commercial Documentary Credits (UCP), a private code devised by the Congress of the International Chamber of Commerce. Suppose the parties do not stipulate a body of law for the agreement, and the various bodies of law conflict, what then? Julius is in New York and Rochelle is in Paris; does French law or New York law govern? The answer will depend on the particulars of the dispute. An American court must determine under the applicable principles of the law of “conflicts of law” whether New York or French law applies.

10. A statement by a bank (or other financial institution) that it will pay a specified sum of money to specific persons if certain conditions are met.

Domestic Law

The principal body of law applicable to the letter of credit in the United States is Article 5 of the UCC. Section 5-103 declares that Article 5 “applies to letters of credit and to certain rights and obligations arising out of transactions involving letters of credit.” The Official Comment to 5-101 observes, “A letter of credit is an idiosyncratic form of undertaking that supports performance of an obligation incurred in a separate financial, mercantile, or other transaction or arrangement.” And—as is the case in other parts of the Code—parties may, within some limits, agree to “variation by agreement in order to respond to and accommodate developments in custom and usage that are not inconsistent with the essential definitions and mandates of the statute.” Although detailed consideration of Article 5 is beyond the scope of this book, a distinction between guarantees and letters of credit should be noted: Article 5 applies to the latter and not the former.

Letters of Credit as Payment for Exports

The following discussion presents how letters of credit work as payment for exports, and a sample letter of credit is presented at [Figure 26.4 "A Letter of Credit"](#).

Figure 26.4 *A Letter of Credit*

MORGAN GUARANTY TRUST COMPANY
OF NEW YORK
 INTERNATIONAL BANKING DIVISION
 23 WALL STREET, NEW YORK, N.Y. 10015 March 5, 20*

Smith Tool Co. Inc.
 29 Bleecker Street
 New York, N.Y. 10012

On all communications please refer to
NUMBER IC - 152647

Dear Sirs:

We are instructed to advise you of the establishment by
 Bank of South America, Puerto Cabello, Venezuela
 of their IRREVOCABLE Credit No. 19845
 in your favor, for the account of John Doe, Puerto Cabello, Venezuela
 for U.S. \$3,000.00 (THREE THOUSAND U.S. DOLLARS)
 available upon presentation to us of your drafts at sight on us, accompanied by:

Commercial Invoice in triplicate, describing the merchandise as indicated below

Consular Invoice in triplicate, all signed and stamped by the Consul of Venezuela

Negotiable Insurance Policy and/or Underwriter's Certificate, endorsed in blank, covering marine and war risks

Full set of straight ocean steamer Bills of Lading, showing consignment to the Bank of South America, Puerto Cabello, stamped by Venezuelan Consul and marked "Freight Prepaid," evidencing shipment of UNA MAQUINA DE SELLAR LATAS, C.I.F. Puerto Cabello, from United States Port to PuertoCabello, Venezuela

Except as otherwise expressly stated herein, this credit is subject to the Uniform Customs and Practice for Documentary Credits (1975 revision), International Chamber of Commerce Publication No. 500

The above bank engages with you that all drafts drawn under and in compliance with the terms of this advice will be duly honored if presented to our Commercial Credits Department, 18 Broad Street, New York, N.Y. 10015, on or before March 31, 20* on which date this credit expires.

We confirm the foregoing and undertake that all drafts drawn and presented in accordance with its terms will be duly honored.

Yours very truly,
 Authorized Signature

Immediately upon receipt, please examine this instrument and if its terms are not clear to you or if you need any assistance in respect to your availment of it, we would welcome your communicating with us. Documents should be presented promptly and not later than 3 P.M.

Julius desires to sell fine quality magic wands and other stage props to Rochelle's Gallery in Paris. Rochelle agrees to pay by letter of credit—she will, in effect, get her bank to inform Julius that he will get paid if the goods are right. She does so by “opening” a letter of credit at her bank—the issuing bank—the Banque de Rue de Houdini where she has funds in her account, or good credit. She tells the bank the terms of sale, the nature and quantity of the goods, the amount to be paid, the documents she will require as proof of shipment, and an expiration date. Banque de Rue de Houdini then directs its correspondent bank in the United States, First Excelsior Bank, to inform Julius that the letter of credit has been opened: Rochelle is good for it. For Julius to have the strongest guarantee that he will be paid, Banque de Rou de Houdini can ask First Excelsior to confirm the letter of credit, thus binding both Banque de Rue de Houdini and Excelsior to pay according to the terms of the letter.

Once Julius is informed that the letter of credit has been issued and confirmed, he can proceed to ship the goods and draw a draft to present (along with the required documents such as commercial invoice, bill of lading, and insurance policy) to First Excelsior, which is bound to follow exactly its instructions from Banque de Rue de Houdini. Julius can present the draft and documents directly, through correspondent banks, or by a representative at the port from which he is shipping the goods. On presentation, First Excelsior may forward the documents to Banque de Rue de Houdini for approval and when First Excelsior is satisfied it will take the draft and pay Julius immediately on a sight draft or will stamp the draft “accepted” if it is a time draft (payable in thirty, sixty, or ninety days). Julius can discount an accepted time draft or hold it until it matures and cash it in for the full amount. First Excelsior will then forward the draft through international banking channels to Banque de Rue de Houdini to debit Rochelle's account.

As Payment for Imports

US importers—buyers—also can use the letter of credit to pay for goods bought from abroad. The importer's bank may require that the buyer put up collateral to guarantee it will be reimbursed for payment of the draft when it is presented by the seller's agents. Since the letter of credit ordinarily will be irrevocable, the bank will be bound to pay the draft when presented (assuming the proper documents are attached), regardless of deficiencies ultimately found in the goods. The bank will hold the bill of lading and other documents and could hold up transfer of the goods until the importer pays, but that would saddle the bank with the burden of disposing of the goods if the importer failed to pay. If the importer's credit rating is sufficient, the bank could issue a trust receipt. The goods are handed over to the importer before they are paid for, but the importer then becomes trustee of the goods for the bank and must hold the proceeds for the bank up to the amount owed

KEY TAKEAWAY

Wholesale funds transfers are a mechanism by which businesses and financial institutions can transmit large sums of money—millions of dollars—between each other, usually electronically, from and to their clients' accounts. Article 4A of the UCC governs these transactions. A letter of credit is a promise by a buyer's bank that upon presentation of the proper paperwork it will pay a specified sum to the identified seller. Letters of credit are governed by domestic and international law.

26.4 Cases

Bank's Liability for Paying over Customer's "Stop Payment" Order

Meade v. National Bank of Adams County

2002 WL 31379858 (Ohio App. 2002)

Kline, J.

The National Bank of Adams County appeals the Adams County Court's judgment finding that it improperly paid a check written by Denton Meade, and that Meade incurred \$3,800 in damages as a result of that improper payment....

I.

Denton Meade maintained a checking account at the Bank. In 2001, Meade entered into an agreement with the Adams County Lumber Company to purchase a yard barn for \$2,784 and paid half the cost as a deposit. On the date of delivery, Friday, March 9, 2001, Meade issued a check to the Lumber Company for the remaining amount he owed on the barn, \$1,406.79.

Meade was not satisfied with the barn. Therefore, at 5:55 p.m. on March 9, 2001, Meade called the Bank to place a stop payment order on his check. Jacqueline Evans took the stop payment order from Meade. She received all the information and authorization needed to stop payment on the check at that time.

Bank employees are supposed to enter stop payments into the computer immediately after taking them. However, Evans did not immediately enter the stop payment order into the computer because it was 6:00 p.m. on Friday, and the Bank closes at 6:00 p.m. on Fridays. Furthermore, the Bank's policy provides that any matters that are received after 2:00 p.m. on a Friday are treated as being received on the next business day, which was Monday, March 12, 2001 in this instance.

On the morning of Saturday, March 10, 2001, Greg Scott, an officer of the Lumber Company, presented the check in question for payment at the Bank. The Bank paid the check. On Monday, the Bank entered Meade's stop payment into the computer and charged Meade a \$15 stop payment fee. Upon realizing that it already paid the

check, on Tuesday the Bank credited the \$15 stop payment fee back to Meade's account. On Thursday, the Bank deducted the amount of the check, \$1,406.79, from Meade's account.

In the meanwhile, Meade contacted Greg Scott at the Lumber Company regarding his dissatisfaction with the barn. Scott sent workers to repair the barn on Saturday, March 10 and on Monday, March 12. However, Meade still was not satisfied. In particular, he was unhappy with the runners supporting the barn. Although his order with the Lumber Company specifically provided for 4 x 6" runner boards, the Lumber Company used 2 x 6" boards. The Lumber Company "laminated" the two by six-inch boards to make them stronger. However, carpenter Dennis Baker inspected the boards and determined that the boards were not laminated properly.

Meade hired Baker to repair the barn. Baker charged Meade approximately three hundred dollars to make the necessary repairs. Baker testified that properly laminated two by six-inch boards are just as strong as four by six-inch boards.

Meade filed suit against the Bank in the trial court seeking \$5,000 in damages. The Bank filed a motion for summary judgment, which the trial court denied. At the subsequent jury trial the court permitted Meade to testify, over the Bank's objections, to the amount of his court costs, attorney fees, and deposition costs associated with this case. The Bank filed motions for directed verdict at the close of Meade's case and at the close of evidence, which the trial court denied.

The jury returned a general verdict finding the Bank liable to Meade in the amount of \$3,800. The Bank filed motions for a new trial and for judgment notwithstanding the verdict, which the trial court denied. The Bank now appeals, asserting the following five assignments of error....

II.

In its first assignment of error, the Bank contends that the trial court erred in denying its motion for summary judgment. Specifically, the Bank asserts that Meade did not issue the stop payment order within a reasonable time for the Bank to act upon it, and therefore that the trial court should have granted summary judgment in favor of the Bank.

Summary judgment is appropriate only when it has been established: (1) that there is no genuine issue as to any material fact; (2) that the moving party is entitled to judgment as a matter of law; and (3) that reasonable minds can come to only one conclusion, and that conclusion is adverse to the nonmoving party. [Citation]

[UCC 4-403(A)] provides that a customer may stop payment on any item drawn on the customer's account by issuing an order to the bank that describes the item with reasonable certainty and is received by the bank "at a time and in a manner that affords the bank a reasonable opportunity to act on it before any action by the bank with respect to the item." What constitutes a reasonable time depends upon the facts of the case. See *Chute v. Bank One of Akron*, (1983) [Citation]

In *Chute*, Bank One alleged that its customer, Mr. Chute, did not give it a reasonable opportunity to act upon his stop payment order when he gave an oral stop payment at one Bank One branch office, and a different Bank One branch office paid the check the following day. In ruling that Bank One had a reasonable opportunity to act upon Mr. Chute's order before it paid the check, the court considered the teller's testimony that stop payment orders are entered onto the computer upon receipt, where they are virtually immediately accessible to all Bank One tellers.

In this case, as in *Chute*, Meade gave notice one day, and the Bank paid the check the following day. Additionally, in this case, the same branch that took the stop payment order also paid the check. Moreover, Evans testified that the Bank's policy for stop payment orders is to enter them into the computer immediately, and that Meade's stop payment order may have shown up on the computer on Saturday if she had entered it on Friday. Based on this information, and construing the facts in the light most favorable to Meade, reasonable minds could conclude that Meade provided the Bank with the stop payment order within time for the Bank to act upon the stop payment order. Accordingly, we overrule the Bank's first assignment of error.

III.

In its second assignment of error, the Bank contends that the trial court erred in permitting Meade to testify regarding the amount he spent on court costs, attorney fees, and taking depositions. Meade contends that because he incurred these costs as a result of the Bank paying his check over a valid stop payment order, the costs are properly recoverable.

As a general rule, the costs and expenses of litigation, other than court costs, are not recoverable in an action for damages. [Citations]

In this case, the statute providing for damages, [UCC 4-403(c)], provides that a customer's recoverable loss for a bank's failure to honor a valid stop payment order "may include damages for dishonor of subsequent items * * *." The statute does not provide for recouping attorney fees and costs. Meade did not allege that the Bank acted in bad faith or that he is entitled to punitive damages. Additionally, although

Meade argues that the Bank caused him to lose his bargaining power with the Lumber Company, Meade did not present any evidence that he incurred attorney fees or costs by engaging in litigation with the Lumber Company.

Absent statutory authority or an allegation of bad faith, attorney fees are improper in a compensatory damage award....Therefore, the trial court erred in permitting the jury to hear evidence regarding Meade's expenditures for his attorney fees and costs. Accordingly, we sustain the Bank's second assignment of error....

IV.

In its third assignment of error, the Bank contends that the trial court erred when it overruled the Bank's motion for a directed verdict. The Bank moved for a directed verdict both at the conclusion of Meade's case and at the close of evidence.

The Bank first asserts that the record does not contain sufficient evidence to show that Meade issued a stop payment order that provided it with a reasonable opportunity to act as required by [the UCC]. Meade presented evidence that he gave the Bank his stop payment order prior to 6:00 p.m. on Friday, and that the Bank paid the check the following day....We find that this constitutes sufficient evidence that Meade communicated the stop payment order to the Bank in time to allow the Bank a reasonable opportunity to act upon it.

The Bank also asserts that the record does not contain sufficient evidence that Meade incurred some loss resulting from its payment of the check. Pursuant to [UCC 4-403(c)] "[t]he burden of establishing the fact and amount of loss resulting from the payment of an item contrary to a stop payment order or order to close an account is on the customer." Establishing the fact and amount of loss, "the customer must show some loss other than the mere debiting of the customer's account." [Citation]

...Baker testified that he charged Meade between two hundred-eighty and three hundred dollars to properly laminate the runners and support the barn. Based upon these facts, we find that the record contains sufficient evidence that Meade sustained some loss beyond the mere debiting of his account as a result of the Bank paying his check. Accordingly, we overrule the Bank's third assignment of error.

V.

...In its final assignment of error, the Bank contends that the trial court erred in denying its motions for judgment notwithstanding the verdict and for a new trial....

[U]nlike our consideration of the Bank's motions for a directed verdict, in considering the Bank's motion for judgment notwithstanding the verdict, we also must consider whether the amount of the jury's award is supported by sufficient evidence. The Bank contends the jury's general verdict, awarding Meade \$3,800, is not supported by evidence in the record.

A bank customer seeking damages for the improper payment of a check over a valid stop payment order carries the burden of proving "the fact and amount of loss." [UCC 4-403(C).] To protect banks and prevent unjust enrichment to customers, the mere debiting of the customer's account does not constitute a loss. [Citation]

In this case, the Bank's payment of Meade's \$1,406.79 check to the Lumber Company discharged Meade's debt to the Lumber Company in the same amount. Therefore, the mere debiting of \$1,406.79 from Meade's account does not constitute a loss.

Meade presented evidence that he incurred \$300 in repair costs to make the barn satisfactory. Meade also notes that he never got the four by six-inch runners he wanted. However, Meade's carpenter, Baker, testified that since he properly laminated the two by six-inch runners, they are just as strong or stronger than the four by six-inch runners would have been.

Meade also presented evidence of his costs and fees. However, as we determined in our review of the Bank's second assignment of error, only the court may award costs and fees, and therefore this evidence was improperly admitted. Thus, the evidence cannot support the damage award. Meade did not present any other evidence of loss incurred by the Bank's payment of his check....Therefore, we find that the trial court erred in declining to enter a judgment notwithstanding the verdict on the issue of damages. Upon remand, the trial court should grant in part the Bank's motion for judgment notwithstanding the verdict as it relates to damages and consider the Bank's motion for a new trial only on the issue of damages[....] Accordingly, we sustain the Banks fourth and fifth assignments of error in part.

VI.

In conclusion, we find that the trial court did not err in denying the Bank's motions for summary judgment and for directed verdict. However, we find that the trial court erred in permitting Meade to testify as to his court costs, attorney fees and deposition costs. Additionally, we find that the trial court erred in totally denying the Bank's motion for judgment notwithstanding the verdict, as the amount of damages awarded by the jury is not supported by sufficient evidence in the record. Accordingly, we affirm the judgment of the trial court as to liability, but reverse the

judgment of the trial court as to the issue of damages, and remand this cause for further proceedings consistent with this opinion.

CASE QUESTIONS

1. What did the bank do wrong here?
2. Why did the court deny Meade damages for his attorneys' fees?
3. Why did the court conclude that the jury-awarded damages were not supported by evidence presented at trial? What damages did the evidence support?

Customer's Duty to Inspect Bank Statements

Union Planters Bank, Nat. Ass'n v. Rogers

912 So.2d 116 (Miss. 2005)

Waller, J.

This appeal involves an issue of first impression in Mississippi—the interpretation of [Mississippi's UCC 4-406], which imposes duties on banks and their customers insofar as forgeries are concerned.

Facts

Neal D. and Helen K. Rogers maintained four checking accounts with the Union Planters Bank in Greenville, Washington County, Mississippi....The Rogers were both in their eighties when the events which gave rise to this lawsuit took place.Neal Rogers died prior to the institution of this lawsuit. Helen Rogers died after Union Planters filed this appeal. We have substituted Helen's estate as appellee. After Neal became bedridden, Helen hired Jackie Reese to help her take care of Neal and to do chores and errands.

In September of 2000, Reese began writing checks on the Rogers' four accounts and forged Helen's name on the signature line. Some of the checks were made out to "cash," some to "Helen K. Rogers," and some to "Jackie Reese." The following chart summarizes the forgeries to each account:

Account Number	Beginning	Ending	Number of Checks	Amount of Checks
54282309	11/27/2000	6/18/2001	46	\$16,635.00
0039289441	9/27/2000	1/25/2001	10	\$2,701.00
6100110922	11/29/2000	8/13/2001	29	\$9,297.00
6404000343	11/20/2000	8/16/2001	83	\$29,765.00
Total			168	\$58,398.00

Neal died in late May of 2001. Shortly thereafter, the Rogers' son, Neal, Jr., began helping Helen with financial matters. Together they discovered that many bank statements were missing and that there was not as much money in the accounts as they had thought. In June of 2001, they contacted Union Planters and asked for copies of the missing bank statements. In September of 2001, Helen was advised by Union Planters to contact the police due to forgeries made on her accounts. More specific dates and facts leading up to the discovery of the forgeries are not found in the record.

Subsequently, criminal charges were brought against Reese. (The record does not reveal the disposition of the criminal proceedings against Reese.) In the meantime, Helen filed suit against Union Planters, alleging conversion (unlawful payment of forged checks) and negligence. After a trial, the jury awarded Helen \$29,595 in damages, and the circuit court entered judgment accordingly. From this judgment, Union Planters appeals.

Discussion

...II. Whether Rogers' Delay in Detecting the Forgeries Barred Suit against Union Planters.

The relationship between Rogers and Union Planters is governed by Article 4 of the Uniform Commercial Code. [UCC] 4-406(a) and (c) provide that a bank customer has a duty to discover and report "unauthorized signatures"; i.e., forgeries. [The section] reflects an underlying policy decision that furthers the UCC's "objective of promoting certainty and predictability in commercial transactions." The UCC facilitates financial transactions, benefiting both consumers and financial institutions, by allocating responsibility among the parties according to whomever is best able to prevent a loss. Because the customer is more familiar with his own

signature, and should know whether or not he authorized a particular withdrawal or check, he can prevent further unauthorized activity better than a financial institution which may process thousands of transactions in a single day....The customer's duty to exercise this care is triggered when the bank satisfies its burden to provide sufficient information to the customer. As a result, if the bank provides sufficient information, the customer bears the loss when he fails to detect and notify the bank about unauthorized transactions. [Citation]

A. Union Planters' Duty to Provide Information under 4-406(a).

The court admitted into evidence copies of all Union Planters statements sent to Rogers during the relevant time period. Enclosed with the bank statements were either the cancelled checks themselves or copies of the checks relating to the period of time of each statement. The evidence shows that all bank statements and cancelled checks were sent, via United States Mail, postage prepaid, to all customers at their "designated address" each month. Rogers introduced no evidence to the contrary. We therefore find that the bank fulfilled its duty of making the statements available to Rogers and that the remaining provisions of 4-406 are applicable to the case at bar....

In defense of her failure to inspect the bank statements, Rogers claims that she never received the bank statements and cancelled checks. Even if this allegation is true, since there was a series of forged checks, it is reasonable to assume that Reese intercepted the bank statements before Rogers could inspect them. However, Union Planters cannot be held liable for Reese's fraudulent concealment. It does not excuse Rogers from failing to fulfill her duties under 4-406(a) & (c) because the statute clearly states a bank discharges its duty in providing the necessary information to a customer when it "sends...to a customer a statement of account showing payment of items."...The word "receive" is absent. The customer's duty to inspect and report does not arise when the statement is received, as Rogers claims; the customer's duty to inspect and report arises when the bank sends the statement to the customer's address. A reasonable person who has not received a monthly statement from the bank would promptly ask the bank for a copy of the statement. Here, Rogers claims that she did not receive numerous statements. We find that she failed to act reasonably when she failed to take any action to replace the missing statements.

B. Rogers' Duty to Report the Forgeries under 4-406(d).

[Under UCC 4-406] a customer who has not promptly notified a bank of an irregularity may be precluded from bringing certain claims against the bank:

“(d) If the bank proves that the customer failed, with respect to an item, to comply with the duties imposed on the customer by subsection (c), the customer is precluded from asserting against the bank:

(1) The customer’s unauthorized signature...on the item,...

Also, when there is a series of forgeries, 406(d)(2) places additional duties on the customer, [who is precluded from asserting against the bank]:

(2) The customer’s unauthorized signature...by the same wrongdoer on any other item paid in good faith by the bank if the payment was made before the bank received notice from the customer of the unauthorized signature...and after the customer had been afforded a reasonable period of time, not exceeding thirty (30) days, in which to examine the item or statement of account and notify the bank.

Although there is no mention of a specific date, Rogers testified that she and her son began looking for the statements in late May or early June of 2001, after her husband had died....When they discovered that statements were missing, they notified Union Planters in June of 2001 to replace the statements. At this time, no mention of possible forgery was made, even though Neal, Jr., thought that “something was wrong.” In fact, Neal, Jr., had felt that something was wrong as far back as December of 2000, but failed to do anything. Neal, Jr., testified that neither he nor his mother knew that Reese had been forging checks until September of 2001. Actually, it was Union Planters that notified Rogers that there had been forgeries, as opposed to Rogers’ discovering the forgeries herself.

Rogers is therefore precluded from making claims against Union Planters because (1) under 4-406(a), Union Planters provided the statements to Rogers, and (2) under 4-406(d)(2), Rogers failed to notify Union Planters of the forgeries within 30 days of the date she should have reasonably discovered the forgeries....

Conclusion

The circuit court erred in denying Union Planters’ motion for JNOV because, under 4-406, Rogers is precluded from recovering amounts paid by Union Planters on any of the forged checks because she failed to timely detect and notify the bank of the unauthorized transactions and because she failed to show that Union Planters failed to use ordinary care in its processing of the forged checks. Therefore, we reverse the circuit court’s judgment and render judgment here that Rogers take nothing and that the complaint and this action are finally dismissed with prejudice. Reversed.

CASE QUESTIONS

1. If a bank pays out over a forged drawer's signature one time, and the customer (drawer) reports the forgery to the bank within thirty days, why does the bank take the loss?
2. Who forged the checks?
3. Why did Mrs. Rogers think she should not be liable for the forgeries?
4. In the end, who probably really suffered the loss here?

Customer's Duty to Inspect Bank Statements

Commerce Bank of Delaware v. Brown

2007 WL 1207171 (Del. Com. Pl. 2007)

I. Procedural Posture

Plaintiff, Commerce Bank/Delaware North America ("Commerce") initially filed a civil complaint against defendant Natasha J. Brown ("Brown") on October 28, 2005. Commerce seeks judgment in the amount of \$4,020.11 plus costs and interest and alleges that Brown maintained a checking account with Commerce and has been unjustly enriched by \$4,020.11....

The defendant, Brown...denied all allegations of the complaint. As an affirmative defense Brown claims the transaction for which plaintiff seeks to recover a money judgment were made by means of an ATM Machine using a debit card issued by the defendant. On January 16, 2005 Brown asserts that she became aware of the fraudulent transactions and timely informed the plaintiff of the facts on January 16, 2005. Brown asserts that she also requested Commerce in her answer to investigate the matter and to close her account. Based upon these facts, Brown asserts a maximum liability on her own part from \$50.00 to \$500.00 in accordance with the Electronic Fund Transfer Act ("EFTA") 15 U.S.C. § 1693(g) and regulation (e), 12 CFR 205.6. [Commerce Bank withdrew its complaint at trial, leaving only the defendant's counter-claim in issue.]

Defendant Brown asserts [that] defendant failed to investigate and violated EFTA and is therefore liable to the plaintiff for money damages citing [EFTA].

II. The Facts

Brown was the only witness called at trial. Brown is twenty-seven years old and has been employed by Wilmington Trust as an Administrative Assistant for the past three years. Brown previously opened a checking account with Commerce and was issued a debit/ATM card by Commerce which was in her possession in December 2004. Brown, on or about January 14, 2005 went to Commerce to charge a \$5.00 debit to the card at her lunch-break was informed that there was a deficiency balance in the checking account. Brown went to the Talleyville branch of Commerce Bank and spoke with “Carla” who agreed to investigate these unauthorized charges, as well as honor her request to close the account. Defendant’s Exhibit No.: 1 is a Commerce Bank electronic filing and/or e-mail which details a visit by defendant on January 16, 2005 to report her card loss. The “Description of Claim” indicates as follows:

Customer came into speak with a CSR “Carla Bernard” on January 16, 2005 to report her card loss. At this time her account was only showing a negative \$50.00 balance. She told Ms. Bernard that this was not her transaction and to please close this account. Ms. Bernard said that she would do this and that there would be an investigation on the unauthorized transactions. It was at this time also that she had Ms. Bernard change her address. In the meantime, several transactions posted to the account causing a balance of negative \$3,948.11 and this amount has since been charged off on 1/27/05. Natasha Brown never received any notification of this until she received a letter from one of our collection agencies. She is now here to get this resolved.

On the back of defendant’s Exhibit No.: 1 were 26 separate unauthorized transactions at different mercantile establishments detailing debits with the pin number used on Brown’s debit card charged to Commerce Bank. The first charge was \$501.75 on January 13, 2005....Brown asserts at trial that she therefore timely gave notice to Commerce to investigate and requested Commerce to close the debit checking account on January 16, 2005.

At trial Brown also testified she “never heard” from Commerce again until she received a letter in December 2005 citing a \$4,000.00 deficiency balance....

On cross-examination Brown testified she received a PIN number from Commerce and “gave the PIN number to no other person.” In December 2004 she resided with Charles Williams, who is now her husband. Brown testified on cross-examination that she was the only person authorized as a PIN user and no one else knew of the card, ‘used the card,’ or was provided orally or in writing of the PIN number. Brown spoke with Carla Bernard at the Commerce Bank at the Talleyville branch. Although

Brown did not initially fill out a formal report, she did visit Commerce on January 16, 2005 the Talleyville branch and changed her address with Carla. Brown does not recall the last time she ever received a statement from Commerce Bank on her checking account. Brown made no further purchases with the account and she was unaware of all the “incidents of unauthorized debit charges on her checking account” until she was actually sued by Commerce Bank in the Court of Common Pleas.

III. The Law

15 U.S.C. § 1693(g). Consumer Liability:

(a) Unauthorized electronic fund transfers; limit. A consumer shall be liable for any unauthorized electronic fund transfer....In no event, however, shall a consumer’s liability for an unauthorized transfer exceed the lesser of—

(1) \$ 50; or

(2) the amount of money or value of property or services obtained in such unauthorized electronic fund transfer prior to the time the financial institution is notified of, or otherwise becomes aware of, circumstances which lead to the reasonable belief that an unauthorized electronic fund transfer involving the consumer’s account has been or may be affected. Notice under this paragraph is sufficient when such steps have been taken as may be reasonably required in the ordinary course of business to provide the financial institution with the pertinent information, whether or not any particular officer, employee, or agent of the financial institution does in fact receive such information.

15 U.S.C. § 1693(m) Civil Liability:

(a) [A]ction for damages; amount of award....[A]ny person who fails to comply with any provision of this title with respect to any consumer, except for an error resolved in accordance with section 908, is liable to such consumer in an amount equal to the sum of—

(1) any actual damage sustained by such consumer as a result of such failure;

(2) in the case of an individual action, an amount not less than \$ 100 nor greater than \$ 1,000; or...

(3) in the case of any successful action to enforce the foregoing liability, the costs of the action, together with a reasonable attorney's fee as determined by the court.

12 C.F.R. § 205.6 Liability of consumer for unauthorized transfers.

(b) Limitations on amount of liability. A consumer's liability for an unauthorized electronic fund transfer or a series of related unauthorized transfers shall be determined as follows:

(1) Timely notice given. If the consumer notifies the financial institution within two business days after learning of the loss or theft of the access device, the consumer's liability shall not exceed the lesser of \$ 50 or the amount of unauthorized transfers that occur before notice to the financial institution.

(2) Timely notice not given. If the consumer fails to notify the financial institution within two business days after learning of the loss or theft of the access device, the consumer's liability shall not exceed the lesser of \$ 500 or the sum of:

(i) \$ 50 or the amount of unauthorized transfers that occur within the two business days, whichever is less; and

(ii) The amount of unauthorized transfers that occur after the close of two business days and before notice to the institution, provided the institution establishes that these transfers would not have occurred had the consumer notified the institution within that two-day period.

IV. Opinion and Order

The Court finds based upon the testimony presented herein that defendant in her counter-claim has proven by a preponderance of evidence damages in the amount of \$1,000.00 plus an award of attorney's fees. Clearly, Commerce failed to investigate the unauthorized charges pursuant to 15 U.S.C. § 1693(h). Nor did Commerce close the account as detailed in Defendant's Exhibit No. 1. Instead, Commerce sued Brown and then withdrew its claim at trial. The Court finds \$50.00 is the appropriate liability for Brown for the monies charged on her account as set forth within the above statute because she timely notified, in person, Commerce on January 16, 2005. Brown also requested Commerce to close her checking account. Based upon the trial record, defendant has proven by a preponderance of the evidence damages of \$1,000.00 as set forth in the above statute, 15 U.S.C. § 1693(m).

CASE QUESTIONS

1. Why—apparently—did the bank withdraw its complaint against Brown at the time of trial?
2. Why does the court mention Ms. Brown's occupation, and that she was at the time of the incident living with the man who was—at the time of trial—her husband?
3. What is the difference between the United States Code (USC) and the *Code of Federal Regulations* (CFR), both of which are cited by the court?
4. What did the bank do wrong here?
5. What damages did Ms. Brown suffer for which she was awarded \$1,000? What else did she get by way of an award that is probably more important?

26.5 Summary and Exercises

Summary

Traditionally when a customer wrote a check (on the payor bank) and the payee deposited it into his account (at the depository bank), the check was physically routed by means of ground and air transportation to the various intermediary banks until it was physically presented to the payor bank for final settlement. The federal Check 21 Act (2004) promotes changes in this process by allowing banks to process electronic images of customers' checks instead of the actual paper instrument: the data on the check is truncated (stripped) from the instrument and the data are transmitted. The original check can be digitally recreated by the making of a "substitute check." Merchants—indeed, anyone with a check scanner and a computer—can also process electronic data from checks to debit the writer's account and credit the merchant's instantly.

In addition to Check 21 Act, the Electronic Fund Transfer Act of 1978 also facilitates electronic banking. It primarily addresses the uses of credit and debit cards. Under this law, the electronic terminal must provide a receipt of transfer. The financial institution must follow certain procedures on being notified of errors, the customer's liability is limited to \$50 if a card or code number is wrongfully used and the institution has been notified, and an employer or government agency can compel acceptance of salary or government benefits by EFT.

Article 4 of the UCC—state law, of course—governs a bank's relationship with its customers. It permits a bank to pay an overdraft, to pay an altered check (charging the customer's account for the original tenor of the check), to refuse to pay a six-month-old check, to pay or collect an item of a deceased person (if it has no notice of death) and obligates it to honor stop payment orders. A bank is liable to the customer for damages if it wrongfully dishonors an item. The customer also has duties; primarily, the customer must inspect each statement of account and notify the bank promptly if the checks have been altered or signatures forged. The federal Expedited Funds Availability Act requires that, within some limits, banks make customers' funds available quickly.

Wholesale funds transactions, involving tens of millions of dollars, were originally made by telegraph ("wire transfers"). The modern law governing such transactions is, in the United States, UCC Article 4A.

A letter of credit is a statement by a bank or other financial institution that it will pay a specified sum of money to specified persons when certain conditions are met. Its purpose is to facilitate nonlocal sales transactions by ensuring that the buyer will not get access to the goods until the seller has proper access to the buyer's money. In the US letters of credit are governed by UCC Article 5, and in international transactions they may be covered by a different internationally recognized law.

EXERCISES

1. On March 20, Al gave Betty a check for \$1,000. On March 25, Al gave Carl a check for \$1,000, which Carl immediately had certified. On October 24, when Al had \$1,100 in his account, Betty presented her check for payment and the bank paid her \$1,000. On October 25, Carl presented his check for payment and the bank refused to pay because of insufficient funds. Were the bank's actions proper?
2. Winifred had a balance of \$100 in her checking account at First Bank. She wrote a check payable to her landlord in the amount of \$400. First Bank cashed the check and then attempted to charge her account. May it? Why?
3. Assume in Exercise 2 that Winifred had deposited \$4,000 in her account a month before writing the check to her landlord. Her landlord altered the check by changing the amount from \$400 to \$4,000 and then cashed the check at First Bank. May the bank charge Winifred's account for the check? Why?
4. Assume in Exercise 2 that Winifred had deposited \$5,000 in her account a month before writing the check but the bank misdirected her deposit, with the result that her account showed a balance of \$100. Believing the landlord's check to be an overdraft, the bank refused to pay it. Was the refusal justified? Why?
5. Assume in Exercise 2 that, after sending the check to the landlord, Winifred decided to stop payment because she wanted to use the \$300 in her account as a down payment on a stereo. She called First Bank and ordered the bank to stop payment. Four days later the bank mistakenly paid the check. Is the bank liable to Winifred? Why?
6. Assume in Exercise 5 that the landlord negotiated the check to a holder in due course, who presented the check to the bank for payment. Is the bank required to pay the holder in due course after the stop payment order? Why?
7. On Wednesday, August 4, Able wrote a \$1,000 check on his account at First Bank. On Saturday, August 7, the check was cashed, but the Saturday activity was not recorded by the bank until Monday, August 9. On that day at 8:00 a.m., Able called in a stop payment order on the check and he was told the check had not cleared; at 9:00 he went to the bank and obtained a printed notice confirming the stop payment, but shortly thereafter the Saturday activity was recorded—Able's account had been debited. He wants the \$1,000 recredited. Was the stop payment order effective? Explain.
8. Alice wrote a check to Carl's Contracting for \$190 on April 23, 2011. Alice was not satisfied with Carl's work. She called, leaving a message for him to return the call to discuss the matter with her. He did not do so, but

when she reconciled her checks upon receipt of her bank statement, she noticed the check to Carl did not appear on the April statement. Several months went by. She figured Carl just tore the check up instead of bothering to resolve any dispute with her. The check was presented to Alice's bank for payment on March 20, 2012, and Alice's bank paid it. May she recover from the bank?

9. Fitting wrote a check in the amount of \$800. Afterwards, she had second thoughts about the check and contacted the bank about stopping payment. A bank employee told her a stop payment order could not be submitted until the bank opened the next day. She discussed with the employee what would happen if she withdrew enough money from her account that when the \$800 check was presented, there would be insufficient funds to cover it. The employee told her that in such a case the bank would not pay the check. Fitting did withdraw enough money to make the \$800 an overdraft, but the bank paid it anyway, and then sued her for the amount of the overdraft. Who wins and why? *Continental Bank v. Fitting*, 559 P.2d 218 (1977).
10. Plaintiff's executive secretary forged plaintiff's name on number checks by signing his name and by using a rubber facsimile stamp of his signature: of fourteen checks that were drawn on her employer's account, thirteen were deposited in her son's account at the defendant bank, and one was deposited elsewhere. Evidence at trial was presented that the bank's system of comparing its customer's signature to the signature on checks was the same as other banks in the area. Plaintiff sued the bank to refund the amount of the checks paid out over a forged drawer's signature. Who wins and why? *Read v. South Carolina National Bank*, 335 S.E.2d 359 (S.C., 1965).
11. On Tuesday morning, Reggie discovered his credit card was not in his wallet. He realized he had not used it since the previous Thursday when he'd bought groceries. He checked his online credit card account register and saw that some \$1,700 had been charged around the county on his card. He immediately notified his credit union of the lost card and unauthorized charges. For how much is Reggie liable?

SELF-TEST QUESTIONS

1. Article 4 of the UCC permits a bank to pay
 - a. an overdraft
 - b. an altered check
 - c. an item of a deceased person if it has no notice of death
 - d. all of the above

2. The type of banks covered by Article 4 include
 - a. depository banks
 - b. payor banks
 - c. both of the above
 - d. none of the above

3. A bank may
 - a. refuse to pay a check drawn more than six months before being presented
 - b. refuse to pay a check drawn more than sixty days before being presented
 - c. not refuse to pay a check drawn more than six months before being presented
 - d. do none of the above

4. Forms of electronic fund transfer include
 - a. automated teller machines
 - b. point of sale terminals
 - c. preauthorized payment plans
 - d. all of the above

SELF-TEST ANSWERS

1. d
2. c
3. a
4. d

Chapter 27

Consumer Credit Transactions

LEARNING OBJECTIVES

After reading this chapter, you should understand the following:

1. How consumers enter into credit transactions and what protections they are afforded when they do
2. What rights consumers have after they have entered into a consumer transaction
3. What debt collection practices third-party collectors may pursue

This chapter and the three that follow are devoted to debtor-creditor relations. In this chapter, we focus on the consumer credit transaction. [Chapter 28 "Secured Transactions and Suretyship"](#) and [Chapter 29 "Mortgages and Nonconsensual Liens"](#) explore different types of security that a creditor might require. [Chapter 30 "Bankruptcy"](#) examines debtors' and creditors' rights under bankruptcy law.

The amount of consumer debt, or **household debt**¹, owed by Americans to mortgage lenders, stores, automobile dealers, and other merchants who sell on credit is difficult to ascertain. One reads that the average household *credit card* debt (not including mortgages, auto loans, and student loans) in 2009 was almost \$16,000. Ben Woolsey and Matt Schulz, *Credit Card Statistics, Industry Statistics, Debt Statistics*, August 24, 2010, <http://www.creditcards.com/credit-card-news/credit-card-industry-facts-personal-debt-statistics-1276.php>. This is "calculated by dividing the total revolving debt in the U.S. (\$852.6 billion as of March 2010 data, as listed in the Federal Reserve's May 2010 report on consumer credit) by the estimated number of households carrying credit card debt (54 million)." Or maybe it was \$10,000. Deborah Fowles, "Your Monthly Credit Card Minimum Payments May Double," About.com Financial Planning, <http://financialplan.about.com/od/creditcarddebt/a/CCMinimums.htm>. Or maybe it was \$7,300. Index Credit Cards, *Credit Card Debt*, February 9, 2010, <http://www.indexcreditcards.com/creditcarddebt>. But probably focusing on the *average* household debt is not very helpful: 55 percent of households have no credit card debt at all, and the *median* debt is \$1,900. Liz Pulliam Weston, "The Big Lie about Credit Card Debt," *MSN Money*, July 30, 2007.

1. Debt owed by consumers.

In 2007, the total household debt owed by Americans was \$13.3 trillion, according to the Federal Reserve Board. That is really an incomprehensible number: suffice it to say, then, that the availability of credit is an important factor in the US economy, and not surprisingly, a number of statutes have been enacted over the years to protect consumers both before and after signing credit agreements.

The statutes tend to fall within three broad categories. First, several statutes are especially important when a consumer enters into a credit transaction. These include laws that regulate credit costs, the credit application, and the applicant's right to check a credit record. Second, after a consumer has contracted for credit, certain statutes give a consumer the right to cancel the contract and correct billing mistakes. Third, if the consumer fails to pay a debt, the creditor has several traditional debt collection remedies that today are tightly regulated by the government.

27.1 Entering into a Credit Transaction

LEARNING OBJECTIVES

1. Understand what statutes regulate the cost of credit, and the exceptions.
2. Know how the cost of credit is expressed in the Truth in Lending Act.
3. Recognize that there are laws prohibiting discrimination in credit granting.
4. Understand how consumers' credit records are maintained and may be corrected.

The Cost of Credit

Lenders, whether banks or retailers, are not free to charge whatever they wish for credit. **Usury**² laws establish a maximum rate of lawful interest. The penalties for violating usury laws vary from state to state. The heaviest penalties are loss of both principal and interest, or loss of a multiple of the interest the creditor charged. The courts often interpret these laws stringently, so that even if the impetus for a usurious loan comes from the borrower, the contract can be avoided, as demonstrated in *Matter of Dane's Estate* ([Section 27.3 "Cases"](#)).

Some states have eliminated interest rate limits altogether. In other states, usury law is riddled with exceptions, and indeed, in many cases, the exceptions have pretty much eaten up the general rule. Here are some common exceptions:

- Business loans. In many states, businesses may be charged any interest rate, although some states limit this exception to incorporated businesses.
- Mortgage loans. Mortgage loans are often subject to special usury laws. The allowable interest rates vary, depending on whether a first mortgage or a subordinate mortgage is given, or whether the loan is insured or provided by a federal agency, among other variables.
- Second mortgages and home equity loans by licensed consumer loan companies.
- Credit card and other retail installment debt. The interest rate for these is governed by the law of the state where the credit card company does business. (That's why the giant Citibank, otherwise headquartered in New York City, runs its credit card division out of South Dakota, which has no usury laws for credit cards.)

2. Charging interest in excess of the legal limit.

- Consumer leasing.
- “Small loans” such as payday loans and pawnshop loans.
- Lease-purchases on personal property. This is the lease-to-own concept.
- Certain financing of mobile homes that have become real property or where financing is insured by the federal government.
- Loans a person takes from her tax-qualified retirement plan.
- Certain loans from stockbrokers and dealers.
- Interest and penalties on delinquent property taxes.
- Deferred payment of purchase price (layaway loans).
- Statutory interest on judgments.

And there are others. Moreover, certain charges are not considered interest, such as fees to record documents in a public office and charges for services such as title examinations, deed preparation, credit reports, appraisals, and loan processing. But a creditor may not use these devices to cloak what is in fact a usurious bargain; it is not the form but the substance of the agreement that controls.

As suggested, part of the difficulty here is that governments at all levels have for a generation attempted to promote consumption to promote production; production is required to maintain politically acceptable levels of employment. If consumers can get what they want on credit, consumerism increases. Also, certainly, tight limits on interest rates cause creditors to deny credit to the less creditworthy, which may not be helpful to the lower classes. That’s the rationale for the usury exceptions related to pawnshop and payday loans.

Disclosure of Credit Costs

Setting limits on what credit costs—as usury laws do—is one thing. Disclosing the cost of credit is another.

The Truth in Lending Act

Until 1969, lenders were generally free to disclose the cost of money loaned or credit extended in any way they saw fit—and they did. Financing and credit terms varied widely, and it was difficult and sometimes impossible to understand what the true cost was of a particular loan, much less to comparison shop. After years of failure, consumer interests finally persuaded Congress to pass a national law requiring disclosure of credit costs in 1968. Officially called the Consumer Credit Protection Act, Title I of the law is more popularly known as the **Truth in Lending Act**³ (TILA). The act only applies to *consumer* credit transactions, and it only protects natural-person debtors—it does not protect business organization debtors.

3. A federal act ensuring that every individual who has need for consumer credit is given full disclosure of the terms and cost of the credit.

The act provides what its name implies: lenders must inform borrowers about significant terms of the credit transaction. The TILA does not establish maximum interest rates; these continue to be governed by state law. The two key terms that must be disclosed are the finance charge and the annual percentage rate. To see why, consider two simple loans of \$1,000, each carrying interest of 10 percent, one payable at the end of twelve months and the other in twelve equal installments. Although the actual charge in each is the same—\$100—the interest rate is not. Why? Because with the first loan you will have the use of the full \$1,000 for the entire year; with the second, for much less than the year because you must begin repaying part of the principal within a month. In fact, with the second loan you will have use of only about half the money for the entire year, and so the actual rate of interest is closer to 15 percent. Things become more complex when interest is compounded and stated as a monthly figure, when different rates apply to various portions of the loan, and when processing charges and other fees are stated separately. The act regulates open-end credit (revolving credit, like charge cards) and closed-end credit (like a car loan—extending for a specific period), and—as amended later—it regulates consumer leases and credit card transactions, too.

Prepayment: If you pay off early, you
 may will not have to pay a penalty.
 may will not be entitled to a refund of part of the finance charge.

See your contract documents for any additional information about nonpayment, default, any required repayment in full before the scheduled date, and prepayment refunds and penalties.

I have received a copy of this statement.
 Signature Alice Green Date 6-1-11
e means an estimate

By requiring that the finance charge and the annual percentage rate be disclosed on a uniform basis, the TILA makes understanding and comparison of loans much easier. The **finance charge**⁴ is the total of all money paid for credit; it includes the interest paid over the life of the loan and all processing charges. The annual percentage rate is the true rate of interest for money or credit actually available to the borrower. The annual percentage rate must be calculated using the total finance charge (including all extra fees). See [Figure 27.1 "Credit Disclosure Form"](#) for an example of a disclosure form used by creditors.

Consumer Leasing Act of 1988

The Consumer Leasing Act (CLA) amends the TILA to provide similar full disclosure for consumers who lease automobiles or other goods from firms whose business it is to lease such goods, if the goods are valued at \$25,000 or less and the lease is for four months or more. All material terms of the lease must be disclosed in writing.

Fair Credit and Charge Card Disclosure

In 1989, the Fair Credit and Charge Card Disclosure Act went into effect. This amends the TILA by requiring credit card issuers to disclose in a uniform manner the annual percentage rate, annual fees, grace period, and other information on credit card applications.

Credit Card Accountability, Responsibility, and Disclosure Act of 2009

The 1989 act did make it possible for consumers to know the costs associated with credit card use, but the card companies' behavior over 20 years convinced Congress that more regulation was required. In 2009, Congress passed and President Obama signed the Credit Card Accountability, Responsibility, and Disclosure Act of 2009 (the Credit Card Act). It is a further amendment of the TILA. Some of the salient parts of the act are as follows:

- Restricts all interest rate increases during the first year, with some exceptions. The purpose is to abolish "teaser" rates.
- Increases notice for rate increase on future purchases to 45 days.
- Preserves the ability to pay off on the old terms, with some exceptions.
- Limits fees and penalty interest and requires statements to clearly state the required due date and late payment penalty.
- Requires fair application of payments. Amounts in excess of the minimum payment must be applied to the highest interest rate (with some exceptions).
- Provides sensible due dates and time to pay.

4. The total cost of credit a customer must pay on a consumer loan, including interest.

- Protects young consumers. Before issuing a card to a person under the age of twenty-one, the card issuer must obtain an application that contains either the signature of a cosigner over the age of twenty-one or information indicating an independent means of repaying any credit extended.
- Restricts card issuers from providing tangible gifts to students on college campuses in exchange for filling out a credit card application.
- Requires colleges to publicly disclose any marketing contracts made with a card issuer.
- Requires enhanced disclosures.
- Requires issuers to disclose the period of time and the total interest it will take to pay off the card balance if only minimum monthly payments are made.
- Establishes gift card protections. Consumers Union, “Upcoming Credit Card Protections,” <http://www.creditcardreform.org/pdf/dodd-summary-509.pdf>.

The Federal Reserve Board is to issue implementing rules.

Creditors who violate the TILA are subject to both criminal and civil sanctions. Of these, the most important are the civil remedies open to consumers. If a creditor fails to disclose the required information, a customer may sue to recover twice the finance charge, plus court costs and reasonable attorneys’ fees, with some limitations. As to the Credit Card Act of 2009, the issuing companies were not happy with the reforms. Before the law went into effect, the companies—as one commentator put it—unleashed a “frenzy of retaliation,” Liz Pulliam Weston, “Credit Card Lenders Go on a Rampage,” *MSN Money*, November 25, 2009. by repricing customer accounts, changing fixed rates to variable rates, lowering credit limits, and increasing fees.

State Credit Disclosure Laws

The federal TILA is not the only statute dealing with credit disclosures. A uniform state act, the Uniform Consumer Credit Code, as amended in 1974, is now on the books in twelve US jurisdictions, States adopting the Uniform Consumer Credit Code are the following: Colorado, Idaho, Indiana, Iowa, Kansas, Maine, Oklahoma, South Carolina, Utah, Wisconsin, Wyoming, and Guam. Cornell University Law School, “Uniform Laws.” <http://www.law.cornell.edu/uniform/vol7.html#concc>. though its effect on the development of modern consumer credit law has been significant beyond the number of states adopting it. It is designed to protect consumers who buy goods and services on credit by simplifying, clarifying, and updating legislation governing consumer credit and usury.

Getting Credit

Disclosure of credit costs is a good thing. After discovering how much credit will cost, a person might decide to go for it: get a loan or a credit card. The potential creditor, of course, should want to know if the applicant is a good risk; that requires a credit check. And somebody who knows another person's creditworthiness has what is usually considered confidential information, the possession of which is subject to abuse, and thus regulation.

Equal Credit Opportunity Act

Through the 1960s, banks and other lending and credit-granting institutions regularly discriminated against women. Banks told single women to find a cosigner for loans. Divorced women discovered that they could not open store charge accounts because they lacked a prior credit history, even though they had contributed to the family income on which previous accounts had been based. Married couples found that the wife's earnings were not counted when they sought credit; indeed, families planning to buy homes were occasionally even told that the bank would grant a mortgage if the wife would submit to a hysterectomy! In all these cases, the premise of the refusal to treat women equally was the unstated—and usually false—belief that women would quit work to have children or simply to stay home.

By the 1970s, as women became a major factor in the labor force, Congress reacted to the manifest unfairness of the discrimination by enacting (as part of the Consumer Credit Protection Act) the Equal Credit Opportunity Act (ECOA) of 1974. The act prohibits any creditor from discriminating “against any applicant on the basis of sex or marital status with respect to any aspect of a credit transaction.” In 1976, Congress broadened the law to bar discrimination (1) on the basis of race, color, religion, national origin, and age; (2) because all or a part of an applicant's income is from a public assistance program; or (3) because an applicant has exercised his or her rights under the Consumer Credit Protection Act.

Under the ECOA, a creditor may not ask a credit applicant to state sex, race, national origin, or religion. And unless the applicant is seeking a joint loan or account or lives in a community-property state, the creditor may not ask for a statement of marital status or, if you have voluntarily disclosed that you are married, for information about your spouse, nor may one spouse be required to cosign if the other is deemed independently creditworthy. All questions concerning plans for children are improper. In assessing the creditworthiness of an applicant, the creditor must consider all sources of income, including regularly received alimony and child support payments. And if credit is refused, the creditor must, on

demand, tell you the specific reasons for rejection. See *Rosa v. Park West Bank & Trust Co.* in [Section 27.3 "Cases"](#) for a case involving the ECOA.

The Home Mortgage Disclosure Act, 1975, and the Community Reinvestment Act (CRA), 1977, get at another type of discrimination: redlining. This is the practice by a financial institution of refusing to grant home loans or home-improvement loans to people living in low-income neighborhoods. The act requires that financial institutions within its purview report annually by transmitting information from their Loan Application Registers to a federal agency. From these reports it is possible to determine what is happening to home prices in a particular area, whether investment in one neighborhood lags compared with that in others, if the racial or economic composition of borrowers changed over time, whether minorities or women had trouble accessing mortgage credit, in what kinds of neighborhoods subprime loans are concentrated, and what types of borrowers are most likely to receive subprime loans, among others. “Armed with hard facts, users of all types can better execute their work: Advocates can launch consumer education campaigns in neighborhoods being targeted by subprime lenders, planners can better tailor housing policy to market conditions, affordable housing developers can identify gentrifying neighborhoods, and activists can confront banks with poor lending records in low income communities.” Kathryn L.S. Pettit and Audrey E. Droesch, “A Guide to Home Mortgage Disclosure Act Data,” The Urban Institute, December 2008, http://www.urban.org/uploadedpdf/1001247_hdma.pdf. Under the CRA, federal regulatory agencies examine banking institutions for CRA compliance and take this information into consideration when approving applications for new bank branches or for mergers or acquisitions.

Fair Credit Reporting Act of 1970: Checking the Applicant’s Credit Record

It is in the interests of all consumers that people who would be bad credit risks not get credit: if they do and they default (fail to pay their debts), the rest of us end up paying for their improvidence. Because credit is such a big business, a number of support industries have grown up around it. One of the most important is the credit-reporting industry, which addresses this issue of checking creditworthiness. Certain companies—**credit bureau**⁵s—collect information about borrowers, holders of credit cards, store accounts, and installment purchasers. For a fee, this information—currently held on tens of millions of Americans—is sold to companies anxious to know whether applicants are creditworthy. If the information is inaccurate, it can lead to rejection of a credit application that should be approved, and it can wind up in other files where it can live to do more damage. In 1970, Congress enacted, as part of the Consumer Credit Protection Act, the Fair Credit Reporting Act (FCRA) to give consumers access to their credit files in order to correct errors.

5. A private firm that maintains consumer credit data files and provides credit information to authorized users for a fee.

Under this statute, an applicant denied credit has the right to be told the name and address of the credit bureau (called “consumer reporting agency” in the act) that prepared the report on which the denial was based. (The law covers reports used to screen insurance and job applicants as well as to determine creditworthiness.) The agency must list the nature and substance of the information (except medical information) and its sources (unless they contributed to an investigative-type report). A credit report lists such information as name, address, employer, salary history, loans outstanding, and the like. An investigative-type report is one that results from personal interviews and may contain nonfinancial information, like drinking and other personal habits, character, or participation in dangerous sports. Since the investigators rely on talks with neighbors and coworkers, their reports are usually subjective and can often be misleading and inaccurate.

The agency must furnish the consumer the information free if requested within thirty days of rejection and must also specify the name and address of anyone who has received the report within the preceding six months (two years if furnished for employment purposes).

If the information turns out to be inaccurate, the agency must correct its records; if investigative material cannot be verified, it must be removed from the file. Those to whom it was distributed must be notified of the changes. When the agency and the consumer disagree about the validity of the information, the consumer’s version must be placed in the file and included in future distributions of the report. After seven years, any adverse information must be removed (ten years in the case of bankruptcy). A person is entitled to one free copy of his or her credit report from each of the three main national credit bureaus every twelve months. If a reporting agency fails to correct inaccurate information in a reasonable time, it is liable to the consumer for \$1,000 plus attorneys’ fees.

Under the FCRA, any person who obtains information from a credit agency under false pretenses is subject to criminal and civil penalties. The act is enforced by the Federal Trade Commission. See *Rodgers v. McCullough* in [Section 27.3 "Cases"](#) for a case involving use of information from a credit report.

KEY TAKEAWAY

Credit is an important part of the US economy, and there are various laws regulating its availability and disclosure. Usury laws prohibit charging excessive interest rates, though the laws are riddled with exceptions. The disclosure of credit costs is regulated by the Truth in Lending Act of 1969, the Consumer Leasing Act of 1988, the Fair Credit and Charge Card Disclosure Act of 1989, and the Credit Card Accountability, Responsibility, and Disclosure Act of 2009 (these latter three are amendments to the TILA). Some states have adopted the Uniform Consumer Credit Code as well. Two major laws prohibit invidious discrimination in the granting of credit: the Equal Credit Opportunity Act of 1974 and the Home Mortgage Disclosure Act of 1975 (addressing the problem of redlining). The Fair Credit Reporting Act of 1970 governs the collection and use of consumer credit information held by credit bureaus.

EXERCISES

1. The penalty for usury varies from state to state. What are the two typical penalties?
2. What has the TILA done to the use of *interest* as a term to describe how much credit costs, and why?
3. What is redlining?
4. What does the Fair Credit Reporting Act do, in general?

27.2 Consumer Protection Laws and Debt Collection Practices

LEARNING OBJECTIVES

1. Understand that consumers have the right to cancel some purchases made on credit.
2. Know how billing mistakes may be corrected.
3. Recognize that professional debt collectors are governed by some laws restricting certain practices.

Cancellation Rights

Ordinarily, a contract is binding when signed. But consumer protection laws sometimes provide an escape valve. For example, a Federal Trade Commission (FTC) regulation gives consumers three days to cancel contracts made with door-to-door salespersons. Under this cooling-off provision, the cancellation is effective if made by midnight of the third business day after the date of the purchase agreement. The salesperson must notify consumers of this right and supply them with two copies of a cancellation form, and the sales agreement must contain a statement explaining the right. The purchaser cancels by returning one copy of the cancellation form to the seller, who is obligated either to pick up the goods or to pay shipping costs. The three-day cancellation privilege applies only to sales of twenty-five dollars or more made either in the home or away from the seller's place of business; it does not apply to sales made by mail or telephone, to emergency repairs and certain other home repairs, or to real estate, insurance, or securities sales.

The Truth in Lending Act (TILA) protects consumers in a similar way. For certain big-ticket purchases (such as installations made in the course of major home improvements), sellers sometimes require a mortgage (which is subordinate to any preexisting mortgages) on the home. The law gives such customers three days to rescind the contract. Many states have laws similar to the FTC's three-day cooling-off period, and these may apply to transactions not covered by the federal rule (e.g., to purchases of less than twenty-five dollars and even to certain contracts made at the seller's place of business).

Correcting Billing Mistakes

Billing Mistakes

In 1975, Congress enacted the **Fair Credit Billing Act**⁶ as an amendment to the Consumer Credit Protection Act. It was intended to put to an end the phenomenon, by then a standard part of any comedian's repertoire, of the many ways a computer could insist that you pay a bill, despite errors and despite letters you might have written to complain. The act, which applies only to open-end credit and not to installment sales, sets out a procedure that creditors and customers must follow to rectify claimed errors. The customer has sixty days to notify the creditor of the nature of the error and the amount. Errors can include charges not incurred or those billed with the wrong description, charges for goods never delivered, accounting or arithmetic errors, failure to credit payments or returns, and even charges for which you simply request additional information, including proof of sale. During the time the creditor is replying, you need not pay the questioned item or any finance charge on the disputed amount.

The creditor has thirty days to respond and ninety days to correct your account or explain why your belief that an error has been committed is incorrect. If you do turn out to be wrong, the creditor is entitled to all back finance charges and to prompt payment of the disputed amount. If you persist in disagreeing and notify the creditor within ten days, it is obligated to tell all credit bureaus to whom it sends notices of delinquency that the bill continues to be disputed and to tell you to whom such reports have been sent; when the dispute has been settled, the creditor must notify the credit bureaus of this fact. Failure of the creditor to follow the rules, an explanation of which must be provided to each customer every six months and when a dispute arises, bars it from collecting the first fifty dollars in dispute, plus finance charges, even if the creditor turns out to be correct.

Disputes about the Quality of Goods or Services Purchased

While disputes over the quality of goods are not "billing errors," the act does apply to unsatisfactory goods or services purchased by credit card (except for store credit cards); the customer may assert against the credit card company any claims or defenses he or she may have against the seller. This means that under certain circumstances, the customer may withhold payments without incurring additional finance charges. However, this right is subject to three limitations: (1) the value of the goods or services charged must be in excess of fifty dollars, (2) the goods or services must have been purchased either in the home state or within one hundred miles of the customer's current mailing address, and (3) the consumer must make a good-faith effort to resolve the dispute before refusing to pay. If the consumer does refuse to pay, the credit card company would acquiesce: it would credit her account for the disputed amount, pass the loss down to the merchant's bank, and that bank

6. A federal law (1975) to protect consumers from unfair billing practices and to provide a mechanism for addressing billing errors in open-end credit accounts, such as credit card or charge card accounts.

would debit the merchant's account. The merchant would then have to deal with the consumer directly.

Debt Collection Practices

Banks, financial institutions, and retailers have different incentives for extending credit—for some, a loan is simply a means of making money, and for others, it is an inducement to buyers. But in either case, credit is a risk because the consumer may default; the creditor needs a means of collecting when the customer fails to pay. Open-end credit is usually given without collateral. The creditor can, of course, sue, but if the consumer has no assets, collection can be troublesome. Historically, three different means of recovering the debt have evolved: garnishment, wage assignment, and confession of judgment.

Garnishment

Garnishment⁷ is a legal process by which a creditor obtains a court order directing the debtor's employer (or any party who owes money to the debtor) to pay directly to the creditor a certain portion of the employee's wages until the debt is paid. Until 1970, garnishment was regulated by state law, and its effects could be devastating—in some cases, even leading to suicide. In 1970, Title III of the Consumer Credit Protection Act asserted federal control over garnishment proceedings for the first time. The federal wage-garnishment law limits the amount of employee earnings that may be withheld in any one pay date to the lesser of 25 percent of disposable (after-tax) earnings or the amount by which disposable weekly earnings exceed thirty times the highest current federal minimum wage. The federal law covers everyone who receives personal earnings, including wages, salaries, commissions, bonuses, and retirement income (though not tips), but it allows courts to garnish above the federal maximum in cases involving support payments (e.g., alimony), in personal bankruptcy cases, and in cases where the debt owed is for state or federal tax.

The federal wage-garnishment law also prohibits an employer from firing any worker solely because the worker's pay has been garnished for one debt (multiple garnishments may be grounds for discharge). The penalty for violating this provision is a \$1,000 fine, one-year imprisonment, or both. But the law does not say that an employee fired for having one debt garnished may sue the employer for damages. In a 1980 case, the Fifth Circuit Court of Appeals denied an employee the right to sue, holding that the statute places enforcement exclusively in the hands of the federal secretary of labor. *Smith v. Cotton Brothers Baking Co., Inc.*, 609 F.2d 738 (5th Cir. 1980).

7. The attachment or seizure of personal wages through a court-assisted process.

The 1970 federal statute is not the only limitation on the garnishment process. Note that the states can also still regulate garnishment so long as the state regulation is not in conflict with federal law: North Carolina, Pennsylvania, South Carolina, and Texas prohibit most garnishments, unless it is the government doing the garnishment. And there is an important constitutional limitation as well. Many states once permitted a creditor to garnish the employee's wage even before the case came to court: a simple form from the clerk of the court was enough to freeze a debtor's wages, often before the debtor knew a suit had been brought. In 1969, the US Supreme Court held that this prejudgment garnishment procedure was unconstitutional. *Sniadach v. Family Finance Corp.*, 395 U.S. 337 (1969).

Wage Assignment

A **wage assignment**⁸ is an agreement by an employee that a creditor may take future wages as security for a loan or to pay an existing debt. With a wage assignment, the creditor can collect directly from the employer. However, in some states, wage assignments are unlawful, and an employer need not honor the agreement (indeed, it would be liable to the employee if it did). Other states regulate wage assignments in various ways—for example, by requiring that the assignment be a separate instrument, not part of the loan agreement, and by specifying that no wage assignment is valid beyond a certain period of time (two or three years).

Confession of Judgment

Because suing is at best nettlesome, many creditors have developed forms that allow them to sidestep the courthouse when debtors have defaulted. As part of the original credit agreement, the consumer or borrower waives his right to defend himself in court by signing a **confession of judgment**⁹. This written instrument recites the debtor's agreement that a court order be automatically entered against him in the event of default. The creditor's lawyer simply takes the confession of judgment to the clerk of the court, who enters it in the judgment book of the court without ever consulting a judge. Entry of the judgment entitles the creditor to attach the debtor's assets to satisfy the debt. Like prejudgment garnishment, a confession of judgment gives the consumer no right to be heard, and it has been banned by statute or court decisions in many states.

8. A clause in a loan contract that allows the lender to obtain the borrower's wages in the case of a default.

9. A written agreement in which the defendant in a lawsuit admits liability and accepts the amount of agreed-upon damages that must be paid to the plaintiff.

Fair Debt Collection Practices Act of 1977

Many stores, hospitals, and other organizations attempt on their own to collect unpaid bills, but thousands of merchants, professionals, and small businesses rely on collection agencies to recover accounts receivable. The debt collection business employed some 216,000 people in 2007 and collected over \$40 billion in

debt.PricewaterhouseCoopers LLP, *Value of Third-Party Debt Collection to the U.S. Economy in 2007: Survey And Analysis*, June 2008, <http://www.acainternational.org/files.aspx?p=/images/12546/pwc2007-final.pdf>. For decades, some of these collectors used harassing tactics: posing as government agents or attorneys, calling at the debtor's workplace, threatening physical harm or loss of property or imprisonment, using abusive language, publishing a deadbeats list, misrepresenting the size of the debt, and telling friends and neighbors about the debt. To provide a remedy for these abuses, Congress enacted, as part of the Consumer Credit Protection Act, the Fair Debt Collection Practices Act (FDCPA) in 1977.

This law regulates the manner by which third-party collection agencies conduct their business. It covers collection of all personal, family, and household debts by collection agencies. It does not deal with collection by creditors themselves; the consumer's remedy for abusive debt collection by the creditor is in tort law.

Under the FDCPA, the third-party collector may contact the debtor only during reasonable hours and not at work if the debtor's employer prohibits it. The debtor may write the collector to cease contact, in which case the agency is prohibited from further contact (except to confirm that there will be no further contact). A written denial that money is owed stops the bill collector for thirty days, and he can resume again only after the debtor is sent proof of the debt. Collectors may no longer file suit in remote places, hoping for default judgments; any suit must be filed in a court where the debtor lives or where the underlying contract was signed. The use of harassing and abusive tactics, including false and misleading representations to the debtor and others (e.g., claiming that the collector is an attorney or that the debtor is about to be sued when that is not true), is prohibited. Unless the debtor has given the creditor her cell phone number, calls to cell phones (but not to landlines) are not allowed. Federal Communications Commission, "In the Matter of Rules and Regulations Implementing the Telephone Consumer Protection Act of 1991," http://fjallfoss.fcc.gov/edocs_public/attachmatch/FCC-07-232A1.txt. (This document shows up best with Adobe Acrobat.) In any mailings sent to the debtor, the return address cannot indicate that it is from a debt collection agency (so as to avoid embarrassment from a conspicuous name on the envelope that might be read by third parties).

Communication with third parties about the debt is not allowed, except when the collector may need to talk to others to trace the debtor's whereabouts (though the collector may not tell them that the inquiry concerns a debt) or when the collector contacts a debtor's attorney, if the debtor has an attorney. The federal statute gives debtors the right to sue the collector for damages for violating the statute and for causing such injuries as job loss or harm to reputation.

KEY TAKEAWAY

Several laws regulate practices after consumer credit transactions. The FTC provides consumers with a three-day cooling-off period for some in-home sales, during which time the consumer-purchaser may cancel the sale. The TILA and some state laws also have some cancellation provisions. Billing errors are addressed by the Fair Credit Billing Act, which gives consumers certain rights. Debt collection practices such as garnishment, wage assignments, and confessions of judgment are regulated (and in some states prohibited) by federal and state law. Debt collection practices for third-party debt collectors are constrained by the Fair Debt Collection Practices Act.

EXERCISES

1. Under what circumstances may a consumer have three days to avoid a contract?
2. How does the Fair Credit Billing Act resolve the problem that occurs when a consumer disputes a bill and “argues” with a computer about it?
3. What is the constitutional problem with garnishment as it was often practiced before 1969?
4. If Joe of Joe’s Garage wants to collect on his own the debts he is owed, he is not constrained by the FDCPA. What limits are there on his debt collection practices?

27.3 Cases

Usury

Matter of Dane's Estate

390 N.Y.S.2d 249 (N.Y.A.D. 1976)

MAHONEY, J.

On December 17, 1968, after repeated requests by decedent [Leland Dane] that appellant [James Rossi] loan him \$10,500 [about \$64,000 in 2010 dollars] the latter drew a demand note in that amount and with decedent's consent fixed the interest rate at 7 1/2% Per annum, the then maximum annual interest permitted being 7 1/4%. Decedent executed the note and appellant gave him the full amount of the note in cash....[The estate] moved for summary judgment voiding the note on the ground that it was a usurious loan, the note having been previously rejected as a claim against the estate. The [lower court] granted the motion, voided the note and enjoined any prosecution on it thereafter. Appellant's cross motion to enforce the claim was denied.

New York's usury laws are harsh, and courts have been reluctant to extend them beyond cases that fall squarely under the statutes [Citation]. [New York law] makes any note for which more than the legal rate of interests is 'reserved or taken' or 'agreed to be reserved or taken' void. [The law] commands cancellation of a note in violation of [its provisions]. Here, since both sides concede that the note evidences the complete agreement between the parties, we cannot aid appellant by reliance upon the presumption that he did not make the loan at a usurious rate [Citation]. The terms of the loan are not in dispute. Thus, the note itself establishes, on its face, clear evidence of usury. There is no requirement of a specific intent to violate the usury statute. A general intent to charge more than the legal rate as evidenced by the note, is all that is needed. If the lender intends to take and receive a rate in excess of the legal percentage at the time the note is made, the statute condemns the act and mandates its cancellation [Citation]. The showing, as here, that the note reserves to the lender an illegal rate of interest satisfies respondents' burden of proving a usurious loan.

Next, where the rate of interest on the face of a note is in excess of the legal rate, it cannot be argued that such a loan may be saved because the borrower prompted the loan or even set the rate. The usury statutes are for the protection of the

borrower and [their] purpose would be thwarted if the lender could avoid its consequences by asking the borrower to set the rate. Since the respondents herein asserted the defense of usury, it cannot be said that the decedent waived the defense by setting or agreeing to the 7 1/2% Rate of interest.

Finally, equitable considerations cannot be indulged when, as here, a statute specifically condemns an act. The statute fixes the law, and it must be followed.

The order should be affirmed, without costs.

CASE QUESTIONS

1. What is the consequence to the lender of charging usurious rates in New York?
2. The rate charged here was one-half of one percent in excess of the allowable limit. Who made the note, the borrower or the lender? That makes no difference, but should it?
3. What “equitable considerations” were apparently raised by the creditor?

Discrimination under the ECOA

Rosa v. Park West Bank & Trust Co.

214 F.3d 213, C.A.1 (Mass. 2000)

Lynch, J.

Lucas Rosa sued the Park West Bank & Trust Co. under the Equal Credit Opportunity Act (ECOA), 15 U.S.C. §§ 1691–1691f, and various state laws. He alleged that the Bank refused to provide him with a loan application because he did not come dressed in masculine attire and that the Bank’s refusal amounted to sex discrimination under the Act. The district court granted the Bank’s motion to dismiss the ECOA claim...

I.

According to the complaint, which we take to be true for the purpose of this appeal, on July 21, 1998, Mr. Lucas Rosa came to the Bank to apply for a loan. A biological male, he was dressed in traditionally feminine attire. He requested a loan application from Norma Brunelle, a bank employee. Brunelle asked Rosa for

identification. Rosa produced three forms of photo identification: (1) a Massachusetts Department of Public Welfare Card; (2) a Massachusetts Identification Card; and (3) a Money Stop Check Cashing ID Card. Brunelle looked at the identification cards and told Rosa that she would not provide him with a loan application until he “went home and changed.” She said that he had to be dressed like one of the identification cards in which he appeared in more traditionally male attire before she would provide him with a loan application and process his loan request.

II.

Rosa sued the Bank for violations of the ECOA and various Massachusetts antidiscrimination statutes. Rosa charged that “[b]y requiring [him] to conform to sex stereotypes before proceeding with the credit transaction, [the Bank] unlawfully discriminated against [him] with respect to an aspect of a credit transaction on the basis of sex.” He claims to have suffered emotional distress, including anxiety, depression, humiliation, and extreme embarrassment. Rosa seeks damages, attorney’s fees, and injunctive relief.

Without filing an answer to the complaint, the Bank moved to dismiss....The district court granted the Bank’s motion. The court stated:

[T]he issue in this case is not [Rosa’s] sex, but rather how he chose to dress when applying for a loan. Because the Act does not prohibit discrimination based on the manner in which someone dresses, Park West’s requirement that Rosa change his clothes does not give rise to claims of illegal discrimination. Further, even if Park West’s statement or action were based upon Rosa’s sexual orientation or perceived sexual orientation, the Act does not prohibit such discrimination.

Price Waterhouse v. Hopkins (U.S. Supreme Court, 1988), which Rosa relied on, was not to the contrary, according to the district court, because that case “neither holds, nor even suggests, that discrimination based merely on a person’s attire is impermissible.”

On appeal, Rosa says that the district court “fundamentally misconceived the law as applicable to the Plaintiff’s claim by concluding that there may be no relationship, as a matter of law, between telling a bank customer what to wear and sex discrimination.” ...The Bank says that Rosa loses for two reasons. First, citing cases pertaining to gays and transsexuals, it says that the ECOA does not apply to crossdressers. Second, the Bank says that its employee genuinely could not identify Rosa, which is why she asked him to go home and change.

III.

...In interpreting the ECOA, this court looks to Title VII case law, that is, to federal employment discrimination law....The Bank itself refers us to Title VII case law to interpret the ECOA.

The ECOA prohibits discrimination, “with respect to any aspect of a credit transaction[,] on the basis of race, color, religion, national origin, sex or marital status, or age.” 15 U.S.C. § 1691(a). Thus to prevail, the alleged discrimination against Rosa must have been “on the basis of...sex.” See [Citation.] The ECOA’s sex discrimination prohibition “protects men as well as women.”

While the district court was correct in saying that the prohibited bases of discrimination under the ECOA do not include style of dress or sexual orientation, that is not the discrimination alleged. It is alleged that the Bank’s actions were taken, in whole or in part, “on the basis of... [the appellant’s] sex.” The Bank, by seeking dismissal under Rule 12(b)(6), subjected itself to rigorous standards. We may affirm dismissal “only if it is clear that no relief could be granted under any set of facts that could be proved consistent with the allegations.” [Citations] Whatever facts emerge, and they may turn out to have nothing to do with sex-based discrimination, we cannot say at this point that the plaintiff has no viable theory of sex discrimination consistent with the facts alleged.

The evidence is not yet developed, and thus it is not yet clear why Brunelle told Rosa to go home and change. It may be that this case involves an instance of disparate treatment based on sex in the denial of credit. See [Citation]; (“Disparate treatment’...is the most easily understood type of discrimination. The employer simply treats some people less favorably than others because of their...sex.”); [Citation] (invalidating airline’s policy of weight limitations for female “flight hostesses” but not for similarly situated male “directors of passenger services” as impermissible disparate treatment); [Citation] (invalidating policy that female employees wear uniforms but that similarly situated male employees need wear only business dress as impermissible disparate treatment); [Citation] (invalidating rule requiring abandonment upon marriage of surname that was applied to women, but not to men). It is reasonable to infer that Brunelle told Rosa to go home and change because she thought that Rosa’s attire did not accord with his male gender: in other words, that Rosa did not receive the loan application because he was a man, whereas a similarly situated woman would have received the loan application. That is, the Bank may treat, for credit purposes, a woman who dresses like a man differently than a man who dresses like a woman. If so, the Bank concedes, Rosa may have a claim. Indeed, under *Price Waterhouse*, “stereotyped remarks [including statements about dressing more ‘femininely’] can certainly be evidence that gender played a part.” [Citation.] It is also reasonable to infer, though, that Brunelle

refused to give Rosa the loan application because she thought he was gay, confusing sexual orientation with cross-dressing. If so, Rosa concedes, our precedents dictate that he would have no recourse under the federal Act. See [Citation]. It is reasonable to infer, as well, that Brunelle simply could not ascertain whether the person shown in the identification card photographs was the same person that appeared before her that day. If this were the case, Rosa again would be out of luck. It is reasonable to infer, finally, that Brunelle may have had mixed motives, some of which fall into the prohibited category.

It is too early to say what the facts will show; it is apparent, however, that, under some set of facts within the bounds of the allegations and non-conclusory facts in the complaint, Rosa may be able to prove a claim under the ECOA....

We reverse and remand for further proceedings in accordance with this opinion.

CASE QUESTIONS

1. Could the bank have denied Mr. Rosa a loan because he was gay?
2. If a woman had applied for loan materials dressed in traditionally masculine attire, could the bank have denied her the materials?
3. The Court offers up at least three possible reasons why Rosa was denied the loan application. What were those possible reasons, and which of them would have been valid reasons to deny him the application?
4. To what federal law does the court look in interpreting the application of the ECOA?
5. Why did the court rule in Mr. Rosa's favor when the facts as to why he was denied the loan application could have been interpreted in several different ways?

Uses of Credit Reports under the FCRA

Rodgers v. McCullough

296 F.Supp.2d 895 (W.D. Tenn. 2003)

Background

This case concerns Defendants' receipt and use of Christine Rodgers' consumer report. The material facts do not seem to be disputed. The parties agree that Ms. Rodgers gave birth to a daughter, Meghan, on May 4, 2001. Meghan's father is

Raymond Anthony. Barbara McCullough, an attorney, represented Mr. Anthony in a child custody suit against Ms. Rodgers in which Mr. Anthony sought to obtain custody and child support from Ms. Rodgers. Ms. McCullough received, reviewed, and used Ms. Rodgers' consumer report in connection with the child custody case.

On September 25, 2001, Ms. McCullough instructed Gloria Christian, her secretary, to obtain Ms. Rodgers' consumer report. Ms. McCullough received the report on September 27 or 28 of 2001. She reviewed the report in preparation for her examination of Ms. Rodgers during a hearing to be held in juvenile court on October 23, 2001. She also used the report during the hearing, including attempting to move the document into evidence and possibly handing it to the presiding judge.

The dispute in this case centers around whether Ms. McCullough obtained and used Ms. Rodgers' consumer report for a purpose permitted under the Fair Credit Reporting Act (the "FCRA"). Plaintiff contends that Ms. McCullough, as well as her law firm, Wilkes, McCullough & Wagner, a partnership, and her partners, Calvin J. McCullough and John C. Wagner, are liable for the unlawful receipt and use of Ms. Rodgers' consumer report in violation 15 U.S.C. §§ 1681 o (negligent failure to comply with the FCRA) and 1681n (willful failure to comply with the FCRA or obtaining a consumer report under false pretenses). Plaintiff has also sued Defendants for the state law tort of unlawful invasion of privacy....

Analysis

Plaintiff has moved for summary judgment on the questions of whether Defendants failed to comply with the FCRA (i.e. whether Defendants had a permissible purpose to obtain Ms. Rodgers' credit report), whether Defendants' alleged failure to comply was willful, and whether Defendants' actions constituted unlawful invasion of privacy. The Court will address the FCRA claims followed by the state law claim for unlawful invasion of privacy.

A. Permissible Purpose under the FCRA

Pursuant to the FCRA, "A person shall not use or obtain a consumer report for any purpose unless (1) the consumer report is obtained for a purpose for which the consumer report is authorized to be furnished under this section...." [Citation.] Defendants do not dispute that Ms. McCullough obtained and used Ms. Rodgers' consumer report.

[The act] provides a list of permissible purposes for the receipt and use of a consumer report, of which the following subsection is at issue in this case:

[A]ny consumer reporting agency may furnish a consumer report under the following circumstances and no other:...

(3) To a person which it has reason to believe-

(A) intends to use the information in connection with a credit transaction involving the consumer on whom the information is to be furnished and involving the extension of credit to, or review or collection of an account of, the consumer...

[Citation.] Defendants concede that Ms. McCullough's receipt and use of Ms. Rodgers' consumer report does not fall within any of the other permissible purposes enumerated in [the act].

Ms. Rodgers requests summary judgment in her favor on this point, relying on the plain text of the statute, because she was not in arrears on any child support obligation at the time Ms. McCullough requested the consumer report, nor did she owe Ms. McCullough's client any debt. She notes that Mr. Anthony did not have custody of Meghan Rodgers and that an award of child support had not even been set at the time Ms. McCullough obtained her consumer report.

Defendants maintain that Ms. McCullough obtained Ms. Rodgers' consumer report for a permissible purpose, namely to locate Ms. Rodgers' residence and set and collect child support obligations. Defendants argue that 15 U.S.C. § 1681b(a)(3)(A) permits the use of a credit report in connection with "collection of an account" and, therefore, Ms. McCullough was permitted to use Ms. Rodgers' credit report in connection with the collection of child support. Defendants also admit that Ms. McCullough used the credit report to portray Ms. Rodgers as irresponsible, financially unstable, and untruthful about her residence and employment history to the Juvenile Court. Defendants do not allege that these constitute permissible purposes under the FCRA.

The cases Defendants have cited in response to the motion for summary judgment are inapplicable to the present facts. In each case cited by Defendants, the person who obtained a credit report did so in order to collect on an *outstanding* judgment or an *outstanding* debt. *See, e.g.,* [Citation] (finding that collection of a judgment of arrears in child support is a permissible purpose under [the act]; [Citation] (holding that defendant had a permissible purpose for obtaining a consumer report where plaintiff owed an outstanding debt to the company).

However, no such outstanding debt or judgment existed in this case. At the time Ms. McCullough obtained Ms. Rodgers' consumer report, Ms. Rodgers' did not owe

money to either Ms. McCullough or her client, Mr. Anthony. Defendants have provided no evidence showing that Ms. McCullough believed Ms. Rodgers owed money to Mr. Anthony at the time she requested the credit report. Indeed, Mr. Anthony had not even been awarded custody of Meghan Rodgers at the time Ms. McCullough obtained and used the credit report. Ms. McCullough acknowledged each of the facts during her deposition. Moreover, in response to Plaintiff's request for admissions, Ms. McCullough admitted that she did not receive the credit report for the purpose of collecting on an account from Ms. Rodgers.

The evidence before the Court makes clear that Ms. McCullough was actually attempting, on behalf of Mr. Anthony, to secure custody of Meghan Rodgers and obtain a future award of child support payments from Ms. Rodgers by portraying Ms. Rodgers as irresponsible to the court. These are not listed as permissible purposes under [FCRA]. Defendants have offered the Court no reason to depart from the plain language of the statute, which clearly does not permit an individual to obtain a consumer report for the purposes of obtaining child custody and instituting child support payments. Moreover, the fact that the Juvenile Court later awarded custody and child support to Mr. Anthony does not retroactively provide Ms. McCullough with a permissible purpose for obtaining Ms. Rodgers' consumer report. Therefore, the Court GRANTS Plaintiff's motion for partial summary judgment on the question of whether Defendants had a permissible purpose to obtain Ms. Rodgers' credit report.

B. Willful Failure to Comply with the FCRA

Pursuant to [the FCRA], "Any person who willfully fails to comply with any requirement imposed under this subchapter with respect to any consumer is liable to that consumer" for the specified damages.

"To show willful noncompliance with the FCRA, [the plaintiff] must show that [the defendant] 'knowingly and intentionally committed an act in conscious disregard for the rights of others,' but need not show 'malice or evil motive.'" [Citation.] "Under this formulation the defendant must commit the act that violates the Fair Credit Reporting Act with knowledge that he is committing the act and with intent to do so, and he must also be conscious that his act impinges on the rights of others." "The statute's use of the word 'willfully' imports the requirement that the defendant know his or her conduct is unlawful." [Citation.] A defendant can not be held civilly liable under [the act] if he or she obtained the plaintiff's credit report "under what is believed to be a proper purpose under the statute but which a court...later rules to be impermissible legally under [Citation]."

Ms. McCullough is an attorney who signed multiple service contracts with Memphis Consumer Credit Association indicating that the primary purpose for which credit information would be ordered was “to collect judgments.” Ms. McCullough also agreed in these service contracts to comply with the FCRA. Her deposition testimony indicates that she had never previously ordered a consumer report for purposes of calculating child support. This evidence may give rise to an inference that Ms. McCullough was aware that she did not order Ms. Rodgers’ consumer report for a purpose permitted under the FCRA.

Defendants argue in their responsive memorandum that if Ms. McCullough had suspected that she had obtained Ms. Rodgers’ credit report in violation of the FCRA, it is unlikely that she would have attempted to present the report to the Juvenile Court as evidence during the custody hearing for Meghan Rodgers. Ms. McCullough also testified that she believed she had a permissible purpose for obtaining Ms. Rodgers’ consumer report (i.e. to set and collect child support obligations).

Viewing the evidence in the light most favorable to the nonmoving party, Defendants have made a sufficient showing that Ms. McCullough may not have understood that she lacked a permissible purpose under the FCRA to obtain and use Ms. Rodgers’ credit report.

If Ms. McCullough was not aware that her actions might violate the FCRA at the time she obtained and used Ms. Rodgers’ credit report, she would not have willfully failed to comply with the FCRA. The question of Ms. McCullough’s state of mind at the time she obtained and used Ms. Rodgers’ credit report is an issue best left to a jury. [Citation] (“state of mind is typically not a proper issue for resolution on summary judgment”). The Court DENIES Plaintiff’s motion for summary judgment on the question of willfulness under [the act].

C. Obtaining a Consumer Report under False Pretenses or Knowingly without a Permissible Purpose

...For the same reasons the Court denied Plaintiff’s motion for summary judgment on the question of willfulness, the Court also DENIES Plaintiff’s motion for summary judgment on the question of whether Ms. McCullough obtained and used Ms. Rodgers’ credit report under false pretenses or knowingly without a permissible purpose.

[Discussion of the invasion of privacy claim omitted.]

Conclusion

For the foregoing reasons, the Court GRANTS Plaintiff's Motion for Partial Summary Judgment Regarding Defendants' Failure to Comply with the Fair Credit Reporting Act [having no permissible purpose]. The Court DENIES Plaintiff's remaining motions for partial summary judgment.

CASE QUESTIONS

1. Why did the defendant, McCullough, order her secretary to obtain Ms. Rodgers's credit report? If Ms. McCullough is found liable, why would her law firm partners also be liable?
2. What "permissible purpose" did the defendants contend they had for obtaining the credit report? Why did the court determine that purpose was not permissible?
3. Why did the court deny the plaintiff's motion for summary judgment on the question of whether the defendant "willfully" failed to comply with the act? Is the plaintiff out of luck on that question, or can it be litigated further?

27.4 Summary and Exercises

Summary

Consumers who are granted credit have long received protection through usury laws (laws that establish a maximum interest rate). The rise in consumer debt in recent years has been matched by an increase in federal regulation of consumer credit transactions. The Truth in Lending Act requires disclosure of credit terms; the Equal Credit Opportunity Act prohibits certain types of discrimination in the granting of credit; the Fair Credit Reporting Act gives consumers access to their credit dossiers and prohibits unapproved use of credit-rating information. After entering into a credit transaction, a consumer has certain cancellation rights and may use a procedure prescribed by the Fair Credit Billing Act to correct billing errors. Traditional debt collection practices—garnishment, wage assignments, and confession of judgment clauses—are now subject to federal regulation, as are the practices of collection agencies under the Fair Debt Collection Practices Act.

EXERCISES

1. Carlene Consumer entered into an agreement with Rent to Buy, Inc., to rent a computer for \$20 per week. The agreement also provided that if Carlene chose to rent the computer for fifty consecutive weeks, she would own it. She then asserted that the agreement was not a lease but a sale on credit subject to the Truth in Lending Act, and that Rent to Buy, Inc., violated the act by failing to state the annual percentage rate. Is Carlene correct?
2. Carlos, a resident of Chicago, was on a road trip to California when he heard a noise under the hood of his car. He took the car to a mechanic for repair. The mechanic overhauled the power steering unit and billed Carlos \$600, which he charged on his credit card. Later that day—Carlos having driven about fifty miles—the car made the same noise, and Carlos took it to another mechanic, who diagnosed the problem as a loose exhaust pipe connection at the manifold. Carlos was billed \$300 for this repair, with which he was satisfied. Carlos returned to Chicago and examined his credit card statement. What rights has he as to the \$600 charge on his card?
3. Ken was the owner of Scrimshaw, a company that manufactured and sold carvings made on fossilized ivory. He applied for a loan from Bank. Bank found him creditworthy, but seeking additional security for repayment, it required his wife, Linda, to sign a guaranty as well. During a subsequent recession, demand for scrimshaw fell, and Ken's business went under. Bank filed suit against both Ken and Linda. What defense has Linda?
4. The FCRA requires that credit-reporting agencies "follow reasonable procedures to assure maximum possible accuracy of the information." In October of 1989, Renie Guimond became aware of, and notified the credit bureau Trans Union about, inaccuracies in her credit report: that she was married (and it listed a Social Security number for this nonexistent spouse), that she was also known as Ruth Guimond, and that she had a Saks Fifth Avenue credit card. About a month later, Trans Union responded to Guimond's letter, stating that the erroneous information had been removed. But in March of 1990, Trans Union again published the erroneous information it purportedly had removed. Guimond then requested the source of the erroneous information, to which Trans Union responded that it could not disclose the identity of the source because it did not know its source. The disputed information was eventually removed from Guimond's file in October 1990. When Guimond sued, Trans Union defended that she had no claim because no credit was denied to her as a result of the inaccuracies in her credit file.

The lower court dismissed her case; she appealed. To what damages, if any, is Guimond entitled?

5. Plaintiff incurred a medical debt of \$160. She received two or three telephone calls from Defendant, the collection agency; each time she denied any money owing. Subsequently she received this letter:

You have shown that you are unwilling to work out a friendly settlement with us to clear the above debt. Our field investigator has now been instructed to make an investigation in your neighborhood and to personally call on your employer.

The immediate payment of the full amount, or a personal visit to this office, will spare you this embarrassment.

The top of the letter notes the creditor's name and the amount of the alleged debt. The letter was signed by a "collection agent." The envelope containing that letter presented a return address that included Defendant's full name: "Collection Accounts Terminal, Inc." What violations of the Fair Debt Collection Practices Act are here presented?

6. Eric and Sharaveen Rush filed a claim alleging violations of the Fair Credit Reporting Act arising out of an allegedly erroneous credit report prepared by a credit bureau from information, in part, from Macy's, the department store. The error causes the Rushes to be denied credit. Macy's filed a motion to dismiss. Is Macy's liable? Discuss.

SELF-TEST QUESTIONS

1. An example of a loan that is a common exception to usury law is
 - a. a business loan
 - b. a mortgage loan
 - c. an installment loan
 - d. all of the above

2. Under the Fair Credit Reporting Act, an applicant denied credit
 - a. has a right to a hearing
 - b. has the right to be told the name and address of the credit bureau that prepared the credit report upon which denial was based
 - c. always must pay a fee for information regarding credit denial
 - d. none of the above

3. Garnishment of wages
 - a. is limited by federal law
 - b. involves special rules for support cases
 - c. is a legal process where a creditor obtains a court order directing the debtor's employer to pay a portion of the debtor's wages directly to the creditor
 - d. involves all of the above

4. A wage assignment is
 - a. an example of garnishment
 - b. an example of confession of judgment
 - c. an exception to usury law
 - d. an agreement that a creditor may take future wages as security for a loan

5. The Truth-in-Truth in Lending Act requires disclosure of
 - a. the annual percentage rate
 - b. the borrower's race

- c. both of the above
- d. neither of the above

Chapter 28

Secured Transactions and Suretyship

LEARNING OBJECTIVES

After reading this chapter, you should understand the following:

1. The basic concepts of secured transactions
2. The property subject to the security interest
3. Creation and perfection of the security interest
4. Priorities for claims on the security interest
5. Rights of creditors on default
6. The basic concepts of suretyship
7. The relationship between surety and principal
8. Rights among cosureties

28.1 Introduction to Secured Transactions

LEARNING OBJECTIVES

1. Recognize, most generally, the two methods by which debtors' obligations may be secured.
2. Know the source of law for personal property security.
3. Understand the meaning of *security interest* and other terminology necessary to discuss the issues.
4. Know what property is subject to the security interest.
5. Understand how the security interest is created—"attached"—and perfected.

The Problem of Security

Creditors want assurances that they will be repaid by the debtor. An oral promise to pay is no security at all, and—as it is oral—it is difficult to prove. A **signature loan**¹ is merely a written promise by the debtor to repay, but the creditor stuck holding a promissory note with a signature loan only—while he may sue a defaulting debtor—will get nothing if the debtor is insolvent. Again, that's no security at all. Real security for the creditor comes in two forms: by agreement with the debtor or by operation of law without an agreement.

By Agreement with the Debtor

Security obtained through agreement comes in three major types: (1) personal property security (the most common form of security); (2) suretyship—the willingness of a third party to pay if the primarily obligated party does not; and (3) mortgage of real estate.

By Operation of Law

Security obtained through operation of law is known as a **lien**². Derived from the French for "string" or "tie," a *lien* is the legal hold that a creditor has over the property of another in order to secure payment or discharge an obligation.

1. A loan for which no collateral is pledged.

2. An encumbrance upon property to secure payment.

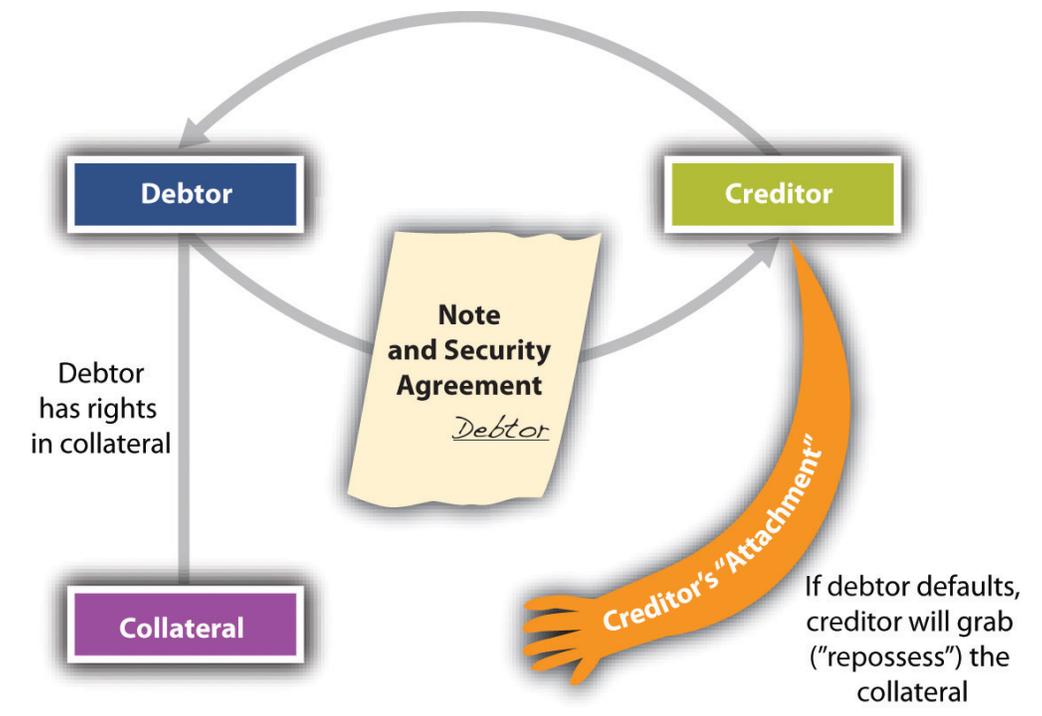

In this chapter, we take up security interests in personal property and suretyship. In the next chapter, we look at mortgages and nonconsensual liens.

Basics of Secured Transactions

The law of secured transactions consists of five principal components: (1) the nature of property that can be the subject of a security interest; (2) the methods of creating the security interest; (3) the perfection of the security interest against claims of others; (4) priorities among secured and unsecured creditors—that is, who will be entitled to the secured property if more than one person asserts a legal right to it; and (5) the rights of creditors when the debtor defaults. After considering the source of the law and some key terminology, we examine each of these components in turn.

Here is the simplest (and most common) scenario: Debtor borrows money or obtains credit from Creditor, signs a note and security agreement putting up collateral, and promises to pay the debt or, upon Debtor's default, let Creditor (secured party) take possession of (repossess) the collateral and sell it. Figure 28.1 "The Grasping Hand" illustrates this scenario—the grasping *hand* is Creditor's reach for the collateral, but the hand will not close around the collateral and take it (repossess) unless Debtor defaults.

Figure 28.1 *The Grasping Hand*

Source of Law and Definitions

Source of Law

Article 9 of the Uniform Commercial Code (UCC) governs security interests in personal property. The UCC defines the scope of the article (here slightly truncated): Uniform Commercial Code, Section 9-109.

This chapter applies to the following:

1. A transaction, regardless of its form, that creates a security interest in personal property or fixtures by contract;
2. An agricultural lien;
3. A sale of accounts, chattel paper, payment intangibles, or promissory notes;
4. A consignment...

Definitions

As always, it is necessary to review some definitions so that communication on the topic at hand is possible. The secured transaction always involves a debtor, a secured party, a security agreement, a security interest, and collateral.

Article 9 applies to any transaction “that creates a security interest.” The UCC in Section 1-201(35) defines **security interest**³ as “an interest in personal property or fixtures which secures payment or performance of an obligation.”

Security agreement⁴ is “an agreement that creates or provides for a security interest.” It is the contract that sets up the debtor’s duties and the creditor’s rights in event the debtor defaults. Uniform Commercial Code, Section 9-102(a)(73).

Collateral⁵ “means the property subject to a security interest or agricultural lien.” Uniform Commercial Code, Section 9-102(12).

Purchase-money security interest⁶ (PMSI) is the simplest form of security interest. Section 9-103(a) of the UCC defines “purchase-money collateral” as “goods or software that secures a purchase-money obligation with respect to that collateral.” A PMSI arises where the debtor gets credit to buy goods and the creditor takes a secured interest in those goods. Suppose you want to buy a big hardbound textbook on credit at your college bookstore. The manager refuses to extend you credit outright but says she will take back a PMSI. In other words, she will retain a security interest in the book itself, and if you don’t pay, you’ll have to return the

3. Right in personal property to secure payment or performance of an obligation.

4. Agreement that grants a security interest.

5. Property given as security for a debt.

6. The security interest held by the seller of collateral to secure payment of all or part of the price.

book; it will be repossessed. Contrast this situation with a counteroffer you might make: because she tells you not to mark up the book (in the event that she has to repossess it if you default), you would rather give her some other collateral to hold—for example, your gold college signet ring. Her security interest in the ring is not a PMSI but a pledge; a PMSI must be an interest in the particular goods purchased. A PMSI would also be created if you borrowed money to buy the book and gave the lender a security interest in the book.

Whether a transaction is a lease or a PMSI is an issue that frequently arises. The answer depends on the facts of each case. However, a security interest is created if (1) the lessee is obligated to continue payments for the term of the lease; (2) the lessee cannot terminate the obligation; and (3) one of several economic tests, which are listed in UCC Section 1-201 (37), is met. For example, one of the economic tests is that “the lessee has an option to become owner of the goods for no additional consideration or nominal additional consideration upon compliance with the lease agreement.”

The issue of lease versus security interest gets litigated because of the requirements of Article 9 that a security interest be perfected in certain ways (as we will see). If the transaction turns out to be a security interest, a lessor who fails to meet these requirements runs the risk of losing his property to a third party. And consider this example. Ferrous Brothers Iron Works “leases” a \$25,000 punch press to Millie’s Machine Shop. Under the terms of the lease, Millie’s must pay a yearly rental of \$5,000 for five years, after which time Millie’s may take title to the machine outright for the payment of \$1. During the period of the rental, title remains in Ferrous Brothers. Is this “lease” really a security interest? Since ownership comes at nominal charge when the entire lease is satisfied, the transaction would be construed as one creating a security interest. What difference does this make? Suppose Millie’s goes bankrupt in the third year of the lease, and the trustee in bankruptcy wishes to sell the punch press to satisfy debts of the machine shop. If it were a true lease, Ferrous Brothers would be entitled to reclaim the machine (unless the trustee assumed the lease). But if the lease is really intended as a device to create a security interest, then Ferrous Brothers can recover its collateral only if it has otherwise complied with the obligations of Article 9—for example, by recording its security interest, as we will see.

Now we return to definitions.

Debtor⁷ is “a person (1) having an interest in the collateral other than a security interest or a lien; (2) a seller of accounts, chattel paper, payment intangibles, or promissory notes; or (3) a consignee.” Uniform Commercial Code, Section 9-102(a)(28).

7. One who owes money or a duty of performance to another.

Obligor⁸ is “a person that, with respect to an obligation secured by a security interest in or an agricultural lien on the collateral, (i) owes payment or other performance of the obligation, (ii) has provided property other than the collateral to secure payment or other performance of the obligation, or (iii) is otherwise accountable in whole or in part for payment or other performance of the obligation.” Uniform Commercial Code, Section 9-102 (59). Here is example 1 from the Official Comment to UCC Section 9-102: “Behnfeltdt borrows money and grants a security interest in her Miata to secure the debt. Behnfeltdt is a debtor and an obligor.”

Behnfeltdt is a debtor because she has an interest in the car—she owns it. She is an obligor because she owes payment to the creditor. Usually the debtor is the obligor.

A *secondary obligor* is “an obligor to the extent that: (A) [the] obligation is secondary; or (b) [the person] has a right of recourse with respect to an obligation secured by collateral against the debtor, another obligor, or property of either.” Uniform Commercial Code, Section 9-102(a)(71). The secondary obligor is a guarantor (surety) of the debt, obligated to perform if the primary obligor defaults. Consider example 2 from the Official Comment to Section 9-102: “Behnfeltdt borrows money and grants a security interest in her Miata to secure the debt. Bruno cosigns a negotiable note as maker. As before, Behnfeltdt is the debtor and an obligor. As an accommodation party, Bruno is a secondary obligor. Bruno has this status even if the note states that her obligation is a primary obligation and that she waives all suretyship defenses.”

Again, usually the debtor is the obligor, but consider example 3 from the same Official Comment: “Behnfeltdt borrows money on an unsecured basis. Bruno cosigns the note and grants a security interest in her Honda to secure her [Behnfeltdt’s] obligation. Inasmuch as Behnfeltdt does not have a property interest in the Honda, Behnfeltdt is not a debtor. Having granted the security interest, Bruno is the debtor. Because Behnfeltdt is a principal obligor, she is not a secondary obligor. Whatever the outcome of enforcement of the security interest against the Honda or Bruno’s secondary obligation, Bruno will look to Behnfeltdt for her losses. The enforcement will not affect Behnfeltdt’s aggregate obligations.”

8. One who owes an obligation.

9. The creditor who has a security interest in a debtor’s collateral.

10. A security device by which a mortgagee takes security interest in personal property of the mortgagor; mostly superseded by other security arrangements under UCC Article 9.

Secured party⁹ is “a person in whose favor a security interest is created or provided for under a security agreement,” and it includes people to whom accounts, chattel paper, payment intangibles, or promissory notes have been sold; consignors; and others under Section 9-102(a)(72).

Chattel mortgage¹⁰ means “a debt secured against items of personal property rather than against land, buildings and fixtures.” Commercial Brokers, Inc.,

“Glossary of Real Estate Terms,” <http://www.cbire.com/index.cfm/fuseaction/terms.list/letter/C/contentid/32302EC3-81D5-47DF-A9CBA32FAE38B22A>.

Property Subject to the Security Interest

Now we examine what property may be put up as security—collateral. Collateral is—again—property that is subject to the security interest. It can be divided into four broad categories: goods, intangible property, indispensable paper, and other types of collateral.

Goods

Tangible property as collateral is goods. *Goods* means “all things that are movable when a security interest attaches. The term includes (i) fixtures, (ii) standing timber that is to be cut and removed under a conveyance or contract for sale, (iii) the unborn young of animals, (iv) crops grown, growing, or to be grown, even if the crops are produced on trees, vines, or bushes, and (v) manufactured homes. The term also includes a computer program embedded in goods.”Uniform Commercial Code, Section 9-102(44). Goods are divided into several subcategories; six are taken up here.

Consumer Goods

These are “goods used or bought primarily for personal, family, or household purposes.”Uniform Commercial Code, Section 9-102(a)(48).

Inventory

“Goods, other than farm products, held by a person for sale or lease or consisting of raw materials, works in progress, or material consumed in a business.”Uniform Commercial Code, Section 9-102(a)(48).

Farm Products

“Crops, livestock, or other supplies produced or used in farming operations,” including aquatic goods produced in aquaculture.Uniform Commercial Code, Section 9-102(a)(34).

Equipment

This is the residual category, defined as “goods other than inventory, farm products, or consumer goods.”Uniform Commercial Code, Section 9-102(a)(33).

Fixtures

These are “goods that have become so related to particular real property that an interest in them arises under real property law.” Uniform Commercial Code, Section 9-102(a)(41). Examples would be windows, furnaces, central air conditioning, and plumbing fixtures—items that, if removed, would be a cause for significant reconstruction.

Accession

These are “goods that are physically united with other goods in such a manner that the identity of the original goods is lost.” Uniform Commercial Code, Section 9-102(a)(1). A new engine installed in an old automobile is an accession.

Intangible Property

Two types of collateral are neither goods nor indispensable paper: accounts and general intangibles.

Accounts

This type of intangible property includes accounts receivable (the right to payment of money), insurance policy proceeds, energy provided or to be provided, winnings in a lottery, health-care-insurance receivables, promissory notes, securities, letters of credit, and interests in business entities. Uniform Commercial Code, Section 9-102(a)(2). Often there is something in writing to show the existence of the right—such as a right to receive the proceeds of somebody else’s insurance payout—but the writing is merely evidence of the right. The paper itself doesn’t have to be delivered for the transfer of the right to be effective; that’s done by assignment.

General Intangibles

General intangibles refers to “any personal property, including things in action, other than accounts, commercial tort claims, deposit accounts, documents, goods, instruments, investment property, letter-of-credit rights, letters of credit, money, and oil, gas, or other minerals before extraction.” General intangibles include payment intangibles and software. Uniform Commercial Code, Section 9-102(42).

Indispensable Paper

This oddly named category is the middle ground between goods—stuff you can touch—and intangible property. It’s called “indispensable” because although the right to the value—such as a warehouse receipt—is embodied in a written paper, the paper itself is indispensable for the transferee to access the value. For example, suppose Deborah Debtor borrows \$3,000 from Carl Creditor, and Carl takes a security interest in four designer chairs Deborah owns that are being stored in a warehouse. If Deborah defaults, Carl has the right to possession of the warehouse receipt: he takes it to the warehouse and is entitled to take the chairs and sell them to satisfy the obligation. The warehouse will not let Carl have the chairs without the warehouse receipt—it’s indispensable paper. There are four kinds of indispensable paper.

Chattel Paper

Chattel is another word for goods. Chattel paper is a record (paper or electronic) that demonstrates both “a monetary obligation and a security interest either in certain goods or in a lease on certain goods.” Uniform Commercial Code, Section 9-102(11). The paper represents a valuable asset and can itself be used as collateral. For example, Creditor Car Company sells David Debtor an automobile and takes back a note and security agreement (this is a purchase-money security agreement; the note and security agreement is chattel paper). The chattel paper is not yet collateral; the automobile is. Now, though, Creditor Car Company buys a new hydraulic lift from Lift Co., and grants Lift Co. a security interest in Debtor’s chattel paper to secure Creditor Car’s debt to Lift Co. The chattel paper is now collateral. Chattel paper can be tangible (actual paper) or electronic.

Documents

This category includes documents of title—bills of lading and warehouse receipts are examples.

Instruments

An “instrument” here is “a negotiable instrument (checks, drafts, notes, certificates of deposit) or any other writing that evidences a right to the payment of a monetary obligation, is not itself a security agreement or lease, and is of a type that in the ordinary course of business is transferred by delivery with any necessary indorsement or assignment.” “Instrument” does not include (i) investment property, (ii) letters of credit, or (iii) writings that evidence a right to payment arising out of the use of a credit or charge card or information contained on or for use with the card. Uniform Commercial Code, Section 9-102(a)(47).

Investment Property

This includes securities (stock, bonds), security accounts, commodity accounts, and commodity contracts. Uniform Commercial Code, Section 9-102(a)(49). Securities may be certified (represented by a certificate) or uncertified (not represented by a certificate). Uniform Commercial Code, Section 8-102(a)(4) and (a)(18).

Other Types of Collateral

Among possible other types of collateral that may be used as security is the **floating lien**¹¹. This is a security interest in property that was not in the possession of the debtor when the security agreement was executed. The floating lien creates an interest that floats on the river of present and future collateral and proceeds held by—most often—the business debtor. It is especially useful in loans to businesses that sell their collateralized inventory. Without the floating lien, the lender would find its collateral steadily depleted as the borrowing business sells its products to its customers. Pretty soon, there'd be no security at all. The floating lien includes the following:

- *After-acquired property*. This is property that the debtor acquires after the original deal was set up. It allows the secured party to enhance his security as the debtor (obligor) acquires more property subject to collateralization.
- *Sale proceeds*. These are proceeds from the disposition of the collateral. Carl Creditor takes a secured interest in Deborah Debtor's sailboat. She sells the boat and buys a garden tractor. The secured interest attaches to the garden tractor.
- *Future advances*. Here the security agreement calls for the collateral to stand for both present and future advances of credit without any additional paperwork.

Here are examples of future advances:

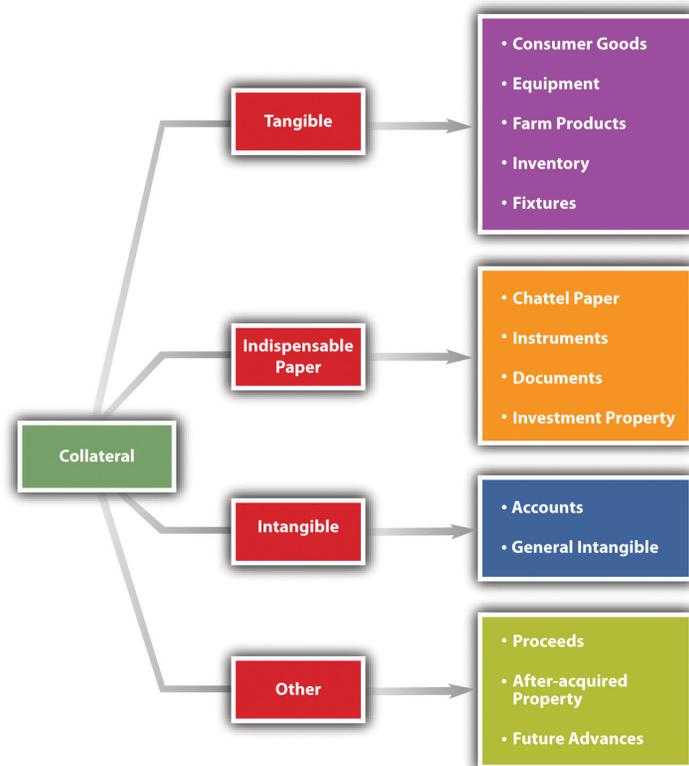

- Example 1: A debtor enters into a security agreement with a creditor that contains a future advances clause. The agreement gives the creditor a security interest in a \$700,000 inventory-picking robot to secure repayment of a loan made to the debtor. The parties contemplate that the debtor will, from time to time, borrow more money, and when the debtor does, the machine will stand as collateral to secure the further indebtedness, without new paperwork.
- Example 2: A debtor signs a security agreement with a bank to buy a car. The security agreement contains a future advances clause. A

11. A lien that is expanded to cover any additional property that is acquired by the debtor while the debt is outstanding.

few years later, the bank sends the debtor a credit card. Two years go by: the car is paid for, but the credit card is in default. The bank seizes the car. “Whoa!” says the debtor. “I paid for the car.” “Yes,” says the bank, “but it was collateral for all future indebtedness you ran up with us. Check out your loan agreement with us and UCC Section 9-204(c), especially Comment 5.”

See [Figure 28.2 "Tangibles and Intangibles as Collateral"](#).

Figure 28.2 Tangibles and Intangibles as Collateral

Attachment of the Security Interest In General

Attachment¹² is the term used to describe when a security interest becomes enforceable against the debtor with respect to the collateral. In [Figure 28.1 "The Grasping Hand"](#), "Attachment" is the outreached hand that is prepared, if the debtor defaults, to grasp the collateral. Uniform Commercial Code, Section 9-203(a).

12. The process by which a security interest becomes enforceable against the debtor with respect to the collateral.

Requirements for Attachment

There are three requirements for attachment: (1) the secured party gives value; (2) the debtor has rights in the collateral or the power to transfer rights in it to the secured party; (3) the parties have a security agreement “authenticated” (signed) by the debtor, or the creditor has possession of the collateral.

Creditor Gives Value

The creditor, or secured party, must give “value” for the security interest to attach. The UCC, in Section 1-204, provides that

a person gives ‘value’ for rights if he acquires them

(1) in return for a binding commitment to extend credit or for the extension of immediately available credit whether or not drawn upon and whether or not a charge-back is provided for in the event of difficulties in collection; or

(2) as security for or in total or partial satisfaction of a pre-existing claim; or

(3) by accepting delivery pursuant to a pre-existing contract for purchase; or

(4) generally, in return for any consideration sufficient to support a simple contract.

Suppose Deborah owes Carl \$3,000. She cannot repay the sum when due, so she agrees to give Carl a security interest in her automobile to the extent of \$3,000 in return for an extension of the time to pay. That is sufficient value.

Debtor’s Rights in Collateral

The debtor must have rights in the collateral. Most commonly, the debtor owns the collateral (or has some ownership interest in it). The rights need not necessarily be the immediate right to possession, but they must be rights that can be conveyed. Uniform Commercial Code, Section 9-203(b)(2). A person can’t put up as collateral property she doesn’t own.

Security Agreement (Contract) or Possession of Collateral by Creditor

The debtor most often signs the written security agreement, or contract. The UCC says that “the debtor [must have] authenticated a security agreement that provides a description of the collateral....” “Authenticating” (or “signing,” “adopting,” or “accepting”) means to sign or, in recognition of electronic commercial transactions, “to execute or otherwise adopt a symbol, or encrypt or similarly process a record...with the present intent of the authenticating person to identify the person and adopt or accept a record.” The “record” is the modern UCC’s substitution for the term “writing.” It includes information electronically stored or on paper. Uniform Commercial Code, Section 9-102, Official Comment 9. Here is a free example of a security agreement online: Docstoc, “Free Business Templates—Sample Open-Ended Security Agreement,” <http://www.docstoc.com/docs/271920/Free-Business-Templates—Sample-Open-Ended-Security-Agreement>.

The “authenticating record” (the signed security agreement) is *not* required in some cases. It is not required if the debtor makes a **pledge**¹³ of the collateral—that is, delivers it to the creditor for the creditor to possess. For example, upon a creditor’s request of a debtor for collateral to secure a loan of \$3,000, the debtor offers up his stamp collection. The creditor says, “Fine, have it appraised (at your expense) and show me the appraisal. If it comes in at \$3,000 or more, I’ll take your stamp collection and lock it in my safe until you’ve repaid me. If you don’t repay me, I’ll sell it.” A creditor could take possession of any goods and various kinds of paper, tangible or intangible. In commercial transactions, it would be common for the creditor to have possession of—actually or virtually—certified securities, deposit accounts, electronic chattel paper, investment property, or other such paper or electronic evidence of value. Uniform Commercial Code, Section 9-203(b)(3)(B-D).

Again, [Figure 28.1 "The Grasping Hand"](#) diagrams the attachment, showing the necessary elements: the creditor gives value, the debtor has rights in collateral, and there is a security agreement signed (authenticated) by the debtor. If the debtor defaults, the creditor’s “hand” will grab (repossess) the collateral.

Perfection of the Security Interest

As between the debtor and the creditor, attachment is fine: if the debtor defaults, the creditor will repossess the goods and—usually—sell them to satisfy the outstanding obligation. But unless an additional set of steps is taken, the rights of the secured party might be subordinated to the rights of other secured parties, certain lien creditors, bankruptcy trustees, and buyers who give value and who do not know of the security interest. **Perfection**¹⁴ is the secured party’s way of announcing the security interest to the rest of the world. It is the secured party’s claim on the collateral.

13. The delivery of goods to a creditor as security for the debt.

14. The process by which a secured party announces to the world her secured interest in particular goods.

There are five ways a creditor may perfect a security interest: (1) by filing a financing statement, (2) by taking or retaining possession of the collateral, (3) by taking control of the collateral, (4) by taking control temporarily as specified by the UCC, or (5) by taking control automatically.

Perfection by Filing

“Except as otherwise provided...a financing statement must be filed to perfect all security agreements.”Uniform Commercial Code, Section 9-310(a).

The Financing Statement

A **financing statement**¹⁵ is a simple notice showing the creditor’s general interest in the collateral. It is what’s filed to establish the creditor’s “dibs.”

Contents of the Financing Statement

It may consist of the security agreement itself, as long as it contains the information required by the UCC, but most commonly it is much less detailed than the security agreement: it “indicates merely that a person may have a security interest in the collateral[.]...Further inquiry from the parties concerned will be necessary to disclose the full state of affairs.”Uniform Commercial Code, Section 9-502, Official Comment 2. The financing statement must provide the following information:

- The debtor’s name. Financing statements are indexed under the debtor’s name, so getting that correct is important. Section 9-503 of the UCC describes what is meant by “name of debtor.”
- The secured party’s name.
- An “indication” of what collateral is covered by the financing statement.Uniform Commercial Code, Section 9-502(a). It may describe the collateral or it may “indicate that the financing statement covers all assets or all personal property” (such generic references are not acceptable in the security agreement but are OK in the financing statement).Uniform Commercial Code, Section 9-504. If the collateral is real-property-related, covering timber to be cut or fixtures, it must include a description of the real property to which the collateral is related.Uniform Commercial Code, Section 9-502(b).

15. Filing of a notice in the appropriate state office to perfect a security interest.

The form of the financing statement may vary from state to state, but see [Figure 28.3 "UCC-1 Financing Statement"](#) for a typical financing statement. Minor errors or omissions on the form will not make it ineffective, but the debtor’s signature is

required unless the creditor is authorized by the debtor to make the filing without a signature, which facilitates paperless filing. Uniform Commercial Code, Section 9-506; Uniform Commercial Code, Section, 9-502, Comment 3.

Figure 28.3 UCC-1 Financing Statement

This **UCC-1 FINANCING STATEMENT** is presented for filing pursuant to the WASHINGTON UNIFORM COMMERCIAL CODE, chapter 62A.9 RCW, to perfect a security interest in the below named collateral.

PLEASE TYPE FORM Filing fee: \$12.00.

1. DEBTOR(S) (see instruction #2)
 PERSONAL (see instruction #2) (name, middle name and address)
 BUSINESS (legal business name and address)

2. FOR OFFICE USE ONLY - DO NOT WRITE IN THIS BOX

TRADE NAME, DBA, AKA:

3. SECURED PARTY(IES) (name and address)

4. ASSIGNEE(S) OF SECURED PARTY(IES) if applicable (name and address)

5. SECURED PARTY CONTACT PERSON: _____ Phone: _____

6. CHECK ONLY IF APPLICABLE: (For definitions of TRANSMITTING UTILITY AND PRODUCTS OF COLLATERAL, see instruction sheet.)
 Debtor is a Transmitting Utility Products of Collateral are also covered

7. THIS FINANCING STATEMENT covers the following collateral: (Attach additional 8-1/2"x 11" sheet(s) if needed)

8. RETURN ACKNOWLEDGEMENT COPY TO: (name and address)

9. FILE WITH:
 UNIFORM COMMERCIAL CODE
 DEPARTMENT OF LICENSING
 P.O. BOX 9660
 OLYMPIA, WA 98507-9660
 (206) 753-2523

MAKE CHECKS PAYABLE TO THE DEPARTMENT OF LICENSING

10. FOR OFFICE USE ONLY - IMAGES TO BE FILMED

11. If collateral is described below, this statement may be signed by the Secured Party instead of the Debtor. Please check the appropriate box, complete the adjacent lines and Item 13. If collateral is:
 a. already subject to a security interest in another jurisdiction when it was brought into this state or when the debtor's location was changed to this state. (complete adjacent lines 1 and 2)
 b. proceeds of the original collateral described above in which a security interest was perfected. (complete adjacent lines 1 and 2)
 c. listed on a filing which has lapsed. (complete adjacent lines 1 and 2)
 d. acquired after a change of name, identity, or corporate structure of the debtor(s). (complete adjacent lines 1, 2 and 3)

12. DEBTOR NAME(S) AND SIGNATURE(S):

TYPE NAME(S) OF DEBTOR(S) AS IT APPEARS IN BOX 1. _____
 SIGNATURE(S) OF DEBTOR(S) _____
 SIGNATURE(S) OF DEBTOR(S) _____

13. SECURED PARTY NAME(S) AND SIGNATURE(S) ARE REQUIRED IF BOX 11 HAS BEEN COMPLETED.

TYPE NAME(S) OF SECURED PARTY(IES) AS IT APPEARS IN BOX 3 OR 4. _____
 SIGNATURE(S) OF SECURED PARTY(IES) _____
 SIGNATURE(S) OF SECURED PARTY(IES) _____

FORM APPROVED FOR USE IN THE STATE OF WASHINGTON (8/7/93)
 (WASHINGTON UCC-1)
 COPY 1 - FILING OFFICER-INDEX

Duration of the Financing Statement

Generally, the financing statement is effective for five years; a **continuation statement**¹⁶ may be filed within six months before the five-year expiration date, and it is good for another five years. Uniform Commercial Code, Section 9-515. Manufactured-home filings are good for thirty years. When the debtor's obligation is satisfied, the secured party files a **termination statement**¹⁷ if the collateral was consumer goods; otherwise—upon demand—the secured party sends the debtor a termination statement. Uniform Commercial Code, Section 9-513.

Debtor Moves out of State

The UCC also has rules for continued perfection of security interests when the debtor—whether an individual or an association (corporation)—moves from one state to another. Generally, an interest remains perfected until the earlier of when

16. An amendment of a financing statement that identifies, by its file number, the initial financing statement to which it relates and that indicates that it is a continuation statement for, or that it is filed to continue the effectiveness of, the identified financing statement.
17. The notice from a creditor that the debtor's obligations are discharged.

the perfection would have expired or for four months after the debtor moves to a new jurisdiction. Uniform Commercial Code, Section 9-316.

Where to File the Financing Statement

For most real-estate-related filings—ore to be extracted from mines, agricultural collateral, and fixtures—the place to file is with the local office that files mortgages, typically the county auditor’s office. Uniform Commercial Code, Section 9-501. For other collateral, the filing place is as duly authorized by the state. In some states, that is the office of the Secretary of State; in others, it is the Department of Licensing; or it might be a private party that maintains the state’s filing system. Uniform Commercial Code, Section 9-501(a)(2). The filing should be made in the state where the debtor has his or her primary residence for individuals, and in the state where the debtor is organized if it is a registered organization. Uniform Commercial Code, Section 9-307(b). The point is, creditors need to know where to look to see if the collateral offered up is already encumbered. In any event, filing the statement in more than one place can’t hurt. The filing office will provide instructions on how to file; these are available online, and electronic filing is usually available for at least some types of collateral.

Exemptions

Some transactions are exempt from the filing provision. The most important category of exempt collateral is that covered by state certificate of title laws. For example, many states require automobile owners to obtain a certificate of title from the state motor vehicle office. Most of these states provide that it is not necessary to file a financing statement in order to perfect a security interest in an automobile. The reason is that the motor vehicle regulations require any security interests to be stated on the title, so that anyone attempting to buy a car in which a security interest had been created would be on notice when he took the actual title certificate. Uniform Commercial Code, Section 9-303.

Temporary Perfection

The UCC provides that certain types of collateral are automatically perfected but only for a while: “A security interest in certificated securities, or negotiable documents, or instruments is perfected without filing or the taking of possession for a period of twenty days from the time it attaches to the extent that it arises for new value given under an authenticated security agreement.” Uniform Commercial Code, Section 9-312(e). Similar temporary perfection covers negotiable documents or goods in possession of a bailee, and when a security certificate or instrument is delivered to the debtor for sale, exchange, presentation, collection, enforcement, renewal, or registration. Uniform Commercial Code, Section 9-312(f) and (g). After

the twenty-day period, perfection would have to be by one of the other methods mentioned here.

Perfection by Possession

A secured party may perfect the security interest by possession where the collateral is negotiable documents, goods, instruments, money, tangible chattel paper, or certified securities. Uniform Commercial Code, Section 9-313. This is a pledge of assets (mentioned in the example of the stamp collection). No security agreement is required for perfection by possession.

A variation on the theme of pledge is **field warehousing**¹⁸. When the pawnbroker lends money, he takes possession of the goods—the watch, the ring, the camera. But when large manufacturing concerns wish to borrow against their inventory, taking physical possession is not necessarily so easy. The bank does not wish to have shipped to its Wall Street office several tons of copper mined in Colorado. Bank employees perhaps could go west to the mine and take physical control of the copper, but banks are unlikely to employ people and equipment necessary to build a warehouse on the spot. Thus this so-called field pledge is rare.

More common is the field warehouse. The field warehouse can take one of two forms. An independent company can go to the site and put up a temporary structure—for example, a fence around the copper—thus establishing physical control of the collateral. Or the independent company can lease the warehouse facilities of the debtor and post signs indicating that the goods inside are within its sale custody. Either way, the goods are within the physical possession of the field warehouse service. The field warehouse then segregates the goods secured to the particular bank or finance company and issues a warehouse receipt to the lender for those goods. The lender is thus assured of a security interest in the collateral.

Perfection by Control

“A security interest in investment property, deposit accounts, letter-of-credit rights, or electronic chattel paper may be perfected by control of the collateral.” Uniform Commercial Code, Section 9-314. “Control” depends on what the collateral is. If it’s a checking account, for example, the bank with which the deposit account is maintained has “control”: the bank gets a security interest automatically because, as Official Comment 3 to UCC Section 9-104 puts it, “all actual and potential creditors of the debtor are always on notice that the bank with which the debtor’s deposit account is maintained may assert a claim against the deposit account.” “Control” of electronic chattel paper of investment property, and of letter-of-credit rights is detailed in Sections 9-105, 9-106, and 9-107. Obtaining

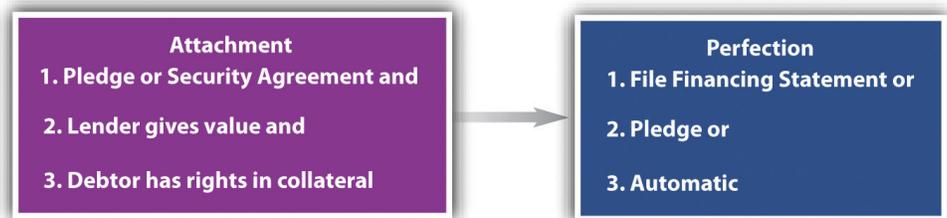

18. Mortgage arrangement in which a lender secures its loan with a lien on items stored in a warehouse or at the debtor’s place of business, with access to the items controlled by the lender, who releases goods as they are paid for by the borrower.

“control” means that the creditor has taken whatever steps are necessary, given the manner in which the items are held, to place itself in a position where it can have the items sold, without further action by the owner. Uniform Commercial Code, Section 8-106, Official Comment 1.

Automatic Perfection

The fifth mechanism of perfection is addressed in Section 9-309 of the UCC: there are several circumstances where a security interest is perfected upon mere attachment. The most important here is **automatic perfection**¹⁹ of a purchase-money security interest given in consumer goods. If a seller of consumer goods takes a PMSI in the goods sold, then perfection of the security interest is automatic. But the seller may file a financing statement and faces a risk if he fails to file and the consumer debtor sells the goods. Under Section 9-320(b), a buyer of consumer goods takes free of a security interest, even though perfected, if he buys without knowledge of the interest, pays value, and uses the goods for his personal, family, or household purposes—unless the secured party had first filed a financing statement covering the goods.

Figure 28.4 Attachment and Perfection

19. Perfection by mere attachment.

KEY TAKEAWAY

A creditor may be secured—allowed to take the debtor’s property upon debtor’s default—by agreement between the parties or by operation of law. The law governing agreements for personal property security is Article 9 of the UCC. The creditor’s first step is to attach the security interest. This is usually accomplished when the debtor, in return for value (a loan or credit) extended from the creditor, puts up as collateral some valuable asset in which she has an interest and authenticates (signs) a security agreement (the contract) giving the creditor a security interest in collateral and allowing that the creditor may take it if the debtor defaults. The UCC lists various kinds of assets that can be collateralized, ranging from tangible property (goods), to assets only able to be manifested by paper (indispensable paper), to intangible assets (like patent rights). Sometimes no security agreement is necessary, mostly if the creditor takes possession of the collateral. After attachment, the prudent creditor will want to perfect the security interest to make sure no other creditors claim an interest in the collateral. Perfection is most often accomplished by filing a financing statement in the appropriate place to put the world on notice of the creditor’s interest. Perfection can also be achieved by a pledge (possession by the secured creditor) or by “control” of certain assets (having such control over them as to be able to sell them if the debtor defaults). Perfection is automatic temporarily for some items (certified securities, instruments, and negotiable documents) but also upon mere attachment to purchase-money security interests in consumer goods.

EXERCISES

1. Why is a creditor ill-advised to be unsecured?
2. Elaine bought a computer for her use as a high school teacher, the school contributing one-third of its cost. Elaine was compelled to file for bankruptcy. The computer store claimed it had perfected its interest by mere attachment, and the bankruptcy trustee claimed the computer as an asset of Elaine's bankruptcy estate. Who wins, and why?
3. What is the general rule governing where financing statements should be filed?
4. If the purpose of perfection is to alert the world to the creditor's claim in the collateral, why is perfection accomplishable by possession alone in some cases?
5. Contractor pawned a power tool and got a \$200 loan from Pawnbroker. Has there been a perfection of a security interest?

28.2 Priorities

LEARNING OBJECTIVES

1. Understand the general rule regarding who gets priority among competing secured parties.
2. Know the immediate exceptions to the general rule—all involving PMSIs.
3. Understand the basic ideas behind the other exceptions to the general rule.

Priorities: this is the money question. Who gets what when a debtor defaults? Depending on how the priorities in the collateral were established, even a secured creditor may walk away with the collateral or with nothing. Here we take up the general rule and the exceptions.

General Rule

The general rule regarding priorities is, to use a quotation attributed to a Southern Civil War general, the one who wins “gets there firstest with the mostest.” The first to do the best job of perfecting wins. The Uniform Commercial Code (UCC) creates a race of diligence among competitors.

Application of the Rule

If both parties have perfected, the first to perfect wins. If one has perfected and one attached, the perfected party wins. If both have attached without perfection, the first to attach wins. If neither has attached, they are unsecured creditors. Let’s test this general rule against the following situations:

1. Rosemary, without having yet lent money, files a financing statement on February 1 covering certain collateral owned by Susan—Susan’s fur coat. Under UCC Article 9, a filing may be made before the security interest attaches. On March 1, Erika files a similar statement, also without having lent any money. On April 1, Erika loans Susan \$1,000, the loan being secured by the fur coat described in the statement she filed on March 1. On May 1, Rosemary also loans Susan \$1,000, with the same fur coat as security. Who has priority? Rosemary does, since she filed first, even though Erika actually first extended the loan, which was perfected when made (because she had already filed). This result is

dictated by the rule even though Rosemary may have known of Erika's interest when she subsequently made her loan.

2. Susan cajoles both Rosemary and Erika, each unknown to the other, to loan her \$1,000 secured by the fur coat, which she already owns and which hangs in her coat closet. Erika gives Susan the money a week after Rosemary, but Rosemary has not perfected and Erika does not either. A week later, they find out they have each made a loan against the same coat. Who has priority? Whoever perfects first: the rule creates a race to the filing office or to Susan's closet. Whoever can submit the financing statement or actually take possession of the coat first will have priority, and the outcome does not depend on knowledge or lack of knowledge that someone else is claiming a security interest in the same collateral. But what of the rule that in the absence of perfection, whichever security interest first attached has priority? This is "thought to be of merely theoretical interest," says the UCC commentary, "since it is hard to imagine a situation where the case would come into litigation without [either party] having perfected his interest." And if the debtor filed a petition in bankruptcy, neither unperfected security interest could prevail against the bankruptcy trustee.

To rephrase: An attached security interest prevails over other unsecured creditors (unsecured creditors lose to secured creditors, perfected or unperfected). If both parties are secured (have attached the interest), the first to perfect wins. Uniform Commercial Code, Section 9-322(a)(2). If both parties have perfected, the first to have perfected wins. Uniform Commercial Code, Section 9-322(a)(1).

Exceptions to the General Rule

There are three immediate exceptions to the general rule, and several other exceptions, all of which—actually—make some straightforward sense even if it sounds a little complicated to explain them.

Immediate Exceptions

We call the following three exceptions "immediate" ones because they allow junior filers immediate priority to take their collateral before the debtor's other creditors get it. They all involve purchase-money security interests (PMSIs), so if the debtor defaults, the creditor repossesses the very goods the creditor had sold the debtor.

(1) *Purchase-money security interest in goods (other than inventory or livestock)*. The UCC provides that "a perfected purchase-money security interest in goods other than

inventory or livestock has priority over a conflicting security interest in the same goods...if the purchase-money security interest is perfected when debtor receives possession of the collateral or within 20 days thereafter.”Uniform Commercial Code, Section 9-324(a). The Official Comment to this UCC section observes that “in most cases, priority will be over a security interest asserted under an after-acquired property clause.”

Suppose Susan manufactures fur coats. On February 1, Rosemary advances her \$10,000 under a security agreement covering all Susan’s machinery and containing an after-acquired property clause. Rosemary files a financing statement that same day. On March 1, Susan buys a new machine from Erika for \$5,000 and gives her a security interest in the machine; Erika files a financing statement within twenty days of the time that the machine is delivered to Susan. Who has priority if Susan defaults on her loan payments? Under the PMSI rule, Erika has priority, because she had a PMSI. Suppose, however, that Susan had not bought the machine from Erika but had merely given her a security interest in it. Then Rosemary would have priority, because her filing was prior to Erika’s.

What would happen if this kind of PMSI in noninventory goods (here, equipment) did not get priority status? A prudent Erika would not extend credit to Susan at all, and if the new machine is necessary for Susan’s business, she would soon be out of business. That certainly would not inure to the benefit of Rosemary. It is, mostly, to Rosemary’s advantage that Susan gets the machine: it enhances Susan’s ability to make money to pay Rosemary.

(2) *Purchase-money security interest in inventory.* The UCC provides that a perfected PMSI in inventory has priority over conflicting interests in the same inventory, provided that the PMSI is perfected when the debtor receives possession of the inventory, the PMSI-secured party sends an authenticated notification to the holder of the conflicting interest and that person receives the notice within five years before the debtor receives possession of the inventory, and the notice states that the person sending it has or expects to acquire a PMSI in the inventory and describes the inventory.Uniform Commercial Code, Section 9-324(b). The notice requirement is aimed at protecting a secured party in the typical situation in which incoming inventory is subject to a prior agreement to make advances against it. If the original creditor gets notice that new inventory is subject to a PMSI, he will be forewarned against making an advance on it; if he does not receive notice, he will have priority. It is usually to the earlier creditor’s advantage that her debtor is able to get credit to “floor” (provide) inventory, without selling which, of course, the debtor cannot pay back the earlier creditor.

(3) *Purchase-money security interest in fixtures*. Under UCC Section 9-334(e), a perfected security interest in fixtures has priority over a mortgage if the security interest is a PMSI and the security interest is perfected by a fixture filing before the goods become fixtures or within twenty days after. A mortgagee is usually a bank (the mortgagor is the owner of the real estate, subject to the mortgagee's interest). The bank's mortgage covers the real estate and fixtures, even fixtures added after the date of the mortgage (after-acquired property clause). In accord with the general rule, then, the mortgagee/bank would normally have priority if the mortgage is recorded first, as would a fixture filing if made before the mortgage was recorded. But with the exception noted, the bank's interest is subordinate to the fixture-seller's later-perfected PMSI. Example: Susan buys a new furnace from Heating Co. to put in her house. Susan gave a bank a thirty-year mortgage on the house ten years before. Heating Co. takes back a PMSI and files the appropriate financing statement before or within twenty days of installation. If Susan defaults on her loan to the bank, Heating Co. would take priority over the bank. And why not? The mortgagee has, in the long run, benefited from the improvement and modernization of the real estate. (Again, there are further nuances in Section 9-334 beyond our scope here.) A non-PMSI in fixtures or PMSIs perfected more than twenty days after goods become a fixture loses out to prior recorded interests in the realty.

Other Exceptions

We have noted the three immediate exceptions to the general rule that “the firstest with the mostest” prevails. There are some other exceptions.

Think about how these other exceptions might arise: who might want to take property subject to a security agreement (not including thieves)? That is, Debtor gives Creditor a security interest in, say, goods, while retaining possession. First, *buyers* of various sorts might want the goods if they paid for them; they usually win. Second, *lien creditors* might want the goods (a **lien creditor**²⁰ is one whose claim is based on operation of law—involuntarily against Debtor, and including a trustee in bankruptcy—as opposed to one whose claim is based on agreement); lien creditors may be statutory (landlords, mechanics, bailees) or judicial. Third, a *bankruptcy trustee* representing Debtor's creditors (independent of the trustee's role as a lien creditor) might want to take the goods to sell and satisfy Debtor's obligations to the creditors. Fourth, unsecured creditors; fifth, secured creditors; and sixth, secured and perfected creditors. We will examine some of the possible permutations but are compelled to observe that this area of law has many fine nuances, not all of which can be taken up here.

20. A creditor who is secured by a lien.

First we look at buyers who take priority over, or free of, unperfected security interests. Buyers who take delivery of many types of collateral covered by an

unperfected security interest win out over the hapless secured party who failed to perfect if they give value and don't know of the security interest or agricultural lien. Uniform Commercial Code, Section 9-317(b). A buyer who doesn't give value or who knows of the security interest will not win out, nor will a buyer prevail if the seller's creditor files a financing statement before or within twenty days after the debtor receives delivery of the collateral.

Now we look at buyers who take priority over *perfected* security interests. Sometimes people who buy things even covered by a perfected security interest win out (the perfected secured party loses).

- *Buyers in the ordinary course of business.* “A buyer in the ordinary course of business, other than [one buying farm products from somebody engaged in farming] takes free of a security interest created by the buyer's seller, even if the security interest is perfected and the buyer knows [it].” Uniform Commercial Code, Section 9-320(a). Here the buyer is usually purchasing inventory collateral, and it's OK if he knows the inventory is covered by a security interest, but it's not OK if he knows “that the sale violates a term in an agreement with the secured party.” Uniform Commercial Code, Section 9-320, Comment 3. It would not be conducive to faith in commercial transactions if buyers of inventory generally had to worry whether their seller's creditors were going to repossess the things the buyers had purchased in good faith. For example (based on example 1 to the same comment, UCC 9-320, Official Comment 3), Manufacturer makes appliances and owns manufacturing equipment covered by a perfected security agreement in favor of Lender. Manufacturer sells the equipment to Dealer, whose business is buying and selling used equipment; Dealer, in turn, sells the stuff to Buyer, a buyer in the ordinary course. Does Buyer take free of the security interest? No, because Dealer didn't create it; Manufacturer did.
- Buyers of consumer goods purchased for personal, family, or household use take free of security interests, even if perfected, so long as they buy without knowledge of the security interest, for value, for their own consumer uses, and before the filing of a financing statement covering the goods. This—again—is the rub when a seller of consumer goods perfects by “mere attachment” (automatic perfection) and the buyer of the goods turns around and sells them. For example, Tom buys a new refrigerator from Sears, which perfects by mere attachment. Tom has cash flow problems and sells the fridge to Ned, his neighbor. Ned doesn't know about Sears's security interest and pays a reasonable amount for it. He puts it in his kitchen for home use. Sears cannot repossess the fridge from Ned. If it wanted to protect

itself fully, Sears would have filed a financing statement; then Ned would be out the fridge when the repo men came. Uniform Commercial Code, Section 9-320(b). The “value” issue is interestingly presented in the *Nicolosi* case (Section 28.5 “Cases”).

- *Buyers of farm products.* The UCC itself does not protect buyers of farm products from security interests created by “the person engaged in farming operations who is in the business of selling farm products,” and the result was that sometimes the buyer had to pay twice: once to the farmer and again to the lender whom the farmer didn’t pay. As a result, Congress included in its 1985 Farm Security Act, 7 USC 1631, Section 1324, this language: “A buyer who in the ordinary course of business buys a farm product from a seller engaged in farming operations shall take free of a security interest created by the seller, even though the security interest is perfected; and the buyer knows of the existence of such interest.”

There are some other exceptions, beyond our scope here.

Lien Creditors

Persons (including bankruptcy trustees) who become lien creditors *before* the security interest is perfected win out—the unperfected security interest is subordinate to lien creditors. Persons who become lien creditors *after* the security interest is perfected lose (subject to some nuances in situations where the lien arises between attachment by the creditor and the filing, and depending upon the type of security interest and the type of collateral). Uniform Commercial Code, Section 9-317(a)(2)(B) and 9-317(e). More straightforwardly, perhaps, a lien securing payment or performance of an obligation for services or materials furnished with respect to goods by a person in the ordinary course of business has priority over other security interests (unless a statute provides otherwise). Uniform Commercial Code, Section 9-333. This is the bailee or “material man” (one who supplies materials, as to build a house) with a lien situation. Garage Mechanic repairs a car in which Owner has previously given a perfected security interest to Bank. Owner doesn’t pay Bank. Bank seeks to repossess the car from Mechanic. It will have to pay the Mechanic first. And why not? If the car was not running, Bank would have to have it repaired anyway.

Bankruptcy Trustee

To what extent can the bankruptcy trustee take property previously encumbered by a security interest? It depends. If the security interest was not perfected at the time of filing for bankruptcy, the trustee can take the collateral.¹¹ United States Code, Section 544 (Bankruptcy Act). If it was perfected, the trustee can’t take it,

subject to rules on preferential transfers: the Bankruptcy Act provides that the trustee can avoid a transfer of an interest of the debtor in property—including a security interest—(1) to or for the benefit of a creditor, (2) on or account of an antecedent debt, (3) made while the debtor was insolvent, (4) within ninety days of the bankruptcy petition date (or one year, for “insiders”—like relatives or business partners), (5) which enables the creditor to receive more than it would have in the bankruptcy. United States Code, Section 547. There are further bankruptcy details beyond our scope here, but the short of it is that sometimes creditors who think they have a valid, enforceable security interest find out that the bankruptcy trustee has snatched the collateral away from them.

Deposit accounts perfected by control. A security interest in a deposit account (checking account, savings account, money-market account, certificate of deposit) takes priority over security interests in the account perfected by other means, and under UCC Section 9-327(3), a bank with which the deposit is made takes priority over all other conflicting security agreements. Uniform Commercial Code, Section 9-327(1). For example, a debtor enters into a security agreement with his sailboat as collateral. The creditor perfects. The debtor sells the sailboat and deposits the proceeds in his account with a bank; normally, the creditor’s interest would attach to the proceeds. The debtor next borrows money from the bank, and the bank takes a security interest in the debtor’s account by control. The debtor defaults. Who gets the money representing the sailboat’s proceeds? The bank does. The rationale: “this...enables banks to extend credit to their depositors without the need to examine [records] to determine whether another party might have a security interest in the deposit account.” Uniform Commercial Code, Section 9-328, Official Comment 3 and 4.

KEY TAKEAWAY

Who among competing creditors gets the collateral if the debtor defaults? The general rule on priorities is that the first to secure most completely wins: if all competitors have perfected, the first to do so wins. If one has perfected and the others have not, the one who perfects wins. If all have attached, the first to attach wins. If none have attached, they're all unsecured creditors. To this general rule there are a number of exceptions. Purchase-money security interests in goods and inventory prevail over previously perfected secured parties in the same goods and inventory (subject to some requirements); fixture financiers who file properly have priority over previously perfected mortgagees. Buyers in the ordinary course of business take free of a security interest created by their seller, so long as they don't know their purchase violates a security agreement. Buyers of consumer goods perfected by mere attachment win out over the creditor who declined to file. Buyers in the ordinary course of business of farm products prevail over the farmer's creditors (under federal law, not the UCC). Lien creditors who become such before perfection win out; those who become such after perfection usually lose. Bailees in possession and material men have priority over previous perfected claimants. Bankruptcy trustees win out over unperfected security interests and over perfected ones if they are considered voidable transfers from the debtor to the secured party. Deposit accounts perfected by control prevail over previously perfected secured parties in the same deposit accounts.

EXERCISES

1. What is the general rule regarding priorities for the right to repossess goods encumbered by a security interest when there are competing creditors clamoring for that right?
2. Why does it make good sense to allow purchase-money security creditors in (1) inventory, (2) equipment, and (3) fixtures priority over creditors who perfected before the PMSI was perfected?
3. A buyer in the ordinary course of business is usually one buying inventory. Why does it make sense that such a buyer should take free of a security interest created by his seller?

28.3 Rights of Creditor on Default and Disposition after Repossession

LEARNING OBJECTIVES

1. Understand that the creditor may sue to collect the debt.
2. Recognize that more commonly the creditor will realize on the collateral—repossess it.
3. Know how collateral may be disposed of upon repossession: by sale or by strict foreclosure.

Rights of Creditor on Default

Upon default, the creditor must make an election: to sue, or to repossess.

Resort to Judicial Process

After a debtor's default (e.g., by missing payments on the debt), the creditor could ignore the security interest and bring suit on the underlying debt. But creditors rarely resort to this remedy because it is time-consuming and costly. Most creditors prefer to repossess the collateral and sell it or retain possession in satisfaction of the debt.

Repossession

Section 9-609 of the Uniform Commercial Code (UCC) permits the secured party to take possession of the collateral on default (unless the agreement specifies otherwise):

(a) After default, a secured party may (1) take possession of the collateral; and (2) without removal, may render equipment unusable and dispose of collateral on a debtor's premises.

(b) A secured party may proceed under subsection (a): (1) pursuant to judicial process; or (2) without judicial process, if it proceeds without breach of the peace.

This language has given rise to the flourishing business of professional “repo men” (and women). “Repo” companies are firms that specialize in repossession collateral. They have trained car-lock pickers, in-house locksmiths, experienced repossession

teams, damage-free towing equipment, and the capacity to deliver repossessed collateral to the client's desired destination. Some firms advertise that they have 360-degree video cameras that record every aspect of the repossession. They have "skip chasers"—people whose business it is to track down those who skip out on their obligations, and they are trained not to breach the peace. Here is an example of sophisticated online advertising for a repossession firm: SSR, "Southern & Central Coast California Repossession Services," <http://www.simonsrecovery.com/index.htm>. See *Pantoja-Cahue v. Ford Motor Credit Co.*, a case discussing repossession, in [Section 28.5 "Cases"](#).

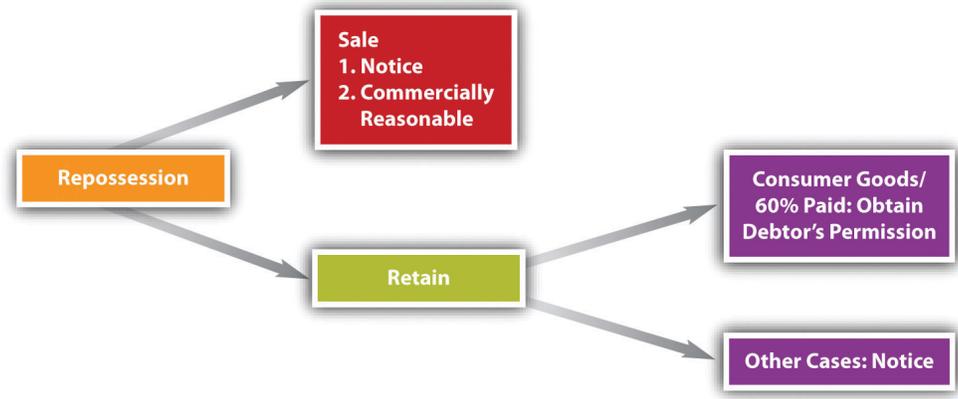

The reference in Section 9-609(a)(2) to "render equipment unusable and dispose of collateral on a debtor's premises" gets to situations involving "heavy equipment [when] the physical removal from the debtor's plant and the storage of collateral pending disposition may be impractical or unduly expensive....Of course...all aspects of the disposition must be commercially reasonable." Uniform Commercial Code, Section 9-609(a)(2), Official Comment 6. Rendering the equipment unusable would mean disassembling some critical part of the machine—letting it sit there until an auction is set up on the premises.

The creditor's agents—the repo people—charge for their service, of course, and if possible the cost of repossession comes out of the collateral when it's sold. A debtor would be better off voluntarily delivering the collateral according to the creditor's instructions, but if that doesn't happen, "self-help"—repossession—is allowed because, of course, the debtor said it would be allowed in the security agreement, so long as the repossession can be accomplished without breach of peace. "Breach of peace" is language that can cover a wide variety of situations over which courts do not always agree. For example, some courts interpret a creditor's taking of the collateral despite the debtor's clear oral protest as a breach of the peace; other courts do not.

Disposition after Repossession

After repossession, the creditor has two options: sell the collateral or accept it in satisfaction of the debt (see [Figure 28.5 "Disposition after Repossession"](#)).

Figure 28.5 *Disposition after Repossession*

Sale

Sale is the usual method of recovering the debt. Section 9-610 of the UCC permits the secured creditor to “sell, lease, license, or otherwise dispose of any or all of the collateral in its present condition or following any commercially reasonable preparation or processing.” The collateral may be sold as a whole or in parcels, at one time or at different times. Two requirements limit the creditor’s power to resell: (1) it must send notice to the debtor and secondary obligor, and (unless consumer goods are sold) to other secured parties; and (2) all aspects of the sale must be “commercially reasonable.” Uniform Commercial Code, Section 9-611; Uniform Commercial Code, Section 9-610. Most frequently the collateral is auctioned off.

Section 9-615 of the UCC describes how the proceeds are applied: first, to the costs of the repossession, including reasonable attorney’s fees and legal expenses as provided for in the security agreement (and it will provide for that!); second, to the satisfaction of the obligation owed; and third, to junior creditors. This again emphasizes the importance of promptly perfecting the security interest: failure to do so frequently subordinates the tardy creditor’s interest to junior status. If there is money left over from disposing of the collateral—a surplus—the debtor gets that back. If there is still money owing—a deficiency—the debtor is liable for that. In Section 9-616, the UCC carefully explains how the surplus or deficiency is calculated; the explanation is required in a consumer goods transaction, and it has to be sent to the debtor after the disposition.

Strict Foreclosure

Because resale can be a bother (or the collateral is appreciating in value), the secured creditor may wish simply to accept the collateral in full satisfaction or partial satisfaction of the debt, as permitted in UCC Section 9-620(a). This is known as **strict foreclosure**²¹. The debtor must consent to letting the creditor take the collateral without a sale in a “record authenticated after default,” or after default the creditor can send the debtor a proposal for the creditor to accept the collateral, and the proposal is effective if not objected to within twenty days after it’s sent.

The strict foreclosure provisions contain a safety feature for consumer goods debtors. If the debtor has paid at least 60 percent of the debt, then the creditor may not use strict foreclosure—unless the debtor signs a statement after default renouncing his right to bar strict foreclosure and to force a sale. Uniform Commercial Code, 9-620(e); Uniform Commercial Code, Section 9-624. A consumer who refuses to sign such a statement thus forces the secured creditor to sell the collateral under Section 9-610. Should the creditor fail to sell the goods within ninety days after taking possession of the goods, he is liable to the debtor for the value of the goods in a conversion suit or may incur the liabilities set forth in Section 9-625, which provides for minimum damages for the consumer debtor. Recall that the UCC imposes a duty to act in good faith and in a commercially reasonable manner, and in most cases with reasonable notification. Uniform Commercial Code, Section 1-203. See [Figure 28.5 "Disposition after Repossession"](#).

Foreclosure on Intangible Collateral

A secured party’s repossession of inventory or equipment can disrupt or even close a debtor’s business. However, when the collateral is intangible—such as accounts receivable, general intangibles, chattel paper, or instruments—collection by a secured party after the debtor’s default may proceed without interrupting the business. Section 9-607 of the UCC provides that on default, the secured party is entitled to notify the third party—for example, a person who owes money on an account—that payment should be made to him. The secured party is accountable to the debtor for any surplus, and the debtor is liable for any deficiency unless the parties have agreed otherwise.

As always in parsing the UCC here, some of the details and nuances are necessarily omitted because of lack of space or because a more detailed analysis is beyond this book’s scope.

21. The creditor takes the collateral, discharges the debtor, and has no right to seek any deficiency.

KEY TAKEAWAY

Upon default, the creditor may bring a lawsuit against the debtor to collect a judgment. But the whole purpose of secured transactions is to avoid this costly and time-consuming litigation. The more typical situation is that the creditor repossesses the collateral and then either auctions it off (sale) or keeps it in satisfaction of the debt (strict foreclosure). In the former situation, the creditor may then proceed against the debtor for the deficiency. In consumer cases, the creditor cannot use strict foreclosure if 60 percent of the purchase price has been paid.

EXERCISES

1. Although a creditor could sue the debtor, get a judgment against it, and collect on the judgment, usually the creditor repossesses the collateral. Why is repossession the preferred method of realizing on the security?
2. Why is repossession allowed *so long as* it can be done without a breach of the peace?
3. Under what circumstances is strict foreclosure not allowed?

28.4 Suretyship

LEARNING OBJECTIVES

1. Understand what a surety is and why sureties are used in commercial transactions.
2. Know how suretyships are created.
3. Recognize the general duty owed by the surety to the creditor, and the surety's defenses.
4. Recognize the principal obligor's duty to the surety, and the surety's rights against the surety.
5. Understand the rights among cosureties.

Definition, Types of Sureties, and Creation of the Suretyship

Definition

Suretyship is the second of the three major types of consensual security arrangements noted at the beginning of this chapter (personal property security, suretyship, real property security)—and a common one. Creditors frequently ask the owners of small, closely held companies to guarantee their loans to the company, and parent corporations also frequently are guarantors of their subsidiaries' debts. The earliest sureties were friends or relatives of the principal debtor who agreed—for free—to lend their guarantee. Today most sureties in commercial transaction are insurance companies (but insurance is not the same as suretyship).

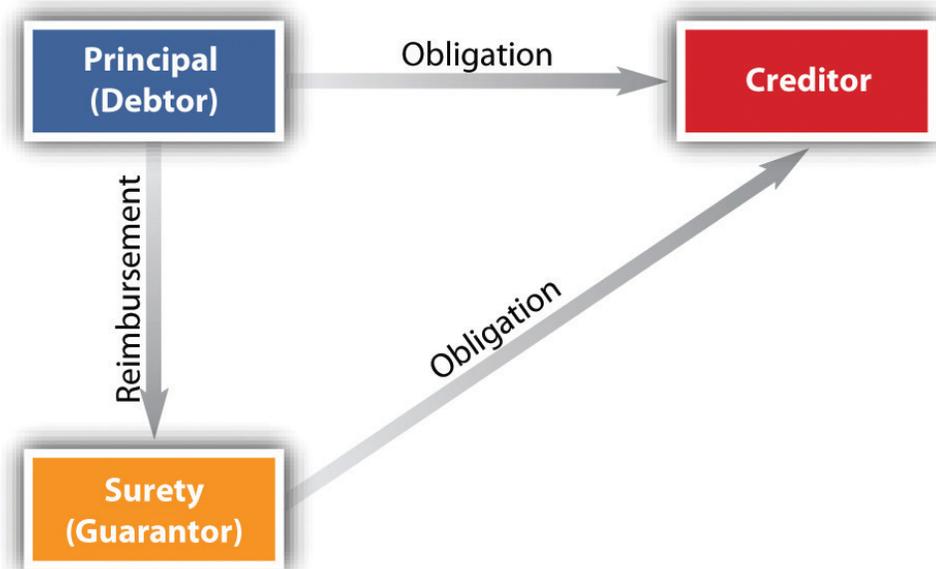

A **surety**²² is one who promises to pay or perform an obligation owed by the **principal debtor**²³, and, strictly speaking, the surety is primarily liable on the debt: the creditor can demand payment from the surety when the debt is due. The creditor is the person to whom the principal debtor (and the surety, strictly speaking) owes an obligation. Very frequently, the creditor requires first that the debtor put up collateral to secure indebtedness, and—in addition—that the debtor engage a surety to make extra certain the creditor is paid or performance is made. For example, David Debtor wants Bank to loan his corporation, David Debtor, Inc., \$100,000. Bank says, “Okay, Mr. Debtor, we’ll loan the corporation money, but we want its computer equipment as security, and we want you personally to guarantee the debt if the corporation can’t pay.” Sometimes, though, the surety and the principal debtor may have no agreement between each other; the surety might have struck a deal with the creditor to act as surety without the consent or knowledge of the principal debtor.

22. One who promises to act or pay upon the default of another: a guarantor.

23. The person whose debt is guaranteed by a surety.

A **guarantor**²⁴ also is one who guarantees an obligation of another, and for practical purposes, therefore, *guarantor* is usually synonymous with *surety*—the terms are used pretty much interchangeably. But here’s the technical difference: a surety is usually a party to the original contract and signs her (or his, or its) name to the original agreement along with the surety; the consideration for the principal’s contract is the same as the surety’s consideration—she is bound on the contract from the very start, and she is also expected to know of the principal debtor’s default so that the creditor’s failure to inform her of it does not discharge her of any liability. On the other hand, a guarantor usually does not make his agreement with the creditor at the same time the principal debtor does: it’s a separate contract requiring separate consideration, and if the guarantor is not informed of the principal debtor’s default, the guarantor can claim discharge on the obligation to the extent any failure to inform him prejudices him. But, again, as the terms are mostly synonymous, *surety* is used here to encompass both.

Figure 28.6 Defenses of Principal Debtor and Surety

Types of Suretyship

Where there is an interest, public or private, that requires protection from the possibility of a default, sureties are engaged. For example, a landlord might require that a commercial tenant not only put up a security deposit but also show evidence that it has a surety on line ready to stand for three months’ rent if the tenant defaults. Often, a municipal government will want its road contractor to show it has a surety available in case, for some reason, the contractor cannot complete the project. Many states require general contractors to have bonds, purchased from

24. One who promises to pay or perform a contract obligation upon the default of another; a surety.

insurance companies, as a condition of getting a contractor's license; the insurance company is the surety—it will pay out if the contractor fails to complete work on the client's house. These are types of a **performance bond**²⁵. A judge will often require that a criminal defendant put up a bond guaranteeing his appearance in court—that's a type of suretyship where the bail-bonder is the surety—or that a plaintiff put up a bond indemnifying the defendant for the costs of delays caused by the lawsuit—a **judicial bond**²⁶. A bank will take out a bond on its employees in case they steal money from the bank—the bank teller, in this case, is the principal debtor (a **fidelity bond**²⁷). However, as we will see, sureties do not anticipate financial loss like insurance companies do: the surety expects, mostly, to be repaid if it has to perform. The principal debtor goes to an insurance company and buys the bond—the suretyship policy. The cost of the premium depends on the surety company, the type of bond applied for, and the applicant's financial history. A sound estimate of premium costs is 1 percent to 4 percent, but if a surety company classifies an applicant as high risk, the premium falls between 5 percent and 20 percent of the bond amount. When the purchaser of real estate agrees to assume the seller's mortgage (promises to pay the mortgage debt), the seller then becomes a surety: unless the mortgagee releases the seller (not likely), the seller has to pay if the buyer defaults.

Creation of the Suretyship

Suretyship can arise only through contract. The general principles of contract law apply to suretyship. Thus a person with the general capacity to contract has the power to become a surety. Consideration is required for a suretyship contract: if Debtor asks a friend to act as a surety to induce Creditor to make Debtor a loan, the consideration Debtor gives Creditor also acts as the consideration Friend gives. Where the suretyship arises *after* Creditor has already extended credit, new consideration would be required (absent application of the doctrine of promissory estoppel *American Druggists' Ins. Co. v. Shoppe*, 448 N.W.2d 103, Minn. App. (1989)). You may recall from the chapters on contracts that the promise by one person to pay or perform for the debts or defaults of another must be evidenced by a writing under the statute of frauds (subject to the "main purpose" exception).

Suretyship contracts are affected to some extent by government regulation. Under a 1985 Federal Trade Commission Credit Practices Rule, creditors are prohibited from misrepresenting a surety's liability. Creditors must also give the surety a notice that explains the nature of the obligation and the potential liability that can arise if a person cosigns on another's debt. Here is an example of the required notice: Federal Trade Commission, "Facts for Consumers: The Credit Practices Rule," <http://www.ftc.gov/bcp/edu/pubs/consumer/credit/cre12.shtm>.

25. A surety bond that ensures a property owner (as a developer or municipality) of the completion of a construction contract or payment of actual damages to the extent of the bond in the event that the contractor fails to complete it.

26. A bond filed with the court as a guarantee. For example, a party to a court action may post a judicial bond to guarantee payment of a verdict while an appeal is being considered.

27. An assurance, generally purchased by an employer, to cover employees who are entrusted with valuable property or funds.

Duties and Rights of the Surety

Duties of the Surety

Upon the principal debtor's default, the surety is contractually obligated to perform unless the principal herself or someone on her behalf discharges the obligation. When the surety performs, it must do so in good faith. Because the principal debtor's defenses are generally limited, and because—as will be noted—the surety has the right to be reimbursed by the debtor, debtors not infrequently claim the surety acted in bad faith by doing things like failing to make an adequate investigation (to determine if the debtor really defaulted), overpaying claims, interfering with the contact between the surety and the debtor, and making unreasonable refusals to let the debtor complete the project. The case *Fidelity and Deposit Co. of Maryland v. Douglas Asphalt Co.*, in [Section 28.5 "Cases"](#), is typical.

Rights of the Surety

The surety has four main rights stemming from its obligation to answer for the debt or default of the principal debtor.

Exoneration

If, at the time a surety's obligation has matured, the principal can satisfy the obligation but refuses to do so, the surety is entitled to **exoneration**²⁸—a court order requiring the principal to perform. It would be inequitable to force the surety to perform and then to have to seek **reimbursement**²⁹ from the principal if all along the principal is able to perform.

Reimbursement

If the surety must pay the creditor because the principal has defaulted, the principal is obligated to reimburse the surety. The amount required to be reimbursed includes the surety's reasonable, good-faith outlays, including interest and legal fees.

Subrogation

Suppose the principal's duty to the creditor is fully satisfied and that the surety has contributed to this satisfaction. Then the surety is entitled to be subrogated to the rights of the creditor against the principal. In other words, the surety stands in the creditor's shoes and may assert against the principal whatever rights the creditor could have asserted had the duty not been discharged. The right of **subrogation**³⁰ includes the right to take secured interests that the creditor obtained from the

28. Relieving of liability.

29. The right of a surety to be repaid by the principal debtor.

30. Substitution of one person for another who has a legal claim or right.

principal to cover the duty. Sarah's Pizzeria owes Martha \$5,000, and Martha has taken a security interest in Sarah's Chevrolet. Eva is surety for the debt. Sarah defaults, and Eva pays Martha the \$5,000. Eva is entitled to have the security interest in the car transferred to her.

Contribution

Two or more sureties who are bound to answer for the principal's default and who should share between them the loss caused by the default are known as **cosureties**³¹. A surety who in performing its own obligation to the creditor winds up paying more than its proportionate share is entitled to **contribution**³² from the cosureties.

Defenses of the Parties

The principal and the surety may have defenses to paying.

Defenses of the Principal

The principal debtor may avail itself of any standard contract defenses as against the creditor, including impossibility, illegality, incapacity, fraud, duress, insolvency, or bankruptcy discharge. However, the surety may contract with the creditor to be liable despite the principal's defenses, and a surety who has undertaken the suretyship with knowledge of the creditor's fraud or duress remains obligated, even though the principal debtor will be discharged. When the surety turns to the principal debtor and demands reimbursement, the latter may have defenses against the surety—as noted—for acting in bad faith.

One of the main reasons creditors want the promise of a surety is to avoid the risk that the principal debtor will go bankrupt: the debtor's bankruptcy is a defense to the debtor's liability, certainly, but that defense cannot be used by the surety. The same is true of the debtor's incapacity: it is a defense available to the principal debtor but not to the surety.

Defenses of the Surety

Generally, the surety may exercise defenses on a contract that would have been available to the principal debtor (e.g., creditor's breach; impossibility or illegality of performance; fraud, duress, or misrepresentation by creditor; statute of limitations; refusal of creditor to accept tender or performance from either debtor or surety.) Beyond that, the surety has some defenses of its own. Common defenses raised by sureties include the following:

31. An arrangement where two or more surety companies directly participate on a bond.

32. The sharing of a loss or payment by two or more persons or sureties.

- *Release of the principal.* Whenever a creditor releases the principal, the surety is discharged, unless the surety consents to remain liable or the creditor expressly reserves her rights against the surety. The creditor's release of the surety, though, does not release the principal debtor because the debtor is liable without regard to the surety's liability.
- *Modification of the contract.* If the creditor alters the instrument sufficiently to discharge the principal, the surety is discharged as well. Likewise, when the creditor and principal modify their contract, a surety who has not consented to the modification is discharged if the surety's risk is materially increased (but not if it is decreased). Modifications include extension of the time of payment, release of collateral (this releases the surety to the extent of the impairment), change in principal debtor's duties, and assignment or delegation of the debtor's obligations to a third party. The surety may consent to modifications.
- *Creditor's failure to perfect.* A creditor who fails to file a financing statement or record a mortgage risks losing the security for the loan and might also inadvertently release a surety, but the failure of the creditor to resort first to collateral is no defense.
- *Statute of frauds.* Suretyship contracts are among those required to be evidenced by some writing under the statute of frauds, and failure to do so may discharge the surety from liability.
- *Creditor's failure to inform surety of material facts within creditor's knowledge affecting debtor's ability to perform* (e.g., that debtor has defaulted several times before).
- *General contract defenses.* The surety may raise common defenses like incapacity (infancy), lack of consideration (unless promissory estoppel can be substituted or unless no separate consideration is necessary because the surety's and debtor's obligations arise at the same time), and creditor's fraud or duress on surety. However, fraud by the principal debtor on the surety to induce the suretyship will not release the surety if the creditor extended credit in good faith; if the creditor knows of the fraud perpetrated by the debtor on the surety, the surety may avoid liability. See [Figure 28.6 "Defenses of Principal Debtor and Surety"](#).

The following are defenses of principal debtor *only*:

- Death or incapacity of principal debtor
- Bankruptcy of principal debtor
- Principal debtor's setoffs against creditor

The following are defenses of *both* principal debtor and surety:

- Material breach by creditor
- Lack of mutual assent, failure of consideration
- Creditor's fraud, duress, or misrepresentation of debtor
- Impossibility or illegality of performance
- Material and fraudulent alteration of the contract
- Statute of limitations

The following are defenses of surety *only*:

- Fraud or duress by creditor on surety
 - Illegality of suretyship contract
 - Surety's incapacity
 - Failure of consideration for surety contract (unless excused)
 - Statute of frauds
 - Acts of creditor or debtor materially affecting surety's obligations:
 - Refusal by creditor to accept tender of performance
 - Release of principal debtor without surety's consent
 - Release of surety
 - Release, surrender, destruction, or impairment of collateral
 - Extension of time on principal debtor's obligation
 - Modification of debtor's duties, place, amount, or manner of debtor's obligations

KEY TAKEAWAY

Creditors often require not only the security of collateral from the debtor but also that the debtor engage a surety. A contract of suretyship is a type of insurance policy, where the surety (insurance company) promises the creditor that if the principal debtor fails to perform, the surety will undertake good-faith performance instead. A difference between insurance and suretyship, though, is that the surety is entitled to reimbursement by the principal debtor if the surety pays out. The surety is also entitled, where appropriate, to exoneration, subrogation, and contribution. The principal debtor and the surety both have some defenses available: some are personal to the debtor, some are joint defenses, and some are personal to the surety.

EXERCISES

1. Why isn't collateral put up by the debtor sufficient security for the creditor—why is a surety often required?
2. How can it be said that sureties do not anticipate financial losses like insurance companies do? What's the difference, and how does the surety avoid losses?
3. Why does the creditor's failure to perfect a security interest discharge the surety from liability? Why doesn't failure of the creditor to resort first to perfected collateral discharge the surety?
4. What is the difference between a guarantor and a surety?

28.5 Cases

Perfection by Mere Attachment; Priorities

In re NICOLOSI

4 UCC Rep. 111 (Ohio 1966)

Preliminary Statement and Issues

This matter is before the court upon a petition by the trustee to sell a diamond ring in his possession free of liens....Even though no pleadings were filed by Rike-Kumler Company, the issue from the briefs is whether or not a valid security interest was perfected in this chattel as consumer goods, superior to the statutory title and lien of the trustee in bankruptcy.

Findings of Fact

The [debtor] purchased from the Rike-Kumler Company, on July 7, 1964, the diamond ring in question, for \$1237.35 [about \$8,500 in 2010 dollars], as an engagement ring for his fiancée. He executed a purchase money security agreement, which was not filed. Also, no financing statement was filed. The chattel was adequately described in the security agreement.

The controversy is between the trustee in bankruptcy and the party claiming a perfected security interest in the property. The recipient of the property has terminated her relationship with the [debtor], and delivered the property to the trustee.

Conclusion of Law, Decision, and Order

If the diamond ring, purchased as an engagement ring by the bankrupt, cannot be categorized as consumer goods, and therefore exempted from the notice filing requirements of the Uniform Commercial Code as adopted in Ohio, a perfected security interest does not exist.

No judicial precedents have been cited in the briefs.

Under the commercial code, collateral is divided into tangible, intangible, and documentary categories. Certainly, a diamond ring falls into the tangible category. The classes of tangible goods are distinguished by the primary use intended. Under [the UCC] the four classes [include] “consumer goods,” “equipment,” “farm products” and “inventory.”

The difficulty is that the code provisions use terms arising in commercial circles which have different semantical values from legal precedents. Does the fact that the purchaser bought the goods as a special gift to another person signify that it was not for his own “personal, family or household purposes”? The trustee urges that these special facts control under the express provisions of the commercial code.

By a process of exclusion, a diamond engagement ring purchased for one’s fiancée is not “equipment” bought or used in business, “farm products” used in farming operations, or “inventory” held for sale, lease or service contracts. When the [debtor] purchased the ring, therefore, it could only have been “consumer goods” bought “primarily for personal use.” There could be no judicial purpose to create a special class of property in derogation of the statutory principles.

Another problem is implicit, although not covered by the briefs.

By the foregoing summary analysis, it is apparent that the diamond ring, when the interest of the debtor attached, was consumer goods since it could have been no other class of goods. Unless the fiancée had a special status under the code provision protecting a bona fide buyer, without knowledge, for value, of consumer goods, the failure to file a financing statement is not crucial. No evidence has been adduced pertinent to the scienter question.

Is a promise, as valid contractual consideration, included under the term “value”? In other words, was the ring given to his betrothed in consideration of marriage (promise for a promise)? If so, and “value” has been given, the transferee is a “buyer” under traditional concepts.

The Uniform Commercial Code definition of “value”...very definitely covers a promise for a promise. The definition reads that “a person gives ‘value’ for rights if he acquires them...generally in return for any consideration sufficient to support a simple contract.”

It would seem unrealistic, nevertheless, to apply contract law concepts historically developed into the law of marriage relations in the context of new concepts developed for uniform commercial practices. They are not, in reality, the same

juristic manifold. The purpose of uniformity of the code should not be defeated by the obsessions of the code drafters to be all inclusive for secured creditors.

Even if the trustee, in behalf of the unsecured creditors, would feel inclined to insert love, romance and morals into commercial law, he is appearing in the wrong era, and possibly the wrong court.

Ordered, that the Rike-Kumler Company holds a perfected security interest in the diamond engagement ring, and the security interest attached to the proceeds realized from the sale of the goods by the trustee in bankruptcy.

CASE QUESTIONS

1. Why didn't the jewelry store, Rike-Kumler, file a financing statement to protect its security interest in the ring?
2. How did the bankruptcy trustee get the ring?
3. What argument did the trustee make as to why he should be able to take the ring as an asset belonging to the estate of the debtor? What did the court determine on this issue?

Repossession and Breach of the Peace

Pantoja-Cahue v. Ford Motor Credit Co.

872 N.E.2d 1039 (Ill. App. 2007)

Plaintiff Mario Pantoja-Cahue filed a six-count complaint seeking damages from defendant Ford Motor Credit Company for Ford's alleged breach of the peace and "illegal activities" in repossessing plaintiff's automobile from his locked garage....

In August 2000, plaintiff purchased a 2000 Ford Explorer from auto dealer Webb Ford. Plaintiff, a native Spanish speaker, negotiated the purchase with a Spanish-speaking salesperson at Webb. Plaintiff signed what he thought was a contract for the purchase and financing of the vehicle, with monthly installment payments to be made to Ford. The contract was in English. Some years later, plaintiff discovered the contract was actually a lease, not a purchase agreement. Plaintiff brought suit against Ford and Webb on August 22, 2003, alleging fraud. Ford brought a replevin action against plaintiff asserting plaintiff was in default on his obligations under the lease. In the late night/early morning hours of March 11-12, 2004, repossession

agents [from Doe Repossession Services] entered plaintiff's locked garage and removed the car...

Plaintiff sought damages for Ford and Doe's "unlawful activities surrounding the wrongful repossession of Plaintiff's vehicle." He alleged Ford and Doe's breaking into plaintiff's locked garage to effectuate the repossession and Ford's repossession of the vehicle knowing that title to the car was the subject of ongoing litigation variously violated section 2A-525(3) of the [Uniform Commercial] Code (count I against Ford), the [federal] Fair Debt Collection Practices Act (count II against Doe),...Ford's contract with plaintiff (count V against Ford) and section 2A-108 of the Code (count VI against Ford and Doe)....

Uniform Commercial Code Section 2A-525(3)

In count I, plaintiff alleged "a breach of the peace occurred as [Ford]'s repossession agent broke into Plaintiff's locked garage in order to take the vehicle" and Ford's agent "repossessed the subject vehicle by, among other things, breaking into Plaintiff's locked garage and causing substantial damage to Plaintiff's personal property in violation of [section 2A-525(3)]":

"After a default by the lessee under the lease contract * * * or, if agreed, after other default by the lessee, the lessor has the right to take possession of the goods. * * *

The lessor may proceed under subsection (2) without judicial process if it can be done without breach of the peace or the lessor may proceed by action." [emphasis added.]

[U]pon a lessee's default, a lessor has the right to repossess the leased goods in one of two ways: by using the judicial process or, if repossession could be accomplished without a breach of the peace, by self-help [UCC Section 2A-525(3)]. "If a breach of the peace is likely, a properly instituted civil action is the appropriate remedy." [Citation] (interpreting the term "breach of the peace" in the context of section 9-503 of the Code, which provides for the same self-help repossession as section 2A-525 but for secured creditors rather than lessors).

Taking plaintiff's well-pleaded allegations as true, Ford resorted to self-help, by employing an agent to repossess the car and Ford's agent broke into plaintiff's locked garage to effectuate the repossession. Although plaintiff's count I allegations are minimal, they are sufficient to plead a cause of action for a violation of section 2A-525(3) if breaking into a garage to repossess a car is, as plaintiff alleged, a breach of the peace. Accordingly, the question here is whether breaking into a locked

garage to effectuate a repossession is a breach of the peace in violation of section 2A-525(3).

There are no Illinois cases analyzing the meaning of the term “breach of the peace” as used in the lessor repossession context in section 2A-525(3). However, there are a few Illinois cases analyzing the term as used in section 9-503 of the Code, which contains a similar provision providing that a secured creditor may, upon default by a debtor, repossess its collateral either “(1) pursuant to judicial process; or (2) without judicial process, if it proceeds without breach of the peace.” The seminal case, and the only one of any use in resolving the issue, is *Chrysler Credit Corp. v. Koontz*, 277 Ill.App.3d 1078, 214 Ill.Dec. 726, 661 N.E.2d 1171 (1996).

In *Koontz*, Chrysler, the defendant creditor, sent repossession agents to repossess the plaintiff’s car after the plaintiff defaulted on his payments. The car was parked in the plaintiff’s front yard. The plaintiff heard the repossession in progress and ran outside in his underwear shouting “Don’t take it” to the agents. The agents did not respond and proceeded to take the car. The plaintiff argued the repossession breached the peace and he was entitled to the statutory remedy for violation of section 9-503, denial of a deficiency judgment to the secured party, Chrysler....

After a thorough analysis of the term “breach of the peace,” the court concluded the term “connotes conduct which incites or is likely to incite immediate public turbulence, or which leads to or is likely to lead to an immediate loss of public order and tranquility. Violent conduct is not a necessary element. The probability of violence at the time of or immediately prior to the repossession is sufficient.”...[The *Koontz* court] held the circumstances of the repossession did not amount to a breach the peace.

The court then considered the plaintiff’s argument that Chrysler breached the peace by repossessing the car under circumstances constituting criminal trespass to property. Looking to cases in other jurisdictions, the court determined that, “in general, a mere trespass, standing alone, does not automatically constitute a breach of the peace.” [Citation] (taking possession of car from private driveway does not, without more, constitute breach of the peace), [Citation] (no breach of the peace occurred where car repossessed from debtor’s driveway without entering “any gates, doors, or other barricades to reach” car), [Citation] (no breach of the peace occurred where car was parked partially under carport and undisputed that no door, “not even one to a garage,” on the debtor’s premises was opened, much less broken, to repossess the car), [Citation] (although secured party may not break into or enter homes or buildings or enclosed spaces to effectuate a repossession, repossession of vehicle from parking lot of debtor’s apartment building was not breach of the peace), [Citation] (repossession of car from debtor’s driveway without

entering any gates, doors or other barricades was accomplished without breach of the peace)....

Although the evidence showed the plaintiff notified Chrysler prior to the repossession that it was not permitted onto his property, the court held Chrysler's entry onto the property to take the car did not constitute a breach of the peace because there was no evidence Chrysler entered through a barricade or did anything other than drive the car away. [Citation] "Chrysler enjoyed a limited privilege to enter [the plaintiff's] property for the sole and exclusive purpose of effectuating the repossession. So long as the entry was limited in purpose (repossession), and so long as no gates, barricades, doors, enclosures, buildings, or chains were breached or cut, no breach of the peace occurred by virtue of the entry onto his property."

...[W]e come to essentially the same conclusion: where a repossession is effectuated by an actual breaking into the lessee/debtor's premises or breaching or cutting of chains, gates, barricades, doors or other barriers designed to exclude trespassers, the likelihood that a breach of the peace occurred is high.

Davenport v. Chrysler Credit Corp., [Citation] (Tenn.App.1991), a case analyzing Tennessee's version of section 9-503 is particularly helpful, holding that "[a] breach of the peace is almost certain to be found if the repossession is accompanied by the unauthorized entry into a closed or locked garage." ...This is so because "public policy favors peaceful, non-trespassory repossessions when the secured party has a free right of entry" and "forced entries onto the debtor's property or into the debtor's premises are viewed as seriously detrimental to the ordinary conduct of human affairs." *Davenport* held that the creditor's repossession of a car by entering a closed garage and cutting a chain that would have prevented it from removing the car amounted to a breach of the peace, "[d]espite the absence of violence or physical confrontation" (because the debtor was not at home when the repossession occurred). *Davenport* recognized that the secured creditors' legitimate interest in obtaining possession of collateral without having to resort to expensive and cumbersome judicial procedures must be balanced against the debtors' legitimate interest in being free from unwarranted invasions of their property and privacy interests.

"Repossession is a harsh procedure and is, essentially, a delegation of the State's exclusive prerogative to resolve disputes. Accordingly, the statutes governing the repossession of collateral should be construed in a way that prevents abuse and discourages illegal conduct which might otherwise go unchallenged because of the debtor's lack of knowledge of legally proper repossession techniques" [Citation].

We agree with [this] analysis of the term “breach of the peace” in the context of repossession and hold, with regard to section 2A-525(3) of the Code, that breaking into a locked garage to effectuate a repossession may constitute a breach of the peace.

Here, plaintiff alleges more than simply a trespass. He alleges Ford, through Doe, broke into his garage to repossess the car. Given our determination that breaking into a locked garage to repossess a car may constitute a breach of the peace, plaintiff’s allegation is sufficient to state a cause of action under section 2A-525(3) of the Code. The court erred in dismissing count I of plaintiff’s second amended complaint and we remand for further proceedings.

Uniform Commercial Code Section 2A-108

In count VI, plaintiff alleged the lease agreement was unconscionable because it was formed in violation of [the Illinois Consumer Fraud Statute, requiring that the customer verify that the negotiations were conducted in the consumer’s native language and that the document was translated so the customer understood it.]...Plaintiff does not quote [this] or explain how the agreement violates [it]. Instead, he quotes UCC section 2A-108 of the Code, as follows:

“With respect to a consumer lease, if the court as a matter of law finds that a lease contract or any clause of a lease contract has been induced by unconscionable conduct or that unconscionable conduct has occurred in the collection of a claim arising from a lease contract, the court may grant appropriate relief.

Before making a finding of unconscionability under subsection (1) or (2), the court, on its own motion or that of a party, shall afford the parties a reasonable opportunity to present evidence as to the setting, purpose, and effect of the lease contract or clause thereof, or of the conduct.”

He then, in “violation one” under count VI, alleges the lease was made in violation of [the Illinois Consumer Fraud Statute] because it was negotiated in Spanish but he was only given a copy of the contract in English; he could not read the contract and, as a result, Webb Ford was able to trick him into signing a lease, rather than a purchase agreement; such contract was induced by unconscionable conduct; and, because it was illegal, the contract was unenforceable.

This allegation is insufficient to state a cause of action against Ford under section 2A-108....First, Ford is an entirely different entity than Webb Ford and plaintiff does not assert otherwise. Nor does plaintiff assert that Webb Ford was acting as Ford’s

agent in inducing plaintiff to sign the lease. Plaintiff asserts no basis on which Ford can be found liable for something Webb Ford did. Second, there is no allegation as to how the contract violates [the statute], merely the legal conclusion that it does, as well as the unsupported legal conclusion that a violation of [it] is necessarily unconscionable....[Further discussion omitted.]

For the reasons stated above, we affirm the trial court's dismissal of counts IV, V and VI of plaintiff's second amended complaint. We reverse the court's dismissal of count I and remand for further proceedings. Affirmed in part and reversed in part; cause remanded.

CASE QUESTIONS

1. Under what circumstances, if any, would breaking into a locked garage to repossess a car *not* be considered a breach of the peace?
2. The court did not decide that a breach of the peace had occurred. What would determine that such a breach had occurred?
3. Why did the court dismiss the plaintiff's claim (under UCC Article 2A) that it was unconscionable of Ford to trick him into signing a lease when he thought he was signing a purchase contract? Would that section of Article 2A make breaking into his garage unconscionable?
4. What alternatives had Ford besides taking the car from the plaintiff's locked garage?
5. If it was determined on remand that a breach of the peace had occurred, what happens to Ford?

Defenses of the Principal Debtor as against Reimbursement to Surety

Fidelity and Deposit Co. of Maryland v. Douglas Asphalt Co.

338 Fed.Appx. 886, 11th Cir. Ct. (2009)

Per Curium: Latin for “by the court.” A decision of an appeals court as a whole in which no judge is identified as the specific author.

The Georgia Department of Transportation (“GDOT”) contracted with Douglas Asphalt Company to perform work on an interstate highway. After Douglas Asphalt allegedly failed to pay its suppliers and subcontractors and failed to perform under the contract, GDOT defaulted and terminated Douglas Asphalt. Fidelity and Deposit

Company of Maryland and Zurich American Insurance Company had executed payment and performance bonds in connection with Douglas Asphalt's work on the interstate, and after Douglas Asphalt's default, Fidelity and Zurich spent \$15,424,798 remedying the default.

Fidelity and Zurich, seeking to recover their losses related to their remedy of the default, brought this suit against Douglas Asphalt, Joel Spivey, and Ronnie Spivey. The Spiveys and Douglas Asphalt had executed a General Indemnity Agreement in favor of Fidelity and Zurich. They promised to reimburse the surety for its expenses and hold it harmless for further liability.

After a bench trial, the district court entered judgment in favor of Fidelity and Zurich for \$16,524,798. Douglas Asphalt and the Spiveys now appeal.

Douglas Asphalt and the Spiveys argue that the district court erred in entering judgment in favor of Fidelity and Zurich because Fidelity and Zurich acted in bad faith in three ways.

First, Douglas Asphalt and the Spiveys argue that the district court erred in not finding that Fidelity and Zurich acted in bad faith because they claimed excessive costs to remedy the default. Specifically, Douglas Asphalt and the Spiveys argue that they introduced evidence that the interstate project was 98% complete, and that only approximately \$3.6 million was needed to remedy any default. But, the district court found that the interstate project was only 90%–92% complete and that approximately \$2 million needed to be spent to correct defective work already done by Douglas Asphalt. Douglas Asphalt and the Spiveys have not shown that the district court's finding was clearly erroneous, and accordingly, their argument that Fidelity and Zurich showed bad faith in claiming that the project was only 90% complete and therefore required over \$15 million to remedy the default fails.

Second, Douglas Asphalt and the Spiveys argue that Fidelity and Zurich acted in bad faith by failing to contest the default. However, the district court concluded that the indemnity agreement required Douglas Asphalt and the Spiveys to request a contest of the default, and to post collateral security to pay any judgment rendered in the course of contesting the default. The court's finding that Douglas Asphalt and the Spiveys made no such request and posted no collateral security was not clearly erroneous, and the sureties had no independent duty to investigate a default. Accordingly, Fidelity and Zurich's failure to contest the default does not show bad faith.

Finally, Douglas Asphalt and the Spiveys argue that Fidelity and Zurich's refusal to permit them to remain involved with the interstate project, either as a contractor or consultant, was evidence of bad faith. Yet, Douglas Asphalt and the Spiveys did not direct the district court or this court to any case law that holds that the refusal to permit a defaulting contractor to continue working on a project is bad faith. As the district court concluded, Fidelity and Zurich had a contractual right to take possession of all the work under the contract and arrange for its completion. Fidelity and Zurich exercised that contractual right, and, as the district court noted, the exercise of a contractual right is not evidence of bad faith.

Finding no error, we affirm the judgment of the district court.

CASE QUESTIONS

1. Why were Douglas Asphalt and the Spiveys supposed to pay the sureties nearly \$15.5 million?
2. What did the plaintiffs claim the defendant sureties did wrong as relates to how much money they spent to cure the default?
3. What is a "contest of the default"?
4. Why would the sureties probably *not* want the principal involved in the project?

28.6 Summary and Exercises

Summary

The law governing security interests in personal property is Article 9 of the UCC, which defines a security interest as an interest in personal property or fixtures that secures payment or performance of an obligation. Article 9 lumps together all the former types of security devices, including the pledge, chattel mortgage, and conditional sale.

Five types of tangible property may serve as collateral: (1) consumer goods, (2) equipment, (3) farm products, (4) inventory, and (5) fixtures. Five types of intangibles may serve as collateral: (1) accounts, (2) general intangibles (e.g., patents), (3) documents of title, (4) chattel paper, and (5) instruments. Article 9 expressly permits the debtor to give a security interest in after-acquired collateral.

To create an enforceable security interest, the lender and borrower must enter into an agreement establishing the interest, and the lender must follow steps to ensure that the security interest first attaches and then is perfected. There are three general requirements for attachment: (1) there must be an authenticated agreement (or the collateral must physically be in the lender's possession), (2) the lender must have given value, and (3) the debtor must have some rights in the collateral. Once the interest attaches, the lender has rights in the collateral superior to those of unsecured creditors. But others may defeat his interest unless he perfects the security interest. The three common ways of doing so are (1) filing a financing statement, (2) pledging collateral, and (3) taking a purchase-money security interest (PMSI) in consumer goods.

A financing statement is a simple notice, showing the parties' names and addresses, the signature of the debtor, and an adequate description of the collateral. The financing statement, effective for five years, must be filed in a public office; the location of the office varies among the states.

Security interests in instruments and negotiable documents can be perfected only by the secured party's taking possession, with twenty-one-day grace periods applicable under certain circumstances. Goods may also be secured through pledging, which is often done through field warehousing. If a seller of consumer goods takes a PMSI in the goods sold, then perfection is automatic and no filing is required, although the lender may file and probably should, to avoid losing seniority to a bona fide purchaser of consumer goods without knowledge of the security interest, if the goods are used for personal, family, or household purposes.

The general priority rule is "first in time, first in right." Priority dates from the earlier of two events: (1) filing a financing statement covering the collateral or (2) other perfection of the security interest. Several exceptions to this rule arise when creditors take a PMSI, among them, when a buyer in the ordinary course of business takes free of a security interest created by the seller.

On default, a creditor may repossess the collateral. For the most part, self-help private repossession continues to be lawful but risky. After repossession, the lender may sell the collateral or accept it in satisfaction of the debt. Any excess in the selling price above the debt amount must go to the debtor.

Suretyship is a legal relationship that is created when one person contracts to be responsible for the proper fulfillment of another's obligation, in case the latter (the principal debtor) fails to fulfill it. The surety may avail itself of the principal's contract defenses, but under various circumstances, defenses may be available to the one that are not available to the other. One general defense often raised by sureties is alteration of the contract. If the surety is required to perform, it has rights for reimbursement against the principal, including interest and legal fees; and if there is more than one surety, each standing for part of the obligation, one who pays a disproportionate part may seek contribution from the others.

EXERCISES

1. Kathy Knittle borrowed \$20,000 from Bank to buy inventory to sell in her knit shop and signed a security agreement listing as collateral the entire present and future inventory in the shop, including proceeds from the sale of inventory. Bank filed no financing statement. A month later, Knittle borrowed \$5,000 from Creditor, who was aware of Bank's security interest. Knittle then declared bankruptcy. Who has priority, Bank or Creditor?
2. Assume the same facts as in Exercise 1, except Creditor—again, aware of Bank's security interest—filed a financing statement to perfect its interest. Who has priority, Bank or Creditor?
3. Harold and Wilma are married. First Bank has a mortgage on their house, and it covers after-acquired property. Because Harold has a new job requiring travel to neighboring cities, they purchase a second car for Wilma's normal household use, financed by Second Bank. They sign a security agreement; Second Bank files nothing. If they were to default on their house payments, First Bank could repossess the house; could it repossess the car, too?
4.
 - a. Kathy Knittle borrowed \$20,000 from Bank to buy inventory to sell in her knit shop and signed a security agreement listing her collateral—present and future—as security for the loan. Carlene Customer bought yarn and a tabletop loom from Knittle. Shortly thereafter, Knittle declared bankruptcy. Can Bank get the loom from Customer?
 - b. Assume that the facts are similar to those in Exercise 4a, except that the loom that Knittle sold had been purchased from Larry Loomaker, who had himself given a secured interest in it (and the other looms he manufactured) from Fine Lumber Company (FLC) to finance the purchase of the lumber to make the looms. Customer bought the loom from Knittle (unaware of Loomaker's situation); Loomaker failed to pay FLC. Why can FLC repossess the loom from Customer?
 - c. What recourse does Customer have now?
5. Creditor loaned Debtor \$30,000 with the provision that the loan was callable by Creditor with sixty days' notice to Debtor. Debtor, having been called for repayment, asked for a ninety-day extension, which Creditor assented to, provided that Debtor would put up a surety to secure repayment. Surety agreed to serve as surety. When Debtor defaulted, Creditor turned to Surety for payment. Surety asserted that

Creditor had given no consideration for Surety's promise, and therefore Surety was not bound. Is Surety correct?

6.
 - a. Mrs. Ace said to University Bookstore: "Sell the books to my daughter. I'll pay for them." When University Bookstore presented Mrs. Ace a statement for \$900, she refused to pay, denying she'd ever promised to do so, and she raised the statute of frauds as a defense. Is this a good defense?
 - b. Defendant ran a stop sign and crashed into Plaintiff's car, causing \$8,000 damage. Plaintiff's attorney orally negotiated with Defendant's insurance company, Goodhands Insurance, to settle the case. Subsequently, Goodhands denied liability and refused to pay, and it raised the statute of frauds as a defense, asserting that any promise by it to pay for its insured's negligence would have to be in writing to be enforceable under the statute's suretyship clause. Is Goodhands's defense valid?

7.
 - a. First Bank has a security interest in equipment owned by Kathy Knittle in her Knit Shop. If Kathy defaults on her loan and First Bank lawfully repossesses, what are the bank's options? Explain.
 - b. Suppose, instead, that First Bank had a security interest in Kathy's home knitting machine, worth \$10,000. She paid \$6,200 on the machine and then defaulted. Now what are the bank's options?

SELF-TEST QUESTIONS

1. Creditors may obtain security
 - a. by agreement with the debtor
 - b. through operation of law
 - c. through both of the above
 - d. through neither of the above

2. Under UCC Article 9, when the debtor has pledged collateral to the creditor, what other condition is required for attachment of the security interest?
 - a. A written security agreement must be authenticated by the debtor.
 - b. There must be a financing statement filed by or for the creditor.
 - c. The secured party received consideration.
 - d. The debtor must have rights in the collateral.

3. To perfect a security interest, one may
 - a. file a financing statement
 - b. pledge collateral
 - c. take a purchase-money security interest in consumer goods
 - d. do any of the above

4. Perfection benefits the secured party by
 - a. keeping the collateral out of the debtor's reach
 - b. preventing another creditor from getting a secured interest in the collateral
 - c. obviating the need to file a financing statement
 - d. establishing who gets priority if the debtor defaults

5. Creditor filed a security interest in inventory on June 1, 2012. Creditor's interest takes priority over which of the following?
 - a. a purchaser in the ordinary course of business who bought on June 5

- b. mechanic's lien filed on May 10
- c. purchase-money security interest in after-acquired property who filed on May 15
- d. judgment lien creditor who filed the judgment on June 10

Chapter 29

Mortgages and Nonconsensual Liens

LEARNING OBJECTIVES

After reading this chapter, you should understand the following:

1. The basic concepts of mortgages
2. How the mortgage is created
3. Priorities with mortgages as security devices
4. Termination of the mortgage
5. Other methods of using real estate as security
6. Nonconsensual liens

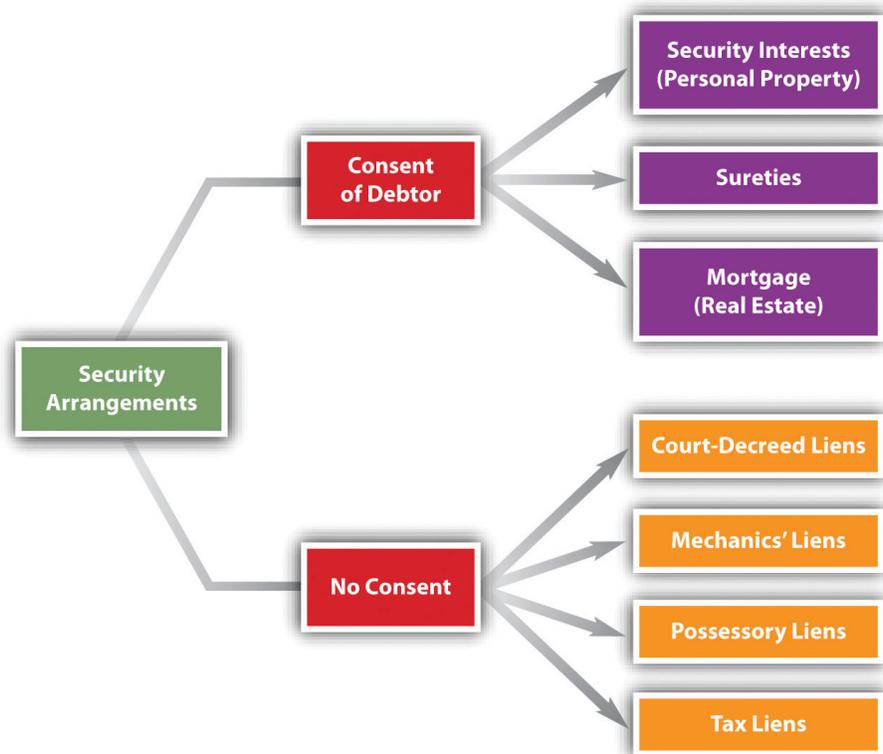

29.1 Uses, History, and Creation of Mortgages

LEARNING OBJECTIVES

1. Understand the terminology used in mortgage transactions, and how mortgages are used as security devices.
2. Know a bit about the history of mortgages.
3. Understand how the mortgage is created.

Having discussed in [Chapter 28 "Secured Transactions and Suretyship"](#) security interests in personal property and suretyship—two of the three common types of consensual security arrangements—we turn now to the third type of consensual security arrangement, the mortgage. We also discuss briefly various forms of nonconsensual liens (see [Figure 29.1 "Security Arrangements"](#)).

Figure 29.1 *Security Arrangements*

Definitions

A **mortgage**¹ is a means of securing a debt with real estate. A long time ago, the mortgage was considered an actual transfer of title, to become void if the debt was paid off. The modern view, held in most states, is that the mortgage is but a lien, giving the holder, in the event of default, the right to sell the property and repay the debt from the proceeds. The person giving the mortgage is the **mortgagor**², or borrower. In the typical home purchase, that's the buyer. The buyer needs to borrow to finance the purchase; in exchange for the money with which to pay the seller, the buyer "takes out a mortgage" with, say, a bank. The lender is the **mortgagee**³, the person or institution holding the mortgage, with the right to foreclose on the property if the debt is not timely paid. Although the law of real estate mortgages is different from the set of rules in Article 9 of the Uniform Commercial Code (UCC) that we examined in [Chapter 28 "Secured Transactions and Suretyship"](#), the circumstances are the same, except that the security is real estate rather than personal property (secured transactions) or the promise of another (suretyship).

The Uses of Mortgages

Most frequently, we think of a mortgage as a device to fund a real estate purchase: for a homeowner to buy her house, or for a commercial entity to buy real estate (e.g., an office building), or for a person to purchase farmland. But the value in real estate can be mortgaged for almost any purpose (a home equity loan): a person can take out a mortgage on land to fund a vacation. Indeed, during the period leading up to the recession in 2007–08, a lot of people borrowed money on their houses to buy things: boats, new cars, furniture, and so on. Unfortunately, it turned out that some of the real estate used as collateral was overvalued: when the economy weakened and people lost income or their jobs, they couldn't make the mortgage payments. And, to make things worse, the value of the real estate sometimes sank too, so that the debtors owed more on the property than it was worth (that's called being underwater). They couldn't sell without taking a loss, and they couldn't make the payments. Some debtors just walked away, leaving the banks with a large number of houses, commercial buildings, and even shopping centers on their hands.

1. Security in which collateral is land.
2. One who gives a mortgage; the debtor.
3. The party who holds a mortgage; the creditor (such as a bank).

Short History of Mortgage Law

The mortgage has ancient roots, but the form we know evolved from the English land law in the Middle Ages. Understanding that law helps to understand modern mortgage law. In the fourteenth century, the mortgage was a deed that actually transferred title to the mortgagee. If desired, the mortgagee could move into the house, occupy the property, or rent it out. But because the mortgage obligated him

to apply to the mortgage debt whatever rents he collected, he seldom ousted the mortgagor. Moreover, the mortgage set a specific date (the “law day”) on which the debt was to be repaid. If the mortgagor did so, the mortgage became void and the mortgagor was entitled to recover the property. If the mortgagor failed to pay the debt, the property automatically vested in the mortgagee. No further proceedings were necessary.

This law was severe. A day’s delay in paying the debt, for any reason, forfeited the land, and the courts strictly enforced the mortgage. The only possible relief was a petition to the king, who over time referred these and other kinds of petitions to the courts of equity. At first fitfully, and then as a matter of course (by the seventeenth century), the equity courts would order the mortgagee to return the land when the mortgagor stood ready to pay the debt plus interest. Thus a new right developed: the *equitable right of redemption*, known for short as the equity of redemption. In time, the courts held that this equity of redemption was a form of property right; it could be sold and inherited. This was a powerful right: no matter how many years later, the mortgagor could always recover his land by proffering a sum of money.

Understandably, mortgagees did not warm to this interpretation of the law, because their property rights were rendered insecure. They tried to defeat the equity of redemption by having mortgagors waive and surrender it to the mortgagees, but the courts voided waiver clauses as a violation of public policy. Hence a mortgage, once a transfer of title, became a security for debt. A mortgage as such can never be converted into a deed of title.

The law did not rest there. Mortgagees won a measure of relief in the development of the **foreclosure**⁴. On default, the mortgagee would seek a court order giving the mortgagor a fixed time—perhaps six months or a year—within which to pay off the debt; under the court decree, failure meant that the mortgagor was forever foreclosed from asserting his right of redemption. This **strict foreclosure**⁵ gave the mortgagee outright title at the end of the time period.

4. To shut off the owner’s interest in property and sell it upon default.

5. The creditor takes the collateral, discharges the debtor, and has no right to seek any deficiency.

6. To sell land upon buyer’s default at a public auction.

In the United States today, most jurisdictions follow a somewhat different approach: the mortgagee forecloses by forcing a public sale at auction. Proceeds up to the amount of the debt are the mortgagee’s to keep; surplus is paid over to the mortgagor. **Foreclosure by sale**⁶ is the usual procedure in the United States. At bottom, its theory is that a mortgage is a lien on land. (Foreclosure issues are further discussed in [Section 29.2 "Priority, Termination of the Mortgage, and Other Methods of Using Real Estate as Security"](#).)

Under statutes enacted in many states, the mortgagor has one last chance to recover his property, even after foreclosure. This statutory **right of redemption**⁷ extends the period to repay, often by one year.

Creation of the Mortgage Statutory Regulation

The decision whether to lend money and take a mortgage is affected by several federal and state regulations.

Consumer Credit Statutes Apply

Statutes dealing with consumer credit transactions (as discussed in [Chapter 27 "Consumer Credit Transactions"](#)) have a bearing on the mortgage, including state usury statutes, and the federal Truth in Lending Act and Equal Credit Opportunity Act.

Real Estate Settlement Procedures Act

Other federal statutes are directed more specifically at mortgage lending. One, enacted in 1974, is the Real Estate Settlement Procedures Act (RESPA), aimed at abuses in the settlement process—the process of obtaining the mortgage and purchasing a residence. The act covers all federally related first mortgage loans secured by residential properties for one to four families. It requires the lender to disclose information about settlement costs in advance of the closing day: it prohibits the lender from “springing” unexpected or hidden costs onto the borrower. The RESPA is a US Department of Housing and Urban Development (HUD) consumer protection statute designed to help home buyers be better shoppers in the home-buying process, and it is enforced by HUD. It also outlaws what had been a common practice of giving and accepting kickbacks and referral fees. The act prohibits lenders from requiring mortgagors to use a particular company to obtain insurance, and it limits add-on fees the lender can demand to cover future insurance and tax charges.

Redlining. Several statutes are directed to the practice of **redlining**⁸—the refusal of lenders to make loans on property in low-income neighborhoods or impose stricter mortgage terms when they do make loans there. (The term derives from the supposition that lenders draw red lines on maps around ostensibly marginal neighborhoods.) The most important of these is the Community Reinvestment Act (CRA) of 1977.¹² United States Code, Section 2901. The act requires the appropriate federal financial supervisory agencies to encourage regulated financial institutions to meet the credit needs of the local communities in which they are chartered,

7. After foreclosure, for a limited period, the debtor's right to reclaim the property sold, upon paying all costs and fees.

8. The alleged practice by lenders not to lend within certain geographic areas; considered discrimination.

consistent with safe and sound operation. To enforce the statute, federal regulatory agencies examine banking institutions for CRA compliance and take this information into consideration when approving applications for new bank branches or for mergers or acquisitions. The information is compiled under the authority of the Home Mortgage Disclosure Act of 1975, which requires financial institutions within its purview to report annually by transmitting information from their loan application registers to a federal agency.

The Note and the Mortgage Documents

The note and the mortgage documents are the contracts that set up the deal: the mortgagor gets credit, and the mortgagee gets the right to repossess the property in case of default.

The Note

If the lender decides to grant a mortgage, the mortgagor signs two critical documents at the closing: the note and the mortgage. We cover notes in [Chapter 22 "Nature and Form of Commercial Paper"](#). It is enough here to recall that in a note (really a type of IOU), the mortgagor promises to pay a specified principal sum, plus interest, by a certain date or dates. The note is the underlying obligation for which the mortgage serves as security. Without the note, the mortgagee would have an empty document, since the mortgage would secure nothing. Without a mortgage, a note is still quite valid, evidencing the debtor's personal obligation.

One particular provision that usually appears in both mortgages and the underlying notes is the **acceleration clause**⁹. This provides that if a debtor should default on any particular payment, the entire principal and interest will become due immediately at the lender's option. Why an acceleration clause? Without it, the lender would be powerless to foreclose the entire mortgage when the mortgagor defaulted but would have to wait until the expiration of the note's term. Although the acceleration clause is routine, it will not be enforced unless the mortgagee acts in an equitable and fair manner. The problem arises where the mortgagor's default was the result of some unconscionable conduct of the mortgagee, such as representing to the mortgagee that she might take a sixty-day "holiday" from having to make payments. In *Paul H. Cherry v. Chase Manhattan Mortgage Group* ([Section 29.4 "Cases"](#)), the equitable powers of the court were invoked to prevent acceleration.

9. A contract clause providing that the entire amount owing in debt becomes due if one payment is missed.

The Mortgage

Under the statute of frauds, the mortgage itself must be evidenced by some writing to be enforceable. The mortgagor will usually make certain promises and warranties to the mortgagee and state the amount and terms of the debt and the mortgagor's duties concerning taxes, insurance, and repairs. A sample mortgage form is presented in [Figure 29.2 "Sample Mortgage Form"](#).

Figure 29.2 *Sample Mortgage Form*

Mortgage

This mortgage is made the ___ day of ___, 20___, between the mortgagor, [name of mortgagor], at [insert residence], and [name of mortgagee], mortgagee, at [insert residence].

To secure the payment of an indebtedness of \$[numbers] [written out] dollars, to be paid on starting on the ___ day of ___, 20___ with interest to be computed from ___ at the rate of ___% per year, and to be paid monthly, according to the promissory note of today's date, the mortgagor hereby mortgages to the mortgagee.

[address and legal description of the property].

And the mortgagor promises the mortgagee as follows:

1. That the mortgagor will pay the debt as provided.
2. That the mortgagor will keep the buildings on the premises insured against loss by fire for the benefit of the mortgagee; that s/he will assign and deliver the policies to the mortgagee; and that s/he will reimburse the mortgagee for any premiums paid for insurance made by the mortgagor's default in insuring the buildings.
3. That no building on the premises shall be removed or demolished without the consent of the mortgagee.
4. That the whole principal sum and interest shall become due at the option of the mortgagee:
 - after default in the payment of any installment of principal or of interest for ___ days;
 - or after default in the payment of any tax, water rate or assessment for ___ days, after notice and demand;
 - or after default after notice and demand either in assigning and delivering the policies insuring the buildings against loss by fire to the mortgagee;
 - or in reimbursing the mortgagee for premiums paid on such insurance, as provided here;
5. That the mortgagor will pay all taxes, assessments or water rates, and if s/he defaults, the mortgagee may pay instead.
6. That the mortgagor within ___ days upon request in person or ___ days upon request by mail will furnish a written statement, properly acknowledged, of the amount due on this mortgage and whether any offsets or defenses exist against the mortgage debt.
7. That any notice and demand or request shall be in writing and may be served in person or by mail.
9. That the mortgagor warrants the title to the premises.

As evidence of this agreement between the parties, this mortgage is signed below by them.

_____ Mortgagor.

_____ Mortgagee.

KEY TAKEAWAY

As a mechanism of security, a mortgage is a promise by the debtor (mortgagor) to repay the creditor (mortgagee) for the amount borrowed or credit extended, with real estate put up as security. If the mortgagor doesn't pay as promised, the mortgagee may repossess the real estate. Mortgage law has ancient roots and brings with it various permutations on the theme that even if the mortgagor defaults, she may nevertheless have the right to get the property back or at least be reimbursed for any value above that necessary to pay the debt and the expenses of foreclosure. Mortgage law is regulated by state and federal statute.

EXERCISES

1. What role did the right of redemption play in courts of equity changing the substance of a mortgage from an actual transfer of title to the mortgagee to a mere lien on the property?
2. What abuses did the federal RESPA address?
3. What are the two documents most commonly associated with mortgage transactions?

29.2 Priority, Termination of the Mortgage, and Other Methods of Using Real Estate as Security

LEARNING OBJECTIVES

1. Understand why it is important that the mortgagee (creditor) record her interest in the debtor's real estate.
2. Know the basic rule of priority—who gets an interest in the property first in case of default—and the exceptions to the rule.
3. Recognize the three ways mortgages can be terminated: payment, assumption, and foreclosure.
4. Be familiar with other methods (besides mortgages) by which real property can be used as security for a creditor.

Priorities in Real Property Security

You may recall from [Chapter 28 "Secured Transactions and Suretyship"](#) how important it is for a creditor to perfect its secured interest in the goods put up as collateral. Absent perfection, the creditor stands a chance of losing out to another creditor who took its interest in the goods subsequent to the first creditor. The same problem is presented in real property security: the mortgagee wants to make sure it has first claim on the property in case the mortgagor (debtor) defaults.

The General Rule of Priorities

The general rule of priority is the same for real property security as for personal property security: the first in time to give notice of the secured interest is first in right. For real property, the notice is by **recording**¹⁰ the mortgage. Recording is the act of giving public notice of changes in interests in real estate. Recording was created by statute; it did not exist at common law. The typical recording statute calls for a transfer of title or mortgage to be placed in a particular county office, usually the auditor, recorder, or register of deeds.

A mortgage is valid between the parties whether or not it is recorded, but a mortgagee might lose to a third party—another mortgagee or a good-faith purchaser of the property—unless the mortgage is recorded.

10. The official filing of a legal document (a mortgage or a deed) so as to inform the world of it.

Exceptions to the General Rule

There are exceptions to the general rule; two are taken up here.

Fixture Filing

The fixture-filing provision in Article 9 of the UCC is one exception to the general rule. As noted in [Chapter 28 "Secured Transactions and Suretyship"](#), the UCC gives priority to purchase-money security interests in fixtures if certain requirements are met.

Future Advances

A bank might make advances to the debtor after accepting the mortgage. If the future advances are obligatory, then the first-in-time rule applies. For example: Bank accepts Debtor's mortgage (and records it) and extends a line of credit on which Debtor draws, up to a certain limit. (Or, as in the construction industry, Bank might make periodic advances to the contractors as work progresses, backed by the mortgage.) Second Creditor loans Debtor money—secured by the same property—before Debtor began to draw against the first line of credit. Bank has priority: by searching the mortgage records, Second Creditor should have been on notice that the first mortgage was intended as security for the entire line of credit, although the line was doled out over time.

However, if the future advances are not obligatory, then priority is determined by notice. For example, a bank might take a mortgage as security for an original loan and for any future loans that the bank chooses to make. A later creditor can achieve priority by notifying the bank with the first mortgage that it is making an advance. Suppose Jimmy mortgages his property to a wealthy dowager, Mrs. Calabash, in return for an immediate loan of \$20,000 and they agree that the mortgage will serve as security for future loans to be arranged. The mortgage is recorded. A month later, before Mrs. Calabash loans him any more money, Jimmy gives a second mortgage to Louella in return for a loan of \$10,000. Louella notifies Mrs. Calabash that she is loaning Jimmy the money. A month later, Mrs. Calabash loans Jimmy another \$20,000. Jimmy then defaults, and the property turns out to be worth only \$40,000. Whose claims will be honored and in what order? Mrs. Calabash will collect her original \$20,000, because it was recited in the mortgage and the mortgage was recorded. Louella will collect her \$10,000 next, because she notified the first mortgage holder of the advance. That leaves Mrs. Calabash in third position to collect what she can of her second advance. Mrs. Calabash could have protected herself by refusing the second loan.

Termination of the Mortgage

The mortgagor's liability can terminate in three ways: payment, assumption (with a novation), or foreclosure.

Payment

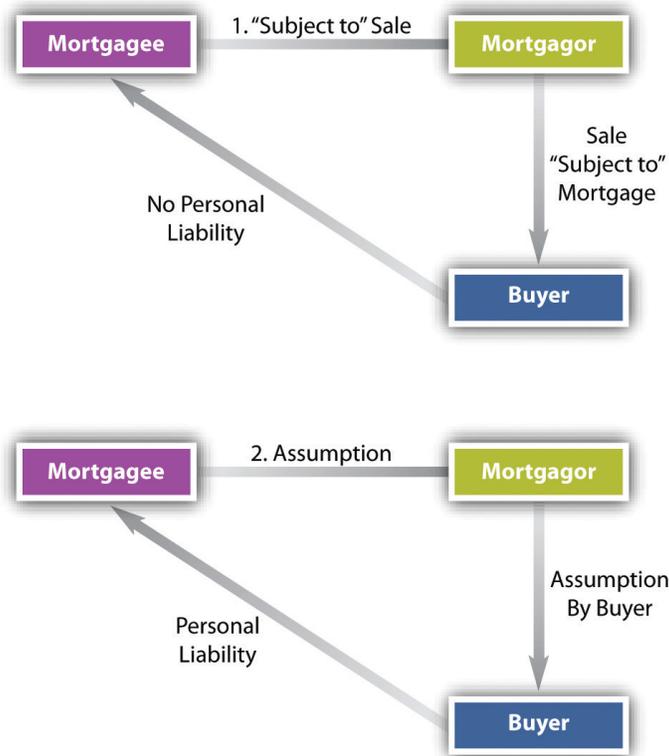

Unless they live in the home for twenty-five or thirty years, the mortgagors usually pay off the mortgage when the property is sold. Occasionally, mortgages are paid off in order to refinance. If the mortgage was taken out at a time of high interest rates and rates later drop, the homeowner might want to obtain a new mortgage at the lower rates. In many mortgages, however, this entails extra closing costs and penalties for prepaying the original mortgage. Whatever the reason, when a mortgage is paid off, the discharge should be recorded. This is accomplished by giving the mortgagor a copy of, and filing a copy of, a Satisfaction of Mortgage document. In the *Paul H. Cherry v. Chase Manhattan Mortgage Group* case ([Section 29.4 "Cases"](#)), the bank *mistakenly* filed the Satisfaction of Mortgage document, later discovered its mistake, retracted the satisfaction, accelerated the loan because the mortgagor stopped making payments (the bank, seeing no record of an outstanding mortgage, refused to accept payments), and then tried to foreclose on the mortgage, meanwhile having lost the note and mortgage besides.

Assumption

The property can be sold without paying off the mortgage if the mortgage is assumed by the new buyer, who agrees to pay the seller's (the original mortgagor's) debt. This is a novation *if*, in approving the assumption, the bank releases the old mortgagor and substitutes the buyer as the new debtor.

The buyer need not assume the mortgage. If the buyer purchases the property without agreeing to be personally liable, this is a sale "subject to" the mortgage (see [Figure 29.3 "Subject to" Sales versus Assumption](#)). In the event of the seller's subsequent default, the bank can foreclose the mortgage and sell the property that the buyer has purchased, but the buyer is not liable for any deficiency.

Figure 29.3 “Subject to” Sales versus Assumption

What if mortgage rates are high? Can buyers assume an existing low-rate mortgage from the seller rather than be forced to obtain a new mortgage at substantially higher rates? Banks, of course, would prefer not to allow that when interest rates are rising, so they often include in the mortgage a **due-on-sale clause**¹¹, by which the entire principal and interest become due when the property is sold, thus forcing the purchaser to get financing at the higher rates. The clause is a device for preventing subsequent purchasers from assuming loans with lower-than-market interest rates. Although many state courts at one time refused to enforce the due-on-sale clause, Congress reversed this trend when it enacted the Garn–St. Germain Depository Institutions Act in 1982.¹² United States Code, Section 1701-j. The act preempts state laws and upholds the validity of due-on-sale clauses. When interest rates are low, banks have no interest in enforcing such clauses, and there are ways to work around the due-on-sale clause.

Foreclosure

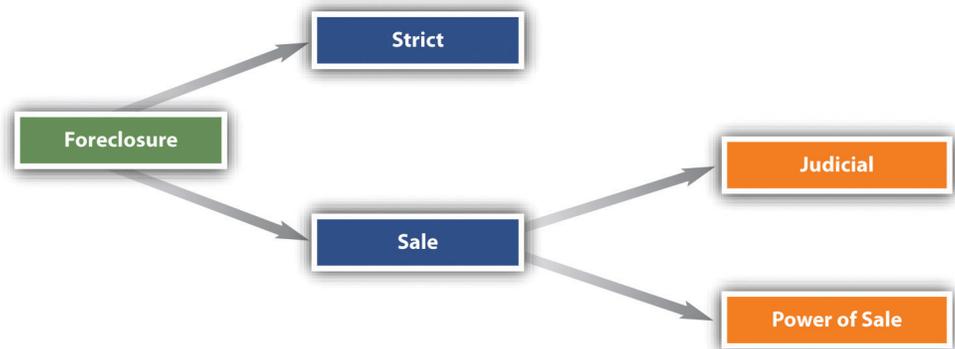

11. A contract clause requiring the entire mortgage amount be paid to the mortgagee if the property is sold; it prevents any assumption.

The third method of terminating the mortgage is by foreclosure when a mortgagor defaults. Even after default, the mortgagor has the right to exercise his equity of redemption—that is, to redeem the property by paying the principal and interest in

full. If he does not, the mortgagee may foreclose the equity of redemption. Although strict foreclosure is used occasionally, in most cases the mortgagee forecloses by one of two types of sale (see [Figure 29.4 "Foreclosure"](#)).

The first type is **judicial sale**¹². The mortgagee seeks a court order authorizing the sale to be conducted by a public official, usually the sheriff. The mortgagor is entitled to be notified of the proceeding and to a hearing. The second type of sale is that conducted under a clause called a **power of sale**¹³, which many lenders insist be contained in the mortgage. This clause permits the mortgagee to sell the property at public auction without first going to court—although by custom or law, the sale must be advertised, and typically a sheriff or other public official conducts the public sale or auction.

Figure 29.4 Foreclosure

Once the property has been sold, it is deeded to the new purchaser. In about half the states, the mortgagor still has the right to redeem the property by paying up within six months or a year—the statutory redemption period. Thereafter, the mortgagor has no further right to redeem. If the sale proceeds exceed the debt, the mortgagor is entitled to the excess unless he has given second and third mortgages, in which case the junior mortgagees are entitled to recover their claims before the mortgagor. If the proceeds are less than the debt, the mortgagee is entitled to recover the deficiency from the mortgagor. However, some states have statutorily abolished deficiency judgments.

12. A court-ordered sale of property by a public official, such as the sheriff.

13. A term allowing the mortgagee to sell real estate upon mortgagor's default without going to court.

Other Methods of Using Real Estate as Security

Besides the mortgage, there are other ways to use real estate as security. Here we take up two: the deed of trust and the installment or land contract.

Deed of Trust

The **deed of trust**¹⁴ is a device for securing a debt with real property; unlike the mortgage, it requires three parties: the borrower, the trustee, and the lender. Otherwise, it is at base identical to a mortgage. The borrower conveys the land to a third party, the trustee, to hold in trust for the lender until the borrower pays the debt. (The trustee's interest is really a kind of legal fiction: that person is expected to have no interest in the property.) The primary benefit to the deed of trust is that it simplifies the foreclosure process by containing a provision empowering the trustee to sell the property on default, thus doing away with the need for any court filings. The disinterested third party making sure things are done properly becomes the trustee, not a judge. In thirty states and the District of Columbia—more than half of US jurisdictions—the deed of trust is usually used in lieu of mortgages. The states using the deed of trust system are as follows: Alabama, Alaska, Arkansas, Arizona, California, Colorado, District of Columbia, Georgia, Hawaii, Idaho, Iowa, Michigan, Minnesota, Mississippi, Missouri, Montana, Nevada, New Hampshire, North Carolina, Oklahoma, Oregon, Rhode Island, South Dakota, Tennessee, Texas, Utah, Virginia, Washington, West Virginia, Wisconsin, and Wyoming.

But the deed of trust may have certain disadvantages as well. For example, when the debt has been fully paid, the trustee will not release the deed of trust until she sees that all notes secured by it have been marked canceled. Should the borrower have misplaced the canceled notes or failed to keep good records, he will need to procure a surety bond¹⁴ to protect the trustee in case of a mistake. This can be an expensive procedure. In many jurisdictions, the mortgage holder is prohibited from seeking a deficiency judgment if the holder chooses to sell the property through nonjudicial means.

Alpha Imperial Building, LLC v. Schnitzer Family Investment, LLC, [Section 29.4 "Cases"](#), discusses several issues involving deeds of trust.

Installment or Land Contract

Under the **installment contract or land contract**¹⁵, the purchaser takes possession and agrees to pay the seller over a period of years. Until the final payment, title belongs to the seller. The contract will specify the type of deed to be conveyed at closing, the terms of payment, the buyer's duty to pay taxes and insure the premises, and the seller's right to accelerate on default. The buyer's particular concern in this type of sale is whether the seller in fact has title. The buyers can protect themselves by requiring proof of title and title insurance when the contract is signed. Moreover, the buyer should record the installment contract to protect against the seller's attempt to convey title to an innocent third-party purchaser while the contract is in effect.

14. A type of mortgage where title to the property is nominally in a trustee, who sells if the buyer defaults; it provides for a nonjudicial foreclosure.

15. The buyer makes installment payments on a real estate purchase, the title shifting when all payments are made.

The benefit to the land contract is that the borrower need not bank-qualify, so the pool of available buyers is larger, and buyers who have inadequate resources at the time of contracting but who have the expectation of a rising income in the future are good candidates for the land contract. Also, the seller gets all the interest paid by the buyer, instead of the bank getting it in the usual mortgage. The obvious disadvantage from the seller's point is that she will not get a big lump sum immediately: the payments trickle in over years (unless she can sell the contract to a third party, but that would be at a discount).

KEY TAKEAWAY

The general rule on priority in real property security is that the first creditor to record its interest prevails over subsequent creditors. There are some exceptions; the most familiar is that the seller of a fixture on a purchase-money security interest has priority over a previously recorded mortgagee. The mortgage will terminate by payment, assumption by a new buyer (with a novation releasing the old buyer), and foreclosure. In a judicial-sale foreclosure, a court authorizes the property's sale; in a power-of-sale foreclosure, no court approval is required. In most states, the mortgagor whose property was foreclosed is given some period of time—six months or a year—to redeem the property; otherwise, the sale is done, but the debtor may be liable for the deficiency, if any. The deed of trust avoids any judicial involvement by having the borrower convey the land to a disinterested trustee for the benefit of the lender; the trustee sells it upon default, with the proceeds (after expenses) going to the lender. Another method of real property security is a land contract: title shifts to the buyer only at the end of the term of payments.

EXERCISES

1. A debtor borrowed \$350,000 to finance the purchase of a house, and the bank recorded its interest on July 1. On July 15, the debtor bought \$10,000 worth of replacement windows from Window Co.; Window Co. recorded its purchase-money security interest that day, and the windows were installed. Four years later, the debtor, in hard financial times, declared bankruptcy. As between the bank and Windows Co., who will get paid first?
2. Under what interest rate circumstances would banks insist on a due-on-sale clause? Under what interest rate circumstance would banks not object to a new person assuming the mortgage?
3. What is the primary advantage of the deed of trust? What is the primary advantage of the land contract?
4. A debtor defaulted on her house payments. Under what circumstances might a court *not* allow the bank's foreclosure on the property?

29.3 Nonconsensual Lien

LEARNING OBJECTIVES

1. Understand the nonconsensual liens issued by courts—attachment liens and judgment liens—and how they are created.
2. Recognize other types of nonconsensual liens: mechanic's lien, possessory lien, and tax lien.

The security arrangements discussed so far—security interests, suretyship, mortgages—are all obtained by the creditor with the debtor's consent. A creditor may obtain certain liens without the debtor's consent.

Court-Decreed Liens

Some nonconsensual liens are issued by courts.

Attachment Lien

An **attachment lien**¹⁶ is ordered against a person's property—real or personal—to prevent him from disposing of it during a lawsuit. To obtain an attachment lien, the plaintiff must show that the defendant likely will dispose of or hide his property; if the court agrees with the plaintiff, she must post a bond and the court will issue a writ of attachment to the sheriff, directing the sheriff to seize the property. Attachments of real property should be recorded. Should the plaintiff win her suit, the court issues a writ of execution, directing the sheriff to sell the property to satisfy the judgment.

Judgment Lien

A **judgment lien**¹⁷ may be issued when a plaintiff wins a judgment in court if an attachment lien has not already been issued. Like the attachment lien, it provides a method by which the defendant's property may be seized and sold.

16. A judicial lien imposed to preserve property during litigation.

17. A lien imposed to secure payment of a judgment owing.

Mechanic's Lien

Overview

The most common nonconsensual lien on real estate is the **mechanic's lien**¹⁸. A mechanic's lien can be obtained by one who furnishes labor, services, or materials to improve real estate: this is statutory, and the statute must be carefully followed. The "mechanic" here is one who works with his or her hands, not specifically one who works on machines. An automobile mechanic could not obtain a mechanic's lien on a customer's house to secure payment of work he did on her car. (The lien to which the automobile mechanic is entitled is a "possessory lien" or "artisan's lien," considered in [Section 29.3.3 "Possessory Lien"](#)) To qualify for a mechanic's lien, the claimant must file a sworn statement describing the work done, the contract made, or the materials furnished that permanently improved the real estate.

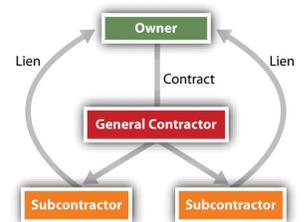

A particularly difficult problem crops up when the owner has paid the contractor, who in turn fails to pay his subcontractors. In many states, the subcontractors can file a lien on the owner's property, thus forcing the owner to pay them (see [Figure 29.5 "Subcontractors' Lien"](#))—and maybe twice. To protect themselves, owners can demand a sworn statement from general contractors listing the subcontractors used on the job, and from them, owners can obtain a waiver of lien rights before paying the general contractor.

Procedure for Obtaining a Mechanic's Lien

Anyone claiming a lien against real estate must record a lien statement stating the amount due and the nature of the improvement. The lienor has a specified period of time (e.g., ninety days) to file from the time the work is finished. Recording as such does not give the lienor an automatic right to the property if the debt remains unpaid. All states specify a limited period of time, usually one year, within which the claimant must file suit to enforce the lien. Only if the court decides the lien is valid may the property be sold to satisfy the debt.

Difficult questions sometimes arise when a lien is filed against a landlord's property as a result of improvements and services provided to a tenant, as discussed in *F & D Elec. Contractors, Inc. v. Powder Coaters, Inc.*, [Section 29.4 "Cases"](#).

Figure 29.5 Subcontractors' Lien

Mechanic's Liens Priorities

A mechanic's lien represents a special risk to the purchaser of real estate or to lenders who wish to take a mortgage. In most states, the mechanic's lien is given

18. A claim allowed to one who furnishes labor, services, or materials to improve property.

priority not from the date when the lien is recorded but from an earlier date—either the date the contractor was hired or the date construction began. Thus a purchaser or lender might lose priority to a creditor with a mechanic’s lien who filed after the sale or mortgage. A practical solution to this problem is to hold back part of the funds (purchase price or loan) or place them in escrow until the period for recording liens has expired.

Possessory Lien

The most common nonconsensual lien on personal property (not real estate) is the **possessory lien**¹⁹. This is the right to continue to keep the goods on which work has been performed or for which materials have been supplied until the owner pays for the labor or materials. The possessory lien arises both under common law and under a variety of statutes. Because it is nonconsensual, the possessory lien is not covered by Article 9 of the UCC, which is restricted to consensual security interests. Nor is it governed by the law of mechanic’s liens, which are nonpossessory and relate only to work done to improve real property.

The common-law rule is that anyone who, under an express or implied contract, adds value to another’s chattel (personal property) by labor, skill, or materials has a possessory lien for the value of the services. Moreover, the lienholder may keep the chattel until her services are paid. For example, the dry cleaner shop is not going to release the wool jacket that you took in for cleaning unless you make satisfactory arrangements to pay for it, and the chain saw store won’t let you take the chain saw that you brought in for a tune-up until you pay for the labor and materials for the tune-up.

Tax Lien

An important statutory lien is the federal **tax lien**²⁰. Once the government assesses a tax, the amount due constitutes a lien on the owner’s property, whether real or personal. Until it is filed in the appropriate state office, others take priority, including purchasers, mechanics’ lienors, judgment lien creditors, and holders of security interests. But once filed, the tax lien takes priority over all subsequently arising liens. Federal law exempts some property from the tax lien; for example, unemployment benefits, books and tools of a trade, workers’ compensation, judgments for support of minor children, minimum amounts of wages and salary, personal effects, furniture, fuel, and provisions are exempt.

Local governments also can assess liens against real estate for failure to pay real estate taxes. After some period of time, the real estate may be sold to satisfy the tax amounts owing.

19. Lien imposed by one who has possession of goods to secure payment for improvements to them.

20. A lien imposed by the government to secure payment of taxes owing.

KEY TAKEAWAY

There are four types of nonconsensual liens: (1) court-decreed liens are attachment liens, which prevent a person from disposing of assets pending a lawsuit, and judgment liens, which allow the prevailing party in a lawsuit to take property belonging to the debtor to satisfy the judgment; (2) mechanics' liens are authorized by statute, giving a person who has provided labor or material to a landowner the right to sell the property to get paid; (3) possessory liens on personal property allow one in possession of goods to keep them to satisfy a claim for work done or storage of them; and (4) tax liens are enforced by the government to satisfy outstanding tax liabilities and may be assessed against real or personal property.

EXERCISES

1. The mortgagor's interests are protected in a judicial foreclosure by a court's oversight of the process; how is the mortgagor's interest protected when a deed of trust is used?
2. Why is the deed of trust becoming increasingly popular?
3. What is the rationale for the common-law possessory lien?
4. Mike Mechanic repaired Alice Ace's automobile in his shop, but Alice didn't have enough money to pay for the repairs. May Mike have a mechanic's lien on the car? A possessory lien?
5. Why does federal law exempt unemployment benefits, books and tools of a trade, workers' compensation, minimum amounts of wages and salary, personal effects, furniture, fuel, and other such items from the sweep of a tax lien?

29.4 Cases

Denial of Mortgagee's Right to Foreclose; Erroneous Filings; Lost Instruments

Paul H. Cherry v. Chase Manhattan Mortgage Group

190 F.Supp.2d 1330 (Fed. Dist. Ct. FL 2002)

Background

[Paul Cherry filed a complaint suing Chase for Fair Debt Collection Practices Act violations and slander of credit.]...Chase counter-claimed for foreclosure and reestablishment of the lost note....

...Chase held a mortgage on Cherry's home to which Cherry made timely payments until August 2000. Cherry stopped making payments on the mortgage after he received a letter from Chase acknowledging his satisfaction of the mortgage. Cherry notified Chase of the error through a customer service representative. Cherry, however, received a check dated August 15, 2000, as an escrow refund on the mortgage. Chase subsequently recorded a Satisfaction of Mortgage into the Pinellas County public records on October 19, 2000. On November 14, 2000, Chase sent Cherry a "Loan Reactivation" letter with a new loan number upon which to make the payments. During this time, Cherry was placing his mortgage payments into a bank account, which subsequently were put into an escrow account maintained by his attorney. These payments were not, and have not, been tendered to Chase. As a result of the failure to tender, Chase sent Cherry an acceleration warning on November 17, 2000, and again on March 16, 2001. Chase notified the credit bureaus as to Cherry's default status and moved for foreclosure. In a letter addressed to Cherry's attorney, dated April 24, 2001, Chase's attorney advised Cherry to make the mortgage payments to Chase. Chase recorded a "vacatur, revocation, and cancellation of satisfaction of mortgage" (vacatur) [vacatur: an announcement filed in court that something is cancelled or set aside; an annulment] in the Pinellas County public records on May 3, 2001. Chase signed the vacatur on March 21, 2001, and had it notarized on March 27, 2001. Chase has also been unable to locate the original note, dated October 15, 1997, and deems it to be lost....

Foreclosure

Chase accelerated Cherry's mortgage debt after determining he was in a default status under the mortgage provisions. Chase claims that the right to foreclose under the note and mortgage is "absolute," [Citation], and that this Court should enforce the security interest in the mortgage though Chase made an administrative error in entering a Satisfaction of Mortgage into the public records....

Mortgage

...Chase relies on the Florida Supreme Court decision in *United Service Corp. v. Vi-An Const. Corp.*, [Citation] (Fla.1955), which held that a Satisfaction of Mortgage "made through a mistake may be canceled" and a mortgage reestablished as long as no other innocent third parties have "acquired an interest in the property." Generally the court looks to the rights of any innocent third parties, and if none exist, equity will grant relief to a mortgagee who has mistakenly satisfied a mortgage before fully paid. [Citation]. Both parties agree that the mortgage was released before the debt was fully paid. Neither party has presented any facts to this Court that implies the possibility nor existence of a third party interest. Although Cherry argues under *Biggs v. Smith*, 184 So. 106, 107 (1938), that a recorded satisfaction of mortgage is "prima facie evidence of extinguishment of a mortgage lien," Biggs does not apply this standard to mortgage rights affected by a mistake in the satisfaction.

Therefore, on these facts, this Court acknowledges that a vacatur is a proper remedy for Chase to correct its unilateral mistake since "equity will grant relief to those who have through mistake released a mortgage." [Citation.] Accordingly, this Court holds that an equity action is required to make a vacatur enforceable unless the parties consent to the vacatur or a similar remedy during the mortgage negotiation....

Tender

Cherry has not made a mortgage payment to Chase since August 2000, but claims to have made these payments into an escrow account, which he claims were paid to the escrow account because Chase recorded a satisfaction of his mortgage and, therefore, no mortgage existed. Cherry also claims that representatives of Chase rejected his initial attempts to make payments because of a lack of a valid loan number. Chase, however, correctly argues that payments made to an escrow account are not a proper tender of payment. *Matthews v. Lindsay*, [Citation] (1884) (requiring tender to be made to the court). Nor did Cherry make the required mortgage payments to the court as provided by [relevant court rules], allowing for a "deposit with the court all or any part of such sum or thing, whether that party claims all or any part of the sum or thing." Further, Chase also correctly argues that Cherry's failure to tender the payments from the escrow account or make deposits

with the court is more than just a “technical breach” of the mortgage and note. [Citation.]

Chase may, therefore, recover the entire amount of the mortgage indebtedness, unless the court finds a “limited circumstance” upon which the request may be denied. [Citation.] Although not presented by Chase in its discussion of this case, the Court may refuse foreclosure, notwithstanding that the defendant established a foreclosure action, if the acceleration was unconscionable and the “result would be inequitable and unjust.” This Court will analyze the inequitable result test and the limited circumstances by which the court may deny foreclosure.

First, this Court does not find the mortgage acceleration unconscionable by assuming *arguendo* [for the purposes of argument] that the mortgage was valid during the period that the Satisfaction of Mortgage was entered into the public records. Chase did not send the first acceleration warning until November 14, 2000, the fourth month of non-payment, followed by the second acceleration letter on March 16, 2001, the eighth month of non-payment. Although Cherry could have argued that a foreclosure action was an “inequitable” and “unjust” result after the Satisfaction of Mortgage was entered on his behalf, the result does not rise to an unconscionable level since Cherry could have properly tendered the mortgage payments to the court.

Second, the following “limited circumstances” will justify a court’s denial of foreclosure: 1) waiver of right to accelerate; 2) mortgagee estopped from asserting foreclosure because mortgagor reasonably assumed the mortgagee would not foreclose; 3) mortgagee failed to perform a condition precedent for acceleration; 4) payment made after default but prior to receiving intent to foreclose; or, 5) where there was intent to make to make timely payment, and it was attempted, or steps taken to accomplish it, but nevertheless the payment was not made due to a misunderstanding or excusable neglect, coupled with some conduct of the mortgagee which in a measure contributed to the failure to pay when due or within the grace period. [Citations.]

Chase fails to address this fifth circumstance in its motion, an apparent obfuscation of the case law before the court. This Court acknowledges that Cherry’s facts do not satisfy the first four limited circumstances. Chase at no time advised Cherry that the acceleration right was being waived; nor is Chase estopped from asserting foreclosure on the mortgage because of the administrative error, and Cherry has not relied on this error to his detriment; and since Chase sent the acceleration letter to Cherry and a request for payment to his attorney, there can be no argument that Cherry believed Chase would not foreclose. Chase has performed all conditions precedent required by the mortgage provisions prior to notice of the

acceleration; sending acceleration warnings on November 17, 2000, and March 16, 2001. Cherry also has no argument for lack of notice of intent to accelerate after default since he has not tendered a payment since July 2000, thus placing him in default of the mortgage provisions, and he admits receiving the acceleration notices.

This Court finds, however, that this claim fails squarely into the final limited circumstance regarding intent to make timely payments. Significant factual issues exist as to the intent of Cherry to make or attempt to make timely mortgage payments to Chase. Cherry claims that he attempted to make the payments, but was told by a representative of Chase that there was no mortgage loan number upon which to apply the payments. As a result, the mortgage payments were placed into an account and later into his counsel's trust account as a mortgage escrow. Although these payments should have, at a minimum, been placed with the court to ensure tender during the resolution of the mortgage dispute, Cherry did take steps to accomplish timely mortgage payments. Although Cherry, through excusable neglect or a misunderstanding as to what his rights were after the Satisfaction of Mortgage was entered, failed to tender the payments, Chase is also not without fault; its conduct in entering a Satisfaction of Mortgage into the Pinellas County public records directly contributed to Cherry's failure to tender timely payments. Cherry's attempt at making the mortgage payments, coupled with Chase's improper satisfaction of mortgage fits squarely within the limited circumstance created to justify a court's denial of a foreclosure. Equity here requires a balancing between Chase's right to the security interest encumbered by the mortgage and Cherry's attempts to make timely payments. As such, these limited circumstances exist to ensure that a foreclosure remains an action in equity. In applying this analysis, this Court finds that equity requires that Chase's request for foreclosure be denied at this juncture....

Reestablishment of the Lost Note and Mortgage

Chase also requests, as part of the foreclosure counterclaim, the reestablishment of the note initially associated with the mortgage, as it is unable to produce the original note and provide by affidavit evidence of its loss. Chase has complied with the [necessary statutory] requirements[.]...This Court holds the note to be reestablished and that Chase has the lawful right to enforce the note upon the issuance of this order.

This Court also agrees that Chase may reestablish the mortgage through a vacatur, revocation, and cancellation of satisfaction of mortgage. [Citation] (allowing the Equity Court to reestablish a mortgage that was improperly canceled due to a mistake). However, this Court will deem the vacatur effective as of the date of this

order. This Court leaves the status of the vacatur during the disputed period, and specifically since May 3, 2001, to be resolved in subsequent proceedings....Accordingly, it is:

ORDERED that [Chase cannot foreclose and] the request to reestablish the note and mortgage is hereby granted and effective as of the date of this order. Cherry will tender all previously escrowed mortgage payments to the Court, unless the parties agree otherwise, within ten days of this order and shall henceforth, tender future monthly payments to Chase as set out in the reestablished note and mortgage.

CASE QUESTIONS

1. When Chase figured out that it had issued a Satisfaction of Mortgage erroneously, what did it file to rectify the error?
2. Cherry had not made any mortgage payments between the time Chase sent the erroneous Satisfaction of Mortgage notice to him and the time of the court's decision in this case. The court listed five circumstances in which a mortgagee (Chase here) might be denied the right to foreclose on a delinquent account: which one applied here? The court said Chase had engaged in "an apparent obfuscation of the case law before the court"? What obfuscation did it engage in?
3. What did Cherry do with the mortgage payments after Chase erroneously told him the mortgage was satisfied? What did the court say he should have done with the payments?

Mechanic's Lien Filed against Landlord for Payment of Tenant's Improvements

F & D Elec. Contractors, Inc. v. Powder Coaters, Inc.

567 S.E.2d 842 (S.C. 2002)

Factual/ Procedural Background

BG Holding f/k/a Colite Industries, Inc. ("BG Holding") is a one-third owner of about thirty acres of real estate in West Columbia, South Carolina. A warehouse facility is located on the property. In September 1996, Powder Coaters, Inc. ("Powder Coaters") agreed to lease a portion of the warehouse to operate its business. Powder Coaters was engaged in the business of electrostatically painting machinery parts

and equipment and then placing them in an oven to cure. A signed lease was executed between Powder Coaters and BG Holding. Prior to signing the lease, Powder Coaters negotiated the terms with Mark Taylor, (“Taylor”) who was the property manager for the warehouse facility and an agent of BG Holding.

The warehouse facility did not have a sufficient power supply to support Powder Coaters’ machinery. Therefore, Powder Coaters contracted with F & D Electrical (“F & D”) to perform electrical work which included installing two eight foot strip light fixtures and a two hundred amp load center. Powder Coaters never paid F & D for the services. Powder Coaters was also unable to pay rent to BG Holding and was evicted in February 1997. Powder Coaters is no longer a viable company.

In January 1997, F & D filed a Notice and Certificate of Mechanic’s Lien and Affidavit of Mechanic’s Lien. In February 1997, F & D filed this action against BG Holding foreclosing on its mechanic’s lien pursuant to S.C. [statute]....

A jury trial was held on September 2nd and 3rd, 1998. At the close of F & D’s evidence, and at the close of all evidence, BG Holding made motions for directed verdicts, which were denied. The jury returned a verdict for F & D in the amount of \$8,264.00. The court also awarded F & D attorneys’ fees and cost in the amount of \$8,264.00, for a total award of \$16,528.00.

BG Holding appealed. The Court of Appeals, in a two to one decision, reversed the trial court, holding a directed verdict should have been granted to BG Holding on the grounds BG Holding did not consent to the electrical upgrade, as is required by the Mechanic’s Lien Statute. This Court granted F & D’s petition for certiorari, and the issue before this Court is:

Did the trial court err in denying BG Holding’s motion for directed verdict because the record was devoid of any evidence of owner’s consent to materialman’s performance of work on its property as required by [the S.C. statute]?

Law/Analysis

F & D argues the majority of the Court of Appeals erred in holding the facts of the case failed to establish that BG Holding consented to the work performed by F & D, as is required by the [South Carolina] Mechanic’s Lien Statute. We agree....

South Carolina’s Mechanic’s Lien Statute provides:

A person to whom a debt is due for labor performed or furnished or for materials furnished and actually used in the erection, alteration, or repair of a building...by virtue of an agreement with, or *by consent of, the owner of the building or structure, or a person having authority from, or rightfully acting for, the owner* in procuring or furnishing the labor or materials shall have a lien upon the building or structure and upon the interest of the owner of the building or structure ...to secure the payment of the debt due. [emphasis added.]

Both parties in this case concede there was no express “agreement” between F & D and BG Holding. Therefore, the issue in this appeal turns on the meaning of the word “consent” in the statute, as applied in the landlord-tenant context. This is a novel issue in South Carolina.

This Court must decide who must give the consent, who must receive consent, and what type of consent (general, specific, oral, written) must be given in order to satisfy the statute. Finally, the Court must decide whether the evidence in this case shows BG Holding gave the requisite consent.

A. Who Must Receive the Consent.

The Court of Appeals’ opinion in this case contemplates the consent must be between the materialman (lien claimant) and the landlord (owner). “It is only logical...that consent under [the relevant section] must...be between the owner and the entity seeking the lien...” [Citation from Court of Appeals]. As stated previously, applying the Mechanic’s Lien Statute in the landlord-tenant context presents a novel issue. We find the consent required by the statute does not have to be between the landlord/owner and the materialman, as the Court of Appeals’ opinion indicates. A determination that the required consent must come from the owner to the materialman means the materialman can only succeed if he can prove an agreement with the owner. Such an interpretation would render meaningless the language of the statute that provides: “...by virtue of an agreement with, or by consent of the owner....”

Therefore, it is sufficient for the landlord/owner or his agent to give consent to his tenant. The landlord/owner should be able to delegate to his tenant the responsibility for making the requested improvements. The landlord/owner may not want to have direct involvement with the materialman or sub-contractors, but instead may wish to allow the tenant to handle any improvements or upgrades himself. In addition, the landlord/owner may be located far away and may own many properties, making it impractical for him to have direct involvement with the materialman. We find the landlord/owner or his agent is free to enter into a lease or agreement with a tenant which allows the tenant to direct the modifications to

the property which have been specifically consented to by the landlord/owner or his agent.

We hold a landlord/owner or his agent can give his consent to the lessee/tenant, as well as directly to the lien claimant, to make modifications to the leased premises.

B. What Kind of Consent Is Necessary.

This Court has already clearly held the consent required by [the relevant section] is “something more than a mere acquiescence in a state of things already in existence. It implies an agreement to that which, but for the consent, could not exist, and which the party consenting has a right to forbid.” [Citations.] However, our Mechanics Lien Statute has never been applied in the landlord-tenant context where a third party is involved.

Other jurisdictions have addressed this issue. The Court of Appeals cited [a Connecticut case, 1987] in support of its holding. We agree with the Court of Appeals that the Connecticut court’s reasoning is persuasive, especially since Connecticut has a similar mechanics lien statute....

The Connecticut courts have stated “the consent required from the owner or one acting under the owner’s authority is more than the mere granting of permission for work to be conducted on one’s property; or the mere knowledge that work was being performed on one’s land.” Furthermore, although the Connecticut courts have stated the statute does not require an express contract, the courts have required “consent that indicates an agreement that the owner of...the land shall be, or may be, liable for the materials or labor.”...

The reasoning of [Connecticut and other states that have decided this issue] is persuasive. F & D’s brief appears to argue that mere knowledge by the landowner that the work needed to be done, coupled with the landlord’s general “permission” to perform the work, is enough to establish consent under the statute. Under this interpretation, a landlord who knew a tenant needed to improve, upgrade, or add to the leased premises would be liable to any contractor and/or subcontractor who performed work on his land. Under F & D’s interpretation the landlord would not be required to know the scope, cost, etc. of the work, but would only need to give the tenant general permission to perform upgrades or improvements.

Clearly, if the landlord/owner or his agent gives consent directly to the materialman, a lien can be established. Consent can also be given to the tenant, but the consent needs to be specific. The landlord/owner or his agent must know the

scope of the project (for instance, as the lease provided in the instant case, the landlord could approve written plans submitted by the tenant). The consent needs to be more than “mere knowledge” that the tenant will perform work on the property. There must be some kind of express or implied agreement that the landlord may be held liable for the work or material. The landlord/owner or his agent may delegate the project or work to his tenant, but there must be an express or implied agreement about the specific work to be done. A general provision in a lease which allows tenant to make repairs or improvements is not enough.

C. Evidence There Was No Consent

- The record is clear that no contract, express or implied, existed between BG Holding and F & G. BG Holding had no knowledge F & G would be performing the work.
- F & G’s supervisor, David Weatherington, and Ray Dutton, the owner of F & D, both testified they never had a conversation with anyone from BG Holding. In fact, until Powder Coaters failed to pay under the contract, F & D did not know BG Holding was the owner of the building.
- Mark Taylor, BG Holding’s agent, testified he never authorized any work by F & D, nor did he see any work being performed by them on the site.
- The lease specifically provided that all work on the property was to be approved in writing by BG Holding.
- David Weatherington of F & D testified he was looking to Powder Coaters, not BG Holding, for payment.
- Powder Coaters acknowledged it was not authorized to bind BG Holding to pay for the modifications.
- The lease states, “[i]f the Lessee should make any [alterations, modification, additions, or installations], the Lessee hereby agrees to indemnify, defend, and save harmless the Lessor from any liability...”

D. Evidence There Was Consent

- Bruce Houston, owner of Powder Coaters testified that during the lease negotiations, he informed Mark Taylor, BG Holding’s property manager and agent, that electrical and gas upgrading would be necessary for Powder Coaters to perform their work.
- Houston testified Mark Taylor was present at the warehouse while F & D performed their work. [However, Taylor testified he did not see F & D performing any work on the premises.]
- Houston testified he would not have entered into the lease if he was not authorized to upgrade the electrical since the existing power

source was insufficient to run the machinery needed for Powder Coaters to operate.

- Houston testified Mark Taylor, BG Holding's agent, showed him the power source for the building so Taylor could understand the extent of the work that was going to be required.
- Houston testified Paragraph 5 of the addendum to the lease was specifically negotiated. He testified the following language granted him the authority to perform the electrical upfit, so that he was not required to submit the plans to BG Holding as required by a provision in the lease: "Lessor shall allow Lessee to put Office Trailer in Building. All Utilities necessary to handle Lessee's equipment shall be paid for by the Lessee including, but not limited to electricity, water, sewer, and gas." (We note that BG Holding denies this interpretation, but insists it just requires the Lessee to pay for all utility bills.)
- Powder Coaters no longer occupies the property, and BG Holding possibly benefits from the work done.

In the instant case, there is some evidence of consent. However, it does not rise to the level required under the statute....

Viewing the evidence in the light most favorable to F & D, whether BG Holding gave their consent is a close question. However, we agree with the Court of Appeals, that F & D has not presented enough evidence to show: (1) BG Holding gave anything more than general consent to make improvements (as the lease could be interpreted to allow); or (2) BG Holding had anything more than "mere knowledge" that the work was to be done. Powder Coaters asserted the lease's addendum evidenced BG Holding's consent to perform the modifications; however, there is no evidence BG Holding expressly or implicitly agreed that it might be liable for the work. In fact, the lease between Powder Coaters and BG Holding expressly provided Powder Coaters was responsible for any alterations made to the property. Even Powder Coaters acknowledged it was not authorized to bind BG Holding....Therefore, it is impossible to see how the very general provision requiring Powder Coaters to pay for water, sewer, and gas can be interpreted to authorize Powder Coaters to perform an electrical upgrade. Furthermore, we agree with the Court of Appeals that the mere presence of BG Holding's agent at the work site is not enough to establish consent.

Conclusion

We hold consent, as required by the Mechanic's Lien Statute, is something more than mere knowledge work will be or could be done on the property. The landlord/owner must do more than grant the tenant general permission to make repairs or improvements to the leased premises. The landlord/owner or his agent must give

either his tenant or the materialman express or implied consent acknowledging he may be held liable for the work.

The Court of Appeals' opinion is affirmed as modified.

CASE QUESTIONS

1. Why did the lienor want to go after the landlord instead of the tenant?
2. Did the landlord here know that there were electrical upgrades needed by the tenant?
3. What kind of knowledge or acceptance did the court determine the landlord-owner needed to have or give before a material man could have a lien on the real estate?
4. What remedy has F & D (the material man) now?

Deeds of Trust; Duties of Trustee

Alpha Imperial Building, LLC v. Schnitzer Family Investment, LLC, II (SFI).

2005 WL 715940, (Wash. Ct. App. 2005)

Applewick, J.

Alpha Imperial LLC challenges the validity of a non-judicial foreclosure sale on multiple grounds. Alpha was the holder of a third deed of trust on the building sold, and contests the location of the sale and the adequacy of the sale price. Alpha also claims that the trustee had a duty to re-open the sale, had a duty to the junior lienholder, chilled the bidding, and had a conflict of interest. We find that the location of the sale was proper, the price was adequate, bidding was not chilled, and that the trustee had no duty to re-open the sale, [and] no duty to the junior lienholder....We affirm.

Facts

Mayur Sheth and another individual formed Alpha Imperial Building, LLC in 1998 for the purpose of investing in commercial real estate. In February 2000 Alpha sold the property at 1406 Fourth Avenue in Seattle (the Property) to Pioneer Northwest, LLC (Pioneer). Pioneer financed this purchase with two loans from [defendant Schnitzer Family Investment, LLC, II (SFI)]. Pioneer also took a third loan from

Alpha at the time of the sale for \$1.3 million. This loan from Alpha was junior to the two [other] loans[.]

Pioneer defaulted and filed for bankruptcy in 2002....In October 2002 defendant Blackstone Corporation, an entity created to act as a non-judicial foreclosure trustee, issued a Trustee's Notice of Sale. Blackstone is wholly owned by defendant Witherspoon, Kelley, Davenport & Toole (Witherspoon). Defendant Michael Currin, a shareholder at Witherspoon, was to conduct the sale on January 10, 2003. Currin and Witherspoon represented SFI and 4th Avenue LLC. Sheth received a copy of the Notice of Sale through his attorney.

On January 10, 2003, Sheth and his son Abhi arrived at the Third Avenue entrance to the King County courthouse between 9:30 and 9:45 a.m. They waited for about ten minutes. They noticed two signs posted above the Third Avenue entrance. One sign said that construction work was occurring at the courthouse and 'all property auctions by the legal and banking communities will be moved to the 4th Avenue entrance of the King County Administration Building.' The other sign indicated that the Third Avenue entrance would remain open during construction. Sheth and Abhi asked a courthouse employee about the sign, and were told that all sales were conducted at the Administration Building.

Sheth and Abhi then walked to the Administration Building, and asked around about the sale of the Property. [He was told Michael Currin, one of the shareholders of Blackstone—the trustee—was holding the sale, and was advised] to call Currin's office in Spokane. Sheth did so, and was told that the sale was at the Third Avenue entrance. Sheth and Abhi went back to the Third Avenue entrance.

In the meantime, Currin had arrived at the Third Avenue entrance between 9:35 and 9:40 a.m. The head of SFI, Danny Schnitzer (Schnitzer), and his son were also present. Currin was surprised to notice that no other foreclosure sales were taking place, but did not ask at the information desk about it. Currin did not see the signs directing auctions to occur at the Administration Building. Currin conducted the auction, Schnitzer made the only bid, for \$2.1 million, and the sale was complete. At this time, the debt owed on the first two deeds of trust totaled approximately \$4.1 million. Currin then left the courthouse, but when he received a call from his assistant telling him about Sheth, he arranged to meet Sheth back at the Third Avenue entrance. When they met, Sheth told Currin that the sales were conducted at the Administration Building. Currin responded that the sale had already been conducted, and he was not required to go to the Administration Building. Currin told Sheth that the notice indicated the sale was to be at the Third Avenue entrance, and that the sale had been held at the correct location. Sheth did not ask to re-open the bidding....

Sheth filed the current lawsuit, with Alpha as the sole plaintiff, on February 14, 2003. The lawsuit asked for declaratory relief, restitution, and other damages. The trial court granted the defendants' summary judgment motion on August 8, 2003. Alpha appeals.

Location of the Sale

Alpha argues that the sale was improper because it was at the Third Avenue entrance, not the Administration Building. Alpha points to a letter from a King County employee stating that auctions are held at the Administration Building. The letter also stated that personnel were instructed to direct bidders and trustees to that location if asked. In addition, Alpha argues that the Third Avenue entrance was not a 'public' place, as required by [the statute], since auction sales were forbidden there. We disagree. Alpha has not shown that the Third Avenue entrance was an improper location. The evidence shows that the county had changed its policy as to where auctions would be held and had posted signs to that effect. However, the county did not exclude people from the Third Avenue entrance or prevent auctions from being held there. Street, who frequented sales, stated that auctions were being held in both locations. The sale was held where the Notice of Sale indicated it would be. In addition, Alpha has not introduced any evidence to show that the Third Avenue entrance was not a public place at the time of the sale. The public was free to come and go at that location, and the area was 'open and available for all to use.' Alpha relies on *Morton v. Resolution Trust* (S.D. Miss. 1995) to support its contention that the venue of the sale was improper. [But] *Morton* is not on point.

Duty to Re-Open Sale

Alpha argues that Currin should have re-opened the sale. However, it is undisputed that Sheth did not request that Currin re-open it. The evidence indicates that Currin may have known about Sheth's interest in bidding prior to the day of the sale, due to a conversation with Sheth's attorney about Sheth's desire to protect his interest in the Property. But, this knowledge did not create in Currin any affirmative duty to offer to re-open the sale.

In addition, Alpha cites no Washington authority to support the contention that Currin would have been obligated to re-open the sale if Sheth had asked him to. The decision to continue a sale appears to be fully within the discretion of the trustee: "[t]he trustee may for any cause the trustee deems advantageous, continue the sale." [Citation.] Alpha's citation to *Peterson v. Kansas City Life Ins. Co.*, Missouri (1936) to support its contention that Currin should have re-opened the sale is unavailing. In *Peterson*, the Notice of Sale indicated that the sale would be held at the 'front' door of the courthouse. But, the courthouse had four doors, and the customary door

for sales was the east door. The sheriff, acting as the trustee, conducted the sale at the east door, and then re-opened the sale at the south door, as there had been some sales at the south door. Alpha contends this shows that Currin should have re-opened the sale when learning of the Administration Building location, akin to what the sheriff did in Peterson. However, Peterson does not indicate that the sheriff had an affirmative duty to re-sell the property at the south door. This case is not on point.

Chilled Bidding

Alpha contends that Currin chilled the bidding on the Property by telling bidders that he expected a full credit sale price and by holding the sale at the courthouse. Chilled bidding can be grounds for setting aside a sale. *Country Express Stores, Inc. v. Sims*, [Washington Court of Appeals] (1997). The *Country Express* court explained the two types of chilled bidding:

The first is intentional, occurring where there is collusion for the purpose of holding down the bids. The second consists of inadvertent and unintentional acts by the trustee that have the effect of suppressing the bidding. To establish chilled bidding, the challenger must establish the bidding was actually suppressed, which can sometimes be shown by an inadequate sale price.

We hold that there was no chilling. Alpha has not shown that Currin engaged in intentional chilling. There is no evidence that Currin knew about the signs indicating auctions were occurring at the Administration Building when he prepared the Notice of Sale, such that he intentionally held the sale at a location from which he knew bidders would be absent. Additionally, Currin's statement to [an interested person who might bid on the property] that a full credit sale price was expected and that the opening bid would be \$4.1 million did not constitute intentional chilling. SFI was owed \$4.1 million on the Property. SFI could thus bid up to that amount at no cost to itself, as the proceeds would go back to SFI. Currin confirmed that SFI was prepared to make a full-credit bid. [It is common for trustees to] disclose the full-credit bid amount to potential third party bidders, and for investors to lose interest when they learn of the amount of indebtedness on property. It was therefore not a misrepresentation for Currin to state \$4.1 million as the opening bid, due to the indebtedness on the Property. Currin's statements had no chilling effect—they merely informed [interested persons] of the minimum amount necessary to prevail against SFI. Thus, Currin did not intentionally chill the bidding by giving Street that information.

Alpha also argues that the chilled bidding could have been unintended by Currin.... [But the evidence is that] Currin's actions did not intentionally or unintentionally chill the bidding, and the sale will not be set aside.

Adequacy of the Sale Price

Alpha claims that the sale price was 'greatly inadequate' and that the sale should thus be set aside. Alpha submitted evidence that the property had an 'as is' value of \$4.35 million in December 2002, and an estimated 2004 value of \$5.2 million. The debt owed to SFI on the property was \$4.1 million. SFI bought the property for \$2.1 million. These facts do not suggest that the sale must be set aside.

Washington case law suggests that the price the property is sold for must be 'grossly inadequate' for a trustee's sale to be set aside on those grounds alone. In *Cox* [Citation, 1985], the property was worth between \$200,000 and \$300,000, and was sold to the beneficiary for \$11,873. The Court held that amount to be grossly inadequate. In *Steward* [Citation, 1988] the property had been purchased for approximately \$64,000, and then was sold to a third party at a foreclosure sale for \$4,870. This court held that \$4,870 was not grossly inadequate. In *Miebach* [Citation] (1984), the Court noted that a sale for less than two percent of the property's fair market value was grossly inadequate. The Court in *Miebach* also noted prior cases where the sale had been voided due to grossly inadequate purchase price; the properties in those cases had been sold for less than four percent of the value and less than three percent of the value. In addition, the Restatement indicates that gross inadequacy only exists when the sale price is less than 20 percent of the fair market value—without other defects, sale prices over 20 percent will not be set aside. [Citation.] The Property was sold for between 40 and 48 percent of its value. These facts do not support a grossly inadequate purchase price.

Alpha cites *Miebach* for the proposition that 'where the inadequacy of price is great the sale will be set aside with slight indications of fraud or unfairness,' arguing that such indications existed here. However, the cases cited by the Court in *Miebach* to support this proposition involved properties sold for less than three and four percent of their value. Alpha has not demonstrated the slightest indication of fraud, nor shown that a property that sold for 40 to 48 percent of its value sold for a greatly inadequate price.

Duty to a Junior Lienholder

Alpha claims that Currin owed a duty to Alpha, the junior lienholder. Alpha cites no case law for this proposition, and, indeed, there is none—Division Two specifically declined to decide this issue in *Country Express* [Citation]. Alpha acknowledges the

lack of language in RCW 61.24 (the deed of trust statute) regarding fiduciary duties of trustees to junior lienholders. But Alpha argues that since RCW 61.24 requires that the trustee follow certain procedures in conducting the sale, and allows for sales to be restrained by anyone with an interest, a substantive duty from the trustee to a junior lienholder can be inferred.

Alpha's arguments are unavailing. The procedural requirements in RCW 61.24 do not create implied substantive duties. The structure of the deed of trust sale illustrates that no duty is owed to the junior lienholder. The trustee and the junior lienholder have no relationship with each other. The sale is pursuant to a contract between the grantor, the beneficiary and the trustee. The junior lienholder is not a party to that contract. The case law indicates only that the trustee owes a fiduciary duty to the debtor and beneficiary: "a trustee of a deed of trust is a fiduciary for both the mortgagee and mortgagor and must act impartially between them." Cox [Citation]. The fact that a sale in accordance with that contract can extinguish the junior lienholder's interest further shows that the grantor's and beneficiary's interest in the deed of trust being foreclosed is adverse to the junior lienholder. We conclude the trustee, while having duties as fiduciary for the grantor and beneficiary, does not have duties to another whose interest is adverse to the grantor or beneficiary. Thus, Alpha's claim of a special duty to a junior lienholder fails....

Attorney Fees

...Defendants claim they are entitled to attorney fees for opposing a frivolous claim, pursuant to [the Washington statute]. An appeal is frivolous 'if there are no debatable issues upon which reasonable minds might differ and it is so totally devoid of merit that there was no reasonable possibility of reversal.' [Citation] Alpha has presented several issues not so clearly resolved by case law as to be frivolous, although Alpha's arguments ultimately fail. Thus, Respondents' request for attorney fees under [state law] is denied.

Affirmed.

CASE QUESTIONS

1. Why did the plaintiff (Alpha) think the sale should have been set aside because of the location problems?
2. Why did the court decide the trustee had no duty to reopen bidding?
3. What is meant by “chilling bidding”? What argument did the plaintiff make to support its contention that bidding was chilled?
4. The court notes precedent to the effect that a “grossly inadequate” bid price has some definition. What is the definition? What percentage of the real estate’s value in this case was the winning bid?
5. A trustee is one who owes a fiduciary duty of the utmost loyalty and good faith to another, the beneficiary. Who was the beneficiary here? What duty is owed to the junior lienholder (Alpha here)—any duty?
6. Why did the defendants not get the attorneys’ fee award they wanted?

29.5 Summary and Exercises

Summary

A mortgage is a means of securing a debt with real estate. The mortgagor, or borrower, gives the mortgage. The lender is the mortgagee, who holds the mortgage. On default, the mortgagee may foreclose the mortgage, converting the security interest into title. In many states, the mortgagor has a statutory right of redemption after foreclosure.

Various statutes regulate the mortgage business, including the Truth in Lending Act, the Equal Credit Opportunity Act, the Real Estate Settlement Procedures Act, and the Home Mortgage Disclosure Act, which together prescribe a code of fair practices and require various disclosures to be made before the mortgage is created.

The mortgagor signs both a note and the mortgage at the closing. Without the note, the mortgage would secure nothing. Most notes and mortgages contain an acceleration clause, which calls for the entire principal and interest to be due, at the mortgagee's option, if the debtor defaults on any payment.

In most states, mortgages must be recorded for the mortgagee to be entitled to priority over third parties who might also claim an interest in the land. The general rule is "First in time, first in right," although there are exceptions for fixture filings and nonobligatory future advances. Mortgages are terminated by repayment, novation, or foreclosure, either through judicial sale or under a power-of-sale clause.

Real estate may also be used as security under a deed of trust, which permits a trustee to sell the land automatically on default, without recourse to a court of law.

Nonconsensual liens are security interests created by law. These include court-decreed liens, such as attachment liens and judgment liens. Other liens are mechanic's liens (for labor, services, or materials furnished in connection with someone's real property), possessory liens (for artisans working with someone else's personal property), and tax liens.

EXERCISES

1. Able bought a duplex from Carr, who had borrowed from First Bank for its purchase. Able took title subject to Carr's mortgage. Able did not make mortgage payments to First Bank; the bank foreclosed and sold the property, leaving a deficiency. Which is correct?
 - a. Carr alone is liable for the deficiency.
 - b. Able alone is liable for the deficiency because he assumed the mortgage.
 - c. First Bank may pursue either Able or Carr.
 - d. Only if Carr fails to pay will Able be liable.
2. Harry borrowed \$175,000 from Judith, giving her a note for that amount and a mortgage on his condo. Judith did not record the mortgage. After Harry defaulted on his payments, Judith began foreclosure proceedings. Harry argued that the mortgage was invalid because Judith had failed to record it. Judith counterargues that because a mortgage is not an interest in real estate, recording is not necessary. Who is correct? Explain.
3. Assume in Exercise 2 that the documents did not contain an acceleration clause and that Harry missed three consecutive payments. Could Judith foreclose? Explain.
4. Rupert, an automobile mechanic, does carpentry work on weekends. He built a detached garage for Clyde for \$20,000. While he was constructing the garage, he agreed to tune up Clyde's car for an additional \$200. When the work was completed, Clyde failed to pay him the \$20,200, and Rupert claimed a mechanic's lien on the garage and car. What problems, if any, might Rupert encounter in enforcing his lien? Explain.
5. In Exercise 4, assume that Clyde had borrowed \$50,000 from First Bank and had given the bank a mortgage on the property two weeks after Rupert commenced work on the garage but several weeks before he filed the lien. Assuming that the bank immediately recorded its mortgage and that Rupert's lien is valid, does the mortgage take priority over the lien? Why?
6. Defendant purchased a house from Seller and assumed the mortgage indebtedness to Plaintiff. All monthly payments were made on time until March 25, 1948, when no more were made. On October 8, 1948, Plaintiff sued to foreclose and accelerate the note. In February of 1948, Plaintiff asked to obtain a loan elsewhere and pay him off; he offered a discount if she would do so, three times, increasing the amount offered

each time. Plaintiff understood that Defendant was getting a loan from the Federal Housing Administration (FHA), but she was confronted with a number of requirements, including significant property improvements, which—because they were neighbors—Plaintiff knew were ongoing. While the improvements were being made, in June or July, he said to her, “Just let the payments go and we’ll settle everything up at the same time,” meaning she need not make monthly payments until the FHA was consummated, and he’d be paid from the proceeds. But then “he changed his tune” and sought foreclosure. Should the court order it?

SELF-TEST QUESTIONS

1. The person or institution holding a mortgage is called
 - a. the mortgagor
 - b. the mortgagee
 - c. the debtor
 - d. none of the above

2. Mortgages are regulated by
 - a. the Truth in Lending Act
 - b. the Equal Credit Opportunity Act
 - c. the Real Estate Settlement Procedures Act
 - d. all of the above

3. At the closing, a mortgagor signs
 - a. only a mortgage
 - b. only a note
 - c. either a note or the mortgage
 - d. both a note and the mortgage

4. Mortgages are terminated by
 - a. repayment
 - b. novation
 - c. foreclosure
 - d. any of the above

5. A lien ordered against a person's property to prevent its disposal during a lawsuit is called
 - a. a judgment lien
 - b. an attachment lien
 - c. a possessory lien
 - d. none of the above

SELF-TEST ANSWERS

1. b
2. d
3. d
4. d
5. b

Chapter 30

Bankruptcy

LEARNING OBJECTIVES

After reading this chapter, you should understand the following:

1. A short history of US bankruptcy law
2. An overview of key provisions of the 2005 bankruptcy act
3. The basic operation of Chapter 7 bankruptcy
4. The basic operation of Chapter 11 bankruptcy
5. The basic operation of Chapter 13 bankruptcy
6. What debtor's relief is available outside of bankruptcy

30.1 Introduction to Bankruptcy and Overview of the 2005 Bankruptcy Act

LEARNING OBJECTIVES

1. Understand what law governs bankruptcy in the United States.
2. Know the key provisions of the law.

The Purpose of Bankruptcy Law

Bankruptcy law governs the rights of creditors and insolvent debtors who cannot pay their debts. In broadest terms, bankruptcy deals with the seizure of the debtor's assets and their distribution to the debtor's various creditors. The term derives from the Renaissance custom of Italian traders, who did their trading from benches in town marketplaces. Creditors literally "broke the bench" of a merchant who failed to pay his debts. The term *banco rotta* (broken bench) thus came to apply to business failures.

In the Victorian era, many people in both England and the United States viewed someone who became bankrupt as a wicked person. In part, this attitude was prompted by the law itself, which to a greater degree in England and to a lesser degree in the United States treated the insolvent debtor as a sort of felon. Until the second half of the nineteenth century, British insolvents could be imprisoned; jail for insolvent debtors was abolished earlier in the United States. And the entire administration of bankruptcy law favored the creditor, who could with a mere filing throw the financial affairs of the alleged insolvent into complete disarray.

Today a different attitude prevails. Bankruptcy is understood as an aspect of financing, a system that permits creditors to receive an equitable distribution of the bankrupt person's assets and promises new hope to debtors facing impossible financial burdens. Without such a law, we may reasonably suppose that the level of economic activity would be far less than it is, for few would be willing to risk being personally burdened forever by crushing debt. Bankruptcy gives the honest debtor a fresh start and resolves disputes among creditors.

History of the Bankruptcy System; Bankruptcy Courts and Judges Constitutional Basis

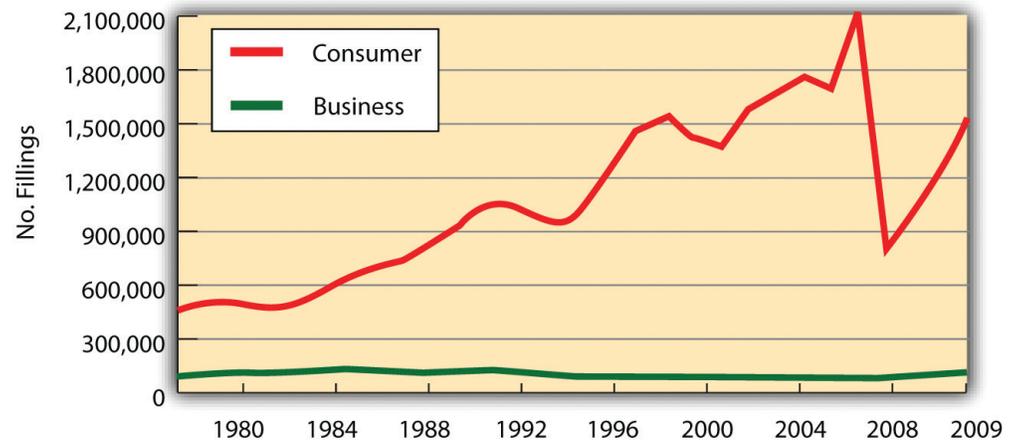

The US Constitution prohibits the states from impairing the “obligation of a contract.” This means that no state can directly provide a means for discharging a debtor unless the debt has been entirely paid. But the Constitution in Article I, Section 8, does give the federal government such a power by providing that Congress may enact a uniform bankruptcy law.

Bankruptcy Statutes

Congress passed bankruptcy laws in 1800, 1841, and 1867. These lasted only a few years each. In 1898, Congress enacted the Bankruptcy Act, which together with the Chandler Act amendments in 1938, lasted until 1978. In 1978, Congress passed the Bankruptcy Reform Act, and in 2005, it adopted the current law, the Bankruptcy Abuse Prevention and Consumer Protection Act (BAPCPA). This law is the subject of our chapter.

At the beginning of the twentieth century, bankruptcies averaged fewer than 20,000 per year. Even in 1935, at the height of the Great Depression, bankruptcy filings in federal court climbed only to 69,000. At the end of World War II, in 1945, they stood at 13,000. From 1950 on, the statistics show a steep increase. During the decade before the 1978 changes, bankruptcy filings in court averaged 181,000 a year—reaching a high of 254,000 in 1975. They soared to over 450,000 filings per year in the 1980s and mostly maintained that pace until just before the 2005 law took effect (see [Figure 30.1 "US Bankruptcies, 1980–2009"](#)). The 2005 act—preceded by “massive lobbying largely by banks and credit card companies” CCH Bankruptcy Reform Act Briefing, “Bankruptcy Abuse Prevention and Consumer Protection Act of 2005,” April 2005, http://www.cch.com/bankruptcy/bankruptcy_04-21.pdf.—was intended by its promoters to restore personal responsibility and integrity in the bankruptcy system. The law’s critics said it was simply a way for the credit card industry to extract more money from consumers before their debts were wiped away.

Figure 30.1 US Bankruptcies, 1980–2009

Bankruptcy Action.com, <http://www.bankruptcyaction.com/USbankstats.htm>, statistics from Administrative Office of the Courts.

Bankruptcy Courts, Judges, and Costs

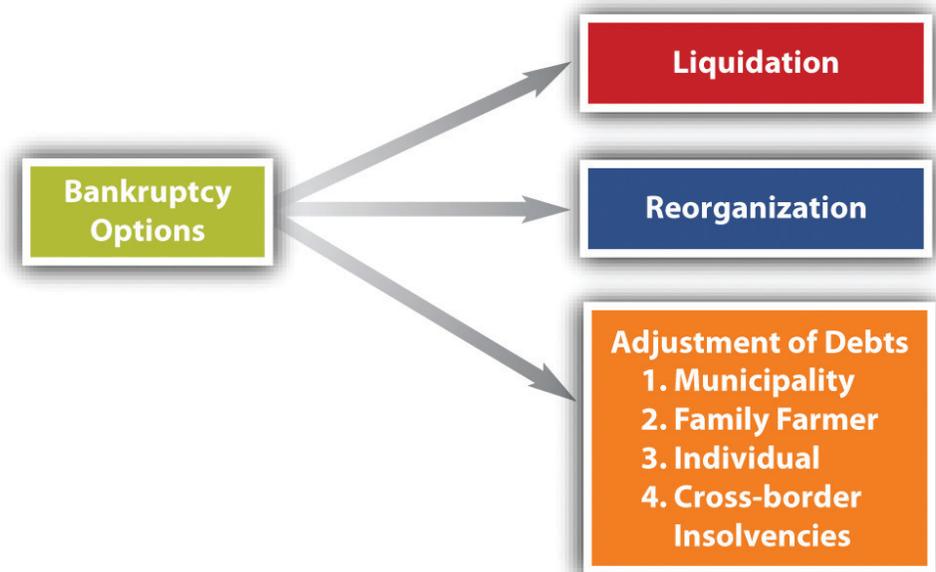

Each federal judicial district has a US Bankruptcy Court, whose judges are appointed by US Courts of Appeal. Unless both sides agree otherwise, bankruptcy judges are to hear only bankruptcy matters (called core proceedings). Bankruptcy trustees are government lawyers appointed by the US Attorney General. They have administrative responsibilities in overseeing the proceedings.

The filing fee for a bankruptcy is about \$200, depending upon the type of bankruptcy, and the typical lawyer's fee for uncomplicated cases is about \$1,200–\$1,400.

Overview of Bankruptcy Provisions

The BAPCPA provides for six different kinds of bankruptcy proceedings. Each is covered by its own chapter in the act and is usually referred to by its chapter number (see [Figure 30.2 "Bankruptcy Options"](#)).

Figure 30.2 Bankruptcy Options

The bankruptcy statute (as opposed to case law interpreting it) is usually referred to as the bankruptcy *code*. The types of bankruptcies are as follows:

- Chapter 7, Liquidation: applies to all debtors except railroads, insurance companies, most banks and credit unions, and homestead associations.¹¹ United States Code, Section 109(b). A liquidation is a “straight” bankruptcy proceeding. It entails selling the debtor’s nonexempt assets for cash and distributing the cash to the creditors, thereby discharging the insolvent person or business from any further liability for the debt. About 70 percent of all bankruptcy filings are Chapter 7.
- Chapter 9, Adjustment of debts of a municipality: applies to municipalities that are insolvent and want to adjust their debts.¹¹ United States Code, Section 109(c). (The law does not suppose that a town, city, or county will go out of existence in the wake of insolvency.)
- Chapter 11, Reorganization: applies to anybody who could file Chapter 7, plus railroads. It is the means by which a financially troubled company can continue to operate while its financial affairs are put on a sounder basis. A business might liquidate following reorganization but will probably take on new life after negotiations with creditors on how the old debt is to be paid off. A company may voluntarily decide to seek

Chapter 11 protection in court, or it may be forced involuntarily into a Chapter 11 proceeding.

- Chapter 12, Adjustment of debts of a family farmer or fisherman with regular annual income.11 United States Code, Section 109(f). Many family farmers cannot qualify for reorganization under Chapter 13 because of the low debt ceiling, and under Chapter 11, the proceeding is often complicated and expensive. As a result, Congress created Chapter 12, which applies only to farmers whose total debts do not exceed \$1.5 million.
- Chapter 13, Adjustment of debts of an individual with regular income: applies only to individuals (no corporations or partnerships) with debt not exceeding about \$1.3 million.11 United States Code, Section 109(e). This chapter permits an individual with regular income to establish a repayment plan, usually either a composition (an agreement among creditors, discussed in [Section 30.5 "Alternatives to Bankruptcy"](#), “Alternatives to Bankruptcy”) or an extension (a stretch-out of the time for paying the entire debt).
- Chapter 15, Ancillary and other cross-border cases: incorporates the United Nations’ Model Law on Cross-Border Insolvency to promote cooperation among nations involved in cross-border cases and is intended to create legal certainty for trade and investment. “Ancillary” refers to the possibility that a US debtor might have assets or obligations in a foreign country; those non-US aspects of the case are “ancillary” to the US bankruptcy case.

The BAPCPA includes three chapters that set forth the procedures to be applied to the various proceedings. Chapter 1, “General Provisions,” establishes who is eligible for relief under the act. Chapter 3, “Case Administration,” spells out the powers of the various officials involved in the bankruptcy proceedings and establishes the methods for instituting bankruptcy cases. Chapter 5, “Creditors, the Debtor, and the Estate,” deals with the debtor’s “estate”—his or her assets. It lays down ground rules for determining which property is to be included in the estate, sets out the powers of the bankruptcy trustee to “avoid” (invalidate) transactions by which the debtor sought to remove property from the estate, orders the distribution of property to creditors, and sets forth the duties and benefits that accrue to the debtor under the act.

To illustrate how these procedural chapters (especially Chapter 3 and Chapter 5) apply, we focus on the most common proceeding: liquidation (Chapter 7). Most of the principles of bankruptcy law discussed in connection with liquidation apply to the other types of proceedings as well. However, some principles vary, and we conclude the chapter by noting special features of two other important proceedings—Chapter 13 and Chapter 11.

KEY TAKEAWAY

Bankruptcy law's purpose is to give the honest debtor a fresh start and to resolve disputes among creditors. The most recent amendments to the law were effective in 2005. Bankruptcy law provides relief to six kinds of debtors: (1) Chapter 7, straight bankruptcy—liquidation—applies to most debtors (except banks and railroads); (2) Chapter 9 applies to municipalities; (3) Chapter 11 is business reorganization; (4) Chapter 12 applies to farmers; (5) Chapter 13 is for wage earners; and (6) Chapter 15 applies to cross-border bankruptcies. The bankruptcy statutes also have several chapters that cover procedures of bankruptcy proceedings.

EXERCISES

1. Why is bankruptcy law required in a modern capitalistic society?
2. Who does the bankruptcy trustee represent?
3. The three most commonly filed bankruptcies are Chapter 7, 11, and 13. Who gets relief under those chapters?

30.2 Case Administration; Creditors' Claims; Debtors' Exemptions and Dischargeable Debts; Debtor's Estate

LEARNING OBJECTIVES

1. Understand the basic procedures involved in administering a bankruptcy case.
2. Recognize the basic elements of creditors' rights under the bankruptcy code.
3. Understand the fundamentals of what property is included in the debtor's estate.
4. Identify some of the debtor's exemptions—what property can be kept by the debtor.
5. Know some of the debts that cannot be discharged in bankruptcy.
6. Know how an estate is liquidated under Chapter 7.

Case Administration (Chapter 3 of the Bankruptcy Code)

Recall that the purpose of liquidation is to convert the debtor's assets—except those exempt under the law—into cash for distribution to the creditors and thereafter to discharge the debtor from further liability. With certain exceptions, any person may voluntarily file a petition to liquidate under Chapter 7. A “person” is defined as any individual, partnership, or corporation. The exceptions are railroads and insurance companies, banks, savings and loan associations, credit unions, and the like.

For a Chapter 7 liquidation proceeding, as for bankruptcy proceedings in general, the various aspects of case administration are covered by the bankruptcy code's Chapter 3. These include the rules governing commencement of the proceedings, the effect of the petition in bankruptcy, the first meeting of the creditors, and the duties and powers of trustees.

Commencement

The bankruptcy begins with the filing of a petition in bankruptcy with the bankruptcy court.

Voluntary and Involuntary Petitions

The individual, partnership, or corporation may file a voluntary petition in bankruptcy; 99 percent of bankruptcies are voluntary petitions filed by the debtor. But involuntary bankruptcy is possible, too, under Chapter 7 or Chapter 11. To put anyone into bankruptcy involuntarily, the petitioning creditors must meet three conditions: (1) they must have claims for unsecured debt amounting to at least \$13,475; (2) three creditors must join in the petition whenever twelve or more creditors have claims against the particular debtor—otherwise, one creditor may file an involuntary petition, as long as his claim is for at least \$13,475; (3) there must be no bona fide dispute about the debt owing. If there is a dispute, the debtor can resist the involuntary filing, and if she wins the dispute, the creditors who pushed for the involuntary petition have to pay the associated costs. Persons owing less than \$13,475, farmers, and charitable organizations cannot be forced into bankruptcy.

The Automatic Stay

The petition—voluntary or otherwise—operates as a **stay**¹ against suits or other actions against the debtor to recover claims, enforce judgments, or create liens (but not alimony collection). In other words, once the petition is filed, the debtor is freed from worry over other proceedings affecting her finances or property. No more debt collection calls! Anyone with a claim, secured or unsecured, must seek relief in the bankruptcy court. This provision in the act can have dramatic consequences. Beset by tens of thousands of products-liability suits for damages caused by asbestos, UNR Industries and Manville Corporation, the nation's largest asbestos producers, filed (separate) voluntary bankruptcy petitions in 1982; those filings automatically stayed all pending lawsuits.

First Meeting of Creditors

Once a petition in bankruptcy is filed, the court issues an **order of relief**², which determines that the debtor's property is subject to bankruptcy court control and creates the stay. The Chapter 7 case may be dismissed by the court if, after a notice and hearing, it finds that among other things (e.g., delay, nonpayment of required bankruptcy fees), the debts are primarily consumer debts and the debtor could pay them off—that's the 2005 act's famous "means test," discussed in [Section 30.3 "Chapter 7 Liquidation"](#).

Assuming that the order of relief has been properly issued, the creditors must meet within a reasonable time. The debtor is obligated to appear at the meeting and submit to examination under oath. The judge does not preside and, indeed, is not even entitled to attend the meeting.

1. Upon filing the bankruptcy, an automatic injunction that halts actions by creditors to collect debts.
2. The court's order determining the debtor's property to be under the control of the bankruptcy court.

When the judge issues an order for relief, an interim trustee is appointed who is authorized initially to take control of the debtor's assets. The trustee is required to collect the property, liquidate the debtor's estate, and distribute the proceeds to the creditors. The trustee may sue and be sued in the name of the estate. Under every chapter except Chapter 7, the court has sole discretion to name the trustee. Under Chapter 7, the creditors may select their own trustee as long as they do it at the first meeting of creditors and follow the procedures laid down in the act.

Trustee's Powers and Duties

The act empowers the trustee to use, sell, or lease the debtor's property in the ordinary course of business or, after notice and a hearing, even if not in the ordinary course of business. In all cases, the trustee must protect any security interests in the property. As long as the court has authorized the debtor's business to continue, the trustee may also obtain credit in the ordinary course of business. She may invest money in the estate to yield the maximum, but reasonably safe, return. Subject to the court's approval, she may employ various professionals, such as attorneys, accountants, and appraisers, and may, with some exceptions, assume or reject executory contracts and unexpired leases that the debtor has made. The trustee also has the power to avoid many prebankruptcy transactions in order to recover property of the debtor to be included in the liquidation.

Creditors' Claims, the Debtor, and the Estate (Chapter 5 of the Bankruptcy Code)

We now turn to the major matters covered in Chapter 5 of the bankruptcy act: creditors' claims, debtors' exemptions and discharge, and the property to be included in the estate. We begin with the rules governing proof of claims by creditors and the priority of their claims.

Claims and Creditors

A claim is defined as a right to payment, whether or not it is reduced to judgment, liquidated, unliquidated, fixed, contingent, matured, unmatured, disputed, undisputed, legal, equitable, secured, or unsecured. A creditor is defined as a person or entity with a claim that arose no later than when the court issues the order for relief. These are very broad definitions, intended to give the debtor the broadest possible relief when finally discharged.

Proof of Claims

Before the trustee can distribute proceeds of the estate, unsecured creditors must file a **proof of claim**³, prima facie evidence that they are owed some amount of money. They must do so within six months after the first date set for the first meeting of creditors. A creditor's claim is disallowed, even though it is valid, if it is not filed in a timely manner. A party in interest, such as the trustee or creditor, may object to a proof of claim, in which case the court must determine whether to allow it. In the absence of objection, the claim is "deemed allowed." The court will not allow some claims. These include unenforceable claims, claims for unmaturing interest, claims that may be offset by debts the creditor owes the debtor, and unreasonable charges by an insider or an attorney. If it's a "no asset" bankruptcy—most are—creditors are in effect told by the court not to waste their time filing proof of claim.

Claims with Priority

The bankruptcy act sets out categories of claimants and establishes priorities among them. The law is complex because it sets up different orders of priorities.

First, *secured creditors* get their security interests before anyone else is satisfied, because the security interest is not part of the property that the trustee is entitled to bring into the estate. This is why being a secured creditor is important (as discussed in [Chapter 28 "Secured Transactions and Suretyship"](#) and [Chapter 29 "Mortgages and Nonconsensual Liens"](#)). To the extent that secured creditors have claims in excess of their collateral, they are considered unsecured or general creditors and are lumped in with general creditors of the appropriate class.

Second, of the six classes of claimants (see [Figure 30.3 "Distribution of the Estate"](#)), the first is known as that of "*priority claims*." It is subdivided into ten categories ranked in order of priority. The highest-priority class within the general class of priority claims must be paid off in full before the next class can share in a distribution from the estate, and so on. Within each class, members will share pro rata if there are not enough assets to satisfy everyone fully. The priority classes, from highest to lowest, are set out in the bankruptcy code (11 USC Section 507) as follows:

(1) *Domestic support obligations* ("DSO"), which are claims for support due to the spouse, former spouse, child, or child's representative, and at a lower priority within this class are any claims by a governmental unit that has rendered support assistance to the debtor's family obligations.

3. The form used to file a claim by a creditor.

(2) *Administrative expenses* that are required to administer the bankruptcy case itself. Under former law, administrative expenses had the highest priority, but Congress elevated domestic support obligations above administrative expenses with the passage of the BAPCPA. Actually, though, administrative expenses have a de facto priority over domestic support obligations, because such expenses are deducted before they are paid to DSO recipients. Since trustees are paid from the bankruptcy estate, the courts have allowed de facto top priority for administrative expenses because no trustee is going to administer a bankruptcy case for nothing (and no lawyer will work for long without getting paid, either).

(3) *Gap creditors*. Claims made by **gap creditors**⁴ in an involuntary bankruptcy petition under Chapter 7 or Chapter 11 are those that arise between the filing of an involuntary bankruptcy petition and the order for relief issued by the court. These claims are given priority because otherwise creditors would not deal with the debtor, usually a business, when the business has declared bankruptcy but no trustee has been appointed and no order of relief issued.

(4) *Employee wages* up to \$10,950 for each worker, for the 180 days previous to either the bankruptcy filing or when the business ceased operations, whichever is earlier (180-day period).

(5) *Unpaid contributions to employee benefit plans* during the 180-day period, but limited by what was already paid by the employer under subsection (4) above plus what was paid on behalf of the employees by the bankruptcy estate for any employment benefit plan.

(6) *Any claims for grain from a grain producer or fish from a fisherman* for up to \$5,400 each against a storage or processing facility.

(7) *Consumer layaway deposits* of up to \$2,425 each.

(8) *Taxes owing to federal, state, and local governments* for income, property, employment and excise taxes. Outside of bankruptcy, taxes usually have a higher priority than this, which is why many times creditors—not tax creditors—file an involuntary bankruptcy petition against the debtor so that they have a higher priority in bankruptcy than they would outside it.

(9) *Allowed claims based on any commitment by the debtor to a federal depository institution* to maintain the capital of an insured depository institution.

4. Creditors giving credit, or lending money to a debtor, in the period between the filing of an involuntary bankruptcy petition and the entry of the order for relief.

(10) *Claims for death or personal injury from a motor vehicle or vessel that occurred while the debtor was legally intoxicated.*

Third through sixth (after secured creditors and priority claimants), other claimants are attended to, but not immediately. The bankruptcy code (perhaps somewhat awkwardly) deals with who gets paid when in more than one place. Chapter 5 sets out priority *claims* as just noted; that order applies to *all* bankruptcies. Chapter 7, dealing with liquidation (as opposed to Chapter 11 and Chapter 13, wherein the debtor pays most of her debt), then lists the order of *distribution*. Section 726 of 11 United States Code provides: “Distribution of property of the estate. (1) First, in payment of claims of the kind specified in, and in the order specified in section 507...” (again, the priority of claims just set out). Following the order specified in the bankruptcy code, our discussion of the order of distribution is taken up in [Section 30.3 "Chapter 7 Liquidation"](#).

Debtor's Duties and Exemptions

The act imposes certain duties on the debtor, and it exempts some property that the trustee can accumulate and distribute from the estate.

Debtor's Duties

The debtor, reasonably enough, is supposed to file a list of creditors, assets, liabilities, and current income, and a statement of financial affairs. The debtor must cooperate with the trustee and be an “honest debtor” in general; the failure to abide by these duties is grounds for a denial of discharge.

The individual debtor (not including partnerships or corporations) also must show evidence that he or she attended an approved nonprofit budget and counseling agency within 180 days before the filing. The counseling may be “an individual or group briefing (including a briefing conducted by telephone or on the Internet) that outline[s] the opportunities for available credit counseling and assisted such individual in performing a related budget analysis.”¹¹ United States Code, Section 109(h). In Section 111, the 2005 act describes who can perform this counseling, and a host of regulations and enforcement mechanisms are instituted, generally applying to persons who provide goods or services related to bankruptcy work for consumer debtors whose nonexempt assets are less than \$150,000, in order to improve the professionalism of attorneys and others who work with debtors in, or contemplating, bankruptcy. A debtor who is incapacitated, disabled, or on active duty in a military zone doesn't have to go through the counseling.

Debtor's Exemptions

The bankruptcy act exempts certain property of the estate of an individual debtor so that he or she will not be impoverished upon discharge. Exactly what is exempt depends on state law.

Notwithstanding the Constitution's mandate that Congress establish "uniform laws on the subject of bankruptcies," bankruptcy law is in fact not uniform because the states persuaded Congress to allow nonuniform exemptions. The concept makes sense: what is necessary for a debtor in Maine to live a nonimpoverished postbankruptcy life might not be the same as what is necessary in southern California. The bankruptcy code describes how a person's residence is determined for claiming state exemptions: basically, where the debtor lived for 730 days immediately before filing or where she lived for 180 days immediately preceding the 730-day period. For example, if the debtor resided in the same state, without interruption, in the two years leading up to the bankruptcy, he can use that state's exemptions. If not, the location where he resided for a majority of the half-year preceding the initial two years will be used. The point here is to reduce "exemption shopping"—to reduce the incidences in which a person moves to a generous exemption state only to declare bankruptcy there.

Unless the state has opted out of the federal exemptions (a majority have), a debtor can choose which exemptions to claim. These are the states that allow residents to choose either federal or state exemptions (the other states mandate the use of state exemptions only): Arkansas, Connecticut, District of Columbia, Hawaii, Kentucky, Massachusetts, Michigan, Minnesota, New Hampshire, New Jersey, New Mexico, Pennsylvania, Rhode Island, Texas, Vermont, Washington, and Wisconsin. There are also some exemptions not included in the bankruptcy code: veteran's, Social Security, unemployment, and disability benefits are outside the code, and alimony payments are also exempt under federal law. The federal exemptions can be doubled by a married couple filing together.

Here are the federal exemptions: 11 United States Code, Section 522.

Homestead:

- Real property, including mobile homes and co-ops, or burial plots up to \$20,200. Unused portion of homestead, up to \$10,125, may be used for other property.

Personal Property:

- Motor vehicle up to \$3,225.
- Animals, crops, clothing, appliances and furnishings, books, household goods, and musical instruments up to \$525 per item, and up to \$10,775 total.
- Jewelry up to \$1,350.
- \$1,075 of any property, and unused portion of homestead up to \$10,125.
- Health aids.
- Wrongful death recovery for person you depended upon.
- Personal injury recovery up to \$20,200 except for pain and suffering or for pecuniary loss.
- Lost earnings payments.

Pensions:

- Tax exempt retirement accounts; IRAs and Roth IRAs up to \$1,095,000 per person.

Public Benefits:

- Public assistance, Social Security, Veteran's benefits, Unemployment Compensation.
- Crime victim's compensation.

Tools of Trade:

- Implements, books, and tools of trade, up to \$2,025.

Alimony and Child Support:

- Alimony and child support needed for support.

Insurance:

- Unmatured life insurance policy except credit insurance.
- Life insurance policy with loan value up to \$10,775.
- Disability, unemployment, or illness benefits.
- Life insurance payments for a person you depended on, which you need for support.

In the run-up to the 2005 changes in the bankruptcy law, there was concern that some states—especially Florida—had gone too far in giving debtors’ exemptions. The Florida homestead exemption is “[r]eal or personal property, including mobile or modular home and condominium, to unlimited value. Property cannot exceed: 1/2 acre in a municipality, or 160 acres elsewhere.” The 2005 act limits the state homestead exemptions, as noted. The BAPCPA amended Section 522 to limit the amount of equity a debtor can exempt, even in a state with unlimited homestead exemptions, in certain circumstances. (Section 522(o) and (p) set out the law’s changes.)

Secured Property

As already noted, secured creditors generally have priority, even above the priority claims. That’s why banks and lending institutions almost always secure the debtor’s obligations. But despite the general rule, the debtor can avoid certain types of security interests. Liens that attach to assets that the debtor is entitled to claim as exempt can be avoided to the extent the lien impairs the value of the exemption in both Chapter 13 and Chapter 7. To be avoidable, the lien must be a judicial lien (like a judgment or a garnishment), or a nonpossessory, non-purchase-money security interest in household goods or tools of the trade.

Tax liens (which are statutory liens, not judicial liens) aren’t avoidable in Chapter 7 even if they impair exemptions; tax liens can be avoided in Chapter 13 to the extent the lien is greater than the asset’s value.

Dischargeable and Nondischargeable Debts

The whole point of bankruptcy, of course, is for debtors to get relief from the press of debt that they cannot reasonably pay.

Dischargeable Debts

Once discharged, the debtor is no longer legally liable to pay any remaining unpaid debts (except nondischargeable debts) that arose before the court issued the order of relief. The discharge operates to void any money judgments already rendered against the debtor and to bar the judgment creditor from seeking to recover the judgment.

Nondischargeable Debts

Some debts are not dischargeable in bankruptcy. A bankruptcy discharge varies, depending on the type of bankruptcy the debtor files (Chapter 7, 11, 12, or 13). The most common nondischargeable debts listed in Section 523 include the following:

- All debts not listed in the bankruptcy petition
- Student loans—unless it would be an undue hardship to repay them (see [Section 30.6 "Cases"](#), *In re Zygarowicz*)
- Taxes—federal, state, and municipal
- Fines for violating the law, including criminal fines and traffic tickets
- Alimony and child support, divorce, and other property settlements
- Debts for personal injury caused by driving, boating, or operating an aircraft while intoxicated
- Consumer debts owed to a single creditor and aggregating more than \$550 for luxury goods or services incurred within ninety days before the order of relief
- Cash advances aggregating more than \$825 obtained by an individual debtor within ninety days before the order for relief
- Debts incurred because of fraud or securities law violations
- Debts for willful injury to another's person or his or her property
- Debts from embezzlement

This is not an exhaustive list, and as noted in [Section 30.3 "Chapter 7 Liquidation"](#), there are some circumstances in which it is not just certain debts that aren't dischargeable: sometimes a discharge is denied entirely.

Reaffirmation

A debtor may reaffirm a debt that was discharged. Section 524 of the bankruptcy code provides important protection to the debtor intent on doing so. No **reaffirmation**⁵ is binding unless the reaffirmation was made *prior* to the granting of the discharge; the reaffirmation agreement must contain a clear and conspicuous statement that advises the debtor that the agreement is not required by bankruptcy or nonbankruptcy law and that the agreement may be rescinded by giving notice of rescission to the holder of such claim at any time prior to discharge or within sixty days after the agreement is filed with the court, whichever is later.

A written agreement to reaffirm a debt must be filed with the bankruptcy court. The attorney for the debtor must file an affidavit certifying that the agreement represents a fully informed and voluntary agreement, that the agreement does not impose an undue hardship on the debtor or a dependent of the debtor, and that the

5. To confirm again the validity of a promise that was discharged, as in bankruptcy.

attorney has fully advised the debtor of the legal consequences of the agreement and of a default under the agreement. Where the debtor is an individual who was not represented by an attorney during the course of negotiating the agreement, the reaffirmation agreement must be approved by the court, after disclosures to the debtor, and after the court finds that it is in the best interest of the debtor and does not cause an undue hardship on the debtor or a dependent.

Property Included in the Estate

When a bankruptcy petition is filed, a **debtor's estate**⁶ is created consisting of all the debtor's then-existing property interests, whether legal or equitable. In addition, the estate includes any bequests, inheritances, and certain other distributions of property that the debtor receives within the next 180 days. It also includes property recovered by the trustee under certain powers granted by the law. What is not exempt property will be distributed to the creditors.

The bankruptcy code confers on the trustee certain powers to recover property for the estate that the debtor transferred before bankruptcy.

One such power (in Section 544) is to act as a **hypothetical lien creditor**⁷. This power is best explained by an example. Suppose Dennis Debtor purchases equipment on credit from Acme Supply Company. Acme fails to perfect its security interest, and a few weeks later Debtor files a bankruptcy petition. By virtue of the section conferring on the trustee the status of a hypothetical lien creditor, the trustee can act as though she had a lien on the equipment, with priority over Acme's unperfected security interest. Thus the trustee can avoid Acme's security interest, with the result that Acme would be treated as an unsecured creditor.

Another power is to avoid transactions known as **voidable preferences**⁸—transactions highly favorable to particular creditors.¹¹ United States Code, Section 547. A transfer of property is voidable if it was made (1) to a creditor or for his benefit, (2) on account of a debt owed before the transfer was made, (3) while the debtor was insolvent, (4) on or within ninety days before the filing of the petition, and (5) to enable a creditor to receive more than he would have under Chapter 7. If the creditor was an “insider”—one who had a special relationship with the debtor, such as a relative or general partner of the debtor or a corporation that the debtor controls or serves in as director or officer—then the trustee may void the transaction if it was made within one year of the filing of the petition, assuming that the debtor was insolvent at the time the transaction was made.

Some prebankruptcy transfers that seem to fall within these provisions do not. The most important exceptions are (1) transfers made for new value (the debtor buys a

6. The intangible entity containing all the debtor's nonexempt property and liabilities.

7. The trustee acts as if he or she were a lien creditor with power to defeat any unperfected security interests.

8. Transfer of assets by a debtor filing a voluntary bankruptcy petition in favor of one creditor at the expense of other secured creditors.

refrigerator for cash one week before filing a petition; this is an exchange for new value and the trustee may not void it); (2) a transfer that creates a purchase-money security interest securing new value if the secured party perfects within ten days after the debtor receives the goods; (3) payment of a debt incurred in the ordinary course of business, on ordinary business terms; (4) transfers totaling less than \$600 by an individual whose debts are primarily consumer debts; (5) transfers totaling less than \$5,475 by a debtor whose debts are not primarily consumer debts; and (6) transfers to the extent the transfer was a bona fide domestic support obligation.

A third power of the trustee is to avoid **fraudulent transfers**⁹ made within two years before the date that the bankruptcy petition was filed.¹¹ United States Code, Section 548. This provision contemplates various types of fraud. For example, while insolvent, the debtor might transfer property to a relative for less than it was worth, intending to recover it after discharge. This situation should be distinguished from the voidable preference just discussed, in which the debtor pays a favored creditor what he actually owes but in so doing cannot then pay other creditors.

KEY TAKEAWAY

A bankruptcy commences with the filing of a petition of bankruptcy. Creditors file proofs of claim and are entitled to certain priorities: domestic support obligations and the costs of administration are first. The debtor has an obligation to file full and truthful schedules and to attend a credit counseling session, if applicable. The debtor has a right to claim exemptions, federal or state, that leave her with assets sufficient to make a fresh start: some home equity, an automobile, and clothing and personal effects, among others. The honest debtor is discharged of many debts, but some are nondischargeable, among them taxes, debt from illegal behavior (embezzlement, drunk driving), fines, student loans, and certain consumer debt. A debtor may, after proper counseling, reaffirm debt, but only before filing. The bankruptcy trustee takes over the nonexempt property of the debtor; he may act as a hypothetical lien creditor (avoiding unperfected security interests) and avoid preferential and fraudulent transfers that unfairly diminish the property of the estate.

9. The transfer of an asset for less than its fair value.

EXERCISES

1. What is the automatic stay, and when does it arise?
2. Why are the expenses of claimants administering the bankruptcy given top priority (notwithstanding the nominal top priority of domestic support obligations)?
3. Why are debtor's exemptions not uniform? What sorts of things are exempt from being taken by the bankruptcy trustee, and why are such exemptions allowed?
4. Some debts are nondischargeable; give three examples. What is the rationale for disallowing some debts from discharge?
5. How does the law take care that the debtor is fully informed of the right *not* to reaffirm debts, and why is such care taken?
6. What is a hypothetical lien creditor? What is the difference between a preferential transfer and a fraudulent one? Why is it relevant to discuss these three things in the same paragraph?

30.3 Chapter 7 Liquidation

LEARNING OBJECTIVES

1. Recognize the grounds for a Chapter 7 case to be dismissed.
2. Be familiar with the BAPCPA's means-testing requirements before Chapter 7 discharge is granted.
3. Know under what circumstances a debtor will be denied discharge.
4. Understand the order of distribution of the debtor's estate under Chapter 7.

Trustee's Duties under Chapter 7; Grounds for Dismissal: The Means Test

Except as noted, the provisions discussed up until now apply to each type of bankruptcy proceeding. The following discussion is limited to certain provisions under Chapter 7.

Trustee's Duties

In addition to the duties already noted, the trustee has other duties under Chapter 7. He must sell the property for money, close up the estate "as expeditiously as is compatible with the best interests of parties in interest," investigate the debtor's financial affairs, examine proofs of claims, reject improper ones, oppose the discharge of the debtor where doing so is advisable in the trustee's opinion, furnish a creditor with information about the estate and his administration (unless the court orders otherwise), file tax reports if the business continues to be operated, and make a final report and file it with the court.

Conversion

Under Section 706 of the bankruptcy code, the debtor may convert a Chapter 7 case to Chapter 11, 12, or 13 at any time. The court may order a **conversion**¹⁰ to Chapter 11 at any time upon request of a party in interest and after notice and hearing. And, as discussed next, a case may be converted from Chapter 7 to Chapter 13 if the debtor agrees, or be dismissed if he does not, in those cases where the debtor makes too much money to be discharged without it being an "abuse" under the 2005 act.

10. In bankruptcy, changing the chapter number filed from one to another.

Dismissal

The court may dismiss a case for three general reasons.

The first reason is “for cause,” after notice and a hearing for cause, including (1) unreasonable delay by the debtor that prejudices creditors, (2) nonpayment of any fees required, (3) failure to file required documents and schedules.

The second reason for dismissal (or, with the debtor’s permission, conversion to Chapter 11 or 13) applies to debtors whose debt is primarily consumer debt: the court may—after notice and a hearing—dismiss a case if granting relief would be “an abuse of the provisions” of the bankruptcy code.

The third reason for dismissal is really the crux of the 2005 law: under it, the court will find that granting relief under Chapter 7 to a debtor whose debt is primarily consumer debt is “an abuse” if the debtor makes too much money. The debtor must pass a means test: If he’s poor enough, he can go Chapter 7. If he is not poor enough (or if they are not, in case of a married couple), Chapter 13—making payments to creditors—is the way to go. Here is one practitioner’s explanation of the means test:

To apply the means test, the courts will look at the debtor’s average income for the 6 months prior to filing [not the debtor’s income at the time of filing, when—say—she just lost her job] and compare it to the median income for that state. For example, the median annual income for a single wage-earner in California is \$42,012. If the income is below the median, then Chapter 7 remains open as an option. If the income exceeds the median, the remaining parts of the means test will be applied.

The next step in the calculation takes monthly income less reasonable living expenses [“reasonable living expenses” are strictly calculated based on IRS standards; the figure excludes payments on the debts included in the bankruptcy], and multiplies that figure times 60. This represents the amount of income available over a 5-year period for repayment of the debt obligations.

If the income available for debt repayment over that 5-year period is \$10,000 or more, then Chapter 13 will be required. In other words, anyone earning above the state median, and with at least \$166.67 per month (\$10,000 divided by 60) of available income, will automatically be denied Chapter 7. So for example, if the court determines that you have \$200 per month income above living expenses, \$200 times 60 is \$12,000. Since \$12,000 is above \$10,000, you’re stuck with Chapter 13.

What happens if you are above the median income but do NOT have at least \$166.67 per month to pay toward your debts? Then the final part of the means test is applied. If the available income is less than \$100 per month, then Chapter 7 again becomes an option. If the available income is between \$100 and \$166.66, then it is measured against the debt as a percentage, with 25% being the benchmark.

In other words, let's say your income is above the median, your debt is \$50,000, and you only have \$125 of available monthly income. We take \$125 times 60 months (5 years), which equals \$7,500 total. Since \$7,500 is less than 25% of your \$50,000 debt, Chapter 7 is still a possible option for you. If your debt was only \$25,000, then your \$7,500 of available income would exceed 25% of your debt and you would be required to file under Chapter 13.

To sum up, first figure out whether you are above or below the median income for your state—median income figures are available at <http://www.new-bankruptcy-law-info.com>. Be sure to account for your spouse's income if you are a two-income family. Next, deduct your average monthly living expenses from your monthly income and multiply by 60. If the result is above \$10,000, you're stuck with Chapter 13. If the result is below \$6,000, you may still be able to file Chapter 7. If the result is between \$6,000 and \$10,000, compare it to 25% of your debt. Above 25%, you're looking at Chapter 13 for sure. Charles Phelan, "The New Bankruptcy Means Test Explained in Plain English," *Buzzle.com*, <http://www.buzzle.com/editorials/1-10-2006-85999.asp>.

The law also requires that attorneys sign the petition (as well as the debtor); the attorney's signature certifies that the petition is well-grounded in fact and that the attorney has no knowledge after reasonable inquiry that the schedules and calculations are incorrect. Attorneys thus have an incentive to err in favor of filing Chapter 13 instead of Chapter 7 (perhaps that was part of Congress's purpose in this section of the law).

If there's been a **dismissal**¹¹, the debtor and creditors have the same rights and remedies as they had prior to the case being commenced—as if the case had never been filed (almost). The debtor can refile immediately, unless the court orders a 120-day penalty (for failure to appear). In most cases, a debtor can file instantly for a Chapter 13 following a Chapter 7 dismissal.

Distribution of the Estate and Discharge; Denying Discharge

Distribution of the Estate

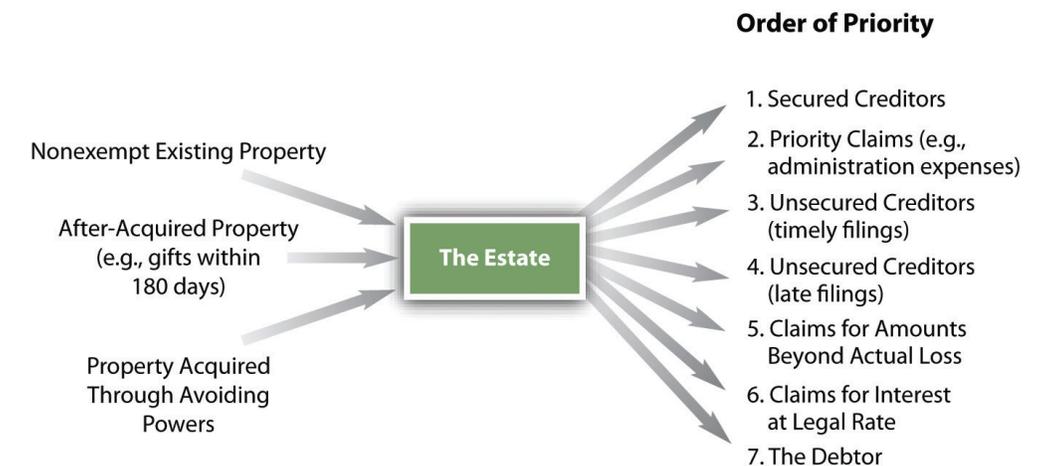

11. An order terminating a case before its normal end.

The estate includes all his or her assets or all their assets (in the case of a married couple) broadly defined. From the estate, the debtor removes property claimed

exempt; the trustee may recapture some assets improperly removed from the estate (preferential and fraudulent transfers), and what's left is the distributable estate. It is important to note that the vast majority of Chapter 7 bankruptcies are **no-asset cases**¹²—90–95 percent of them, according to one longtime bankruptcy trustee. Eugene Crane, Hearing before the Subcommittee on Commercial and Administrative Law of the Committee on the Judiciary, House of Representatives, One Hundred Tenth Congress, Second Session, *Statement to the House Judiciary Subcommittee*, September 16, 2008; <http://judiciary.house.gov/hearings/printers/110th/44493.PDF>. That means creditors get nothing. But in those cases where there are assets, the trustee must distribute the estate to the remaining classes of claimants in this order:

1. Secured creditors, paid on their security interests
2. Claims with priority
3. Unsecured creditors who filed their claims on time
4. Unsecured creditors who were tardy in filing, if they had no notice of the bankruptcy
5. Unsecured creditors who were tardy and had notice, real or constructive
6. Claims by creditors for fines, penalties, and exemplary or punitive damages
7. Interest for all creditors at the legal rate
8. The debtor

Figure 30.3 *Distribution of the Estate*

12. A bankruptcy case with no nonexempt property.

Discharge

Once the estate is distributed, the court will order the debtor discharged (except for nondischargeable debts) unless one of the following overall exceptions applies for denying **discharge**¹³ (i.e., relief from the debt). This list is not exhaustive:

1. The debtor is not an individual. In a Chapter 7 case, a corporation or partnership does not receive a bankruptcy discharge; instead, the entity is dissolved and its assets liquidated. The debts remain theoretically valid but uncollectible until the statute of limitations on them has run. Only an individual can receive a Chapter 7 discharge.¹¹ United States Code, Section 727(a)(1).
2. The debtor has concealed or destroyed property with intent to defraud, hinder, or delay within twelve months preceding filing of the petition.
3. The debtor has concealed, destroyed, or falsified books and records
4. The debtor has lied under oath, knowingly given a false account, presented or used a false claim, given or received bribes, refused to obey court orders.
5. The debtor has failed to explain satisfactorily any loss of assets.
6. The debtor has declared Chapter 7 or Chapter 11 bankruptcy within eight years, or Chapter 13 within six years (with some exceptions).
7. The debtor failed to participate in “an instructional course concerning personal financial management” (unless that’s excused).
8. An individual debtor has “abused” the bankruptcy process. A preferential transfer is not an “abuse,” but it will be set aside. Making too much money to file Chapter 7 is “an abuse” that will deny discharge.

A discharge may be revoked if the debtor committed fraud during the bankruptcy proceedings, but the trustee or a creditor must apply for revocation within one year of the discharge.

Having the **discharge denied**¹⁴ does not affect the administration of the bankruptcy case. The trustee can (and will) continue to liquidate any nonexempt assets of the debtor and pay the creditors, but the debtor still has to pay the debts left over.

13. The determination that debts are no longer owing.

14. Refusal of a bankruptcy court to allow discharge, usually because the debtor has acted in bad faith.

As to any consequence of discharge, bankruptcy law prohibits governmental units from discriminating against a person who has gone through bankruptcy. Debtors are also protected from discrimination by private employers; for example, a private

employer may not fire a debtor because of the bankruptcy. Certainly, however, the debtor's credit rating will be affected by the bankruptcy.

KEY TAKEAWAY

A Chapter 7 bankruptcy case may be dismissed for cause or because the debtor has abused the system. The debtor is automatically considered to have abused the system if he makes too much money. With the debtor's permission, the Chapter 7 may be converted to Chapter 11, 12, or 13. The law requires that the debtor pass a means test to qualify for Chapter 7. Assuming the debtor does qualify for Chapter 7, her nonexempt assets (if there are any) are sold by the trustee and distributed to creditors according to a priority set out in the law. A discharge may be denied, in general because the debtor has behaved dishonestly or—again—has abused the system.

EXERCISES

1. What is the difference between denial of a discharge for cause and denial for abuse?
2. What is the difference between a dismissal and a denial of discharge?
3. Which creditors get satisfied first in a Chapter 7 bankruptcy?

30.4 Chapter 11 and Chapter 13 Bankruptcies

LEARNING OBJECTIVES

1. Understand the basic concepts of Chapter 11 bankruptcies.
2. Understand the basic concepts of Chapter 13 bankruptcies.

Reorganization: Chapter 11 Bankruptcy

Overview

Chapter 11 provides a means by which corporations, partnerships, and other businesses, including sole proprietorships, can rehabilitate themselves and continue to operate free from the burden of debts that they cannot pay.

It is simple enough to apply for the protection of the court in Chapter 11 proceeding, and for many years, large financially ailing companies have sought shelter in Chapter 11. Well-known examples include General Motors, Texaco, K-Mart, Delta Airlines, and Northwest Airlines. An increasing number of corporations have turned to Chapter 11 even though, by conventional terms, they were solvent. Doing so enables them to negotiate with creditors to reduce debt. It also may even permit courts to snuff out lawsuits that have not yet been filed. Chapters 3 and 5, discussed in [Section 30.2 "Case Administration; Creditors' Claims; Debtors' Exemptions and Dischargeable Debts; Debtor's Estate"](#), apply to Chapter 11 proceedings also. Our discussion, therefore, is limited to special features of Chapter 11.

How It Works

Eligibility

Any person eligible for discharge in Chapter 7 proceeding (plus railroads) is eligible for a Chapter 11 proceeding, except stockbrokers and commodity brokers. Individuals filing Chapter 11 must take credit counseling; businesses do not. A company may voluntarily enter Chapter 11 or may be put there involuntarily by creditors. Individuals can file Chapter 11 particularly if they have too much debt to qualify for Chapter 13 and make too much money to qualify for Chapter 7; under the 2005 act, individuals must commit future wages to creditors, just as in Chapter 13.11 United States Code, Sections 1115, 1123(a)(8), and 1129(a)(15).

Operation of Business

Unless a trustee is appointed, the debtor will retain possession of the business and may continue to operate with its own management. The court may appoint a trustee on request of any party in interest after notice and a hearing. The appointment may be made for cause—such as dishonesty, incompetence, or gross mismanagement—or if it is otherwise in the best interests of the creditors. Frequently, the same incompetent management that got the business into bankruptcy is left running it—that’s a criticism of Chapter 11.

Creditors’ Committee

The court must appoint a committee of unsecured creditors as soon as practicable after issuing the order for relief. The committee must consist of creditors willing to serve who have the seven largest claims, unless the court decides to continue a committee formed before the filing, if the committee was fairly chosen and adequately represents the various claims. The committee has several duties, including these: (1) to investigate the debtor’s financial affairs, (2) to determine whether to seek appointment of a trustee or to let the business continue to operate, and (3) to consult with the debtor or trustee throughout the case.

The Reorganization Plan

The debtor may always file its own plan, whether in a voluntary or involuntary case. If the court leaves the debtor in possession without appointing a trustee, the debtor has the exclusive right to file a reorganization plan during the first 120 days. If it does file, it will then have another 60 days to obtain the creditors’ acceptances. Although its exclusivity expires at the end of 180 days, the court may lengthen or shorten the period for good cause. At the end of the exclusive period, the creditors’ committee, a single creditor, or a holder of equity in the debtor’s property may file a plan. If the court does appoint a trustee, any party in interest may file a plan at any time.

The Bankruptcy Reform Act specifies certain features of the plan and permits others to be included. Among other things, the plan must (1) designate classes of claims and ownership interests; (2) specify which classes or interests are impaired—a claim or ownership interest is impaired if the creditor’s legal, equitable, contractual rights are altered under the plan; (3) specify the treatment of any class of claims or interests that is impaired under the plan; (4) provide the same treatment of each claim or interests of a particular class, unless the holder of a particular claim or interest agrees to a less favorable treatment; and (5) provide adequate means for carrying out the plan. Basically, what the plan does is provide a process for rehabilitating the company’s faltering business by relieving it from

repaying part of its debt and initiating reforms so that the company can try to get back on its feet.

Acceptance of the Plan

The act requires the plan to be accepted by certain proportions of each impaired class of claims and interests. A class of claims accepts the plan if creditors representing at least two-thirds of the dollar amount of claims and more than one-half the number of allowed claims vote in favor. A class of property interests accepts the plan if creditors representing two-thirds of the dollar amount of the allowed ownership interests vote in favor. Unimpaired classes of claims and interest are deemed to have accepted the plan; it is unnecessary to solicit their acceptance.

Confirmation of the Plan

The final act necessary under Chapter 11 is confirmation by the court. Once the court confirms the plan, the plan is binding on all creditors. The rules governing confirmation are complex, but in essence, they include the following requirements:

1. The plan must have been proposed in good faith. Companies must also make a good-faith attempt to negotiate modifications in their collective bargaining agreements (labor union contracts).
2. All provisions of the act must have been complied with.
3. The court must have determined that the reorganized business will be likely to succeed and be unlikely to require further financial reorganization in the foreseeable future.
4. Impaired classes of claims and interests must have accepted the plan, unless the plan treats them in a “fair and equitable” manner, in which case consent is not required. This is sometimes referred to as the cram-down provision.
5. All members of every class must have received no less value than they would have in Chapter 7 liquidation.

Discharge, Conversion

The debtor gets discharged when all payments under the plan are completed. A Chapter 11 bankruptcy may be converted to Chapter 7, with some restrictions, if it turns out the debtor cannot make the plan work.

Adjustment of Debts of an Individual with Regular Income: Chapter 13 Bankruptcy In General

Anyone with a steady income who is having difficulty paying off accumulated debts may seek the protection of a bankruptcy court in Chapter 13 proceeding (often called the wage earner's plan). Under this chapter, the individual debtor presents a payment plan to creditors, and the court appoints a trustee. If the creditors wind up with more under the plan presented than they would receive in Chapter 7 proceeding, then the court is likely to approve it. In general, a Chapter 13 repayment plan extends the time to pay the debt and may reduce it so that the debtor need not pay it all. Typically, the debtor will pay a fixed sum monthly to the trustee, who will distribute it to the creditors. The previously discussed provisions of Chapters 3 and 5 apply also to this chapter; therefore, the discussion that follows focuses on some unique features of Chapter 13.

People seek Chapter 13 discharges instead of Chapter 7 for various reasons: they make too much money to pass the Chapter 7 means test; they are behind on their mortgage or car payments and want to make them up over time and reinstate the original agreement; they have debts that can't be discharged in Chapter 7; they have nonexempt property they want to keep; they have codebtors on a personal debt who would be liable if the debtor went Chapter 7; they have a real desire to pay their debts but cannot do so without getting the creditors to give them some breathing room. Chapter 7 cases may always be converted to Chapter 13.

How It Works Eligibility

Chapter 13 is voluntary only. Anyone—sole proprietorships included—who has a regular income, unsecured debts of less than \$336,000, and secured debts of less than \$1,010,650 is eligible to seek its protection. The debts must be unpaid and owing at the time the debtor applies for relief. If the person has more debt than that, she will have to file Chapter 11. The debtor must attend a credit-counseling class, as in Chapter 7.

The Plan

Plans are typically extensions or compositions—that is, they extend the time to pay what is owing, or they are agreements among creditors each to accept something less than the full amount owed (so that all get something). Under Chapter 13, the stretch-out period is three to five years. The plan must provide for payments of all future income or a sufficient portion of it to the trustee. Priority creditors are entitled to be paid in full, although they may be paid later than required under the

original indebtedness. As long as the plan is being carried out, the debtor may enjoin any creditors from suing to collect the original debt.

Confirmation

Under Section 1325 of the bankruptcy code, the court must approve the plan if it meets certain requirements. These include (1) distribution of property to unsecured creditors whose claims are allowed in an amount no less than that which they would have received had the estate been liquidated under Chapter 7; (2) acceptance by secured creditors, with some exceptions, such as when the debtor surrenders the secured property to the creditor; and (3) proposal of the plan “in good faith.” If the trustee or an unsecured creditor objects to confirmation, the plan must meet additional tests. For example, a plan will be approved if all of the debtor’s disposable income (as defined in Section 1325) over the commitment period (three to five years) will be used to make payments under the plan.

Discharge

Once a debtor has made all payments called for in the plan, the court will discharge him from all remaining debts except certain long-term debts and obligations to pay alimony, maintenance, and support. Under former law, Chapter 13 was so broad that it permitted the court to discharge the debtor from many debts considered nondischargeable under Chapter 7, but 1994 amendments and the 2005 act made Chapter 13 less expansive. Debts dischargeable in Chapter 13, but not in Chapter 7, include debts for willful and malicious injury to property, debts incurred to pay nondischargeable tax obligations, and debts arising from property settlements in divorce or separation proceedings. (See [Section 30.6 "Cases"](#), *In re Ryan*, for a discussion of what debts are dischargeable under Chapter 13 as compared with Chapter 7.)

Although a Chapter 13 debtor generally receives a discharge only after completing all payments required by the court-approved (i.e., “confirmed”) repayment plan, there are some limited circumstances under which the debtor may request the court to grant a “hardship discharge” even though the debtor has failed to complete plan payments. Such a discharge is available only to a debtor whose failure to complete plan payments is due to circumstances beyond the debtor’s control. A Chapter 13 discharge stays on the credit record for up to ten years.

A discharge may be denied if the debtor previously went through a bankruptcy too soon before filing Chapter 13, failed to act in good faith, or—with some exceptions—failed to complete a personal financial management course.

KEY TAKEAWAY

Chapter 11—frequently referred to as “corporate reorganization”—is most often used by businesses whose value as a going concern is greater than it would be if liquidated, but, with some exceptions, anyone eligible to file Chapter 7 can file Chapter 11. The business owners, or in some cases the trustee or creditors, develop a plan to pay the firm’s debts over a three- to five-year period; the plan must be approved by creditors and the court. Chapter 13—frequently called the wage-earner’s plan—is a similar mechanism by which a person can discharge some debt and have longer to pay debts off than originally scheduled. Under Chapter 13, people can get certain relief from creditors that they cannot get in Chapter 7.

EXERCISES

1. David Debtor is a freelance artist with significant debt that he feels a moral obligation to pay. Why is Chapter 11 his best choice of bankruptcy chapters to file under?
2. What is the practical difference between debts arising from property settlements in divorce or separation proceedings—which can be discharged under Chapter 13—and debts owing for alimony (maintenance) and child support—which cannot be discharged under Chapter 13?
3. Why would a person want to go through the long grind of Chapter 13 instead of just declaring straight bankruptcy (Chapter 7) and being done with it?

30.5 Alternatives to Bankruptcy

LEARNING OBJECTIVES

1. Understand that there are nonbankruptcy alternatives for debtors who cannot pay their bills in a timely way: assignment for benefit of creditors, compositions, and receiverships.
2. Recognize the reasons why these alternatives might not work.

Alternatives to Bankruptcy: Overview

Bankruptcy is a necessary thing in a capitalist economic system. As already noted, without it, few people would be willing to take business risks, and the economy would necessarily operate at a lower level (something some people might not think so bad overall). But bankruptcy, however “enlightened” society may have become about it since Victorian days, still carries a stigma. Bankruptcy filings are public information; the lists of people and businesses who declare bankruptcy are regularly published in monthly business journals. Bankruptcy is expensive, too, and both debtors and creditors become enmeshed in significantly complex federal law. For these reasons, among others, both parties frequently determine it is in their best interest to find an alternative to bankruptcy. Here we take up briefly three common alternatives.

In other parts of this book, other nonbankruptcy creditors’ rights are discussed: under the Uniform Commercial Code (UCC), creditors have rights to reclaim goods sold and delivered but not paid for; under the UCC, too, creditors have a right to repossess personal property that has been put up as collateral for the debtor’s loan or extension of credit; and mortgagees have the right to repossess real estate without judicial assistance in many circumstances. These nonbankruptcy remedies are governed mostly by state law.

The nonbankruptcy alternatives discussed here are governed by state law also.

Assignment for Benefit of Creditors; Compositions; Receivership Assignment for Benefit of Creditors

Under a common-law **assignment for the benefit of creditors**¹⁵, the debtor transfers some or all of his assets to a trustee—usually someone appointed by the adjustment bureau of a local credit managers’ association—who sells the assets and

15. The debtor assigns property to a trustee to sell for creditors.

apportions the proceeds in some agreed manner, usually pro rata, to the creditors. Of course, not every creditor need agree with such a distribution. Strictly speaking, the common-law assignment does not discharge the balance of the debt. Many state statutes attempt to address this problem either by prohibiting creditors who accept a partial payment of debt under an assignment from claiming the balance or by permitting debtors to demand a release from creditors who accept partial payment.

Composition

A **composition**¹⁶ is simply an agreement by creditors to accept less than the full amount of the debt and to discharge the debtor from further liability. As a contract, composition requires consideration; the mutual agreement among creditors to accept a pro rata share of the proceeds is held to be sufficient consideration to support the discharge. The essential difference between assignment and composition lies in the creditors' agreement: an assignment implies no agreement among the creditors, whereas a composition does. Not all creditors of the particular debtor need agree to the composition for it to be valid. A creditor who does not agree to the composition remains free to attempt to collect the full sum owed; in particular, a creditor not inclined to compose the debt could attach the debtor's assets while other creditors are bargaining over the details of the composition agreement.

One advantage of the assignment over the composition is that in the former the debtor's assets—having been assigned—are protected from attachment by hungry creditors. Also, the assignment does not require creditors' consent. However, an advantage to the debtor of the assignment (compared with the composition) is that in the composition creditors cannot go after the debtor for any deficiency (because they agreed not to).

Receivership

A creditor may petition the court to appoint a receiver; **receivership**¹⁷ is a long-established procedure in equity whereby the receiver takes over the debtor's property under instructions from the court. The receiver may liquidate the property, continue to operate the business, or preserve the assets without operating the business until the court finally determines how to dispose of the debtor's property.

The difficulty with most of the alternatives to bankruptcy lies in their voluntary character: a creditor who refuses to go along with an agreement to discharge the debtor can usually manage to thwart the debtor and her fellow creditors because, at the end of the day, the US Constitution forbids the states from impairing private

16. Creditors' agreement to accept less than the face amount owing.

17. A court action placing the debtor's property under control of a custodian so that it can be preserved or distributed for the benefit of all creditors.

citizens' contractual obligations. The only final protection, therefore, is to be found in the federal bankruptcy law.

KEY TAKEAWAY

Bankruptcy is expensive and frequently convoluted. Nonbankruptcy alternatives include assignment for the benefit of creditors (the debtor's assets are assigned to a trustee who manages or disposes of them for creditors), compositions (agreements by creditors to accept less than they are owed and to discharge the debtor from further liability), and receivership (a type of court-supervised assignment).

EXERCISES

1. What is an assignment for benefit of creditors?
2. What is a composition?
3. What is a receivership?
4. Why are these alternatives to bankruptcy often unsatisfactory?

30.6 Cases

Dischargeability of Student Loans under Chapter 7

In re Zygarewicz

423 B.R. 909 (Bkrtcy.E.D.Cal. 2010)

MCMANUS, BANKRUPTCY JUDGE.

Angela Zygarewicz, a chapter 7 debtor and the plaintiff in this adversary proceeding, borrowed 16 government-guaranteed student [sic] loans totaling \$81,429. The loans have been assigned to Educational Credit Management Corporation (“ECMC”). By September 2009, the accrual of interest on these student loans had caused the debt to balloon to more than \$146,000. The debtor asks the court to declare that these student loans were discharged in bankruptcy.

The Bankruptcy Code provides financially distressed debtors with a fresh start by discharging most of their pre-petition debts....However, under 11 U.S.C. § 523(a)(8), there is a presumption that educational loans extended by or with the aid of a governmental unit or nonprofit institution are nondischargeable unless the debtor can demonstrate that their repayment would be an undue hardship. See [Citation]. This exception to a bankruptcy discharge ensures that student loans, which are typically extended solely on the basis of the student’s future earnings potential, cannot be discharged by recent graduates who then pocket all of the future benefits derived from their education. See [Citation].

The debtor bears the burden of proving by a preponderance of the evidence that she is entitled to a discharge of the student loan. See [Citation]. That is, the debtor must prove that repayment of student loans will cause an undue hardship.

The Bankruptcy Code does not define “the undue hardship.” Courts interpreting section 523(a)(8), however, have concluded that undue hardship [and] is something more than “garden-variety hardship.” [Citation.] Only cases involving “real and substantial” hardship merit discharges. See [Citation.]

The Ninth Circuit has adopted a three-part test to guide courts in their attempts to determine whether a debtor will suffer an undue hardship is required to repay a student loan:

- First, the debtor must establish “that she cannot maintain, based on current income and expenses, a ‘minimal’ standard of living for herself and her dependents if forced to repay the loans.”...
- Second, the debtor must show “that additional circumstances exist indicating that this state of affairs is likely to persist for a significant portion of the repayment period of the student loans.”...
- The third prong requires “that the debtor has made good faith efforts to repay the loans....”

(*Pena*, citing *Brunner v. N.Y. State Higher Educ. Servs. Corp.*, [Citation]).

Debtor must satisfy all three parts of the *Brunner* test before her student loans can be discharged. Failure to prove any of the three prongs will defeat a debtor’s case.

When this bankruptcy case was filed in September 2005, the debtor was a single woman and had no dependents. She is 39 years old.

Schedule I reported that the debtor was unemployed. The debtor’s responses to the Statement of Financial Affairs revealed that she had received \$5,500 in income during 2005 prior to the filing of the petition. Evidence at trial indicated that after the petition was filed, the debtor found work and earned a total of \$9,424 in 2005. In 2004 and 2003, she earned \$13,994 and \$17,339, respectively.

Despite this modest income, the debtor did not immediately file an adversary proceeding to determine the dischargeability of her student loans. It was almost three years after the entry of her chapter 7 discharge ‘on January 3, 2006 that the debtor reopened her chapter 7 case in order to pursue this adversary proceeding.’

In her complaint, the debtor admits that after she received a discharge, she found part-time work with a church and later took a full-time job as a speech therapist. During 2006, the debtor earned \$20,009 and in 2007 she earned \$37,314. Hence, while it is clear the debtor’s income was very modest in the time period immediately prior to her bankruptcy petition, her financial situation improved during her bankruptcy case.

The court cannot conclude based on the evidence of the debtor’s financial circumstances up to the date of the discharge, that she was unable to maintain a minimal standard of living if she was required to repay her students [sic] loans.

However, in January 2007, the debtor was injured in an automobile accident. Her injuries eventually halted the financial progress she had been making and eventually prevented her from working. She now subsists on social security disability payments.

The circumstance creating the debtor's hardship, the automobile accident, occurred after her chapter 7 petition was filed, indeed, approximately one year after her discharge was entered. The debtor is maintaining that this post-petition, post-discharge circumstance warrants a declaration that her student loans were discharged effective from the petition date.

When must the circumstances creating a debtor's hardship arise: before the bankruptcy case is filed; after the case is filed but prior to the entry of a discharge; or at anytime, including after the entry of a discharge?

The court concludes that the circumstances causing a chapter 7 debtor's financial hardship must arise prior to the entry of the discharge. If the circumstances causing a debtor's hardship arise after the entry of a discharge, those circumstances cannot form the basis of a determination that repayment of a student loan will be an undue hardship....

[T]here is nothing in the Bankruptcy Code requiring that a complaint under section 523(a)(8) [to discharge student loans] be filed at any particular point in a bankruptcy case, whether it is filed under chapter 7 or 13. [Relevant Federal Rules of Bankruptcy Procedure] permits such dischargeability complaints to be brought at any time, including after the entry of a discharge and the closing of the bankruptcy case....

While a debtor's decision to file an action to determine the dischargeability of a student loan is not temporally constrained, this does not mean that a debtor's financial hardship may arise after a discharge has been entered.

[The] *Coleman* [case, cited by debtor] deals with the ripeness of a dispute concerning the dischargeability of a student loan. [The Ninth Circuit held that it] is ripe for adjudication at any point during the case. The Ninth Circuit did not conclude, however, that a debtor could rely upon post-discharge circumstances to establish undue hardship. In fact, the court in *Coleman* made clear that the debtor could take a snapshot of the hardship warranting a discharge of a student loan any time *prior* to discharge. [*Coleman* was a Chapter 13 case.]

Here, the debtor was injured in an automobile accident on January 17, 2007, almost exactly one year after her January 3, 2006 chapter 7 discharge. Because the accident had no causal link to the misfortune prompting the debtor to seek bankruptcy relief in the first instance, the accident cannot be relied on to justify the discharge of the student loans because repayment would be an undue hardship.

To hold otherwise would mean that a bankruptcy discharge is a perpetual license to discharge student loans based on events that occur years after the bankruptcy discharge is granted. If a discharged debtor suffers later financial misfortune, that debtor must consider seeking another discharge subject to the limitations imposed by [the sections of the code stipulating how often a person can petition for bankruptcy]. In the context of a second case, the debtor could then ask that the student loan be declared dischargeable under section 523(a)(8).

In this instance, the debtor is now eligible for a discharge in a chapter 13 case. Her chapter 7 petition was filed on September 19, 2005. Section 1328(f)(1) bars a chapter 13 discharge when the debtor has received a chapter 7 discharge in a case commenced in the prior four years. She would not be eligible for a chapter 7 discharge until September 19, 2013.

This is not to say that post-discharge events are irrelevant. The second and third prongs of the *Pena* test require the court to consider whether the circumstances preventing a debtor from repaying a student loan are likely to persist, and whether the debtor has made good faith efforts to repay the student loan. Post-discharge events are relevant to these determinations because they require the court to look into the debtor's financial future.

Unfortunately for the debtor, it is unnecessary to consider the second and third prongs because she cannot satisfy the first prong.

CASE QUESTIONS

1. What is the rationale for making the bankruptcy discharge of student loans very difficult?
2. Petitioner argued that she should be able to use a postdischarge event (the auto accident) as a basis for establishing that she could not maintain a “minimal” standard of living, and thus she should get a retroactive discharge of her student loans. What benefit is there to her if she could successfully make the argument, given that she could—as the court noted—file for Chapter 13?
3. The court cites the *Coleman* case. That was a Chapter 13 proceeding. Here were the facts: Debtor had not yet completed her payments under her five-year repayment plan, and no discharge order had yet been entered; one year into the plan, she was laid off work. She had been trying to repay her student loans for several years, and she claimed she would suffer hardship in committing to the five-year repayment plan without any guarantee that her student loan obligations would be discharged, since she was required to commit all of her disposable income to payments under the plan and would likely be forced to pursue undue hardship issue pro se upon completion of the plan.” In *Coleman*, the court held that Debtor could, postfiling but pre-discharge—one year into the five-year plan—bring up the hardship issue.

Now, in the case here, after the auto accident, the petitioner “subsists” on Social Security disability payments, and she has almost \$150,000 in debt, yet the court prohibited her from claiming a hardship discharge of student loans. Does this result really make sense? Is the court’s concern that allowing this postdischarge relief would mean “that a bankruptcy discharge is a perpetual license to discharge student loans based on events that occur years after the bankruptcy discharge is granted” well founded? Suppose it is scheduled to take thirty years to pay off student loans; in year 4, the student-borrower, now Debtor, declares Chapter 7 bankruptcy, student loans not being discharged; in year 6, the person is rendered disabled. What public policy is offended if the person is allowed to “reopen” the bankruptcy and use the postbankruptcy event as a basis for claiming a hardship discharge of student loans?

4. The court suggests she file for Chapter 13. What if—because of timing—the petitioner was not eligible for Chapter 13? What would happen then?

Chapter 11 Bankruptcy

In re Johns-Manville Corp.

36 B.R. 727 (Bkrtcy. N.Y. 1984)

Lifland, Bankruptcy Judge.

Whether an industrial enterprise in the United States is highly successful is often gauged by its “membership” in what has come to be known as the “Fortune 500”. Having attained this measure of financial achievement, Johns-Manville Corp. and its affiliated companies (collectively referred to as “Manville”) were deemed a paradigm of success in corporate America by the financial community. Thus, Manville’s filing for protection under Chapter 11 of Title 11 of the United States Code (“the Code or the Bankruptcy Code”) on August 26, 1982 (“the filing date”) was greeted with great surprise and consternation on the part of some of its creditors and other corporations that were being sued along with Manville for injuries caused by asbestos exposure. As discussed at length herein, Manville submits that the sole factor necessitating its filing is the mammoth problem of uncontrolled proliferation of asbestos health suits brought against it because of its substantial use for many years of products containing asbestos which injured those who came into contact with the dust of this lethal substance. According to Manville, this current problem of approximately 16,000 lawsuits pending as of the filing date is compounded by the crushing economic burden to be suffered by Manville over the next 20–30 years by the filing of an even more staggering number of suits by those who had been exposed but who will not manifest the asbestos-related diseases until some time during this future period (“the future asbestos claimants”). Indeed, approximately 6,000 asbestos health claims are estimated to have arisen in only the first 16 months since the filing date. This burden is further compounded by the insurance industry’s general disavowal of liability to Manville on policies written for this very purpose.

It is the propriety of the filing by Manville which is the subject of the instant decision. Four separate motions to dismiss the petition pursuant to Section 1112(b) of the Code have been lodged before this Court....

Preliminarily, it must be stated that there is no question that Manville is eligible to be a debtor under the Code's statutory requirements. Moreover, it should also be noted that neither Section 109 nor any other provision relating to voluntary petitions by companies contains any insolvency requirement....Accordingly, it is abundantly clear that Manville has met all of the threshold eligibility requirements for filing a voluntary petition under the Code....

A "principal goal" of the Bankruptcy Code is to provide "open access" to the "bankruptcy process." [Citation.] The rationale behind this "open access" policy is to provide access to bankruptcy relief which is as "open" as "access to the credit economy." Thus, Congress intended that "there should be no legal barrier to voluntary petitions." Another major goal of the Code, that of "rehabilitation of debtors," requires that relief for debtors must be "timely." Congress declared that it is essential to both the "open access" and "rehabilitation" goals that

[i]nitiating relief should not be a death knell. The process should encourage resort to it, by debtors and creditors, that cuts short the dissipation of assets and the accumulation of debts. Belated commencement of a case may kill an opportunity for reorganization or arrangement.

Accordingly, the drafters of the Code envisioned that a financially beleaguered debtor with real debt and real creditors should not be required to wait until the economic situation is beyond repair in order to file a reorganization petition. The "Congressional purpose" in enacting the Code was to encourage resort to the bankruptcy process. This philosophy not only comports with the elimination of an insolvency requirement, but also is a corollary of the key aim of Chapter 11 of the Code, that of avoidance of liquidation. The drafters of the Code announced this goal, declaring that reorganization is more efficient than liquidation because "assets that are used for production in the industry for which they were designed are more valuable than those same assets sold for scrap." [Citation.] Moreover, reorganization also fosters the goals of preservation of jobs in the threatened entity. [Citation.]

In the instant case, not only would liquidation be wasteful and inefficient in destroying the utility of valuable assets of the companies as well as jobs, but, more importantly, liquidation would preclude just compensation of some present asbestos victims and all future asbestos claimants. This unassailable reality represents all the more reason for this Court to adhere to this basic potential liquidation avoidance aim of Chapter 11 and deny the motions to dismiss. Manville must not be required to wait until its economic picture has deteriorated beyond salvation to file for reorganization.

Clearly, none of the justifications for declaring an abuse of the jurisdiction of the bankruptcy court announced by these courts [in various cases cited] are present in the *Manville* case. In *Manville*, it is undeniable that there has been no sham or hoax perpetrated on the Court in that *Manville* is a real business with real creditors in pressing need of economic reorganization. Indeed, the Asbestos Committee has belied its own contention that *Manville* has no debt and no real creditors by quantifying a benchmark settlement demand approaching one billion dollars for compensation of approximately 15,500 pre-petition asbestos claimants, during the course of negotiations pitched toward achieving a consensual plan. This huge asserted liability does not even take into account the estimated 6,000 new asbestos health claims which have arisen in only the first 16 months since the filing date. The number of post-filing claims increases each day as “future claims back into the present.” ...

In short, *Manville*'s filing did not in the appropriate sense abuse the jurisdiction of this Court and it is indeed, like the debtor in [Citation], a “once viable business supporting employees and unsecured creditors [that] has more recently been burdened with judgments [and suits] that threaten to put it out of existence.” Thus, its petition must be sustained....

In sum, *Manville* is a financially besieged enterprise in desperate need of reorganization of its crushing real debt, both present and future. The reorganization provisions of the Code were drafted with the aim of liquidation avoidance by great access to Chapter 11. Accordingly, *Manville*'s filing does not abuse the jurisdictional integrity of this Court, but rather presents the same kinds of reasons that were present in [Citation], for awaiting the determination of *Manville*'s good faith until it is considered...as a prerequisite to confirmation or as a part of the cadre of motions before me which are scheduled to be heard subsequently.

[A]ll four of the motions to dismiss the *Manville* petition are denied in their entirety.

CASE QUESTIONS

1. What did Manville want to do here, and why?
2. How does this case demonstrate the fundamental purpose of Chapter 11 as opposed to Chapter 7 filings?
3. The historical background here is that Manville knew from at least 1930 that asbestos—used in many industrial applications—was a deadly carcinogen, and it worked diligently for decades to conceal and obfuscate the fact. What “good faith” argument was raised by the movants in this case?

Chapter 13: What Debts Are Dischargeable?

In re Ryan

389 B.R. 710 9th Cir. BAP, (Idaho, 2008)

On July 13, 1995, Ryan was convicted of possession of an unregistered firearm under 26 U.S.C. § 5861(d) in the United States District Court for the District of Alaska. Ryan was sentenced to fifty-seven months in prison followed by three years of supervised release. In addition, Ryan was ordered to pay a fine of \$7,500..., costs of prosecution in the amount of \$83,420, and a special assessment of \$50.00. Ryan served his sentence. He also paid the \$7,500 fine. The district court, following an appellate mandate, ultimately eliminated the restitution obligation.

On April 25, 2003, Ryan filed a petition for bankruptcy relief under chapter 7 in the District of Idaho. He received his chapter 7 discharge on August 11, 2003. Shortly thereafter, Ryan filed a case under chapter 13, listing as his only obligation the amount of unpaid costs of prosecution owed to the United States (“Government”)....

Ryan completed payments under the plan, and an “Order of Discharge” was entered on October 5, 2006. The chapter 13 trustee’s final report reflected that the Government received \$2,774.89 from payments made by Ryan under his plan, but a balance of \$77,088.34 on the Government’s costs of prosecution claim remained unpaid. Ryan then renewed his request for determination of dischargeability. The bankruptcy court held that the unpaid portion of the Government’s claim for costs of prosecution was excepted from discharge by § 1328(a)(3). Ryan appealed.

Section 1328(a)(3) provides an exception to discharge in chapter 13 for “restitution, or a criminal fine.” It states, in pertinent part:

[A]s soon as practicable after the completion by the debtor of all payments under the plan, the court shall grant the debtor a discharge of all debts provided for by the plan or disallowed under section 502 of this title except any debt...

(3) for restitution, or a *criminal fine*, included in a sentence on the debtor's conviction of a crime [...] [emphasis added].

The essential question, then, is whether these costs of prosecution constitute a "criminal fine."

Statutory interpretation begins with a review of the particular language used by Congress in the relevant version of the law. [Citation.]

The term "criminal fine" is not defined in [Chapter 13] or anywhere else in the Bankruptcy Code. However, its use in § 1328(a)(3) implicates two important policies embedded in the Bankruptcy Code. First, in light of the objective to provide a fresh start for debtors overburdened by debts that they cannot pay, exceptions to discharge are interpreted strictly against objecting creditors and in favor of debtors. *See, e.g.* [Citations]. In chapter 13, this principle is particularly important because Congress adopted the liberal "superdischarge" provisions of § 1328 as an incentive to debtors to commit to a plan to pay their creditors all of their disposable income over a period of years rather than simply discharging their debts in a chapter 7 liquidation.

"[T]he dischargeability of debts in chapter 13 that are not dischargeable in chapter 7 represents a policy judgment that [it] is preferable for debtors to attempt to pay such debts to the best of their abilities over three years rather than for those debtors to have those debts hanging over their heads indefinitely, perhaps for the rest of their lives." [Citations.]

A second, countervailing policy consideration is a historic deference, both in the Bankruptcy Code and in the administration of prior bankruptcy law, to excepting criminal sanctions from discharge in bankruptcy. Application of this policy is consistent with a general recognition that, "[t]he principal purpose of the Bankruptcy Code is to grant a 'fresh start' to the 'honest but unfortunate debtor.'" [Citation] (emphasis added [in original]).

The legislative history is clear that [in its 1994 amendments to the bankruptcy law] Congress intended to overrule the result in [of a 1990 Supreme Court case so that]... "[N]o debtor with criminal restitution obligations will be able to discharge them through any bankruptcy proceeding."...

The imposition on a defendant of the costs of a special prosecutor is different from ordering a defendant to pay criminal fines. Costs are paid to the entity incurring the costs; criminal fines are generally paid to a special fund for victims' compensation and assistance in the U.S. Treasury....

To honor the principle that exceptions to discharge are to be construed narrowly in favor of debtors, particularly in chapter 13, where a broad discharge was provided by Congress as an incentive for debtors to opt for relief under that chapter rather than under chapter 7, it is not appropriate to expand the scope of the [Chapter 13] exception beyond the terms of the statute. Congress could have adopted an exception to discharge in chapter 13 that mirrored [the one in Chapter 7]. It did not do so. In contrast, under [the 2005] BAPCPA, when Congress wanted to limit the chapter 13 "superdischarge," it incorporated exceptions to discharge from [Chapter 7] wholesale....

As a bottom line matter, Ryan served his time and paid in full the criminal fine that was imposed as part of his sentence for conviction of possession of an unregistered firearm. The restitution obligation that was included as part of his sentence was voided. Ryan paid the Government a total of \$6,331.66 to be applied to the costs of prosecution awarded as part of his criminal judgment, including \$2,774.89 paid under his chapter 13 plan, leaving a balance of \$77,088.34. We determine that the unpaid balance of the costs of prosecution award was covered by Ryan's chapter 13 discharge.

Based on the foregoing analysis, we conclude that the exception to discharge included in [Chapter 13] for "restitution, or a criminal fine, included in a sentence on the debtor's conviction of a crime" does not cover costs of prosecution included in such a sentence, and we REVERSE.

CASE QUESTIONS

1. What is the rationale for making some things dischargeable under Chapter 13 that are not dischargeable under Chapter 7?
2. What is the difference between "criminal restitution" (which in 1994 Congress said could not get discharged at all) and "the costs of prosecution"?
3. Why did the court decide that Ryan's obligation to pay "costs of prosecution" was not precluded by the limits on Chapter 13 bankruptcies imposed by Congress?

30.7 Summary and Exercises

Summary

The Constitution gives Congress the power to legislate on bankruptcy. The current law is the Bankruptcy Abuse Prevention and Consumer Protection Act of 2005, which provides for six types of proceedings: (1) liquidation, Chapter 7; (2) adjustment of debts of a municipality, Chapter 9; (3) reorganization, Chapter 11; (4) family farmers with regular income, Chapter 12; (5) individuals with regular income, Chapter 13; and (6) cross-border bankruptcies, Chapter 15.

With some exceptions, any individual, partnership, or corporation seeking liquidation may file a voluntary petition in bankruptcy. An involuntary petition is also possible; creditors petitioning for that must meet certain criteria.

A petition operates as a stay against the debtor for lawsuits to recover claims or enforce judgments or liens. A judge will issue an order of relief and appoint a trustee, who takes over the debtor's property and preserves security interests. To recover monies owed, creditors must file proof of claims. The trustee has certain powers to recover property for the estate that the debtor transferred before bankruptcy. These include the power to act as a hypothetical lien creditor, to avoid fraudulent transfers and voidable preferences.

The bankruptcy act sets out categories of claimants and establishes priority among them. After secured parties take their security, the priorities are (1) domestic support obligations, (2) administrative expenses, (3) gap creditor claims, (4) employees' wages, salaries, commissions, (5) contributions to employee benefit plans, (6) grain or fish producers' claims against a storage facility, (7) consumer deposits, (8) taxes owed to governments, (9) allowed claims for personal injury or death resulting from debtor's driving or operating a vessel while intoxicated. After these priority claims are paid, the trustee must distribute the estate in this order: (a) unsecured creditors who filed timely, (b) unsecured creditors who filed late, (c) persons claiming fines and the like, (d) all other creditors, (e) the debtor. Most bankruptcies are no-asset, so creditors get nothing.

Under Chapter 7's 2005 amendments, debtors must pass a means test to be eligible for relief; if they make too much money, they must file Chapter 13.

Certain property is exempt from the estate of an individual debtor. States may opt out of the federal list of exemptions and substitute their own; most have.

Once discharged, the debtor is no longer legally liable for most debts. However, some debts are not dischargeable, and bad faith by the debtor may preclude discharge. Under some circumstances, a debtor may reaffirm a discharged debt. A Chapter 7 case may be converted to Chapter 11 or 13 voluntarily, or to Chapter 11 involuntarily.

Chapter 11 provides for reorganization. Any person eligible for discharge in Chapter 7 is eligible for Chapter 11, except stockbrokers and commodity brokers; those who have too much debt to file Chapter 13 and surpass the means test for Chapter 7 file Chapter 11. Under Chapter 11, the debtor retains possession of the business and may continue to operate it with its own management unless the court appoints a trustee. The court may do so either for cause or if it is in the best interests of the creditors. The court must appoint a committee of unsecured creditors, who remain active throughout the proceeding. The debtor may file its own reorganization plan and has the exclusive right to do so within 120 days if it remains in possession. The plan must be accepted by certain proportions of each impaired class of claims and interests. It is binding on all creditors, and the debtor is discharged from all debts once the court confirms the plan.

Chapter 13 is for any individual with regular income who has difficulty paying debts; it is voluntary only; the debtor must get credit counseling. The debtor presents a payment plan to creditors, and the court appoints a trustee. The plan extends the time to pay and may reduce the size of the debt. If the creditors wind up with more in this proceeding than they would have in Chapter 7, the court is likely to approve the plan. The court may approve a stretch-out of five years. Some debts not dischargeable under Chapter 7 may be under Chapter 13.

Alternatives to bankruptcy are (1) composition (agreement by creditors to accept less than the face amount of the debt), (2) assignment for benefit of creditors (transfer of debtor's property to a trustee, who uses it to pay debts), and (3) receivership (a disinterested person is appointed by the court to preserve assets and distribute them at the court's direction). Because these are voluntary procedures, they are ineffective if all parties do not agree to them.

EXERCISES

1. David has debts of \$18,000 and few assets. Because his debts are less than \$25,000, he decides to file for bankruptcy using the state court system rather than the federal system. Briefly describe the procedure he should follow to file for bankruptcy at the state level.
2. Assume that David in Exercise 1 is irregularly employed and has developed a plan for paying off his creditors. What type of bankruptcy should he use, Chapter 7, 11, or 13? Why?
3. Assume that David owns the following unsecured property: a \$3,000 oboe, a \$1,000 piano, a \$2,000 car, and a life insurance policy with a cash surrender value of \$8,000. How much of this property is available for distribution to his creditors in a bankruptcy? Explain.
4. If David owes his ex-wife alimony (maintenance) payments and is obligated to pay \$12,000 for an educational loan, what effect will his discharge have on these obligations?
5. Assume that David owns a corporation that he wants to liquidate under Chapter 7. After the corporate assets are distributed to creditors, there is still money owing to many of them. What obstacle does David face in obtaining a discharge for the corporation?
6. The famous retired professional football player—with a pension from the NFL—Orenthal James “O.J.” Simpson was convicted of wrongful death in a celebrated Santa Monica, California, trial in 1997 and ordered to pay \$33.5 million in damages to the families of the deceased. Mr. Simpson sold his California house, moved to Florida, and, from occasional appearances in the press, seemed to be living a high-style life with a big house, nice cars, and sharp clothing. He has never declared bankruptcy. Why hasn’t he been forced into an involuntary Chapter 7 bankruptcy by his creditors?
7.
 - a. A debtor has an automobile worth \$5,000. The federal exemption applicable to her is \$3,225. The trustee sells the car and gives the debtor the amount of the exemption. The debtor, exhausted by the bankruptcy proceedings, takes the \$3,225 and spends it on a six-week vacation in Baja California. Is this an “abuse” of the bankruptcy system?
 - b. A debtor has \$500 in cash beyond what is exempt in bankruptcy. She takes the cash and buys new tires for her car, which is worth about \$2,000. Is this an “abuse” of the bankruptcy system?

SELF-TEST QUESTIONS

1. Alternatives to bankruptcy include
 - a. an assignment
 - b. a composition
 - c. receivership
 - d. all of the above

2. A composition is
 - a. a procedure where a receiver takes over the debtor's property
 - b. an agreement by creditors to take less than the face value of their debt
 - c. basically the same as an assignment
 - d. none of these

3. The highest-priority class set out by the 2005 act is for
 - a. employees' wages
 - b. administrative expenses
 - c. property settlements arising from divorce
 - d. domestic support obligations

4. Darlene Debtor did the following within ninety days of filing for bankruptcy. Which could be set aside as a preferential payment?
 - a. paid water and electricity bills
 - b. made a gift to the Humane Society
 - c. prepaid an installment loan on inventory
 - d. borrowed money from a bank secured by a mortgage on business property

5. Donald Debtor sold his 1957 Chevrolet to his brother for one-fifth its value sixty days before filing for bankruptcy. The trustee wishes to avoid the transaction on the basis that it was
 - a. a hypothetical lien
 - b. a lease disguised as a sale

- c. a preferential payment
 - d. a voidable preference
6. Acme Co. filed for bankruptcy with the following debts; which is their correct priority from highest to lowest?
- i. wages of \$15,000 owed to employees
 - ii. unpaid federal taxes
 - iii. balance owed to a creditor who claimed its security with a \$5,000 deficiency owing
- a. i, ii, iii
 - b. ii, iii, i
 - c. iii, ii, i
 - d. i, iii, ii

SELF-TEST ANSWERS

- 1. d
- 2. b
- 3. d
- 4. c
- 5. d
- 6. a

Chapter 31

Introduction to Property: Personal Property and Fixtures

LEARNING OBJECTIVES

After reading this chapter, you should understand the following:

1. The difference between personal property and other types of property
2. How rights in personal property are acquired and maintained
3. How some kinds of personal property can become real property, and how to determine who has rights in fixtures that are part of real property

In this chapter, we examine the general nature of property rights and the law relating to personal property—with special emphasis on acquisition and fixtures. In [Chapter 32 "Intellectual Property"](#), we discuss intellectual property, a kind of personal property that is increasingly profitable. In [Chapter 33 "The Nature and Regulation of Real Estate and the Environment"](#) through [Chapter 35 "Landlord and Tenant Law"](#), we focus on real property, including its nature and regulation, its acquisition by purchase (and some other methods), and its acquisition by lease (landlord and tenant law).

In [Chapter 36 "Estate Planning: Wills, Estates, and Trusts"](#) and [Chapter 37 "Insurance"](#), we discuss estate planning and insurance—two areas of the law that relate to both personal and real property.

31.1 The General Nature of Property Rights

LEARNING OBJECTIVES

1. Understand the elastic and evolving boundaries of what the law recognizes as property that can be bought or sold on the market.
2. Distinguish real property from personal property.

Definition of Property

Property, which seems like a commonsense concept, is difficult to define in an intelligible way; philosophers have been striving to define it for the past 2,500 years. To say that “property is what we own” is to beg the question—that is, to substitute a synonym for the word we are trying to define. Blackstone’s famous definition is somewhat wordy: “The right of property is that sole and despotic dominion which one man claims and exercises over the external things of the world, in total exclusion of the right of any other individual in the universe. It consists in the free use, enjoyment, and disposal of all a person’s acquisitions, without any control or diminution save only by the laws of the land.” A more concise definition, but perhaps too broad, comes from the Restatement of the Law of Property, which defines property as the “legal relationship between persons with respect to a thing.”

The Restatement’s definition makes an important point: property is a *legal relationship*, the power of one person to use objects in ways that affect others, to exclude others from the property, and to acquire and transfer property. Still, this definition does not contain a specific list of those nonhuman “objects” that could be in such a relationship. We all know that we can own personal objects like iPods and DVDs, and even more complex objects like homes and minerals under the ground. Property also embraces objects whose worth is representative or symbolic: ownership of stock in a corporation is valued not for the piece of paper called a stock certificate but for dividends, the power to vote for directors, and the right to sell the stock on the open market. Wholly intangible things or objects like copyrights and patents and bank accounts are capable of being owned as property. But the list of things that can be property is not fixed, for our concept of property continues to evolve. Collateralized debt obligations (CDOs) and structured investment vehicles (SIVs), prime players in the subprime mortgage crisis, were not on anyone’s list of possible property even fifteen years ago.

The Economist's View

Property is not just a legal concept, of course, and different disciplines express different philosophies about the purpose of property and the nature of property rights. To the jurist, property rights should be protected because it is just to do so. To an economist, the legal protection of property rights functions to create incentives to use resources efficiently. For a truly efficient system of property rights, some economists would require universality (everything is owned), exclusivity (the owners of each thing may exclude all others from using it), and transferability (owners may exchange their property). Together, these aspects of property would lead, under an appropriate economic model, to efficient production and distribution of goods. But the law of property does not entirely conform to the economic conception of the ownership of productive property by private parties; there remain many kinds of property that are not privately owned and some parts of the earth that are considered part of "the commons." For example, large areas of the earth's oceans are not "owned" by any one person or nation-state, and certain land areas (e.g., Yellowstone National Park) are not in private hands.

Classification of Property

1. That which physically exists, like a building, a popsicle stand, a hair dryer, or a steamroller.
2. Something without physical reality that entitles the owner to certain benefits; stocks, bonds, and intellectual property would be common examples.
3. That which is owned by any branch of government; private property is that which is owned by anyone else, including a corporation.
4. All property, real or personal, that is not publicly owned or part of "the commons."
5. Land and all structures and fixtures that have legally become part of the land.
6. Any property that is not real property.

Property can be classified in various ways, including tangible versus intangible, private versus public, and personal versus real. **Tangible property**¹ is that which physically exists, like a building, a popsicle stand, a hair dryer, or a steamroller. **Intangible property**² is something without physical reality that entitles the owner to certain benefits; stocks, bonds, and intellectual property would be common examples. **Public property**³ is that which is owned by any branch of government; **private property**⁴ is that which is owned by anyone else, including a corporation.

Perhaps the most important distinction is between real and personal property. Essentially, **real property**⁵ is immovable; **personal property**⁶ is movable. At common law, personal property has been referred to as "chattels." When chattels become affixed to real property in a certain manner, they are called fixtures and are treated as real property. (For example, a bathroom cabinet purchased at Home Depot and screwed into the bathroom wall may be converted to part of the real property when it is affixed.) Fixtures are discussed in [Section 31.3 "Fixtures"](#) of this chapter.

Importance of the Distinction between Real and Personal Property

In our legal system, the distinction between real and personal property is significant in several ways. For example, the sale of personal property, but not real

property, is governed by Article 2 of the Uniform Commercial Code (UCC). Real estate transactions, by contrast, are governed by the general law of contracts. Suppose goods are exchanged for realty. Section 2-304 of the UCC says that the transfer of the goods and the seller's obligations with reference to them are subject to Article 2, but not the transfer of the interests in realty nor the transferor's obligations in connection with them.

The form of transfer depends on whether the property is real or personal. Real property is normally transferred by a deed, which must meet formal requirements dictated by state law. By contrast, transfer of personal property often can take place without any documents at all.

Another difference can be found in the law that governs the transfer of property on death. A person's heirs depend on the law of the state for distribution of his property if he dies intestate—that is, without a will. Who the heirs are and what their share of the property will be may depend on whether the property is real or personal. For example, widows may be entitled to a different percentage of real property than personal property when their husbands die intestate.

Tax laws also differ in their approach to real and personal property. In particular, the rules of valuation, depreciation, and enforcement depend on the character of the property. Thus real property depreciates more slowly than personal property, and real property owners generally have a longer time than personal property owners to make good unpaid taxes before the state seizes the property.

KEY TAKEAWAY

Property is difficult to define conclusively, and there are many different classifications of property. There can be public property as well as private property, tangible property as well as intangible property, and, most importantly, real property as well as personal property. These are important distinctions, with many legal consequences.

EXERCISES

1. Kristen buys a parcel of land on Marion Street, a new and publicly maintained roadway. Her town's ordinances say that each property owner on a public street must also provide a sidewalk within ten feet of the curb. A year after buying the parcel, Kristen commissions a house to be built on the land, and the contractor begins by building a sidewalk in accordance with the town's ordinance. Is the sidewalk public property or private property? If it snows, and if Kristen fails to remove the snow and it melts and ices over and a pedestrian slips and falls, who is responsible for the pedestrian's injuries?
2. When can private property become public property? Does public property ever become private property?

31.2 Personal Property

LEARNING OBJECTIVE

1. Explain the various ways that personal property can be acquired by means other than purchase.

Most legal issues about personal property center on its acquisition. Acquisition by purchase is the most common way we acquire personal property, but there are at least five other ways to legally acquire personal property: (1) possession, (2) finding lost or misplaced property, (3) gift, (4) accession, and (5) confusion.

Possession

It is often said that “possession is nine-tenths of the law.” There is an element of truth to this, but it’s not the whole truth. For our purposes, the more important question is, what is meant by “possession”? Its meaning is not intuitively obvious, as a moment’s reflection will reveal. For example, you might suppose that you possess something when it is physically within your control, but what do you say when a hurricane deposits a boat onto your land? What if you are not even home when this happens? Do you possess the boat? Ordinarily, we would say that you don’t, because you don’t have physical control when you are absent. You may not even have the intention to control the boat; perhaps instead of a fancy speedboat in relatively good shape, the boat is a rust bucket badly in need of repair, and you want it removed from your front yard.

Even the element of physical domination of the object may not be necessary. Suppose you give your new class ring to a friend to examine. Is it in the friend’s possession? No: the friend has custody, not possession, and you retain the right to permit a second friend to take it from her hands. This is different from the case of a bailment, in which the bailor gives possession of an object to the bailee. For example, a garage (a bailee) entrusted with a car for the evening, and not the owner, has the right to exclude others from the car; the owner could not demand that the garage attendants refrain from moving the car around as necessary.

From these examples, we can see that possession or physical control must usually be understood as the power to exclude others from using the object. Otherwise, anomalies arise from the difficulty of physically controlling certain objects. It is more difficult to exercise control over a one-hundred-foot television antenna than

a diamond ring. Moreover, in what sense do you possess your household furniture when you are out of the house? Only, we suggest, in the power to exclude others. But this power is not purely a physical one: being absent from the house, you could not physically restrain anyone. Thus the concept of possession must inevitably be mixed with legal rules that do or could control others.

Possession confers ownership in a restricted class of cases only: when no person was the owner at the time the current owner took the object into his possession. The most obvious categories of objects to which this rule of possession applies are wild animals and abandoned goods. The rule requires that the would-be owner actually take possession of the animal or goods; the hunter who is pursuing a particular wild animal has no legal claim until he has actually captured it. Two hunters are perfectly free to pursue the same animal, and whoever actually grabs it will be the owner.

But even this simple rule is fraught with difficulties in the case of both wild animals and abandoned goods. We examine abandoned goods in [Section 31.2.2 "Lost or Misplaced Property"](#). In the case of wild game, fish in a stream, and the like, the general rule is subject to the rights of the owner of the land on which the animals are caught. Thus even if the animals caught by a hunter are wild, as long as they are on another's land, the landowner's rights are superior to the hunter's. Suppose a hunter captures a wild animal, which subsequently escapes, and a second hunter thereafter captures it. Does the first hunter have a claim to the animal? The usual rule is that he does not, for once an animal returns to the wild, ownership ceases.

Lost or Misplaced Property

At common law, a technical distinction arose between lost and misplaced property. An object is lost if the owner inadvertently and unknowingly lets it out of his possession. It is merely misplaced if the owner intentionally puts it down, intending to recover it, even if he subsequently forgets to retrieve it. These definitions are important in considering the old saying "Finders keepers, losers weepers." This is a misconception that is, at best, only partially true, and more often false. The following hierarchy of ownership claims determines the rights of finders and losers.

First, the owner is entitled to the return of the property unless he has intentionally abandoned it. The finder is said to be a quasi-bailee for the true owner, and as bailee she owes the owner certain duties of care. The finder who knows the owner or has reasonable means of discovering the owner's identity commits larceny if she holds on to the object with the intent that it be hers. This rule applies only if the finder actually takes the object into her possession. For example, if you spot someone's wallet on the street you have no obligation to pick it up; but if you do pick it up and

see the owner's name in it, your legal obligation is to return it to the rightful owner. The finder who returns the object is not automatically entitled to a reward, but if the loser has offered a reward, the act of returning it constitutes performance of a unilateral contract. Moreover, if the finder has had expenses in connection with finding the owner and returning the property, she is entitled to reasonable reimbursement as a quasi-bailee. But the rights of the owner are frequently subject to specific statutes, such as the one discussed in *Bishop v. Ellsworth* in [Section 31.4.1 "Lost or Misplaced Property"](#).

Second, if the owner fails to claim the property within the time allowed by statute or has abandoned it, then the property goes to the owner of the real estate on which it was found if (1) the finder was a trespasser, (2) the goods are found in a private place (though what exactly constitutes a private place is open to question: is the aisle of a grocery store a private place? the back of the food rack? the stockroom?), (3) the goods are buried, or (4) the goods are misplaced rather than lost.

If none of these conditions apply, then the finder is the owner. These rules are considered in the *Bishop* case, (see [Section 31.4.1 "Lost or Misplaced Property"](#)).

Gift

A **gift**⁷ is a voluntary transfer of property without consideration or compensation. It is distinguished from a sale, which requires consideration. It is distinguished from a promise to give, which is a declaration of an intention to give in the future rather than a present transfer. It is distinguished from a testamentary disposition (will), which takes effect only upon death, not upon the preparation of the documents. Two other distinctions are worth noting. An **inter vivos**⁸ (enter VYE vos) gift is one made between living persons without conditions attached. A **causa mortis**⁹ (KAW zuh mor duz) gift is made by someone contemplating death in the near future.

Requirements

7. A voluntary transfer of property without consideration or compensation.
8. A gift made between living persons.
9. A gift made by someone in contemplating death in the near future.

Figure 31.1 Gift Requirements

To make an effective gift *inter vivos* or *causa mortis*, the law imposes three requirements: (1) the donor must *deliver* a deed or object to the donee; (2) the donor must actually *intend* to make a gift, and (3) the donee must *accept* (see [Figure 31.1 "Gift Requirements"](#)).

Delivery

Although it is firmly established that the object be delivered, it is not so clear what constitutes delivery. On the face of it, the requirement seems to be that the object must be transferred to the donee's possession. Suppose your friend tells you he is making a gift to you of certain books that are lying in a locked trunk. If he actually gives you the trunk so that you can carry it away, a gift has been made. Suppose, however, that he had merely given you the key, so that you could come back the next day with your car. If this were the sole key, the courts would probably construe the transfer of the key as possession of the trunk. Suppose, instead, that the books were in a bank vault and the friend made out a legal document giving both you and him the power to take from the bank vault. This would not be a valid gift, since he retained power over the goods.

Intent

The intent to make a gift must be an intent to give the property at the present time, not later. For example, suppose a person has her savings account passbook put in her name and a friend's name, intending that on her death the friend will be able to draw out whatever money is left. She has not made a gift, because she did not intend to give the money when she changed the passbook. The intent requirement can sometimes be sidestepped if legal title to the object is actually transferred, postponing to the donee only the use or enjoyment of the property until later. Had the passbook been made out in the name of the donee only and delivered to a third party to hold until the death of the donor, then a valid gift may have been made. Although it is sometimes difficult to discern this distinction in practice, a more accurate statement of the rule of intent is this: Intention to give in the future does not constitute the requisite intent, whereas present gifts of future interests will be upheld.

Acceptance

In the usual case, the rule requiring acceptance poses no difficulties. A friend hands you a new book and says, "I would like you to have this." Your taking the book and saying "thank-you" is enough to constitute your acceptance. But suppose that the friend had given you property without your knowing it. For example, a secret admirer puts her stock certificates jointly in your name and hers without telling you. Later, you marry someone else, and she asks you to transfer the certificates

back to her name. This is the first you have heard of the transaction. Has a gift been made? The usual answer is that even though you had not accepted the stock when the name change was made, the transaction was a gift that took effect immediately, subject to your right to repudiate when you find out about it. If you do not reject the gift, you have joint rights in the stock. But if you expressly refuse to accept a gift or indicate in some manner that you might not have accepted it, then the gift is not effective. For example, suppose you are running for office. A lobbyist whom you despise gives you a donation. If you refuse the money, no gift has been made.

Gifts Causa Mortis

Even though the requirements of delivery, intent, and acceptance apply to gifts causa mortis as well as inter vivos, a gift causa mortis (one made in contemplation of death) may be distinguished from a gift inter vivos on other grounds. The difference between the two lies in the power of the donor to revoke the gift before he dies; in other words, the gift is conditional on his death. Since the law does not permit gifts that take place in the future contingent on some happening, how can it be that a gift causa mortis is effective? The answer lies in the nature of the transfer: the donee takes actual title when the gift is made; should the donor not in fact die or should he revoke the gift before he dies, then and only then will the donee lose title. The difference is subtle and amounts to the difference between saying "If I die, the watch is yours" and "The watch is yours, unless I survive." In the former case, known as a condition precedent, there is no valid gift; in the latter case, known as a condition subsequent, the gift is valid.

Gifts to Minors

Every state has adopted either the Uniform Gifts to Minors Act (UGMA) or the Uniform Transfers to Minors Act (UTMA), both of which establish the manner by which irrevocable gifts are made to minors. Under these acts, a custodian holds the gifts until the minor reaches the age of eighteen, twenty-one, or twenty-five, depending on state law. Gifts under UGMA are limited for the most part to money or securities, while UTMA allows other types of gifts as well, such as real estate or tangible personal property.

Gift Tax

The federal government and many states impose gift taxes on gifts above a certain dollar amount. We discuss gift taxes in connection with estate taxes in [Chapter 36 "Estate Planning: Wills, Estates, and Trusts"](#).

Accession

An **accession**¹⁰ is something that is added to what one already possesses. In general, the rule is that the owner of the thing owns the additional thing that comes to be attached to it. For example, the owner of a cow owns her calves when she gives birth. But when one person adds value to another person's property, either through labor alone or by adding new materials, the rule must be stated somewhat differently. The general rule is this: when goods are added to goods, the owner of the principal goods becomes the owner of the enhanced product. For example, a garage uses its paint to repaint its customer's automobile. The car owner, not the painter, is the owner of the finished product.

When someone has wrongfully converted—that is, taken as her own—the property of another, the owner may sue for damages, either to recover his property or its value. But a problem arises when the converter has added to the value of that property. In general, the courts hold that when the conversion is willful, the owner is entitled to the full value of the goods as enhanced by the converter. Suppose that a carpenter enters a ten-acre forest that he knows belongs to his neighbor, cuts down one hundred trees, transports them to his shop, and cuts them up into standard lumber, thus increasing their market value. The owner is entitled to this full value, and the carpenter will get nothing for his trouble. Thus the willful converter loses the value of his labor or materials. If, on the other hand, the conversion was innocent, or at most negligent, the rule is somewhat more uncertain. Generally the courts will award the forest owner the value of the standing timber, giving the carpenter the excess attributable to his labor and transportation. A more favorable treatment of the owner is to give her the full value of the lumber as cut, remitting to the carpenter the value of his expenses.

Confusion

In accession, the goods of one owner are transformed into a more valuable commodity or are inextricably united with the goods of another to form a constituent part. Still another type of joining is known as **confusion**¹¹, and it occurs when goods of different owners, while maintaining their original form, are commingled. A common example is the intermingling of grain in a silo. But goods that are identifiable as belonging to a particular person—branded cattle, for instance—are not confused, no matter how difficult it may be to separate herds that have been put together.

When the goods are identical, no particular problem of division arises. Assuming that each owner can show how much he has contributed to the confused mass, he is entitled to that quantity, and it does not matter which particular grains or kernels he extracts. So if a person, seeing a container of grain sitting on the side of the road,

10. Something that is added to what one already possesses.

11. Where personal property is intermingled, negligently or intentionally, with the personal property of others.

mistakes it for his own and empties it into a larger container in his truck, the remedy is simply to restore a like quantity to the original owner. When owners of like substances consent to have those substances combined (such as in a grain silo), they are said to be tenants in common, holding a proportional share in the whole.

In the case of willful confusion of goods, many courts hold that the wrongdoer forfeits all his property unless he can identify his particular property. Other courts have modified this harsh rule by shifting the burden of proof to the wrongdoer, leaving it up to him to claim whatever he can establish was his. If he cannot establish what was his, then he will forfeit all. Likewise, when the defendant has confused the goods negligently, without intending to do so, most courts will tend to shift to the defendant the burden of proving how much of the mass belongs to him.

KEY TAKEAWAY

Other than outright purchase of personal property, there are various ways in which to acquire legal title. Among these are possession, gift, accession, confusion, and finding property that is abandoned, lost, or mislaid, especially if the abandoned, lost, or mislaid property is found on real property that you own.

EXERCISES

1. Dan captures a wild boar on US Forest Service land. He takes it home and puts it in a cage, but the boar escapes and runs wild for a few days before being caught by Romero, some four miles distant from Dan's house. Romero wants to keep the boar. Does he "own" it? Or does it belong to Dan, or to someone else?
2. Harriet finds a wallet in the college library, among the stacks. The wallet has \$140 in it, but no credit cards or identification. The library has a lost and found at the circulation desk, and the people at the circulation desk are honest and reliable. The wallet itself is unique enough to be identified by its owner. (a) Who owns the wallet and its contents? (b) As a matter of ethics, should Harriet keep the money if the wallet is "legally" hers?

31.3 Fixtures

LEARNING OBJECTIVE

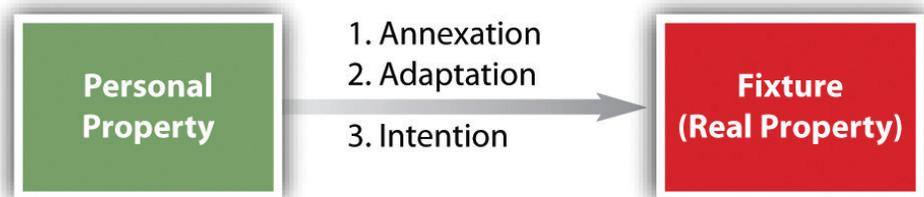

1. Know the three tests for when personal property becomes a fixture and thus becomes real property.

Definition

A **fixture**¹² is an object that was once personal property but that has become so affixed to land or structures that it is considered legally a part of the real property. For example, a stove bolted to the floor of a kitchen and connected to the gas lines is usually considered a fixture, either in a contract for sale, or for testamentary transfer (by will). For tax purposes, fixtures are treated as real property.

Tests

Figure 31.2 *Fixture Tests*

Obviously, no clear line can be drawn between what is and what is not a fixture. In general, the courts look to three tests to determine whether a particular object has become a fixture: annexation, adaptation, and intention (see [Figure 31.2 "Fixture Tests"](#)).

Annexation

The object must be annexed or affixed to the real property. A door on a house is affixed. Suppose the door is broken and the owner has purchased a new door made to fit, but the house is sold before the new door is installed. Most courts would consider that new door a fixture under a rule of constructive annexation. Sometimes courts have said that an item is a fixture if its removal would damage

12. An object that was once personal property that has become so affixed to land or structures that it is legally a part of the real property.

the real property, but this test is not always followed. Must the object be attached with nails, screws, glue, bolts, or some other physical device? In one case, the court held that a four-ton statue was sufficiently affixed merely by its weight. *Snedeker v. Warring*, 12 N.Y. 170 (1854).

Adaptation

Another test is whether the object is adapted to the use or enjoyment of the real property. Examples are home furnaces, power equipment in a mill, and computer systems in bank buildings.

Intention

Recent decisions suggest that the controlling test is whether the person who actually annexes the object intends by so doing to make it a permanent part of the real estate. The intention is usually deduced from the circumstances, not from what a person might later say her intention was. If an owner installs a heating system in her house, the law will presume she intended it as a fixture because the installation was intended to benefit the house; she would not be allowed to remove the heating system when she sold the house by claiming that she had not intended to make it a fixture.

Fixture Disputes

Because fixtures have a hybrid nature (once personal property, subsequently real property), they generate a large number of disputes. We have already examined two types of these disputes in other contexts: (1) disputes between mortgagees and secured parties ([Chapter 28 "Secured Transactions and Suretyship"](#)) and (2) disputes over whether the sale of property attached to real estate (such as crops or a structure) but about to be severed is a sale of goods or real estate ([Chapter 17 "Introduction to Sales and Leases"](#)). Two other types of disputes remain.

Transfer of Real Estate

When a homeowner sells her house, the problem frequently crops up as to whether certain items in the home have been sold or may be removed by the seller. Is a refrigerator, which simply plugs into the wall, a fixture or an item of personal property? If a dispute arises, the courts will apply the three tests—annexation, adaptation, and intention. Of course, the simplest way of avoiding the dispute is to incorporate specific reference to questionable items in the contract for sale, indicating whether the buyer or the seller is to keep them.

Tenant's Fixtures

Tenants frequently install fixtures in the buildings they rent or the property they occupy. A company may install tens of thousands of dollars worth of equipment; a tenant in an apartment may bolt a bookshelf into the wall or install shades over a window. Who owns the fixtures when the tenant's lease expires? The older rule was that any fixture, determined by the usual tests, must remain with the landlord. Today, however, certain types of fixtures—known as **tenant's fixtures**¹³—stay with the tenant. These fall into three categories: (1) trade fixtures—articles placed on the premises to enable the tenant to carry on his or her trade or business in the rented premises; (2) agricultural fixtures—devices installed to carry on farming activities (e.g., milling plants and silos); (3) domestic fixtures—items that make a tenant's personal life more comfortable (carpeting, screens, doors, washing machines, bookshelves, and the like).

The three types of tenant's fixtures remain personal property and may be removed by the tenant if the following three conditions are met: (1) They must be installed for the requisite purposes of carrying on the trade or business or the farming or agricultural pursuits or for making the home more comfortable, (2) they must be removable without causing substantial damage to the landlord's property, and (3) they must be removed before the tenant turns over possession of the premises to the landlord. Again, any debatable points can be resolved in advance by specifying them in the written lease.

KEY TAKEAWAY

Personal property is often converted to real property when it is affixed to real property. There are three tests that courts use to determine whether a particular object has become a fixture and thus has become real property: annexation, adaptation, and intention. Disputes over fixtures often arise in the transfer of real property and in landlord-tenant relations.

13. Fixtures added to rental property that become property of the owner.

EXERCISES

1. Jim and Donna Stoner contract to sell their house in Rochester, Michigan, to Clem and Clara Hovenkamp. Clara thinks that the decorative chandelier in the entryway is lovely and gives the house an immediate appeal. The chandelier was a gift from Donna's mother, "to enhance the entryway" and provide "a touch of beauty" for Jim and Donna's house. Clem and Clara assume that the chandelier will stay, and nothing specific is mentioned about the chandelier in the contract for sale. Clem and Clara are shocked when they move in and find the chandelier is gone. Have Jim and Donna breached their contract of sale?
2. Blaine Goodfellow rents a house from Associated Properties in Abilene, Texas. He is there for two years, and during that time he installs a ceiling fan, custom-builds a bookcase for an alcove on the main floor, and replaces the screening on the front and back doors, saving the old screening in the furnace room. When his lease expires, he leaves, and the bookcase remains behind. Blaine does, however, take the new screening after replacing it with the old screening, and he removes the ceiling fan and puts back the light. He causes no damage to Associated Properties' house in doing any of this. Discuss who is the rightful owner of the screening, the bookcase, and the ceiling fan after the lease expires.

31.4 Case

Lost or Misplaced Property

Bishop v. Ellsworth

91 Ill. App.2d 386, 234 N.E. 2d 50 (1968)

OPINION BY: STOUWER, Presiding Justice

Dwayne Bishop, plaintiff, filed a complaint alleging that on July 21, 1965, defendants, Mark and Jeff Ellsworth and David Gibson, three small boys, entered his salvage yard premises at 427 Mulberry Street in Canton, without his permission, and while there happened upon a bottle partially embedded in the loose earth on top of a landfill, wherein they discovered the sum of \$12,590 in US currency. It is further alleged that said boys delivered the money to the municipal chief of police who deposited it with defendant, Canton State Bank. The complaint also alleges defendants caused preliminary notices to be given as required by Ill. Rev. Stats., chapter 50, subsections 27 and 28 (1965), but that such statute or compliance therewith does not affect the rights of the plaintiff. [The trial court dismissed the plaintiff's complaint.]

...It is defendant's contention that the provisions of Ill Rev Stats, chapter 50, subsections 27 and 28 govern this case. The relevant portions of this statute are as follows:

"27. Lost goods...If any person or persons shall hereafter find any lost goods, money, bank notes, or other choses in action, of any description whatever, such person or persons shall inform the owner thereof, if known, and shall make restitution of the same, without any compensation whatever, except the same shall be voluntarily given on the part of the owner. If the owner be unknown, and if such property found is of the value of \$ 15 or upwards, the finder...shall, within five days after such finding...appear before some judge or magistrate...and make affidavit of the description thereof, the time and place when and where the same was found, that no alteration has been made in the appearance thereof since the finding of the same, that the owner thereof is unknown to him and that he has not secreted, withheld or disposed of any part thereof. The judge or magistrate shall enter the value of the property found as near as he can ascertain in his estray book together with the affidavit of the finder, and shall also, within ten days after the proceedings have been entered on his estray book, transmit to the county clerk a certified copy

thereof, to be by him recorded in his estray book and to file the same in his office...28. Advertisement...If the value thereof exceeds the sum of \$ 15, the county clerk, within 20 days after receiving the certified copy of the judge or magistrate's estray record shall cause an advertisement to be set up on the court house door, and in 3 other of the most public places in the county, and also a notice thereof to be published for 3 weeks successively in some public newspaper printed in this state and if the owner of such goods, money, bank notes, or other choses in action does not appear and claim the same and pay the finder's charges and expenses within one year after the advertisement thereof as aforesaid, the ownership of such property shall vest in the finder."

* * *

We think it apparent that the statute to which defendants make reference provides a means of vesting title to lost property in the finder where the prescribed search for the owner proves fruitless. This statute does not purport to provide for the disposition of property deemed mislaid or abandoned nor does it purport to describe or determine the right to possession against any party other than the true owner. The plain meaning of this statute does not support plaintiff's position that common law is wholly abrogated thereby. The provisions of the statute are designed to provide a procedure whereby the discoverer of "lost" property may be vested with the ownership of said property even as against the true owner thereof, a right which theretofore did not exist at common law. In the absence of any language in the statute from which the contrary can be inferred it must be assumed that the term "lost" was used in its generally accepted legal sense and no extension of the term was intended. Thus the right to possession of discovered property still depends upon the relative rights of the discoverer and the owner of the locus in quo and the distinctions which exist between property which is abandoned, mislaid, lost or is treasure trove. The statute assumes that the discoverer is in the rightful possession of lost property and proceedings under such statute is (sic) not a bar where the issue is a claim to the contrary. There is a presumption that the owner or occupant of land or premises has custody of property found on it or actually imbedded in the land. The ownership or possession of the locus in quo is related to the right to possession of property discovered thereon or imbedded therein in two respects. First, if the premises on which the property is discovered are private it is deemed that the property discovered thereon is and always has been in the constructive possession of the owner of said premises and in a legal sense the property can be neither mislaid nor lost. *Pyle v. Springfield Marine Bank*, 330 Ill App 1, 70 NE2d 257. Second, the question of whether the property is mislaid or lost in a legal sense depends upon the intent of the true owner. The ownership or possession of the premises is an important factor in determining such intent. If the property be determined to be mislaid, the owner of the premises is entitled to the possession thereof against the discoverer. It would also appear that if the

discoverer is a trespasser such trespasser can have no claim to possession of such property even if it might otherwise be considered lost.

...The facts as alleged in substance are that the Plaintiff was the owner and in possession of real estate, that the money was discovered in a private area of said premises in a bottle partially imbedded in the soil and that such property was removed from the premises by the finders without any right or authority and in effect as trespassers. We believe the averment of facts in the complaint substantially informs the defendants of the nature of and basis for the claim and is sufficient to state a cause of action. [The trial court's dismissal of the Plaintiff's complaint is reversed and the case is remanded.]

CASE QUESTIONS

1. What is the actual result in this case? Do the young boys get any of the money that they found? Why or why not?
2. Who is Dwayne Bishop, and why is he a plaintiff here? Was it Bishop that put the \$12,590 in US currency in a bottle in the landfill at the salvage yard? If not, then who did?
3. If Bishop is not the original owner of the currency, what are the rights of the original owner in this case? Did the original owner "lose" the currency? Did the original owner "misplace" the currency? What difference does it make whether the original owner "lost" or "misplaced" the currency? Can the original owner, after viewing the legal advertisement, have a claim superior to Dwayne Bishop's claim?

31.5 Summary and Exercises

Summary

Property is the *legal relationship* between persons with respect to things. The law spells out what can be owned and the degree to which one person can assert an interest in someone else's things. Property is classified in several ways: personal versus real, tangible versus intangible, private versus public. The first distinction, between real and personal, is the most important, for different legal principles often apply to each. Personal property is movable, whereas real property is immovable.

Among the ways personal property can be acquired are: by (1) possession, (2) finding, (3) gift, (4) accession, and (5) confusion.

Possession means the power to exclude others from using an object. Possession confers ownership only when there is no owner at the time the current owner takes possession. "Finders keepers, losers weepers" is not a universal rule; the previous owner is entitled to return of his goods if it is reasonably possible to locate him. If not, or if the owner does not claim his property, then it goes to the owner of the real estate on which it was found, if the finder was a trespasser, or the goods were buried, were in a private place, or were misplaced rather than lost. If none of these conditions applies, the property goes to the finder.

A gift is a voluntary transfer of property without consideration. Two kinds of gifts are possible: *inter vivos* and *causa mortis*. To make an effective gift, (1) the donor must make out a deed or physically deliver the object to the donee, (2) the donor must intend to make a gift, and (3) the donee must accept the gift. Delivery does not always require physical transfer; sometimes, surrender of control is sufficient. The donor must intend to give the gift now, not later.

Accession is an addition to that which is already owned—for example, the birth of calves to a cow owned by a farmer. But when someone else, through labor or by supplying material, adds value, the accession goes to the owner of the principal goods.

Confusion is the intermingling of like goods so that each, while maintaining its form, becomes a part of a larger whole, like grain mixed in a silo. As long as the goods are identical, they can easily enough be divided among their owners.

A fixture is a type of property that ceases to be personal property and becomes real property when it is annexed or affixed to land or buildings on the land and adapted to the use and enjoyment of the real property. The common-law rules governing fixtures do not employ clear-cut tests, and sellers and buyers can avoid many disputes by specifying in their contracts what goes with the land. Tenant's fixtures remain the property of the tenant if they are for the convenience of the tenant, do not cause substantial damage to the property when removed, and are removed before possession is returned to the landlord.

EXERCISES

1. Kate owns a guitar, stock in a corporation, and an antique bookcase that is built into the wall of her apartment. How would you classify each kind of property?
2. After her last business law class, Ingrid casually throws her textbook into a trash can and mutters to herself, “I’m glad I don’t have to read that stuff anymore.” Tom immediately retrieves the book from the can. Days later, Ingrid realizes that the book will come in handy, sees Tom with it, and demands that he return the book. Tom refuses. Who is entitled to the book? Why?
3. In Exercise 2, suppose that Ingrid had accidentally left the book on a table in a restaurant. Tom finds it, and chanting “Finders keepers, losers weepers,” he refuses to return the book. Is Ingrid entitled to the book? Why?
4. In Exercise 3, if the owner of the book (Ingrid) is never found, who is entitled to the book—the owner of the restaurant or Tom? Why?
5. Matilda owned an expensive necklace. On her deathbed, Matilda handed the necklace to her best friend, Sadie, saying, “If I die, I want you to have this.” Sadie accepted the gift and placed it in her safe-deposit box. Matilda died without a will, and now her only heir, Ralph, claims the necklace. Is he entitled to it? Why or why not?

SELF-TEST QUESTIONS

1. Personal property is defined as property that is
 - a. not a chattel
 - b. owned by an individual
 - c. movable
 - d. immovable

2. Personal property can be acquired by
 - a. accession
 - b. finding
 - c. gift
 - d. all of the above

3. A gift causa mortis is
 - a. an irrevocable gift
 - b. a gift made after death
 - c. a gift made in contemplation of death
 - d. none of the above

4. To make a gift effective,
 - a. the donor must intend to make a gift
 - b. the donor must either make out a deed or deliver the gift to the donee
 - c. the donee must accept the gift
 - d. all of the above are required

5. Tenant's fixtures
 - a. remain with the landlord in all cases
 - b. remain the property of the tenant in all cases
 - c. remain the property of the tenant if they are removable without substantial damage to the landlord's property
 - d. refer to any fixture installed by a tenant

SELF-TEST ANSWERS

1. c
2. d
3. c
4. d
5. c

Chapter 32

Intellectual Property

LEARNING OBJECTIVES

After reading this chapter, you should understand the following:

1. The principal kinds of intellectual property
2. The difference between patents and trade secrets, and why a company might choose to rely on trade secrets rather than obtain a patent
3. What copyrights are, how to obtain them, and how they differ from trademarks
4. Why some “marks” may not be eligible for trademark protection, and how to obtain trademark protection for those that are

1. Intangible personal property whose major forms are patents, copyrights, and trademarks.
2. A grant from government that gives an inventor the exclusive right to make, use, and sell an invention for a period of twenty years from the date of filing the application for a patent.
3. The legal right given “authors” to prevent others from copying the expression embodied in a protected work.
4. Defined by the federal Lanham Act of 1946 as “any word, name, symbol, or device or any combination thereof adopted and used by a manufacturer or merchant to identify his goods and distinguish them from goods manufactured or sold by others.”

Few businesses of any size could operate without being able to protect their rights to a particular type of intangible personal property: **intellectual property**¹. The major forms of intellectual property are patents, copyrights, and trademarks. Unlike tangible personal property (machines, inventory) or real property (land, office buildings), intellectual property is formless. It is the product of the human intellect that is embodied in the goods and services a company offers and by which the company is known.

A **patent**² is a grant from government that gives an inventor the exclusive right to make, use, and sell an invention for a period of twenty years from the date of filing the application for a patent. A **copyright**³ is the right to exclude others from using or marketing forms of expression. A **trademark**⁴ is the right to prevent others from using a company’s product name, slogan, or identifying design. Other forms of intellectual property are trade secrets (particular kinds of information of commercial use to a company that created it) and right of publicity (the right to exploit a person’s name or image). Note that the property interest protected in each case is not the tangible copy of the invention or writing—not the machine with a particular serial number or the book lying on someone’s shelf—but the invention or words themselves. That is why intellectual property is said to be intangible: it is a right to exclude any others from gaining economic benefit from your own intellectual creation. In this chapter, we examine how Congress, the courts, and the

Patent and Trademark Office have worked to protect the major types of intellectual property.

32.1 Patents

LEARNING OBJECTIVES

1. Explain why Congress would grant exclusive monopolies (patents) for certain periods of time.
2. Describe what kinds of things may be patentable and what kinds of things may not be patentable.
3. Explain the procedures for obtaining a patent, and how patent rights may be an issue where the invention is created by an employee.
4. Understand who can sue for patent infringement, on what basis, and with what potential remedies.

Source of Authority and Duration

Patent and copyright law are federal, enacted by Congress under the power given by Article I of the Constitution “to promote the Progress of Science and useful Arts, by securing for limited Times to Authors and Inventors the exclusive Right to their respective Writings and Discoveries.” Under current law, a patent gives an inventor exclusive rights to make, use, or sell an invention for twenty years. (If the patent is a design patent—protecting the appearance rather than the function of an item—the period is fourteen years.) In return for this limited monopoly, the inventor must fully disclose, in papers filed in the US Patent and Trademark Office (PTO), a complete description of the invention.

Patentability

What May Be Patented

The patent law says that “any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof” may be patented.³⁵ United States Code, Section 101. A **process**⁵ is a “process, art or method, and includes a new use of a known process, machine, manufacture, composition of matter, or material.”³⁵ United States Code, Section 101. A process for making rolled steel, for example, qualifies as a patentable process under the statute. A **machine**⁶ is a particular apparatus for achieving a certain result or carrying out a distinct process—lathes, printing presses, motors, and the cotton gin are all examples of the hundreds of thousands of machines that have received US patents since the first Patent Act in 1790. A **manufacture**⁷ is an article or a product, such as a television, an automobile, a telephone, or a lightbulb. A **composition of matter**⁸ is a new arrangement of elements so that the resulting compound, such as

5. A “means devised for the production of a given result”—for example, a process for making steel.
6. A particular apparatus for achieving a certain result or carrying out a distinct process—lathes, printing presses, motors, and the cotton gin are all examples of machines.
7. An article or product, such as a television, automobile, telephone, and lightbulb.
8. A new arrangement of elements such that the resulting compound, such as a metal alloy, is not found in nature.

a metal alloy, is not found in nature. In *Commissioner of Patents v. Chakrabarty*, *Commissioner of Patents v. Chakrabarty*, 444 U.S. 1028 (1980). the Supreme Court said that even living organisms—in particular, a new “genetically engineered” bacterium that could “eat” oil spills—could be patented. The *Chakrabarty* decision has spawned innovation: a variety of small biotechnology firms have attracted venture capitalists and other investors.

According to the PTO, gene sequences are patentable subject matter, provided they are isolated from their natural state and processed in a way that separates them from other molecules naturally occurring with them. Gene patenting, always controversial, generated new controversy when the PTO issued a patent to Human Genome Sciences, Inc. for a gene found to serve as a platform from which the AIDS virus can infect cells of the body. Critics faulted the PTO for allowing “ownership” of a naturally occurring human gene and for issuing patents without requiring a showing of the gene’s utility. New guidelines from the PTO followed in 2000; these focused on requiring the applicant to make a strong showing on the utility aspect of patentability and somewhat diminished the rush of biotech patent requests.

There are still other categories of patentable subjects. An improvement is an alteration of a process, machine, manufacture, or composition of matter that satisfies one of the tests for patentability given later in this section. New, original ornamental designs for articles of manufacture are patentable (e.g., the shape of a lamp); works of art are not patentable but are protected under the copyright law. New varieties of cultivated or hybridized plants are also patentable, as are genetically modified strains of soybean, corn, or other crops.

What May Not Be Patented

Many things can be patented, but not (1) the laws of nature, (2) natural phenomena, and (3) abstract ideas, including algorithms (step-by-step formulas for accomplishing a specific task).

One frequently asked question is whether patents can be issued for computer software. The PTO was reluctant to do so at first, based on the notion that computer programs were not “novel”—the software program either incorporated automation of manual processes or used mathematical equations (which were not patentable). But in 1998, the Supreme Court held in *Diamond v. Diehr*, 450 U.S. 175 (1981). that patents could be obtained for a process that incorporated a computer program if the process itself was patentable.

A business process can also be patentable, as the US Court of Appeals for the Federal Circuit ruled in 1998 in *State Street Bank and Trust v. Signature Financial Group, Inc.*

Street Bank and Trust v. Signature Financial Group, Inc., 149 F.3d 1368 (Fed. Cir. 1998). Signature Financial had a patent for a computerized accounting system that determined share prices through a series of mathematical calculations that would help manage mutual funds. State Street sued to challenge that patent. Signature argued that its model and process was protected, and the court of appeals upheld it as a “practical application of a mathematical, algorithm, formula, or calculation,” because it produces a “useful, concrete and tangible result.” Since *State Street*, many other firms have applied for business process patents. For example, Amazon.com obtained a business process patent for its “one-click” ordering system, a method of processing credit-card orders securely. (But see *Amazon.com v. Barnesandnoble.com*, *Amazon.com v. Barnesandnoble.com, Inc.*, 239 F.3d 1343 (Fed. Cir. 2001). in which the court of appeals rejected Amazon’s challenge to Barnesandnoble.com using its Express Land one-click ordering system.)

Tests for Patentability

Just because an invention falls within one of the categories of patentable subjects, it is not necessarily patentable. The Patent Act and judicial interpretations have established certain tests that must first be met. To approve a patent application, the PTO (as part of the Department of Commerce) will require that the invention, discovery, or process be novel, useful, and nonobvious in light of current technology.

Perhaps the most significant test of patentability is that of obviousness. The act says that no invention may be patented “if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains.” This provision of the law has produced innumerable court cases, especially over improvement patents, when those who wish to use an invention on which a patent has been issued have refused to pay royalties on the grounds that the invention was obvious to anyone who looked.

Procedures for Obtaining a Patent

In general, the United States (unlike many other countries) grants a patent right to the first person to invent a product or process rather than to the first person to file for a patent on that product or process. As a practical matter, however, someone who invents a product or process but does not file immediately should keep detailed research notes or other evidence that would document the date of invention. An inventor who fails to apply for a patent within a year of that date would forfeit the rights granted to an inventor who had published details of the invention or offered it for sale. But until the year has passed, the PTO may not issue

a patent to X if Y has described the invention in a printed publication here or abroad or the invention has been in public use or on sale in this country.

An inventor cannot obtain a patent automatically; obtaining a patent is an expensive and time-consuming process, and the inventor will need the services of a patent attorney, a highly specialized practitioner. The attorney will help develop the required **specification**⁹, a description of the invention that gives enough detail so that one skilled in the art will be able to make and use the invention. After receiving an application, a PTO examiner will search the records and accept or reject the claim. Usually, the attorney will negotiate with the examiner and will rewrite and refine the application until it is accepted. A rejection may be appealed, first to the PTO's Board of Appeals and then, if that fails, to the federal district court in the District of Columbia or to the US Court of Appeals for the Federal Circuit, the successor court to the old US Court of Customs and Patent Appeals.

Once a patent application has been filed, the inventor or a company to which she has assigned the invention may put the words "patent pending" on the invention. These words have no legal effect. Anyone is free to make the invention as long as the patent has not yet been issued. But they do put others on notice that a patent has been applied for. Once the patent has been granted, infringers may be sued even if the infringer has made the product and offered it for sale before the patent was granted.

In today's global market, obtaining a US patent is important but is not usually sufficient protection. The inventor will often need to secure patent protection in other countries as well. Under the Paris Convention for the Protection of Industrial Property (1883), parties in one country can file for patent or trademark protection in any of the other member countries (172 countries as of 2011). The World Trade Organization's Agreement on Trade-Related Aspects of Intellectual Property Rights (TRIPS) established standards for protecting intellectual property rights (patents, trademarks, and copyrights) and provides that each member nation must have laws that protect intellectual property rights with effective access to judicial systems for pursuing civil and criminal penalties for violations of such rights.

Patent Ownership

The patent holder is entitled to make and market the invention and to exclude others from doing so. Because the patent is a species of property, it may be transferred. The inventor may assign part or all of his interest in the patent or keep the property interest and license others to manufacture or use the invention in return for payments known as royalties. The license may be exclusive with one licensee, or the inventor may license many to exploit the invention. One important

9. A description of the invention that gives enough detail so that one skilled in the art will be able to make and use the invention.

limitation on the inventor's right to the patent interest is the so-called shop right. This is a right created by state courts on equitable grounds giving employers a nonexclusive royalty-free license to use any invention made by an employee on company time and with company materials. The shop right comes into play only when a company has no express or implied understanding with its employees. Most corporate laboratories have contractual agreements with employees about who owns the invention and what royalties will be paid.

Infringement and Invalidity Suits

Suits for patent infringement can arise in three ways: (1) the patent holder may seek damages and an injunction against the infringer in federal court, requesting damages for royalties and lost profits as well; (2) even before being sued, the accused party may take the patent holder to court under the federal Declaratory Judgment Act, seeking a court declaration that the patent is invalid; (3) the patent holder may sue a licensee for royalties claimed to be due, and the licensee may counterclaim that the patent is invalid. Such a suit, if begun in state court, may be removed to federal court.

In a federal patent infringement lawsuit, the court may grant the winning party reimbursement for attorneys' fees and costs. If the infringement is adjudged to be intentional, the court can triple the amount of damages awarded. Prior to 2006, courts were typically granting permanent injunctions to prevent future infringement. Citing *eBay, Inc. v. Merc Exchange, LLC*, *eBay, Inc. v. Merc Exchange, LLC*, 546 U.S. 388 (2006), the Supreme Court ruled that patent holders are not automatically entitled to a permanent injunction against infringement during the life of the patent. Courts have the discretion to determine whether justice requires a permanent injunction, and they may conclude that the public interest and equitable principles may be better satisfied with compensatory damages only.

Proving infringement can be a difficult task. Many companies employ engineers to "design around" a patent product—that is, to seek ways to alter the product to such an extent that the substitute product no longer consists of enough of the elements of the invention safeguarded by the patent. However, infringing products, processes, or machines need not be identical; as the Supreme Court said in *Sanitary Refrigerator Co. v. Winers*, *Sanitary Refrigerator Co. v. Winers*, 280 U.S. 30 (1929). "one device is an infringement of another...if two devices do the same work in substantially the same way, and accomplish substantially the same result...even though they differ in name, form, or shape." This is known as the **doctrine of equivalents**¹⁰. In an infringement suit, the court must choose between these two extremes: legitimate "design around" and infringement through some equivalent product.

10. The judicial doctrine that infringing products, processes, or machines need not be identical.

An infringement suit can often be dangerous because the defendant will almost always assert in its answer that the patent is invalid. The plaintiff patent holder thus runs the risk that his entire patent will be taken away from him if the court agrees. In ruling on validity, the court may consider all the tests, such as prior art and obviousness, discussed in [Section 32.1.2 "Patentability"](#) and rule on these independently of the conclusions drawn by the PTO.

Patent Misuse

Although a patent is a monopoly granted to the inventor or his assignee or licensee, the monopoly power is legally limited. An owner who misuses the patent may find that he will lose an infringement suit. One common form of misuse is to tie the patented good to some unpatented one—for example, a patented movie projector that will not be sold unless the buyer agrees to rent films supplied only by the manufacturer of the movie projector, or a copier manufacturer that requires buyers to purchase plain paper from it. As we will see in [Chapter 48 "Antitrust Law"](#), various provisions of the federal antitrust laws, including, specifically, Section 3 of the Clayton Act, outlaw certain kinds of tying arrangements. Another form of patent misuse is a provision in the licensing agreement prohibiting the manufacturer from also making competing products. Although the courts have held against several other types of misuse, the general principle is that the owner may not use his patent to restrain trade in unpatented goods.

KEY TAKEAWAY

Many different “things” are patentable, include gene sequences, business processes, and any other “useful invention.” The US Patent and Trademark Office acts on initial applications and may grant a patent to an applicant. The patent, which allows a limited-time monopoly, is for twenty years. The categories of patentable things include processes, machines, manufactures, compositions of matter, and improvements. Ideas, mental processes, naturally occurring substances, methods of doing business, printed matter, and scientific principles cannot be patented. Patent holders may sue for infringement and royalties from an infringer user.

EXERCISES

1. Calera, Inc. discovers a way to capture carbon dioxide emissions at a California power plant and use them to make cement. This is a win for the power company, which needs to reduce its carbon dioxide emissions, and a win for Calera. Calera decides to patent this invention. What kind of patent would this be? A machine? A composition of matter? A manufacture?
2. In your opinion, what is the benefit of allowing companies to isolate genetic material and claim a patent? What kind of patent would this be? A machine? A composition of matter? A manufacture?
3. How could a “garage inventor,” working on her own, protect a patentable invention while yet demonstrating it to a large company that could bring the invention to market?

32.2 Trade Secrets

LEARNING OBJECTIVES

1. Describe the difference between trade secrets and patents, and explain why a firm might prefer keeping a trade secret rather than obtaining a patent.
2. Understand the dimensions of corporate espionage and the impact of the federal Economic Espionage Act.

Definition of Trade Secrets

A patent is an invention publicly disclosed in return for a monopoly. A **trade secret**¹¹ is a means to a monopoly that a company hopes to maintain by preventing public disclosure. Why not always take out a patent? There are several reasons. The trade secret might be one that is not patentable, such as a customer list or an improvement that does not meet the tests of novelty or nonobviousness. A patent can be designed around; but if the trade secret is kept, its owner will be the exclusive user of it. Patents are expensive to obtain, and the process is extremely time consuming. Patent protection expires in twenty years, after which anyone is free to use the invention, but a trade secret can be maintained for as long as the secret is kept.

However, a trade secret is valuable only so long as it is kept secret. Once it is publicly revealed, by whatever means, anyone is free to use it. The critical distinction between a patent and a trade secret is this: a patent gives its owner the right to enjoin anyone who infringes it from making use of it, whereas a trade secret gives its “owner” the right to sue only the person who improperly took it or revealed it.

According to the Restatement of Torts, Section 757, Comment b, a trade secret may consist of

any formula, pattern, device or compilation of information which is used in one’s business, and which gives him an opportunity to obtain an advantage over competitors who do not know or use it. It may be a formula for a chemical compound, a process of manufacturing, treating or preserving materials, a pattern for a machine or other device, or a list of customers....A trade secret is a process or device for continuous use in the operation of a business. Generally it relates to the

11. A process, chemical formula, list, plan, or mechanism known only to an employer and those employees who need to know in order to use it in the business.

production of goods, as, for example, a machine or formula for the production of an article.

Other types of trade secrets are customer information, pricing data, marketing methods, sources of supply, and secret technical know-how.

Elements of Trade Secrets

To be entitled to protection, a trade secret must be (1) original and (2) secret.

Originality

The trade secret must have a certain degree of originality, although not as much as would be necessary to secure a patent. For example, a principle or technique that is common knowledge does not become a protectable trade secret merely because a particular company taught it to one of its employees who now wants to leave to work for a competitor.

Secrecy

Some types of information are obviously secret, like the chemical formula that is jealously guarded through an elaborate security system within the company. But other kinds of information might not be secret, even though essential to a company's business. For instance, a list of suppliers that can be devised easily by reading through the telephone directory is not secret. Nor is a method secret simply because someone develops and uses it, if no steps are taken to guard it. A company that circulates a product description in its catalog may not claim a trade secret in the design of the product if the description permits someone to do "reverse engineering." A company that hopes to keep its processes and designs secret should affirmatively attempt to do so—for example, by requiring employees to sign a nondisclosure agreement covering the corporate trade secrets with which they work. However, a company need not go to every extreme to guard a trade secret.

Trade-secrets espionage has become a big business. To protect industrial secrets, US corporations spend billions on security arrangements. The line between competitive intelligence gathering and espionage can sometimes be difficult to draw. The problem is by no means confined to the United States; companies and nations all over the world have become concerned about theft of trade secrets to gain competitive advantage, and foreign governments are widely believed to be involved in espionage and cyberattacks.

Economic Espionage Act

The Economic Espionage Act (EEA) of 1996 makes the theft or misappropriation of a trade secret a federal crime. The act is aimed at protecting commercial information rather than classified national defense information. Two sorts of activities are criminalized. The first section of the act Economic Espionage Act, 18 United States Code, Section 1831(a) (1996) criminalizes the misappropriation of trade secrets (including conspiracy to misappropriate trade secrets and the subsequent acquisition of such misappropriated trade secrets) with the knowledge or intent that the theft will benefit a foreign power. Penalties for violation are fines of up to US\$500,000 per offense and imprisonment of up to fifteen years for individuals, and fines of up to US\$10 million for organizations.

The second section Economic Espionage Act, 18 United States Code, Section 1832 (1996). criminalizes the misappropriation of trade secrets related to or included in a product that is produced for or placed in interstate (including international) commerce, with the knowledge or intent that the misappropriation will injure the owner of the trade secret. Penalties for violation are imprisonment for up to ten years for individuals (no fines) and fines of up to US\$5 million for organizations.

In addition to these specific penalties, the fourth section of the EEA Economic Espionage Act, 18 United States Code, Section 1834 (1996). also requires criminal forfeiture of (1) any proceeds of the crime and property derived from proceeds of the crime and (2) any property used, or intended to be used, in commission of the crime.

The EEA authorizes civil proceedings by the Department of Justice to enjoin violations of the act but does not create a private cause of action. This means that anyone believing they have been victimized must go through the US attorney general in order to obtain an injunction.

The EEA is limited to the United States and has no extraterritorial application unless (1) the offender is a US company or a citizen operating from abroad against a US company or (2) an act in furtherance of the espionage takes place in the United States. Other nations lack such legislation, and some may actively support industrial espionage using both their national intelligence services. The US Office of the National Counterintelligence Executive publishes an annual report, mandated by the US Congress, on foreign economic collection and industrial espionage, which outlines these espionage activities of many foreign nations.

Right of Employees to Use Trade Secrets

A perennial source of lawsuits in the trade secrets arena is the employee who is hired away by a competitor, allegedly taking trade secrets along with him. Companies frequently seek to prevent piracy by requiring employees to sign confidentiality agreements. An agreement not to disclose particular trade secrets learned or developed on the job is generally enforceable. Even without an agreement, an employer can often prevent disclosure under principles of agency law. Sections 395 and 396 of the Restatement (Second) of Agency suggest that it is an actionable breach of duty to disclose to third persons information given confidentially during the course of the agency. However, every person is held to have a right to earn a living. If the rule were strictly applied, a highly skilled person who went to another company might be barred from using his knowledge and skills. The courts do not prohibit people from using elsewhere the general knowledge and skills they developed on the job. Only specific trade secrets are protected.

To get around this difficulty, some companies require their employees to sign agreements not to compete. But unless the agreements are limited in scope and duration to protect a company against only specific misuse of trade secrets, they are unenforceable.

KEY TAKEAWAY

Trade secrets, if they can be kept, have indefinite duration and thus greater potential value than patents. Trade secrets can be any formula, pattern, device, process, or compilation of information to be used in a business. Customer information, pricing data, marketing methods, sources of supply, and technical know-how could all be trade secrets. State law has protected trade secrets, and federal law has provided criminal sanctions for theft of trade secrets. With the importance of digitized information, methods of theft now include computer hacking; theft of corporate secrets is a burgeoning global business that often involves cyberattacks.

EXERCISES

1. Wu Dang, based in Hong Kong, hacks into the Hewlett-Packard database and “steals” plans and specifications for HP’s latest products. The HP server is located in the United States. He sells this information to a Chinese company in Shanghai. Has he violated the US Economic Espionage Act?
2. What are the advantages of keeping a formula as a trade secret rather than getting patent protection?

32.3 Copyright

LEARNING OBJECTIVES

1. Describe and explain copyrights, how to obtain one, and how they differ from trademarks.
2. Explain the concept of fair use and describe its limits.

Definition and Duration

Copyright is the legal protection given to “authors” for their “writings.” Copyright law is federal; like patent law, its source lies in the Constitution. Copyright protects the expression of ideas in some tangible form, but it does not protect the ideas themselves. Under the 1976 Copyright Act as amended, a copyright in any work created after January 1, 1978, begins when the work is fixed in tangible form—for example, when a book is written down or a picture is painted—and generally lasts for the life of the author plus 70 years after his or her death. This is similar to copyright protection in many countries, but in some countries, the length of copyright protection is the life of the author plus 50 years. For copyrights owned by publishing houses, done as works for hire, common copyright expires 95 years from the date of publication or 120 years from the date of creation, whichever is first. For works created before 1978, such as many of Walt Disney’s movies and cartoons, the US Sonny Bono Copyright Term Extension Act of 1998 provided additional protection of up to 95 years from publication date. Thus works created in 1923 by Disney would not enter the public domain until 2019 or after, unless the copyright had expired prior to 1998 or unless the Disney company released the work into the public domain. In general, after expiration of the copyright, the work enters the **public domain**¹².

In 1989, the United States signed the Berne Convention, an international copyright treaty. This law eliminated the need to place the symbol © or the word *Copyright* or the abbreviation *Copr.* on the work itself. Copyrights can be registered with the US Copyright Office in Washington, DC.

Protected Expression

The Copyright Act protects a variety of “writings,” some of which may not seem written at all. These include literary works (books, newspapers, and magazines), music, drama, choreography, films, art, sculpture, and sound recordings. Since

12. Once a copyright has expired, the material enters the public domain, meaning that no one can claim exclusive rights in the material.

copyright covers the expression and not the material or physical object, a book may be copyrighted whether it is on paper, microfilm, tape, or computer disk.

Rights Protected by the Copyright Act

Preventing Copying

A copyright gives its holder the right to prevent others from copying his or her work. The copyright holder has the exclusive right to reproduce the work in any medium (paper, film, sound recording), to perform it (e.g., in the case of a play), or to display it (a painting or film). A copyright also gives its holder the exclusive right to prepare derivative works based on the copyrighted work. Thus a playwright could not adapt to the stage a novelist's book without the latter's permission.

Fair Use

One major exception to the exclusivity of copyrights is the **fair use doctrine**¹³. Section 107 of the Copyright Act provides as follows:

Fair use of a copyrighted work, including such use by reproduction in copies or phonorecords or by any other means specified by section 106 of the copyright, for purposes such as criticism, comment, news reporting, teaching (including multiple copies for classroom use), scholarship, or research, is not an infringement of copyright. In determining whether the use made of a work in any particular case is a fair use, the factors to be considered shall include—

- (1) the purpose and character of the use, including whether such use is of a commercial nature or is for nonprofit educational purposes;
- (2) the nature of the copyrighted work;
- (3) the amount and substantiality of the portion used in relation to the copyrighted work as a whole; and
- (4) the effect of the use upon the potential market for or value of the copyrighted work.¹⁷ United States Code, Section 107.

13. Use of copyrighted material in criticism, comment, news reporting, teaching (including multiple copies for classroom use), scholarship, or research that does not significantly reduce the market for the copyrighted material.

These are broad guidelines. Accordingly, any copying could be infringement, and fair use could become a question of fact on a case-by-case basis. In determining fair use, however, courts have often considered the fourth factor (effect of the use upon the potential market for the copyrighted work) to be the most important.

Clear examples of fair use would be when book reviewers or writers quote passages from copyrighted books. Without fair use, most writing would be useless because it could not readily be discussed. But the doctrine of fair use grew more troublesome with the advent of plain-paper copiers and is now even more troublesome with electronic versions of copyrighted materials that are easily copied and distributed. The 1976 act took note of the new copier technology, listing “teaching (including multiple copies for classroom use)” as one application of fair use. The Copyright Office follows guidelines specifying just how far the copying may go—for example, multiple copies of certain works may be made for classroom use, but copies may not be used to substitute for copyrighted anthologies.

Infringement

Verbatim use of a copyrighted work is easily provable. The more difficult question arises when the copyrighted work is altered in some way. As in patent law, the standard is one of substantial similarity.

Copyrightability Standards

To be subject to copyright, the writing must be “fixed” in some “tangible medium of expression.” A novelist who composes a chapter of her next book in her mind and tells it to a friend before putting it on paper could not stop the friend from rushing home, writing it down, and selling it (at least the federal copyright law would offer no protection; some states might independently offer a legal remedy, however).

The work also must be creative, at least to a minimal degree. Words and phrases, such as names, titles, and slogans, are not copyrightable; nor are symbols or designs familiar to the public. But an author who contributes her own creativity—like taking a photograph of nature—may copyright the resulting work, even if the basic elements of the composition were not of her making.

Finally, the work must be “original,” which means simply that it must have originated with the author. The law does not require that it be novel or unique. This requirement was summarized pithily by Judge Learned Hand: “If by some magic a man who had never known it were to compose anew Keats’s Ode on a Grecian Urn, he would be an author, and, if he copyrighted it, others might not copy that poem, though they might of course copy Keats’s.” *Sheldon v. Metro-Goldwyn Pictures Corp.*, 81 F.2d 49 (2d Cir. 1936). Sometimes the claim is made that a composer, for example, just happened to compose a tune identical or strikingly similar to a copyrighted song; rather than assume the unlikely coincidence that Judge Hand hypothesized, the courts will look for evidence that the alleged copier had access to the copyrighted song. If he did—for example, the song was frequently played on the

air—he cannot defend the copying with the claim that it was unconscious, because the work would not then have been original.

Section 102 of the Copyright Act excludes copyright protection for any “idea, procedure, process, system, method of operation, concept, principle, or discovery, regardless of the form in which it is described, explained, illustrated, or embodied.”¹⁷ United States Code, Section 102.

Einstein copyrighted books and monographs he wrote on the theory of relativity, but he could not copyright the famous formula $E = mc^2$, nor could he prevent others from writing about the theory. But he could protect the particular way in which his ideas were expressed. In general, facts widely known by the public are not copyrightable, and mathematical calculations are not copyrightable. Compilations of facts may be copyrightable, if the way that they are coordinated or arranged results in a work that shows some originality. For example, compiled information about yachts listed for sale may qualify for copyright protection. *BUC International Corp. v. International Yacht Council, Ltd.*, 489 F.3d 1129 (11th Cir. 2007).

One of the most troublesome recent questions concerning expression versus ideas is whether a computer program may be copyrighted. After some years of uncertainty, the courts have accepted the copyrightability of computer programs. *Apple Computer, Inc. v. Franklin Computer Corp.*, 714 F.2d 1240 (3d Cir. 1983). Now the courts are wrestling with the more difficult question of the scope of protection: what constitutes an “idea” and what constitutes its mere “expression” in a program.

How far the copyright law will protect particular software products is a hotly debated topic, sparked by a federal district court’s ruling in 1990 that the “look and feel” of Lotus 1-2-3’s menu system is copyrightable and was in fact infringed by Paperback Software’s VP-Planner, a competing spreadsheet. *Lotus Development Corp. v. Paperback Software International*, 740 F.Supp. 37 (D. Mass. 1990). The case has led some analysts to “fear that legal code, rather than software code, is emerging as the factor that will determine which companies and products will dominate the 1990s.” Peter H. Lewis, “When Computing Power Is Generated by the Lawyers,” *New York Times*, July 22 1990.

Who May Obtain a Copyright?

With one important exception, only the author may hold the initial copyright, although the author may assign it or license any one or more of the rights conveyed by the copyright. This is a simple principle when the author has written a book or painted a picture. But the law is unclear in the case of a motion picture or a sound recording. Is the author the script writer, the producer, the performer, the director,

the engineer, or someone else? As a practical matter, all parties involved spell out their rights by contract.

The exception, which frequently covers the difficulties just enumerated, is for works for hire. Any person employed to write—a journalist or an advertising jingle writer, for example—is not the “author.” For purposes of the statute, the employer is the author and may take out the copyright. When the employee is in fact an “independent contractor” and the work in question involves any one of nine types (book, movies, etc.) spelled out in the Copyright Act, the employer and the creator must spell out their entitlement to the copyright in a written agreement. *Community for Creative Non-Violence v. Reid*, 109 S.Ct. 2166 (1989).

Obtaining a Copyright

Until 1978, a work could not be copyrighted unless it was registered in the Copyright Office or was published and unless each copy of the work carried a copyright notice, consisting of the word *Copyright*, the abbreviation *Copr.*, or the common symbol ©, together with the date of first publication and the name of the copyright owner. Under the 1976 act, copyright became automatic whenever the work was fixed in a tangible medium of expression (e.g., words on paper, images on film or videotape, sound on tape or compact disc), even if the work remained unpublished or undistributed. However, to retain copyright protection, the notice had to be affixed once the work was “published” and copies circulated to the public. After the United States entered the Berne Convention, an international treaty governing copyrights, Congress enacted the Berne Implementation Act, declaring that, effective in 1989, notice, even after publication, was no longer required.

Notice does, however, confer certain benefits. In the absence of notice, a copyright holder loses the right to receive statutory damages (an amount stated in the Copyright Act and not required to be proved) if someone infringes the work. Also, although it is no longer required, an application and two copies of the work (for deposit in the Library of Congress) filed with the Copyright Office, in Washington, DC, will enable the copyright holder to file suit should the copyright be infringed. Unlike patent registration, which requires elaborate searching of Patent and Trademark Office (PTO) records, copyright registration does not require a reading of the work to determine whether it is an original creation or an infringement of someone else’s prior work. But copyright registration does not immunize the holder from an infringement suit. If a second work has been unlawfully copied from an earlier work, the second author’s copyright will not bar the infringed author from collecting damages and obtaining an injunction.

Computer Downloads and the Digital Millennium Copyright Act

The ubiquity of the Internet and the availability of personal computers with large capacities have greatly impacted the music business. Sharing of music files took off in the late 1990s with Napster, which lost a legal battle on copyright and had to cease doing business. By providing the means by which individuals could copy music that had been purchased, major record labels were losing substantial profits. Grokster, a privately owned software company based in the West Indies, provided peer-to-peer file sharing from 2001 to 2005 until the US Supreme Court's decision in *MGM Studios, Inc. v. Grokster, Ltd.*, 545 U.S. 913 (2005).

For computers with the Microsoft operating system, the Court disallowed the peer-to-peer file sharing, even though Grokster claimed it did not violate any copyright laws because no files passed through its computers. (Grokster had assigned certain user computers as "root supernodes" that acted as music hubs for the company and was not directly involved in controlling any specific music-file downloads.)

Grokster had argued, based on *Sony v. Universal Studios*, 464 U.S. 417 (1984), that the sale of its copying equipment (like the Betamax videocassette recorders at issue in that case) did not constitute contributory infringement "if the product is widely used for legitimate, unobjectionable purposes." Plaintiffs successfully argued that the Sony safe-harbor concept requires proof that the noninfringing use is the primary use in terms of the product's utility.

The Digital Millennium Copyright Act (DMCA), passed into law in 1998, implements two 1996 treaties of the World Intellectual Property Organization. It criminalizes production and sale of devices or services intended to get around protective measures that control access to copyrighted works. In addition, the DMCA heightens the penalties for copyright infringement on the Internet. The DMCA amended Title 17 of the United States Code to extend the reach of copyright, while limiting the liability of the providers of online services for copyright infringement by their users.

KEY TAKEAWAY

Copyright is the legal protection given to “authors” for their “writings.” It protects ideas in fixed, tangible form, not ideas themselves. Copyright protection can extend as long as 120 years from the date of creation or publication. Expression found in literary works, music, drama, film, art, sculpture, sound recordings, and the like may be copyrighted. The fair use doctrine limits the exclusivity of copyright in cases where scholars, critics, or teachers use only selected portions of the copyrighted material in a way that is unlikely to affect the potential market for or value of the copyrighted work.

EXERCISES

1. Explain how a list could be copyrightable.
2. An author wrote a novel, *Brunch at Bruno's*, in 1961. She died in 1989, and her heirs now own the copyright. When do the rights of the heirs come to an end? That is, when does *Brunch at Bruno's* enter the public domain?
3. Keith Bradsher writes a series of articles on China for the *New York Times* and is paid for doing so. Suppose he wants to leave the employ of the *Times* and be a freelance writer. Can he compile his best articles into a book, *Changing Times in China*, and publish it without the *New York Times's* permission? Does it matter that he uses the word *Times* in his proposed title?
4. What kind of file sharing of music is now entirely legal? Shaunese Collins buys a Yonder Mountain String Band CD at a concert at Red Rocks in Morrison, Colorado. With her iMac, she makes a series of CDs for her friends. She does this six times. Has she committed six copyright violations?

32.4 Trademarks

LEARNING OBJECTIVES

1. Understand what a trademark is and why it deserves protection.
2. Know why some “marks” may not be eligible for trademark protection, and how to obtain trademark protection for those that are.
3. Explain what “blurring” and “tarnishment” are and what remedies are available to the holder of the mark.

Definitions of Trademarks

A trademark is defined in the federal Lanham Act of 1946 as “any word, name, symbol, or device or any combination thereof adopted and used by a manufacturer or merchant to identify his goods and distinguish them from goods manufactured or sold by others.”¹⁵ United States Code, Section 1127.

Examples of well-known trademarks are Coca-Cola, Xerox, and Apple. A **service mark**¹⁴ is used in the sale or advertising of services to identify the services of one person and distinguish them from the services of others. Examples of service marks are McDonald’s, BP, and Hilton. A **certification mark**¹⁵ is used in connection with many products “to certify regional or other origin, material, mode of manufacture, quality, accuracy or other characteristics of such goods or services or that the work or labor on the goods or services was performed by members of a union or other organization.” Examples are the Good Housekeeping Seal of Approval and UL (Underwriters Laboratories, Inc., approval mark). Unlike other forms of trademark, the owner of the certification mark (e.g., Good Housekeeping, or the Forest Stewardship Council’s FSC mark) is not the owner of the underlying product.

Extent of Trademark Protection

Kinds of Marks

Trademarks and other kinds of marks may consist of words and phrases, pictures, symbols, shapes, numerals, letters, slogans, and sounds. Trademarks are a part of our everyday world: the sounds of a radio or television network announcing itself (NBC, BBC), the shape of a whiskey bottle (Haig & Haig’s Pinch Bottle), a series of initials (GE, KPMG, IBM), or an animal’s warning growl (MGM’s lion).

14. Used in the sale or advertising of services to identify the services of one person and distinguish them from the services of others.
15. A mark placed on a product or used in connection with a service that signifies the product or service as having met the standard set by the certifying entity.

Limitations on Marks

Although trademarks abound, the law limits the subjects that may fall into one of the defined categories. Not every word or shape or symbol will be protected in an infringement action. To qualify for protection, a trademark must be used to identify and distinguish. The courts employ a four-part test: (1) Is the mark so arbitrary and fanciful that it merits the widest protection? (2) Is it “suggestive” enough to warrant protection without proof of secondary meaning? (3) Is it “descriptive,” warranting protection if secondary meaning is proved? (4) Is the mark generic and thus unprotectable?

These tests do not have mechanical answers; they call for judgment. Some marks are wholly fanciful, clearly identify origin of goods, and distinguish them from others—Kodak, for example. Other marks may not be so arbitrary but may nevertheless be distinctive, either when adopted or as a result of advertising—for example, Crest, as the name of a toothpaste.

Marks that are merely descriptive of the product are entitled to protection only if it can be shown that the mark has acquired **secondary meaning**¹⁶. This term reflects a process of identification on the mark in the public mind with the originator of the product. Holiday Inn was initially deemed too descriptive: an inn where people might go on holiday. But over time, travelers came to identify the source of the Great Sign and the name Holiday Inn as the Holiday Inn Corporation in Memphis, and secondary meaning was granted. Holiday Inn could thus protect its mark against other innkeepers, hoteliers, and such; however, the trademark protection for the words Holiday Inn was limited to the corporation’s hotel and motel business, and no other.

Certain words and phrases may not qualify at all for trademark protection. These include generic terms like “straw broom” (for a broom made of straw) and ordinary words like “fast food.” In one case, a federal appeals court held that the word “Lite” is generic and cannot be protected by a beer manufacturer to describe a low-calorie brew. *Miller Brewing Co. v. Falstaff Brewing Corp.*, 655 F.2d 5 (1st Cir. 1981). Donald Trump’s effort to trademark “You’re fired!” and Paris Hilton’s desire to trademark “That’s hot!” were also dismissed as being generic.

Deceptive words will not be accepted for registration. Thus the US Patent and Trademark Office (PTO) denied registration to the word *Vynahyde* because it suggested that the plastic material to which it was applied came from animal skin. Geographic terms are descriptive words and may not be used as protected trademarks unless they have acquired a secondary meaning, such as Hershey when used for chocolates. (Hershey’s chocolates are made in Hershey, Pennsylvania.) A

16. A descriptive or generic word or phrase that would otherwise not qualify for trademark protection may be eligible once it acquires secondary meaning—that is, that the origin of the goods or services becomes identified with a particular source or provider and the mark makes that connection in the public’s mind.

design that reflects a common style cannot be protected in a trademark to exclude other similar designs in the same tradition. Thus the courts have ruled that a silverware pattern that is a “functional feature” of the “baroque style” does not qualify for trademark protection. Finally, the Lanham Act denies federal registration to certain marks that fall within categories of words and shapes, including the following: the flag; the name, portrait, or signature of any living person without consent, or of a deceased US president during the lifetime of his widow; and immoral, deceptive, or scandalous matter (in an earlier era, the phrase “Bubby Trap” for brassieres was denied registration).

Dilution, Tarnishment, and Blurring

Under the federal Trademark Dilution Act of 1995, companies with marks that dilute the value of a senior mark may be liable for damages. The act provides that owners of marks of significant value have property rights that should not be eroded, blurred, tarnished, or diluted in any way by another. But as a plaintiff, the holder of the mark must show (1) that it is a famous mark, (2) that the use of a similar mark is commercial, and (3) that such use causes dilution of the distinctive quality of the mark. Thus a T-shirt maker who promotes a red-and-white shirt bearing the mark Buttweiser may be liable to Anheuser-Busch, or a pornographic site called Candyland could be liable to Parker Brothers, the board game company. Interesting cases have already been brought under this act, including a case brought by Victoria’s Secret against a small adult store in Kentucky called Victor’s Little Secret. Notice that unlike most prior trademark law, the purpose is not to protect the consumer from confusion as to the source or origin of the goods or services being sold; for example, no one going to the Candyland site would think that Parker Brothers was the source.

Acquiring Trademark Rights

For the first time in more than forty years, Congress, in 1988, changed the way in which trademarks can be secured. Under the Lanham Act, the fundamental means of obtaining a trademark was through use. The manufacturer or distributor actually must have placed the mark on its product—or on related displays, labels, shipping containers, advertisements, and the like—and then have begun selling the product. If the product was sold in interstate commerce, the trademark was entitled to protection under the Lanham Act (or if not, to protection under the common law of the state in which the product was sold).

Under the Trademark Law Revision Act of 1988, which went into effect in 1989, trademarks can be obtained in advance by registering with the PTO an intention to use the mark within six months (the applicant can gain extensions of up to thirty more months to put the mark into use). Once obtained, the trademark will be

protected for ten years (before the 1988 revision, a federal trademark remained valid for twenty years); if after that time the mark is still being used, the registration can be renewed. Obtaining a trademark registration lies between obtaining patents and obtaining copyrights in difficulty. The PTO will not routinely register a trademark; it searches its records to ensure that the mark meets several statutory tests and does not infringe another mark. Those who feel that their own marks would be hurt by registration of a proposed mark may file an **opposition proceeding**¹⁷ with the PTO. Until 1990, the office received about 77,000 applications each year. With the change in procedure, some experts predicted that applications would rise by 30 percent.

In many foreign countries, use need not be shown to obtain trademark registration. It is common for some people in these countries to register marks that they expect to be valuable so that they can sell the right to use the mark to the company that established the mark's value. Companies that expect to market abroad should register their marks early.

Loss of Rights

Trademark owners may lose their rights if they abandon the mark, if a patent or copyright expires on which the mark is based, or if the mark becomes generic. A mark is abandoned if a company goes out of business and ceases selling the product. Some marks are based on design patents; when the patent expires, the patent holder will not be allowed to extend the patent's duration by arguing that the design or name linked with the design is a registrable trademark.

The most widespread difficulty that a trademark holder faces is the prospect of too much success: if a trademark comes to stand generically for the product itself, it may lose exclusivity in the mark. Famous examples are aspirin, escalator, and cellophane. The threat is a continual one. Trademark holders can protect themselves from their marks' becoming generic in several ways.

1. Use a descriptive term along with the trademark. Look on a jar of Vaseline and you will see that the label refers to the contents as Vaseline petroleum jelly.
2. Protest generic use of the mark in all publications by writing letters and taking out advertisements.
3. Always put the words Trademark, Registered Trademark, or the symbol ® (meaning "registered") next to the mark itself, which should be capitalized.

17. Those who feel that their own marks would be hurt by registration of a proposed mark may file an opposition proceeding in the US Patent and Trademark Office.

KEY TAKEAWAY

Trademark protection is federal, under the Lanham Act. Branding of corporate logos, names, and products is essential to business success, and understanding trademarks is pivotal to branding. A “mark” must be distinctive, arbitrary, or fanciful to merit protection: this means that it must not be generic or descriptive. Marks can be words, symbols, pictures, slogans, sounds, phrases, and even shapes. In the United States, rights to marks are obtained by registration and intent to use in commerce and must be renewed every ten years.

EXERCISES

1. How will Google protect its trademark, assuming that people begin using “google” as a verb substitute for “Internet search,” just like people began using the word “cellophane” for all brands of plastic wrap?
2. Do a small amount of web searching and find out what “trade dress” protection is, and how it differs from trademark protection.
3. LexisNexis is a brand for a database collection offered by Mead Data Central. Lexus is a high-end automobile. Can Lexus succeed in getting Mead Data Central to stop using “Lexis” as a mark?

32.5 Cases

Fair Use in Copyright

Elvis Presley Enterprises et al. v. Passport Video et al.

349 F.3d 622 (9th Circuit Court of Appeals, 2003)

TALLMAN, CIRCUIT JUDGE:

Plaintiffs are a group of companies and individuals holding copyrights in various materials relating to Elvis Presley. For example, plaintiff SOFA Entertainment, Inc., is the registered owner of several Elvis appearances on *The Ed Sullivan Show*. Plaintiff Promenade Trust owns the copyright to two television specials featuring Elvis: *The Elvis 1968 Comeback Special* and *Elvis Aloha from Hawaii....* Many Plaintiffs are in the business of licensing their copyrights. For example, SOFA Entertainment charges \$10,000 per minute for use of Elvis' appearances on *The Ed Sullivan Show*.

Passport Entertainment and its related entities (collectively "Passport") produced and sold *The Definitive Elvis*, a 16-hour video documentary about the life of Elvis Presley. *The Definitive Elvis* sold for \$99 at retail. Plaintiffs allege that thousands of copies were sent to retail outlets and other distributors. On its box, *The Definitive Elvis* describes itself as an all-encompassing, in-depth look at the life and career of a man whose popularity is unrivaled in the history of show business and who continues to attract millions of new fans each year....

The Definitive Elvis uses Plaintiffs' copyrighted materials in a variety of ways. With the video footage, the documentary often uses shots of Elvis appearing on television while a narrator or interviewee talks over the film. These clips range from only a few seconds in length to portions running as long as 30 seconds. In some instances, the clips are the subject of audio commentary, while in other instances they would more properly be characterized as video "filler" because the commentator is discussing a subject different from or more general than Elvis' performance on a particular television show. But also significant is the frequency with which the copyrighted video footage is used. *The Definitive Elvis* employs these clips, in many instances, repeatedly. In total, at least 5% to 10% of *The Definitive Elvis* uses Plaintiffs' copyrighted materials.

Use of the video footage, however, is not limited to brief clips....Thirty-five percent of his appearances on *The Ed Sullivan Show* is replayed, as well as three minutes from *The 1968 Comeback Special*.

* * *

Plaintiffs sued Passport for copyright infringement....Passport, however, asserts that its use of the copyrighted materials was “fair use” under 17 U.S.C. § 107. Plaintiffs moved for a preliminary injunction, which was granted by the district court after a hearing. The district court found that Passport’s use of Plaintiffs’ copyrighted materials was likely not fair use. The court enjoined Passport from selling or distributing *The Definitive Elvis*. Passport timely appeals.

* * *

We first address the purpose and character of Passport’s use of Plaintiffs’ copyrighted materials. Although not controlling, the fact that a new use is commercial as opposed to non-profit weighs against a finding of fair use. *Harper & Row Publishers, Inc. v. Nation Enters.*, 471 U.S. 539, 562, 85 L. Ed. 2d 588, 105 S.Ct. 2218 (1985). And the degree to which the new user exploits the copyright for commercial gain—as opposed to incidental use as part of a commercial enterprise—affects the weight we afford commercial nature as a factor. More importantly for the first fair-use factor, however, is the “transformative” nature of the new work. Specifically, we ask “whether the new work...merely supersedes the objects of the original creation, or instead adds something new, with a further purpose or different character, altering the first with new expression, meaning, or message....” The more transformative a new work, the less significant other inquiries, such as commercialism, become.

* * *

The district court below found that the purpose and character of *The Definitive Elvis* will likely weigh against a finding of fair use. We cannot say, based on this record, that the district court abused its discretion.

First, Passport’s use, while a biography, is clearly commercial in nature. But more significantly, Passport seeks to profit directly from the copyrights it uses without a license. One of the most salient selling points on the box of *The Definitive Elvis* is that “Every Film and Television Appearance is represented.” Passport is not advertising a scholarly critique or historical analysis, but instead seeks to profit at least in part from the inherent entertainment value of Elvis’ appearances on such shows as *The*

Steve Allen Show, The Ed Sullivan Show, and The 1968 Comeback Special. Passport's claim that this is scholarly research containing biographical comments on the life of Elvis is not dispositive of the fair use inquiry.

Second, Passport's use of Plaintiffs' copyrights is not consistently transformative. True, Passport's use of many of the television clips is transformative because the clips play for only a few seconds and are used for reference purposes while a narrator talks over them or interviewees explain their context in Elvis' career. But voice-overs do not necessarily transform a work....

It would be impossible to produce a biography of Elvis without showing some of his most famous television appearances for reference purposes. But some of the clips are played without much interruption, if any. The purpose of showing these clips likely goes beyond merely making a reference for a biography, but instead serves the same intrinsic entertainment value that is protected by Plaintiffs' copyrights.

* * *

The third factor is the amount and substantiality of the portion used in relation to the copyrighted work as a whole. This factor evaluates both the quantity of the work taken and the quality and importance of the portion taken. Regarding the quantity, copying "may not be excused merely because it is insubstantial with respect to the *infringing* work." *Harper & Row*, 471 U.S. at 565 (emphasis in original). But if the amount used is substantial with respect to the infringing work, it is evidence of the value of the copy-righted work.

Passport's use of clips from television appearances, although in most cases of short duration, were repeated numerous times throughout the tapes. While using a small number of clips to reference an event for biographical purposes seems fair, using a clip over and over will likely no longer serve a biographical purpose. Additionally, some of the clips were not short in length. Passport's use of Elvis' appearance on *The Steve Allen Show* plays for over a minute and many more clips play for more than just a few seconds.

Additionally, although the clips are relatively short when compared to the entire shows that are copyrighted, they are in many instances the heart of the work. What makes these copyrighted works valuable is Elvis' appearance on the shows, in many cases singing the most familiar passages of his most popular songs. Plaintiffs are in the business of licensing these copyrights. Taking key portions extracts the most valuable part of Plaintiffs' copyrighted works. With respect to the photographs, the

entire picture is often used. The music, admittedly, is usually played only for a few seconds.

* * *

The last, and “undoubtedly the single most important” of all the factors, is the effect the use will have on the potential market for and value of the copyrighted works. *Harper & Row*, 471 U.S. at 566. We must “consider not only the extent of market harm caused by the particular actions of the alleged infringer, but also whether unrestricted and widespread conduct of the sort engaged in by the defendant...would result in a substantially adverse impact on the potential market for the original.” *Campbell*, 510 U.S. at 590. The more transformative the new work, the less likely the new work’s use of copyrighted materials will affect the market for the materials. Finally, if the purpose of the new work is commercial in nature, “the likelihood [of market harm] may be presumed.” *A&M Records*, 239 F.3d at 1016 (quoting *Sony*, 464 U.S. at 451).

The district court found that Passport’s use of Plaintiffs’ copyrighted materials likely does affect the market for those materials. This conclusion was not clearly erroneous.

First, Passport’s use is commercial in nature, and thus we can assume market harm. Second, Passport has expressly advertised that *The Definitive Elvis* contains the television appearances for which Plaintiffs normally charge a licensing fee. If this type of use became wide-spread, it would likely undermine the market for selling Plaintiffs’ copyrighted material. This conclusion, however, does not apply to the music and still photographs. It seems unlikely that someone in the market for these materials would purchase *The Definitive Elvis* instead of a properly licensed product. Third, Passport’s use of the television appearances was, in some instances, not transformative, and therefore these uses are likely to affect the market because they serve the same purpose as Plaintiffs’ original works.

* * *

We emphasize that our holding today is not intended to express how we would rule were we examining the case *ab initio* as district judges. Instead, we confine our review to whether the district court abused its discretion when it weighed the four statutory fair-use factors together and determined that Plaintiffs would likely succeed on the merits. Although we might view this case as closer than the district court saw it, we hold there was no abuse of discretion in the court’s decision to grant Plaintiffs’ requested relief.

AFFIRMED.

CASE QUESTIONS

1. How would you weigh the four factors in this case? If the trial court had found fair use, would the appeals court have overturned its ruling?
2. Why do you think that the fourth factor is especially important?
3. What is the significance of the discussion on “transformative” aspects of the defendant’s product?

Trademark Infringement and Dilution

Playboy Enterprises v. Welles

279 F.3d 796 (9th Circuit Court of Appeals, 2001)

T. G. NELSON, Circuit Judge:

Terri Welles was on the cover of Playboy in 1981 and was chosen to be the Playboy Playmate of the Year for 1981. Her use of the title “Playboy Playmate of the Year 1981,” and her use of other trademarked terms on her website are at issue in this suit. During the relevant time period, Welles’ website offered information about and free photos of Welles, advertised photos for sale, advertised memberships in her photo club, and promoted her services as a spokesperson. A biographical section described Welles’ selection as Playmate of the Year in 1981 and her years modeling for PEI. The site included a disclaimer that read as follows: “This site is neither endorsed, nor sponsored, nor affiliated with Playboy Enterprises, Inc. PLAYBOY tm PLAYMATE OF THE YEAR tm AND PLAYMATE OF THE MONTH tm are registered trademarks of Playboy Enterprises, Inc.”

Wells used (1) the terms “Playboy ”and “Playmate” in the metatags of the website; (2) the phrase “Playmate of the Year 1981” on the masthead of the website; (3) the phrases “Playboy Playmate of the Year 1981” and “Playmate of the Year 1981” on various banner ads, which may be transferred to other websites; and (4) the repeated use of the abbreviation “PMOY ’81” as the watermark on the pages of the website. PEI claimed that these uses of its marks constituted trademark infringement, dilution, false designation of origin, and unfair competition. The district court granted defendants’ motion for summary judgment. PEI appeals the grant of summary judgment on its infringement and dilution claims. We affirm in part and reverse in part.

A. Trademark Infringement

Except for the use of PEI's protected terms in the wallpaper of Welles' website, we conclude that Welles' uses of PEI's trademarks are permissible, nominative uses. They imply no current sponsorship or endorsement by PEI. Instead, they serve to identify Welles as a past PEI "Playmate of the Year."

We articulated the test for a permissible, nominative use in *New Kids On The Block v. New America Publishing, Inc.* The band, New Kids On The Block, claimed trademark infringement arising from the use of their trademarked name by several newspapers. The newspapers had conducted polls asking which member of the band New Kids On The Block was the best and most popular. The papers' use of the trademarked term did not fall within the traditional fair use doctrine. Unlike a traditional fair use scenario, the defendant newspaper was using the trademarked term to describe not its own product, but the plaintiff's. Thus, the factors used to evaluate fair use were inapplicable. The use was nonetheless permissible, we concluded, based on its nominative nature.

We adopted the following test for nominative use:

First, the product or service in question must be one not readily identifiable without use of the trademark; second, only so much of the mark or marks may be used as is reasonably necessary to identify the product or service; and third, the user must do nothing that would, in conjunction with the mark, suggest sponsorship or endorsement by the trademark holder.

We group the uses of PEI's trademarked terms into three for the purpose of applying the test for nominative use.

1. Headlines and banner advertisements.

...

The district court properly identified Welles' situation as one which must... be excepted. No descriptive substitute exists for PEI's trademarks in this context....Just as the newspapers in *New Kids* could only identify the band clearly by using its trademarked name, so can Welles only identify herself clearly by using PEI's trademarked title.

The second part of the nominative use test requires that “only so much of the mark or marks may be used as is reasonably necessary to identify the product or service[.]” *New Kids* provided the following examples to explain this element: “[A] soft drink competitor would be entitled to compare its product to Coca-Cola or Coke, but would not be entitled to use Coca-Cola’s distinctive lettering.” Similarly, in a past case, an auto shop was allowed to use the trademarked term “Volkswagen” on a sign describing the cars it repaired, in part because the shop “did not use Volkswagen’s distinctive lettering style or color scheme, nor did he display the encircled ‘VW’ emblem.” Welles’ banner advertisements and headlines satisfy this element because they use only the trademarked words, not the font or symbols associated with the trademarks.

The third element requires that the user do “nothing that would, in conjunction with the mark, suggest sponsorship or endorsement by the trademark holder.” As to this element, we conclude that aside from the wallpaper, which we address separately, Welles does nothing in conjunction with her use of the marks to suggest sponsorship or endorsement by PEI. The marks are clearly used to describe the title she received from PEI in 1981, a title that helps describe who she is. It would be unreasonable to assume that the Chicago Bulls sponsored a website of Michael Jordan’s simply because his name appeared with the appellation “former Chicago Bull.” Similarly, in this case, it would be unreasonable to assume that PEI currently sponsors or endorses someone who describes herself as a “Playboy Playmate of the Year in 1981.” The designation of the year, in our case, serves the same function as the “former” in our example. It shows that any sponsorship or endorsement occurred in the past.

For the foregoing reasons, we conclude that Welles’ use of PEI’s marks in her headlines and banner advertisements is a nominative use excepted from the law of trademark infringement.

2. Metatags

Welles includes the terms “playboy” and “playmate” in her metatags. Metatags describe the contents of a website using keywords. Some search engines search metatags to identify websites relevant to a search. Thus, when an internet searcher enters “playboy” or “playmate” into a search engine that uses metatags, the results will include Welles’ site. Because Welles’ metatags do not repeat the terms extensively, her site will not be at the top of the list of search results. Applying the three-factor test for nominative use, we conclude that the use of the trademarked terms in Welles’ metatags is nominative.

As we discussed above with regard to the headlines and banner advertisements, Welles has no practical way of describing herself without using trademarked terms. In the context of metatags, we conclude that she has no practical way of identifying the content of her website without referring to PEI's trademarks.

...

Precluding their use would have the unwanted effect of hindering the free flow of information on the internet, something which is certainly not a goal of trademark law. Accordingly, the use of trademarked terms in the metatags meets the first part of the test for nominative use....We conclude that the metatags satisfy the second and third elements of the test as well. The metatags use only so much of the marks as reasonably necessary and nothing is done in conjunction with them to suggest sponsorship or endorsement by the trademark holder. We note that our decision might differ if the metatags listed the trademarked term so repeatedly that Welles' site would regularly appear above PEI's in searches for one of the trademarked terms.

3. Wallpaper/watermark.

The background, or wallpaper, of Welles' site consists of the repeated abbreviation "PMOY '81," which stands for "Playmate of the Year 1981." Welles' name or likeness does not appear before or after "PMOY '81." The pattern created by the repeated abbreviation appears as the background of the various pages of the website. Accepting, for the purposes of this appeal, that the abbreviation "PMOY" is indeed entitled to protection, we conclude that the repeated, stylized use of this abbreviation fails the nominative use test.

The repeated depiction of "PMOY '81" is not necessary to describe Welles. "Playboy Playmate of the Year 1981" is quite adequate. Moreover, the term does not even appear to describe Welles—her name or likeness do not appear before or after each "PMOY '81." Because the use of the abbreviation fails the first prong of the nominative use test, we need not apply the next two prongs of the test.

Because the defense of nominative use fails here, and we have already determined that the doctrine of fair use does not apply, we remand to the district court. The court must determine whether trademark law protects the abbreviation "PMOY," as used in the wallpaper.

B. Trademark Dilution [At this point, the court considers and rejects PEI's claim for trademark dilution.]

Conclusion

For the foregoing reasons, we affirm the district court's grant of summary judgment as to PEI's claims for trademark infringement and trademark dilution, with the sole exception of the use of the abbreviation "PMOY." We reverse as to the abbreviation and remand for consideration of whether it merits protection under either an infringement or a dilution theory.

CASE QUESTIONS

1. Do you agree with the court's decision that there is no dilution here?
2. If PMOY is not a registered trademark, why does the court discuss it?
3. What does "nominative use" mean in the context of this case?
4. In business terms, why would PEI even think that it was losing money, or could lose money, based on Welles's use of its identifying marks?

32.6 Summary and Exercises

Summary

The products of the human mind are at the root of all business, but they are legally protectable only to a certain degree. Inventions that are truly novel may qualify for a twenty-year patent; the inventor may then prohibit anyone from using the art (machine, process, manufacture, and the like) or license it on his own terms. A business may sue a person who improperly gives away its legitimate trade secrets, but it may not prevent others from using the unpatented trade secret once publicly disclosed. Writers or painters, sculptors, composers, and other creative artists may generally protect the expression of their ideas for the duration of their lives plus seventy years, as long as the ideas are fixed in some tangible medium. That means that they may prevent others from copying their words (or painting, etc.), but they may not prevent anyone from talking about or using their ideas. Finally, one who markets a product or service may protect its trademark or service or other mark that is distinctive or has taken on a secondary meaning, but may lose it if the mark becomes the generic term for the goods or services.

EXERCISES

1. Samuel Morse filed claims in the US Patent Office for his invention of the telegraph and also for the “use of the motive power of the electric or galvanic current...however developed, for marking or printing intelligible characters, signs or letters at any distances.” For which claim, if any, was he entitled to a patent? Why?
2. In 1957, an inventor dreamed up and constructed a certain new kind of computer. He kept his invention a secret. Two years later, another inventor who conceived the same machine filed a patent application. The first inventor, learning of the patent application, filed for his own patent in 1963. Who is entitled to the patent, assuming that the invention was truly novel and not obvious? Why?
3. A large company discovered that a small company was infringing one of its patents. It wrote the small company and asked it to stop. The small company denied that it was infringing. Because of personnel changes in the large company, the correspondence file was lost and only rediscovered eight years later. The large company sued. What would be the result? Why?
4. Clifford Witter was a dance instructor at the Arthur Murray Dance Studios in Cleveland. As a condition of employment, he signed a contract not to work for a competitor. Subsequently, he was hired by the Fred Astaire Dancing Studios, where he taught the method that he had learned at Arthur Murray. Arthur Murray sued to enforce the noncompete contract. What would be result? What additional information, if any, would you need to know to decide the case?
5. Greenberg worked for Buckingham Wax as its chief chemist, developing chemical formulas for products by testing other companies’ formulas and modifying them. Brite Products bought Buckingham’s goods and resold them under its own name. Greenberg went to work for Brite, where he helped Brite make chemicals substantially similar to the ones it had been buying from Buckingham. Greenberg had never made any written or oral commitment to Buckingham restricting his use of the chemical formulas he developed. May Buckingham stop Greenberg from working for Brite? May it stop him from working on formulas learned while working at Buckingham? Why?

SELF-TEST QUESTIONS

1. Which of the following cannot be protected under patent, copyright, or trademark law?
 - a. a synthesized molecule
 - b. a one-line book title
 - c. a one-line advertising jingle
 - d. a one-word company name

2. Which of the following does not expire by law?
 - a. a closely guarded trade secret not released to the public
 - b. a patent granted by the US Patent and Trademark Office
 - c. a copyright registered in the US Copyright Office
 - d. a federal trademark registered under the Lanham Act

3. A sculptor casts a marble statue of a three-winged bird. To protect against copying, the sculptor can obtain which of the following?
 - a. a patent
 - b. a trademark
 - c. a copyright
 - d. none of the above

4. A stock analyst discovers a new system for increasing the value of a stock portfolio. He may protect against use of his system by other people by securing
 - a. a patent
 - b. a copyright
 - c. a trademark
 - d. none of the above

5. A company prints up its customer list for use by its sales staff. The cover page carries a notice that says “confidential.” A rival salesman gets a copy of the list. The company can sue to recover the list because the list is

- a. patented
- b. copyrighted
- c. a trade secret
- d. none of the above

Chapter 33

The Nature and Regulation of Real Estate and the Environment

LEARNING OBJECTIVES

After reading this chapter, you should understand the following:

1. The various kinds of interests (or “estates”) in real property
2. The various rights that come with ownership of real property
3. What easements are, how they are created, and how they function
4. How ownership of real property is regulated by tort law, by agreement, and by the public interest (through eminent domain)
5. The various ways in which environmental laws affect the ownership and use of real property

Real property is an important part of corporate as well as individual wealth. As a consequence, the role of the corporate real estate manager has become critically important within the corporation. The real estate manager must be aware not only of the value of land for purchase and sale but also of proper lease negotiation, tax policies and assessments, zoning and land development, and environmental laws.

In this chapter and in [Chapter 34 "The Transfer of Real Estate by Sale"](#) and [Chapter 35 "Landlord and Tenant Law"](#), we focus on regulation of land use and the environment (see [Figure 33.1 "Chapter Overview"](#)). We divide our discussion of the nature of real estate into three major categories: (1) estates; (2) rights that are incidental to the possession and ownership of land—for example, the right to air, water, and minerals; and (3) easements—the rights in lands of others.

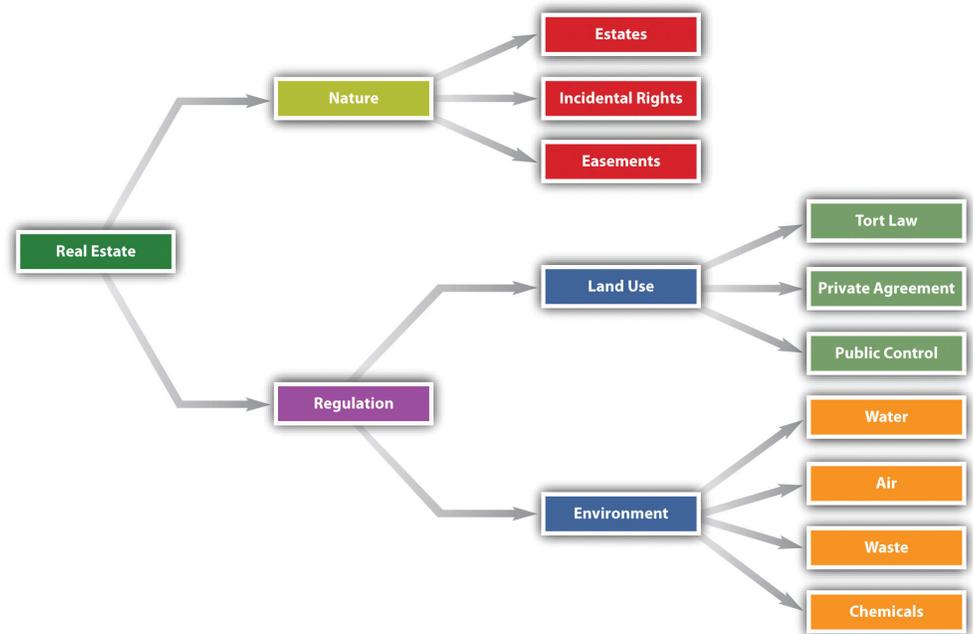

33.1 Estates

LEARNING OBJECTIVE

1. Distinguish between the various kinds of estates, or interests, in real property that the law recognizes.

In property law, an estate is an interest in real property, ranging from absolute dominion and control to bare possession. Ordinarily when we think of property, we think of only one kind: absolute ownership. The owner of a car has the right to drive it where and when she wants, rebuild it, repaint it, and sell it or scrap it. The notion that the owner might lose her property when a particular event happens is foreign to our concept of personal property. Not so with real property. You would doubtless think it odd if you were sold a used car subject to the condition that you not paint it a different color—and that if you did, you would automatically be stripped of ownership. But land can be sold that way. Land and other real property can be divided into many categories of interests, as we will see. (Be careful not to confuse the various types of interests in real property with the forms of ownership, such as joint tenancy. An interest in real property that amounts to an estate is a measure of the degree to which a thing is owned; the form of ownership deals with the particular person or persons who own it.)

Figure 33.1 Chapter Overview

The common law distinguishes estates along two main axes: (1) freeholds versus leaseholds and (2) present versus future interests. A **freehold estate**¹ is an interest in land that has an uncertain duration. The freehold can be outright ownership—called the fee simple absolute—or it can be an interest in the land for the life of the possessor; in either case, it is impossible to say exactly how long the estate will last. In the case of one who owns property outright, her estate will last until she sells or transfers it; in the case of a life estate, it will last until the death of the owner or another specified individual. A **leasehold estate**² is one whose termination date is usually known. A one-year lease, for example, will expire precisely at the time stated in the lease agreement.

A present estate is one that is currently owned and enjoyed; a future estate is one that will come into the owner’s possession upon the occurrence of a particular event. In this chapter, we consider both present and future freehold interests; leasehold interests we save for [Chapter 35 "Landlord and Tenant Law"](#).

1. An interest in land that has an uncertain duration.
2. An estate whose termination date is usually known—a one-year lease, for example.
3. The most extensive set of rights that can be conveyed in real property.

Present Estates (Freeholds)

Fee Simple Absolute

The strongest form of ownership is known as the **fee simple absolute**³ (or fee simple, or merely fee). This is what we think of when we say that someone “owns” the land. As one court put it, “The grant of a fee in land conveys to the grantee

complete ownership, immediately and forever, with the right of possession from boundary to boundary and from the center of the earth to the sky, together with all the lawful uses thereof.” *Magnolia Petroleum Co. v. Thompson*, 106 F.2d 217 (8th Cir. 1939). Although the fee simple may be encumbered by a mortgage (you may borrow money against the equity in your home) or an easement (you may grant someone the right to walk across your backyard), the underlying control is in the hands of the owner. Though it was once a complex matter in determining whether a person had been given a fee simple interest, today the law presumes that the estate being transferred is a fee simple, unless the conveyance expressly states to the contrary. (In her will, Lady Gaga grants her five-thousand-acre ranch “to my screen idol, Tilda Swinton.” On the death of Lady Gaga, Swinton takes ownership of the ranch outright in fee simple absolute.)

Fee Simple Defeasible

Not every transfer of real property creates a fee simple absolute. Some transfers may limit the estate. Any transfer specifying that the ownership will terminate upon a particular happening is known as a **fee simple defeasible**⁴. Suppose, for example, that Mr. Warbucks conveys a tract of land “to Miss Florence Nightingale, for the purpose of operating her hospital and for no other purpose. Conveyance to be good as long as hospital remains on the property.” This grant of land will remain the property of Miss Nightingale and her heirs as long as she and they maintain a hospital. When they stop doing so, the land will automatically revert to Mr. Warbucks or his heirs, without their having to do anything to regain title. Note that the conveyance of land could be perpetual but is not absolute, because it will remain the property of Miss Nightingale only so long as she observes the conditions in the grant.

Life Estates

An estate measured by the life of a particular person is called a **life estate**⁵. A conventional life estate is created privately by the parties themselves. The simplest form is that conveyed by the following words: “to Scarlett for life.” Scarlett becomes a life tenant; as such, she is the owner of the property and may occupy it for life or lease it or even sell it, but the new tenant or buyer can acquire only as much as Scarlett has to give, which is ownership for her life (i.e., all she can sell is a life estate in the land, not a fee simple absolute). If Scarlett sells the house and dies a month later, the buyer’s interest would terminate. A life estate may be based on the life of someone other than the life tenant: “to Scarlett for the life of Rhett.”

The **life tenant**⁶ may use the property as though he were the owner in fee simple absolute with this exception: he may not act so as to diminish the value of the property that will ultimately go to the remainderman—the person who will become

4. Any transfer specifying that the ownership will terminate upon a particular happening.
5. An estate measured by the life of a particular person. A conventional life estate is created privately by the parties themselves.
6. Someone who holds an estate in land for his or her life or the life of another.

owner when the life estate terminates. The life tenant must pay the life estate for ordinary upkeep of the property, but the remainderman is responsible for extraordinary repairs.

Some life estates are created by operation of law and are known as legal life estates. The most common form is a widow's interest in the real property of her husband. In about one-third of the states, a woman is entitled to **dower**⁷, a right to a percentage (often one-third) of the property of her husband when he dies. Most of these states give a widower a similar interest in the property of his deceased wife. Dower is an alternative to whatever is bequeathed in the will; the widow has the right to elect the share stated in the will or the share available under dower. To prevent the dower right from upsetting the interests of remote purchasers, the right may be waived on sale by having the spouse sign the deed.

Future Estates

To this point, we have been considering present estates. But people also can have future interests in real property. Despite the implications of its name, the future interest is owned now but is not available to be used or enjoyed now. For the most part, future interests may be bought and sold, just as land held in fee simple absolute may be bought and sold. There are several classes of future interests, but in general there are two major types: reversion and remainder.

Reversion

A **reversion**⁸ arises whenever the estate transferred has a duration less than that originally owned by the transferor. A typical example of a simple reversion is that which arises when a life estate is conveyed. The ownership conveyed is only for the life; when the life tenant dies, the ownership interest reverts to the grantor.

Suppose the grantor has died in the meantime. Who gets the reversion interest? Since the reversion is a class of property that is owned now, it can be inherited, and the grantor's heirs would take the reversion at the subsequent death of the life tenant.

Remainder

The transferor need not keep the reversion interest for himself. He can give that interest to someone else, in which case it is known as a **remainder**⁹ interest, because the remainder of the property is being transferred. Suppose the transferor conveys land with these words: "to Scarlett for life and then to Rhett." Scarlett has a life estate; the remainder goes to Rhett in fee simple absolute. Rhett is said to have a vested remainder interest, because on Scarlett's death, he or his heirs will

7. A statutory alternative to whatever is bequeathed in the will; the widow has the right to elect the share stated in the will or the share available under dower.

8. A reversion arises whenever the estate transferred has a duration less than that originally owned by the transferor.

9. The real property interest that remains after the life estate interest or other interest subject to defeasance.

automatically become owners of the property. Some remainder interests are contingent—and are therefore known as contingent remainder interests—on the happening of a certain event: “to my mother for her life, then to my sister if she marries Harold before my mother dies.” The transferor’s sister will become the owner of the property in fee simple only if she marries Harold while her mother is alive; otherwise, the property will revert to the transferor or his heirs. The number of permutations of reversions and remainders can become quite complex, far more than we have space to discuss in this text.

KEY TAKEAWAY

An estate is an interest in real property. Estates are of many kinds, but one generic difference is between ownership estates and possessory estates. Fee simple estates and life estates are ownership estates, while leasehold interests are possessory. Among ownership estates, the principal division is between present estates and future estates. An owner of a future estate has an interest that can be bought and sold and that will ripen into present possession at the end of a period of time, at the end of the life of another, or with the happening of some contingent event.

EXERCISES

1. Jessa owns a house and lot on 9th Avenue. She sells the house to the Hartley family, who wish to have a conveyance from her that says, “to Harriet Hartley for life, remainder to her son, Alexander Sandridge.” Alexander is married to Chloe, and they have three children, Carmen, Sarah, and Michael. Who has a future interest, and who has a present interest? What is the correct legal term for Harriet’s estate? Does Alexander, Carmen, Sarah, or Michael have any part of the estate at the time Jessa conveys to Harriet using the stated language?
2. After Harriet dies, Alexander wants to sell the property. Alexander and Chloe’s children are all eighteen years of age or older. Can he convey the property by his signature alone? Who else needs to sign?

33.2 Rights Incident to Possession and Ownership of Real Estate

LEARNING OBJECTIVE

1. Understand that property owners have certain rights in the airspace above their land, in the minerals beneath their land, and even in water that adjoins their land.

Rights to Airspace

The traditional rule was stated by Lord Coke: “Whoever owns the soil owns up to the sky.” This traditional rule remains valid today, but its application can cause problems. A simple example would be a person who builds an extension to the upper story of his house so that it hangs out over the edge of his property line and thrusts into the airspace of his neighbor. That would clearly be an encroachment on the neighbor’s property. But is it trespass when an airplane—or an earth satellite—flies over your backyard? Obviously, the courts must balance the right to travel against landowners’ rights. In *U.S. v. Causby*, *U.S. v. Causby*, 328 U.S. 256 (1946), the Court determined that flights over private land may constitute a diminution in the property value if they are so low and so frequent as to be a direct and immediate interference with the enjoyment and use of land.

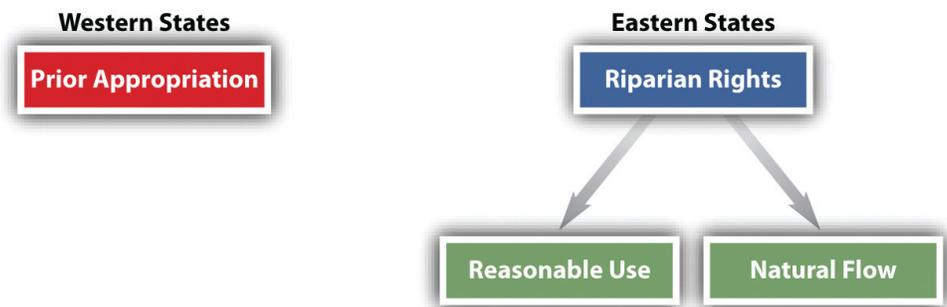

Rights to the Depths

Lord Coke’s dictum applies to the depths as well as the sky. The owner of the surface has the right to the oil, gas, and minerals below it, although this right can be severed and sold separately. Perplexing questions may arise in the case of oil and gas, which can flow under the surface. Some states say that oil and gas can be owned by the owner of the surface land; others say that they are not owned until actually extracted—although the property owner may sell the exclusive right to extract them from his land. But states with either rule recognize that oil and gas are capable of being “captured” by drilling that causes oil or gas from under another plot of land to run toward the drilled hole. Since the possibility of capture can lead to wasteful drilling practices as everyone nearby rushes to capture the precious commodities, many states have enacted statutes requiring landowners to share the resources.

Rights to Water

The right to determine how bodies of water will be used depends on basic property rules. Two different approaches to water use in the United States—eastern and western—have developed over time (see [Figure 33.2 "Water Rights"](#)). Eastern states, where water has historically been more plentiful, have adopted the so-called riparian rights theory, which itself can take two forms. *Riparian* refers to land that includes a part of the bed of a waterway or that borders on a public watercourse. A riparian owner is one who owns such land. What are the rights of upstream and downstream owners of riparian land regarding use of the waters? One approach is the “natural flow” doctrine: Each riparian owner is entitled to have the river or other waterway maintained in its natural state. The upstream owner may use the river for drinking water or for washing but may not divert it to irrigate his crops or to operate his mill if doing so would materially change the amount of the flow or the quality of the water. Virtually all eastern states today are not so restrictive and rely instead on a “reasonable use” doctrine, which permits the benefit to be derived from use of the waterway to be weighed against the gravity of the harm. This approach is illustrated in *Hoover v. Crane*, (see [Section 33.6.1 "Reasonable Use Doctrine"](#)). *Hoover v. Crane*, 362 Mich. 36, 106 N.W.2d 563 (1960).

Figure 33.2 *Water Rights*

In contrast to riparian rights doctrines, western states have adopted the prior appropriation doctrine. This rule looks not to equality of interests but to priority in time: first in time is first in right. The first person to use the water for a beneficial purpose has a right superior to latecomers. This rule applies even if the first user takes all the water for his own needs and even if other users are riparian owners. This rule developed in water-scarce states in which development depended on incentives to use rather than hoard water. Today, the prior appropriation doctrine has come under criticism because it gives incentives to those who already have the right to the water to continue to use it profligately, rather than to those who might develop more efficient means of using it.

KEY TAKEAWAY

Property owners have certain rights in the airspace above their land. They also have rights in subsurface minerals, which include oil and gas. Those property owners who have bodies of water adjacent to their land will also have certain rights to withdraw or impound water for their own use. Regarding US water law, the reasonable use doctrine in the eastern states is distinctly different from the prior appropriation doctrine in western states.

EXERCISES

1. Steve Hannaford farms in western Nebraska. The farm has passed to succeeding generations of Hannafords, who use water from the North Platte River for irrigation purposes. The headlands of the North Platte are in Colorado, but use of the water from the North Platte by Nebraskans preceded use of the water by settlers in Colorado. What theory of water rights governs Nebraska and Colorado residents? Can the state of Colorado divert and use water in such a way that less of it reaches western Nebraska and the Hannaford farm? Why or why not?
2. Jamie Stoner decides to put solar panels on the south face of his roof. Jamie lives on a block of one- and two-bedroom bungalows in South Miami, Florida. In 2009, someone purchases the house next door and within two years decides to add a second and third story. This proposed addition will significantly decrease the utility of Jamie's solar array. Does Jamie have any rights that would limit what his new neighbors can do on their own land?

33.3 Easements: Rights in the Lands of Others

LEARNING OBJECTIVES

1. Explain the difference between an easement and a license.
2. Describe the ways in which easements can be created.

Definition

An **easement**¹⁰ is an interest in land created by agreement that permits one person to make use of another's estate. This interest can extend to a profit, the taking of something from the other's land. Though the common law once distinguished between an easement and profit, today the distinction has faded, and profits are treated as a type of easement. An easement must be distinguished from a mere **license**¹¹, which is permission, revocable at the will of the owner, to make use of the owner's land. An easement is an estate; a license is personal to the grantee and is not assignable.

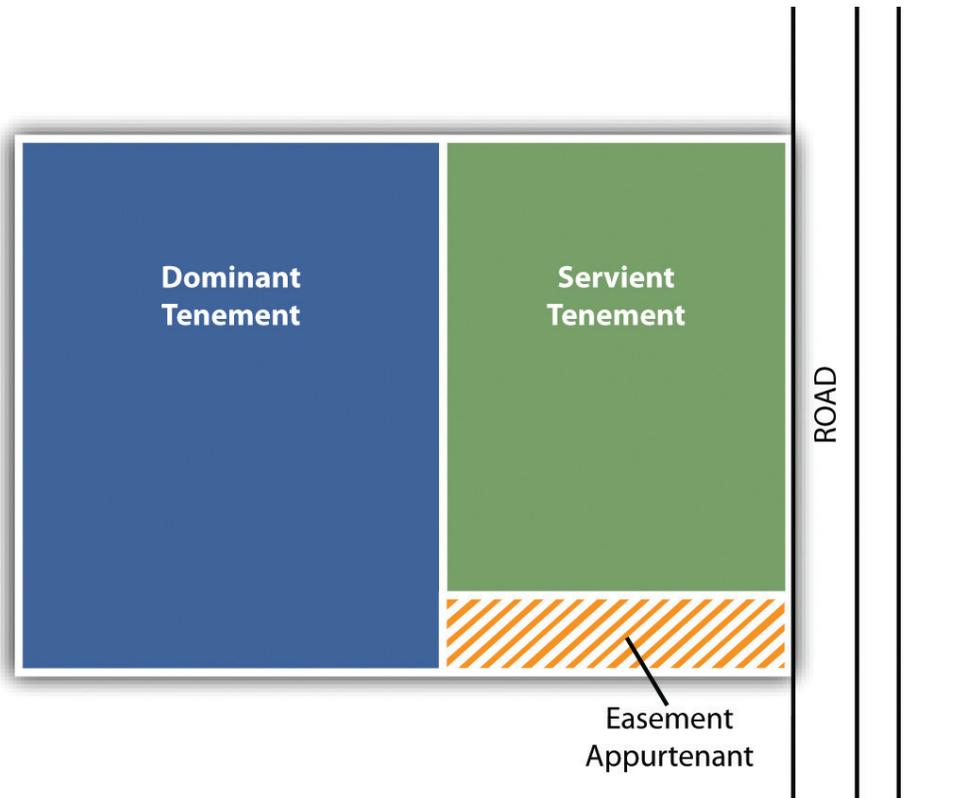

The two main types of easements are affirmative and negative. An affirmative easement gives a landowner the right to use the land of another (e.g., crossing it or using water from it), while a **negative easement**¹², by contrast, prohibits the landowner from using his land in ways that would affect the holder of the easement. For example, the builder of a solar home would want to obtain negative easements from neighbors barring them from building structures on their land that would block sunlight from falling on the solar home. With the growth of solar energy, some states have begun to provide stronger protection by enacting laws that regulate one's ability to interfere with the enjoyment of sunlight. These laws range from a relatively weak statute in Colorado, which sets forth rules for obtaining easements, to the much stronger statute in California, which says in effect that the owner of a solar device has a vested right to continue to receive the sunlight.

Another important distinction is made between easements appurtenant and easements in gross. An **easement appurtenant**¹³ benefits the owner of adjacent land. The easement is thus appurtenant to the holder's land. The benefited land is called the **dominant tenement**¹⁴, and the burdened land—that is, the land subject to the easement—is called the **servient tenement**¹⁵ (see [Figure 33.3 "Easement Appurtenant"](#)). An easement in gross is granted independent of the easement holder's ownership or possession of land. It is simply an independent right—for

10. An interest in land created by agreement that permits one person to make use of another's estate.
11. As opposed to an easement, a license is personal to the grantee and is not assignable.
12. An easement that prohibits the owner of the land from using his or her land in ways that would affect the holder of the easement.
13. An easement that benefits the owner of adjacent land. The easement is thus appurtenant to the holder's land.
14. The land that benefits from an easement.
15. The burdened land—that is, the land subject to the easement.

example, the right granted to a local delivery service to drive its trucks across a private roadway to gain access to homes at the other end.

Figure 33.3 *Easement Appurtenant*

Unless it is explicitly limited to the grantee, an easement appurtenant “runs with the land.” That is, when the dominant tenement is sold or otherwise conveyed, the new owner automatically owns the easement. A commercial easement in gross may be transferred—for instance, easements to construct pipelines, telegraph and telephone lines, and railroad rights of way. However, most noncommercial easements in gross are not transferable, being deemed personal to the original owner of the easement. Rochelle sells her friend Mrs. Nanette—who does not own land adjacent to Rochelle—an easement across her country farm to operate skimobiles during the winter. The easement is personal to Mrs. Nanette; she could not sell the easement to anyone else.

Creation

Easements may be created by express agreement, either in deeds or in wills. The owner of the dominant tenement may buy the easement from the owner of the servient tenement or may reserve the easement for himself when selling part of his

land. But courts will sometimes allow implied easements under certain circumstances. For instance, if the deed refers to an easement that bounds the premises—without describing it in any detail—a court could conclude that an easement was intended to pass with the sale of the property.

An easement can also be implied from prior use. Suppose a seller of land has two lots, with a driveway connecting both lots to the street. The only way to gain access to the street from the back lot is to use the driveway, and the seller has always done so. If the seller now sells the back lot, the buyer can establish an easement in the driveway through the front lot if the prior use was (1) apparent at the time of sale, (2) continuous, and (3) reasonably necessary for the enjoyment of the back lot. The rule of implied easements through prior use operates only when the ownership of the dominant and servient tenements was originally in the same person.

Use of the Easement

The servient owner may use the easement—remember, it is on or under or above his land—as long as his use does not interfere with the rights of the easement owner. Suppose you have an easement to walk along a path in the woods owned by your neighbor and to swim in a private lake that adjoins the woods. At the time you purchased the easement, your neighbor did not use the lake. Now he proposes to swim in it himself, and you protest. You would not have a sound case, because his swimming in the lake would not interfere with your right to do so. But if he proposed to clear the woods and build a mill on it, obliterating the path you took to the lake and polluting the lake with chemical discharges, then you could obtain an injunction to bar him from interfering with your easement.

The owner of the dominant tenement is not restricted to using his land as he was at the time he became the owner of the easement. The courts will permit him to develop the land in some “normal” manner. For example, an easement on a private roadway for the benefit of a large estate up in the hills would not be lost if the large estate were ultimately subdivided and many new owners wished to use the roadway; the easement applies to the entire portion of the original dominant tenement, not merely to the part that abuts the easement itself. However, the owner of an easement appurtenant to one tract of land cannot use the easement on another tract of land, even if the two tracts are adjacent.

KEY TAKEAWAY

An easement appurtenant runs with the land and benefits the dominant tenement, burdening the servient tenement. An easement, generally, has a specific location or description within or over the servient tenement. Easements can be created by deed, by will, or by implication.

EXERCISE

1. Beth Delaney owns property next to Kerry Plemmons. The deed to Delaney's property notes that she has access to a well on the Plemmons property "to obtain water for household use." The well has been dry for many generations and has not been used by anyone on the Plemmons property or the Delaney property for as many generations. The well predated Plemmons's ownership of the property; as the servient tenement, the Plemmons property was burdened by this easement dating back to 1898. Plemmons hires a company to dig a very deep well near one of his outbuildings to provide water for his horses. The location is one hundred yards from the old well. Does the Delaney property have any easement to use water from the new well?

33.4 Regulation of Land Use

LEARNING OBJECTIVES

1. Compare the various ways in which law limits or restricts the right to use your land in any way that you decide is best for you.
2. Distinguish between regulation by common law and regulation by public acts such as zoning or eminent domain.
3. Understand that property owners may restrict the uses of land by voluntary agreement, subject to important public policy considerations.

Land use regulation falls into three broad categories: (1) restriction on the use of land through tort law, (2) private regulation by agreement, and (3) public ownership or regulation through the powers of eminent domain and zoning.

Regulation of Land Use by Tort Law

Tort law is used to regulate land use in two ways: (1) The owner may become liable for certain activities carried out on the real estate that affect others beyond the real estate. (2) The owner may be liable to persons who, upon entering the real estate, are injured.

Landowner's Activities

The two most common torts in this area are nuisance and trespass. A common-law **nuisance**¹⁶ is an interference with the use and enjoyment of one's land. Examples of nuisances are excessive noise (especially late at night), polluting activities, and emissions of noxious odors. But the activity must produce substantial harm, not fleeting, minor injury, and it must produce those effects on the reasonable person, not on someone who is peculiarly allergic to the complained-of activity. A person who suffered migraine headaches at the sight of croquet being played on a neighbor's lawn would not likely win a nuisance lawsuit. While the meaning of nuisance is difficult to define with any precision, this common-law cause of action is a primary means for landowners to obtain damages for invasive environmental harms.

A **trespass**¹⁷ is the wrongful physical invasion of or entry upon land possessed by another. Loud noise blaring out of speakers in the house next door might be a nuisance but could not be a trespass, because noise is not a physical invasion. But

16. A common-law nuisance is an interference with the use and enjoyment of one's land.

17. The wrongful physical invasion of or entry upon land possessed by another.

spraying pesticides on your gladiolas could constitute a trespass on your neighbor's property if the pesticide drifts across the boundary.

Nuisance and trespass are complex theories, a full explanation of which would consume far more space than we have. What is important to remember is that these torts are two-edged swords. In some situations, the landowner himself will want to use these theories to sue trespassers or persons creating a nuisance, but in other situations, the landowner will be liable under these theories for his own activities.

Injury to Persons Entering the Real Estate

Traditionally, liability for injury has depended on the status of the person who enters the real estate.

Trespassers

If the person is an intruder without permission—a trespasser—the landowner owes him no duty of care unless he knows of the intruder's presence, in which case the owner must exercise reasonable care in his activities and warn of hidden dangers on his land of which he is aware. A known trespasser is someone whom the landowner actually sees on the property or whom he knows frequently intrudes on the property, as in the case of someone who habitually walks across the land. If a landowner knows that people frequently walk across his property and one day he puts a poisonous chemical on the ground to eliminate certain insects, he is obligated to warn those who continue to walk on the grounds. Intentional injury to known trespassers is not allowed, even if the trespasser is a criminal intent on robbery, for the law values human life above property rights.

Children

If the trespasser is a child, a different rule applies in most states. This is the doctrine of **attractive nuisance**¹⁸. Originally this rule was enunciated to deal with cases in which something on the land attracted the child to it, like a swimming pool. In recent years, most courts have dropped the requirement that the child must have been attracted to the danger. Instead, the following elements of proof are necessary to make out a case of attractive nuisance (Restatement of Torts, Section 339):

18. A thing or condition on land that is attractive to small children and represents a distinct hazard to their health or well-being.

1. The child must have been injured by a structure or other artificial condition.
2. The possessor of the land (not necessarily the owner) must have known or should have known that young children would be likely to trespass.

3. The possessor must have known or should have known that the artificial condition exists and that it posed an unreasonable risk of serious injury.
4. The child must have been too young to appreciate the danger that the artificial condition posed.
5. The risk to the child must have far outweighed the utility of the artificial condition to the possessor.
6. The possessor did not exercise reasonable care in protecting the child or eliminating the danger.

Old refrigerators, open gravel pits, or mechanisms that a curious child would find inviting are all examples of attractive nuisance. Suppose Farmer Brown keeps an old buggy on his front lawn, accessible from the street. A five-year-old boy clambers up the buggy one day, falls through a rotted floorboard, and breaks his leg. Is Farmer Brown liable? Probably so. The child was too young to appreciate the danger posed by the buggy, a structure. The farmer should have appreciated that young children would be likely to come onto the land when they saw the buggy and that they would be likely to climb up onto the buggy. Moreover, he should have known, if he did not know in fact, that the buggy, left outside for years without being tended, would pose an unreasonable risk. The buggy's utility as a decoration was far overbalanced by the risk that it posed to children, and the farmer failed to exercise reasonable care.

Licenseses

A nontrespasser who comes onto the land without being invited, or if invited, comes for purposes unconnected with any business conducted on the premises, is known as a **licensee**¹⁹. This class of visitors to the land consists of (1) social guests (people you invite to your home for a party); (2) a salesman, not invited by the owner, who wishes to sell something to the owner or occupier of the property; and (3) persons visiting a building for a purpose not connected with the business on the land (e.g., students who visit a factory to see how it works). The landowner owes the same duty of care to licenseees that he owes to known trespassers. That is, he must warn them against hidden dangers of which he is aware, and he must exercise reasonable care in his activities to ensure that they are not injured.

Invitees

A final category of persons entering land is that of **invitee**²⁰. This is one who has been invited onto the land, usually, though not necessarily, for a business purpose of potential economic benefit to the owner or occupier of the premises. This category is confusing because it sounds as though it should include social guests

19. A noninvitee to the land, such as a social guest, a salesman not invited by the owner to the property, or someone else not on the property for an invited business purpose.

20. A person who has been invited onto real property for purpose of potential economic benefit to the owner or occupier of the land.

(who clearly are invited onto the premises), but traditionally social guests are said to be licensees.

Invitees include customers of stores, users of athletic and other clubs, customers of repair shops, strollers through public parks, restaurant and theater patrons, hotel guests, and the like. From the owner's perspective, the major difference between licensees and invitees is that he is liable for injuries resulting to the latter from hidden dangers that he should have been aware of, even if he is not actually aware of the dangers. How hidden the dangers are and how broad the owner's liability is depends on the circumstances, but liability sometimes can be quite broad. Difficult questions arise in lawsuits brought by invitees (or business invitees, as they are sometimes called) when the actions of persons other than the landowner contribute to the injury.

The foregoing rules dealing with liability for persons entering the land are the traditional rules at common law. In recent years, some courts have moved away from the rigidities and sometimes perplexing differences between trespassers, licensees, and invitees. By court decision, several states have now abolished such distinctions and hold the proprietor, owner, or occupier liable for failing to maintain the premises in a reasonably safe condition. According to the California Supreme Court,

A man's life or limb does not become less worthy of protection by the law nor a loss less worthy of compensation under the law because he has come upon the land of another without permission or with permission but without a business purpose. Reasonable people do not ordinarily vary their conduct depending upon such matters, and to focus upon the status of the injured party as a trespasser, licensee, or invitee in order to determine the question whether the landowner has a duty of care, is contrary to our modern social mores and humanitarian values. Where the occupier of land is aware of a concealed condition involving in the absence of precautions an unreasonable risk of harm to those coming in contact with it and is aware that a person on the premises is about to come in contact with it, the trier of fact can reasonably conclude that a failure to warn or to repair the condition constitutes negligence. Whether or not a guest has a right to expect that his host will remedy dangerous conditions on his account, he should reasonably be entitled to rely upon a warning of the dangerous condition so that he, like the host, will be in a position to take special precautions when he comes in contact with it. *Rowland v. Christian*, 443 P.2d 561 (Cal. 1968).

Private Regulation of Land Use by Agreement

A restrictive covenant is an agreement regarding the use of land that “runs with the land.” In effect, it is a contractual promise that becomes part of the property and that binds future owners. Violations of covenants can be redressed in court in suits for damages or injunctions but will not result in reversion of the land to the seller.

Usually, courts construe restrictive covenants narrowly—that is, in a manner most conducive to free use of the land by the ultimate owner (the person against whom enforcement of the covenant is being sought). Sometimes, even when the meaning of the covenant is clear, the courts will not enforce it. For example, when the character of a neighborhood changes, the courts may declare the covenant a nullity. Thus a restriction on a one-acre parcel to residential purposes was voided when in the intervening thirty years a host of businesses grew up around it, including a bowling alley, restaurant, poolroom, and sewage disposal plant. *Norris v. Williams*, 54 A.2d 331 (Md. 1947).

An important nullification of restrictive covenants came in 1947 when the US Supreme Court struck down as unconstitutional racially restrictive covenants, which barred blacks and other minorities from living on land so burdened. The Supreme Court reasoned that when a court enforces such a covenant, it acts in a discriminatory manner (barring blacks but not whites from living in a home burdened with the covenant) and thus violates the Fourteenth Amendment’s guarantee of equal protection of the laws. *Shelley v. Kraemer*, 334 U.S. 1 (1947).

Public Control of Land Use through Eminent Domain

The government may take private property for public purposes. Its power to do so is known as eminent domain. The power of eminent domain is subject to constitutional limitations. Under the Fifth Amendment, the property must be put to public use, and the owner is entitled to “just compensation” for his loss. These requirements are sometimes difficult to apply.

Public Use

The requirement of public use normally means that the property will be useful to the public once the state has taken possession—for example, private property might be condemned to construct a highway. Although not allowed in most circumstances, the government could even condemn someone’s property in order to turn around and sell it to another individual, if a legitimate public purpose could be shown. For example, a state survey in the mid-1960s showed that the government owned 49 percent of Hawaii’s land. Another 47 percent was controlled

by seventy-two private landowners. Because this concentration of land ownership (which dated back to feudal times) resulted in a critical shortage of residential land, the Hawaiian legislature enacted a law allowing the government to take land from large private estates and resell it in smaller parcels to homeowners. In 1984, the US Supreme Court upheld the law, deciding that the land was being taken for a public use because the purpose was “to attack certain perceived evils of concentrated property ownership.” *Hawaii Housing Authority v. Midkiff*, 467 U.S. 229 (1984). Although the use must be public, the courts will not inquire into the necessity of the use or whether other property might have been better suited. It is up to government authorities to determine whether and where to build a road, not the courts.

The limits of public use were amply illustrated in the Supreme Court’s 2002 decision of *Kelo v. New London*, *Kelo v. New London*, 545 U.S. 469 (2005). In which Mrs. Kelo’s house was condemned so that the city of New London, in Connecticut, could create a marina and industrial park to lease to Pfizer Corporation. The city’s motives were to create a higher tax base for property taxes. The Court, following precedent in *Midkiff* and other cases, refused to invalidate the city’s taking on constitutional grounds. Reaction from states was swift; many states passed new laws restricting the bases for state and municipal governments to use powers of eminent domain, and many of these laws also provided additional compensation to property owners whose land was taken.

Just Compensation

The owner is ordinarily entitled to the fair market value of land condemned under eminent domain. This value is determined by calculating the most profitable use of the land at the time of the taking, even though it was being put to a different use. The owner will have a difficult time collecting lost profits; for instance, a grocery store will not usually be entitled to collect for the profits it might have made during the next several years, in part because it can presumably move elsewhere and continue to make profits and in part because calculating future profits is inherently speculative.

Taking

The most difficult question in most modern cases is whether the government has in fact “taken” the property. This is easy to answer when the government acquires title to the property through condemnation proceedings. But more often, a government action is challenged when a law or regulation inhibits the use of private land. Suppose a town promulgates a setback ordinance, requiring owners along city sidewalks to build no closer to the sidewalk than twenty feet. If the owner of a small store had only twenty-five feet of land from the sidewalk line, the

ordinance would effectively prevent him from housing his enterprise, and the ordinance would be a taking. Challenging such ordinances can sometimes be difficult under traditional tort theories because the government is immune from suit in some of these cases. Instead, a theory of inverse condemnation has developed, in which the plaintiff private property owner asserts that the government has condemned the property, though not through the traditional mechanism of a condemnation proceeding.

Public Control of Land Use through Zoning

Zoning²¹ is a technique by which a city or other municipality regulates the type of activity to be permitted in geographical areas within its boundaries. Though originally limited to residential, commercial, and industrial uses, today's zoning ordinances are complex sets of regulations. A typical municipality might have the following zones: residential with a host of subcategories (such as for single-family and multiple-family dwellings), office, commercial, industrial, agricultural, and public lands. Zones may be exclusive, in which case office buildings would not be permitted in commercial zones, or they may be cumulative, so that a more restricted use would be allowed in a less restrictive zone. Zoning regulations do more than specify the type of use: they often also dictate minimum requirements for parking, open usable space, setbacks, lot sizes, and the like, and maximum requirements for height, length of side lots, and so on.

Nonconforming Uses

When a zoning ordinance is enacted, it will almost always affect existing property owners, many of whom will be using their land in ways no longer permitted under the ordinance. To avoid the charge that they have thereby “taken” the property, most ordinances permit previous nonconforming uses to continue, though some ordinances limit the nonconforming uses to a specified time after becoming effective. But this permission to continue a nonconforming use is narrow; it extends only to the specific use to which the property was put before the ordinance was enacted. A manufacturer of dresses that suddenly finds itself in an area zoned residential may continue to use its sewing machines, but it could not develop a sideline in woodworking.

Variations

Sometimes an owner may desire to use his property in ways not permitted under an existing zoning scheme and will ask the zoning board for a **variance**²²—authority to carry on a nonconforming use. The board is not free to grant a variance at its whim. The courts apply three general tests to determine the validity of a variance: (1) The land must be unable to yield a reasonable return on the uses allowed by the zoning

21. A process by which a city or other municipality regulates the type of activity to be permitted.

22. Permission by zoning authorities to carry on a nonconforming use.

regulation. (2) The hardship must be unique to the property, not to property generally in the area. (3) If granted, the variance must not change the essential character of the neighborhood.

KEY TAKEAWAY

Land use regulation can mean (1) restrictions on the use of land through tort law, (2) private regulation—by agreement, or (3) regulation through powers of eminent domain or zoning.

EXERCISES

1. Give one example of the exercise of eminent domain. In order to exercise its power under eminent domain, must the government actually take eventual ownership of the property that is “taken”?
2. Felix Unger is an adult, trespassing for the first time on Alan Spillborghs’s property. Alan has been digging a deep grave in his backyard for his beloved Saint Bernard, Maximilian, who has just died. Alan stops working on the grave when it gets dark, intending to return to the task in the morning. He seldom sees trespassers cutting through his backyard. Felix, in the dark, after visiting the local pub, decides to take a shortcut through Alan’s yard and falls into the grave. He breaks his leg. What is the standard of care for Alan toward Felix or other infrequent trespassers? If Alan has no insurance for this accident, would the law make Alan responsible?
3. Atlantic Cement owns and operates a cement plant in New York State. Nearby residents are exposed to noise, soot, and dust and have experienced lowered property values as a result of Atlantic Cement’s operations. Is there a common-law remedy for nearby property owners for losses occasioned by Atlantic’s operations? If so, what is it called?

33.5 Environmental Law

LEARNING OBJECTIVES

1. Describe the major federal laws that govern business activities that may adversely affect air quality and water quality.
2. Describe the major federal laws that govern waste disposal and chemical hazards including pesticides.

In one sense, environmental law is very old. Medieval England had smoke control laws that established the seasons when soft coal could be burned. Nuisance laws give private individuals a limited control over polluting activities of adjacent landowners. But a comprehensive set of US laws directed toward general protection of the environment is largely a product of the past quarter-century, with most of the legislative activity stemming from the late 1960s and later, when people began to perceive that the environment was systematically deteriorating from assaults by rapid population growth and greatly increased automobile driving, vast proliferation of factories that generate waste products, and a sharp rise in the production of toxic materials. Two of the most significant developments in environmental law came in 1970, when the National Environmental Policy Act took effect and the Environmental Protection Agency became the first of a number of new federal administrative agencies to be established during the decade.

National Environmental Policy Act

Signed into law by President Nixon on January 1, 1970, the National Environmental Policy Act (NEPA) declared that it shall be the policy of the federal government, in cooperation with state and local governments, “to create and maintain conditions under which man and nature can exist in productive harmony, and fulfill the social, economic, and other requirements of present and future generations of Americans....The Congress recognizes that each person should enjoy a healthful environment and that each person has a responsibility to contribute to the preservation and enhancement of the environment.”⁴² United States Code, Section 4321 et seq.

23. A statement mandated by the National Environmental Policy Act that is required of most federal agencies and includes an assessment of whether the agency’s actions will significantly affect environmental quality.

The most significant aspect of NEPA is its requirement that federal agencies prepare an **environmental impact statement**²³ in every recommendation or report on proposals for legislation and whenever undertaking a major federal action that significantly affects environmental quality. The statement must (1) detail the

environmental impact of the proposed action, (2) list any unavoidable adverse impacts should the action be taken, (3) consider alternatives to the proposed action, (4) compare short-term and long-term consequences, and (5) describe irreversible commitments of resources. Unless the impact statement is prepared, the project can be enjoined from proceeding. Note that NEPA does not apply to purely private activities but only to those proposed to be carried out in some manner by federal agencies.

Environmental Protection Agency

The Environmental Protection Agency (EPA) has been in the forefront of the news since its creation in 1970. Charged with monitoring environmental practices of industry, assisting the government and private business to halt environmental deterioration, promulgating regulations consistent with federal environmental policy, and policing industry for violations of the various federal environmental statutes and regulations, the EPA has had a pervasive influence on American business. *Business Week* noted the following in 1977: “Cars rolling off Detroit’s assembly line now have antipollution devices as standard equipment. The dense black smokestack emissions that used to symbolize industrial prosperity are rare, and illegal, sights. Plants that once blithely ran discharge water out of a pipe and into a river must apply for permits that are almost impossible to get unless the plants install expensive water treatment equipment. All told, the EPA has made a sizable dent in man-made environmental filth.” “The Tricks of the Trade-off,” *Business Week*, April 4, 1977, 72.

The EPA is especially active in regulating water and air pollution and in overseeing the disposition of toxic wastes and chemicals. To these problems we now turn.

Water Pollution Clean Water Act

Legislation governing the nation’s waterways goes back a long time. The first federal water pollution statute was the Rivers and Harbors Act of 1899. Congress enacted new laws in 1948, 1956, 1965, 1966, and 1970. But the centerpiece of water pollution enforcement is the Clean Water Act of 1972 (technically, the Federal Water Pollution Control Act Amendments of 1972), as amended in 1977 and by the Water Quality Act of 1987. The Clean Water Act is designed to restore and maintain the “chemical, physical, and biological integrity of the Nation’s waters.”³³ United States Code, Section 1251. It operates on the states, requiring them to designate the uses of every significant body of water within their borders (e.g., for drinking water, recreation, commercial fishing) and to set water quality standards to reduce pollution to levels appropriate for each use.

Congress only has power to regulate interstate commerce, and so the Clean Water Act is applicable only to “navigable waters” of the United States. This has led to disputes over whether the act can apply, say, to an abandoned gravel pit that has no visible connection to navigable waterways, even if the gravel pit provides habitat for migratory birds. In *Solid Waste Agency of Northern Cook County v. Army Corps of Engineers*, the US Supreme Court said no. *Solid Waste Agency of Northern Cook County v. Army Corps of Engineers*, 531 U.S. 159 (2001).

Private Industry

The Clean Water Act also governs private industry and imposes stringent standards on the discharge of pollutants into waterways and publicly owned sewage systems. The act created an effluent permit system known as the National Pollutant Discharge Elimination System. To discharge any pollutants into navigable waters from a “point source” like a pipe, ditch, ship, or container, a company must obtain a certification that it meets specified standards, which are continually being tightened. For example, until 1983, industry had to use the “best practicable technology” currently available, but after July 1, 1984, it had to use the “best available technology” economically achievable. Companies must limit certain kinds of “conventional pollutants” (such as suspended solids and acidity) by “best conventional control technology.”

Other EPA Water Activities

Federal law governs, and the EPA regulates, a number of other water control measures. Ocean dumping, for example, is the subject of the Marine Protection, Research, and Sanctuaries Act of 1972, which gives the EPA jurisdiction over wastes discharged into the oceans. The Clean Water Act gives the EPA and the US Army Corps of Engineers authority to protect waters, marshlands, and other wetlands against degradation caused by dredging and fills. The EPA also oversees state and local plans for restoring general water quality to acceptable levels in the face of a host of non-point-source pollution. The Clean Water Act controls municipal sewage systems, which must ensure that wastewater is chemically treated before being discharged from the sewage system.

Obviously, of critical importance to the nation’s health is the supply of drinking water. To ensure its continuing purity, Congress enacted the Safe Drinking Water Act of 1974, with amendments passed in 1986 and 1996. This act aims to protect water at its sources: rivers, lakes, reservoirs, springs, and groundwater wells. (The act does not regulate private wells that serve fewer than twenty-five individuals.) This law has two strategies for combating pollution of drinking water. It establishes national standards for drinking water derived from both surface reservoirs and underground aquifers. It also authorizes the EPA to regulate the injection of solid

wastes into deep wells (as happens, for instance, by leakage from underground storage tanks).

Air Pollution

The centerpiece of the legislative effort to clean the atmosphere is the Clean Air Act of 1970 (amended in 1975, 1977, and 1990). Under this act, the EPA has set two levels of National Ambient Air Quality Standards (NAAQS). The primary standards limit the ambient (i.e., circulating) pollution that affects human health; secondary standards limit pollution that affects animals, plants, and property. The heart of the Clean Air Act is the requirement that subject to EPA approval, the states implement the standards that the EPA establishes. The setting of these pollutant standards was coupled with directing the states to develop state implementation plans (SIPs), applicable to appropriate industrial sources in the state, in order to achieve these standards. The act was amended in 1977 and 1990 primarily to set new goals (dates) for achieving attainment of NAAQS since many areas of the country had failed to meet the deadlines.

Beyond the NAAQS, the EPA has established several specific standards to control different types of air pollution. One major type is pollution that mobile sources, mainly automobiles, emit. The EPA requires new cars to be equipped with catalytic converters and to use unleaded gasoline to eliminate the most noxious fumes and to keep them from escaping into the atmosphere. To minimize pollution from stationary sources, the EPA also imposes uniform standards on new industrial plants and those that have been substantially modernized. And to safeguard against emissions from older plants, states must promulgate and enforce SIPs.

The Clean Air Act is even more solicitous of air quality in certain parts of the nation, such as designated wilderness areas and national parks. For these areas, the EPA has set standards to prevent significant deterioration in order to keep the air as pristine and clear as it was centuries ago.

The EPA also worries about chemicals so toxic that the tiniest quantities could prove fatal or extremely hazardous to health. To control emission of substances like asbestos, beryllium, mercury, vinyl chloride, benzene, and arsenic, the EPA has established or proposed various National Emissions Standards for Hazardous Air Pollutants.

Concern over acid rain and other types of air pollution prompted Congress to add almost eight hundred pages of amendments to the Clean Air Act in 1990. (The original act was fifty pages long.) As a result of these amendments, the act was modernized in a manner that parallels other environmental laws. For instance, the

amendments established a permit system that is modeled after the Clean Water Act. And the amendments provide for felony convictions for willful violations, similar to penalties incorporated into other statutes.

The amendments include certain defenses for industry. Most important, companies are protected from allegations that they are violating the law by showing that they were acting in accordance with a permit. In addition to this “permit shield,” the law also contains protection for workers who unintentionally violate the law while following their employers’ instructions.

Waste Disposal

Though pollution of the air by highly toxic substances like benzene or vinyl chloride may seem a problem removed from that of the ordinary person, we are all in fact polluters. Every year, the United States generates approximately 230 million tons of “trash”—about 4.6 pounds per person per day. Less than one-quarter of it is recycled; the rest is incinerated or buried in landfills. But many of the country’s landfills have been closed, either because they were full or because they were contaminating groundwater. Once groundwater is contaminated, it is extremely expensive and difficult to clean it up. In the 1965 Solid Waste Disposal Act and the 1970 Resource Recovery Act, Congress sought to regulate the discharge of garbage by encouraging waste management and recycling. Federal grants were available for research and training, but the major regulatory effort was expected to come from the states and municipalities.

But shocking news prompted Congress to get tough in 1976. The plight of homeowners near Love Canal in upstate New York became a major national story as the discovery of massive underground leaks of toxic chemicals buried during the previous quarter century led to evacuation of hundreds of homes. Next came the revelation that Kepone, an exceedingly toxic pesticide, had been dumped into the James River in Virginia, causing a major human health hazard and severe damage to fisheries in the James and downstream in the Chesapeake Bay. The rarely discussed industrial dumping of hazardous wastes now became an open controversy, and Congress responded in 1976 with the Resource Conservation and Recovery Act (RCRA) and the Toxic Substances Control Act (TSCA) and in 1980 with the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA).

Resource Conservation and Recovery Act

The RCRA expresses a “cradle-to-grave” philosophy: hazardous wastes must be regulated at every stage. The act gives the EPA power to govern their creation,

storage, transport, treatment, and disposal. Any person or company that generates hazardous waste must obtain a permit (known as a “manifest”) either to store it on its own site or ship it to an EPA-approved treatment, storage, or disposal facility. No longer can hazardous substances simply be dumped at a convenient landfill. Owners and operators of such sites must show that they can pay for damage growing out of their operations, and even after the sites are closed to further dumping, they must set aside funds to monitor and maintain the sites safely.

This philosophy can be severe. In 1986, the Supreme Court ruled that bankruptcy is not a sufficient reason for a company to abandon toxic waste dumps if state regulations reasonably require protection in the interest of public health or safety. The practical effect of the ruling is that trustees of the bankrupt company must first devote assets to cleaning up a dump site, and only from remaining assets may they satisfy creditors. *Midlantic National Bank v. New Jersey*, 474 U.S. 494 (1986). Another severity is RCRA’s imposition of criminal liability, including fines of up to \$25,000 a day and one-year prison sentences, which can be extended beyond owners to individual employees, as discussed in *U.S. v. Johnson & Towers, Inc., et al.*, (see [Section 33.6.2 "Criminal Liability of Employees under RCRA"](#)).

Comprehensive Environmental Response, Compensation, and Liability Act

The CERCLA, also known as the Superfund, gives the EPA emergency powers to respond to public health or environmental dangers from faulty hazardous waste disposal, currently estimated to occur at more than seventeen thousand sites around the country. The EPA can direct immediate removal of wastes presenting imminent danger (e.g., from train wrecks, oil spills, leaking barrels, and fires). Injuries can be sudden and devastating; in 1979, for example, when a freight train derailed in Florida, ninety thousand pounds of chlorine gas escaped from a punctured tank car, leaving 8 motorists dead and 183 others injured and forcing 3,500 residents within a 7-mile radius to be evacuated. The EPA may also carry out “planned removals” when the danger is substantial, even if immediate removal is not necessary.

The EPA prods owners who can be located to voluntarily clean up sites they have abandoned. But if the owners refuse, the EPA and the states will undertake the task, drawing on a federal trust fund financed mainly by taxes on the manufacture or import of certain chemicals and petroleum (the balance of the fund comes from general revenues). States must finance 10 percent of the cost of cleaning up private sites and 50 percent of the cost of cleaning up public facilities. The EPA and the states can then assess unwilling owners’ punitive damages up to triple the cleanup costs.

Cleanup requirements are especially controversial when applied to landowners who innocently purchased contaminated property. To deal with this problem, Congress enacted the Superfund Amendment and Reauthorization Act in 1986, which protects innocent landowners who—at the time of purchase—made an “appropriate inquiry” into the prior uses of the property. The act also requires companies to publicly disclose information about hazardous chemicals they use. We now turn to other laws regulating chemical hazards.

Chemical Hazards

Toxic Substances Control Act

Chemical substances that decades ago promised to improve the quality of life have lately shown their negative side—they have serious adverse side effects. For example, asbestos, in use for half a century, causes cancer and asbestosis, a debilitating lung disease, in workers who breathed in fibers decades ago. The result has been crippling disease and death and more than thirty thousand asbestos-related lawsuits filed nationwide. Other substances, such as polychlorinated biphenyls (PCBs) and dioxin, have caused similar tragedy. Together, the devastating effects of chemicals led to enactment of the TSCA, designed to control the manufacture, processing, commercial distribution, use, and disposal of chemicals that pose unreasonable health or environmental risks. (The TSCA does not apply to pesticides, tobacco, nuclear materials, firearms and ammunition, food, food additives, drugs, and cosmetics—all are regulated by other federal laws.)

The TSCA gives the EPA authority to screen for health and environmental risks by requiring companies to notify the EPA ninety days before manufacturing or importing new chemicals. The EPA may demand that the companies test the substances before marketing them and may regulate them in a number of ways, such as requiring the manufacturer to label its products, to keep records on its manufacturing and disposal processes, and to document all significant adverse reactions in people exposed to the chemicals. The EPA also has authority to ban certain especially hazardous substances, and it has banned the further production of PCBs and many uses of asbestos.

Both industry groups and consumer groups have attacked the TSCA. Industry groups criticize the act because the enforcement mechanism requires mountainous paperwork and leads to widespread delay. Consumer groups complain because the EPA has been slow to act against numerous chemical substances. The debate continues.

Pesticide Regulation

The United States is a major user of pesticides, substances that eliminate troublesome insects, rodents, fungi, and bacteria, consuming more than a billion pounds a year in the form of thirty-five thousand separate chemicals. As useful as they can be, like many chemical substances, pesticides can have serious side effects on humans and plant and animal life. Beginning in the early 1970s, Congress enacted major amendments to the Federal Insecticide, Fungicide, and Rodenticide Act of 1947 and the Federal Food, Drug, and Cosmetic Act (FFDCA) of 1906.

These laws direct the EPA to determine whether pesticides properly balance effectiveness against safety. If the pesticide can carry out its intended function without causing unreasonable adverse effects on human health or the environment, it may remain on the market. Otherwise, the EPA has authority to regulate or even ban its distribution and use. To enable the EPA to carry out its functions, the laws require manufacturers to provide a wealth of data about the way individual pesticides work and their side effects. The EPA is required to inspect pesticides to ensure that they conform to their labeled purposes, content, and safety, and the agency is empowered to certify pesticides for either general or restricted use. If a pesticide is restricted, only those persons certified in approved training programs may use it. Likewise, under the Pesticide Amendment to the FFDCA, the EPA must establish specific tolerances for the residue of pesticides on feed crops and both raw and processed foods. The Food and Drug Administration (for agricultural commodities) and the US Department of Agriculture (for meat, poultry, and fish products) enforce these provisions.

Other Types of Environmental Controls

Noise Regulation

Under the Noise Regulation Act of 1972, Congress has attempted to combat a growing menace to US workers, residents, and consumers. People who live close to airports and major highways, workers who use certain kinds of machinery (e.g., air compressors, rock drills, bulldozers), and consumers who use certain products, such as power mowers and air conditioners, often suffer from a variety of ailments. The Noise Regulation Act delegates to the EPA power to limit “noise emissions” from these major sources of noise. Under the act, manufacturers may not sell new products that fail to conform to the noise standards the EPA sets, and users are forbidden from dismantling noise control devices installed on these products. Moreover, manufacturers must label noisy products properly. Private suits may be filed against violators, and the act also permits fines of up to \$25,000 per day and a year in jail for those who seek to avoid its terms.

Radiation Controls

The terrifying effects of a nuclear disaster became frighteningly clear when the Soviet Union's nuclear power plant at Chernobyl exploded in early 1986, discharging vast quantities of radiation into the world's airstream and affecting people thousands of miles away. In the United States, the most notorious nuclear accident occurred at the Three Mile Island nuclear utility in Pennsylvania in 1979, crippling the facility for years because of the extreme danger and long life of the radiation. Primary responsibility for overseeing nuclear safety rests with the Nuclear Regulatory Commission, but many other agencies and several federal laws (including the Clean Air Act; the Federal Water Pollution Control Act; the Safe Drinking Water Act; the Uranium Mill Tailings Radiation Control Act; the Marine Protection, Research, and Sanctuaries Act; the Nuclear Waste Policy Act of 1982; the CERCLA; and the Ocean Dumping Act) govern the use of nuclear materials and the storage of radioactive wastes (some of which will remain severely dangerous for thousands of years). Through many of these laws, the EPA has been assigned the responsibility of setting radiation guidelines, assessing new technology, monitoring radiation in the environment, setting limits on release of radiation from nuclear utilities, developing guidance for use of X-rays in medicine, and helping to plan for radiation emergencies.

KEY TAKEAWAY

Laws limiting the use of one's property have been around for many years; common-law restraints (e.g., the law of nuisance) exist as causes of action against those who would use their property to adversely affect the life or health of others or the value of their neighbors' property. Since the 1960s, extensive federal laws governing the environment have been enacted. These include laws governing air, water, chemicals, pesticides, solid waste, and nuclear activities. Some laws include criminal penalties for noncompliance.

EXERCISES

1. Who is responsible for funding CERCLA? That is, what is the source of funds for cleanups of hazardous waste?
2. Why is it necessary to have criminal penalties for noncompliance with environmental laws?
3. What is the role of states in setting standards for clean air and clean water?
4. Which federal act sets up a “cradle-to-grave” system for handling waste?
5. Why are federal environmental laws necessary? Why not let the states exclusively govern in the area of environmental protection?

33.6 Cases

Reasonable Use Doctrine

Hoover v. Crane

362 Mich. 36, 106 N.W.2d 563 (1960)

EDWARDS, JUSTICE

This appeal represents a controversy between plaintiff cottage and resort owners on an inland Michigan lake and defendant, a farmer with a fruit orchard, who was using the lake water for irrigation. The chancellor who heard the matter ruled that defendant had a right to reasonable use of lake water. The decree defined such reasonable use in terms which were unsatisfactory to plaintiffs who have appealed.

The testimony taken before the chancellor pertained to the situation at Hutchins Lake, in Allegan county, during the summer of 1958. Defendant is a fruit farmer who owns a 180-acre farm abutting on the lake. Hutchins Lake has an area of 350 acres in a normal season. Seventy-five cottages and several farms, including defendant's, abut on it. Defendant's frontage is approximately 1/4 mile, or about 10% of the frontage of the lake.

Hutchins Lake is spring fed. It has no inlet but does have an outlet which drains south. Frequently in the summertime the water level falls so that the flow at the outlet ceases.

All witnesses agreed that the summer of 1958 was exceedingly dry and plaintiffs' witnesses testified that Hutchins Lake's level was the lowest it had ever been in their memory. Early in August, defendant began irrigation of his 50-acre pear orchard by pumping water out of Hutchins Lake. During that month the lake level fell 6 to 8 inches—the water line receded 50 to 60 feet and cottagers experienced severe difficulties with boating and swimming.

* * *

The tenor of plaintiffs' testimony was to attribute the 6- to 8-inch drop in the Hutchins Lake level in that summer to defendant's irrigation activities. Defendant

contended that the decrease was due to natural causes, that the irrigation was of great benefit to him and contributed only slightly to plaintiff's discomfiture. He suggests to us:

One could fairly say that because plaintiffs couldn't grapple with the unknown causes that admittedly occasioned a greater part of the injury complained of, they chose to grapple mightily with the defendant because he is known and visible.

The circuit judge found it impossible to determine a normal lake level from the testimony, except that the normal summer level of the lake is lower than the level at which the lake ceases to drain into the outlet. He apparently felt that plaintiffs' problems were due much more to the abnormal weather conditions of the summer of 1958 than to defendant's irrigation activities.

His opinion concluded:

Accepting the reasonable use theory advanced by plaintiffs it appears to the court that the most equitable disposition of this case would be to allow defendant to use water from the lake until such time when his use interferes with the normal use of his neighbors. One quarter inch of water from the lake ought not to interfere with the rights and uses of defendant's neighbors and this quantity of water ought to be sufficient in time of need to service 45 acres of pears. A meter at the pump, sealed if need be, ought to be a sufficient safeguard. Pumping should not be permitted between the hours of 11 p.m. and 7 a.m. Water need be metered only at such times as there is no drainage into the outlet.

The decree in this suit may provide that the case be kept open for the submission of future petitions and proofs as the conditions permit or require.

* * *

Michigan has adopted the reasonable-use rule in determining the conflicting rights of riparian owners to the use of lake water.

In 1874, Justice COOLEY said:

It is therefore not a diminution in the quantity of the water alone, or an alteration in its flow, or either or both of these circumstances combined with injury, that will give a right of action, if in view of all the circumstances, and having regard to equality of right in others, that which has been done and which causes the injury is

not unreasonable. In other words, the injury that is incidental to a reasonable enjoyment of the common right can demand no redress. *Dumont v. Kellogg*, 29 Mich 420, 425.

And in *People v. Hulbert*, the Court said:

No statement can be made as to what is such reasonable use which will, without variation or qualification, apply to the facts of every case. But in determining whether a use is reasonable we must consider what the use is for; its extent, duration, necessity, and its application; the nature and size of the stream, and the several uses to which it is put; the extent of the injury to the one proprietor and of the benefit to the other; and all other facts which may bear upon the reasonableness of the use. *Red River Roller Mills v. Wright*, 30 Minn 249, 15 NW 167, and cases cited.

The Michigan view is in general accord with 4 Restatement, Torts, §§ 851–853.

* * *

We interpret the circuit judge's decree as affording defendant the total metered equivalent in pumpage of 1/4 inch of the content of Hutchins Lake to be used in any dry period in between the cessation of flow from the outlet and the date when such flow recommences. Where the decree also provides for the case to be kept open for future petitions based on changed conditions, it would seem to afford as much protection for plaintiffs as to the future as this record warrants.

Both resort use and agricultural use of the lake are entirely legitimate purposes. Neither serves to remove water from the watershed. There is, however, no doubt that the irrigation use does occasion some water loss due to increased evaporation and absorption. Indeed, extensive irrigation might constitute a threat to the very existence of the lake in which all riparian owners have a stake; and at some point the use of the water which causes loss must yield to the common good.

The question on this appeal is, of course, whether the chancellor's determination of this point was unreasonable as to plaintiffs. On this record, we cannot overrule the circuit judge's view that most of plaintiffs' 1958 plight was due to natural causes. Nor can we say, if this be the only irrigation use intended and the only water diversion sought, that use of the amount provided in the decree during the dry season is unreasonable in respect to other riparian owners.

Affirmed.

CASE QUESTIONS

1. If the defendant has caused a diminution in water flow, an alteration of the water flow, and the plaintiff is adversely affected, why would the Supreme Court of Michigan not provide some remedy?
2. Is it possible to define an injury that is “not unreasonable”?
3. Would the case even have been brought if there had not been a drought?

Criminal Liability of Employees under RCRA

U.S. v. Johnson & Towers, Inc., Jack W. Hopkins, and Peter Angel

741 F.2d 662 (1984)

SLOVITER, Circuit Judge

Before us is the government’s appeal from the dismissal of three counts of an indictment charging unlawful disposal of hazardous wastes under the Resource Conservation and Recovery Act. In a question of first impression regarding the statutory definition of “person,” the district court concluded that the Act’s criminal penalty provision imposing fines and imprisonment could not apply to the individual defendants. We will reverse.

The criminal prosecution in this case arose from the disposal of chemicals at a plant owned by Johnson & Towers in Mount Laurel, New Jersey. In its operations the company, which repairs and overhauls large motor vehicles, uses degreasers and other industrial chemicals that contain chemicals such as methylene chloride and trichlorethylene, classified as “hazardous wastes” under the Resource Conservation and Recovery Act (RCRA), 42 U.S.C. §§ 6901–6987 (1982) and “pollutants” under the Clean Water Act, 33 U.S.C. §§ 1251–1376 (1982). During the period relevant here, the waste chemicals from cleaning operations were drained into a holding tank and, when the tank was full, pumped into a trench. The trench flowed from the plant property into Parker’s Creek, a tributary of the Delaware River. Under RCRA, generators of such wastes must obtain a permit for disposal from the Environmental Protection Agency (E.P.A.). The E.P.A. had neither issued nor received an application for a permit for Johnson & Towers’ operations.

The indictment named as defendants Johnson & Towers and two of its employees, Jack Hopkins, a foreman, and Peter Angel, the service manager in the trucking department. According to the indictment, over a three-day period federal agents saw workers pump waste from the tank into the trench, and on the third day observed toxic chemicals flowing into the creek.

Count 1 of the indictment charged all three defendants with conspiracy under 18 U.S.C. § 371 (1982). Counts 2, 3, and 4 alleged violations under the RCRA criminal provision, 42 U.S.C. § 6928(d) (1982). Count 5 alleged a violation of the criminal provision of the Clean Water Act, 33 U.S.C. § 1319(c) (1982). Each substantive count also charged the individual defendants as aiders and abettors under 18 U.S.C. § 2 (1982).

The counts under RCRA charged that the defendants “did knowingly treat, store, and dispose of, and did cause to be treated, stored and disposed of hazardous wastes without having obtained a permit...in that the defendants discharged, deposited, injected, dumped, spilled, leaked and placed degreasers...into the trench....” The indictment alleged that both Angel and Hopkins “managed, supervised and directed a substantial portion of Johnson & Towers’ operations...including those related to the treatment, storage and disposal of the hazardous wastes and pollutants” and that the chemicals were discharged by “the defendants and others at their direction.” The indictment did not otherwise detail Hopkins’ and Angel’s activities or responsibilities.

Johnson & Towers pled guilty to the RCRA counts. Hopkins and Angel pled not guilty, and then moved to dismiss counts 2, 3, and 4. The court concluded that the RCRA criminal provision applies only to “owners and operators,” i.e., those obligated under the statute to obtain a permit. Since neither Hopkins nor Angel was an “owner” or “operator,” the district court granted the motion as to the RCRA charges but held that the individuals could be liable on these three counts under 18 U.S.C. § 2 for aiding and abetting. The court denied the government’s motion for reconsideration, and the government appealed to this court under 18 U.S.C. § 3731 (1982).

* * *

The single issue in this appeal is whether the individual defendants are subject to prosecution under RCRA’s criminal provision, which applies to:

any person who—

....

(2) knowingly treats, stores, or disposes of any hazardous waste identified or listed under this subchapter either—

(A) without having obtained a permit under section 6925 of this title...or

(B) in knowing violation of any material condition or requirement of such permit.

42 U.S.C. § 6928(d) (emphasis added). The permit provision in section 6925, referred to in section 6928(d), requires “each person owning or operating a facility for the treatment, storage, or disposal of hazardous waste identified or listed under this subchapter to have a permit” from the E.P.A.

The parties offer contrary interpretations of section 6928(d)(2)(A). Defendants consider it an administrative enforcement mechanism, applying only to those who come within section 6925 and fail to comply; the government reads it as penalizing anyone who handles hazardous waste without a permit or in violation of a permit. Neither party has cited another case, nor have we found one, considering the application of this criminal provision to an individual other than an owner or operator.

As in any statutory analysis, we are obliged first to look to the language and then, if needed, attempt to divine Congress’ specific intent with respect to the issue.

First, “person” is defined in the statute as “an individual, trust, firm, joint stock company, corporation (including a government corporation), partnership, association, State, municipality, commission, political subdivision of a State, or any interstate body.” 42 U.S.C. § 6903(15) (1982). Had Congress meant in section 6928(d)(2)(A) to take aim more narrowly, it could have used more narrow language. Since it did not, we attribute to “any person” the definition given the term in section 6903(15).

Second, under the plain language of the statute the only explicit basis for exoneration is the existence of a permit covering the action. Nothing in the language of the statute suggests that we should infer another provision exonerating persons who knowingly treat, store or dispose of hazardous waste but are not owners or operators.

Finally, though the result may appear harsh, it is well established that criminal penalties attached to regulatory statutes intended to protect public health, in contrast to statutes based on common law crimes, are to be construed to effectuate the regulatory purpose.

* * *

Congress enacted RCRA in 1976 as a “cradle-to-grave” regulatory scheme for toxic materials, providing “nationwide protection against the dangers of improper hazardous waste disposal.” H.R. Rep. No. 1491, 94th Cong., 2d Sess. 11, *reprinted in* 1976 U.S. Code Cong. & Ad. News 6238, 6249. RCRA was enacted to provide “a multifaceted approach toward solving the problems associated with the 3–4 billion tons of discarded materials generated each year, and the problems resulting from the anticipated 8% annual increase in the volume of such waste.” *Id.* at 2, 1976 U.S. Code Cong. & Ad. News at 6239. The committee reports accompanying legislative consideration of RCRA contain numerous statements evincing the Congressional view that improper disposal of toxic materials was a serious national problem.

The original statute made knowing disposal (but not treatment or storage) of such waste without a permit a misdemeanor. Amendments in 1978 and 1980 expanded the criminal provision to cover treatment and storage and made violation of section 6928 a felony. The fact that Congress amended the statute twice to broaden the scope of its substantive provisions and enhance the penalty is a strong indication of Congress’ increasing concern about the seriousness of the prohibited conduct.

We conclude that in RCRA, no less than in the Food and Drugs Act, Congress endeavored to control hazards that, “in the circumstances of modern industrialism, are largely beyond self-protection.” *United States v. Dotterweich*, 320 U.S. at 280. It would undercut the purposes of the legislation to limit the class of potential defendants to owners and operators when others also bear responsibility for handling regulated materials. The phrase “without having obtained a permit *under section 6925*” (emphasis added) merely references the section under which the permit is required and exempts from prosecution under section 6928(d)(2)(A) anyone who has obtained a permit; we conclude that it has no other limiting effect. Therefore we reject the district court’s construction limiting the substantive criminal provision by confining “any person” in section 6928(d)(2)(A) to owners and operators of facilities that store, treat or dispose of hazardous waste, as an unduly narrow view of both the statutory language and the congressional intent.

CASE QUESTIONS

1. The district court (trial court) accepted the individual defendants' argument. What was that argument?
2. On what reasoning did the appellate court reject that argument?
3. If employees of a company that is violating the RCRA carry out disposal of hazardous substances in violation of the RCRA, they would presumably lose their jobs if they didn't. What is the moral justification for applying criminal penalties to such employees (such as Hopkins and Angel)?

33.7 Summary and Exercises

Summary

An estate is an interest in real property; it is the degree to which a thing is owned. Freehold estates are those with an uncertain duration; leaseholds are estates due to expire at a definite time. A present estate is one that is currently owned; a future estate is one that is owned now but not yet available for use.

Present estates are (1) the fee simple absolute; (2) the fee simple defeasible, which itself may be divided into three types, and (3) the life estate.

Future estates are generally of two types: reversion and remainder. A reversion arises whenever a transferred estate will endure for a shorter time than that originally owned by the transferor. A remainder interest arises when the transferor gives the reversion interest to someone else.

Use of air, earth, and water are the major rights incident to ownership of real property. Traditionally, the owner held “up to the sky” and “down to the depths,” but these rules have been modified to balance competing rights in a modern economy. The law governing water rights varies with the states; in general, the eastern states with more plentiful water have adopted either the natural flow doctrine or the reasonable use doctrine of riparian rights, giving those who live along a waterway certain rights to use the water. By contrast, western states have tended to apply the prior appropriation doctrine, which holds that first in time is first in right, even if those downstream are disadvantaged.

An easement is an interest in land—created by express agreement, prior use, or necessity—that permits one person to make use of another’s estate. An affirmative easement gives one person the right to use another’s land; a negative easement prevents the owner from using his land in a way that will affect another person’s land. In understanding easement law, the important distinctions are between easements appurtenant and in gross, and between dominant and servient owners.

The law not only defines the nature of the property interest but also regulates land use. Tort law regulates land use by imposing liability for (1) activities that affect those off the land and (2) injuries caused to people who enter it. The two most important theories relating to the former are nuisance and trespass. With respect to the latter, the common law confusingly distinguishes among trespassers, licensees, and invitees. Some states are moving away from the perplexing and rigid rules of the past and simply require owners to maintain their property in a reasonably safe condition.

Land use may also be regulated by private agreement through the restrictive covenant, an agreement that “runs with the land” and that will be binding on any subsequent owner. Land use is also regulated by the government’s power under eminent domain to take private land for public purposes (upon payment of just compensation),

through zoning laws, and through recently enacted environmental statutes, including the National Environmental Policy Act and laws governing air, water, treatment of hazardous wastes, and chemicals.

EXERCISES

1. Dorothy deeded an acre of real estate that she owns to George for the life of Benny and then to Ernie. Describe the property interests of George, Benny, Ernie, and Dorothy.
2. In Exercise 1, assume that George moves into a house on the property. During a tornado, the roof is destroyed and a window is smashed. Who is responsible for repairing the roof and window? Why?
3. Dennis likes to spend his weekends in his backyard, shooting his rifle across his neighbor's yard. If Dennis never sets foot on his neighbor's property, and if the bullets strike neither persons nor property, has he violated the legal rights of the neighbor? Explain.
4. Dennis also drills an oil well in his backyard. He "slant drills" the well; that is, the well slants from a point on the surface in his yard to a point four hundred feet beneath the surface of his neighbor's yard. Dennis has slanted the drilling in order to capture his neighbor's oil. Can he do this legally? Explain.
5. Wanda is in charge of acquisitions for her company. Realizing that water is important to company operations, Wanda buys a plant site on a river, and the company builds a plant that uses all of the river water. Downstream owners bring suit to stop the company from using any water. What is the result? Why?
6. Sunny decides to build a solar home. Before beginning construction, she wants to establish the legal right to prevent her neighbors from constructing buildings that will block the sunlight. She has heard that the law distinguishes between licenses and easements, easements appurtenant and in gross, and affirmative and negative easements. Which of these interests would you recommend for Sunny? Why?

SELF-TEST QUESTIONS

1. A freehold estate is defined as an estate
 - a. with an uncertain duration
 - b. due to expire at a definite time
 - c. owned now but not yet available for use
 - d. that is leased or rented

2. A fee simple defeasible is a type of
 - a. present estate
 - b. future estate
 - c. life estate
 - d. leasehold estate

3. A reversion is
 - a. a present estate that prevents transfer of land out of the family
 - b. a form of life estate
 - c. a future estate that arises when the estate transferred has a duration less than that originally owned by the transferor
 - d. identical to a remainder interest

4. An easement is an interest in land that may be created by
 - a. express agreement
 - b. prior use
 - c. necessity
 - d. all of the above

5. The prior appropriation doctrine
 - a. tends to be applied by eastern states
 - b. holds that first in time is first in right
 - c. gives those that live along a waterway special rights to use the water
 - d. all of the above

SELF-TEST ANSWERS

1. a
2. a
3. c
4. d
5. b

Chapter 34

The Transfer of Real Estate by Sale

LEARNING OBJECTIVES

After reading this chapter, you should understand the following:

1. The various forms of real estate ownership, including fee simple, tenancy in common, and joint tenancy
2. The mechanics of finding, financing, and closing a real estate transaction
3. How adverse possession may sometimes vest title in real property despite the nonconsent of the owner

This chapter follows the steps taken when real estate is transferred by sale.

1. The buyer selects a form of ownership.
2. The buyer searches for the real estate to be purchased. In doing so, the buyer will usually deal with real estate brokers.
3. After a parcel is selected, the seller and buyer will negotiate and sign a sales agreement.
4. The seller will normally be required to provide proof of title.
5. The buyer will acquire property insurance.
6. The buyer will arrange financing.
7. The sale and purchase will be completed at a closing.

During this process, the buyer and seller enter into a series of contracts with each other and with third parties such as brokers, lenders, and insurance companies. In this chapter, we focus on the unique features of these contracts, with the exception of mortgages ([Chapter 29 "Mortgages and Nonconsensual Liens"](#)) and property insurance ([Chapter 37 "Insurance"](#)). We conclude by briefly examining adverse possession—a method of acquiring property for free.

34.1 Forms of Ownership

LEARNING OBJECTIVES

1. Be familiar with the various kinds of interest in real property.
2. Know the ways that two or more people can own property together.
3. Understand the effect of marriage, divorce, and death on various forms of property ownership.

Overview

The transfer of property begins with the buyer's selection of a form of ownership. Our emphasis here is not on what is being acquired (the type of property interest) but on how the property is owned.

One form of ownership of real property is legally quite simple, although lawyers refer to it with a complicated-sounding name. This is ownership by one individual, known as ownership in **severalty**¹. In purchasing real estate, however, buyers frequently complicate matters by grouping together—because of marriage, close friendship, or simply in order to finance the purchase more easily

When purchasers group together for investment purposes, they often use the various forms of organization discussed in [Chapter 40 "Partnerships: General Characteristics and Formation"](#), [Chapter 41 "Partnership Operation and Termination"](#), [Chapter 42 "Hybrid Business Forms"](#), and [Chapter 43 "Corporation: General Characteristics and Formation"](#)—corporations, partnerships, limited partnerships, joint ventures, and business trusts. The most popular of these forms of organization for owning real estate is the limited partnership. A real estate limited partnership is designed to allow investors to take substantial deductions that offset current income from the partnership and other similar investments, while at the same time protecting the investor from personal liability if the venture fails.

But you do not have to form a limited partnership or other type of business in order to acquire property with others; many other forms are available for personal or investment purposes. To these we now turn.

1. Ownership by one individual.

Joint Tenancy

Joint tenancy is an estate in land owned by two or more persons. It is distinguished chiefly by the right of survivorship. If two people own land as joint tenants, then either becomes the sole owner when the other dies. For land to be owned jointly, four unities must coexist:

1. **Unity of time**². The interests of the joint owners must begin at the same time.
2. **Unity of title**³. The joint tenants must acquire their title in the same conveyance—that is, the same will or deed.
3. **Unity of interest**⁴. Each owner must have the same interest in the property; for example, one may not hold a life estate and the other the remainder interest.
4. **Unity of possession**⁵. All parties must have an equal right to possession of the property (see [Figure 34.1 "Forms of Ownership and Unities"](#)).

Figure 34.1 *Forms of Ownership and Unities*

Unities	Joint Tenancy	Tenancy by Entirety	Tenancy in Common
Time	✓	✓	
Title	✓	✓	
Interest	✓	✓	
Possession	✓	✓	✓
Person		✓	

2. The interests of the joint owners must begin at the same time.
3. The joint tenants must acquire their title in the same conveyance—that is, the same will or deed.
4. Each owner must have the same interest in the property; for example, one may not hold a life estate and the other the remainder interest.
5. Where all parties have an equal right to possession of the property.

Suppose a woman owns some property and upon marriage wishes to own it jointly with her husband. She deeds it to herself and her husband “as joint tenants and not tenants in common.” Strictly speaking, the common law would deny that the resulting form of ownership was joint because the unities of title and time were missing. The wife owned the property first and originally acquired title under a different conveyance. But the modern view in most states is that an owner may convey directly to herself and another in order to create a joint estate.

When one or more of the unities is destroyed, however, the joint tenancy lapses. Fritz and Gary own a farm as joint tenants. Fritz decides to sell his interest to Jesse (or, because Fritz has gone bankrupt, the sheriff auctions off his interest at a foreclosure sale). Jesse and Gary would hold as tenants in common and not as joint tenants. Suppose Fritz had made out his will, leaving his interest in the farm to Reuben. On Fritz's death, would the unities be destroyed, leaving Gary and Reuben as tenants in common? No, because Gary, as joint tenant, would own the entire farm on Fritz's death, leaving nothing behind for Reuben to inherit.

Tenancy by the Entirety

About half the states permit husbands and wives to hold property as **tenants by the entirety**⁶. This form of ownership is similar to joint tenancy, except that it is restricted to husbands and wives. This is sometimes described as the unity of person. In most of the states permitting tenancy by the entirety, acquisition by husband and wife of property as joint tenants automatically becomes a tenancy by the entirety. The fundamental importance of tenancy by the entirety is that neither spouse individually can terminate it; only a joint decision to do so will be effective. One spouse alone cannot sell or lease an interest in such property without consent of the other, and in many states a creditor of one spouse cannot seize the individual's separate interest in the property, because the interest is indivisible.

Tenancy in Common

Two or more people can hold property as **tenants in common**⁷ when the unity of possession is present, that is, when each is entitled to occupy the property. None of the other unities—of time, title, or interest—is necessary, though their existence does not impair the common ownership. Note that the tenants in common do not own a specific portion of the real estate; each has an undivided share in the whole, and each is entitled to occupy the whole estate. One tenant in common may sell, lease, or mortgage his undivided interest. When a tenant in common dies, his interest in the property passes to his heirs, not to the surviving tenants in common.

6. When spouses own property jointly and all unities are applicable.

7. When the unity of possession is present—that is, when each is entitled to occupy the property. None of the other unities—of time, title, or interest—is necessary, though their existence does not impair the common ownership.

Because tenancy in common does not require a unity of interest, it has become a popular form of “mingling,” by which unrelated people pool their resources to purchase a home. If they were joint tenants, each would be entitled to an equal share in the home, regardless of how much each contributed, and the survivor would become sole owner when the other owner dies. But with a tenancy-in-common arrangement, each can own a share in proportion to the amount invested.

Community Property

In ten states—Alaska, Arizona, California, Idaho, Louisiana, Nevada, New Mexico, Texas, Washington, and Wisconsin—property acquired during a marriage is said to be **community property**⁸. There are differences among these states, but the general theory is that with certain exceptions, each spouse has an undivided equal interest in property acquired while the husband and wife are married to each other. The major exception is for property acquired by gift or inheritance during the marriage. (By definition, property owned by either spouse before the marriage is not community property.) Property acquired by gift of inheritance or owned before the marriage is known as **separate property**⁹. Community property states recognize other forms of ownership; specifically, husbands and wives may hold property as joint tenants, permitting the survivor to own the whole.

The consequence of community property laws is that either the husband or the wife may manage the community property, borrow against it, and dispose of community personal property. Community real estate may only be sold or encumbered by both jointly. Each spouse may bequeath only half the community property in his or her will. In the absence of a will, the one-half property interest will pass in accordance with the laws of intestate succession. If the couple divorces, the states generally provide for an equal or near-equal division of the community property, although a few permit the court in its discretion to divide in a different proportion.

Condominiums

In popular parlance, a condominium is a kind of apartment building, but that is not its technical legal meaning. Condominium is a form of ownership, not a form of structure, and it can even apply to space—for example, to parking spaces in a garage. The word *condominium* means joint ownership or control, and it has long been used whenever land has been particularly scarce or expensive. Condominiums were popular in ancient Rome (especially near the Forum) and in the walled cities of medieval Europe.

8. There are differences among community property states, but the general theory is that, with certain exceptions, each spouse has an undivided equal interest in property acquired while the husband and wife are married to each other.

9. Property acquired by gift of inheritance or owned before the marriage.

In its modern usage, *condominium* refers to a form of housing involving two elements of ownership. The first is the living space itself, which may be held in common, in joint tenancy, or in any other form of ownership. The second is the common space in the building, including the roof, land under the structure, hallways, swimming pool, and the like. The common space is held by all purchasers as tenants in common. The living space may not be sold apart from the interest in the common space.

Two documents are necessary in a condominium sale—the master deed and the bylaws. The master deed (1) describes the condominium units, the common areas, and any restrictions that apply to them; (2) establishes the unit owner’s interest in the common area, his number of votes at owners’ association meetings, and his share of maintenance and operating expenses (sometimes unit owners have equal shares, and sometimes their share is determined by computing the ratio of living area or market price or original price of a single unit to the whole); and (3) creates a board of directors to administer the affairs of the whole condominium. The bylaws usually establish the owners’ association, set out voting procedures, list the powers and duties of the officers, and state the obligations of the owners for the use of the units and the common areas.

Cooperatives

Another popular form of owning living quarters with common areas is the cooperative. Unlike the person who lives in a condominium, the tenant of a cooperative does not own a particular unit. Instead, he owns a share of the entire building. Since the building is usually owned by a corporation (a cooperative corporation, hence the name), this means that the tenant owns stock in the corporation. A tenant occupies a unit under a lease from the corporation. Together, the lease and stock in the building corporation are considered personal, not real, property.

In a condominium, an owner of a unit who defaults in paying monthly mortgage bills can face foreclosure on the unit, but neighbors in the building suffer no direct financial impact, except that the defaulter probably has not paid monthly maintenance charges either. In a cooperative, however, a tenant who fails to pay monthly charges can jeopardize the entire building, because the mortgage is on the building as a whole; consequently, the others will be required to make good the payments or face foreclosure.

Time-Shares

A time-share is an arrangement by which several people can own the same property while being entitled to occupy the premises exclusively at different times on a recurring basis. In the typical vacation property, each owner has the exclusive right to use the apartment unit or cottage for a specified period of time each year—for example, Mr. and Mrs. Smith may have possession from December 15 through December 22, Mr. and Mrs. Jones from December 23 through December 30, and so on. The property is usually owned as a condominium but need not be. The sharers may own the property in fee simple, hold a joint lease, or even belong to a vacation club that sells time in the unit.

Time-share resorts have become popular in recent years. But the lure of big money has brought unscrupulous contractors and salespersons into the market. Sales practices can be unusually coercive, and as a result, most states have sets of laws specifically to regulate time-share sales. Almost all states provide a cooling-off period, or rescission period; these periods vary from state to state and provide a window where buyers can change their minds without forfeiting payments or deposits already made.

KEY TAKEAWAY

Property is sometimes owned by one person or one entity, but more often two or more persons will share in the ownership. Various forms of joint ownership are possible, including joint tenancies, tenancy by the entirety, and tenancy in common. Married persons should be aware of whether the state they live in is a community property state; if it is, the spouse will take some interest in any property acquired during the marriage. Beyond traditional landholdings, modern real estate ownership may include interests in condominiums, cooperatives, or time-shares.

EXERCISES

1. Miguel and Maria Ramirez own property in Albuquerque, New Mexico, as tenants by the entirety. Miguel is a named defendant in a lawsuit that alleges defamation, and an award is made for \$245,000 against Miguel. The property he owns with Maria is worth \$320,000 and is owned free of any mortgage interest. To what extent can the successful plaintiff recover damages by forcing a sale of the property?
2. Miguel and Maria Ramirez own property in Albuquerque, New Mexico, as tenants by the entirety. They divorce. At the time of the divorce, there are no new deeds signed or recorded. Are they now tenants in common or joint tenants?

34.2 Brokers, Contracts, Proof of Title, and Closing

LEARNING OBJECTIVES

1. Know the duties of the real estate broker and how brokers are licensed.
2. Be able to discuss the impact of constitutional and statutory law on real estate sellers and brokers.
3. Describe the various kinds of listing contracts and their import.
4. Know the elements of a sales agreement and the various types of deeds to real estate.
5. Understand the closing process and how “good title” is obtained through the title search and insurance process.

Once the buyer (or buyers) knows what form of ownership is most desirable, the search for a suitable property can begin. This search often involves contact with a broker hired by the seller. The seller’s contract with the broker, known as the **listing agreement**¹⁰, is the first of the series of contracts in a typical real estate transaction. As you consider these contracts, it is important to keep in mind that despite the size of the transaction and the dire financial consequences should anything go awry, the typical person (buyer or seller) usually acts as his or her own attorney. An American Bar Association committee has noted the following:

It is probably safe to say that in a high percentage of cases the seller is unrepresented and signs the contracts of brokerage and sale on the basis of his faith in the broker. The buyer does not employ a lawyer. He signs the contract of sale without reading it and, once financing has been obtained, leaves all the details of title search and closing to the lender or broker. The lender or broker may employ an attorney but, where title insurance is furnished by a company maintaining its own title plant, it is possible that no lawyer, not even house counsel, will appear.

This being so, the material that follows is especially important for buyers and sellers who are not represented in the process of buying or selling real estate.

Regulation of the Real Estate Business State Licensing

10. An agreement between the owner of real property and a real estate broker.

Real estate brokers, and the search for real estate generally, are subject to state and federal government regulation. Every state requires real estate brokers to be licensed. To obtain a license, the broker must pass an examination covering the

principles of real estate practice, transactions, and instruments. Many states additionally insist that the broker take several courses in finance, appraisal, law, and real estate practice and apprentice for two years as a salesperson in a real estate broker's office.

Civil Rights Act

Two federal civil rights laws also play an important role in the modern real estate transaction. These are the Civil Rights Act of 1866 and the Civil Rights Act of 1968 (Fair Housing Act). In *Jones v. Alfred H. Mayer Co.*, 392 U.S. 409 (1968), the Supreme Court upheld the constitutionality of the 1866 law, which expressly gives all citizens of the United States the same rights to inherit, purchase, lease, sell, hold, and convey real and personal property. A minority buyer or renter who is discriminated against may sue for relief in federal court, which may award damages, stop the sale of the house, or even direct the seller to convey the property to the plaintiff.

The 1968 Fair Housing Act prohibits discrimination on the grounds of race, color, religion, sex, national origin, handicap, or family status (i.e., no discrimination against families with children) by any one of several means, including the following:

1. Refusing to sell or rent to or negotiate with any person
2. Discriminating in the terms of sale or renting
3. Discriminating in advertising
4. Denying that the housing is available when in fact it is
5. "Blockbusting" (panicking owners into selling or renting by telling them that minority groups are moving into the neighborhood)
6. Creating different terms for granting or denying home loans by commercial lenders
7. Denying anyone the use of real estate services

However, the 1968 act contains several exemptions:

1. Sale or rental of a single-family house if the seller
 - a. owns less than four such houses,
 - b. does not use a broker,
 - c. does not use discriminatory advertising,
 - d. within two years sells no more than one house in which the seller was not the most recent occupant.

- e. Rentals in a building occupied by the owner as long as it houses fewer than five families and the owner did not use discriminatory advertising
- f. Sale or rental of space in buildings or land restricted by religious organization owners to people of the same religion (assuming that the religion does not discriminate on the basis of race, color, or national origin)
- g. Private clubs, if they limit their noncommercial rentals to members

The net impact of these laws is that discrimination based on color or race is flatly prohibited and that other types of discrimination are also barred unless one of the enumerated exemptions applies.

Hiring the Broker: The Listing Agreement

When the seller hires a real estate broker, he will sign a listing agreement. (In several states, the Statute of Frauds says that the seller must sign a written agreement; however, he should do so in all states in order to provide evidence in the event of a later dispute.) This listing agreement sets forth the broker's commission, her duties, the length of time she will serve as broker, and other terms of her agency relationship. Whether the seller will owe a commission if he or someone other than the broker finds a buyer depends on which of three types of listing agreements has been signed.

Exclusive Right to Sell

If the seller agrees to an **exclusive-right-to-sell**¹¹ agency, he will owe the broker the stated commission regardless of who finds the buyer. Language such as the following gives the broker an exclusive right to sell: "Should the seller or anyone acting for the seller (including his heirs) sell, lease, transfer, or otherwise dispose of the property within the time fixed for the continuance of the agency, the broker shall be entitled nevertheless to the commission as set out herein."

Exclusive Agency

Somewhat less onerous from the seller's perspective (and less generous from the broker's perspective) is the **exclusive agency**¹². The broker has the exclusive right to sell and will be entitled to the commission if anyone other than the seller finds the buyer (i.e., the seller will owe no commission if he finds a buyer). Here is language that creates an exclusive agency: "A commission is to be paid the broker

11. If the seller agrees to an exclusive-right-to-sell agency, he will owe the broker the stated commission regardless of who finds the buyer.

12. The broker has the exclusive right to sell and will be entitled to the commission if anyone other than the seller finds the buyer (in other words, the seller will owe no commission if he finds a buyer).

whether the purchaser is secured by the broker or by any person other than the seller.”

Open Listing

The third type of listing, relatively rarely used, is the open listing, which authorizes “the broker to act as agent in securing a purchaser for my property.” The **open listing**¹³ calls for payment to the broker only if the broker was instrumental in finding the buyer; the broker is not entitled to her commission if anyone else, seller or otherwise, locates the buyer.

Suppose the broker finds a buyer, but the seller refuses at that point to sell. May the seller simply change his mind and avoid having to pay the broker’s commission? The usual rule is that when a broker finds a buyer who is “ready, willing, and able” to purchase or lease the property, she has earned her commission. Many courts have interpreted this to mean that even if the buyers are unable to obtain financing, the commission is owed nevertheless once the prospective buyers have signed a purchase agreement. To avoid this result, the seller should insist on either a “no deal, no commission” clause in the listing agreement (entitling the broker to payment only if the sale is actually consummated) or a clause in the purchase agreement making the purchase itself contingent on the buyer’s finding financing.

Broker’s Duties

Once the listing agreement has been signed, the broker becomes the seller’s agent—or, as occasionally happens, the buyer’s agent, if hired by the buyer. A broker is not a general agent with broad authority. Rather, a broker is a special agent with authority only to show the property to potential buyers. Unless expressly authorized, a broker may not accept money on behalf of the seller from a prospective buyer. Suppose Eunice hires Pete’s Realty to sell her house. They sign a standard exclusive agency listing, and Pete cajoles Frank into buying the house. Frank writes out a check for \$10,000 as a down payment and offers it to Pete, who absconds with the money. Who must bear the loss? Ordinarily, Frank would have to bear the loss, because Pete was given no authority to accept money. If the listing agreement explicitly said that Pete could accept the down payment from a buyer, then the loss would fall on Eunice.

13. Calls for payment to the broker only if the broker was instrumental in finding the buyer; the broker is not entitled to her commission if anyone else, seller or otherwise, locates the buyer.

14. A fiduciary duty is a duty of the highest loyalty and trust. It means that the broker cannot buy the property for himself through an intermediary without full disclosure to the seller.

Although the broker is but a special agent, she owes the seller, her principal, a **fiduciary duty**¹⁴. (See [Chapter 38 "Relationships between Principal and Agent"](#) on relations between principal and agent.) A fiduciary duty is a duty of the highest loyalty and trust. It means that the broker cannot buy the property for herself through an intermediary without full disclosure to the seller of her intentions. Nor

may the broker secretly receive a commission from the buyer or suggest to a prospective buyer that the property can be purchased for less than the asking price.

The Sales Agreement

Once the buyer has selected the real estate to be acquired, an agreement of sale will be negotiated and signed. Contract law in general is discussed in [Chapter 8 "Introduction to Contract Law"](#); our discussion here will focus on specific aspects of the real estate contract. The Statute of Frauds requires that contracts for sale of real estate must be in writing. The writing must contain certain information.

Names of Buyers and Sellers

The agreement must contain the names of the buyers and sellers. As long as the parties sign the agreement, however, it is not necessary for the names of buyers and sellers to be included within the body of the agreement.

Real Estate Description

The property must be described sufficiently for a court to identify the property without having to look for evidence outside the agreement. The proper address, including street, city, and state, is usually sufficient.

Price

The price terms must be clear enough for a court to enforce. A specific cash price is always clear enough. But a problem can arise when installment payments are to be made. To say "\$50,000, payable monthly for fifteen years at 12 percent" is not sufficiently detailed, because it is impossible to determine whether the installments are to be equal each month or are to be equal principal payments with varying interest payments, declining monthly as the balance decreases.

Signature

As a matter of prudence, both buyer and seller should sign the purchase agreement. However, the Statute of Frauds requires only the signature of the party against whom the agreement is to be enforced. So if the seller has signed the agreement, he cannot avoid the agreement on the grounds that the buyer has not signed it. However, if the buyer, not having signed, refuses to go to closing and take title, the seller would be unable to enforce the agreement against him.

Easements and Restrictive Covenants

Unless the contract specifically states otherwise, the seller must deliver **marketable title**¹⁵. A marketable title is one that is clear of restrictions to which a reasonable buyer would object. Most buyers would refuse to close the deal if there were potential third-party claims to all or part of the title. But a buyer would be unreasonable if, at closing, he refused to consummate the transaction on the basis that there were utility easements for the power company or a known and visible driveway easement that served the neighboring property. As a precaution, a seller must be sure to say in the contract for sale that the property is being sold “subject to easements and restrictions of record.” A buyer who sees only such language should insist that the particular easements and restrictive covenants be spelled out in the agreement before he signs.

Risk of Loss

Suppose the house burns down after the contract is signed but before the closing. Who bears the loss? Once the contract is signed, most states apply the rule of equitable conversion, under which the buyer’s interest (his executory right to enforce the contract to take title to the property) is regarded as real property, and the seller’s interest is regarded as personal property. The rule of equitable conversion stems from an old maxim of the equity courts: “That which ought to be done is regarded as done.” That is, the buyer ought to have the property and the seller ought to have the money. A practical consequence of this rule is that the loss of the property falls on the buyer. Because most buyers do not purchase insurance until they take title, eleven states have adopted the Uniform Vendor and Purchaser Risk Act, which reverses the equitable conversion rule and places risk of loss on the seller. The parties may themselves reverse the application of the rule; the buyer should always insist on a clause in a contract stating that risk of loss remains with the seller until a specified date, such as the closing.

Earnest Money

As protection against the buyer’s default, the seller usually insists on a down payment known as earnest money. This is intended to cover such immediate expenses as proof of marketable title and the broker’s commission. If the buyer defaults, he forfeits the earnest money, even if the contract does not explicitly say so.

15. A marketable title is one that can be transferred to a new owner without the likelihood that claims will be made on it by another party.

Contingencies

Performance of most real estate contracts is subject to various contingencies—that is, it is conditioned on the happening of certain events. For example, the buyer

might wish to condition his agreement to buy the house on his ability to find a mortgage or to find one at a certain rate of interest. Thus the contract for sale might read that the buyer “agrees to buy the premises for \$50,000, subject to his obtaining a \$40,000 mortgage at 5 percent.” The person protected by the contingency may waive it; if the lowest interest rate the buyer could find was 5.5 percent, he could either refuse to buy the house or waive the condition and buy it anyway.

Times for Performance

A frequent difficulty in contracting to purchase real estate is the length of time it takes to receive an acceptance to an offer. If the acceptance is not received in a reasonable time, the offeror may treat the offer as rejected. To avoid the uncertainty, an offeror should always state in his offer that it will be held open for a definite period of time (five working days, two weeks, or whatever). The contract also ought to spell out the times by which the following should be done: (1) seller’s proof that he has title, (2) buyer’s review of the evidence of title, (3) seller’s correction of title defects, (4) closing date, and (5) possession by the buyer. The absence of explicit time provisions will not render the contract unenforceable—the courts will infer a reasonable time—but their absence creates the possibility of unnecessary disputes.

Types of Deeds

Most real estate transactions involve two kinds of deeds, the general warranty deed and the quitclaim deed.

1. **General warranty deed.** In a warranty deed, the seller warrants to the buyer that he possesses certain types of legal rights in the property. In the **general warranty deed**¹⁶, the seller warrants that (a) he has good title to convey, (b) the property is free from any encumbrance not stated in the deed (the warranty against encumbrances), and (c) the property will not be taken by someone with a better title (the warranty of quiet enjoyment). Breach of any of these warranties exposes the seller to damages.
2. **Quitclaim deed.** The simplest form of deed is the **quitclaim deed**¹⁷, in which the seller makes no warranties. Instead, he simply transfers to the buyer whatever title he had, defects and all. A quitclaim deed should not be used in the ordinary purchase and sale transaction. It is usually reserved for removing a cloud on the title—for instance, a quitclaim deed by a widow who might have a dower interest in the property.

16. A deed in which the seller warrants that (a) he has good title to convey, (b) the property is free from any encumbrance not stated in the deed (the warranty against encumbrances), and (c) the property will not be taken by someone with a better title (the warranty of quiet enjoyment).

17. A deed in which the seller makes no warranties.

If the purchase agreement is silent about the type of deed, courts in many states will require the seller to give the buyer a quitclaim deed. In the contract, the buyer should therefore specify that the seller is to provide a warranty deed at closing.

When buyers move in after the closing, they frequently discover defects (the boiler is broken, a pipe leaks, the electrical power is inadequate). To obtain recourse against such an eventuality, the buyer could attempt to negotiate a clause in the contract under which the seller gives a warranty covering named defects. However, even without an express warranty, the law implies two warranties when a buyer purchases a new house from a builder. These are warranties that (1) the house is habitable and (2) the builder has completed the house in a workmanlike manner. Most states have refused to extend these warranties to subsequent purchasers—for example, to the buyer from a seller who had bought from the original builder. However, a few states have begun to provide limited protection to subsequent purchasers—in particular, for defects that a reasonable inspection will not reveal but that will show up only after purchase.

Proof of Title

Contracts are often formed and performed simultaneously, but in real estate transactions there is more often a gap between contract formation and performance (the closing). The reason is simple: the buyer must have time to obtain financing and to determine whether the seller has marketable title. That is not always easy; at least, it is not as straightforward as looking at a piece of paper. To understand how title relates to the real estate transaction, some background on recording statutes will be useful.

Recording Statutes

Suppose Slippery Sam owned Whispering Pines, a choice resort hotel on Torch Lake. On October 1, Slippery deeded Whispering Pines to Lorna for \$1,575,000. Realizing the profit potential, Slippery decided to sell it again, and did so on November 1, without bothering to tell Malvina, the new buyer to whom he gave a new deed, that he had already sold it to Lorna. He then departed for a long sailing trip to the British Virgin Islands.

When Malvina arrives on the doorstep to find Lorna already tidying up, who should prevail? At common law, the first deed prevailed over subsequent deeds. So in our simple example, if this were a pure common-law state, Lorna would have title and Malvina would be out of luck, stuck with a worthless piece of paper. Her only recourse, probably futile, would be to search out and sue Slippery Sam for fraud.

Most states, however, have enacted **recording statutes**¹⁸, which award title to the person who has complied with the requirement to place the deed in a publicly available file in a public office in the county, often called the recorder's office or the register of deeds.

Notice Statute

Under the most common type of recording statute, called a notice statute, a deed must be recorded in order for the owner to prevail against a subsequent purchaser. Assume in our example that Lorna recorded her deed on November 2 and that Malvina recorded on November 4. In a notice-statute state, Malvina's claim to title would prevail over Lorna's because on the day that Malvina received title (November 1), Lorna had not yet recorded. For this rule to apply, Malvina must have been a bona fide purchaser, meaning that she must have (1) paid valuable consideration, (2) bought in good faith, and (3) had no notice of the earlier sale. If Lorna had recorded before Malvina took the deed, Lorna would prevail if Malvina did not in fact check the public records; she should have checked, and the recorded deed is said to put subsequent purchasers on **constructive notice**¹⁹.

Notice-Race Statute

Another common type of recording statute is the notice-race statute. To gain priority under this statute, the subsequent bona fide purchaser must also record—that is, win the race to the recorder's office before the earlier purchaser. So in our example, in a notice-race jurisdiction, Lorna would prevail, since she recorded before Malvina did.

Race Statute

A third, more uncommon type is the race statute, which gives title to whoever records first, even if the subsequent purchaser is not bona fide and has actual knowledge of the prior sale. Suppose that when she received the deed, Malvina knew of the earlier sale to Lorna. Malvina got to the recording office the day she got the deed, November 1, and Lorna came in the following day. In a race-statute jurisdiction, Malvina would take title.

Chain of Title

Given the recording statutes, the buyer must check the deed on record to determine (1) whether the seller ever acquired a valid deed to the property—that is, whether a chain of title can be traced from earlier owners to the seller—and (2) whether the seller has already sold the property to another purchaser, who has recorded a deed.

18. Statutes that award title to the person who has complied with the requirement to place the deed in a public registry, usually a county Register of Deeds office.

19. A buyer is on constructive notice of anything put in the public records, whether or not she actually notices.

There are any number of potential “clouds” on the title that would defeat a fee simple conveyance: among others, there are potential judgments, liens, mortgages, and easements that might affect the value of the property. There are two ways to protect the buyer: the abstract of title and opinion, and title insurance.

Abstract and Opinion

An abstract of title is a summary of the chain of title, listing all previous deeds, mortgages, tax liens, and other instruments recorded in the county land records office. The abstract is prepared by either an attorney or a title company. Since the list itself says nothing about whether the recorded instruments are legally valid, the buyer must also have the opinion of an attorney reviewing the abstract, or must determine by doing his own search of the public records, that the seller has valid title. The attorney’s opinion is known as a title opinion or certificate of title. The problem with this method of proving title is that the public records do not reveal hidden defects. One of the previous owners might have been a minor or an incompetent person who can still void his sale, or a previous deed might have been forged, or a previous seller might have claimed to be single when in fact he was married and his wife failed to sign away her dower rights. A search of the records would not detect these infirmities.

Title Insurance

To overcome these difficulties, the buyer should obtain **title insurance**²⁰. This is a one-premium policy issued by a title insurance company after a search through the same public records. When the title company is satisfied that title is valid, it will issue the insurance policy for a premium that could be as high as 1 percent of the selling price. When the buyer is taking out a mortgage, he will ordinarily purchase two policies, one to cover his investment in the property and the other to cover the mortgagee lender’s loan. In general, a title policy protects the buyer against losses that would occur if title (1) turns out to belong to someone else; (2) is subject to a lien, encumbrance, or other defect; or (3) does not give the owner access to the land. A preferred type of title policy will also insure the buyer against losses resulting from an unmarketable title.

20. A one-premium policy issued by a title insurance company after a search through the public records. Title insurance is usually provided to both the buyer and the buyer’s lender. It guarantees against defects in the title rather than any physical aspects of the property.

Note that in determining whether to issue a policy, the title company goes through the process of searching through the public records again. The title policy as such does not guarantee that title is sound. A buyer could conceivably lose part or all of the property someday to a previous rightful owner, but if he does, the title insurance company must reimburse him for his losses.

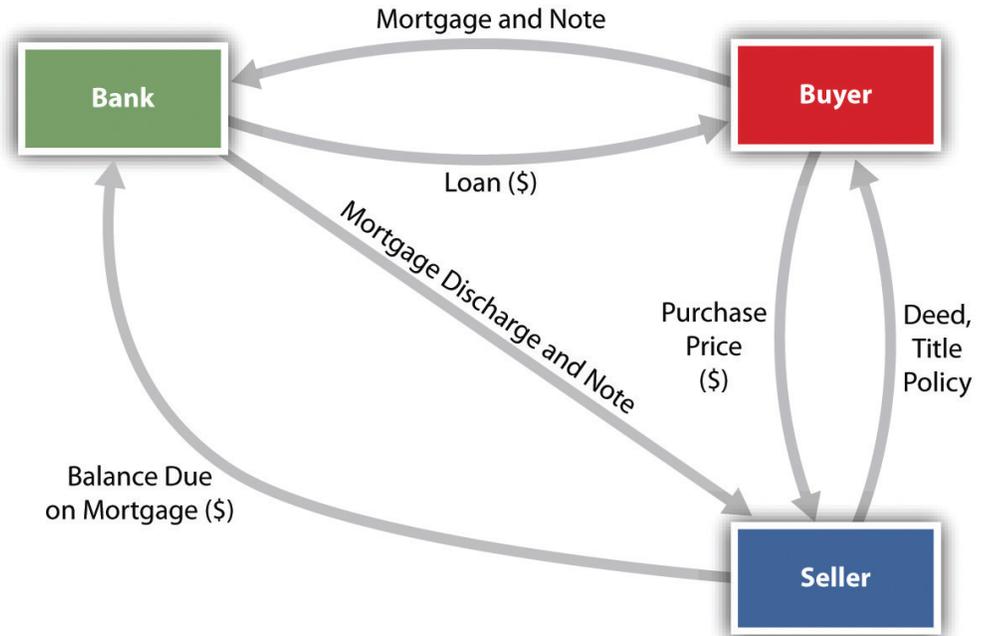

Although title insurance is usually a sound protection, most policies are subject to various exclusions and exceptions. For example, they do not provide coverage for zoning laws that restrict use of the property or for a government's taking of the property under its power of eminent domain. Nor do the policies insure against defects created by the insured or known by the insured but unknown to the company. Some companies will not provide coverage for mechanics' liens, public utility easements, and unpaid taxes. (If the accrued taxes are known, the insured will be presented with a list, and if he pays them on or before the closing, they will be covered by the final policy.) Furthermore, as demonstrated in *Title and Trust Co. of Florida v. Barrows*, (see [Section 34.4.1 "Title Insurance"](#)), title insurance covers title defects only, not physical defects in the property.

The Closing

Closing can be a confusing process because in most instances several contracts are being performed simultaneously:

1. The seller and purchaser are performing the sales contract.
2. The seller is paying off a mortgage, while the buyer is completing arrangements to borrow money and mortgage the property.
3. Title and other insurance arrangements will be completed.
4. The seller will pay the broker.
5. If buyer and seller are represented, attorneys for each party will be paid.

Figure 34.2 Closing Process

Despite all these transactions, the critical players are the seller, the purchaser, and the bank. To place the closing process in perspective, assume that one bank holds the existing (seller's) mortgage on the property and is also financing the buyer's purchase. We can visualize the three main players sitting at a table, ready to close the transaction. The key documents and the money will flow as illustrated in [Figure 34.2 "Closing Process"](#).

Form of the Deed

The deed must satisfy two fundamental legal requirements: it must be in the proper form, and there must be a valid delivery. Deeds are usually prepared by attorneys, who must include not only information necessary for a valid deed but also information required in order to be able to record the deed. The following information is typically required either for a valid deed or by the recording statutes.

Grantor

The grantor—the person who is conveying the property—must be designated in some manner. Obviously, it is best to give the grantor's full name, but it is sufficient that the person or persons conveying the deed are identifiable from the document.

Thus “the heirs of Lockewood Filmer” is sufficient identification if each of the heirs signs the deed.

Grantee

Similarly, the deed should identify the grantee—the person to whom the property is being conveyed. It does not void the deed to misspell a person’s name or to omit part of a name, or even to omit the name of one of the grantees (as in “Lockewood Filmer and wife”). Although not technically necessary, the deed ought to detail the interests being conveyed to each grantee in order to avoid considerable legal difficulty later. “To Francis Lucas, a single man, and Joseph Lucas and Matilda Lucas, his wife” was a deed of unusual ambiguity. Did each party have a one-third interest? Or did Joseph and Matilda hold half as tenants by the entirety and Francis have a one-half interest as a tenant in common? Or perhaps Francis had a one-third interest as a tenant in common and Joseph and Matilda held two-thirds as tenants by the entirety? Or was there some other possible combination? The court chose the second interpretation, but considerable time and money could have been saved had the deed contained a few simple words of explanation. *Heatter v. Lucas*, 80 A.2d 749 (Pa. 1951).

Addresses

Addresses of the parties should be included, although their absence will not usually invalidate the deed. However, in some states, failure to note the addresses will bar the deed from being recorded.

Words of Conveyance

The deed must indicate that the grantor presently intends to convey his interest in the property to the grantee. The deed may recite that the grantor “conveys and warrants” the property (warranty deed) or “conveys and quitclaims” the property (quitclaim deed). Some deeds use the words “bargain and sell” in place of convey.

Description

The deed must contain an accurate description of the land being conveyed, a description clear enough that the land can be identified without resorting to other evidence. Four general methods are used.

1. **The US government survey.** This is available west of the Mississippi (except in Texas) and in Alabama, Florida, Illinois, Indiana, Michigan, Mississippi, Ohio, and Wisconsin. With this survey, it is possible to

specify with considerable exactitude any particular plot of land in any township in these states.

2. **Metes and bounds.** The description of metes and bounds begins with a particular designated point (called a monument)—for example, a drainpipe, an old oak tree, a persimmon stump—and then defines the boundary with distances and angles until returning to the monument. As you can tell, using monuments that are biological (like trees and stumps) will have a limited utility as time goes on. Most surveyors put in stakes (iron pins), and the metes and bounds description will go from points where stakes have been put in the ground.
3. **Plats.** Many land areas have been divided into numbered lots and placed on a map called a plat. The plats are recorded. The deed, then, need only refer to the plat and lot number—for example, “Lot 17, Appledale Subdivision, record in Liber 2 of Plats, page 62, Choctaw County Records.”
4. **Informal description.** If none of the preceding methods can be used, an informal description, done precisely enough, might suffice. For instance, “my home at 31 Fernwood Street, Maplewood, Idaho” would probably pass muster.

Statement of Consideration

Statutes usually require that some consideration be stated in the deed, even though a grantor may convey property as a gift. When there is a selling price, it is easy enough to state it, although the actual price need not be listed. When land is being transferred as a gift, a statement of nominal consideration—for example, one dollar—is sufficient.

Date

Dates are customary, but deeds without dates will be enforced.

Execution

The deed must be signed by the grantor and, in some states, witnesses, and these signatures must be acknowledged by a notary public in order to make the deed eligible for recording. If someone is signing for the grantor under a power of attorney, a written instrument authorizing one person to sign for another, the instrument must be recorded along with the deed.

Delivery

To validly convey title to the property, the deed must not only be in proper form but also be delivered. This technical legal requirement is sometimes misunderstood. **Delivery**²¹ entails (1) physical delivery to the grantee, (2) an intention by the grantor to convey title, and (3) acceptance of title by the grantee. Because the grantor must intend to convey title, failure to meet the other two elements during the grantor's lifetime will void title on his death (since at that point he of course cannot have an intention). Thus when a grantee is unaware of the grantor's intention to deed the property to him, an executed deed sitting in a safe-deposit box will be invalid if discovered after the grantor's death.

Delivery to Grantee

If the deed is physically delivered to the grantee or recorded, there is a rebuttable presumption that legal delivery has been made. That is, the law presumes, in the absence of evidence to the contrary, that all three conditions have been met if delivery or recording takes place. But this presumption can be rebutted, as shown in *Havens v. Schoen*, (see [Section 34.4.2 "Delivery of a Deed"](#)).

Delivery to Third Party (Commercial Escrow)

The grantor may deliver the deed to a third party to hold until certain conditions have been met. Thus to avoid the problem of the deed sitting in the grantor's own safe-deposit box, he could deliver it to a third party with instructions to hold it until his death and then to deliver it to the grantee. This would be an effective delivery, even though the grantee could not use the property until the grantor died. For this method to be effective, the grantor must lose all control over the deed, and the third party must be instructed to deliver the deed when the specified conditions occur.

This method is most frequently used in the commercial escrow. **Escrow**²² is a method by which a third party holds a document or money or both until specified conditions have been met. A typical example would be a sale in which the buyer is afraid of liens that might be filed after the closing. A contractor that has supplied materials for the building of a house, for example, might file a lien against the property for any amounts due but unpaid under the contract. The effectiveness of the lien would relate back to the time that the materials were furnished. Thus, at closing, all potential liens might not have been filed. The buyer would prefer to pay the seller after the time for filing materialmen's liens has lapsed. But sellers ordinarily want to ensure that they will receive their money before delivering a deed. The solution is for the buyer to pay the money into escrow (e.g., to a bank) and for the seller to deliver the deed to the same escrow agent. The bank would be

21. Entails (1) physical delivery to the grantee, (2) an intention by the grantor to convey title, and (3) acceptance of title by the grantee.

22. A method by which a third party holds a document or money or both until specified conditions have been met.

instructed to hold both the money and the deed until the time for filing mechanics' liens has ended. If no materialmen's liens have been filed, then the money is paid out of escrow to the seller and the deed is released to the buyer. If a lien has been filed, then the money will not be paid until the seller removes the lien (usually by paying it off).

KEY TAKEAWAY

Most real estate is bought and sold through real estate brokers, who must be licensed by the state. Brokers have different kinds of agreements with clients, including exclusive right to sell, exclusive agency, and open listing. Brokers will usually arrange a sales agreement that includes standard provisions such as property description, earnest money, and various contingencies. A deed, usually a warranty deed, will be exchanged at the closing, but not before the buyer has obtained good proof of title, usually by getting an abstract and opinion and paying for title insurance. The deed will typically be delivered to the buyer and recorded at the county courthouse in the register of deeds' office.

EXERCISES

1. Kitty Korniotis is a licensed real estate broker. Barney Woodard and his wife, Carol, sign an exclusive agency listing with Kitty to sell their house on Woodvale Avenue. At a social gathering, Carol mentions to a friend, Helen Nearing, that the house on Woodvale is for sale. The next day, Helen drives by the property and calls the number on Kitty's sign. Helen and Scott Nearing sign a contract to buy the house from the Woodards. Is Kitty entitled to the commission?
2. Deepak Abhishek, a single man, lives in a race-notice state. He contracts to buy a large parcel of land from his friend, Ron Khurana, for the sum of \$280,000. Subsequent to the contract, Khurana finds another buyer, who is willing to pay \$299,000. Khurana arranges for two closings on the same day, within two hours of each other. At 10 a.m., he sells the property to Beverly Hanks and her husband, John, for \$299,000. The Hanks are not represented by an attorney. Khurana hands them the deed at closing, but he takes it back from them and says, "I will record this at the courthouse this afternoon." The Hankses take a copy of the deed with them and are satisfied that they have bought the property; moreover, Khurana gives them a commitment from Lawyer's Title Company that the company will insure that they are receiving fee simple title from Khurana, subject to the deed's being recorded in the county register of deeds' office.

At noon, Khurana has a closing with Abhishek, who is represented by an attorney. The attorney went to the courthouse earlier, at 11:30 a.m., and saw nothing on record that would prevent Khurana from conveying fee simple title. As the deal closes, and as Khurana prepares to leave town, Abhishek's attorney goes to the courthouse and records the deed at 1:15 p.m. At 2:07 p.m., on his way out of town, Abhishek records the deed to the Hankses.

- a. Who has better claim to the property—the Hankses or Deepak Abhishek?
- b. Does it matter if the state is a notice jurisdiction or a notice-race jurisdiction?
- c. A warranty deed is given in both closings. What would be the best remedy for whichever buyer did not get the benefit of clear title from these two transactions?

34.3 Adverse Possession

LEARNING OBJECTIVE

1. Explain how it is possible to own land without paying for it.

In some instances, real property can be acquired for free—or at least without paying the original owner anything. (Considerable cost may be involved in meeting the requisite conditions.) This method of acquisition—known as **adverse possession**²³—is effective when five conditions are met: (1) the person claiming title by adverse possession must assert that he has a right to possession hostile to the interest of the original owner, (2) he must actually possess the property, (3) his possession must be “open and notorious,” (4) the possession must be continuous, and (5) the possession must be exclusive.

Hostile Possession

Suppose Jean and Jacques are tenants in common of a farm. Jean announces that he no longer intends to pursue agricultural habits and leaves for the city. Jacques continues to work on the land, making improvements and paying taxes and the mortgage. Years later, Jacques files suit for title, claiming that he now owns the land outright by adverse possession. He would lose, since his possession was not hostile to Jacques. To be hostile, possession of the land must be without permission and with the intention to claim ownership. Possession by one cotenant is deemed permissive, since either or both are legally entitled to possession. Suppose, instead, that Jean and Jacques are neighboring farmers, each with title to his own acreage, and that Jean decides to fence in his property. Just to be on the safe side, he knowingly constructs the fence twenty feet over on Jacques’s side. This is adverse possession, since it is clearly hostile to Jacques’s possession of the land.

Actual Possession

Not only must the possession be hostile but it must also be actual. The possessor must enter onto the land and make some use of it. Many state statutes define the permissible type of possession—for example, substantial enclosure or cultivation and improvement. In other states, the courts will look to the circumstances of each case to determine whether the claimant had in fact possessed the land (e.g., by grazing cattle on the land each summer).

23. Title may pass to someone who occupies the lands of another for a certain (statutorily prescribed) period of time in an open, notorious, and hostile manner.

Open and Notorious Possession

The possessor must use the land in an open way, so that the original owner could determine by looking that his land was being claimed and so that people in the area would know that it was being used by the adverse possessor. In the melodramatic words of one court, the adverse possessor “must unfurl his flag on the land, and keep it flying so that the owner may see, if he will, that an enemy has invaded his domains, and planted the standard of conquest.” *Robin v. Brown*, 162 A. 161 (Pa. 1932). Construction of a building on the owner’s property would be open and notorious; development of a cave or tunnel under the owner’s property would not be.

Continuous Possession

The adverse possessor must use the land continuously, not intermittently. In most states, this continuous period must last for at least twenty years. If the adverse possession is passed on to heirs or the interest is sold, the successor adverse possessors may tack on the time they claim possession to reach the twenty years. Should the original owner sell his land, the time needed to prove continuous possession will not lapse. Of course, the original owner may interrupt the period—indeed, may terminate it—by moving to eject the adverse possessor any time before the twenty years has elapsed.

Exclusive Possession

The adverse possessor must claim exclusive possession of the land. Sharing the land with the owner is insufficient to ground a claim of legal entitlement based on adverse possession, since the sharing is not fully adverse or hostile. Jean finds a nice wooded lot to enjoy weekly picnics. The lot belongs to Jacques, who also uses it for picnics. This use would be insufficient to claim adverse possession because it is neither continuous nor exclusive.

If the five tests are met, then the adverse possessor is entitled to legal title. If any one of the tests is missing, the adverse possession claim will fail.

KEY TAKEAWAY

Real property can be acquired without paying the lawful owner if five conditions of adverse possession are met: (1) the person claiming title by adverse possession must assert that he has a right to possession hostile to the interest of the original owner, (2) he must actually possess the property, (3) his possession must be “open and notorious,” (4) the possession must be continuous, and (5) the possession must be exclusive.

EXERCISE

1. Tyler decides to camp out on a sandy beach lot near Isle of Palms, South Carolina. The owner, who had hoped to build a large house there, lived out of state. Tyler made no secret of his comings and goings, and after several weeks, when no one challenged his right to be there, he built a sturdy lean-to. After a while, he built a “micro house” and put a propane tank next to it. Although there was no running water, Tyler was plenty comfortable. His friends came often, they partied on the beach, and life was good. Five years after he first started camping out there, an agent of the owner came and told him to deconstruct his shelter and “move on.” Does Tyler have any rights in the property? Why or why not?

34.4 Cases

Title Insurance

Title and Trust Co. of Florida v. Barrows

381 So.2d 1088 (Fla. App. 1979)

McCord, ACTING CHIEF JUDGE.

This appeal is from a final judgment awarding money damages to appellees (Barrows) for breach of title insurance policy. We reverse.

Through a realtor, the Barrowses purchased, for \$ 12,500, a lot surrounded on three sides by land owned by others, all of which is a part of a beach subdivision. The fourth side of their lot borders on a platted street called Viejo Street, the right-of-way for which has been dedicated to and accepted by St. Johns County. The right-of-way line opposite their lot abuts a Corps of Engineers' right-of-way in which there is a stone breakwater. The intracoastal waterway flows on the other side of the breakwater.

The realtor who sold the lot to the Barrows represented to them that the county would build a road in the right-of-way along Viejo Street when they began plans for building on their lot. There have been no street improvements in the dedicated right-of-way, and St. Johns County has no present plans for making any improvements. The "road" is merely a continuation of a sandy beach.

A year after purchasing the land the Barrowses procured a survey which disclosed that the elevation of their lot is approximately one to three feet above the mean high water mark. They later discovered that their lot, along with the Viejo Street right-of-way abutting it, is covered by high tide water during the spring and fall of each year.

At the time appellees purchased their lot, they obtained title insurance coverage from appellant. The title policy covered:

Any defect in or lien or encumbrance on the title to the estate or title covered hereby...or a lack of a right of access to and from the land....

Appellees' complaint of lack of right of access was founded on the impassable condition of the platted street. After trial without a jury, the trial court entered final judgment finding that appellees did not have access to their property and, therefore, were entitled to recover \$ 12,500 from appellant the face amount of the policy.

Appellant and Florida Land Title Association, appearing as amicus curiae, argue that appellant cannot be held liable on grounds of "lack of right of access to and from the land" since there is no defect shown by the public record as to their right of access; that the public record shows a dedicated and accepted public right-of-way abutting the lot. They contend that title insurance does not insure against defects in the physical condition of the land or against infirmities in legal right of access not shown by the public record. *See Pierson v. Bill*, 138 Fla. 104, 189 So. 679 (1939). They argue that defects in the physical condition of the land such as are involved here are not covered by title insurance. We agree. Title insurance only insures against title defects.

The Supreme Court of North Carolina in *Marriott Financial Services, Inc. v. Capitol Funds, Inc.*, 288 N.C. 122, 217 S.E.2d 551 (1975), construed "right of access" to mean the right to go to and from the public right-of-way without unreasonable restrictions. *Compare Hocking v. Title Insurance & Trust Company*, 37 Cal.2d 644, 234 P.2d 625 (1951), where, in ruling that the plaintiff failed to state a cause of action in a suit brought under her title policy, the court said:

She appears to possess fee simple title to the property for whatever it may be worth; if she has been damaged by false representations in respect to the condition and value of the land her remedy would seem to be against others than the insurers of the title she acquired.

In *Mafetone, et al., v. Forest Manor Homes, Inc., et al.*, 34 A.D.2d 566, 310 N.Y.S.2d 17 (N.Y.1970), the plaintiff brought an action against a title insurance company for damages allegedly flowing from a change in the grade of a street. There the court said:

The title company is not responsible to plaintiffs for the damages incurred by reason of the change in elevating the abutting street to its legal grade, since the provisions of the standard title insurance policy here in question are concerned with matters affecting title to property and do not concern themselves with physical conditions of the abutting property absent a specific request by the person ordering a title report and policy....

In *McDaniel v. Lawyers' Title Guaranty Fund*, 327 So.2d 852 (Fla. 2 D.C.A. 1976), our sister court of the Second District said:

The man on the street buys a title insurance policy to insure against defects in the record title. The title insurance company is in the business of guaranteeing the insured's title to the extent it is affected by the public records.

In the case here before us, there is no dispute that the public record shows a legal right of access to appellant's property via the platted Viejo Street. The title insurance policy only insured against record title defects and not against physical infirmities of the platted street.

Reversed.

CASE QUESTIONS

1. Do you think that the seller (or the seller's agent) actually took the Barroweses to see the property when it was underwater? Why or why not?
2. Before buying, should the Barroweses have actually gone to the property to see for themselves "the lay of the land" or made inquiries of neighboring lot owners?
3. Assuming that they did not make inspection of the property or make other inquiries, do you think the seller or the seller's agent made any misrepresentations about the property that would give the Barroweses any remedies in law or equity?

Delivery of a Deed

Havens v. Schoen

108 Mich. App. 758; 310 N.W.2d 870 (Mich. App. 1981)

[Norma Anderson Havens, the owner of certain farm property in Marlette, Michigan, in contemplation of her death executed a quit-claim deed to the property to her only daughter, Linda Karen Anderson. The deed was subsequently recorded. Subsequently, Linda Karen Anderson married and became Linda Karen Adams and died. Thereafter, Norma Anderson Havens and Norman William Scholz, a nephew of Havens who has an interest in the property as the beneficiary of a trust, brought a

suit in Sanilac Circuit Court against Ernest E. Schoen, Administrator of the estate of Linda Karen Adams, deceased, and other heirs of James W. Anderson, the ex-husband of Norma Anderson Havens, seeking to set aside the deed or to impose a constructive trust on the farm property which was the subject of the deed. Arthur E. Moore, J., found no cause of action and entered judgment for defendants. The plaintiffs appeal alleging error because there never was a delivery of the deed or an intent by Havens to then presently and unconditionally convey an interest in the property.]

PER CURIAM.

In 1962, plaintiff Dr. [Norma Anderson] Havens purchased the Scholz family farm from the estate of her twin brother, Norman Scholz. She gave a deed of trust to her other brother Earl Scholz in 1964, naming her daughter Linda Karen Adams as the principal beneficiary. In 1969, she filed suit against Earl and Inez Scholz and, in settlement of that suit, the property was conveyed to Dr. Havens and her daughter, now deceased. On August 13, 1969, Dr. Havens executed a quit-claim deed to her daughter of her remaining interest in the farm. It is this deed which Dr. Havens wishes to set aside.

The trial court found that plaintiffs failed to meet the burden of proving an invalid conveyance. Plaintiffs claim that there was never a delivery or an intent to presently and unconditionally convey an interest in the property to the daughter. The deed was recorded but defendants presented no other evidence to prove delivery. The recording of a deed raises a presumption of delivery. *Hooker v Tucker*, 335 Mich 429, 434; 56 NW2d 246 (1953). The only effect of this presumption is to cast upon the opposite party the burden of moving forward with the evidence. *Hooker v Tucker, supra*. The burden of proving delivery by a preponderance of the evidence remains with the party relying on the deed. *Camp v Guaranty Trust Co*, 262 Mich 223, 226; 247 NW 162 (1933). Acknowledging that the deed was recorded, plaintiffs presented substantial evidence showing no delivery and no intent to presently and unconditionally convey an interest in the property. The deed, after recording, was returned to Dr. Havens. She continued to manage the farm and pay all expenses for it. When asked about renting the farm, the daughter told a witness to ask her mother. Plaintiffs presented sufficient evidence to dispel the presumption. We find that the trial court erred when it stated that plaintiffs had the burden of proof on all issues. The defendants had the burden of proving delivery and requisite intent.

In *Haasjes v Woldring*, 10 Mich App 100; 158 NW2d 777 (1968), *leave denied* 381 Mich 756 (1968), two grandparents executed a deed to property to two grandchildren. The grandparents continued to live on the property, pay taxes on it and subsequent to the execution of the deed they made statements which this Court found

inconsistent with a prior transfer of property. These circumstances combined with the fact that the deed was not placed beyond the grantors' control led the *Haasjes* Court to conclude that a valid transfer of title had not been effected. The *Haasjes* Court, citing *Wandel v Wandel*, 336 Mich 126; 57 NW2d 468 (1953), and *Resh v Fox*, 365 Mich 288, 112 NW2d 486 (1961), held that in considering whether there was a present intent to pass title, courts may look to the subsequent acts of the grantor.

This Court reviews *de novo* the determinations of a trial court sitting in an equity case. *Chapman v Chapman*, 31 Mich App 576, 579; 188 NW2d 21 (1971). Having reviewed the evidence presented by the defendants to prove delivery, we find that the defendants failed to meet their burden of proof. Under the circumstances, the recording itself and the language of the deed were not persuasive proof of delivery or intent. Defendants presented no evidence of possession of the deed by anyone but the grantor and presented no evidence showing knowledge of the deed by the grantee. No evidence was presented showing that the daughter was ever aware that she owned the property. The showing made by defendants was inadequate to carry their burden of proof. The deed must be set aside.

Plaintiffs alleged none of the grounds which have traditionally been recognized as justifying the imposition of a constructive trust. See *Chapman v Chapman, supra*. A constructive trust is imposed only when it would be inequitable to do otherwise. *Arndt v Vos*, 83 Mich App 484; 268 NW2d 693 (1978). Although plaintiffs claim relief for a mutual mistake, plaintiffs have presented no facts suggesting a mistake on the part of the grantee. Creation of a constructive trust is not warranted by the facts as found by the trial court. There has been no claim that those findings are erroneous.

We remand to the trial court to enter an order setting aside the August 13, 1969, deed from Norma Anderson Havens to Linda Karen Anderson Adams purporting to convey the interest of Dr. Havens in the farm. The decision of the trial court finding no justification for imposing a trust upon the property is affirmed.

Affirmed in part, reversed in part, and remanded.

DISSENT BY:

MacKenzie, J. (*dissenting*).

I respectfully dissent. The deed was recorded with the knowledge and assent of the grantor, which creates a presumption of delivery. See *Schmidt v Jennings*, 359 Mich 376, 383; 102 NW2d 589 (1960), *Reed v Mack*, 344 Mich 391, 397; 73 NW2d 917 (1955).

Crucial evidence was conflicting and I would disagree that the trial court's findings were clearly erroneous.

In *Reed v Mack*, the Court affirmed the trial court's finding that there had been delivery where the grantor defendant, who had owned the property with her husband, recorded a deed conveying a property jointly to herself and the two other grantees, stating:

"We are in agreement with the trial court. The defendant-appellant, a grantor in the deed, caused the recording of the deed, the delivery of which she attacks. The recording of a warranty deed may, under some circumstances, be effectual to show delivery. A delivery to one of several joint grantees, in absence of proof to the contrary, is delivery to all. *Mayhew v Wilhelm*, 249 Mich 640 [229 NW 459 (1930)]. While placing a deed on record does not in itself necessarily establish delivery, the recording of a deed raises a presumption of delivery, and the whole object of delivery is to indicate an intent by the grantor to give effect to the instrument." [Citations]

In *McMahon v Dorsey*, 353 Mich 623, 626; 91 NW2d 893 (1958), the significance of delivery was characterized as the manifestation of the grantor's intent that the instrument be a completed act.

* * *

The evidence herein indicates that plaintiff Norma Anderson Havens, after she had been told she was dying from cancer, executed a quit-claim deed on August 16, 1969, to her daughter, Linda Karen Anderson. Plaintiff Havens testified that the reason she executed the deed was that she felt "if something should happen to me, at least Karen would be protected". The deed was recorded the same day by plaintiff Havens's attorney. Plaintiff Havens either knew that the deed was recorded then or learned of the recording shortly thereafter. Although plaintiff Havens testified that she intended only a testamentary disposition, she apparently realized that the deed was effective to convey the property immediately because her testimony indicated an intention to execute a trust agreement. Linda Karen lived on the farm for five years after the deed was recorded until her death in 1974, yet plaintiff Havens did not attempt to have Linda Karen deed the farm back to her so she could replace the deed with a trust agreement or a will. Plaintiff Havens testified that she approached her attorneys regarding a trust agreement, but both attorneys denied this. The trial judge specifically found the testimony of the attorneys was convincing and he, of course, had the benefit of observing the witnesses.

Haasjes v Woldring, 10 Mich App 100; 158 NW2d 777 (1968), relied upon by the majority, involved unrecorded deeds which remained in a strongbox under control of the grantors until after their deaths. The grantors continued to live alone on the property and pay taxes thereon. Based on the lack of recording, I find *Haasjes* distinguishable from the present case.

In *Hooker v Tucker*, 335 Mich 429; 56 NW2d 246 (1953), delivery was held not to have occurred where the grantor handed her attorney a copy of a deed containing a legal description of property she wished included in a will to be drawn by him and he subsequently mailed the deed to the grantee without the grantor's knowledge or permission. The purported delivery by mailing being unauthorized distinguishes *Hooker* from this case where there was no indication the recording was done without the grantor's authorization.

The majority relies on the grantee's purported lack of knowledge of the conveyance but the record is not at all clear in this regard. Further, if a deed is beneficial to the grantee, its acceptance is presumed. *Tackaberry v Monteith*, 295 Mich 487, 493; 295 NW 236 (1940), see also *Holmes v McDonald*, 119 Mich 563; 78 NW 647 (1899). While the burden of proving delivery is on the person relying upon the instrument, the burden shifts upon its recordation so that the grantor must go forward with the evidence of showing nondelivery, once recordation and beneficial interest have been shown. *Hooker v Tucker*, *supra*, and *Tackaberry*, *supra*. The trial court properly found that plaintiffs failed to go forward with the evidence and found that the deed conveyed title to the farm.

Factually, this is a difficult case because plaintiff Havens executed a deed which she intended to be a valid conveyance at the time it was executed and recorded. Subsequently, when her daughter unexpectedly predeceased her, the deed created a result she had not foreseen. She seeks to eradicate the unintended *result* by this litigation.

I am reluctant to set aside an unambiguous conveyance which was on record and unchallenged for five years on the basis of the self-serving testimony of the grantor as to her intent at the time she executed the deed and authorized its recordation.

I would affirm.

CASE QUESTION

1. Which opinion, the majority or the dissenting opinion, do you agree with, and why?

34.5 Summary and Exercises

Summary

Real property can be held in various forms of ownership. The most common forms are tenancy in common, joint tenancy, and tenancy by the entirety. Ten states recognize the community property form of ownership.

In selling real property, various common-law and statutory provisions come into play. Among the more important statutory provisions are the Civil Rights Acts of 1866 and 1968. These laws control the manner in which property may be listed and prohibit discrimination in sales. Sellers and buyers must also be mindful of contract and agency principles governing the listing agreement. Whether the real estate broker has an exclusive right to sell, an exclusive agency, or an open listing will have an important bearing on the fee to which the broker will be entitled when the property is sold.

The Statute of Frauds requires contracts for the sale of real property to be in writing. Such contracts must include the names of buyers and sellers, a description of the property, the price, and signatures. Unless the contract states otherwise, the seller must deliver marketable title, and the buyer will bear the loss if the property is damaged after the contract is signed but before the closing. The seller will usually insist on being paid earnest money, and the buyer will usually protect himself contractually against certain contingencies, such as failure to obtain financing. The contract should also specify the type of deed to be given to the buyer.

To provide protection to subsequent buyers, most states have enacted recording statutes that require buyers to record their purchases in a county office. The statutes vary: which of two purchasers will prevail depends on whether the state has a notice, notice-race, or race statute. To protect themselves, buyers usually purchase an abstract and opinion or title insurance. Although sale is the usual method of acquiring real property, it is possible to take legal title without the consent of the owner. That method is adverse possession, by which one who openly, continuously, and exclusively possesses property and asserts his right to do so in a manner hostile to the interest of the owner will take title in twenty years in most states.

EXERCISES

1. Rufus enters into a contract to purchase the Brooklyn Bridge from Sharpy. The contract provides that Sharpy is to give Rufus a quitclaim deed at the closing. After the closing, Rufus learns that Sharpy did not own the bridge and sues him for violating the terms of the deed. What is the result? Why?
2. Pancho and Cisco decide to purchase ten acres of real estate. Pancho is to provide 75 percent of the purchase price, Cisco the other 25 percent. They want to use either a joint tenancy or tenancy in common form of ownership. What do you recommend? Why?
3. Suppose in Exercise 2 that a friend recommends that Pancho and Cisco use a tenancy by the entirety. Would this form of ownership be appropriate? Why?
4. Richard and Elizabeth, a married couple, live in a community property state. During their marriage, they save \$500,000 from Elizabeth's earnings. Richard does not work, but during the marriage, he inherits \$500,000. If Richard and Elizabeth are divorced, how will their property be divided? Why?
5. Jack wants to sell his house. He hires Walter, a real estate broker, to sell the house and signs an exclusive-right-to-sell listing agreement. Walter finds a buyer, who signs a sales contract with Jack. However, the buyer later refuses to perform the contract because he cannot obtain financing. Does Jack owe a commission to Walter? Why?
6. Suppose in Exercise 5 that Jack found the buyer, the buyer obtained financing, and the sale was completed. Does Jack owe a commission to Walter, who provided no assistance in finding the buyer and closing the deal? Why?
7. Suppose in Exercise 5 that Jack's house is destroyed by fire before the closing. Who bears the loss—Jack or the buyer? Must Jack pay a commission to Walter? Why?
8. Suppose in Exercise 5 that the buyer paid \$15,000 in earnest money when the contract was signed. Must Jack return the earnest money when the buyer learns that financing is unavailable? Why?

SELF-TEST QUESTIONS

1. A contract for a sale of property must include
 - a. a description of the property
 - b. price
 - c. signatures of buyer and seller
 - d. all of the above

2. If real property is damaged after a contract for sale is signed but before closing, it is generally true that the party bearing the loss is
 - a. the seller
 - b. the buyer
 - c. both parties, who split the loss evenly
 - d. none of the above

3. The following deeds extend warranties to the buyer:
 - a. quitclaim and special warranty
 - b. quitclaim and general warranty
 - c. general and special warranty
 - d. all of the above

4. Under a notice-race statute,
 - a. whoever records first is given title, regardless of the good faith of the purchaser
 - b. whoever records first and is a bona fide purchaser is given title
 - c. either of the above may be acceptable
 - d. none of the above is acceptable

5. The elements of adverse possession do not include
 - a. actual possession
 - b. open and notorious use
 - c. consent of the owner
 - d. continuous possession

SELF-TEST ANSWERS

1. d
2. b
3. c
4. b
5. c

Chapter 35

Landlord and Tenant Law

LEARNING OBJECTIVES

After reading this chapter, you should understand the following:

1. The various types of leasehold estates
2. How leasehold states are created and extended
3. The rights and duties of landlords
4. The rights and duties of tenants
5. The potential tort liability of landlords

35.1 Types and Creation of Leasehold Estates

LEARNING OBJECTIVES

1. Distinguish between the different types of leasehold estates.
2. Describe how leasehold states can be created, both orally and in writing, and the requirements for creating leases that last for more than one year.

In Chapter 33 "The Nature and Regulation of Real Estate and the Environment", we noted that real property can be divided into types of interests: freehold estates and leasehold estates. The freehold estate is characterized by indefinite duration, and the owner has title and the right to possess. The **leasehold estate**¹, by contrast, lasts for a specific period. The owner of the leasehold estate—the tenant—may take possession but does not have title to the underlying real property. When the period of the leasehold ends, the right to possession reverts to the landlord—hence the landlord’s interest during the tenant’s possession is known as a **reversionary interest**. Although a leasehold estate is said to be an interest in real property, the leasehold itself is in fact personal property. The law recognizes three types of leasehold estates: the estate for years, the periodic tenancy, and the tenancy at will.

Types of Leasehold Estates

Estate for Years

The **estate for years**² is characterized by a definite beginning and a definite end. When you rent an apartment for two years, beginning September 1 and ending on the second August 31, you are the owner of an estate for years. Virtually any period will do; although it is called an estate “for years,” it can last but one day or extend one thousand years or more. Some statutes declare that any estate for years longer than a specified period—one hundred years in Massachusetts, for instance—is a fee simple estate.

1. An estate whose termination date is usually known—a one-year lease, for example.
2. A leasehold in which the tenant has possession for a fixed term.
3. The agreement that creates the leasehold interest.

Unless the **lease**³—the agreement creating the leasehold interest—provides otherwise, the estate for years terminates automatically at midnight of the last day specified in the lease. The lease need not refer explicitly to calendar dates. It could provide that “the tenant may occupy the premises for six months to commence one week from the date of signing.” Suppose the landlord and tenant sign on June 23. Then the lease term begins at 12:00 a.m. on July 1 and ends just before midnight of December 31. Unless a statute provides otherwise, the landlord is not obligated to

send the tenant a notice of termination. Should the tenant die before the lease term ends, her property interest can be inherited under her will along with her other personal property or in accordance with the laws of intestate succession.

Periodic Tenancy

As its name implies, a **periodic tenancy**⁴ lasts for a period that is renewed automatically until either landlord or tenant notifies the other that it will end. The periodic tenancy is sometimes called an estate from year to year (or month to month, or week to week). The lease may provide explicitly for the periodic tenancy by specifying that at the expiration of, say, a one-year lease, it will be deemed renewed for another year unless one party notifies the other to the contrary within six months prior to the expiration of the term. Or the periodic tenancy may be created by implication, if the lease fails to state a term or is defective in some other way, but the tenant takes possession and pays rent. The usual method of creating a periodic tenancy occurs when the tenant remains on the premises (“holds over”) when an estate for years under a lease has ended. The landlord may either reject or accept the implied offer by the tenant to rent under a periodic tenancy. If he rejects the implied offer, the tenant may be ejected, and the landlord is entitled to rent for the holdover period. If he accepts the offer, the original lease determines the rent and length of the renewable period, except that no periodic tenancy may last longer than from year to year—that is, the renewable period may never be any longer than twelve months.

At common law, a party was required to give notice at least six months prior to the end of a year-to-year tenancy, and notice equal to the term for any other periodic tenancy. In most states today, the time period for giving notice is regulated by statute. In most instances, a year-to-year tenancy requires a month’s notice, and shorter tenancies require notice equal to the term. To illustrate the approach typically used, suppose Simone rents from Anita on a month-to-month tenancy beginning September 15. On March 30, Simone passes the orals for her doctorate and decides to leave town. How soon may she cancel her tenancy? If she calls Anita that afternoon, she will be two weeks shy of a full month’s notice for the period ending April 15, so the earliest she can finish her obligation to pay rent is May 15. Suppose her term had been from the first of each month. On April 1, she notifies Anita of her intention to leave at the end of April, but she is stuck until the end of May, because notice on the first of the month is not notice for a full month. She would have had to notify Anita by March 31 to terminate the tenancy by April 30.

4. A tenancy for a period of time that is renewed automatically until either landlord or tenant notifies the other that it will end.

5. A tenancy that will last only so long as the landlord and tenant desire.

Tenancy at Will

If the landlord and tenant agree that the lease will last only as long as both want it to, then they have created a **tenancy at will**⁵. Statutes in most states require some

notice of intention to terminate. Simone comes to the university to study, and Anita gives her a room to stay in for free. The arrangement is a tenancy at will, and it will continue as long as both want it to. One Friday night, after dinner with classmates, Simone decides she would rather move in with Bob. She goes back to her apartment, packs her suitcase, and tells Anita she's leaving. The tenancy at will terminates that day.

Creation of Leasehold Estates

Oral Leases

Leases can be created orally, unless the term of the lease exceeds the period specified by the Statute of Frauds. In most states, that period is one year. Any oral lease for a period longer than the statutory period is invalid. Suppose that Simone, in a state with a one-year Statute of Frauds period, orally agrees with Anita to rent Anita's apartment for two years, at a monthly rent of \$250. The lease is invalid, and either could repudiate it.

Written Leases

A lease required to be in writing under the Statute of Frauds must contain the following items or provisions: (1) it must identify the parties, (2) it must identify the premises, (3) it must specify the duration of the lease, (4) it must state the rent to be paid, and (5) it must be signed by the party against whom enforcement is sought (known as "the party to be charged").

The provisions need not be perfectly stated. As long as they satisfy the five requirements, they will be adequate to sustain the lease under the Statute of Frauds. For instance, the parties need not necessarily be named in the lease itself. Suppose that the prospective tenant gives the landlord a month's rent in advance and that the landlord gives the tenant a receipt listing the property and the terms of the lease but omitting the name of the tenant. The landlord subsequently refuses to let the tenant move in. Who would prevail in court? Since the tenant had the receipt in her possession, that would be sufficient to identify her as the tenant to whom the terms of the lease were meant to apply. Likewise, the lease need not specify every aspect of the premises to be enjoyed. Thus the tenant who rents an apartment in a building will be entitled to the use of the common stairway, the roof, and so on, even though the lease is silent on these points. And as long as a specific amount is ascertainable, the rent may be stated in other than absolute dollar terms. For example, it could be expressed in terms of a cost-of-living index or as a percentage of the tenant's dollar business volume.

KEY TAKEAWAY

A leasehold estate, unlike a freehold estate, has a definite duration. The landlord's interest during the term of a leasehold estate is a reversionary interest. Leasehold estates can last for short terms or very long terms; in the case of long-term leases, a property right is created that can be passed to heirs. The usual landlord-tenant relationship is a periodic tenancy, which carries with it various common-law and statutory qualifications regarding renewal and termination. In a tenancy at will, either landlord or tenant can end the leasehold estate as soon as notice is provided by either party.

EXERCISES

1. What is the difference between a periodic tenancy and a tenancy at will?
2. What are the essential terms that must be in a written lease?

35.2 Rights and Duties of Landlords and Tenants

LEARNING OBJECTIVES

1. Itemize and explain the rights and duties of landlords.
2. List and describe the rights and duties of tenants.
3. Understand the available remedies for tenants when a landlord is in breach of his or her duties.

Rights and Duties of Landlords

The law imposes a number of duties on the landlord and gives the tenant a number of corresponding rights. These include (1) possession, (2) habitable condition, and (3) noninterference with use.

Possession

The landlord must give the tenant the right of possession of the property. This duty is breached if, at the time the tenant is entitled to take possession, a third party has paramount title to the property and the assertion of this title would deprive the tenant of the use contemplated by the parties. **Paramount title**⁶ means any legal interest in the premises that is not terminable at the will of the landlord or at the time the tenant is entitled to take possession.

If the tenant has already taken possession and then discovers the paramount title, or if the paramount title only then comes into existence, the landlord is not automatically in breach. However, if the tenant thereafter is evicted from the premises and thus deprived of the property, then the landlord is in breach. Suppose the landlord rents a house to a doctor for ten years, knowing that the doctor intends to open a medical office in part of the home and knowing also that the lot is restricted to residential uses only. The doctor moves in. The landlord is not yet in default. The landlord will be in default if a neighbor obtains an injunction against maintaining the office. But if the landlord did not know (and could not reasonably have known) that the doctor intended to use his home for an office, then the landlord would not be in default under the lease, since the property could have been put to normal—that is, residential—use without jeopardizing the tenant’s right to possession.

6. Superior title.

Warranty of Habitability

As applied to leases, the old common-law doctrine of **caveat emptor**⁷ said that once the tenant has signed the lease, she must take the premises as she finds them. Since she could inspect them before signing the lease, she should not complain later. Moreover, if hidden defects come to light, they ought to be easy enough for the tenant herself to fix. Today this rule no longer applies, at least to residential rentals. Unless the parties specifically agree otherwise, the landlord is in breach of his lease if the conditions are unsuitable for residential use when the tenant is due to move in. The landlord is held to an **implied warranty of habitability**⁸.

The change in the rule is due in part to the conditions of the modern urban setting: tenants have little or no power to walk away from an available apartment in areas where housing is scarce. It is also due to modern construction and technology: few tenants are capable of fixing most types of defects. A US court of appeals has said the following:

Today's urban tenants, the vast majority of whom live in multiple dwelling houses, are interested not in the land, but solely in "a house suitable for occupation." Furthermore, today's city dweller usually has a single, specialized skill unrelated to maintenance work; he is unable to make repairs like the "jack-of-all-trades" farmer who was the common law's model of the lessee. Further, unlike his agrarian predecessor who often remained on one piece of land for his entire life, urban tenants today are more mobile than ever before. A tenant's tenure in a specific apartment will often not be sufficient to justify efforts at repairs. In addition, the increasing complexity of today's dwellings renders them much more difficult to repair than the structures of earlier times. In a multiple dwelling, repairs may require access to equipment and areas in control of the landlord. Low and middle income tenants, even if they were interested in making repairs, would be unable to obtain financing for major repairs since they have no long-term interest in the property. *Javins v. First National Realty Corp.*, 428 F.2d 1071, 1078-79 (D.C. Cir.), *cert. denied*, 400 U.S. 925 (1970).

At common law, the landlord was not responsible if the premises became unsuitable once the tenant moved in. This rule was often harshly applied, even for unsuitable conditions caused by a sudden act of God, such as a tornado. Even if the premises collapsed, the tenant would be liable to pay the rent for the duration of the lease. Today, however, many states have statutorily abolished the tenant's obligation to pay the rent if a non-man-made force renders the premises unsuitable. Moreover, most states today impose on the landlord, after the tenant has moved in, the responsibility for maintaining the premises in a safe, livable condition, consistent with the safety, health, and housing codes of the jurisdiction.

7. "Let the buyer beware." At common law, once the tenant has signed the lease, she must take the premises as she finds them.

8. The landlord's duty to provide conditions suitable for residential use.

These rules apply only in the absence of an express agreement between the parties. The landlord and tenant may allocate in the lease the responsibility for repairs and maintenance. But it is unlikely that any court would enforce a lease provision waiving the landlord's implied warranty of habitability for residential apartments, especially in areas where housing is relatively scarce.

Noninterference with Use

In addition to maintaining the premises in a physically suitable manner, the landlord has an obligation to the tenant not to interfere with a permissible use of the premises. Suppose Simone moves into a building with several apartments. One of the other tenants consistently plays music late in the evening, causing Simone to lose sleep. She complains to the landlord, who has a provision in the lease permitting him to terminate the lease of any tenant who persists in disturbing other tenants. If the landlord does nothing after Simone has notified him of the disturbance, he will be in breach. This right to be free of interference with permissible uses is sometimes said to arise from the landlord's implied **covenant of quiet enjoyment**⁹.

Tenant's Remedies

When the landlord breaches one of the foregoing duties, the tenant has a choice of three basic remedies: **termination**¹⁰, damages, or rent adjustment.

In virtually all cases where the landlord breaches, the tenant may terminate the lease, thus ending her obligation to continue to pay rent. To terminate, the tenant must (1) actually vacate the premises during the time that she is entitled to terminate and (2) either comply with lease provisions governing the method of terminating or else take reasonable steps to ensure that the landlord knows she has terminated and why.

9. An implied right in most leases—the right to be free of interference with permissible uses.

10. A remedy for a tenant, but requiring notice to the landlord and compliance with previously agreed on terms or statutory requirements for terminating the leasehold estate.

11. Conditions that interfere substantially enough with the tenant's permissible use that it is tantamount to eviction.

When the landlord physically deprives the tenant of possession, he has evicted the tenant; wrongful eviction permits the tenant to terminate the lease. Even if the landlord's conduct falls short of actual eviction, it may interfere substantially enough with the tenant's permissible use so that they are tantamount to eviction. This is known as **constructive eviction**¹¹, and it covers a wide variety of actions by both the landlord and those whose conduct is attributable to him, as illustrated by *Fidelity Mutual Life Insurance Co. v Kaminsky*, (see [Section 35.5.1 "Constructive Eviction"](#)).

Damages

Another traditional remedy is money damages, available whenever termination is an appropriate remedy. Damages may be sought after termination or as an alternative to termination. Suppose that after the landlord had refused Simone's request to repair the electrical system, Simone hired a contractor to do the job. The cost of the repair work would be recoverable from the landlord. Other recoverable costs can include the expense of relocating if the lease is terminated, moving costs, expenses connected with finding new premises, and any increase in rent over the period of the terminated lease for comparable new space. A business may recover the loss of anticipated business profits, but only if the extent of the loss is established with reasonable certainty. In the case of most new businesses, it would be almost impossible to prove loss of profits.

In all cases, the tenant's recovery will be limited to damages that would have been incurred by a tenant who took all reasonable steps to mitigate losses. That is, the tenant must take reasonable steps to prevent losses attributable to the landlord's breach, to find new space if terminating, to move efficiently, and so on.

Rent Remedies

Under an old common-law rule, the landlord's obligation to provide the tenant with habitable space and the tenant's obligation to pay rent were **independent covenants**¹². If the landlord breached, the tenant was still legally bound to pay the rent; her only remedies were termination and suit for damages. But these are often difficult remedies for the tenant. Termination means the aggravation of moving, assuming that new quarters can be found, and a suit for damages is time consuming, uncertain, and expensive. The obvious solution is to permit the tenant to withhold rent, or what we here call **rent adjustment**¹³. The modern rule, adopted in several states (but not yet in most), holds that the mutual obligations of landlord and tenant are dependent. States following this approach have developed three types of remedies: rent withholding, rent application, and rent abatement.

The simplest approach is for the tenant to withhold the rent until the landlord remedies the defect. In some states, the tenant may keep the money. In other states, the rent must be paid each month into an escrow account or to the court, and the money in the escrow account becomes payable to the landlord when the default is cured.

Several state statutes permit the tenant to apply the rent money directly to remedy the defect or otherwise satisfy the landlord's performance. Thus Simone might have

12. Under an old common-law rule, the landlord's obligation to provide the tenant with habitable space and the tenant's obligation to pay rent.

13. One remedy among several for tenants where the landlord has breached one or more duties. Rent adjustment may involve withholding the rent until the landlord complies, depositing payments in escrow, or applying withheld rent to the problem that the landlord has not fixed.

deducted from her rent the reasonable cost of hiring an electrician to repair the electrical system.

In some states, the rent may be reduced or even eliminated if the landlord fails to cure specific types of defects, such as violations of the housing code. The abatement will continue until the default is eliminated or the lease is terminated.

Rights and Duties of Tenants

In addition to the duties of the tenant set forth in the lease itself, the common law imposes three other obligations: (1) to pay the rent reserved (stated) in the lease, (2) to refrain from committing waste (damage), and (3) not to use the premises for an illegal purpose.

Duty to Pay Rent

What constitutes rent is not necessarily limited to the stated periodic payment usually denominated “rent.” The tenant may also be responsible for such assessments as taxes and utilities, payable to the landlord as rent. Simone’s lease calls for her to pay taxes of \$500 per year, payable in quarterly installments. She pays the rent on the first of each month and the first tax bill on January 1. On April 1, she pays the rent but defaults on the next tax bill. She has failed to pay the rent reserved in the lease.

The landlord in the majority of states is not obligated to mitigate his losses should the tenant abandon the property and fail thereafter to pay the rent. As a practical matter, this means that the landlord need not try to rent out the property but instead can let it sit vacant and sue the defaulting tenant for the balance of the rent as it becomes due. However, the tenant might notify the landlord that she has abandoned the property or is about to abandon it and offer to surrender it. If the landlord accepts the surrender, the lease then terminates. Unless the lease specifically provides for it, a landlord who accepts the surrender will not be able to recover from the tenant the difference between the amount of her rent obligation and the new tenant’s rent obligation.

Many leases require the tenant to make a **security deposit**¹⁴—a payment of a specific sum of money to secure the tenant’s performance of duties under the lease. If the tenant fails to pay the rent or otherwise defaults, the landlord may use the money to make good the tenant’s performance. Whatever portion of the money is not used to satisfy the tenant’s obligations must be repaid to the tenant at the end of the lease. In the absence of an agreement to the contrary, the landlord must pay

14. A payment of a specific sum of money to secure the tenant’s performance of duties under the lease.

interest on the security deposit when he returns the sum to the tenant at the end of the lease.

Alteration and Restoration of the Premises

In the absence of a specific agreement in the lease, the tenant is entitled to physically change the premises in order to make the best possible permissible use of the property, but she may not make structural alterations or damage (waste) the property. A residential tenant may add telephone lines, put up pictures, and affix bookshelves to the walls, but she may not remove a wall in order to enlarge a room.

The tenant must restore the property to its original condition when the lease ends, but this requirement does not include normal wear and tear. Simone rents an apartment with newly polished wooden floors. Because she likes the look of oak, she decides against covering the floors with rugs. In a few months' time, the floors lose their polish and become scuffed. Simone is not obligated to refinish the floors, because the scuffing came from normal walking, which is ordinary wear and tear.

Use of the Property for an Illegal Purpose

It is a breach of the tenant's obligation to use the property for an illegal purpose. A landlord who found a tenant running a numbers racket, for example, or making and selling moonshine whisky could rightfully evict her.

Landlord's Remedies

In general, when the tenant breaches any of the three duties imposed by the common law, the landlord may terminate the lease and seek damages. One common situation deserves special mention: the holdover tenant. When a tenant improperly overstays her lease, she is said to be a **tenant at sufferance**¹⁵, meaning that she is liable to eviction. Some cultures, like the Japanese, exhibit a considerable bias toward the tenant, making it exceedingly difficult to move out holdover tenants who decide to stay. But in the United States, landlords may remove tenants through summary (speedy) proceedings available in every state or, in some cases, through **self-help**¹⁶. Self-help is a statutory remedy for landlords or incoming tenants in some states and involves the peaceful removal of a holdover tenant's belongings. If a state has a statute providing a summary procedure for removing a holdover tenant, neither the landlord nor the incoming tenant may resort to self-help, unless the statute specifically allows it. A provision in the lease permitting self-help in the absence of statutory authority is unenforceable. Self-help must be peaceful, must not cause physical harm or even the expectation of harm to the tenant or anyone on the premises with his permission, and must not result in unreasonable damage

15. When a tenant improperly overstays his or her lease.
16. Entering the premises to regain possession and remove a holdover tenant's belongings—must be peaceful, must not cause physical harm or even convey the expectation of harm to the tenant or anyone on the premises with the tenant's permission, and must not result in unreasonable damage to the tenant's property.

to the tenant's property. Any clause in the lease attempting to waive these conditions is void.

Self-help can be risky, because some summary proceeding statutes declare it to be a criminal act and because it can subject the landlord to tort liability. Suppose that Simone improperly holds over in her apartment. With a new tenant scheduled to arrive in two days, the landlord knocks on her door the evening after her lease expires. When Simone opens the door, she sees the landlord standing between two 450-pound Sumo wrestlers with menacing expressions. He demands that she leave immediately. Fearing for her safety, she departs instantly. Since she had a reasonable expectation of harm had she not complied with the landlord's demand, Simone would be entitled to recover damages in a tort suit against her landlord, although she would not be entitled to regain possession of the apartment.

Besides summary judicial proceedings and self-help, the landlord has another possible remedy against the holdover tenant: to impose another rental term. In order to extend the lease in this manner, the landlord need simply notify the holdover tenant that she is being held to another term, usually measured by the periodic nature of the rent payment. For example, if rent was paid each month, then imposition of a new term results in a month-to-month tenancy. One year is the maximum tenancy that the landlord can create by electing to hold the tenant to another term.

KEY TAKEAWAY

Both landlords and tenants have rights and duties. The primary duty of a landlord is to meet the implied warranty of habitability: that the premises are in a safe, livable condition. The tenant has various remedies available if the landlord fails to meet that duty, or if the landlord fails to meet the implied covenant of quiet enjoyment. These include termination, damages, and withholding of rent. The tenant has duties as well: to pay the rent, refrain from committing waste, and not use the property for an illegal purpose.

EXERCISES

1. Consistent with the landlord's implied warranty of habitability, can the landlord and tenant agree in a lease that the tenant bear any and all expenses to repair the refrigerator, the stove, and the microwave?
2. Under what conditions is it proper for a tenant to withhold rent from the landlord?

35.3 Transfer of Landlord's or Tenant's Interest

LEARNING OBJECTIVES

1. Explain how the landlord's reversionary interest works and how it may be assigned.
2. Describe the two ways in which a tenant's leasehold interest may be transferred to another party.

General Rule

At common law, the interests of the landlord and tenant may be transferred freely unless (1) the tenancy is at will; (2) the lease requires either party to perform significant personal services, which would be substantially less likely to be performed if the interest was transferred; or (3) the parties agree that the interest may not be transferred.

Landlord's Interest

When the landlord sells his interest, the purchaser takes subject to the lease. If there are tenants with leases in an apartment building, the new landlord may not evict them simply because he has taken title. The landlord may divide his interest as he sees fit, transferring all or only part of his entire interest in the property. He may assign his right to the rent or sell his reversionary interest in the premises. For instance, Simone takes a three-year lease on an apartment near the university. Simone's landlord gives his aged uncle his reversionary interest for life. This means that Simone's landlord is now the uncle, and she must pay him rent and look to him for repairs and other performances owed under the lease. When Simone's lease terminates, the uncle will be entitled to rent the premises. He does so, leasing to another student for three years. One year later, the uncle dies. His nephew (Simone's original landlord) has the reversionary interest and so once again becomes the landlord. He must perform the lease that the uncle agreed to with the new student, but when that lease expires, he will be free to rent the premises as he sees fit.

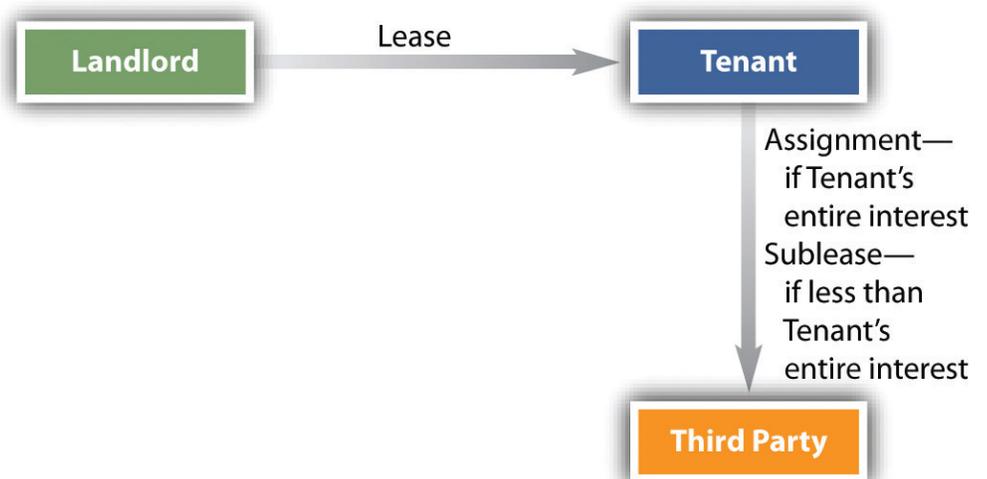

Tenant's Interest

Why would a tenant be interested in transferring her leasehold interest? For at least two reasons: she might need to move before her lease expired, or she might be

able to make money on the leasehold itself. In recent years, many companies in New York have discovered that their present leases were worth far more to them by moving out than staying in. They had signed long-term leases years ago when the real estate market was glutted and were paying far less than current market prices. By subletting the premises and moving to cheaper quarters, they could pocket the difference between their lease rate and the market rate they charged their subtenants.

The tenant can transfer her interest in the lease by assigning or by subletting. In an **assignment**¹⁷, the tenant transfers all interest in the premises and all obligations. Thus the assignee-tenant is duty bound to pay the landlord the periodic rental and to perform all other provisions in the lease. If the assignee defaulted, however, the original tenant would remain liable to the landlord. In short, with an assignment, both assignor and assignee are liable under the lease unless the landlord releases the assignor. By contrast, a **sublease**¹⁸ is a transfer of something less than the entire leasehold interest (see [Figure 35.1 "Assignment vs. Sublease"](#)). For instance, the tenant might have five years remaining on her lease and sublet the premises for two years, or she might sublet the ground floor of a four-story building. Unlike an assignee, the subtenant does not step into the shoes of the tenant and is not liable to the landlord for performance of the tenant's duties. The subtenant's only obligations are to the tenant. What distinguishes the assignment from the sublease is not the name but whether or not the entire leasehold interest has been transferred. If not, the transfer is a sublease.

Figure 35.1 Assignment vs. Sublease

17. The tenant transfers all interest in the premises, along with all obligations.

18. A transfer of something less than the entire leasehold interest.

Many landlords include clauses in their leases prohibiting assignments or subleases, and these clauses are generally upheld. But the courts construe them strictly, so that a provision barring subleases will not be interpreted to bar assignments.

KEY TAKEAWAY

The interests of landlords and tenants can be freely transferred unless the parties agree otherwise or unless there is a tenancy at will. If the tenant assigns her leasehold interest, she remains liable under the lease unless the landlord releases her. If less than the entire leasehold interest is transferred, it is a sublease rather than an assignment. But the original lease may prohibit either or both.

EXERCISES

1. What is the difference between an assignment and a sublease?
2. Are the duties of the tenant any different if the reversionary interest is assigned? Suppose that Simone is in year one of a three-year lease and that Harry is the landlord. If Harry assigns his reversionary interest to Louise, can Louise raise the rent for the next two years beyond what is stated in the original lease?

35.4 Landlord's Tort Liability

LEARNING OBJECTIVES

1. State the general common-law rule as to the liability of the landlord for injuries occurring on the leased premises.
2. State the exceptions to the general rule, and explain the modern trend toward increased liability of the landlord.

In Chapter 33 "The Nature and Regulation of Real Estate and the Environment", we discussed the tort liability of the owner or occupier of real estate to persons injured on the property. As a general rule, when injury occurs on premises rented to a tenant, it is the tenant—an occupier—who is liable. The reason for this rule seems clear: The landlord has given up all but a reversionary interest in the property; he has no further control over the premises. Indeed, he is not even permitted on the property without the tenant's permission. But over the years, certain exceptions have developed to the rule that the landlord is not liable. The primary reason for this change is the recognition that the landlord is better able to pay for repairs to his property than his relatively poorer tenants and that he has ultimate control over the general conditions surrounding the apartment or apartment complex.

Exceptions to the General Rule Hidden Dangers Known to Landlord

The landlord is liable to the tenant, her family, or guests who are injured by hidden and dangerous conditions that the landlord knew about or should have known about but failed to disclose to the tenant.

Dangers to People off the Premises

The landlord is liable to people injured outside the property by defects that existed when the lease was signed. Simone rents a dilapidated house and agrees with the landlord to keep the building repaired. She neglects to hire contractors to repair the cracked and sagging wall on the street. The building soon collapses, crushing several automobiles parked alongside. Simone can be held responsible and so can the landlord; the tenant's contractual agreement to maintain the property is not sufficient to shift the liability away from the landlord. In a few cases, the landlord has even been held liable for activities carried on by the tenant, but only because he

knew about them when the lease was signed and should have known that the injuries were probable results.

Premises Leased for Admitting the Public

A landlord is responsible for injuries caused by dangerous conditions on property to be used by the public if the danger existed when the lease was made. Thus an uneven floor that might cause people to trip or a defective elevator that stops a few inches below the level of each floor would be sufficiently dangerous to pin liability on the landlord.

Landlord Retaining Control of Premises

Frequently, a landlord will retain control over certain areas of the property—for example, the common hallways and stairs in an apartment building. When injuries occur as a result of faulty and careless maintenance of these areas, the landlord will be responsible. In more than half the states, the landlord is liable for failure to remove ice and snow from a common walkway and stairs at the entrance. In one case, the tenant even recovered damages for a broken hip caused when she fell in fright from seeing a mouse that jumped out of her stove; she successfully charged the landlord with negligence in failing to prevent mice from entering the dwelling in areas under his control.

Faulty Repair of Premises

Landlords often have a duty to repair the premises. The duty may be statutory or may rest on an agreement in the lease. In either case, the landlord will be liable to a tenant or others for injury resulting from defects that should have been repaired. No less important, a landlord will be liable even if he has no duty to repair but negligently makes repairs that themselves turn out to be dangerous.

KEY TAKEAWAY

At common law, injuries taking place on leased premises were the responsibility of the tenant. There were notable exceptions, including situations where hidden dangers were known to the landlord but not the tenant, where the premises' condition caused injury to people off the premises, or where faulty repairs caused the injuries. The modern trend is to adopt general negligence principles to determine landlord liability. Thus where the landlord does not use reasonable care and subjects others to an unreasonable risk of harm, there may be liability for the landlord. This varies from state to state.

EXERCISES

1. What was the basic logic of the common law in having tenants be responsible for all injuries that took place on leased premises?
2. Does the modern trend of applying general negligence principles to landlords make more sense? Explain your answer.

35.5 Cases

Constructive Eviction

Fidelity Mutual Life Insurance Co. v. Kaminsky

768 S.W.2d 818 (Tx. Ct. App. 1989)

MURPHY, JUSTICE

The issue in this landlord-tenant case is whether sufficient evidence supports the jury's findings that the landlord and appellant, Fidelity Mutual Life Insurance Company ["Fidelity"], constructively evicted the tenant, Robert P. Kaminsky, M.D., P.A. ["Dr. Kaminsky"] by breaching the express covenant of quiet enjoyment contained in the parties' lease. We affirm.

Dr. Kaminsky is a gynecologist whose practice includes performing elective abortions. In May 1983, he executed a lease contract for the rental of approximately 2,861 square feet in the Red Oak Atrium Building for a two-year term which began on June 1, 1983. The terms of the lease required Dr. Kaminsky to use the rented space solely as "an office for the practice of medicine." Fidelity owns the building and hires local companies to manage it. At some time during the lease term, Shelter Commercial Properties ["Shelter"] replaced the Horne Company as managing agents. Fidelity has not disputed either management company's capacity to act as its agent.

The parties agree that: (1) they executed a valid lease agreement; (2) Paragraph 35 of the lease contains an express covenant of quiet enjoyment conditioned on Dr. Kaminsky's paying rent when due, as he did through November 1984; Dr. Kaminsky abandoned the leased premises on or about December 3, 1984 and refused to pay additional rent; anti-abortion protestors began picketing at the building in June of 1984 and repeated and increased their demonstrations outside and inside the building until Dr. Kaminsky abandoned the premises.

When Fidelity sued for the balance due under the lease contract following Dr. Kaminsky's abandonment of the premises, he claimed that Fidelity constructively evicted him by breaching Paragraph 35 of the lease. Fidelity apparently conceded during trial that sufficient proof of the constructive eviction of Dr. Kaminsky would relieve him of his contractual liability for any remaining rent payments.

Accordingly, he assumed the burden of proof and the sole issue submitted to the jury was whether Fidelity breached Paragraph 35 of the lease, which reads as follows:

Quiet Enjoyment

Lessee, on paying the said Rent, and any Additional Rental, shall and may peaceably and quietly have, hold and enjoy the Leased Premises for the said term.

A constructive eviction occurs when the tenant leaves the leased premises due to conduct by the landlord which materially interferes with the tenant's beneficial use of the premises. Texas law relieves the tenant of contractual liability for any remaining rentals due under the lease if he can establish a constructive eviction by the landlord.

The protests took place chiefly on Saturdays, the day Dr. Kaminsky generally scheduled abortions. During the protests, the singing and chanting demonstrators picketed in the building's parking lot and inner lobby and atrium area. They approached patients to speak to them, distributed literature, discouraged patients from entering the building and often accused Dr. Kaminsky of "killing babies." As the protests increased, the demonstrators often occupied the stairs leading to Dr. Kaminsky's office and prevented patients from entering the office by blocking the doorway. Occasionally they succeeded in gaining access to the office waiting room area.

Dr. Kaminsky complained to Fidelity through its managing agents and asked for help in keeping the protestors away, but became increasingly frustrated by a lack of response to his requests. The record shows that no security personnel were present on Saturdays to exclude protestors from the building, although the lease required Fidelity to provide security service on Saturdays. The record also shows that Fidelity's attorneys prepared a written statement to be handed to the protestors soon after Fidelity hired Shelter as its managing agent. The statement tracked TEX. PENAL CODE ANN. §30.05 (Vernon Supp. 1989) and generally served to inform trespassers that they risked criminal prosecution by failing to leave if asked to do so. Fidelity's attorneys instructed Shelter's representative to "have several of these letters printed up and be ready to distribute them and verbally demand that these people move on and off the property." The same representative conceded at trial that she did not distribute these notices. Yet when Dr. Kaminsky enlisted the aid of the Sheriff's office, officers refused to ask the protestors to leave without a directive from Fidelity or its agent. Indeed, an attorney had instructed the protestors to remain *unless* the landlord or its representative ordered them to leave. It appears

that Fidelity's only response to the demonstrators was to state, through its agents, that it was aware of Dr. Kaminsky's problems.

Both action and lack of action can constitute "conduct" by the landlord which amounts to a constructive eviction....

This case shows ample instances of Fidelity's failure to act in the face of repeated requests for assistance despite its having expressly covenanted Dr. Kaminsky's quiet enjoyment of the premises. These instances provided a legally sufficient basis for the jury to conclude that Dr. Kaminsky abandoned the leased premises, not because of the trespassing protestors, but because of Fidelity's lack of response to his complaints about the protestors. Under the circumstances, while it is undisputed that Fidelity did not "encourage" the demonstrators, its conduct essentially allowed them to continue to trespass.

[The trial court judgment is affirmed.]

CASE QUESTIONS

A constructive eviction occurs when the tenant leaves the leased premises because of conduct by the landlord that materially interferes with the tenant's beneficial use of the premises.

1. At the trial, who concluded that Fidelity's "conduct" constituted constructive eviction? Is this a question of fact, an interpretation of the contract, or both?
2. How can failure to act constitute "conduct"? What could explain Fidelity's apparent reluctance to give notice to protestors that they might be arrested for trespass?

Landlord's Tort Liability

Stephens v. Stearns

106 Idaho 249; 678 P.2d 41 (Idaho Sup. Ct. 1984)

Donaldson, Chief Justice

Plaintiff-appellant Stephens filed this suit on October 2, 1978, for personal injuries she sustained on July 15, 1977, from a fall on an interior stairway of her apartment. Plaintiff's apartment, located in a Boise apartment complex, was a "townhouse" consisting of two separate floors connected by an internal stairway.

The apartments were built by defendant Koch and sold to defendant Stearns soon after completion in 1973. Defendant Stearns was plaintiff's landlord from the time she moved into the apartment in 1973 through the time of plaintiff's fall on July 15, 1977. Defendant Albanese was the architect who designed and later inspected the apartment complex.

* * *

When viewed in the light most favorable to appellant, the facts are as follows: On the evening of July 15, 1977, Mrs. Stephens went to visit friends. While there she had two drinks. She returned to her apartment a little past 10:00 p.m. Mrs. Stephens turned on the television in the living room and went upstairs to change clothes. After changing her clothes, she attempted to go downstairs to watch television. As Mrs. Stephens reached the top of the stairway, she either slipped or fell forward. She testified that she "grabbed" in order to catch herself. However, Mrs. Stephens was unable to catch herself and she fell to the bottom of the stairs. As a result of the fall, she suffered serious injury. The evidence further showed that the stairway was approximately thirty-six inches wide and did not have a handrail although required by a Boise ordinance.

* * *

In granting defendant Stearns' motion for directed verdict, the trial judge concluded that there was "an absolute lack of evidence" and that "to find a proximate cause between the absence of the handrail and the fall suffered by the plaintiff would be absolutely conjecture and speculation." (Although the trial judge's conclusion referred to "proximate cause," it is apparent that he was referring to factual or actual cause. *See Munson v. State, Department of Highways*, 96 Idaho 529, 531 P.2d 1174 (1975).) We disagree with the conclusion of the trial judge.

We have considered the facts set out above in conjunction with the testimony of Chester Shawver, a Boise architect called as an expert in the field of architecture, that the primary purpose of a handrail is for user safety. We are left with the firm conviction that there is sufficient evidence from which reasonable jurors could have concluded that the absence of a handrail was the actual cause of plaintiff's

injuries; *i.e.*, that plaintiff would not have fallen, or at least would have been able to catch herself, had there been a handrail available for her to grab.

In addition, we do not believe that the jury would have had to rely on conjecture and speculation to find that the absence of the handrail was the actual cause. To the contrary, we believe that reasonable jurors could have drawn legitimate inferences from the evidence presented to determine the issue. This comports with the general rule that the factual issue of causation is for the jury to decide. *McKinley v. Fanning*, 100 Idaho 189, 595 P.2d 1084 (1979); *Munson v. State, Department of Highways, supra*. In addition, courts in several other jurisdictions, when faced with similar factual settings, have held that this issue is a question for the jury.

* * *

Rather than attempt to squeeze the facts of this case into one of the common-law exceptions, plaintiff instead has brought to our attention the modern trend of the law in this area. Under the modern trend, landlords are simply under a duty to exercise reasonable care under the circumstances. The Tennessee Supreme Court had the foresight to grasp this concept many years ago when it stated: "The ground of liability upon the part of a landlord when he demises dangerous property has nothing special to do with the relation of landlord and tenant. It is the ordinary case of liability for personal misfeasance, which runs through all the relations of individuals to each other." *Wilcox v. Hines*, 100 Tenn. 538, 46 S.W. 297, 299 (1898). Seventy-five years later, the Supreme Court of New Hampshire followed the lead of *Wilcox*. *Sargent v. Ross*, 113 N.H. 388, 308 A.2d 528 (1973). The *Sargent* court abrogated the common-law rule and its exceptions, and adopted the reasonable care standard by stating:

We thus bring up to date the other half of landlord-tenant law. Henceforth, landlords as other persons must exercise reasonable care not to subject others to an unreasonable risk of harm....A landlord must act as a reasonable person under all of the circumstances including the likelihood of injury to others, the probable seriousness of such injuries, and the burden of reducing or avoiding the risk.

Id. at 534 [Citations]

Tennessee and New Hampshire are not alone in adopting this rule. As of this date, several other states have also judicially adopted a reasonable care standard for landlords.

* * *

In commenting on the common-law rule, A. James Casner, Reporter of Restatement (Second) of Property—Landlord and Tenant, has stated: “While continuing to pay lip service to the general rule, the courts have expended considerable energy and exercised great ingenuity in attempting to fit various factual settings into the recognized exceptions.” Restatement (Second) of Property—Landlord and Tenant ch. 17 Reporter’s Note to Introductory Note (1977). We believe that the energies of the courts of Idaho should be used in a more productive manner. Therefore, after examining both the common-law rule and the modern trend, we today decide to leave the common-law rule and its exceptions behind, and we adopt the rule that a landlord is under a duty to exercise reasonable care in light of all the circumstances.

We stress that adoption of this rule is not tantamount to making the landlord an insurer for all injury occurring on the premises, but merely constitutes our removal of the landlord’s common-law cloak of immunity. Those questions of hidden danger, public use, control, and duty to repair, which under the common-law were prerequisites to the consideration of the landlord’s negligence, will now be relevant only inasmuch as they pertain to the elements of negligence, such as foreseeability and unreasonableness of the risk. We hold that defendant Stearns did owe a duty to plaintiff Stephens to exercise reasonable care in light of all the circumstances, and that it is for a jury to decide whether that duty was breached. Therefore, we reverse the directed verdict in favor of defendant Stearns and remand for a new trial of plaintiff’s negligence action against defendant Stearns.

CASE QUESTIONS

1. Why should actual cause be a jury question rather than a question that the trial judge decides on her own?
2. Could this case have fit one of the standard exceptions to the common-law rule that injuries on the premises are the responsibility of the tenant?
3. Does it mean anything at all to say, as the court does, that persons (including landlords) must “exercise reasonable care not to subject others to an unreasonable risk of harm?” Is this a rule that gives very much direction to landlords who may wonder what the limit of their liabilities might be?

35.6 Summary and Exercises

Summary

A leasehold is an interest in real property that terminates on a certain date. The leasehold itself is personal property and has three major forms: (1) the estate for years, (2) the periodic tenancy, and (3) the tenancy at will. The estate for years has a definite beginning and end; it need not be measured in years. A periodic tenancy—sometimes known as an estate from year to year or month to month—is renewed automatically until either landlord or tenant notifies the other that it will end. A tenancy at will lasts only as long as both landlord and tenant desire. Oral leases are subject to the Statute of Frauds. In most states, leases to last longer than a year must be in writing, and the lease must identify the parties and the premises, specify the duration, state the rent, and be signed by the party to be charged.

The law imposes on the landlord certain duties toward the tenant and gives the tenant corresponding rights, including the right of possession, habitable condition, and noninterference with use. The right of possession is breached if a third party has paramount title at the time the tenant is due to take possession. In most states, a landlord is obligated to provide the tenant with habitable premises not only when the tenant moves in but also during the entire period of the lease. The landlord must also refrain from interfering with a tenant's permissible use of the premises.

If the landlord breaches an obligation, the tenant has several remedies. He may terminate the lease, recover damages, or (in several states) use a rent-related remedy (by withholding rent, by applying it to remedy the defect, or by abatement).

The tenant has duties also. The tenant must pay the rent. If she abandons the property and fails to pay, most states do not require the landlord to mitigate damages, but several states are moving away from this general rule. The tenant may physically change the property to use it to her best advantage, but she may not make structural alterations or commit waste. The tenant must restore the property to its original condition when the lease ends. This rule does not include normal wear and tear.

Should the tenant breach any of her duties, the landlord may terminate the lease and seek damages. In the case of a holdover tenant, the landlord may elect to hold the tenant to another rental term.

The interest of either landlord or tenant may be transferred freely unless the tenancy is at will, the lease requires either party to perform significant personal services that would be substantially less likely to be performed, or the parties agree that the interest may not be transferred.

Despite the general rule that the tenant is responsible for injuries caused on the premises to outsiders, the landlord may have significant tort liability if (1) there are hidden dangers he knows about, (2) defects that existed at the time the lease was signed injure people off the premises, (3) the premises are rented for public

purposes, (4) the landlord retains control of the premises, or (5) the landlord repairs the premises in a faulty manner.

EXERCISES

1. Lanny orally agrees to rent his house to Tenny for fifteen months, at a monthly rent of \$1,000. Tenny moves in and pays the first month's rent. Lanny now wants to cancel the lease. May he? Why?
2. Suppose in Exercise 1 that Tenny had an option to cancel after one year. Could Lanny cancel before the end of the year? Why?
3. Suppose in Exercise 1 that Lanny himself is a tenant and has leased the house for six months. He subleases the house to Tenny for one year. The day before Tenny is to move into the house, he learns of Lanny's six-month lease and attempts to terminate his one-year lease. May he? Why?
4. Suppose in Exercise 3 that Tenny learned of Lanny's lease the day after he moved into the house. May he terminate? Why?
5. Simon owns a four-story building and rents the top floor to a college student. Simon is in the habit of burning refuse in the backyard, and the smoke from the refuse is so noxious that it causes the student's eyes to water and his throat to become raw. Has Simon breached a duty to the student? Explain.
6. In Exercise 5, if other tenants (but not Simon) were burning refuse in the backyard, would Simon be in breach? Why?
7. Assume in Exercise 5 that Simon was in breach. Could the student move out of the apartment and terminate the lease? What effect would this have on the student's duty to pay rent? Explain.

SELF-TEST QUESTIONS

1. An estate for years
 - a. has a definite beginning and end
 - b. is a leasehold estate
 - c. usually terminates automatically at midnight of the last day specified in the lease
 - d. includes all of the above

2. Not included among the rights given to a tenant is
 - a. paramount title
 - b. possession
 - c. habitable condition
 - d. noninterference with use

3. The interest of either landlord or tenant may be transferred freely
 - a. unless the tenancy is at will
 - b. unless the lease requires significant personal services unlikely to be performed by someone else
 - c. unless either of the above apply
 - d. under no circumstances

4. When injuries are caused on the premises to outsiders,
 - a. the tenant is always liable
 - b. the landlord is always liable
 - c. the landlord may be liable if there are hidden dangers the landlord knows about
 - d. they have no cause of action against the landlord or tenant since they have no direct contractual relationship with either party

5. Legally a tenant may
 - a. commit waste
 - b. make some structural alterations to the property

- c. abandon the property at any time
- d. physically change the property to suit it to her best advantage, as long as no structural alterations are made

SELF-TEST ANSWERS

1. d
2. a
3. c
4. c
5. d

Chapter 36

Estate Planning: Wills, Estates, and Trusts

LEARNING OBJECTIVES

After reading this chapter, you should understand the following:

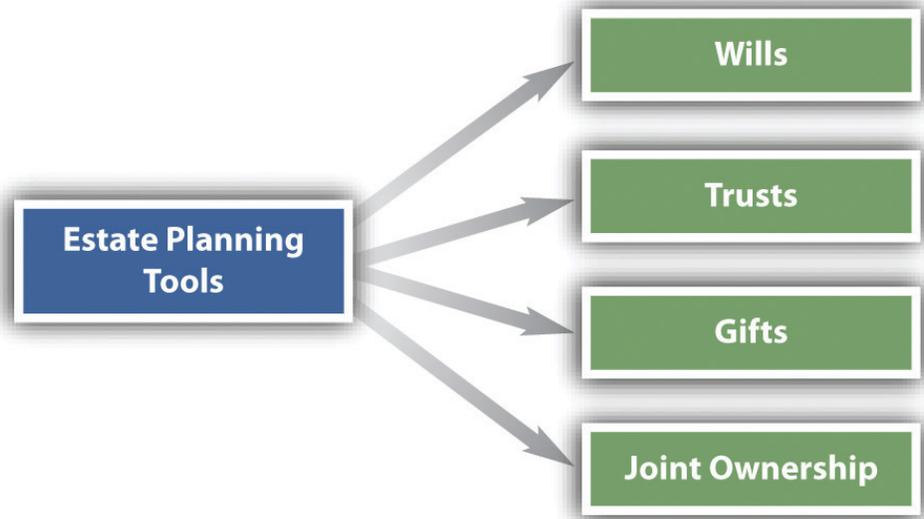

1. How property, both real and personal, can be devised and bequeathed to named heirs in a will
2. What happens to property of a decedent when there is no will
3. The requirements for “testamentary capacity”—what it takes to make a valid will that can be admitted to probate
4. The steps in the probate and administration of a will
5. How a will is distinguished from a trust, and how a trust is created, how it functions, and how it may come to an end
6. The various kinds of trusts, as well as factors that affect both estates and trusts

Broadly defined, **estate planning**¹ is the process by which someone decides how his assets are to be passed on to others at his death. Estate planning has two general objectives: to ensure that the assets are transferred according to the owner’s wishes and to minimize state and federal taxes.

People have at their disposal four basic estate planning tools: (1) wills, (2) trusts, (3) gifts, and (4) joint ownership (see [Figure 36.1 "Estate Planning"](#)). The rules governing gifts are discussed in [Chapter 31 "Introduction to Property: Personal Property and Fixtures"](#), and joint ownership is treated in [Chapter 33 "The Nature and Regulation of Real Estate and the Environment"](#). Consequently, we focus on the first two tools here. In addition to these tools, certain assets, such as insurance (discussed in [Chapter 37 "Insurance"](#)), are useful in estate planning.

1. The process by which an owner over the course of his life decides how his assets are to be passed on to others at his death.

Figure 36.1 *Estate Planning*

Estate planning not only provides for the spouses and children, other relatives and friends, the children's education, payoff of the mortgage, and so on, but also serves as the principal means by which liquidity can be guaranteed for taxes, expenses for administering the estate, and the like, while preserving the assets of the estate. And whenever a business is formed, estate planning consequences should always be considered, because the form and structure of the business can have important tax ramifications for the individual owners.

36.1 Wills and Estate Administration

LEARNING OBJECTIVES

1. Describe how property, both real and personal, can be devised and bequeathed to named heirs in a will.
2. Understand what happens to property of a decedent when there is no will.
3. Explain the requirements for “testamentary capacity”—what it takes to make a valid will that can be admitted to probate.
4. Describe the steps in the probate and administration of a will.

Definition

A **will**² is the declaration of a person’s wishes about the disposition of his assets on his death. Normally a written document, the will names the persons who are to receive specific items of real and personal property. Unlike a contract or a deed, a will is not binding as long as the person making the will lives. He may revoke it at any time. Wills have served their present function for virtually all of recorded history. The earliest known will is from 1800 BC (see [Figure 36.2 "An Ancient Will"](#)). Even if somewhat different in form, it served the same basic function as a modern will.

2. The declaration of a person’s wishes (the testator) about the disposition of his assets on his death.

Figure 36.2 *An Ancient Will*

[Will of Uah] "I, Uah, devise to my wife Sheftu, the woman of Gesab called Teta, daughter of Sat Sepdu, all properties given to me by my brother Ankh-ren. She shall give it to whomsoever she may see fit of her issue born to me.

"I devise to her the Eastern slaves, 4 persons, that my brother Ankh-ren gave me. She shall give them to whomsoever she may see fit of her children.

"As to my tomb, let me be buried in it with my wife alone.

"Moreover, as to the house built for me by my brother Ankh-ren, my wife shall dwell therein and shall not be evicted by any person.

"The deputy Sebu shall act as guardian of my son. Done in the presence of these witnesses:

"Kemen, Decorator of Columns,
"Apu, Doorkeeper of the Temple,
"Senb, son of Senb, Doorkeeper of the Temple."

Source: John H. Wigmore, *A Panorama of the World's Legal Systems*, vol. 1, p. 22.

Although most wills are written in a standardized form, some special types of wills are enforceable in many states.

1. A *nuncupative will* is one that is declared orally in front of witnesses. In states where allowed, the statutes permit it to be used only when the testator is dying as he declares his will. (A testator is one who dies with a will.)
2. A *holographic will* is one written entirely by the testator's hand and not witnessed. At common law, a holographic will was invalid if any part of the paper on which it was written contained printing. Modern statutes tend to validate holographic wills, even with printing, as long as the testator who signs it puts down material provisions in his own hand.
3. *Soldiers' and sailors' wills* are usually enforceable, no matter how informal the document, if made while the soldier is on service or the sailor is at sea (although they cannot usually transfer real property without observing certain formalities).
4. A *conditional will* is one that will take effect only on the happening of a particular named event. For example, a man intending to marry might

write, “This will is contingent on my marrying Alexa Jansey.” If he and Ms. Jansey do not marry, the will can have no operational effect.

5. A *joint will* is one in which two (or more) people use the same instrument to dispose of their assets. It must be signed by each person whose assets it is to govern.
6. *Mutual or reciprocal wills* are two or more instruments with reciprocal terms, each written by a person who intends to dispose of his or her assets in favor of the others.

The Uniform Probate Code

Probate³ is the process by which a deceased’s estate is managed under the supervision of a court. In most states, the court supervising this process is a specialized one and is often called the probate court. Probate practices vary widely from state to state, although they follow a general pattern in which the assets of an estate are located, added up, and disbursed according to the terms of the will or, if there is no will, according to the law of intestate succession. To attempt to bring uniformity into the conflicting sets of state laws the National Conference of Commissioners on Uniform State Laws issued the Uniform Probate Code (UPC) in 1969, and by 2011 it had been adopted in its entirety in sixteen states. Several other states have adopted significant parts of the UPC, which was revised in 2006. Our discussion of wills and estate administration is drawn primarily from the UPC, but you should note that there are variations among the states in some of the procedures standardized in the UPC.

Will Requirements and Interpretation Capacity

Any person who is over eighteen and of “sound mind” may make a will. One who is insane may not make an enforceable will, although the degree of mental capacity necessary to sustain a will is generally said to be a “modest level of competence” and is lower than the degree of capacity people must possess to manage their own affairs during their life. In other words, a court might order a guardian to manage the affairs of one who is mentally deficient but will uphold a will that the person has written. Insanity is not the only type of mental deficiency that will disqualify a will; medication of a person for serious physical pain might lead to the conclusion that the person’s mind was dulled and he did not understand what he was doing when writing his will. The case *Estate of Seymour M. Rosen*, (see [Section 36.4.1 "Testamentary Capacity"](#)), considers just such a situation.

3. The process by which a deceased’s estate is managed under the supervision of a court.

Writing

Under the UPC, wills must be in writing. The will is not confined to the specific piece of paper called “will” and signed by the testator. It may incorporate by reference any other writing in existence when the will is made, as long as the will sufficiently identifies the other writing and manifests an intent to incorporate it. Although lawyers prepare neatly typed wills, the document can be written in pencil or pen and on any kind of paper or even on the back of an envelope. Typically, the written will has the following provisions: (1) a “publication clause,” listing the testator’s name and his or her intention to make a will; (2) a “revocation clause,” revoking all previously made wills; (3) burial instructions; (4) debt payments, listing specific assets to be used; (5) **bequests**⁴, which are gifts of personal property by will; (6) **devises**⁵, which are gifts of real property by will; (7) a “residuary clause,” disposing of all property not covered by a specific bequest or devise; (8) a “penalty clause,” stating a penalty for anyone named in the will who contests the will; (9) the name of minor children’s guardian; and (10) the name of the executor. The executor’s job is to bring in all the assets of an estate, pay all just claims, and make distribution to beneficiaries in accord with the testator’s wishes. Beginning with California in 1983, several states have adopted statutory wills—simple fill-in-the-blank will forms that can be completed without consulting an attorney.

Signature

The testator must sign the will, and the proper place for the signature is at the end of the entire document. The testator need not sign his full name, although that is preferable; his initials or some other mark in his own hand, intended as an execution of the document, will suffice. The UPC permits someone else to sign for the testator as long as the signing is done in the testator’s presence and by his or her direction.

Witnesses

Most states require two or three witnesses to sign the will. The UPC requires two witnesses. The witnesses should observe the testator sign the will and then sign it themselves in the presence of each other. Since the witnesses might be asked to attest in court to the testator’s signature, it is sound practice to avoid witnesses who are unduly elderly and to use an extra witness or two. Most states forbid a person who has an interest in the will—that is, one who is a beneficiary under the will—from witnessing.

4. Gift of personal property by will.

5. Gift of real property by will.

In some states, a beneficiary who serves as a witness will lose his or her right to a bequest or devise. The UPC differs from the usual rule: no will or any provision of a

will is invalid because an interested party witnesses it, nor does the interested witness forfeit a bequest or devise.

Revocation and Modification

Since wills are generally effective only at death, the testator may always revoke or amend a will during his lifetime. He may do so by tearing, burning, obliterating, or otherwise destroying it. A subsequent will has the effect of revoking an inconsistent prior will, and most wills expressly state that they are intended to revoke all prior wills. A written modification of or supplement to a prior will is called a **codicil**⁶. The codicil is often necessary, because circumstances are constantly changing. The testator may have moved to a new state where he must meet different formal requirements for executing the will; one of his beneficiaries may have died; his property may have changed. Or the law, especially the tax law, may have changed.

One exception to the rule that wills are effective only at death is the so-called **living will**⁷. Beginning with California in 1976, most states have adopted legislation permitting people to declare that they refuse further treatment should they become terminally ill and unable to tell physicians not to prolong their lives if they can survive only by being hooked up to life-preserving machines. This living will takes effect during the patient's life and must be honored by physicians unless the patient has revoked it. The patient may revoke at any time, even as he sees the doctor moving to disconnect the plug.

In most states, a later marriage revokes a prior will, but divorce does not. Under the UPC, however, a divorce or annulment revokes any disposition of property bequeathed or devised to the former spouse under a will executed prior to the divorce or annulment. A will is at least partially revoked if children are born after it is executed, unless it has either provided for subsequently born children or stated the testator's intention to disinherit such children.

Abatement

6. A written modification of or supplement to a prior will.
7. A will that takes effect during life in cases of terminal illness, directing that physicians and others take no life-prolonging measures.
8. A proportional reduction of the amount payable under a will when the funds are no longer available to pay in full.

Specific bequests listed in a will might not be available in the estate when the testator or testatrix dies. **Abatement**⁸ of a bequest happens when there are insufficient assets to pay the bequest. Suppose the testatrix leaves \$10,000 each to "my four roommates," but when she dies, her estate is worth only \$20,000. The gift to each of the roommates is said to have abated, and each will take only \$5,000.

Abatement can pose a serious problem in wills not carefully drafted. Since circumstances can always change, a general provision in a father's will, providing "my dear daughter with all the rest, residue, and remainder of my estate," will do

her little good if business reverses mean that the \$10,000 bequest to the local hospital exhausts the estate of its assets—even though at the time the will was made, the testator had assets of \$1 million and supposed his daughter would be getting the bulk of it. Since specific gifts must be paid out ahead of general bequests or devises, abatement can cause the residual legatee (the person taking all assets not specifically distributed to named individuals) to suffer.

Ademption

Suppose that a testator bequeathed her 1923 Rolls Royce to “my faithful secretary,” but that the car had been sold and she owned only a 1980 Volkswagen when she died. Since the Rolls was not part of the estate, it is said to have adeemed (to have been taken away). **Ademption**⁹ of a gift in a will means that the intended legatee (the person named in the will) forfeits the object because it no longer exists. An object used as a substitute by the testator will not pass to the legatee unless it is clear that she intended the legatee to have it.

Intestacy

Intestacy¹⁰ means dying without a will. Intestacy happens all too frequently; even those who know the consequences for their heirs often put off making a will until it is too late—Abraham Lincoln, for one, who as an experienced lawyer knew very well the hazards to heirs of dying intestate. On his death, Lincoln’s property was divided, with one-third going to his widow, one-third to a grown son, and one-third to a twelve-year-old son. Statistics show that in New York, about one-third of the people who die with estates of \$5,000 or more die without wills. In every state, statutes provide for the disposition of property of decedents dying without wills. If you die without a will, the state in effect has made one for you. Although the rules vary by statute from state to state, a common distribution pattern prevails.

Unmarried Decedent

At common law, parents of an intestate decedent could not inherit his property. Today, however, many states provide that parents will share in the property. If the parents have already died, then the estate will pass to collateral heirs (siblings, nieces, nephews, aunts, and uncles). If there are no collateral heirs, most state laws provide that the next surviving kin of equal degree will share the property equally (e.g., first cousins). If there are no surviving kin, the estate **escheats**¹¹ (es CHEETS) to the state, which is then the sole owner of the assets of the estate.

9. Revocation or cancellation of a legatee’s rights under a will by the actions of the testator during his life, often by his having given away assets that the will says are to go to the legatee.

10. Dying without a will.

11. Property of decedents that have no known heirs will “escheat” to the state.

Married with No Children

In some states, the surviving spouse without children will inherit the entire estate. In other states, the spouse must share the property with the decedent's parents or, if they are deceased, with the collateral heirs.

Married with Children

In general, the surviving spouse will be entitled to one-third of the estate, and the remainder will pass in equal shares to living children of the decedent. The share of any child who died before the decedent will be divided equally among that child's offspring. These grandchildren of the decedent are said to take **per stirpes**¹² (per STIR peas), meaning that they stand in the shoes of their parent. Suppose that the decedent left a wife, three children, and eight grandchildren (two children each of the three surviving children and two children of a fourth child who predeceased the decedent), and that the estate was worth \$300,000. Under a typical intestate succession law, the widow would receive property worth \$100,000. The balance of the property would be divided into four equal parts, one for each of the four children. The three surviving children would each receive \$50,000. The two children of the fourth child would each receive \$25,000. The other grandchildren would receive nothing.

A system of distribution in which all living descendants share equally, regardless of generation, is said to be a distribution **per capita**¹³. In the preceding example, after the widow took her share, the remaining sum would be divided into eleven parts, three for the surviving children and eight for the surviving grandchildren.

Unmarried with Children

If the decedent was a widow or widower with children, then the surviving children generally will take the entire estate.

Estate Administration

To carry on the administration of an estate, a particular person must be responsible for locating the estate property and carrying out the decedent's instructions. If named in the will, this person is called an **executor**¹⁴. When a woman serves, she is still known in many jurisdictions as an **executrix**¹⁵. If the decedent died intestate, the court will appoint an administrator (or administratrix, if a woman), usually a close member of the family. The UPC refers to the person performing the function of executor or administrator as a personal representative. Unless excused by the

12. By representation; in a distribution per stirpes, each class of individuals takes the share to which their deceased would have been entitled.

13. According to the number of individuals, share and share alike; in a distribution per capita, each person named will receive an equal share.

14. The administrator of an estate, named in the will by the testator.

15. The female administrator of an estate, named in the will by the testator.

will from doing so, the personal representative must post a bond, usually in an amount that exceeds the value of the decedent's personal property.

The personal representative must immediately become familiar with the decedent's business, preserve the assets, examine the books and records, check on insurance, and notify the appropriate banks.

When confirmed by the court (if necessary), the personal representative must offer the will in probate—that is, file the will with the court, prove its authenticity through witnesses, and defend it against any challenges. Once the court accepts the will, it will enter a formal decree admitting the will to probate.

Traditionally, a widow could make certain elections against the will; for example, she could choose dower and homestead rights. The right of **dower**¹⁶ entitled the widow to a life estate in one-third of the husband's inheritable land, while a **homestead right**¹⁷ is the right to the family home as measured by an amount of land (e.g., 160 acres of rural land or 1 acre of urban land in Kansas) or a specific dollar amount. In some states, this amount is quite low (e.g., \$4,000 in Kansas) where the legislature has not upwardly adjusted the dollar amount for many years.

Today, most states have eliminated traditional dower rights. These states give the surviving spouse (widow or widower) the right to reject provisions made in a will and to take a share of the decedent's estate instead.

Once the will is admitted to probate, the personal representative must assemble and inventory all assets. This task requires the personal representative to collect debts and rent due, supervise the decedent's business, inspect the real estate, store personal and household effects, prove the death and collect proceeds of life insurance policies, take securities into custody, and ascertain whether the decedent held property in other states. Next, the assets must be appraised as of the date of death. When inventory and appraisal are completed, the personal representative must decide how and when to dispose of the assets by answering the following sorts of questions: Should a business be liquidated, sold, or allowed to continue to operate? Should securities be sold, and if so, when? Should the real estate be kept intact under the will or sold? To whom must the personal effects be given?

16. A right given to a widow to a life estate in one-third of the husband's inheritable land.

17. The right to the family home (as measured by an amount of land or a specific dollar amount) to be free of all claims of creditors.

The personal representative must also handle claims against the estate. If the decedent had unpaid debts while alive, the estate will be responsible for paying them. In most states, the personal representative is required to advertise that the estate is in probate. When all claims have been gathered and authenticated, the personal representative must pay just claims in order of priority. In general

(though by no means in every state), the order of priority is as follows: (1) funeral expenses, (2) administration expenses (cost of bond, advertising expenses, filing fees, lawsuit costs, etc.), (3) family allowance, (4) claims of the federal government, (5) hospital and other expenses associated with the decedent's last illness, (6) claims of state and local governments, (7) wage claims, (8) lien claims, (9) all other debts. If the estate is too small to cover all these claims, every claim in the first category must be satisfied before the claims in the second category may be paid, and so on.

Before the estate can be distributed, the personal representative must take care of all taxes owed by the estate. She will have to file returns for both estate and income taxes and pay from assets of the estate the taxes due. (She may have to sell some assets to obtain sufficient cash to do so.) **Estate taxes**¹⁸—imposed by the federal government and based on the value of the estate—are nearly as old as the Republic; they date back to 1797. They were instituted originally to raise revenue, but in our time they serve also to break up large estates.

As of 2011, the first \$1 million of an estate is exempt from taxation, lowering the threshold from an earlier standard. The Tax Policy Institute of the Brookings Institution estimates that 108,200 estates of people dying in 2011 will file estate tax returns, and 44,200 of those estates will pay taxes totaling \$34.4 billion.

Although a unified tax is imposed on gifts during life and transfers at death, everyone is permitted to give away \$13,000 per donee each year without paying any tax on the gift. A tax on sizable gifts is imposed to prevent people with large estates from giving away during their lives portions of their estate in order to escape estate taxes. Thus two grandparents with two married children and four grandchildren may give away \$26,000 (\$13,000 from each grandparent) to their eight descendants (children, spouses, grandchildren) each year, for a total of \$208,000, without paying any tax.

State governments also impose taxes at death. In many states, these are known as **inheritance taxes**¹⁹ and are taxes on the heir's right to receive the property. The tax rate depends on the relationship to the decedent: the closer the relation, the smaller the tax. Thus a child will pay less than a nephew or niece, and either of them will pay less than an unrelated friend who is named in the will.

18. Taxes imposed by the federal government on large estates.

19. State taxes on an heir's right to receive the property.

20. Done by the executor to close out an estate in probate. After taxes and debts are paid, an accounting must be prepared, showing the remaining principal, income, and disbursements to beneficiaries.

Once the taxes are paid, a **final accounting**²⁰ must be prepared, showing the remaining principal, income, and disbursements. Only at this point may the personal representative actually distribute the assets of the estate according to the will.

KEY TAKEAWAY

Any person with the requisite capacity may make a will and bequeath personal property to named heirs. A will can also devise real property. Throughout the United States, there are fairly common requirements to be met for a will to qualify for probate.

Intestacy statutes will govern where there is no will, and an administrator will be appointed by the probate court. Intestacy statutes will dictate which relatives will get what portion of the decedent's estate, portions that are likely to differ from what the decedent would have done had he or she left a valid will. Where there are no heirs, the decedent's property escheats to the state.

An executor (or executrix) is the person named in the will to administer the estate and render a final accounting. Estate and inheritance taxes may be owed if the estate is large enough.

EXERCISES

1. Donald Trump is married to Ivanna Trump, but they divorce. Donald neglects to change his will, which leaves everything to Ivanna. If he were to die before remarrying, would the will still be valid?
2. Tom Tyler, married to Tina Tyler, dies without a will. If his legal state of residence is California, how will his estate be distributed? (This will require a small amount of Internet browsing.)
3. Suppose Tom Tyler is very wealthy. When he dies at age sixty-three, there are two wills: one leaves everything to his wife and family, and the other leaves everything to his alma mater, the University of Colorado. The family wishes to dispute the validity of the second (later in time) will. What, in general, are the bases on which a will can be challenged so that it does not enter into probate?

36.2 Trusts

LEARNING OBJECTIVES

1. Distinguish a will from a trust, and describe how a trust is created, how it functions, and how it may come to an end.
2. Compare the various kinds of trusts, as well as factors that affect both estates and trusts.

Definitions

When the legal title to certain property is held by one person while another has the use and benefit of it, a relationship known as a **trust**²¹ has been created. The trust developed centuries ago to get around various nuances and complexities, including taxes, of English real property law. The trustee has legal title and the beneficiary has “equitable title,” since the courts of equity would enforce the obligations of the trustee to honor the terms by which the property was conveyed to him. A typical trust might provide for the trustee to manage an estate for the grantor’s children, paying out income to the children until they are, say, twenty-one, at which time they would become legal owners of the property.

Trusts may be created by bequest in a will, by agreement of the parties, or by a court decree. However created, the trust is governed by a set of rules that grew out of the courts of equity. Every trust involves specific property, known as the *res* (*rees*; Latin for “thing”), and three parties, though the parties may be the same person.

Settlor or Grantor

Anyone who has legal capacity to make a contract may create a trust. The creator is known as the **settlor**²² or grantor. Trusts are created for many reasons; for example, so that a minor can have the use of assets without being able to dissipate them or so that a person can have a professional manage his money.

Trustee

The trustee is the person or legal entity that holds the legal title to the *res*. Banks do considerable business as trustees. If the settlor should neglect to name a trustee, the court may name one. The trustee is a fiduciary of the trust beneficiary and will

21. The holding of legal title by one party for the benefit of another.

22. Grantor; the one who creates a trust.

be held to the highest standard of loyalty. Not even an appearance of impropriety toward the trust property will be permitted. Thus a trustee may not loan trust property to friends, to a corporation of which he is a principal, or to himself, even if he is scrupulous to account for every penny and pays the principal back with interest. The trustee must act prudently in administering the trust.

Beneficiary

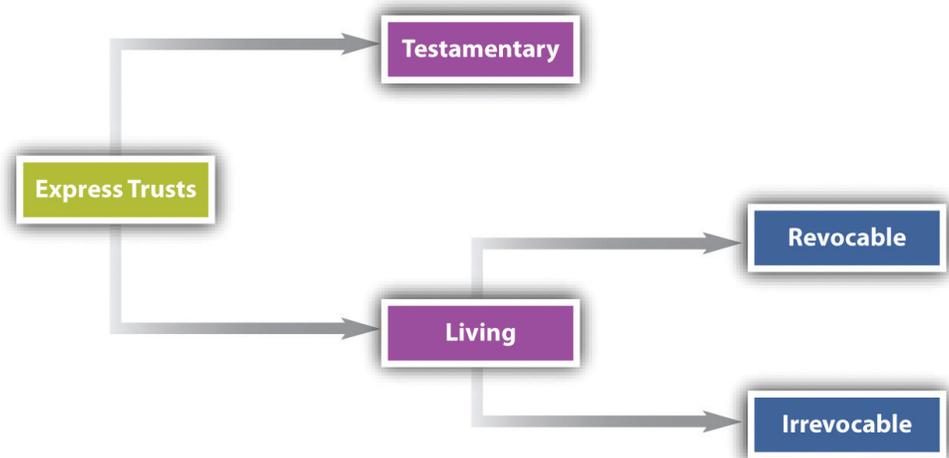

The beneficiary is the person, institution, or other thing for which the trust has been created. Beneficiaries are not limited to one's children or close friends; an institution, a corporation, or some other organization, such as a charity, can be a beneficiary of a trust, as can one's pet dogs, cats, and the like. The beneficiary may usually sell or otherwise dispose of his interest in a trust, and that interest likewise can usually be reached by creditors. Note that the settlor may create a trust of which he is the beneficiary, just as he may create a trust of which he is the trustee.

Continental Bank & Trust Co. v. Country Club Mobile Estates, Ltd., (see [Section 36.4.2 "Settlor's Limited Power over the Trust"](#)), considers a basic element of trust law: the settlor's power over the property once he has created the trust.

Express Trusts

Trusts are divided into two main categories: express and implied. Express trusts include **testamentary trusts**²³ and **inter vivos (or living) trusts**²⁴. The testamentary trust is one created by will. It becomes effective on the testator's death. The inter vivos trust is one created during the lifetime of the grantor. It can be revocable or irrevocable (see [Figure 36.3 "Express Trusts"](#)).

Figure 36.3 Express Trusts

23. A trust made during the settlor's life that takes effect on his death.

24. A trust that takes effect during the life of the settlor.

A **revocable trust**²⁵ is one that the settlor can terminate at his option. On termination, legal title to the trust assets returns to the settlor. Because the settlor can reassert control over the assets whenever he wishes, the income they generate is taxed to him.

By contrast, an **irrevocable trust**²⁶ is permanent, and the settlor may not revoke or modify its terms. All income to the trust must be accumulated in the trust or be paid to the beneficiaries in accordance with the trust agreement. Because income does not go to the settlor, the irrevocable trust has important income tax advantages, even though it means permanent loss of control over the assets (beyond the instructions for its use and disposition that the settlor may lay out in the trust agreement). A hybrid form is the reversionary trust: until the end of a fixed period, the trust is irrevocable and the settlor may not modify its terms, but thereafter the trust assets revert to the settlor. The reversionary trust combines tax advantages with ultimate possession of the assets.

Of the possible types of express trusts, five are worth examining briefly: (1) Totten trusts, (2), blind trusts, (3) Clifford trusts, (4) charitable trusts, and (5) spendthrift trusts. The use of express trusts in business will also be noted.

Totten Trust

The Totten trust, which gets its name from a New York case, *In re Totten*, *In re Totten*, 71 N.E. 748 (N.Y. 1904), is a tentative trust created when someone deposits funds in a bank as trustee for another person as beneficiary. (Usually, the account will be named in the following form: “Mary, in trust for Ed.”) During the beneficiary’s lifetime, the grantor-depositor may withdraw funds at his discretion or revoke the trust altogether. But if the grantor-depositor dies before the beneficiary and had not revoked the trust, then the beneficiary is entitled to whatever remains in the account at the time of the depositor’s death.

Blind Trust

In a blind trust, the grantor transfers assets—usually stocks and bonds—to trustees who hold and manage them for the grantor as beneficiary. The trustees are not permitted to tell the grantor how they are managing the portfolio. The blind trust is used by high government officials who are required by the Ethics in Government Act of 1978 to put their assets in blind trusts or abstain from making decisions that affect any companies in which they have a financial stake. Once the trust is created, the grantor-beneficiary is forbidden from discussing financial matters with the trustees or even to give the trustees advice. All that the grantor-beneficiary sees is a

25. A trust that the settlor can terminate at his option.

26. A trust that the settlor cannot terminate at his option.

quarterly statement indicating by how much the trust net worth has increased or decreased.

Clifford Trust

The Clifford trust, named after the settlor in a Supreme Court case, *Helvering v. Clifford*, *Helvering v. Clifford*, 309 U.S. 331 (1940). is reversionary: the grantor establishes a trust irrevocable for at least ten years and a day. By so doing, the grantor shifts the tax burden to the beneficiary. So a person in a higher bracket can save considerable money by establishing a Clifford trust to benefit, say, his or her children. The tax savings will apply as long as the income from the trust is not devoted to needs of the children that the grantor is legally required to supply. At the expiration of the express period in the trust, legal title to the res reverts to the grantor. However, the Tax Reform Act of 1986 removed the tax advantages for Clifford trusts established after March 1986. As a result, all income from such trusts is taxed to the grantor. Existing Clifford trusts were not affected by the 1986 tax law.

Charitable Trust

A charitable trust is one devoted to any public purpose. The definition is broad; it can encompass funds for research to conquer disease, to aid battered wives, to add to museum collections, or to permit a group to proselytize on behalf of a particular political or religious doctrine. The law in all states recognizes the benefits to be derived from encouraging charitable trusts, and states use the cy pres (see press; “as near as possible”) doctrine to further the intent of the grantor. The most common type of trust is the charitable remainder trust. You would donate property—usually intangible property such as stock—in trust to an approved charitable organization, usually one that has tax-exempt 501(c)(3) status from the IRS. The organization serves as trustee during your life and provides you or someone you designate with a specified level of income from the property that you donated. This could be for a number of years or for your lifetime. After your death or the period that you set, the trust ends and the charitable organization owns the assets that were in the trust.

There are important tax reasons why people set up charitable trusts. The trustor gets five years' worth of tax deductions for the value of the assets in the charitable trust. Capital gains are treated favorably, as well: charitable trusts are irrevocable, which means that the person setting up the trust (the “trustor”) permanently gives up control of the assets to the charitable organization. Thus, the charitable organization could sell an asset in the trust that would ordinarily incur significant capital gains taxes, but since the trustor no longer owns the asset, there is no

capital gains tax: as a tax-exempt organization, the charity will not pay capital gains, either.

Spendthrift Trust

A spendthrift trust is established when the settlor believes that the beneficiary is not to be trusted with whatever rights she might possess to assign the income or assets of the trust. By express provision in a trust instrument, the settlor may ensure that the trustees are legally obligated to pay only income to the beneficiary; no assignment of the assets may be made, either voluntarily by the beneficiary or involuntarily by operation of law. Hence the spendthrift beneficiary cannot gamble away the trust assets nor can they be reached by creditors to pay her gambling (or other) debts.

Express Trusts in Business

In addition to their use in estate planning, express trusts are also created for business purposes. The business trust was popular late in the nineteenth century as a way of getting around state limitations on the corporate form and is still used today. By giving their shares to a voting trust, shareholders can ensure that their agreement to vote as a bloc will be carried out. But voting trusts can be dangerous. As discussed in [Chapter 48 "Antitrust Law"](#) agreements that result in price fixing or other restraints of trade violate the antitrust laws; for example, companies are in violation when they act collusively to fix prices by pooling voting stock under a trust agreement, as happened frequently at the turn of the century.

Implied Trusts

Trusts can be created by courts without any intent by a settlor to do so. For various reasons, a court will declare that particular property is to be held by its owner in trust for someone else. Such trusts are implied trusts and are usually divided into two types: **constructive trusts**²⁷ and **resulting trusts**²⁸. A constructive trust is one created usually to redress a fraud or to prevent unjust enrichment. Suppose you give \$1 to an agent to purchase a lottery ticket for you, but the agent buys the ticket in his own name instead and wins \$1,000,000, payable into an account in amounts of \$50,000 per year for twenty years. Since the agent had violated his fiduciary obligation and unjustly enriched himself, the court would impose a constructive trust on the account, and the agent would find himself holding the funds as trustee for you as beneficiary. By contrast, a resulting trust is one imposed to carry out the supposed intent of the parties. You give an agent \$100,000 to purchase a house for you. Title is put in your agent's name at the closing, although it is clear that since she was paid for her services, you did not intend to give the house to her as a gift.

27. Created by courts to redress fraud or prevent unjust enrichment.

28. Created by courts to give effect to the intent of the parties.

The court would declare that the house was to be held by the agent as trustee for you during the time that it takes to have the title put in your name.

KEY TAKEAWAY

A trust can be created during the life of the settlor of the trust. A named trustee and beneficiary are required, as well as some assets that the trustee will administer. The trustee has a fiduciary duty to administer the trust with the utmost care. Inter vivos trusts can be revocable or irrevocable. Testamentary trusts are, by definition, not revocable, as they take effect on the death of the settlor.

EXERCISES

1. Karen Vreeland establishes a testamentary trust for her son, Brian, who has a gambling addiction. What kind of trust should she have established?
2. A group of ten coworkers “invests” in the Colorado Lottery when the jackpot reaches \$200 million. Each puts in \$10 for five tickets. Dan Connelly purchases fifty Colorado Lottery tickets on behalf of the group and holds them. As luck would have it, one of the tickets is a winner. Dan takes the ticket, claims the \$200 million, quits his job, and refuses to share. Do the coworkers have any legal recourse? Was a trust created in this situation?
3. Laura Sarazen has two sisters, Lana and Linda. Laura deposits \$50,000 at the Bank of America and creates an account that names her sister, Linda, in the following form: “Laura Sarazen, in trust for Linda Sarazen.” Laura dies two years later and has not withdrawn funds from the bank. The executrix, Lana Sarazen, wants to include those funds in the estate. Linda wants to claim the \$50,000 plus accumulated interest in addition to whatever share she gets in the will. Can she?

36.3 Factors Affecting Estates and Trusts

LEARNING OBJECTIVES

1. Know how principal and income are distinguished in administering a trust.
2. Explain how estates and trusts are taxed, and the utility of powers of appointment.

Principal and Income

Often, one person is to receive income from a trust or an estate and another person, the remainderman, is to receive the remaining property when the trust or estate is terminated. In thirty-six states, a uniform act, the Uniform Principal and Income Act (UPIA), defines principal and income and specifies how expenses are to be paid. If the trust agreement expressly gives the trustee power to determine what is income and what is principal, then his decision is usually unreviewable. If the agreement is silent, the trustee is bound by the provisions of the UPIA.

The general rule is that ordinary receipts are income, whereas extraordinary receipts are additions to principal. Ordinary receipts are defined as the return of money or property derived from the use of the principal, including rent, interest, and cash dividends. Extraordinary receipts include stock dividends, revenues or other proceeds from the sale or exchange of trust assets, proceeds from insurance on assets, all income accrued at the testator's death, proceeds from the sale or redemption of bonds, and awards or judgments received in satisfaction of injuries to the trust property. Expenses or obligations incurred in producing or preserving income—including ordinary repairs and ordinary taxes—are chargeable to income. Expenses incurred in making permanent improvements to the property, in investing the assets, and in selling or purchasing trust property are chargeable to principal, as are all obligations incurred before the decedent's death.

Taxation

Estates and trusts are taxable entities under the federal income tax statute. The general rule is that all income paid out to the beneficiaries is taxable to the beneficiaries and may be deducted from the trust's or estate's gross income in arriving at its net taxable income. The trust or estate is then taxed on the balance

left over—that is, on any amounts accumulated. This is known as the conduit rule, because the trust or estate is seen as a conduit for the income.

Power of Appointment

A power of appointment is the authority given by one person (the donor) to another (the donee) to dispose of the donor's property according to whatever instructions the donor provides. A power of appointment can be created in a will, in a trust, or in some other writing. The writing may imply the power of appointment rather than specifically calling it a power of appointment. For example, a devise or bequest of property to a person that allows that person to receive it or transfer it gives that person a power of appointment. The person giving the power is the donor, and the person receiving it is the donee.

There are three classes of powers of appointment. General powers of appointment give donees the power to dispose of the property in any way they see fit. Limited powers of appointment, also known as special powers of appointment, give donees the power to transfer the property to a specified class of persons identified in the instrument creating the power. Testamentary powers of appointment are powers of appointment that typically are created by wills.

If properly used, the power of appointment is an important tool, because it permits the donee to react flexibly to circumstances that the donor could not have foreseen. Suppose you desire to benefit your children when they are thirty-five or forty according to whether they are wealthy or poor. The poorer children will be given more from the estate or trust than the wealthier ones. Since you will not know when you write the will or establish the trust which children will be poorer, a donee with a power of appointment will be able to make judgments impossible for the donor to make years or decades before.

KEY TAKEAWAY

Administering either an estate or a trust requires knowing the distinction between principal and income in a variety of situations. For example, knowing which receipts are ordinary and which are extraordinary is essential to knowing whether to allocate the receipts as income or as an addition to principal. Knowing which expenses are chargeable to principal and which are chargeable to income is also important. Both estates and trusts are taxable entities, subject to federal and state laws on estate and trust taxation. Powers of appointment can be used in both trusts and estates in order to give flexibility to named donees.

EXERCISES

1. In his will, Hagrid leaves his pet dragon, Norberta, to Ron Weasley as donee with power of appointment. He intends to restrict Ron's power as donee to give or sell Norberta only to wizards or witches. What kind of power of appointment should Hagrid use?
2. In a testamentary trust, Baxter Black leaves Hilda Garde both real and personal property to administer as she sees fit as trustee "for the benefit of the Michigan Militia." Hilda intends to sell the house, but meanwhile she rents it out at \$1,200 a month and incurs repairs to the property to prepare it for sale in the amount of \$4,328.45. Is the expense chargeable to income or principal? Is the rent to be characterized as ordinary receipts or extraordinary receipts?

36.4 Cases

Testamentary Capacity

Estate of Seymour M. Rosen

Supreme Judicial Court of Maine

447 A.2d 1220 (1982)

GODFREY, JUSTICE

Phoebe Rosen and Jeffrey Rosen, widow and son of the decedent, Seymour M. Rosen, appeal from an order of the Knox County Probate Court admitting the decedent's will to probate. Appellants argue that the decedent lacked the testamentary capacity necessary to execute a valid will and that the Probate Court's finding that he did have the necessary capacity is clearly erroneous. On direct appeal from the Probate Court pursuant to section 1-308 of the Probate Code (18-A M.R.S.A. § 1-308), this Court reviews for clear error the findings of fact by the Probate Court. *Estate of Mitchell, Me.*, 443 A.2d 961 (1982). We affirm the judgment.

Decedent, a certified public accountant, had an accounting practice in New York City, where he had been married to Phoebe for about thirty years. Their son, Jeffrey, works in New York City. In 1973, the decedent was diagnosed as having chronic lymphatic leukemia, a disease that, as it progresses, seriously impairs the body's ability to fight infection. From 1973 on, he understood that he might die within six months. In June, 1978, he left his home and practice and moved to Maine with his secretary of two months, Robin Gordon, the appellee. He set up an accounting practice in Camden.

The leukemia progressed. The decedent was on medication and was periodically hospitalized for infections, sometimes involving septic shock, a condition described by the treating physician as akin to blood poisoning. The infections were treated with antibiotics with varying degrees of success. Despite his medical problems, the decedent continued his accounting practice, working usually three days a week, until about two months before his death on December 4, 1980. Robin Gordon lived with him and attended him until his death.

While living in New York, the decedent had executed a will leaving everything to his wife or, if she should not survive him, to his son. In November, 1979, decedent employed the services of Steven Peterson, a lawyer whose office was in the same building as decedent's, to execute a codicil to the New York will leaving all his Maine property to Robin. At about this time, decedent negotiated a property settlement with his wife, who is now living in Florida. He executed the will at issue in this proceeding on July 25, 1980, shortly after a stay in the hospital with a number of infections, and shortly before a hospitalization that marked the beginning of the decedent's final decline. This will, which revoked all earlier wills and codicils, left all his property, wherever located, to Robin, or to Jeffrey if Robin did not survive him.

The court admitted the 1980 will to probate over the objections of Phoebe and son, making extensive findings to support its conclusion that "the decedent clearly had testamentary capacity when he executed his Will."

The Probate Court applied the standard heretofore declared by this Court for determining whether a decedent had the mental competence necessary to execute a valid will:

A 'disposing mind' involves the exercise of so much mind and memory as would enable a person to transact common and simple kinds of business with that intelligence which belongs to the weakest class of sound minds; and a disposing memory exists when one can recall the general nature, condition and extent of his property, and his relations to those to whom he gives, and also to those from whom he excludes, his bounty. He must have active memory enough to bring to his mind the nature and particulars of the business to be transacted, and mental power enough to appreciate them, and act with sense and judgment in regard to them. He must have sufficient capacity to comprehend the condition of his property, his relations to the persons who were or should have been the objects of his bounty, and the scope and bearing of the provisions of his will. He must have sufficient active memory to collect in his mind, without prompting, the particulars or elements of the business to be transacted, and to hold them in his mind a sufficient length of time to perceive at least their obvious relations to each other, and be able to form some rational judgment in relation to them.

In re Leonard, Me., 321 A.2d 486, 488-89 (1974), quoting *Hall v. Perry*, 87 Me. 569, 572, 33 A. 160, 161 (1895).

Appellants portray the decedent as "a man ravaged by cancer and dulled by medication," and it is true that some evidence in the record tends to support this characterization. However, the law as set out in *In re Leonard* requires only a modest

level of competence (“the weakest class of sound minds”), and there is considerable evidence of record that the decedent had at least that level of mental ability and probably more:

1. The three women who witnessed the will all testified that decedent was of sound mind. They worked in the same building as the decedent, knew him, and saw him regularly. Such testimony is admissible to show testamentary capacity. *In re Leonard*, 321 A.2d at 489.
2. Lawyer Peterson, who saw the decedent daily, testified that he was of sound mind. Peterson used the decedent as a tax adviser, and the decedent did accounting work for Peterson’s clients. Peterson had confidence in the decedent’s tax abilities and left the tax aspects of the will to the decedent’s own consideration.
3. Dr. Weaver, the treating physician, testified that although the decedent would be mentally deadened for a day or two while in shock in the hospital, he would then regain “normal mental function.” Though on medication, the decedent was able to conduct his business until soon before his death. Dr. Weaver testified without objection that on one occasion he had offered a written opinion that the decedent was of sound mind.

Appellants’ principal objection to the will is that the decedent lacked the necessary knowledge of “the general nature, condition and extent of his property.” *In re Leonard*, 321 A.2d at 488. The record contains testimony of Robin Gordon and lawyer Peterson that decedent did not know what his assets were or their value. However, there is other evidence, chiefly Peterson’s testimony about his discussions with the decedent preliminary to the drafting of the 1980 will and, earlier, when the 1979 codicil to the New York will was being prepared, that the decedent did have knowledge of the contents of his estate. He knew that he had had a Florida condominium, although he was unsure whether this had been turned over to his wife as part of the recent property settlement; he knew that he had an interest in an oil partnership, and, although he was unable to place a value on that interest, he knew the name of an individual who could supply further information about it; he knew he had stocks and bonds, two motor vehicles, an account at the Camden National Bank, and accounts receivable from his accounting practice.

The law does not require that a testator’s knowledge of his estate be highly specific in order for him to execute a valid will. It requires only that the decedent be able to recall “the general nature, condition and extent of his property.” *In re Leonard*, 321 A.2d at 488. Such knowledge of one’s property is an aspect of mental soundness, not an independent legal requirement as the appellants seem to suggest. Here, there was competent evidence that the decedent had a general knowledge of his estate. The Probate Court was justified in concluding that, in the circumstances, the

decedent's ignorance of the precise extent of his property did not establish his mental incompetence. The decedent's uncertainty about his property was understandable in view of the fact that some of his property had been transferred to his wife in the recent property negotiations in circumstances rendering it possible that the decedent might have wanted to put the matter out of his mind. Also, there was evidence from which the court could have inferred that much of the property was of uncertain or changing value.

On the evidence of record, this Court cannot hold that the findings of the Probate Court were clearly erroneous. Where, as here, there is a choice between two permissible views of the weight of the evidence, the findings of the Probate Court must stand. *Estate of Mitchell*, Me., 443 A.2d 961 (1982).

CASE QUESTIONS

1. Based on what is written in this opinion, did the decedent's widow get nothing as a result of her husband's death? What did she get, and how?
2. If Phoebe Rosen's appeal had resulted in a reversal of the probate court, what would happen?
3. Is it possible that Seymour Rosen lacked testamentary capacity? Could the probate court have ruled that he did and refuse to admit the will to probate? If so, what would happen, using the court's language and cited opinions?

Settlor's Limited Power over the Trust

Continental Bank & Trust Co. v. Country Club Mobile Estates, Ltd.

632 P.2d 869 (Utah 1981)

Oaks, Justice

The issue in this appeal is whether a settlor who has created a trust by conveying property that is subject to an option to sell can thereafter extend the period of the option without the participation or consent of the trustee. We hold that he cannot. For ease of reference, this opinion will refer to the plaintiff-appellant, Continental Bank & Trust Co., as the "trustee," to defendant-respondent, Country Club Mobile Estates, Ltd., as the "lessee-optionee," and to Marshall E. Huffaker, deceased, as the "settlor."

The sequence of events is critical. On September 29, 1965, the settlor gave the lessee-optionee a fifty-year lease and an option to purchase, during the sixth year of the lease, the 31 acres of land at issue in this litigation. On March 1, 1971, the settlor granted the lessee-optionee a five-year extension of its option, to September 29, 1976. On December 6, 1973, the settlor conveyed the subject property to the trustee in trust for various members of his family, signing a trust agreement and conveying the property to the trustee by a warranty deed, which was promptly recorded. The lessee-optionee had actual as well as constructive notice of the creation of this trust by at least April, 1975, when it began making its monthly lease payments directly to the trustee. On March 1, 1976, the settlor signed an instrument purporting to grant the lessee-optionee another five-year extension of its option, to September 29, 1981. The trustee was unaware of this action and did not participate in it. On October 30, 1978, approximately one week after the settlor's death, the trustee learned of the March 1, 1976, attempted extension and demanded and obtained a copy of the instrument.

On July 3, 1979, the trustee brought this action against the lessee-optionee and other interested parties to quiet title to the 31 acres of trust property and to determine the validity of the attempted extension of the option. Both parties moved for summary judgment on the issue of the validity of the extended option. The district court denied the trustee's motion and granted the lessee-optionee's motion, and the trustee appealed. We reverse.

A settlor admittedly could reserve power to extend the duration of an option on trust property, and do so without the consent or involvement of the trustee. The question is whether this settlor did so. The issue turns on the terms of the trust instrument, which, in this case, gave the trustee broad powers, including the power to grant options, but also reserved to the settlor the right to revoke the trust or to direct the trustee to sell trust property. The relevant clauses are as follows:

ARTICLE IV.

To carry out the Trust purposes of the Trust created hereby...the Trustee is vested with the following powers...:

B. To manage, control, sell, convey...; to grant options...

K....The enumeration of certain powers of the Trustee herein shall not be construed as a limitation of the Trustee's power, it being intended that the Trustee shall have all rights, powers and privileges that an absolute owner of the property would have.

ARTICLE V.

The Trustor by an instrument in writing filed with the Trustee may modify, alter or revoke this Agreement in whole or in part, and may withdraw any property subject to the agreement;...

There is hereby reserved to the Trustor the power to direct the trustee, in writing, from time to time, to retain, sell, exchange or lease any property of the trust estate....Upon receipt of such directions, the Trustee shall comply therewith. The lessee-optionee argues, and the district court held, that in the foregoing provisions of the trust agreement the settlor reserved the power to direct the trustee in regard to the leased property, and that the effect of his executing the extension of the option on March 1, 1976, was to direct the trustee to sell the property to the lessee-optionee upon its exercise of the option. We disagree. We are unable to find an exercise of the “power to direct the trustee, in writing,” in an act that was not intended to communicate and did not in fact communicate anything to the trustee. We are likewise unable to construe the extension agreement signed by the settlor and the lessee-optionee as “an instrument in writing filed with the Trustee” to “modify, alter or revoke this Agreement....” Nor can we agree with the dissent’s argument for “liberal construction...to the reserved powers of a settlor” in a trust agreement which expressly vests **the trustee** with the power “to grant options” and explicitly states its intention that **the trustee** “shall have all rights, powers and privileges that an absolute owner of the property would have.” Article IV, quoted above. (emphases in original)

A trust is a form of ownership in which the legal title to property is vested in a trustee, who has equitable duties to hold and manage it for the benefit of the beneficiaries. *Restatement of Trusts, Second*, § 2 (1959). It is therefore axiomatic in trust law that the trustee under a valid trust deed has exclusive control of the trust property, subject only to the limitations imposed by law or the trust instrument, and that once the settlor has created the trust he is no longer the owner of the trust property and has only such ability to deal with it as is expressly reserved to him in the trust instrument. *Boone v. Davis*, 64 Miss. 133, 8 So. 202 (1886); *Marvin v. Smith*, 46 N.Y. 571 (1871). As stated in Bogert, *Trusts & Trustees*, §42 (2d ed. 1965):

After a settlor has completed the creation of a trust he is, with small exceptions noted below, and except as expressly provided otherwise by the trust instrument or by statute, not in any legal relationship with the beneficiaries or the trustee, and has no liabilities or powers with regard to the trust administration.

None of the exceptions identified by Bogert applies in this case.

This is a case where a settlor created a trust and then chose to ignore it. He could have modified or revoked the trust, or directed the trustee in writing to sell or lease the trust property, but he took neither of these actions. Instead, more than two years after the creation and recording of the trust, and without any direction or notice to the trustee, the settlor gave the lessee-optionee a signed instrument purporting to extend its option to buy the trust property for another five years. The trustee did not learn of this instrument until two and one-half years later, immediately following the death of the settlor.

An extension of the option to buy would obviously have a limiting effect on the value of the reversion owned by the trust (and thus on the rights of the trust beneficiaries), which the trustee has a duty to protect. Even a revocable trust clothes beneficiaries, for the duration of the trust, with a legally enforceable right to insist that the terms of the trust be adhered to. If we gave legal effect to the settlor's extension of this option in contravention of the existence and terms of the trust, we would prejudice the interests of the beneficiaries, blur some fundamental principles of trust law, and cast doubt upon whether it is the trustee or the settlor who is empowered to manage and dispose of the trust property in a valid revocable trust.

The judgment of the district court is reversed and the cause is remanded with instructions to enter judgment for the plaintiff. Costs to appellant.

HOWE, Justice: (Dissenting)

I dissent. The majority opinion has overlooked the cardinal principle of construction of a trust agreement which is that the settlor's intent should be followed. See *Leggroan v. Zion's Savings Bank & Trust Co.*, 120 Utah 93, 232 P.2d 746 (1951). Instead, the majority places a strict and rigid interpretation on the language of the trust agreement which defeats the settlor's intent and denies him an important power he specifically reserved to himself. All of this is done in a fact situation where there is no adverse interest asserted and no one will be prejudiced in any way by following the undisputed and obvious intent of the settlor.

Unlike the situation found with many trusts, Huffaker in establishing his trust reserved to himself broad powers in Article V.:

ARTICLE V.

The Trustor by an instrument in writing filed with the Trustee *may modify, alter or revoke this Agreement* in whole or in part, and *may withdraw any property subject to the*

Agreement; Provided, however, that the duties, powers and limitations of the Trustee shall not be substantially changed without its written consent, except as to revocation or withdrawal. (emphasis added)

* * * *

There is hereby reserved to the Trustor the power to *direct the trustee, in writing, from time to time, to retain, sell, exchange or lease any property of the Trust estate, to invest Trust funds, or to purchase for the Trust any property which they [sic] may designate and which is acceptable to the Trustee. Upon receipt of such directions, the Trustee shall comply therewith.* (emphasis added)

Thus while Huffaker committed the property into the management and control of the trustee, he retained the right in Article V. to direct the trustee from time to time with regard to the property, and the trustee agreed that upon receipt of any such directions it would comply. It is significant that the consent of the trustee was not required. These broad reserved powers in effect gave him greater power over the property than the trustee possessed since he had the final word.

The property in question was subject to defendant's option when it was placed in trust. The trustee took title subject to that option and subject to future directions from Huffaker. The extension granted by Huffaker to the defendant was in effect a directive that the trustee sell the property to the defendant if and when it elected to purchase the property. At that time, the defendant could deliver the directive to the trustee which held legal title and the sale could be consummated. Contrary to what is said in the majority opinion, the extension was intended to communicate and did communicate to the trustee the settlor's intention to sell to the defendant. The trustee does not claim to have any doubt as to what the settlor intended.

There was no requirement in the trust agreement as to when the directive to sell had to be delivered to the trustee nor was there any requirement that the settlor must himself deliver the direction to sell to the trustee rather than the buyer deliver it. The majority opinion concedes that Huffaker had the power to extend the option but denies him that power because he did not communicate his intention to exercise that power to the trustee at the time he extended the option. It ignores the fact that the lessee had five years to decide whether it wanted to buy the property, at which time it could deliver the direction to sell to the trustee. The majority opinion reads into the trust agreement rigidity and strictness which is unwarranted.

The majority opinion contains a quote from Bogert, *Trust and Trustees*, § 42, for authority that after a settlor has completed the creation of a trust he is not in any legal relationship with the beneficiaries or the trustee, and has no liabilities or power with regard to the trust administration. However, as will be seen in that quote, it is there recognized that those rules do not apply where it has been expressly provided otherwise by the trust instrument. Such is the case here where the settlor reserved extensive powers and was himself the primary beneficiary.

Huffaker's extension agreement apparently would not have been challenged by his trustee if he had given written directions to the trustee to extend the option instead of executing the extension with the defendant himself, and apparently would not have been challenged had he not died. Yet, although the trustee did not itself extend the option nor receive a copy of the agreement until after Huffaker's death, it had not in the meantime dealt with third parties concerning the property or made any commitments that were inconsistent with Huffaker's action. Since there were no intervening third-party rights and it is not unfair to the trust beneficiaries to require them to abide by the intention of their donor and benefactor, I see no justification for the refusal of the trustee to accept the extension agreement as a valid direction to sell the property as provided for by the terms of the trust. This is not a case where the trustee in ignorance of the action of the settlor in granting an option had also granted an option or dealt with the property in a manner inconsistent with the actions of the settlor so that there are conflicting claims of innocent third-parties presented. In such a case there would be some justification for applying a strict construction so that there can be orderliness in trust administration. After all, the reason for the provisions of the trust agreement defining the powers of the trustee and the reserved powers of the settlor was to provide for the exercise of those powers in a manner that would be orderly and without collision between the trustee and settlor. In the instant case the trustee has not even suggested how it will be prejudiced by following Huffaker's directions. The majority opinion makes reference to protecting the interest of the contingent beneficiaries but overlooks that Huffaker was not only the settlor but also the primary beneficiary both when the trust was established and when the option was extended.

The majority opinion treats the relationship between Huffaker and his trustee as an adversary relationship instead of recognizing that the trustee was Huffaker's fiduciary to assist him in managing *his* property. Therefore, there is no reason to construe the trust agreement as if it were meant to deal with a relationship between two adverse parties.

My view that a liberal construction should be given to the reserved powers of a settlor under these circumstances finds support in a decision of the Supreme Judicial Court of Massachusetts, *Trager v. Schwartz*, 345 Mass. 653, 189 N.E.2d 509

(1963). There the settlor on July 15, 1942, executed as donor a declaration of trust. The property was 65 shares of stock and 4 lots of land. In that instrument he reserved the right to alter, amend or revoke the instrument in whole or in part. However, it was specifically provided in the declaration of trust that “any such alterations, amendments or revocations of this trust shall be by an instrument in writing signed by the donor, and shall become effective only upon being recorded in the South District Registry of Deeds for Middlesex County.”

Later, on February 4, 1954, the trustor executed a document entitled “Modification and Amendment of Trust” whereby he withdrew the 65 shares of stock from the trust and sold them to his son and told him that he had arranged for the recording of that instrument by his lawyer. However, he did not record the document nor instruct his attorney to do so. On August 25, 1960, the settlor executed a document entitled “Revocation of Declaration of Trust,” in which he revoked in whole the declaration of trust of July 15, 1942. This revocation was recorded on August 26th. He thereupon directed the trustees to deliver to him the 65 shares of stock and the 4 lots of real estate. His son received notice of the revocation on August 30, 1960, and recorded the following day the modification and amendment dated February 4, 1954, by which he had obtained the 165 shares of stock.

In a suit brought by the settlor to regain ownership of the stock, he contended that the recording of his complete revocation on August 26, 1960, rendered ineffective the recording of the partial revocation on August 31, 1960. He relied upon the principle that “A valid trust once created cannot be revoked or altered except by the exercise of a reserve power to do so, which must be exercised in strict conformity to its terms.” The court upheld the earlier sale of stock stating:

The provision of the declaration of trust that amendments and revocations ‘shall become effective only upon being recorded’ shall not be interpreted, where there are no intervening rights of third-parties, as preventing the carrying out of the earlier amendment once it has been recorded. This should be the result, particularly where there was an express undertaking by one of the parties to see to the recording.

In the instant case, defendant will be greatly prejudiced, and the settlor’s intention thwarted, as a result of following the majority opinion’s interpretation of the trust terms as they relate to a written direction to the trustee to sell trust property. Defendant gave up the opportunity to purchase the property within the original option period in reliance on Huffaker’s execution of the extension agreement, a document prepared by his attorney. I am not persuaded that because defendant was making its rental payments to the trustee it was unreasonable in obtaining the extension of the option, which previously had been granted it by Huffaker, to again

deal with him and rely on him since he was the final power respecting his property, and since neither he nor his attorney who had full and complete knowledge of the trust apparently raised any question as to the propriety of what they were doing. Just as the settlor in *Trager v. Schwartz*, supra, was not permitted to gain advantage by his failure to record as required by the trust agreement, I think the settlor's beneficiaries in the instant case should not gain by Huffaker's omissions and to the extreme prejudice of defendant.

The trustee has based its arguments on cases and principles that are distinguishable or inapplicable to the instant case. It regards the trust agreement as expressly allowing only it, as trustee and holder of the legal title to the property, to sell, option, or otherwise dispose of it. But the language of the trust regarding powers retained by Huffaker is inclusive enough to encompass his action in this case, for he expressly retained the right to direct the plaintiff to sell the property, a right that is compatible with his granting of the option extension.

The trustee also asserts that the written instrument received after Huffaker's death was ineffective as a directive to the trustee. Plaintiff cites authority for the principle that a revocable trust can only be modified during the settlor's lifetime, e.g., *Chase National Bank of City of N.Y. v. Tomagno*, 172 Misc. 63, 14 N.Y.S.2d 759 (1939). We are not dealing with an attempted testamentary disposition in this case, however. The option extension agreement was executed during Huffaker's lifetime, and the fact that it was received by plaintiff only after he died does not deprive it of its effect.

I would affirm the judgment below.

CASE QUESTIONS

1. Does the decision effectively deprive Country Club Mobile Estates, Ltd. of anything? What?
2. Why would the trustee (Continental Bank & Trust Co.) object to giving Country Club Mobile Estates, Ltd. another two and a half years on the lease?
3. Which opinion seems better reasoned—the majority or the dissent? Why do you think so?

36.5 Summary and Exercises

Summary

Estate planning is the process by which an owner decides how her property is to be passed on to others. The four basic estate planning tools are wills, trusts, gifts, and joint ownership. In this chapter, we examined wills and trusts. A will is the declaration of a person's wishes about the disposition of her assets on her death. The law of each state sets forth certain formalities, such as the number of witnesses, to which written wills must adhere. Wills are managed through the probate process, which varies from state to state, although many states have now adopted the Uniform Probate Code. In general, anyone over eighteen and of sound mind may make a will. It must be signed by the testator, and two or three others must witness the signature. A will may always be modified or revoked during the testator's lifetime, either expressly through a codicil or through certain actions, such as a subsequent marriage and the birth of children, not contemplated by the will. Wills must be carefully drafted to avoid abatement and ademption. The law provides for distribution in the case of intestacy. The rules vary from state to state and depend on whether the decedent was married when she died, had children or parents who survived her, or had collateral heirs.

Once a will is admitted to probate, the personal representative must assemble and inventory all assets, have them appraised, handle claims against the estate, pay taxes, prepare a final accounting, and only then distribute the assets according to the will.

A trust is a relationship in which one person holds legal title to certain property and another person has the use and benefit of it. The settlor or grantor creates the trust, giving specific property (the res) to the trustee for the benefit of the beneficiary. Trusts may be living or testamentary, revocable or irrevocable. Express trusts come in many forms, including Totten trusts, blind trusts, Clifford trusts, charitable trusts, and spendthrift trusts. Trusts may also be imposed by law; constructive and resulting trusts are designed to redress frauds, prevent unjust enrichment, or see to it that the intent of the parties is carried out.

EXERCISES

1. Seymour deposits \$50,000 in a bank account, ownership of which is specified as “Seymour, in trust for Fifi.” What type of trust is this? Who is the settlor? The beneficiary? The trustee? May Seymour spend the money on himself? When Seymour dies, does the property pass under the laws of intestacy, assuming he has no will?
2. Seymour, a resident of Rhode Island, signed a will in which he left all his property to his close friend, Fifi. Seymour and Fifi then moved to Alabama, where Seymour eventually died. Seymour’s wife Hildegarde, who stayed behind in Rhode Island and who was not named in the will, claimed that the will was revoked when Seymour moved from one state to another. Is she correct? Why?
3. Assume in Exercise 2 that Seymour’s Rhode Island will is valid in Alabama. Is Hildegarde entitled to a part of Seymour’s estate? Explain.
4. Assume in Exercise 2 that Seymour’s Rhode Island will is valid in Alabama. Seymour and Hildegarde own, as tenants by the entirety, a cottage on the ocean. In the will, Seymour specifically states that the cottage goes to Fifi on his death. Does Fifi or Hildegarde get the cottage? Or do they share it? Explain?
5. Assume in Exercise 2 that Seymour’s Rhode Island will is not valid. Seymour’s only relative besides Hildegarde is his nephew, Chauncey, whom Seymour detests. Who is entitled to Seymour’s property when he dies—Fifi, Hildegarde, or Chauncey? Explain.
6. Scrooge is in a high tax bracket. He has set aside in a savings account \$100,000, which he eventually wants to use to pay the college expenses of his tiny son, Tim, who is three. The account earns \$10,000 a year, of which \$5,000 goes to the government in taxes. How could Scrooge lower the tax payments while retaining control of the \$100,000?
7. Assume in Exercise 6 that Scrooge considers placing the \$100,000 in trust for Tim. But he is worried that when Tim comes of age, he might sell his interest in the trust. Could the trust be structured to avoid this possibility? Explain.
8. Assume that Scrooge has a substantial estate and no relatives. Is there any reason for him to consider a will or trust? Why? If he dies without a will, what will happen to his property?

SELF-TEST QUESTIONS

1. A will written by the testator's hand and not witnessed is called
 - a. a conditional will
 - b. a nuncupative will
 - c. a holographic will
 - d. a reciprocal will

2. A written modification or supplement to a prior will is called
 - a. a revocation clause
 - b. an abatement
 - c. a codicil
 - d. none of the above

3. A trust created by will is called
 - a. an inter vivos trust
 - b. a reversionary trust
 - c. a Totten trust
 - d. a testamentary trust

4. Trustees are not permitted to tell the grantor how they are managing their portfolio of assets in
 - a. a Clifford trust
 - b. a spendthrift trust
 - c. a blind trust
 - d. a voting trust

5. An example of an implied trust is
 - a. a spendthrift trust
 - b. a Clifford trust
 - c. a resulting trust
 - d. none of the above

SELF-TEST ANSWERS

1. c
2. c
3. d
4. c
5. c

Chapter 37

Insurance

LEARNING OBJECTIVES

After reading this chapter, you should understand the following:

1. The basic terms and distinctions in the law of insurance
2. The basic types of insurance for property, liability, and life
3. The basic defenses to claims against insurance companies by the insured: representation, concealment, and warranties

We conclude our discussions about property with a focus on insurance law, not only because insurance is a means of compensating an owner for property losses but also because the insurance contract itself represents a property right. In this chapter, we begin by examining regulation of the insurance industry. We then look at legal issues relating to specific types of insurance. Finally, we examine defenses that insurance companies might raise to avoid making payments under insurance policies.

37.1 Definitions and Types of Insurance

LEARNING OBJECTIVES

1. Know the basic types of insurance for individuals.
2. Name and describe the various kinds of business insurance.

Certain terms are usefully defined at the outset. **Insurance**¹ is a contract of reimbursement. For example, it reimburses for losses from specified perils, such as fire, hurricane, and earthquake. An **insurer**² is the company or person who promises to reimburse. The **insured**³ (sometimes called the assured) is the one who receives the payment, except in the case of life insurance, where payment goes to the beneficiary named in the life insurance contract. The **premium** is the consideration paid by the insured—usually annually or semiannually—for the insurer’s promise to reimburse. The contract itself is called the **policy**⁴. The events insured against are known as **risks**⁵ or **perils**⁶.

Regulation of insurance is left mainly in the hands of state, rather than federal, authorities. Under the McCarran-Ferguson Act, Congress exempted state-regulated insurance companies from the federal antitrust laws. Every state now has an insurance department that oversees insurance rates, policy standards, reserves, and other aspects of the industry. Over the years, these departments have come under fire in many states for being ineffective and “captives” of the industry. Moreover, large insurers operate in all states, and both they and consumers must contend with fifty different state regulatory schemes that provide very different degrees of protection. From time to time, attempts have been made to bring insurance under federal regulation, but none have been successful.

We begin with an overview of the types of insurance, from both a consumer and a business perspective. Then we examine in greater detail the three most important types of insurance: property, liability, and life.

Public and Private Insurance

Sometimes a distinction is made between public and private insurance. Public (or social) insurance includes Social Security, Medicare, temporary disability insurance, and the like, funded through government plans. Private insurance plans, by contrast, are all types of coverage offered by private corporations or organizations. The focus of this chapter is private insurance.

1. A contract of reimbursement.
2. The entity that agrees to provide insurance for the risk of certain kinds of losses, usually life, property, health, and liability claims.
3. The person or firm insured by a contract of insurance.
4. The contract for the insurance sought by the insured.
5. Potential losses that may be covered by policies of insurance.
6. Risks that are insured against.

Types of Insurance for the Individual

Life Insurance

Life insurance provides for your family or some other named beneficiaries on your death. Two general types are available: **term insurance**⁷ provides coverage only during the term of the policy and pays off only on the insured's death; **whole-life insurance**⁸ provides savings as well as insurance and can let the insured collect before death.

Health Insurance

Health insurance covers the cost of hospitalization, visits to the doctor's office, and prescription medicines. The most useful policies, provided by many employers, are those that cover 100 percent of the costs of being hospitalized and 80 percent of the charges for medicine and a doctor's services. Usually, the policy will contain a deductible amount; the insurer will not make payments until after the deductible amount has been reached. Twenty years ago, the deductible might have been the first \$100 or \$250 of charges; today, it is often much higher.

Disability Insurance

A disability policy pays a certain percentage of an employee's wages (or a fixed sum) weekly or monthly if the employee becomes unable to work through illness or an accident. Premiums are lower for policies with longer waiting periods before payments must be made: a policy that begins to pay a disabled worker within thirty days might cost twice as much as one that defers payment for six months.

Homeowner's Insurance

A homeowner's policy provides insurance for damages or losses due to fire, theft, and other named perils. No policy routinely covers all perils. The homeowner must assess his needs by looking to the likely risks in his area—earthquake, hailstorm, flooding, and so on. Homeowner's policies provide for reduced coverage if the property is not insured for at least 80 percent of its replacement costs. In inflationary times, this requirement means that the owner must adjust the policy limits upward each year or purchase a rider that automatically adjusts for inflation. Where property values have dropped substantially, the owner of a home (or a commercial building) might find savings in lowering the policy's insured amount.

7. Life insurance with a death benefit but no accumulated savings.

8. Provides savings as well as insurance and can let the insured collect before death.

Automobile Insurance

Automobile insurance is perhaps the most commonly held type of insurance. Automobile policies are required in at least minimum amounts in all states. The typical automobile policy covers liability for bodily injury and property damage, medical payments, damage to or loss of the car itself, and attorneys' fees in case of a lawsuit.

Other Liability Insurance

In this litigious society, a person can be sued for just about anything: a slip on the walk, a harsh and untrue word spoken in anger, an accident on the ball field. A personal liability policy covers many types of these risks and can give coverage in excess of that provided by homeowner's and automobile insurance. Such umbrella coverage is usually fairly inexpensive, perhaps \$250 a year for \$1 million in liability.

Types of Business Insurance

Workers' Compensation

Almost every business in every state must insure against injury to workers on the job. Some may do this through self-insurance—that is, by setting aside certain reserves for this contingency. Most smaller businesses purchase workers' compensation policies, available through commercial insurers, trade associations, or state funds.

Automobile Insurance

Any business that uses motor vehicles should maintain at least a minimum automobile insurance policy on the vehicles, covering personal injury, property damage, and general liability.

Property Insurance

No business should take a chance of leaving unprotected its buildings, permanent fixtures, machinery, inventory, and the like. Various property policies cover damage or loss to a company's own property or to property of others stored on the premises.

Malpractice Insurance

Professionals such as doctors, lawyers, and accountants will often purchase malpractice insurance to protect against claims made by disgruntled patients or

clients. For doctors, the cost of such insurance has been rising over the past thirty years, largely because of larger jury awards against physicians who are negligent in the practice of their profession.

Business Interruption Insurance

Depending on the size of the business and its vulnerability to losses resulting from damage to essential operating equipment or other property, a company may wish to purchase insurance that will cover loss of earnings if the business operations are interrupted in some way—by a strike, loss of power, loss of raw material supply, and so on.

Liability Insurance

Businesses face a host of risks that could result in substantial liabilities. Many types of policies are available, including policies for owners, landlords, and tenants (covering liability incurred on the premises); for manufacturers and contractors (for liability incurred on all premises); for a company's products and completed operations (for liability that results from warranties on products or injuries caused by products); for owners and contractors (protective liability for damages caused by independent contractors engaged by the insured); and for contractual liability (for failure to abide by performances required by specific contracts).

Some years ago, different types of individual and business coverage had to be purchased separately and often from different companies. Today, most insurance is available on a package basis, through single policies that cover the most important risks. These are often called multiperil policies.

KEY TAKEAWAY

Although insurance is a need for every US business, and many businesses operate in all fifty states, regulation of insurance has remained at the state level. There are several forms of public insurance (Social Security, disability, Medicare) and many forms of private insurance. Both individuals and businesses have significant needs for various types of insurance, to provide protection for health care, for their property, and for legal claims made against them by others.

EXERCISES

1. Theresa Conley is joining the accounting firm of Hunter and Patton in Des Moines, Iowa. She is a certified public accountant. What kind of insurance will she (or the firm, on her behalf) need to buy because of her professional activities?
2. Nate Johnson has just signed a franchise agreement with Papa Luigi's Pizza and will be operating his own Papa Luigi's store in Lubbock, Texas. The franchise agreement requires that he personally contract for "all necessary insurance" for the successful operation of the franchise. He expects to have twelve employees, five full-time and seven part-time (the delivery people), at his location, which will be on a busy boulevard in Lubbock and will offer take-out only. Pizza delivery employees will be using their own automobiles to deliver orders. What kinds of insurance will be "necessary"?

37.2 Property Insurance, Liability Insurance, and Life Insurance

LEARNING OBJECTIVES

1. Distinguish and define the basic types of insurance for property, liability, and life.
2. Explain the concepts of subrogation and assignment.

We turn now to a more detailed discussion of the law relating to the three most common types of insurance: property, liability, and life insurance.

Property Insurance

It is sometimes said that property is the foundation for a system of free market capitalism. If so, then protecting property is a necessary part of being part of that system, whether as an individual or as a business entity.

Coverage

As we have noted, property insurance provides coverage for real and personal property owned by a business or an individual. Property insurance is also part of automobile policies covering damage to the car caused by an accident (collision coverage) or by other events such as vandalism or fire (comprehensive coverage). Different levels of coverage are available. For example, many basic homeowners' policies cover damage resulting from the following types of perils only: fire and lightning, windstorm and hail, explosions, riots and civil commotions, aircraft and vehicular accidents, smoke, vandalism and malicious mischief, theft, and breakage of glass that is part of a building.

A broader policy, known as broad coverage, also includes these perils: falling objects; weight of ice, snow, and sleet; collapse of buildings; sudden and accidental damage to heating systems; accidental discharge from plumbing, heating, or air-conditioning systems; freezing of heating, plumbing, and air conditioning systems; and sudden and accidental injury from excess currents to electrical appliances and wiring. Even with the broadest form of coverage, known as comprehensive, which covers all perils except for certain named exclusions, the homeowner can be left without protection. For example, comprehensive policies do not usually cover damage resulting from flooding, earthquakes, war, or nuclear radiation. The

homeowner can purchase separate coverage for these perils but usually at a steep premium.

Insurable Interest in Property

To purchase property insurance, the would-be insured must have an **insurable interest**⁹ in the property. Insurable interest is a real and substantial interest in specific property such that a loss to the insured would ensue if the property were damaged. You could not, for instance, take out an insurance policy on a motel down the block with which you have no connection. If a fire destroyed it, you would suffer no economic loss. But if you helped finance the motel and had an investment interest in it, you would be permitted to place an insurance policy on it. This requirement of an insurable interest stems from the public policy against wagering. If you could insure anything, you would in effect be betting on an accident.

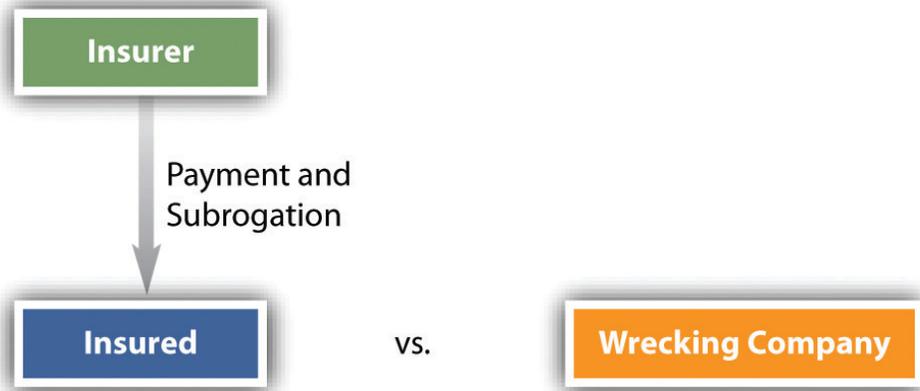

To insure property, therefore, you must have a legal interest and run the risk of a pecuniary loss. Any legal interest is sufficient: a contractual right to purchase, for instance, or the right of possession (a bailee may insure). This insurable interest must exist both at the time you take out the policy and at the time the loss occurs. Moreover, coverage is limited to the extent of the interest. As a mortgagee, you could ensure only for the amount still due.

Prior to the financial meltdown of 2008, many investment banks took insurance against possible losses from collateralized debt obligations (CDOs) and other financial products based on subprime loans. The principal insurer was American International Group, Inc. (AIG), which needed a US government bailout when the risks covered by AIG turned out to be riskier than AIG's models had projected.

9. A sufficiently substantial interest in property or someone's life to support a contract to insure it.

Subrogation

Figure 37.1 Subrogation

Subrogation¹⁰ is the substitution of one person for another in pursuit of a legal claim. When an insured is entitled to recover under a policy for property damage, the insurer is said to be subrogated to the insured's right to sue any third party who caused the damage. For example, a wrecking company negligently destroys an insured's home, mistaking it for the building it was hired to tear down. The insured has a cause of action against the wrecking company. If the insured chooses instead to collect against a homeowner's policy, the insurance company may sue the wrecking company in the insured's place to recover the sum it was obligated to pay out under the policy (see [Figure 37.1 "Subrogation"](#)).

Assignment

Assignment¹¹ is the transfer of any property right to another. In property insurance, a distinction is made between assignment of the coverage and assignment of the proceeds. Ordinarily, the insured may not assign the policy itself without the insurer's permission—that is, he may not commit the insurer to insure someone else. But the insured may assign any claims against the insurer—for example, the proceeds not yet paid out on a claim for a house that has already burned down.

Intentional Losses

Insurance is a means of spreading risk. It is economically feasible because not every house burns down and not every car is stolen. The number that do burn down or that are stolen can be calculated and the premium set accordingly. Events that will certainly happen, like ordinary wear and tear and the destruction of property

10. Substitution of one person for another who has a legal claim or right.

11. The transfer of any rights in a contract of insurance.

through deliberate acts such as arson, must be excluded from such calculations. The injury must result from accidental, not deliberate, causes.

Coinsurance Clause

Most commercial property policies contain a so-called **coinsurance clause**¹², which requires the insured to maintain insurance equal to a specified percentage of the property value. It is often 80 percent but may be higher or lower. If the property owner insures for less than that percentage, the recovery will be reduced. In effect, the owner becomes a coinsurer with the insurance company. The usual formula establishes the proportion that the insurer must pay by calculating the ratio of (1) the amount of insurance actually taken to (2) the coinsurance percentage multiplied by the total dollar value of the property. Suppose a fire causes \$160,000 damage to a plant worth \$1,000,000. The plant should have been insured for 80 percent (\$800,000), but the insured took out only a \$500,000 policy. He will recover only \$100,000. To see why, multiply the total damages of \$160,000 by the coinsurance proportion of five-eighths (\$500,000 of insurance on the required minimum of \$800,000). Five-eighths of \$160,000 equals \$100,000, which would be the insured's recovery where the policy has a coinsurance clause.

Liability Insurance

Liability insurance has taken on great importance for both individuals and businesses in contemporary society. Liability insurance covers specific types of legal liabilities that a homeowner, driver, professional, business executive, or business itself might incur in the round of daily activities. A business is always at risk in sending products into the marketplace. Doctors, accountants, real estate brokers, insurance agents, and lawyers should obtain liability insurance to cover the risk of being sued for malpractice. A prudent homeowner will acquire liability insurance as part of homeowner's policy and a supplemental umbrella policy that insures for liability in excess of a limit of, say, \$100,000 in the regular homeowner's policy. And businesses, professionals, and individuals typically acquire liability insurance for driving-related activities as part of their automobile insurance. In all cases, liability policies cover not only any settlement or award that might ultimately have to be paid but also the cost of lawyers and related expenses in defending any claims.

Liability insurance is similar in several respects to property insurance and is often part of the same package policy. As with property insurance, subrogation is allowed with liability insurance, but assignment of the policy is not allowed (unless permission of the insurer is obtained), and intentional losses are not covered. For example, an accountant who willfully helps a client conceal fraud will not recover

12. In property insurance, a clause that requires the insured to maintain insurance equal to a specified percentage of the property value.

from his malpractice insurance policy if he is found guilty of participating in the fraud.

No-Fault Trends

The major legal development of the century relating to liability insurance has been the elimination of liability in the two areas of greatest exposure: in the workplace and on the highway. In the next unit on agency law, we discuss the no-fault system of workers' compensation, under which a worker receives automatic benefits for workplace injuries and gives up the right to sue the employer under common-law theories of liability. Here we will look briefly at the other major type of no-fault system: recovery for damages stemming from motor vehicle accidents.

“No-fault” means that recovery for damages in an accident no longer depends on who was at fault in causing it. A motorist will file a claim to recover his actual damages (medical expenses, income loss) directly from his own insurer. The no-fault system dispenses with the costly and uncertain tort system of having to prove negligence in court. Many states have adopted one form or another of no-fault automobile insurance, but even in these states the car owner must still carry other insurance. Some no-fault systems have a dollar “threshold” above which a victim may sue for medical expenses or other losses. Other states use a “verbal threshold,” which permits suits for “serious” injury, defined variously as “disfigurement,” “fracture,” or “permanent disability.” These thresholds have prevented no-fault from working as efficiently as theory predicts. Inflation has reduced the power of dollar thresholds (in some states as low as \$200) to deter lawsuits, and the verbal thresholds have standards that can only be defined in court, so much litigation continues.

No state has adopted a “pure” no-fault system. A pure no-fault system trades away entirely the right to sue in return for the prompt payment of “first-party” insurance benefits—that is, payment by the victim’s own insurance company instead of traditional “third-party” coverage, in which the victim collects from the defendant’s insurance company.

Among the criticisms of no-fault insurance is the argument that it fails to strengthen the central purpose of the tort system: to deter unsafe conduct that causes accidents. No-fault lessens, it is said, the incentive to avoid accidents. In any event, no-fault automobile insurance has been a major development in the insurance field since 1970 and seems destined to be a permanent fixture of insurance law.

Life Insurance

Insurable Interest

The two types of life insurance mentioned in Section 37.1.2 "Types of Insurance for the Individual", term and whole-life policies, are important both to individuals and to businesses (insurance for key employees). As with property insurance, whoever takes out a life insurance policy on a person's life must have an insurable interest. Everyone has an insurable interest in his own life and may name whomever he pleases as beneficiary; the beneficiary need not have an insurable interest. But the requirement of insurable interest restricts those who may take out insurance on someone else's life. A spouse or children have an insurable interest in a spouse or parent. Likewise, a parent has an insurable interest in any minor child. That means that a wife, for example, may take out a life insurance policy on her husband without his consent. But she could not take out a policy on a friend or neighbor. As long as the insurable interest existed when the policy was taken out, the owner may recover when the insured dies, even if the insurable interest no longer exists. Thus a divorced wife who was married when the policy was obtained may collect when her ex-husband dies as long as she maintained the payments. Likewise, an employer has an insurable interest in his key employees and partners; such insurance policies help to pay off claims of a partner's estate and thus prevent liquidation of the business.

Subrogation

Unlike property insurance, life insurance does not permit subrogation. The insurer must pay the claim when the insured dies and may not step into the shoes of anyone entitled to file a wrongful death claim against a person who caused the death. Of course, if the insured died of natural causes, there would be no one to sue anyway.

Change of Beneficiary and Assignment

Unless the insured reserves the right to change beneficiaries, his or her initial designation is irrevocable. These days, however, most policies do reserve the right if certain formalities are observed, including written instructions to the insurer's home office to make the change and endorsement of the policy. The insured may assign the policy, but the beneficiary has priority to collect over the assignee if the right to change beneficiaries has not been reserved. If the policy permits beneficiaries to be changed, then the assignee will have priority over the original beneficiary.

Intentional Losses

Two types of intentional losses are especially important in life insurance: suicide and murder of the insured by the beneficiary.

Suicide

In a majority of states, in the absence of a suicide clause in the policy, when an insured commits suicide, the insurer need not pay out if the policy is payable to the insured's estate. However, if the policy is payable to a third person (e.g., the insured's company), payment will usually be allowed. And if an insured kills himself while insane, all states require payment, whether to the estate or a third party. Most life insurance policies today have a provision that explicitly excepts suicide from coverage for a limited period, such as two years, after the policy is issued. In other words, if the insured commits suicide within the first two years, the insurer will refund the premiums to his estate but will not pay the policy amount. After two years, suicide is treated as any other death would be.

Murder

Under the law in every state, a beneficiary who kills the insured in order to collect the life insurance is barred from receiving it. But the invocation of that rule does not absolve the insurer of liability to pay the policy amount. An alternate beneficiary must be found. Sometimes the policy will name contingent beneficiaries, and many, but not all, states require the insurer to pay the contingent beneficiaries. When there are no contingent beneficiaries or the state law prohibits paying them, the insurer will pay the insured's estate. Not every killing is murder; the critical question is whether the beneficiary intended his conduct to eliminate the insured in order to collect the insurance.

The willful, unlawful, and felonious killing of the insured by the person named as beneficiary in a life policy results in the forfeiture of all rights of such person therein. It is unnecessary that there should be an express exception in the contract of insurance forbidding a recovery in favor of such a person in such an event. On considerations of public policy, the death of the insured, willfully and intentionally caused by the beneficiary of the policy, is an excepted risk so far as the person thus causing the death is concerned.

KEY TAKEAWAY

Many kinds of insurance are available for individuals and businesses. For individuals, life insurance, homeowner's insurance, and automobile insurance are common, with health insurance considered essential but often expensive. Businesses with sufficient employees will obtain workers' compensation insurance, property insurance, and liability insurance, and auto insurance for any employees driving company vehicles. Insurance companies will often pay a claim for their insured and take over the insured's claim against a third party.

Liability insurance is important for individuals, companies, and licensed professionals. A trend toward no-fault in liability insurance is seen in claims for work-related injuries (workers' compensation) and in automobile insurance. Life insurance is common for most families and for businesses that want to protect against the loss of key employees.

EXERCISES

1. Helen Caldicott raises a family and then begins a career as a caterer. As her business grows, she hires several employees and rents space near downtown that has a retail space, parking, and a garage for the three vehicles that bear her business's name. What kinds of insurance does Helen need for her business?
2. One of Helen's employees, Bob Zeek, is driving to a catered event when another car fails to stop at a red light and severely injures Bob and nearly totals the van Bob was driving. The police issue a ticket for careless and reckless driving to the other driver, who pleads guilty to the offense. The other driver is insured, but Helen's automobile insurance carrier goes ahead and pays for the damages to the company vehicle. What will her insurance company likely do next?
3. The health insurance provider for Helen's employees pays over \$345,000 of Bob's medical and hospitalization bills. What will Helen's insurance company likely do next?
4. Many homeowners live on floodplains but have homeowner's insurance nonetheless. Must insurance companies write such policies? Do homeowners on floodplains pay more in premiums? If insurance companies are convinced that global climate change is happening, with rising sea levels and stronger storms, can they simply avoid writing policies for homes and commercial buildings in coastal areas?

37.3 Insurer's Defenses

LEARNING OBJECTIVES

1. Understand the principal defenses available to insurers when claims are made.
2. Recognize that despite these defenses, insurance companies must act in good faith.

Types of Defenses

It is a common perception that because insurance contracts are so complex, many insureds who believe they are covered end up with uninsured losses. In other words, the large print giveth, and the small print taketh away. This perception is founded, to some extent, on the use by insurance companies of three common defenses, all of which relate to a duty of good faith on the part of the insured: (1) representation, (2) concealment, and (3) warranties.

Representation

A **representation**¹³ is a statement made by someone seeking an insurance policy—for example, a statement that the applicant did (or did not) consult a doctor for any illness during the previous five years. An insurer has grounds to avoid the contract if the applicant makes a false representation. The misrepresentation must have been material; that is, a false description of a person's hair coloring should not defeat a claim under an automobile accident policy. But a false statement, even if innocent, about a material fact—for instance, that no one in the family uses the car to go to work, when unbeknownst to the applicant, his wife uses the car to commute to a part-time job she hasn't told him about—will at the insurer's option defeat a claim by the insured to collect under the policy. The accident need not have arisen out of the misrepresentation to defeat the claim. In the example given, the insurance company could refuse to pay a claim for any accident in the car, even one occurring when the car was driven by the husband to go to the movies, if the insurer discovered that the car was used in a manner in which the insured had declared it was not used. This chapter's case, *Mutual Benefit Life Insurance Co. v. JMR Electronics Corp.*, (see [Section 37.4.1 "Misrepresentation to Insurer"](#)), illustrates what happens when an insured misrepresents his smoking habits.

13. Statements made by the insured in the application process.

Concealment

An insured is obligated to volunteer to the insurer all material facts that bear on insurability. The failure of an insured to set forth such information is a **concealment**¹⁴, which is, in effect, the mirror image of a false representation. But the insured must have had a fraudulent intent to conceal the material facts. For example, if the insured did not know that gasoline was stored in his basement, the insurer may not refuse to pay out on a fire insurance policy.

Warranties

Many insurance policies covering commercial property will contain warranties. For example, a policy may have a warranty that the insured bank has installed or will install a particular type of burglar alarm system. Until recently, the rule was strictly enforced: any breach of a warranty voided the contract, even if the breach was not material. A nonmaterial breach might be, for example, that the bank obtained the alarm system from a manufacturer other than the one specified, even though the alarm systems are identical. In recent years, courts or legislatures have relaxed the application of this rule. But a material breach still remains absolute grounds for the insurer to avoid the contract and refuse to pay.

Incontestable Clause

In life insurance cases, the three common defenses often are unavailable to the insurer because of the so-called **incontestable clause**¹⁵. This states that if the insured has not died during a specified period of time in which the life insurance policy has been in effect (usually two years), then the insurer may not refuse to pay even if it is later discovered that the insured committed fraud in applying for the policy. Few nonlife policies contain an incontestable clause; it is used in life insurance because the effect on many families would be catastrophic if the insurer claimed misrepresentation or concealment that would be difficult to disprove years later when the insured himself would no longer be available to give testimony about his intentions or knowledge.

Requirement of Insurer's Good Faith

Like the insured, the insurer must act in good faith. Thus defenses may be unavailable to an insurer who has waived them or acted in such a manner as to create an estoppel. Suppose that when an insured seeks to increase the amount on his life insurance policy, the insurance company learns that he lied about his age on his original application. Nevertheless, the company accepts his application for an increase. The insured then dies, and the insurer refuses to pay his wife any sum. A court would hold that the insurer had waived its right to object, since it could have

14. The failure of an insured to set forth all the material facts in applying for insurance.

15. A clause in a life insurance policy that limits the insurance carrier's right to contest insurability after a certain number of years of premium payments on the policy.

cancelled the policy when it learned of the misrepresentation. Finally, an insurer that acts in bad faith by denying a claim that it knows it should pay may find itself open to punitive damage liability.

KEY TAKEAWAY

Some claims by insured parties can be legally denied by insurance companies where the insured has made a material misrepresentation. Some claims can be legally denied if the insured has deliberately concealed important matters in applying for insurance coverage. Because insurance coverage is by contract, courts often strictly construe the contract language, and if the language does not cover the insured, the courts will typically not bend the language of the contract to help the insured.

EXERCISES

1. Amir Labib gets a reduced rate from his auto insurance company because he represents in his application that he commutes less than ten miles a day to work. Three years later, he and his wife buy a new residence, farther away from work, and he begins a fifteen-mile-a-day commute. The rate would be raised if he were to mention this to his insurance company. The insurance company sees that he has a different address, because they are mailing invoices to his new home. But the rate remains the same. Amir has a serious accident on a vacation to Yellowstone National Park, and his automobile is totaled. His insurance policy is a no-fault policy as it relates to coverage for vehicle damage. Is the insurance company within its rights to deny any payment on his claim? How so, or why not?
2. In 2009, Peter Calhoun gets a life insurance policy from Northwest Mutual Life Insurance Company, and the death benefit is listed as \$250,000. The premiums are paid up when he dies in 2011 after a getaway car being chased by the police slams into his car at fifty miles per hour on a street in suburban Chicago. The life insurance company gets information that he smoked two packs of cigarettes a day, whereas in his application in 2009, he said he smoked only one pack a day. In fact, he had smoked about a pack and a half every day since 1992. Is the insurance company within its rights to deny any payment on his claim? How so, or why not?

37.4 Case

Misrepresentation to Insurer

Mutual Benefit Life Insurance Co. v. JMR Electronics Corp.

848 F.2d 30 (2nd Cir. 1988)

PER CURIAM

JMR Electronics Corporation (“JMR”) appeals from a judgment of the District Court for the Southern District of New York (Robert W. Sweet, Judge) ordering rescission of a life insurance policy issued by plaintiff-appellant The Mutual Benefit Life Insurance Company (“Mutual”) and dismissing JMR’s counterclaim for the policy’s proceeds. Judge Sweet ruled that a misrepresentation made in the policy application concerning the insured’s history of cigarette smoking was material as a matter of law. Appellant contends that the misrepresentation was not material because Mutual would have provided insurance—albeit at a higher premium rate—even if the insured’s smoking history had been disclosed. We agree with the District Court that summary judgment was appropriate and therefore affirm.

The basic facts are not in dispute. On June 24, 1985, JMR submitted an application to Mutual for a \$ 250,000 “key man” life insurance policy on the life of its president, Joseph Gaon, at the non-smoker’s discounted premium rate. Mutual’s 1985 Ratebook provides: “The Non-Smoker rates are available when the proposed insured is at least 20 years old and has not smoked a cigarette for at least twelve months prior to the date of the application.” Question 13 of the application inquired about the proposed insured’s smoking history. Question 13(a) asked, “Do you smoke cigarettes? How many a day?” Gaon answered this question, “No.” Question 13(b) asked, “Did you ever smoke cigarettes?” Gaon again answered, “No.” Based on these representations, Mutual issued a policy on Gaon’s life at the non-smoker premium rate.

Gaon died on June 22, 1986, within the period of contestability contained in policy, *see* N.Y. Ins. Law § 3203 (a)(3) (McKinney 1985). Upon routine investigation of JMR’s claim for proceeds under the policy, Mutual discovered that the representations made in the insurance application concerning Gaon’s smoking history were untrue. JMR has stipulated that, at the time the application was submitted, Gaon in fact “had been smoking one-half of a pack of cigarettes per day for a continuous period of not less than 10 years.” Mutual brought this action seeking a declaration that the

policy is void. Judge Sweet granted Mutual's motion for summary judgment, dismissed JMR's counterclaim for the proceeds of the policy, and ordered rescission of the insurance policy and return of JMR's premium payments, with interest.

Under New York law, which governs this diversity suit, "it is the rule that even an innocent misrepresentation as to [the applicant's medical history], if material, is sufficient to allow the insurer to avoid the contract of insurance or defeat recovery thereunder." *Process Plants Corp. v. Beneficial National Life Insurance Co.*, 366 N.E.2d 1361 (1977). A "misrepresentation" is defined by statute as a false "statement as to past or present fact, made to the insurer...at or before the making of the insurance contract as an inducement to the making thereof." N.Y. Ins. Law § 3105(a) (McKinney 1985). A misrepresentation is "material" if "knowledge by the insurer of the facts misrepresented would have led to a refusal by the insurer to make such contract." *Id.* § 3105(b)....

In the present case JMR has stipulated that Gaon's smoking history was misrepresented in the insurance application. However, JMR disputes that this misrepresentation is material as a matter of law. JMR argues that under New York law a misrepresentation is not material unless the insurer can demonstrate that, had the applicant provided complete and accurate information, coverage either would have been refused or at the very least withheld pending a more detailed underwriting examination. In JMR's view summary judgment was inappropriate on the facts of this case because a jury could reasonably have found that even "had appellee been aware of Gaon's smoking history, a policy at the smoker's premium rate would have been issued." JMR takes the position that the appropriate remedy in this situation is to permit recovery under the policy in the amount that the premium actually paid would have purchased for a smoker.

We agree with Judge Sweet that this novel theory is without basis in New York law. The plain language of the statutory definition of "materiality," found in section 3105(b), permits avoidance of liability under the policy where "knowledge by the insurer of the facts misrepresented would have led to a refusal by the insurer to make *such contract*." (emphasis added) Moreover, numerous courts have observed that the materiality inquiry under New York law is made with respect to the particular policy issued in reliance upon the misrepresentation.

* * *

There is no doubt that Mutual was induced to issue the non-smoker, discounted-premium policy to JMR precisely as a result of the misrepresentations made by Gaon concerning his smoking history. That Mutual might not have refused the risk on *any* terms had it known the undisclosed facts is irrelevant. Most risks are

insurable at some price. The purpose of the materiality inquiry is not to permit the jury to rewrite the terms of the insurance agreement to conform to the newly disclosed facts but to make certain that the risk insured was the risk covered by the policy agreed upon. If a fact is material to the risk, the insurer may avoid liability under a policy if that fact was misrepresented in an application for that policy whether or not the parties might have agreed to some other contractual arrangement had the critical fact been disclosed. As observed by Judge Sweet, a contrary result would reward the practice of misrepresenting facts critical to the underwriter's task because the unscrupulous (or merely negligent) applicant "would have everything to gain and nothing to lose" from making material misrepresentations in his application for insurance. Such a claimant could rest assured not only that he may demand full coverage should he survive the contestability period, N.Y. Ins. Law § 3203 (a)(3), but that even in the event of a contested claim, he would be entitled to the coverage that he might have contracted for had the necessary information been accurately disclosed at the outset. New York law does not permit this anomalous result. The judgment of the District Court is affirmed.

CASE QUESTIONS

1. When you read this case, did you assume that Gaon died from lung cancer or some other smoking-related cause? Does the court actually say that?
2. Can you reasonably infer from the facts here that Gaon himself filled out the form and signed it? That is, can you know with some degree of certainty that he lied to the insurance company? Would it make any difference if he merely signed a form that his secretary filled out? Why or why not?
3. What if Gaon died of causes unrelated to smoking (e.g., he was in a fatal automobile accident), and the insurance company was looking for ways to deny the claim? Does the court's opinion and language still seem reasonable (e.g., the statement "there is no doubt that Mutual was induced to issue the non-smoker, discounted-premium policy to JMR precisely as a result of the misrepresentations made by Gaon concerning his smoking history")?
4. If Gaon had accurately disclosed his smoking history, is it clear that the insurance company would have refused to write any policy at all? Why is this question important? Do you agree with the court that the question is irrelevant?

37.5 Summary and Exercises

Summary

Insurance is an inescapable cost of doing business in a modern economy and an important service for any individual with dependents or even a modest amount of property. Most readers of this book will someday purchase automobile, homeowner's, and life insurance, and many readers will deal with insurance in the course of a business career.

Most insurance questions are governed by contract law, since virtually all insurance is voluntary and entered into through written agreements. This means that the insured must pay careful attention to the wording of the policies to determine what is excluded from coverage and to ensure that he makes no warranties that he cannot keep and no misrepresentations or concealments that will void the contract. But beyond contract law, some insurance law principles—such as insurable interest and subrogation rights—are important to bear in mind. Defenses available to an insurance company may be based upon representation, concealment, or warranties, but an insurer that is overzealous in denying coverage may find itself subject to punitive damages.

EXERCISES

1. Martin and Williams, two business partners, agreed that each would insure his life for the benefit of the other. On his application for insurance, Martin stated that he had never had any heart trouble when in fact he had had a mild heart attack some years before. Martin's policy contained a two-year incontestable clause. Three years later, after the partnership had been dissolved but while the policy was still in force, Martin's car was struck by a car being negligently driven by Peters. Although Martin's injuries were superficial, he suffered a fatal heart attack immediately after the accident—an attack, it was established, that was caused by the excitement. The insurer has refused to pay the policy proceeds to Williams. Does the insurer have a valid defense based on Martin's misrepresentation? Explain.
2. In Exercise 1, was it necessary for Williams to have an insurable interest in Martin's life to recover under the policy? Why?
3. In Exercise 1, if Williams had taken out the policy rather than Martin, could the insurer defend the claim on the ground that at the time of Martin's death, Williams had no insurable interest? Why?
4. If Williams had no insurable interest, would the incontestable clause prevent the company from asserting this defense? Why?
5. If the insurer pays Williams's claim, may it recover from Peters? Why?
6. Skidmore Trucking Company decided to expand its operations into the warehousing field. After examining several available properties, it decided to purchase a carbarn for \$100,000 from a local bus company and to convert it into a warehouse. The standard contract for a real estate purchase was signed by the parties. The contract obligated Skidmore to pay the seller on an apportioned basis for the prepaid premiums on the existing fire insurance policy (\$100,000 extended coverage). The policy expired two years and one month from the closing date. At the closing, the seller duly assigned the fire insurance policy to Skidmore in return for the payment of the apportioned amount of the prepaid premiums, but Skidmore failed to notify the insurance company of the change in ownership. Skidmore took possession of the premises and, after extensive renovation, began to use the building as a warehouse. Soon afterward, one of Skidmore's employees negligently dropped a lighted cigarette into a trash basket and started a fire that totally destroyed the building. Was the assignment of the policy to Skidmore valid? Why?
7. In Exercise 6, assuming the assignment is valid, would the insurer be obligated to pay for the loss resulting from the employee's negligence? Why?

SELF-TEST QUESTIONS

1. The substitution of one person for another in pursuit of a legal claim is called
 - a. assignment
 - b. coinsurance
 - c. subrogation
 - d. none of the above

2. Most insurance questions are covered by
 - a. tort law
 - b. criminal law
 - c. constitutional law
 - d. contract law

3. Common defenses used by insurance companies include
 - a. concealment
 - b. false representation
 - c. breach of warranty
 - d. all of the above

4. A coinsurance clause
 - a. requires the insured to be insured by more than one policy
 - b. requires the insured to maintain insurance equal to a certain percentage of the property's value
 - c. allows another beneficiary to be substituted for the insured
 - d. is none of the above

5. Property insurance typically covers
 - a. ordinary wear and tear
 - b. damage due to theft
 - c. intentional losses
 - d. damage due to earthquakes

SELF-TEST ANSWERS

1. c
2. d
3. d
4. b
5. b

Chapter 38

Relationships between Principal and Agent

LEARNING OBJECTIVES

After reading this chapter, you should understand the following:

1. Why agency is important, what an agent is, and the types of agents
2. What an independent contractor is
3. The duties owed by the agent to the principal
4. The duties owed by the principal to the agent

38.1 Introduction to Agency and the Types of Agents

LEARNING OBJECTIVES

1. Understand why agency law is important.
2. Recognize the recurring legal issues in agency law.
3. Know the types of agents.
4. Understand how the agency relationship is created.

Introduction to Agency Law

Why Is Agency Law Important, and What Is an Agent?

An agent is a person who acts in the name of and on behalf of another, having been given and assumed some degree of authority to do so. Most organized human activity—and virtually all commercial activity—is carried on through agency. No corporation would be possible, even in theory, without such a concept. We might say “General Motors is building cars in China,” for example, but we can’t shake hands with General Motors. “The General,” as people say, exists and works through agents. Likewise, partnerships and other business organizations rely extensively on agents to conduct their business. Indeed, it is not an exaggeration to say that agency is the cornerstone of enterprise organization. In a partnership each partner is a general agent, while under corporation law the officers and all employees are agents of the corporation.

The existence of agents does not, however, require a whole new law of torts or contracts. A tort is no less harmful when committed by an agent; a contract is no less binding when negotiated by an agent. What does need to be taken into account, though, is the manner in which an agent acts on behalf of his principal and toward a third party.

Recurring Issues in Agency Law

Several problematic fact scenarios recur in agency, and law has developed in response.

John Alden

Consider John Alden (1599–1687), one of the most famous agents in American literature. He is said to have been the first person from the *Mayflower* to set foot on

Plymouth Rock in 1620; he was a carpenter, a cooper (barrel maker), and a diplomat. His agency task—of interest here—was celebrated in Henry Wadsworth Longfellow’s “The Courtship of Miles Standish.” He was to woo Priscilla Mullins (d. 1680), “the loveliest maiden of Plymouth,” on behalf of Captain Miles Standish, a valiant soldier who was too shy to propose marriage. Standish turned to John Alden, his young and eloquent protégé, and beseeched Alden to speak on his behalf, unaware that Alden himself was in love with Priscilla. Alden accepted his captain’s assignment, despite the knowledge that he would thus lose Priscilla for himself, and sought out the lady. But Alden was so tongue-tied that his vaunted eloquence fell short, turned Priscilla cold toward the object of Alden’s mission, and eventually led her to turn the tables in one of the most famous lines in American literature and poetry: “Why don’t you speak for yourself, John?” John eventually did: the two were married in 1623 in Plymouth.

Recurring Issues in Agency

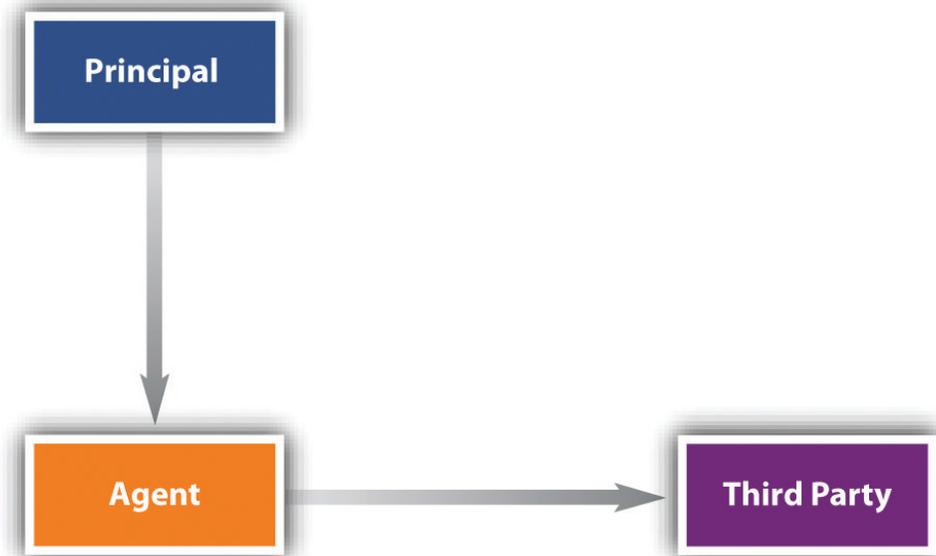

Let’s analyze this sequence of events in legal terms—recognizing, of course, that this example is an analogy and that the law, even today, would not impose consequences on Alden for his failure to carry out Captain Standish’s wishes. Alden was the captain’s agent: he was specifically authorized to speak in his name in a manner agreed on, toward a specified end, and he accepted the assignment in consideration of the captain’s friendship. He had, however, a conflict of interest. He attempted to carry out the assignment, but he did not perform according to expectations. Eventually, he wound up with the prize himself. Here are some questions to consider, the same questions that will recur throughout the discussion of agency:

- How extensive was John’s authority? Could he have made promises to Priscilla on the captain’s behalf—for example, that Standish would have built her a fine house?
- Could he, if he committed a tort, have imposed liability on his principal? Suppose, for example, that he had ridden at breakneck speed to reach Priscilla’s side and while en route ran into and injured a pedestrian on the road. Could the pedestrian have sued Standish?
- Suppose Alden had injured himself on the journey. Would Standish be liable to Alden?
- Is Alden liable to Standish for stealing the heart of Priscilla—that is, for taking the “profits” of the enterprise for himself?

As these questions suggest, agency law often involves three parties—the principal, the agent, and a third party. It therefore deals with three different relationships: between principal and agent, between principal and third party, and between agent

and third party. These relationships can be summed up in a simple diagram (see [Figure 38.1 "Agency Relationships"](#)).

Figure 38.1 Agency Relationships

In this chapter, we will consider the principal-agent side of the triangle. In the next chapter we will turn to relationships involving third parties.

Types of Agents

There are five types of agents.

General Agent

The **general agent**¹ possesses the authority to carry out a broad range of transactions in the name and on behalf of the principal. The general agent may be the manager of a business or may have a more limited but nevertheless ongoing role—for example, as a purchasing agent or as a life insurance agent authorized to sign up customers for the home office. In either case, the general agent has authority to alter the principal's legal relationships with third parties. One who is designated a general agent has the authority to act in any way required by the principal's business. To restrict the general agent's authority, the principal must spell out the limitations explicitly, and even so the principal may be liable for any of the agent's acts in excess of his authority.

1. Someone authorized to transact every kind of business for the principal.

Normally, the general agent is a business agent, but there are circumstances under which an individual may appoint a general agent for personal purposes. One common form of a personal general agent is the person who holds another's power of attorney. This is a delegation of authority to another to act in his stead; it can be accomplished by executing a simple form, such as the one shown in [Figure 38.2 "General Power of Attorney"](#). Ordinarily, the power of attorney is used for a special purpose—for example, to sell real estate or securities in the absence of the owner. But a person facing a lengthy operation and recuperation in a hospital might give a general power of attorney to a trusted family member or friend.

Figure 38.2 *General Power of Attorney*

General Power of Attorney

I, _____, of (address) _____, hereby appoint
_____, of (address) _____, to be my agent and attorney
in fact. I grant my agent full authority and power to act on my behalf to do anything I could do
if I were personally present.

Signed _____; date _____.

In witness:

{Acknowledgement by notary}

Special Agent

The **special agent**² is one who has authority to act only in a specifically designated instance or in a specifically designated set of transactions. For example, a real estate broker is usually a special agent hired to find a buyer for the principal's land. Suppose Sam, the seller, appoints an agent Alberta to find a buyer for his property. Alberta's commission depends on the selling price, which, Sam states in a letter to her, "in any event may be no less than \$150,000." If Alberta locates a buyer, Bob, who agrees to purchase the property for \$160,000, her signature on the contract of sale will not bind Sam. As a special agent, Alberta had authority only to find a buyer; she had no authority to sign the contract.

2. An agent hired by contract to carry out specifically stated activities.

Agency Coupled with an Interest

An agent whose reimbursement depends on his continuing to have the authority to act as an agent is said to have an **agency coupled with an interest**³ if he has a property interest in the business. A literary or author's agent, for example, customarily agrees to sell a literary work to a publisher in return for a percentage of all monies the author earns from the sale of the work. The literary agent also acts as a collection agent to ensure that his commission will be paid. By agreeing with the principal that the agency is coupled with an interest, the agent can prevent his own rights in a particular literary work from being terminated to his detriment.

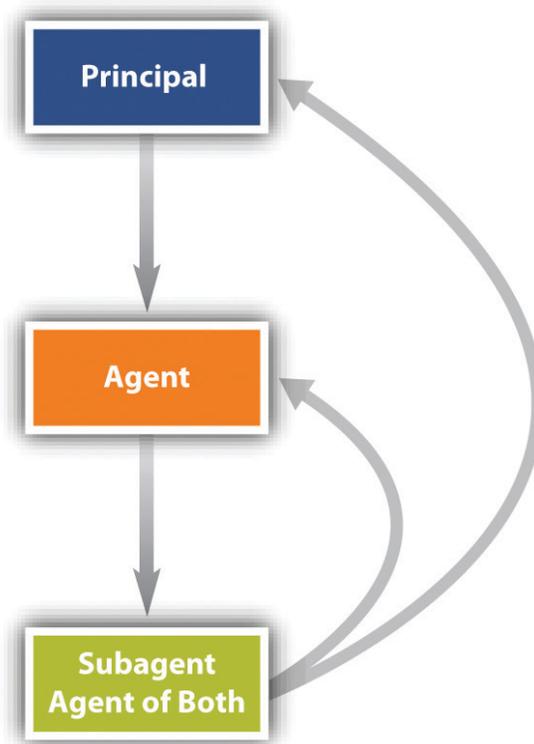

Subagent

To carry out her duties, an agent will often need to appoint her own agents. These appointments may or may not be authorized by the principal. An insurance company, for example, might name a general agent to open offices in cities throughout a certain state. The agent will necessarily conduct her business through agents of her own choosing. These agents are **subagents**⁴ of the principal if the general agent had the express or implied authority of the principal to hire them. For legal purposes, they are agents of both the principal and the principal's general agent, and both are liable for the subagent's conduct although normally the general agent agrees to be primarily liable (see [Figure 38.3 "Subagent"](#)).

3. An agency in which the agent has an interest in the property regarding which he or she is acting on the principal's behalf.

4. The agent of an agent.

Figure 38.3 Subagent

Servant

The final category of agent is the **servant**⁵. Until the early nineteenth century, any employee whose work duties were subject to an employer’s control was called a servant; we would not use that term so broadly in modern English. The Restatement (Second) of Agency, Section 2, defines a servant as “an agent employed by a master [employer] to perform service in his affairs whose physical conduct in the performance of the service is controlled or is subject to the right to control by the master.”

Independent Contractor

Not every contract for services necessarily creates a master-servant relationship. There is an important distinction made between the status of a servant and that of an **independent contractor**⁶. According to the Restatement (Second) of Agency, Section 2, “an independent contractor is a person who contracts with another to do something for him but who is not controlled by the other nor subject to the other’s right to control with respect to his physical conduct in the performance of the undertaking.” As the name implies, the independent contractor is legally

5. An employee.

6. A person who is hired to accomplish a result but is not subject to specific control by the one hiring.

autonomous. A plumber salaried to a building contractor is an employee and agent of the contractor. But a plumber who hires himself out to repair pipes in people's homes is an independent contractor. If you hire a lawyer to settle a dispute, that person is not your employee or your servant; she is an independent contractor. The terms "agent" and "independent contractor" are not necessarily mutually exclusive. In fact, by definition, "... an independent contractor is an agent in the broad sense of the term in undertaking, at the request of another, to do something for the other. As a general rule the line of demarcation between an independent contractor and a servant is not clearly drawn."¹ *Flick v. Crouch*, 434 P.2d 256, 260 (OK, 1967).

This distinction between agent and independent contractor has important legal consequences for taxation, workers' compensation, and liability insurance. For example, employers are required to withhold income taxes from their employees' paychecks. But payment to an independent contractor, such as the plumber for hire, does not require such withholding. Deciding who is an independent contractor is not always easy; there is no single factor or mechanical answer. In *Robinson v. New York Commodities Corp.*, an injured salesman sought workers' compensation benefits, claiming to be an employee of the New York Commodities Corporation. *Robinson v. New York Commodities Corp.*, 396 N.Y.S.2d 725, App. Div. (1977). But the state workmen's compensation board ruled against him, citing a variety of factors. The claimant sold canned meats, making rounds in his car from his home. The company did not establish hours for him, did not control his movements in any way, and did not reimburse him for mileage or any other expenses or withhold taxes from its straight commission payments to him. He reported his taxes on a form for the self-employed and hired an accountant to prepare it for him. The court agreed with the compensation board that these facts established the salesman's status as an independent contractor.

The factual situation in each case determines whether a worker is an employee or an independent contractor. Neither the company nor the worker can establish the worker's status by agreement. As the North Dakota Workmen's Compensation Bureau put it in a bulletin to real estate brokers, "It has come to the Bureau's attention that many employers are requiring that those who work for them sign 'independent contractor' forms so that the employer does not have to pay workmen's compensation premiums for his employees. Such forms are meaningless if the worker is in fact an employee." *Vizcaino v. Microsoft Corporation*, discussed in [Section 38.3.2 "Employee versus Independent Contractor"](#), examines the distinction.

In addition to determining a worker's status for tax and compensation insurance purposes, it is sometimes critical for decisions involving personal liability insurance policies, which usually exclude from coverage accidents involving employees of the

insureds. *General Accident Fire & Life Assurance Corp v. Pro Golf Association* *General Accident Fire & Life Assurance Corp v. Pro Golf Association*, 352 N.E.2d 441 (Ill. App. 1976). involved such a situation. The insurance policy in question covered members of the Professional Golfers Association. Gerald Hall, a golf pro employed by the local park department, was afforded coverage under the policy, which excluded “bodily injury to any employee of the insured arising out of and in the course of his employment by the insured.” That is, no employee of Hall’s would be covered (rather, any such person would have coverage under workers’ compensation statutes). Bradley Martin, age thirteen, was at the golf course for junior league play. At Hall’s request, he agreed to retrieve or “shag” golf balls to be hit during a lesson Hall was giving; he was—as Hall put it—to be compensated “either through golf instructions or money or hotdogs or whatever.” During the course of the lesson, a golf ball hit by Hall hit young Martin in the eye. If Martin was an employee, the insurance company would be liable; if he was not an employee, the insurance company would not be liable. The trial court determined he was not an employee. The evidence showed: sometimes the boys who “shagged” balls got paid, got golfing instructions, or got food, so the question of compensation was ambiguous. Martin was not directed in how to perform (the admittedly simple) task of retrieving golf balls, no control was exercised over him, and no equipment was required other than a bag to collect the balls: “We believe the evidence is susceptible of different inferences....We cannot say that the decision of the trial court is against the manifest weight of the evidence.”

Creation of the Agency Relationship

The agency relationship can be created in two ways: by agreement (expressly) or by operation of law (constructively or impliedly).

Agency Created by Agreement

Most agencies are created by contract. Thus the general rules of contract law covered in [Chapter 8 "Introduction to Contract Law"](#) through [Chapter 16 "Remedies"](#) govern the law of agency. But agencies can also be created without contract, by agreement. Therefore, three contract principles are especially important: the first is the requirement for consideration, the second for a writing, and the third concerns contractual capacity.

Consideration

Agencies created by consent—agreement—are not necessarily contractual. It is not uncommon for one person to act as an agent for another without consideration. For example, Abe asks Byron to run some errands for him: to buy some lumber on his

account at the local lumberyard. Such a **gratuitous agency**⁷ gives rise to no different results than the more common contractual agency.

Formalities

Most oral agency contracts are legally binding; the law does not require that they be reduced to writing. In practice, many agency contracts are written to avoid problems of proof. And there are situations where an agency contract must be in writing: (1) if the agreed-on purpose of the agency cannot be fulfilled within one year or if the agency relationship is to last more than one year; (2) in many states, an agreement to pay a commission to a real estate broker; (3) in many states, authority given to an agent to sell real estate; and (4) in several states, contracts between companies and sales representatives.

Even when the agency contract is not required to be in writing, contracts that agents make with third parties often must be in writing. Thus Section 2-201 of the Uniform Commercial Code specifically requires contracts for the sale of goods for the price of five hundred dollars or more to be in writing and “signed by the party against whom enforcement is sought or by his authorized agent.”

Capacity

A contract is void or voidable when one of the parties lacks capacity to make one. If both principal and agent lack capacity—for example, a minor appoints another minor to negotiate or sign an agreement—there can be no question of the contract’s voidability. But suppose only one or the other lacks capacity. Generally, the law focuses on the principal. If the principal is a minor or otherwise lacks capacity, the contract can be avoided even if the agent is fully competent. There are, however, a few situations in which the capacity of the agent is important. Thus a mentally incompetent agent cannot bind a principal.

Agency Created by Operation of Law

Most agencies are made by contract, but agency also may arise impliedly or apparently.

Implied Agency

In areas of social need, courts have declared an agency to exist in the absence of an agreement. The agency relationship then is said to have been implied “by operation of law.” Children in most states may purchase necessary items—food or medical services—on the parent’s account. Long-standing social policy deems it desirable for

7. An agency where the agent receives no compensation.

the head of a family to support his dependents, and the courts will put the expense on the family head in order to provide for the dependents' welfare. The courts achieve this result by supposing the dependent to be the family head's agent, thus allowing creditors to sue the family head for the debt.

Implied agencies also arise where one person behaves as an agent would and the "principal," knowing that the "agent" is behaving so, acquiesces, allowing the person to hold himself out as an agent. Such are the basic facts in *Weingart v. Directoire Restaurant, Inc.* in [Section 38.3.1 "Creation of Agency: Apparent Authority"](#).

Apparent Agency

Suppose Arthur is Paul's agent, employed through October 31. On November 1, Arthur buys materials at Lumber Yard—as he has been doing since early spring—and charges them to Paul's account. Lumber Yard, not knowing that Arthur's employment terminated the day before, bills Paul. Will Paul have to pay? Yes, because the termination of the agency was not communicated to Lumber Yard. It *appeared* that Arthur was an authorized agent. This issue is discussed further in [Chapter 39 "Liability of Principal and Agent; Termination of Agency"](#).

KEY TAKEAWAY

An agent is one who acts on behalf of another. Many transactions are conducted by agents so acting. All corporate transactions, including those involving governmental organizations, are so conducted because corporations cannot themselves actually act; they are legal fictions. Agencies may be created expressly, impliedly, or apparently. Recurring issues in agency law include whether the "agent" really is such, the scope of the agent's authority, and the duties among the parties. The five types of agents include: general agent, special agent, subagent, agency coupled with an interest, and servant (or employee). The independent contractor is not an employee; her activities are not specifically controlled by her client, and the client is not liable for payroll taxes, Social Security, and the like. But it is not uncommon for an employer to claim workers are independent contractors when in fact they are employees, and the cases are often hard-fought on the facts.

EXERCISES

1. Why is agency law especially important in the business and government context?
2. What are the five types of agents?
3. What distinguishes an employee from an independent contractor?
4. Why do employers frequently try to pass off employees as independent contractors?

38.2 Duties between Agent and Principal

LEARNING OBJECTIVES

1. Understand that the agent owes the principal two types of duties: a special duty—the fiduciary duty—and other general duties as recognized in agency law.
2. Recognize that the principal owes the agent duties: contract, tort, and workers' compensation.

Agent's Duty to Principal

The agent owes the principal duties in two categories: the fiduciary duty and a set of general duties imposed by agency law. But these general duties are not unique to agency law; they are duties owed by any employee to the employer.

Fiduciary Duty

In a nonagency contractual situation, the parties' responsibilities terminate at the border of the contract. There is no relationship beyond the agreement. This literalist approach is justified by the more general principle that we each should be free to act unless we commit ourselves to a particular course.

But the agency relationship is more than a contractual one, and the agent's responsibilities go beyond the border of the contract. Agency imposes a higher duty than simply to abide by the contract terms. It imposes a **fiduciary duty**⁸. The law infiltrates the contract creating the agency relationship and reverses the general principle that the parties are free to act in the absence of agreement. As a fiduciary of the principal, the agent stands in a position of special trust. His responsibility is to subordinate his self-interest to that of his principal. The fiduciary responsibility is imposed by law. The absence of any clause in the contract detailing the agent's fiduciary duty does not relieve him of it. The duty contains several aspects.

Duty to Avoid Self-Dealing

A fiduciary may not lawfully profit from a conflict between his personal interest in a transaction and his principal's interest in that same transaction. A broker hired as a purchasing agent, for instance, may not sell to his principal through a company in

8. The duty of an agent to act always in the best interest of the principal, to avoid self-dealing.

which he or his family has a financial interest. The penalty for breach of fiduciary duty is loss of compensation and profit and possible damages for breach of trust.

Duty to Preserve Confidential Information

To further his objectives, a principal will usually need to reveal a number of secrets to his agent—how much he is willing to sell or pay for property, marketing strategies, and the like. Such information could easily be turned to the disadvantage of the principal if the agent were to compete with the principal or were to sell the information to those who do. The law therefore prohibits an agent from using for his own purposes or in ways that would injure the interests of the principal, information confidentially given or acquired. This prohibition extends to information gleaned from the principal though unrelated to the agent's assignment: "[A]n agent who is told by the principal of his plans, or who secretly examines books or memoranda of the employer, is not privileged to use such information at his principal's expense." Restatement (Second) of Agency, Section 395. Nor may the agent use confidential information after resigning his agency. Though he is free, in the absence of contract, to compete with his former principal, he may not use information learned in the course of his agency, such as trade secrets and customer lists. Section 38.3.3 "Breach of Fiduciary Duty", *Bacon v. Volvo Service Center, Inc.*, deals with an agent's breach of the duty of confidentiality.

Other Duties

In addition to fiduciary responsibility (and whatever special duties may be contained in the specific contract) the law of agency imposes other duties on an agent. These duties are not necessarily unique to agents: a nonfiduciary employee could also be bound to these duties on the right facts.

Duty of Skill and Care

An agent is usually taken on because he has special knowledge or skills that the principal wishes to tap. The agent is under a legal duty to perform his work with the care and skill that is "standard in the locality for the kind of work which he is employed to perform" and to exercise any special skills, if these are greater or more refined than those prevalent among those normally employed in the community. In short, the agent may not lawfully do a sloppy job. Restatement (Second) of Agency, Section 379.

Duty of Good Conduct

In the absence of an agreement, a principal may not ordinarily dictate how an agent must live his private life. An overly fastidious florist may not instruct her truck

driver to steer clear of the local bar on his way home from delivering flowers at the end of the day. But there are some jobs on which the personal habits of the agent may have an effect. The agent is not at liberty to act with impropriety or notoriety, so as to bring disrepute on the business in which the principal is engaged. A lecturer at an antialcohol clinic may be directed to refrain from frequenting bars. A bank cashier who becomes known as a gambler may be fired.

Duty to Keep and Render Accounts

The agent must keep accurate financial records, take receipts, and otherwise act in conformity to standard business practices.

Duty to Act Only as Authorized

This duty states a truism but is one for which there are limits. A principal's wishes may have been stated ambiguously or may be broad enough to confer discretion on the agent. As long as the agent acts reasonably under the circumstances, he will not be liable for damages later if the principal ultimately repudiates what the agent has done: "Only conduct which is contrary to the principal's manifestations to him, interpreted in light of what he has reason to know at the time when he acts,...subjects the agent to liability to the principal." Restatement (Second) of Agency, Section 383.

Duty Not to Attempt the Impossible or Impracticable

The principal says to the agent, "Keep working until the job is done." The agent is not obligated to go without food or sleep because the principal misapprehended how long it would take to complete the job. Nor should the agent continue to expend the principal's funds in a quixotic attempt to gain business, sign up customers, or produce inventory when it is reasonably clear that such efforts would be in vain.

Duty to Obey

As a general rule, the agent must obey reasonable directions concerning the manner of performance. What is reasonable depends on the customs of the industry or trade, prior dealings between agent and principal, and the nature of the agreement creating the agency. A principal may prescribe uniforms for various classes of employees, for instance, and a manufacturing company may tell its sales force what sales pitch to use on customers. On the other hand, certain tasks entrusted to agents are not subject to the principal's control; for example, a lawyer may refuse to permit a client to dictate courtroom tactics.

Duty to Give Information

Because the principal cannot be every place at once—that is why agents are hired, after all—much that is vital to the principal’s business first comes to the attention of agents. If the agent has actual notice or reason to know of information that is relevant to matters entrusted to him, he has a duty to inform the principal. This duty is especially critical because information in the hands of an agent is, under most circumstances, imputed to the principal, whose legal liabilities to third persons may hinge on receiving information in timely fashion. Service of process, for example, requires a defendant to answer within a certain number of days; an agent’s failure to communicate to the principal that a summons has been served may bar the principal’s right to defend a lawsuit. The imputation to the principal of knowledge possessed by the agent is strict: even where the agent is acting adversely to the principal’s interests—for example, by trying to defraud his employer—a third party may still rely on notification to the agent, unless the third party knows the agent is acting adversely.

“Shop Rights” Doctrine

In *Grip Nut Co. v. Sharp*, Sharp made a deal with Grip Nut Company that in return for a salary and bonuses as company president, he would assign to the company any inventions he made. *Grip Nut Co. v. Sharp*, 150 F.2d 192 (7th Cir. 1945). When the five-year employment contract expired, Sharp continued to serve as chief executive officer, but no new contract was negotiated concerning either pay or rights to inventions. During the next ten years, Sharp invented a number of new products and developed new machinery to manufacture them; patent rights went to the company. However, he made one invention with two other employees and they assigned the patent to him. A third employee invented a safety device and also assigned the patent to Sharp. At one time, Sharp’s son invented a leakproof bolt and a process to manufacture it; these, too, were assigned to Sharp. These inventions were developed in the company’s plants at its expense.

When Sharp died, his family claimed the rights to the inventions on which Sharp held assignments and sued the company, which used the inventions, for patent infringement. The family reasoned that after the expiration of the employment contract, Sharp was employed only in a managerial capacity, not as an inventor. The court disagreed and invoked the **shop rights doctrine**⁹, under which an invention “developed and perfected in [a company’s] plant with its time, materials, and appliances, and wholly at its expense” may be used by the company without payment of royalties: “Because the servant uses his master’s time, facilities and materials to attain a concrete result, the employer is entitled to use that which embodies his own property and to duplicate it as often as he may find occasion to employ similar appliances in his business.” The company would have been given

9. The rights of a company to exploit inventions made by employees on company time and resources.

complete ownership of the patents had there been an express or implied (e.g., the employee is hired to make inventions) contract to this effect between Sharp and the company.

Principal's Duty to Agent

In this category, we may note that the principal owes the agent duties in contract, tort, and—statutorily—workers' compensation law.

Contract Duties

The fiduciary relationship of agent to principal does not run in reverse—that is, the principal is not the agent's fiduciary. Nevertheless, the principal has a number of contractually related obligations toward his agent.

General Contract Duties

These duties are analogues of many of the agent's duties that we have just examined. In brief, a principal has a duty "to refrain from unreasonably interfering with [an agent's] work." Restatement (Second) of Agency, Section 434. The principal is allowed, however, to compete with the agent unless the agreement specifically prohibits it. The principal has a duty to inform his agent of risks of physical harm or pecuniary loss that inhere in the agent's performance of assigned tasks. Failure to warn an agent that travel in a particular neighborhood required by the job may be dangerous (a fact unknown to the agent but known to the principal) could under common law subject the principal to a suit for damages if the agent is injured while in the neighborhood performing her job. A principal is obliged to render accounts of monies due to agents; a principal's obligation to do so depends on a variety of factors, including the degree of independence of the agent, the method of compensation, and the customs of the particular business. An agent's reputation is no less valuable than a principal's, and so an agent is under no obligation to continue working for one who sullies it.

Employment at Will

Under the traditional "employment-at-will" doctrine, an employee who is not hired for a specific period can be fired at any time, for any reason (except bad reasons: an employee cannot be fired, for example, for reporting that his employer's paper mill is illegally polluting groundwater). This doctrine, which has been much criticized, is discussed in [Chapter 52 "International Law"](#).

Duty to Indemnify

Agents commonly spend money pursuing the principal's business. Unless the agreement explicitly provides otherwise, the principal has a duty to indemnify or reimburse the agent. A familiar form of indemnity is the employee expense account.

Tort and Workers' Compensation Duties

The employer owes the employee—any employee, not just agents—certain statutorily imposed tort and workers' compensation duties.

Background to Workers' Compensation

Andy, who works in a dynamite factory, negligently stores dynamite in the wrong shed. Andy warns his fellow employee Bill that he has done so. Bill lights up a cigarette near the shed anyway, a spark lands on the ground, the dynamite explodes, and Bill is injured. May Bill sue his employer to recover damages? At common law, the answer would be no—three times no. First, the “fellow-servant” rule would bar recovery because the employer was held not to be responsible for torts committed by one employee against another. Second, Bill's failure to heed Andy's warning and his decision to smoke near the dynamite amounted to contributory negligence. Hence even if the dynamite had been negligently stored by the employer rather than by a fellow employee, the claim would have been dismissed. Third, the courts might have held that Bill had “assumed the risk”: since he was aware of the dangers, it would not be fair to saddle the employer with the burden of Bill's actions.

The three common-law rules just mentioned ignited intense public fury by the turn of the twentieth century. In large numbers of cases, workers who were mutilated or killed on the job found themselves and their families without recompense. Union pressure and grass roots lobbying led to **workers' compensation**¹⁰ acts—statutory enactments that dramatically overhauled the law of torts as it affected employees.

The System in General

Workers' compensation is a no-fault system. The employee gives up the right to sue the employer (and, in some states, other employees) and receives in exchange predetermined compensation for a job-related injury, regardless of who caused it. This trade-off was felt to be equitable to employer and employee: the employee loses the right to seek damages for pain and suffering—which can be a sizable portion of any jury award—but in return he can avoid the time-consuming and uncertain judicial process and assure himself that his medical costs and a portion of his salary will be paid—and paid promptly. The employer must pay for all injuries,

10. Laws imposing strict employer liability for injuries sustained by employees in the scope of employment.

even those for which he is blameless, but in return he avoids the risk of losing a big lawsuit, can calculate his costs actuarially, and can spread the risks through insurance.

Most workers' compensation acts provide 100 percent of the cost of a worker's hospitalization and medical care necessary to cure the injury and relieve him from its effects. They also provide for payment of lost wages and death benefits. Even an employee who is able to work may be eligible to receive compensation for specific injuries. Part of the table of benefits for specific injuries under the Kansas statute is shown in Note 38.16 "Kansas Workers' Compensation Benefits for Specific Injuries".

Kansas Workers' Compensation Benefits for Specific Injuries

Article 5.—Workers' Compensation

44-510d. Compensation for certain permanent partial disabilities; schedule. If there is an award of permanent disability as a result of the injury there shall be a presumption that disability existed immediately after the injury and compensation is to be paid for not to exceed the number of weeks allowed in the following schedule:

(1) For loss of a thumb, 60 weeks.

(2) For the loss of a first finger, commonly called the index finger, 37 weeks.

(3) For the loss of a second finger, 30 weeks.

(4) For the loss of a third finger, 20 weeks.

(5) For the loss of a fourth finger, commonly called the little finger, 15 weeks.

(6) Loss of the first phalange of the thumb or of any finger shall be considered to be equal to the loss of 1/2 of such thumb or finger, and the compensation shall be 1/2 of the amount specified above. The loss of the first phalange and any part of the second phalange of any finger, which includes the loss of any part of the bone of such second phalange, shall be considered to be equal to the loss of 2/3 of such finger and the compensation shall be 2/3 of the amount specified above. The loss of the first phalange and any part of the second phalange of a thumb which includes the loss of any part of the bone of such second phalange, shall be considered to be equal to the loss of the entire thumb. The loss of the first and second phalanges and any part of the third proximal phalange of any finger, shall be considered as the loss of the entire finger. Amputation through the joint shall be considered a loss to the next higher schedule.

(7) For the loss of a great toe, 30 weeks.

(8) For the loss of any toe other than the great toe, 10 weeks.

(9) The loss of the first phalange of any toe shall be considered to be equal to the loss of 1/2 of such toe and the compensation shall be 1/2 of the amount above specified.

(10) The loss of more than one phalange of a toe shall be considered to be equal to the loss of the entire toe.

(11) For the loss of a hand, 150 weeks.

(12) For the loss of a forearm, 200 weeks.

(13) For the loss of an arm, excluding the shoulder joint, shoulder girdle, shoulder musculature or any other shoulder structures, 210 weeks, and for the loss of an arm, including the shoulder joint, shoulder girdle, shoulder musculature or any other shoulder structures, 225 weeks.

(14) For the loss of a foot, 125 weeks.

(15) For the loss of a lower leg, 190 weeks.

(16) For the loss of a leg, 200 weeks.

(17) For the loss of an eye, or the complete loss of the sight thereof, 120 weeks.

Source: http://www.kslegislature.org/li/statute/044_000_0000_chapter/044_005_0000_article/044_005_0010d_section/044_005_0010d_k/.

The injured worker is typically entitled to two-thirds his or her average pay, not to exceed some specified maximum, for two hundred weeks. If the loss is partial (like partial loss of sight), the recovery is decreased by the percentage still usable.

Coverage

Although workers' compensation laws are on the books of every state, in two states—New Jersey and Texas—they are not compulsory. In those states the employer may decline to participate, in which event the employee must seek redress in court. But in those states permitting an employer election, the old common-law defenses (fellow-servant rule, contributory negligence, and assumption of risk) have been statutorily eliminated, greatly enhancing an employee's chances of winning a suit. The incentive is therefore strong for employers to elect workers' compensation coverage.

Those frequently excluded are farm and domestic laborers and public employees; public employees, federal workers, and railroad and shipboard workers are covered under different but similar laws. The trend has been to include more and more classes of workers. Approximately half the states now provide coverage for household workers, although the threshold of coverage varies widely from state to state. Some use an earnings test; other states impose an hours threshold. People who fall within the domestic category include maids, baby-sitters, gardeners, and handymen but generally not plumbers, electricians, and other independent contractors.

Paying for Workers' Compensation

There are three general methods by which employers may comply with workers' compensation laws. First, they may purchase employer's liability and workers' compensation policies through private commercial insurance companies. These policies consist of two major provisions: payment by the insurer of all claims filed under workers' compensation and related laws (such as occupational disease benefits) and coverage of the costs of defending any suits filed against the employer, including any judgments awarded. Since workers' compensation statutes cut off the employee's right to sue, how can such a lawsuit be filed? The answer is that there are certain exceptions to the ban: for instance, a worker may sue if the employer deliberately injures an employee.

The second method of compliance with workers' compensation laws is to insure through a state fund established for the purpose. The third method is to self-insure. The laws specify conditions under which companies may resort to self-insurance, and generally only the largest corporations qualify to do so. In short, workers' compensation systems create a tax on employers with which they are required (again, in most states) to buy insurance. The amount the employer has to pay for the insurance depends on the number and seriousness of claims made—how dangerous the work is. For example, Washington State's 2011 proposed hourly rates for employers to purchase insurance include these items: for egg and poultry farms,

\$1.16 per hour; shake and shingle mills, \$18.06 per hour; asphalt paving, \$2.87 per hour; lawn care maintenance, \$1.22 per hour; plastic products manufacturing, \$0.87 per hour; freight handling, \$1.81 per hour; supermarkets, \$0.76; restaurants, \$0.43; entertainers and dancers, \$7.06; colleges and universities, \$0.31. Washington State Department of Labor & Industries, *Rates for Workers' Compensation, Proposed 2011 Rates*, <http://www.lni.wa.gov/ClaimsIns/Insurance/RatesRisk/Check/RatesHistory>.

Recurring Legal Issues

There are a number of legal issues that recur in workers' compensation cases. The problem is, from the employer's point of view, that the cost of buying insurance is tied to the number of claims made. The employer therefore has reason to assert the injured employee is not eligible for compensation. Recurring legal issues include the following:

- Is the injury work related? As a general rule, on-the-job injuries are covered no matter what their relationship to the employee's specific duties. Although injuries resulting from drunkenness or fighting are not generally covered, there are circumstances under which they will be, as Section 38.3.2 "Employee versus Independent Contractor" shows.
- Is the injured person an employee? Courts are apt to be liberal in construing statutes to include those who might not seem to be employed. In *Betts v. Ann Arbor Public Schools*, a University of Michigan student majoring in physical education was a student teacher in a junior high school. *Betts v. Ann Arbor Public Schools*, 271 N.W.2d 498 (Mich. 1978). During a four-month period, he taught two physical education courses. On the last day of his student teaching, he walked into the locker room and thirty of his students grabbed him and tossed him into the swimming pool. This was traditional, but he "didn't feel like going in that morning" and put up a struggle that ended with a whistle on an elastic band hitting him in the eye, which he subsequently lost as a result of the injury. He filed a workers' compensation claim. The school board argued that he could not be classified as an employee because he received no pay. Since he was injured by students—not considered agents of the school—he would probably have been unsuccessful in filing a tort suit; hence the workers' compensation claim was his only chance of recompense. The state workers' compensation appeal board ruled against the school on the ground that payment in money was not required: "Plaintiff was paid in the form of training, college credits towards graduation, and meeting of the prerequisites of a state provisional certificate." The state supreme court affirmed the award.

- How palpable must the “injury” be? A difficult issue is whether a worker is entitled to compensation for psychological injury, including cumulative trauma. Until the 1970s, insurance companies and compensation boards required physical injury before making an award. Claims that job stresses led to nervous breakdowns or other mental disorders were rejected. But most courts have liberalized the definition of injury and now recognize that psychological trauma can be real and that job stress can bring it on, as shown by the discussion of *Wolfe v. Sibley, Lindsay & Curr Co.* in [Section 38.3.4 "Workers' Compensation: What "Injuries" Are Compensable?"](#).

KEY TAKEAWAY

The agent owes the principal two categories of duties: fiduciary and general. The fiduciary duty is the duty to act always in the interest of the principal; the duty here includes that to avoid self-dealing and to preserve confidential information. The general duty owed by the agent encompasses the sorts of obligations any employee might have: the duty of skill and care, of good conduct, to keep and render accounts, to not attempt the impossible or impracticable, to obey, and to give information. The shop rights doctrine provides that inventions made by an employee using the employer's resources and on the employer's time belong to the employer.

The principal owes the agent duties too. These may be categorized as contract and tort duties. The contract duties are to warn the agent of hazards associated with the job, to avoid interfering with the agent's performance of his job, to render accounts of money due the agent, and to indemnify the agent for business expenses according to their agreement. The tort duty owed by the principal to the agent—employee—is primarily the statutorily imposed duty to provide workers' compensation for injuries sustained on the job. In reaction to common-law defenses that often exonerated the employer from liability for workers' injuries, the early twentieth century saw the rise of workers' compensation statutes. These require the employer to provide no-fault insurance coverage for any injury sustained by the employee on the job. Because the employer's insurance costs are claims rated (i.e., the cost of insurance depends on how many claims are made), the employer scrutinizes claims. A number of recurring legal issues arise: Is the injury work related? Is the injured person an employee? What constitutes an “injury”?

EXERCISES

1. Judge Learned Hand, a famous early-twentieth-century jurist (1872–1961), said, “The fiduciary duty is not the ordinary morals of the marketplace.” How does the fiduciary duty differ from “the ordinary morals of the marketplace”? Why does the law impose a fiduciary duty on the agent?
2. What are the nonfiduciary duties owed by the agent to the principal?
3. What contract duties are owed by the principal to the agent?
4. Why were workers’ compensation statutes adopted in the early twentieth century?
5. How do workers’ compensation statutes operate, and how are the costs paid for?

38.3 Cases

Creation of Agency: Apparent Authority

Weingart v. Directoire Restaurant, Inc.

333 N.Y.S.2d 806 (N.Y., 1972)

KASSEL, J.

The issue here is whether defendant restaurant by permitting an individual to park patrons' cars thereby held him out as its "employee" for such purposes. Admittedly, this individual, one Buster Douglas, is not its employee in the usual sense but with the knowledge of defendant, he did station himself in front of its restaurant, wore a doorman's uniform and had been parking its customers' autos. The parties stipulated that if he were held to be defendant's employee, this created a bailment between the parties [and the "employer" would have to rebut a presumption of negligence if the customer's property was not returned to the customer].

On April 20, 1968, at about 10 P.M., plaintiff drove his 1967 Cadillac Coupe de Ville to the door of the Directoire Restaurant at 160 East 48th Street in Manhattan. Standing in front of the door was Buster Douglas, dressed in a self-supplied uniform, comprised of a regular doorman's cap and matching jacket. Plaintiff gave the keys to his vehicle to Douglas and requested that he park the car. He gave Douglas a \$1.00 tip and received a claim check. Plaintiff then entered defendant's restaurant, remained there for approximately 45 minutes and when he departed, Douglas was unable to locate the car which was never returned to plaintiff.

At the time of this occurrence, the restaurant had been open for only nine days, during which time plaintiff had patronized the restaurant on at least one prior occasion.

Defendant did not maintain any sign at its entrance or elsewhere that it would provide parking for its customers (nor, apparently, any sign warning to the contrary).

Buster Douglas parked cars for customers of defendant's restaurant and at least three or four other restaurants on the block. He stationed himself in front of each restaurant during the course of an evening and was so engaged during the evening

of April 20, 1968. Defendant clearly knew of and did not object to Douglas' activities outside its restaurant. Defendant's witness testified at an examination before trial:

Q. Did anybody stand outside your restaurant in any capacity whatsoever?

A. There was a man out there parking cars for the block, but he was in no way connected with us or anything like that. He parked cars for the Tamburlaine and also for the Chateau Madrid, Nepentha and a few places around the block.

Q. Did you know that this gentleman was standing outside your restaurant?

A. Yes, I knew he was there.

Q. How did you know that he was standing outside your restaurant?

A. Well, I knew the man's face because I used to work in a club on 55th Street and he was there. When we first opened up here, we didn't know if we would have a doorman or have parking facilities or what we were going to do at that time. We just let it hang and I told this Buster, Buster was his name, that you are a free agent and you do whatever you want to do. I am tending bar in the place and what you do in the street is up to you, I will not stop you, but we are not hiring you or anything like that, because at that time, we didn't know what we were going to use the parking lot or get a doorman and put on a uniform or what.

These facts establish to the court's satisfaction that, although Douglas was not an actual employee of the restaurant, defendant held him out as its authorized agent or "employee" for the purpose of parking its customers' cars, by expressly consenting to his standing, in uniform, in front of its door to receive customers, to park their cars and issue receipts therefor—which services were rendered without charge to the restaurant's customers, except for any gratuity paid to Douglas. Clearly, under these circumstances, apparent authority has been shown and Douglas acted within the scope of this authority.

Plaintiff was justified in assuming that Douglas represented the restaurant in providing his services and that the restaurant had placed him there for the convenience of its customers. A restaurateur knows that this is the impression created by allowing a uniformed attendant to so act. Facility in parking is often a critical consideration for a motorist in selecting a restaurant in midtown Manhattan, and the Directoire was keenly aware of this fact as evidenced by its

testimony that the management was looking into various other possibilities for solving customers' parking problems.

There was no suitable disclaimer posted outside the restaurant that it had no parking facilities or that entrusting one's car to any person was at the driver's risk. It is doubtful that any prudent driver would entrust his car to a strange person on the street, if he thought that the individual had no authorization from the restaurant or club or had no connection with it, but was merely an independent operator with questionable financial responsibility.

The fact that Douglas received no compensation directly from defendant is not material. Each party derived a benefit from the arrangement: Douglas being willing to work for gratuities from customers, and the defendant, at no cost to itself, presenting the appearance of providing the convenience of free parking and doorman services to its patrons. In any case, whatever private arrangements existed between the restaurant and Douglas were never disclosed to the customers.

Even if such person did perform these services for several restaurants, it does not automatically follow that he is a freelance entrepreneur, since a shared employee working for other small or moderately sized restaurants in the area would seem a reasonable arrangement, in no way negating the authority of the attendant to act as doorman and receive cars for any one of these places individually.

The case most analogous to the instant one is *Klotz v. El Morocco* [Citation, 1968], and plaintiff here relies on it. That case similarly involved the theft of a car parked by a uniformed individual standing in front of defendant's restaurant who, although not employed by it, parked vehicles for its patrons with the restaurant's knowledge and consent. Defendant here attempts to distinguish this case principally upon the ground that the parties in *El Morocco* stipulated that the 'doorman' was an agent or employee of the defendant acting within the scope of his authority. However, the judge made an express finding to that effect: "* * * there was sufficient evidence in plaintiff's case on which to find DiGiovanni, the man in the uniform, was acting within the scope of his authority as agent of defendant." Defendant here also points to the fact that in *Klotz* DiGiovanni placed patrons' car keys on a rack inside *El Morocco*; however, this is only one fact to be considered in finding a bailment and is, to me, more relevant to the issue of the degree of care exercised.

When defendant's agent failed to produce plaintiff's automobile, a presumption of negligence arose which now requires defendant to come forward with a sufficient explanation to rebut this presumption. [Citation] The matter should be set down for trial on the issues of due care and of damages.

CASE QUESTIONS

1. Buster Douglas was not the restaurant's employee. Why did the court determine his negligence could nevertheless be imputed to the restaurant?
2. The plaintiff in this case relied on *Klotz*, very similar in facts, in which the car-parking attendant was found to be an employee. The defendant, necessarily, needed to argue that the cases were not very similar. What argument did the defendant make? What did the court say about that argument?
3. The restaurant here is a bailee—it has rightful possession of the plaintiff's (bailor's) property, the car. If the car is not returned to the plaintiff a rebuttable presumption of negligence arises. What does that mean?

Employee versus Independent Contractor

Vizcaino v. Microsoft Corp.

97 F.3d 1187 (9th Cir. 1996)

Reinhardt, J.

Large corporations have increasingly adopted the practice of hiring temporary employees or independent contractors as a means of avoiding payment of employee benefits, and thereby increasing their profits. This practice has understandably led to a number of problems, legal and otherwise. One of the legal issues that sometimes arises is exemplified by this lawsuit. The named plaintiffs, who were classified by Microsoft as independent contractors, seek to strip that label of its protective covering and to obtain for themselves certain benefits that the company provided to all of its regular or permanent employees. After certifying the named plaintiffs as representatives of a class of "common-law employees," the district court granted summary judgment to Microsoft on all counts. The plaintiffs...now appeal as to two of their claims: a) the claim...that they are entitled to savings benefits under Microsoft's Savings Plus Plan (SPP); and b) that...they are entitled to stock-option benefits under Microsoft's Employee Stock Purchase Plan (ESPP). In both cases, the claims are based on their contention that they are common-law employees.

Microsoft, one of the country's fastest growing and most successful corporations and the world's largest software company, produces and sells computer software internationally. It employs a core staff of permanent employees. It categorizes them

as “regular employees” and offers them a wide variety of benefits, including paid vacations, sick leave, holidays, short-term disability, group health and life insurance, and pensions, as well as the two benefits involved in this appeal. Microsoft supplements its core staff of employees with a pool of individuals to whom it refuses to pay fringe benefits. It previously classified these individuals as “independent contractors” or “freelancers,” but prior to the filing of the action began classifying them as “temporary agency employees.” Freelancers were hired when Microsoft needed to expand its workforce to meet the demands of new product schedules. The company did not, of course, provide them with any of the employee benefits regular employees receive.

The plaintiffs...performed services as software testers, production editors, proofreaders, formatters and indexers. Microsoft fully integrated the plaintiffs into its workforce: they often worked on teams along with regular employees, sharing the same supervisors, performing identical functions, and working the same core hours. Because Microsoft required that they work on site, they received admittance card keys, office equipment and supplies from the company.

Freelancers and regular employees, however, were not without their obvious distinctions. Freelancers wore badges of a different color, had different electronic-mail addresses, and attended a less formal orientation than that provided to regular employees. They were not permitted to assign their work to others, invited to official company functions, or paid overtime wages. In addition, they were not paid through Microsoft’s payroll department. Instead, they submitted invoices for their services, documenting their hours and the projects on which they worked, and were paid through the accounts receivable department.

The plaintiffs were told when they were hired that, as freelancers, they would not be eligible for benefits. None has contended that Microsoft ever promised them any benefits individually. All eight named plaintiffs signed [employment agreements] when first hired by Microsoft or soon thereafter. [One] included a provision that states that the undersigned “agrees to be responsible for all federal and state taxes, withholding, social security, insurance and other benefits.” The [other one] states that “as an Independent Contractor to Microsoft, you are self-employed and are responsible to pay all your own insurance and benefits.” Eventually, the plaintiffs learned of the various benefits being provided to regular employees from speaking with them or reading various Microsoft publications concerning employee benefits.

In 1989 and 1990, the Internal Revenue Service (IRS)[,]...applying common-law principles defining the employer-employee relationship, concluded that Microsoft’s freelancers were not independent contractors but employees for withholding and employment tax purposes, and that Microsoft would thereafter be required to pay

withholding taxes and the employer's portion of Federal Insurance Contribution Act (FICA) tax. Microsoft agreed....

After learning of the IRS rulings, the plaintiffs sought various employee benefits, including those now at issue: the ESPP and SPP benefits. The SPP...is a cash or deferred salary arrangement under § 401k of the Internal Revenue Code that permits Microsoft's employees to save and invest up to fifteen percent of their income through tax-deferred payroll deductions....Microsoft matches fifty percent of the employee's contribution in any year, with [a maximum matching contribution]. The ESPP...permits employees to purchase company stock [with various rules].

Microsoft rejected the plaintiffs' claims for benefits, maintaining that they were independent contractors who were personally responsible for all their own benefits....

The plaintiffs brought this action, challenging the denial of benefits.

Microsoft contends that the extrinsic evidence, including the [employment agreements], demonstrates its intent not to provide freelancers or independent contractors with employee benefits[.]...We have no doubt that the company did not intend to provide freelancers or independent contractors with employee benefits, and that if the plaintiffs had in fact been freelancers or independent contractors, they would not be eligible under the plan. The plaintiffs, however, were not freelancers or independent contractors. They were common-law employees, and the question is what, if anything, Microsoft intended with respect to persons who were actually common-law employees but were not known to Microsoft to be such. The fact that Microsoft did not intend to provide benefits to persons who it thought were freelancers or independent contractors sheds little or no light on that question....

Microsoft's argument, drawing a distinction between common-law employees on the basis of the manner in which they were paid, is subject to the same vice as its more general argument. Microsoft regarded the plaintiffs as independent contractors during the relevant period and learned of their common-law-employee status only after the IRS examination. They were paid through the accounts receivable department rather than the payroll department because of Microsoft's mistaken view as to their legal status. Accordingly, Microsoft cannot now contend that the fact that they were paid through the accounts receivable department demonstrates that the company intended to deny them the benefits received by all common-law employees regardless of their actual employment status. Indeed, Microsoft has pointed to no evidence suggesting that it ever denied eligibility to

any employees, whom it *understood* to be common-law employees, by paying them through the accounts receivable department or otherwise.

We therefore construe the ambiguity in the plan against Microsoft and hold that the plaintiffs are eligible to participate under the terms of the SPP.

[Next, regarding the ESPP] we hold that the plaintiffs...are covered by the specific provisions of the ESPP. We apply the “objective manifestation theory of contracts,” which requires us to “impute an intention corresponding to the reasonable meaning of a person’s words and acts.” [Citation] Through its incorporation of the tax code provision into the plan, Microsoft manifested an objective intent to make all common-law employees, and hence the plaintiffs, eligible for participation. The ESPP specifically provides:

It is the intention of the Company to have the Plan qualify as an “employee stock purchase plan” under Section 423 of the Internal Revenue Code of 1954. *The provisions of the Plan shall, accordingly, be construed so as to extend and limit participation in a manner consistent with the requirements of that Section of the Code.* (emphasis added)

[T]he ESPP, when construed in a manner consistent with the requirements of § 423, extends participation to all common-law employees not covered by one of the express exceptions set forth in the plan. Accordingly, we find that the ESPP, through its incorporation of § 423, expressly extends eligibility for participation to the plaintiff class and affords them the same options to acquire stock in the corporation as all other employees.

Microsoft next contends that the [employment agreements] signed by the plaintiffs render them ineligible to participate in the ESPP. First, the label used in the instruments signed by the plaintiffs does not control their employment status. Second, the employment instruments, if construed to exclude the plaintiffs from receiving ESPP benefits, would conflict with the plan’s express incorporation of § 423. Although Microsoft may have generally intended to exclude individuals who were in fact independent contractors, it could not, consistent with its express intention to extend participation in the ESPP to all common-law employees, have excluded the plaintiffs. Indeed, such an exclusion would defeat the purpose of including § 423 in the plan, because the exclusion of common-law employees not otherwise accepted would result in the loss of the plan’s tax qualification.

Finally, Microsoft maintains that the plaintiffs are not entitled to ESPP benefits because the terms of the plan were never communicated to them and they were therefore unaware of its provisions when they performed their employment

services....In any event, to the extent that knowledge of an offer of benefits is a prerequisite, it is probably sufficient that Microsoft publicly promulgated the plan. In [Citation], the plaintiff was unaware of the company's severance plan until shortly before his termination. The Oklahoma Supreme Court concluded nonetheless that publication of the plan was "the equivalent of constructive knowledge on the part of *all* employees not specifically excluded."

We are not required to rely, however, on the [this] analysis or even on Microsoft's own unwitting concession. There is a compelling reason, implicit in some of the preceding discussion, that requires us to reject the company's theory that the plaintiffs' entitlement to ESPP benefits is defeated by their previous lack of knowledge regarding their rights. It is "well established" that an optionor may not rely on an optionee's failure to exercise an option when he has committed any act or failed to perform any duty "calculated to cause the optionee to delay in exercising the right." [Citation] "[T]he optionor may not make statements or representations calculated to cause delay, [or] fail to furnish [necessary] information...." Similarly, "[I]t is a principle of fundamental justice that if a promisor is himself the cause of the failure of performance, either of an obligation due him or of a condition upon which his own liability depends, he cannot take advantage of the failure." [Citation]...

Applying these principles, we agree with the magistrate judge, who concluded that Microsoft, which created a benefit to which the plaintiffs were entitled, could not defend itself by arguing that the plaintiffs were unaware of the benefit, when its own false representations precluded them from gaining that knowledge. Because Microsoft misrepresented both the plaintiffs' actual employment status and their eligibility to participate in the ESPP, it is responsible for their failure to know that they were covered by the terms of the offer. It may not now take advantage of that failure to defeat the plaintiffs' rights to ESPP benefits. Thus, we reject Microsoft's final argument.

Conclusion

For the reasons stated, the district court's grant of summary judgment in favor of Microsoft and denial of summary judgment in favor of the plaintiffs is REVERSED and the case REMANDED for the determination of any questions of individual eligibility for benefits that may remain following issuance of this opinion and for calculation of the damages or benefits due the various class members.

CASE QUESTIONS

1. In a 1993 *Wall Street Journal* article, James Bovard asserted that the IRS “is carrying out a sweeping campaign to slash the number of Americans permitted to be self-employed—and to punish the companies that contract with them...IRS officials indicate that more than half the nation’s self-employed should no longer be able to work for themselves.” Why did Microsoft want these employees to “be able to work for themselves”?
2. Why did the employees accept employment as independent contractors?
3. It seems unlikely that the purpose of the IRS’s campaign was really to keep people from working for themselves, despite Mr. Bovard’s assumption. What was the purpose of the campaign?
4. Why did the IRS and the court determine that these “independent contractors” were in fact employees?

Breach of Fiduciary Duty

Bacon v. Volvo Service Center, Inc.

597 S.E.2d 440 (Ga. App. 2004)

Smith, J.

[This appeal is] taken in an action that arose when two former employees left an existing business and began a new, competing business....Bacon and Johnson, two former employees of Volvo Service Center, Inc. (VSC), and the new company they formed, South Gwinnett Volvo Service, Ltd. (SGVS), appeal from the trial court’s denial of their motion for judgment notwithstanding the jury’s verdict in favor of VSC....

VSC filed suit against appellants, alleging a number of claims arising from the use by Bacon, who had been a service technician at VSC, of VSC’s customer list, and his soliciting Johnson, a service writer, and another VSC employee to join SGVS. SGVS moved for a directed verdict on certain claims at the close of plaintiff’s evidence and at the close of the case, which motions were denied. The jury was asked to respond to specific interrogatories, and it found for VSC and against all three appellants on VSC’s claim for misappropriation of trade secrets. The jury also found for plaintiff against Bacon for breach of fiduciary duty,...tortious interference with business relations, employee piracy, and conversion of corporate assets. The jury

awarded VSC attorney fees, costs, and exemplary damages stemming from the claim for misappropriation of trade secrets. Judgment was entered on the jury's verdict, and appellants' motion for j.n.o.v. was denied. This appeal ensued. We find that VSC did not meet its burden of proof as to the claims for misappropriation of trade secrets, breach of fiduciary duty, or employee piracy, and the trial court should have granted appellants' motion for j.n.o.v.

Construed to support the jury's verdict, the evidence of record shows that Bacon was a technician at VSC when he decided to leave and open a competing business. Before doing so, he printed a list of VSC's customers from one of VSC's two computers. Computer access was not password restricted, was easy to use, and was used by many employees from time to time.

About a year after he left VSC, Bacon gave Johnson and another VSC employee an offer of employment at his new Volvo repair shop, which was about to open. Bacon and Johnson advertised extensively, and the customer list was used to send flyers to some VSC customers who lived close to the new shop's location. These activities became the basis for VSC's action against Bacon, Johnson, and their new shop, SGVS....

1. The Georgia Trade Secrets Act of 1990, [Citation], defines a "trade secret" as

information, without regard to form, including, but not limited to,...a list of actual or potential customers or suppliers which is not commonly known by or available to the public and which information:

(A) Derives economic value, actual or potential, from not being generally known to, and not being readily ascertainable by proper means by, other persons who can obtain economic value from its disclosure or use; and

(B) Is the subject of efforts that are reasonable under the circumstances to maintain its secrecy.

If an employer does not prove both prongs of this test, it is not entitled to protection under the Act. Our Supreme Court held in [Citation, 1991] for instance, that information was not a trade secret within the meaning of the Act because no evidence showed that the employer "made reasonable efforts under the circumstances...to maintain the confidentiality of the information it sought to protect."

While a client list may be subject to confidential treatment under the Georgia Trade Secrets Act, the information itself is not inherently confidential. Customers are not trade secrets. Confidentiality is afforded only where the customer list is not generally known or ascertainable from other sources and was the subject of reasonable efforts to maintain its secrecy....

Here, VSC took *no* precautions to maintain the confidentiality of its customer list. The information was on both computers, and it was not password-protected. Moreover, the same information was available to the technicians through the repair orders, which they were permitted to retain indefinitely while Bacon was employed there. Employees were not informed that the information was confidential. Neither Bacon nor Johnson was required to sign a confidentiality agreement as part of his employment.

Because no evidence was presented from which the jury could have concluded that VSC took any steps, much less reasonable ones, to protect the confidentiality of its customer list, a material requirement for trade secret status was not satisfied. The trial court should have granted appellants' motion for j.n.o.v.

2. To prove tortious interference with business relations, "a plaintiff must show defendant: (1) acted improperly and without privilege, (2) acted purposely and with malice with the intent to injure, (3) induced a third party or parties not to enter into or continue a business relationship with the plaintiff, and (4) caused plaintiff financial injury." [Citation] But "[f]air competition is always legal." [Citations] Unless an employee has executed a valid non-compete or non-solicit covenant, he is not barred from soliciting customers of his former employer on behalf of a new employer. [Citation]

No evidence was presented that Bacon acted "improperly," that any of VSC's former customers switched to SGVS because of any improper act by Bacon, or that these customers would have continued to patronize VSC but for Bacon's solicitations. Therefore, it was impossible for a jury to calculate VSC's financial damage, if any existed.

3. With regard to VSC's claim for breach of fiduciary duty, "[a]n employee breaches no fiduciary duty to the employer simply by making plans to enter a competing business while he is still employed. Even before the termination of his agency, he is entitled to make arrangements to compete and upon termination of employment immediately compete." [Citation] He cannot solicit customers for a rival business or do other, similar acts in direct competition with his employer's business before his employment ends. But here, no evidence was presented to rebut the evidence given by Bacon and Johnson that they engaged in no such practices before their

employment with VSC ended. Even assuming, therefore, that a fiduciary relationship existed, no evidence was presented showing that it was breached.

4. The same is true for VSC's claim for employee piracy. The evidence simply does not show that any employees of VSC were solicited for SGVS before Bacon left VSC's employ....

Judgment reversed.

CASE QUESTIONS

1. Why was it determined that the defendants were not liable for any breach of trade secrecy?
2. What would have been necessary to show tortious interference with business relations?
3. The evidence was lacking that there was any breach of fiduciary duty. What would have been necessary to show that?
4. What is "employee piracy"? Why was it not proven?

Workers' Compensation: What "Injuries" Are Compensable?

Wolfe v. Sibley, Lindsay & Curr Co.

330 N.E.2d 603 (N.Y. 1975)

Wachtler, J.

This appeal involves a claim for workmen's compensation benefits for the period during which the claimant was incapacitated by severe depression caused by the discovery of her immediate supervisor's body after he had committed suicide.

The facts as adduced at a hearing before the Workmen's Compensation Board are uncontroverted. The claimant, Mrs. Diana Wolfe, began her employment with the respondent department store, Sibley, Lindsay & Curr Co. in February, 1968. After working for some time as an investigator in the security department of the store she became secretary to Mr. John Gorman, the security director. It appears from the record that as head of security, Mr. Gorman was subjected to intense pressure, especially during the Christmas holidays. Mrs. Wolfe testified that throughout the several years she worked at Sibley's Mr. Gorman reacted to this holiday pressure by

becoming extremely agitated and nervous. She noted, however, that this anxiety usually disappeared when the holiday season was over. Unfortunately, Mr. Gorman's nervous condition failed to abate after the 1970 holidays....

Despite the fact that he followed Mrs. Wolfe's advice to see a doctor, Mr. Gorman's mental condition continued to deteriorate. On one occasion he left work at her suggestion because he appeared to be so nervous. This condition persisted until the morning of June 9, 1971 when according to the claimant, Mr. Gorman looked much better and even smiled and 'tousled her hair' when she so remarked.

A short time later Mr. Gorman called her on the intercom and asked her to call the police to room 615. Mrs. Wolfe complied with this request and then tried unsuccessfully to reach Mr. Gorman on the intercom. She entered his office to find him lying in a pool of blood caused by a self-inflicted gunshot wound in the head. Mrs. Wolfe became extremely upset and was unable to continue working that day.

She returned to work for one week only to lock herself in her office to avoid the questions of her fellow workers. Her private physician perceiving that she was beset by feelings of guilt referred her to a psychiatrist and recommended that she leave work, which she did. While at home she ruminated about her guilt in failing to prevent the suicide and remained in bed for long periods of time staring at the ceiling. The result was that she became unresponsive to her husband and suffered a weight loss of 20 pounds. Her psychiatrist, Dr. Grinols diagnosed her condition as an acute depressive reaction.

After attempting to treat her in his office Dr. Grinols realized that the severity of her depression mandated hospitalization. Accordingly, the claimant was admitted to the hospital on July 9, 1971 where she remained for two months during which time she received psychotherapy and medication. After she was discharged, Dr. Grinols concluded that there had been no substantial remission in her depression and ruminative guilt and so had her readmitted for electroshock treatment. These treatments lasted for three weeks and were instrumental in her recovery. She was again discharged and, in mid-January, 1972, resumed her employment with Sibley, Lindsay & Curr.

Mrs. Wolfe's claim for workmen's compensation was granted by the referee and affirmed by the Workmen's Compensation Board. On appeal the Appellate Division reversed citing its opinions in [Citations], [concluding]...that mental injury precipitated solely by psychic trauma is not compensable as a matter of law. We do not agree with this conclusion.

Workmen's compensation, as distinguished from tort liability which is essentially based on fault, is designed to shift the risk of loss of earning capacity caused by industrial accidents from the worker to industry and ultimately the consumer. In light of its beneficial and remedial character the Workmen's Compensation Law should be construed liberally in favor of the employee [Citation].

Liability under the act is predicated on accidental injury arising out of and in the course of employment....Applying these concepts to the case at bar we note that there is no issue raised concerning the causal relationship between the occurrence and the injury. The only testimony on this matter was given by Dr. Grinols who stated unequivocally that the discovery of her superior's body was the competent producing cause of her condition. Nor is there any question as to the absence of physical impact. Accordingly, the focus of our inquiry is whether or not there has been an accidental injury within the meaning of the Workmen's Compensation Law.

Since there is no statutory definition of this term we turn to the relevant decisions. These may be divided into three categories: (1) psychic trauma which produces physical injury, (2) physical impact which produces psychological injury, and (3) psychic trauma which produces psychological injury. As to the first class our court has consistently recognized the principle that an injury caused by emotional stress or shock may be accidental within the purview of the compensation law. [Citation] Cases falling into the second category have uniformly sustained awards to those incurring nervous or psychological disorders as a result of physical impact [Citation]. As to those cases in the third category the decisions are not as clear....

We hold today that psychological or nervous injury precipitated by psychic trauma is compensable to the same extent as physical injury. This determination is based on two considerations. First, as noted in the psychiatric testimony there is nothing in the nature of a stress or shock situation which ordains physical as opposed to psychological injury. The determinative factor is the particular vulnerability of an individual by virtue of his physical makeup. In a given situation one person may be susceptible to a heart attack while another may suffer a depressive reaction. In either case the result is the same—the individual is incapable of functioning properly because of an accident and should be compensated under the Workmen's Compensation Law.

Secondly, having recognized the reliability of identifying psychic trauma as a causative factor of injury in some cases and the reliability by identifying psychological injury as a resultant factor in other cases, we see no reason for limiting recovery in the latter instance to cases involving physical impact. There is nothing talismanic about physical impact.

We would note in passing that this analysis reflects the view of the majority of jurisdictions in this country and England. [Citations]...

Accordingly, the order appealed from should be reversed and the award to the claimant reinstated, with costs.

CASE QUESTIONS

1. Why did the appeals court deny workers' compensation benefits for Wolfe?
2. On what reasoning did the New York high court reverse?
3. There was a dissent in this case (not included here). Judge Breitel noted that the evidence was that Mrs. Wolfe had a psychological condition such that her trauma "could never have occurred unless she, to begin with, was extraordinarily vulnerable to severe shock at or away from her place of employment or one produced by accident or injury to those close to her in employment or in her private life." The judge worried that "one can easily call up a myriad of commonplace occupational pursuits where employees are often exposed to the misfortunes of others which may in the mentally unstable evoke precisely the symptoms which this claimant suffered." He concluded, "In an era marked by examples of overburdening of socially desirable programs with resultant curtailment or destruction of such programs, a realistic assessment of impact of doctrine is imperative. An overburdening of the compensation system by injudicious and open-ended expansion of compensation benefits, especially for costly, prolonged, and often only ameliorative psychiatric care, cannot but threaten its soundness or that of the enterprises upon which it depends." What is the concern here?

38.4 Summary and Exercises

Summary

An agent is one who acts on behalf of another. The law recognizes several types of agents, including (1) the general agent, one who possesses authority to carry out a broad range of transactions in the name of and on behalf of the principal; (2) the special agent, one with authority to act only in a specifically designated instance or set of transactions; (3) the agent whose agency is coupled with an interest, one who has a property interest in addition to authority to act as an agent; (4) the subagent, one appointed by an agent with authority to do so; and (5) the servant (“employee” in modern English), one whose physical conduct is subject to control of the principal.

A servant should be distinguished from an independent contractor, whose work is not subject to the control of the principal. The difference is important for purposes of taxation, workers’ compensation, and liability insurance.

The agency relationship is usually created by contract, and sometimes governed by the Statute of Frauds, but some agencies are created by operation of law.

An agent owes his principal the highest duty of loyalty, that of a fiduciary. The agent must avoid self-dealing, preserve confidential information, perform with skill and care, conduct his personal life so as not to bring disrepute on the business for which he acts as agent, keep and render accounts, and give appropriate information to the principal.

Although the principal is not the agent’s fiduciary, the principal does have certain obligations toward the agent—for example, to refrain from interfering with the agent’s work and to indemnify. The employer’s common-law tort liability toward his employees has been replaced by the workers’ compensation system, under which the employee gives up the right to sue for damages in return for prompt payment of medical and job-loss expenses. Injuries must have been work related and the injured person must have been an employee. Courts today allow awards for psychological trauma in the absence of physical injury.

EXERCISES

1. A woman was involved in an automobile accident that resulted in the death of a passenger in her car. After she was charged with manslaughter, her attorney agreed to work with her insurance company's claims adjuster in handling the case. As a result of the agreement, the woman gave a statement about the accident to the claims adjuster. When the prosecuting attorney demanded to see the statement, the woman's attorney refused on the grounds that the claims adjuster was his—the attorney's—agent, and therefore the statement was covered by the attorney-client privilege. Is the attorney correct? Why?
2. A local hotel operated under a franchise agreement with a major hotel chain. Several customers charged the banquet director of the local hotel with misconduct and harassment. They sued the hotel chain (the franchisor) for acts committed by the local hotel (the franchisee), claiming that the franchisee was the agent of the franchisor. Is an agency created under these circumstances? Why?
3. A principal hired a mortgage banking firm to obtain a loan commitment of \$10,000,000 from an insurance company for the construction of a shopping center. The firm was promised a fee of \$50,000 for obtaining the commitment. The firm was successful in arranging for the loan, and the insurance company, without the principal's knowledge, agreed to pay the firm a finder's fee. The principal then refused to pay the firm the promised \$50,000, and the firm brought suit to recover the fee. May the firm recover the fee? Why?
4. Based on his experience working for the CIA, a former CIA agent published a book about certain CIA activities in South Vietnam. The CIA did not approve of the publication of the book although, as a condition of his employment, the agent had agreed not to publish any information relating to the CIA without specific approval of the agency. The government brought suit against the agent, claiming that all the agent's profits from publishing the book should go to the government. Assuming that the government suffered only nominal damages because the agent published no classified information, will the government prevail? Why?
5. Upon graduation from college, Edison was hired by a major chemical company. During the time when he was employed by the company, Edison discovered a synthetic oil that could be manufactured at a very low cost. What rights, if any, does Edison's employer have to the discovery? Why?
6. A US company hired MacDonald to serve as its resident agent in Bolivia. MacDonald entered into a contract to sell cars to Bolivia and personally

guaranteed performance of the contract as required by Bolivian law. The cars delivered to Bolivia were defective, and Bolivia recovered a judgment of \$83,000 from MacDonald. Must the US company reimburse MacDonald for this amount? Explain.

7. According to the late Professor William L. Prosser, “The theory underlying the workmen’s compensation acts never has been stated better than in the old campaign slogan, ‘The cost of the product should bear the blood of the workman.’” What is meant by this statement?
8. An employee in a Rhode Island foundry inserted two coins in a coin-operated coffee machine in the company cafeteria. One coin stuck in the machine, and the worker proceeded to “whack” the machine with his right arm. The arm struck a grate near the machine, rupturing the biceps muscle and causing a 10 percent loss in the use of the arm. Is the worker entitled to workers’ compensation? Explain.
9. Paulson engaged Arthur to sell Paul’s restored 1948 Packard convertible to Byers for \$23,000. A few days later, Arthur saw an advertisement showing that Collector was willing to pay \$30,000 for a 1948 Packard convertible in “restored” condition. Arthur sold the car to Byers, and subsequently Paulson learned of Collector’s interest. What rights, if any, has Paulson against Arthur?

SELF-TEST QUESTIONS

1. One who has authority to act only in a specifically designated instance or in a specifically designated set of transactions is called
 - a. a subagent
 - b. a general agent
 - c. a special agent
 - d. none of the above

2. An agency relationship may be created by
 - a. contract
 - b. operation of law
 - c. an oral agreement
 - d. all of the above

3. An agent's duty to the principal includes
 - a. the duty to indemnify
 - b. the duty to warn of special dangers
 - c. the duty to avoid self dealing
 - d. all of the above

4. A person whose work is not subject to the control of the principal, but who arranges to perform a job for him is called
 - a. a subagent
 - b. a servant
 - c. a special agent
 - d. an independent contractor

5. An employer's liability for employees' on-the-job injuries is generally governed by
 - a. tort law
 - b. the workers' compensation system
 - c. Social Security
 - d. none of the above

Chapter 39

Liability of Principal and Agent; Termination of Agency

LEARNING OBJECTIVES

After reading this chapter, you should understand the following:

1. The principal's liability in contract
2. The principal's liability in tort
3. The principal's criminal liability
4. The agent's personal liability in tort and contract
5. How agency relationships are terminated

In Chapter 38 "Relationships between Principal and Agent" we considered the relationships between agent and principal. Now we turn to relationships between third parties and the principal or agent. When the agent makes a contract for his principal or commits a tort in the course of his work, is the principal liable? What is the responsibility of the agent for torts committed and contracts entered into on behalf of his principal? How may the relationship be terminated so that the principal or agent will no longer have responsibility toward or liability for the acts of the other? These are the questions addressed in this chapter.

39.1 Principal's Contract Liability

LEARNING OBJECTIVES

1. Understand that the principal's liability depends on whether the agent was authorized to make the contract.
2. Recognize how the agent's authority is acquired: expressly, impliedly, or apparently.
3. Know that the principal may also be liable—even if the agent had no authority—if the principal ratifies the agent's contract after the fact.

Principal's Contract Liability Requires That Agent Had Authority

The key to determining whether a principal is liable for contracts made by his agent is authority: was the agent authorized to negotiate the agreement and close the deal? Obviously, it would not be sensible to hold a contractor liable to pay for a whole load of lumber merely because a stranger wandered into the lumberyard saying, "I'm an agent for ABC Contractors; charge this to their account." To be liable, the principal must have authorized the agent in some manner to act in his behalf, and that authorization must be communicated to the third party by the principal.

Types of Authority

There are three types of authority: express, implied, and apparent (see [Figure 39.1 "Types of Authority"](#)). We will consider each in turn.

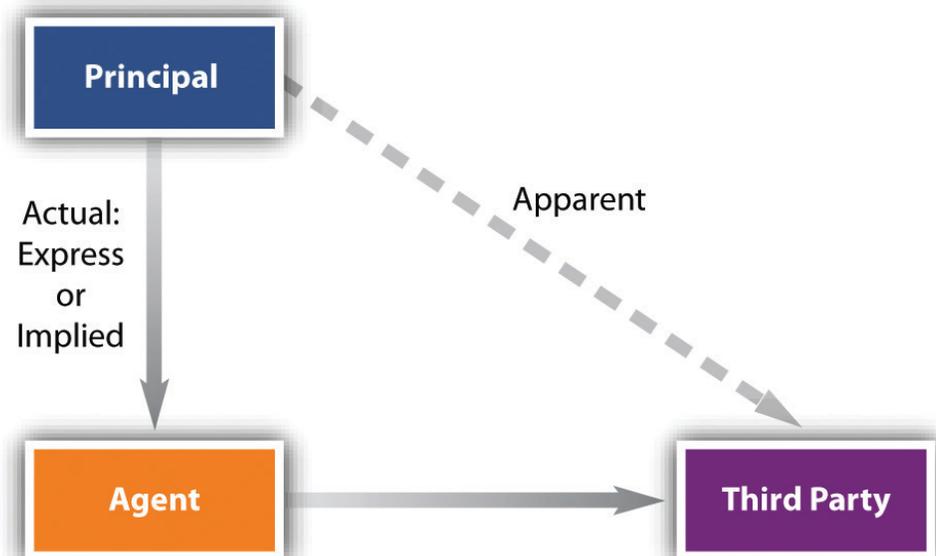

Express Authority

The strongest form of authority is that which is expressly granted, often in written form. The principal consents to the agent's actions, and the third party may then rely on the document attesting to the agent's authority to deal on behalf of the principal. One common form of **express authority**¹ is the standard signature card on file with banks allowing corporate agents to write checks on the company's credit. The principal bears the risk of any wrongful action of his agent, as demonstrated in *Allen A. Funt Productions, Inc. v. Chemical Bank*. *Allen A. Funt Productions, Inc. v. Chemical Bank*, 405 N.Y.S.2d 94 (1978). Allen A. Funt submitted to his bank through his production company various certificates permitting his accountant to use the company's checking accounts. Allen Funt (1914–99) was an

1. Contractually given authority to the agent from the principal, orally or in writing, communicated to the third party.

American television producer, director, and writer, best known as the creator and host of *Candid Camera* from the 1940s to 1980s, which was broadcast as either a regular show or a series of specials. Its most notable run was from 1960 to 1967 on CBS. In fact, for several years the accountant embezzled money from the company by writing checks to himself and depositing them in his own account. The company sued its bank, charging it with negligence, apparently for failing to monitor the amount of money taken by the accountant. But the court dismissed the negligence complaint, citing a state statute based on the common-law agency principle that a third party is entitled to rely on the express authorization given to an agent; in this case, the accountant drew checks on the account within the monetary limits contained in the signature cards on file with the bank. Letters of introduction and work orders are other types of express authority.

Figure 39.1 *Types of Authority*

Implied Authority

Not every detail of an agent's work can be spelled out. It is impossible to delineate step-by-step the duties of a general agent; at best, a principal can set forth only the general nature of the duties that the agent is to perform. Even a special agent's duties are difficult to describe in such detail as to leave him without discretion. If express authority were the only valid kind, there would be no efficient way to use an agent, both because the effort to describe the duties would be too great and because the third party would be reluctant to deal with him.

But the law permits authority to be “implied” by the relationship of the parties, the nature and customs of the business, the circumstances surrounding the act in question, the wording of the agency contract, and the knowledge that the agent has of facts relevant to the assignment. The general rule is that the agent has implied or “incidental” authority to perform acts incidental to or reasonably necessary to carrying out the transaction. Thus if a principal instructs her agent to “deposit a check in the bank today,” the agent has authority to drive to the bank unless the principal specifically prohibits the agent from doing so.

The theory of **implied authority**² is especially important to business in the realm of the business manager, who may be charged with running the entire business operation or only a small part of it. In either event, the business manager has a relatively large domain of implied authority. He can buy goods and services; hire, supervise, and fire employees; sell or junk inventory; take in receipts and pay debts; and in general, direct the ordinary operations of the business. The full extent of the manager’s authority depends on the circumstances—what is customary in the particular industry, in the particular business, and among the individuals directly concerned.

On the other hand, a manager does not have implicit authority to undertake unusual or extraordinary actions on behalf of his principal. In the absence of express permission, an agent may not sell part of the business, start a new business, change the nature of the business, incur debt (unless borrowing is integral to the business, as in banking, for example), or move the business premises. For example, the owner of a hotel appoints Andy manager; Andy decides to rename the hotel and commissions an artist to prepare a new logo for the hotel’s stationery. Andy has no implied authority to change the name or to commission the artist, though he does have implied authority to engage a printer to replenish the stationery supply—and possibly to make some design changes in the letterhead.

Even when there is no implied authority, in an emergency the agent may act in ways that would in the normal course require specific permission from the principal. If unforeseen circumstances arise and it is impracticable to communicate with the principal to find out what his wishes would be, the agent may do what is reasonably necessary in order to prevent substantial loss to his principal. During World War II, Eastern Wine Corporation marketed champagne in a bottle with a diagonal red stripe that infringed the trademark of a French producer. The French company had granted licenses to an American importer to market its champagne in the United States. The contract between producer and importer required the latter to notify the French company whenever a competitor appeared to be infringing its rights and to recommend steps by which the company could stop the infringement. The authority to institute suit was not expressly conferred, and ordinarily the right to do so would not be inferred. Because France was under German occupation,

2. The authority of an agent to perform acts that are reasonably necessary to accomplish the purpose of the agency.

however, the importer was unable to communicate with the producer, its principal. The court held that the importer could file suit to enjoin Eastern Wine from continuing to display the infringing red diagonal stripe, since legal action was “essential to the preservation of the principal’s property.” *G. H. Mumm Champagne v. Eastern Wine Corp.*, 52 F.Supp. 167 (S.D.N.Y. 1943).

The rule that a person’s position can carry with it implied authority is fundamental to American business practice. But outside the United States this rule is not applicable, and the business executive traveling abroad should be aware that in civil-law countries it is customary to present proof of authority to transact corporate business—usually in the form of a power of attorney. This is not always an easy task. Not only must the power of the traveling executive be shown but the right of the corporate officer back in the United States to delegate authority must also be proven.

Apparent Authority

In the agency relationship, the agent’s actions in dealing with third parties will affect the legal rights of the principal. What the third party knows about the agency agreement is irrelevant to the agent’s legal authority to act. That authority runs from principal to agent. As long as an agent has authorization, either express or implied, she may bind the principal legally. Thus the seller of a house may be ignorant of the buyer’s true identity; the person he supposes to be the prospective purchaser might be the agent of an undisclosed principal. Nevertheless, if the agent is authorized to make the purchase, the seller’s ignorance is not a ground for either seller or principal to void the deal.

But if a person has no authority to act as an agent, or an agent has no authority to act in a particular way, is the principal free from all consequences? The answer depends on whether or not the agent has **apparent authority**³—that is, on whether or not the third person reasonably believes from the principal’s words, written or spoken, or from his conduct that he has in fact consented to the agent’s actions. Apparent authority is a manifestation of authority communicated to the third person; it runs from principal to third party, not to the agent.

Apparent authority is sometimes said to be based on the principle of estoppel. Estoppel is the doctrine that a person will not now be allowed to deny a promise or assertion she previously made where there has been detrimental reliance on that promise or assertion. Estoppel is commonly used to avoid injustice. It may be a substitute for the requirement of consideration in contract (making the promise of a gift enforceable where the donee has relied upon the promise), and it is

3. In agency, the situation in which a principal leads a third party to believe that an agent has authority to bind the principal, even where the agent lacks the actual authority to bind the principal.

sometimes available to circumvent the requirement of a writing under the Statute of Frauds.

Apparent authority can arise from prior business transactions. On July 10, Meggs sold to Buyer his business, the right to use the trade name Rose City Sheet Metal Works, and a list of suppliers he had used. Three days later, Buyer began ordering supplies from Central Supply Company, which was on Meggs's list but with which Meggs had last dealt four years before. On September 3, Central received a letter from Meggs notifying it of Meggs's sale of the business to Buyer. Buyer failed to pay Central, which sued Meggs. The court held that Rose City Sheet Metal Works had apparent authority to buy on Meggs's credit; Meggs was liable for supplies purchased between July 10 and September 3. *Meggs v. Central Supply Co.*, 307 N.E.2d 288 (Ind. App. 1974). In such cases, and in cases involving the firing of a general manager, actual notice should be given promptly to all customers. See the discussion of *Kanavos v. Hancock Bank & Trust Company* in [Section 39.4.1 "Implied Authority"](#).

Ratification

Even if the agent possessed no actual authority and there was no apparent authority on which the third person could rely, the principal may still be liable if he ratifies or adopts the agent's acts before the third person withdraws from the contract. Ratification usually relates back to the time of the undertaking, creating authority after the fact as though it had been established initially. Ratification is a voluntary act by the principal. Faced with the results of action purportedly done on his behalf but without authorization and through no fault of his own, he may affirm or disavow them as he chooses. To ratify, the principal may tell the parties concerned or by his conduct manifest that he is willing to accept the results as though the act were authorized. Or by his silence he may find under certain circumstances that he has ratified. Note that ratification does not require the usual consideration of contract law. The principal need be promised nothing extra for his decision to affirm to be binding on him. Nor does ratification depend on the position of the third party; for example, a loss stemming from his reliance on the agent's representations is not required. In most situations, ratification leaves the parties where they expected to be, correcting the agent's errors harmlessly and giving each party what was expected.

KEY TAKEAWAY

The principal is liable on an agent's contract only if the agent was authorized by the principal to make the contract. Such authority is express, implied, or apparent. *Express* means made in words, orally or in writing; *implied* means the agent has authority to perform acts incidental to or reasonably necessary to carrying out the transaction for which she has express authority. *Apparent authority* arises where the principal gives the third party reason to believe that the agent had authority. The reasonableness of the third party's belief is based on all the circumstances—all the facts. Even if the agent has no authority, the principal may, after the fact, ratify the contract made by the agent.

EXERCISES

1. Could express authority be established by silence on the part of the principal?
2. Why is the concept of implied authority very important in business situations?
3. What is the rationale for the doctrine of apparent authority—that is, why would the law impose a contract on a “principal” when in fact there was no principal-agent relationship with the “agent” at all?

39.2 Principal's Tort and Criminal Liability

LEARNING OBJECTIVES

1. Understand in what circumstances a principal will be vicariously liable for torts committed by employees.
2. Recognize the difference between agents whose tort and criminal liability may be imputed to the employer and those whose liability will not be so imputed.
3. Know when the principal will be vicariously liable for intentional torts committed by the agent.
4. Explain what is meant by "the scope of employment," within which the agent's actions may be attributed to the principal and without which they will not.
5. Name special cases of vicarious liability.
6. Describe the principal's liability for crimes committed by the agent.

Principal's Tort Liability

The Distinction between Direct and Vicarious Liability

When is the principal liable for injuries that the agent causes another to suffer?

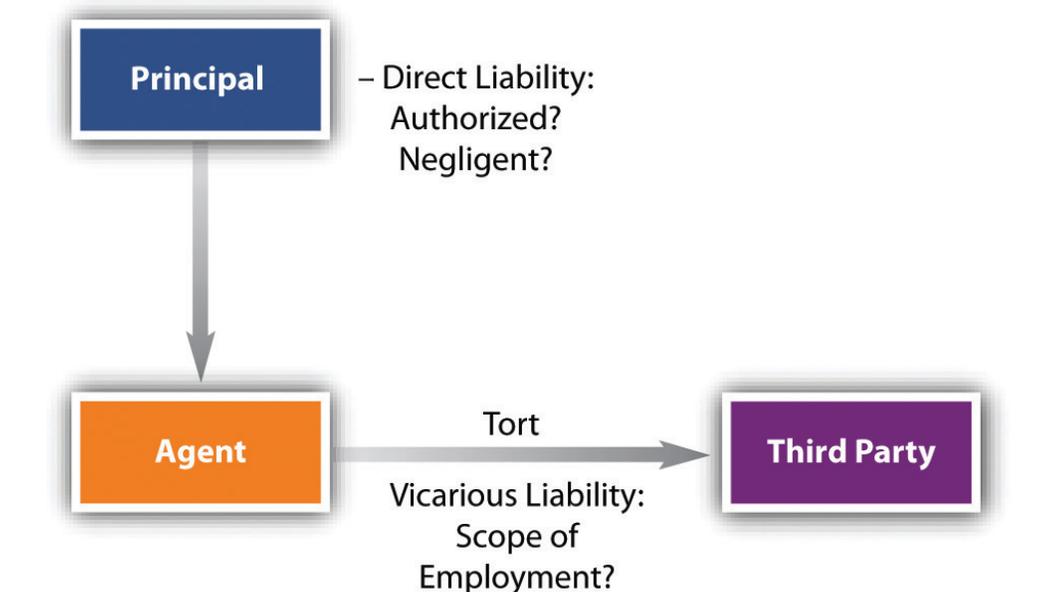

Direct Liability

There is a distinction between torts prompted by the principal himself and torts of which the principal was innocent. If the principal directed the agent to commit a tort or knew that the consequences of the agent's carrying out his instructions would bring harm to someone, the principal is liable. This is an application of the general common-law principle that one cannot escape liability by delegating an unlawful act to another. The syndicate that hires a hitman is as culpable of murder as the man who pulls the trigger. Similarly, a principal who is negligent in his use of agents will be held liable for their negligence. This rule comes into play when the principal fails to supervise employees adequately, gives faulty directions, or hires incompetent or unsuitable people for a particular job. Imposing liability on the principal in these cases is readily justifiable since it is the principal's own conduct that is the underlying fault; the principal here is directly liable.

Vicarious Liability

But the principle of liability for one’s agent is much broader, extending to acts of which the principal had no knowledge, that he had no intention to commit nor involvement in, and that he may in fact have expressly prohibited the agent from engaging in. This is the principle of **respondeat superior**⁴ (“let the master answer”) or the **master-servant doctrine**⁵, which imposes on the principal **vicarious liability**⁶ (*vicarious* means “indirectly, as, by, or through a substitute”) under which the principal is responsible for acts committed by the agent within the scope of the employment (see [Figure 39.2 "Principal’s Tort Liability"](#)).

Figure 39.2 *Principal’s Tort Liability*

The modern basis for vicarious liability is sometimes termed the “deep pocket” theory: the principal (usually a corporation) has deeper pockets than the agent, meaning that it has the wherewithal to pay for the injuries traceable one way or another to events it set in motion. A million-dollar industrial accident is within the means of a company or its insurer; it is usually not within the means of the agent—employee—who caused it.

The “deep pocket” of the defendant-company is not always very deep, however. For many small businesses, in fact, the principle of respondeat superior is one of life or death. One example was the closing in San Francisco of the much-beloved Larraburu Brothers Bakery—at the time, the world’s second largest sourdough bread maker. The bakery was held liable for \$2 million in damages after one of its

- 4. The Latin term for the master-servant doctrine.
- 5. A doctrine under which the employer is liable for torts committed by the employee in the scope of employment.
- 6. Liability incurred indirectly through the actions of another.

delivery trucks injured a six-year-old boy. The bakery's insurance policy had a limit of \$1.25 million, and the bakery could not absorb the excess. The Larraburus had no choice but to cease operations. (See <http://www.outsidelands.org/larraburu.php>.)

Respondeat superior raises three difficult questions: (1) What type of agents can create tort liability for the principal? (2) Is the principal liable for the agent's intentional torts? (3) Was the agent acting within the scope of his employment? We will consider these questions in turn.

Agents for Whom Principals Are Vicariously Liable

In general, the broadest liability is imposed on the master in the case of tortious physical conduct by a servant, as discussed in Chapter 38 "Relationships between Principal and Agent". If the servant acted within the scope of his employment—that is, if the servant's wrongful conduct occurred while performing his job—the master will be liable to the victim for damages unless, as we have seen, the victim was another employee, in which event the workers' compensation system will be invoked. Vicarious tort liability is primarily a function of the employment relationship and not agency status.

Ordinarily, an individual or a company is not vicariously liable for the tortious acts of independent contractors. The plumber who rushes to a client's house to repair a leak and causes a traffic accident does not subject the homeowner to liability. But there are exceptions to the rule. Generally, these exceptions fall into a category of duties that the law deems nondelegable. In some situations, one person is obligated to provide protection to or care for another. The failure to do so results in liability whether or not the harm befell the other because of an independent contractor's wrongdoing. Thus a homeowner has a duty to ensure that physical conditions in and around the home are not unreasonably dangerous. If the owner hires an independent contracting firm to dig a sewer line and the contractor negligently fails to guard passersby against the danger of falling into an open trench, the homeowner is liable because the duty of care in this instance cannot be delegated. (The contractor is, of course, liable to the homeowner for any damages paid to an injured passerby.)

Liability for Agent's Intentional Torts

In the nineteenth century, a principal was rarely held liable for intentional wrongdoing by the agent if the principal did not command the act complained of. The thought was that one could never infer authority to commit a willfully wrongful act. Today, liability for intentional torts is imputed to the principal if the agent is acting to further the principal's business. See the very disturbing *Lyon v.*

Carey in Section 39.4.2 "Employer's Liability for Employee's Intentional Torts: Scope of Employment".

Deviations from Employment

The general rule is that a principal is liable for torts only if the servant committed them "in the scope of employment." But determining what this means is not easy.

The "Scope of Employment" Problem

It may be clear that the person causing an injury is the agent of another. But a principal cannot be responsible for every act of an agent. If an employee is following the letter of his instructions, it will be easy to determine liability. But suppose an agent deviates in some way from his job. The classic test of liability was set forth in an 1833 English case, *Joel v. Morrison*. *Joel v. Morrison*, 6 Carrington & Payne 501. The plaintiff was run over on a highway by a speeding cart and horse. The driver was the employee of another, and inside was a fellow employee. There was no question that the driver had acted carelessly, but what he and his fellow employee were doing on the road where the plaintiff was injured was disputed. For weeks before and after the accident, the cart had never been driven in the vicinity in which the plaintiff was walking, nor did it have any business there. The suggestion was that the employees might have gone out of their way for their own purposes. As the great English jurist Baron Parke put it, "If the servants, being on their master's business, took a detour to call upon a friend, the master will be responsible....But if he was going on a frolic of his own, without being at all on his master's business, the master will not be liable." In applying this test, the court held the employer liable.

The test is thus one of degree, and it is not always easy to decide when a detour has become so great as to be transformed into a frolic. For a time, a rather mechanical rule was invoked to aid in making the decision. The courts looked to the servant's purposes in "detouring." If the servant's mind was fixed on accomplishing his own purposes, then the detour was held to be outside the scope of employment; hence the tort was not imputed to the master. But if the servant also intended to accomplish his master's purposes during his departure from the letter of his assignment, or if he committed the wrong while returning to his master's task after the completion of his frolic, then the tort was held to be within the scope of employment.

This test is not always easy to apply. If a hungry deliveryman stops at a restaurant outside the normal lunch hour, intending to continue to his next delivery after eating, he is within the scope of employment. But suppose he decides to take the

truck home that evening, in violation of rules, in order to get an early start the next morning. Suppose he decides to stop by the beach, which is far away from his route. Does it make a difference if the employer knows that his deliverymen do this?

The Zone of Risk Test

Court decisions in the last forty years have moved toward a different standard, one that looks to the foreseeability of the agent's conduct. By this standard, an employer may be held liable for his employee's conduct even when devoted entirely to the employee's own purposes, as long as it was foreseeable that the agent might act as he did. This is the "zone of risk" test. The employer will be within the zone of risk for vicarious liability if the employee is where she is supposed to be, doing—more or less—what she is supposed to be doing, and the incident arose from the employee's pursuit of the employer's interest (again, more or less). That is, the employer is within the zone of risk if the servant is in the place within which, if the master were to send out a search party to find a missing employee, it would be reasonable to look. See Section 4, *Cockrell v. Pearl River Valley Water Supply Dist.*

Special Cases of Vicarious Liability

Vicarious liability is not limited to harm caused in the course of an agency relationship. It may also be imposed in other areas, including torts of family members, and other torts governed by statute or regulation. We will examine each in turn.

Use of Automobiles

A problem commonly arises when an automobile owner lends his vehicle to a personal friend, someone who is not an agent, and the borrower injures a third person. Is the owner liable? In many states, the owner is not liable; in other states, however, two approaches impose liability on the owner.

7. Doctrine under which the owner of an automobile is liable for damages caused by the driver who has permission to use the car.

8. A doctrine under which an owner of an automobile is liable for damages to others incurred while members of his family are driving the vehicle, under the theory that the vehicle is owned for family purposes.

The first approach is legislative: **owner's consent statutes**⁷ make the owner liable when the automobile is being driven with his consent or knowledge. The second approach to placing liability on the owner is judicial and known as the **family purpose doctrine**⁸. Under this doctrine, a family member who negligently injures someone with the car subjects the owner to liability if the family member was furthering family purposes. These are loosely defined to include virtually every use to which a child, for example, might put a car. In a Georgia case, *Dixon v. Phillips*, the father allowed his minor son to drive the car but expressly forbade him from letting anyone else do so. *Dixon v. Phillips*, 217 S.E.2d 331 (Ga. 1975). Nevertheless, the son gave the wheel to a friend and a collision occurred while both were in the car. The

court held the father liable because he made the car available for the pleasure and convenience of his son and other family members.

Torts of Family Members

At common law, the husband was liable for the torts of his wife, not because she was considered an agent but because she was considered to be an extension of him. “Husband and wife were only one person in law,” O.W. Holmes, *Agency*, 4 Harvard Law Rev. 353 (1890–91). says Holmes, and any act of the wife was supposed to have been done at the husband’s direction (to which Mr. Dickens’s Mr. Bumble responded, in the memorable line, “If the law supposes that, the law is a ass—a idiot” Charles Dickens, *Oliver Twist*, (London: 1838), chap 51.). This ancient view has been abrogated by statute or by court ruling in all the states, so that now a wife is solely responsible for her own torts unless she in fact serves as her husband’s agent.

Unlike wives, children are not presumed at common law to be agents or extensions of the father so that normally parents are not vicariously liable for their children’s torts. However, they can be held liable for failing to control children known to be dangerous.

Most states have statutorily changed the common-law rule, making parents responsible for willful or malicious tortious acts of their children whether or not they are known to be mischief-makers. Thus the Illinois Parental Responsibility Law provides the following: “The parent or legal guardian of an unemancipated minor who resides with such parent or legal guardian is liable for actual damages for the willful or malicious acts of such minor which cause injury to a person or property.” Ill. Rev. Stat. (2005), chapter 70, paragraph 51. <http://law.justia.com/illinois/codes/2005/chapter57/2045.html>. Several other states impose a monetary limit on such liability.

Other Torts Governed by Statute or Regulation

There are certain types of conduct that statutes or regulation attempt to control by placing the burden of liability on those presumably in a position to prevent the unwanted conduct. An example is the “Dramshop Act,” which in many states subjects the owner of a bar to liability if the bar continues to serve an intoxicated patron who later is involved in an accident while intoxicated. Another example involves the sale of adulterated or short-weight foodstuffs: the employer of one who sells such may be liable, even if the employer did not know of the sales.

Principal's Criminal Liability

As a general proposition, a principal will not be held liable for an agent's unauthorized criminal acts if the crimes are those requiring specific intent. Thus a department store proprietor who tells his chief buyer to get the "best deal possible" on next fall's fashions is not liable if the buyer steals clothes from the manufacturer. A principal will, however, be liable if the principal directed, approved, or participated in the crime. Cases here involve, for example, a corporate principal's liability for agents' activity in antitrust violations—price-fixing is one such violation.

There is a narrow exception to the broad policy of immunity. Courts have ruled that under certain regulatory statutes and regulations, an agent's criminality may be imputed to the principal, just as civil liability is imputed under Dramshop Acts. These include pure food and drug acts, speeding ordinances, building regulations, child labor rules, and minimum wage and maximum hour legislation. Misdemeanor criminal liability may be imposed upon corporations and individual employees for the sale or shipment of adulterated food in interstate commerce, notwithstanding the fact that the defendant may have had no actual knowledge that the food was adulterated at the time the sale or shipment was made.

KEY TAKEAWAY

The principal will be liable for the employee's torts in two circumstances: first, if the principal was directly responsible, as in hiring a person the principal knew or should have known was incompetent or dangerous; second, if the employee committed the tort in the scope of business for the principal. This is the master-servant doctrine or respondeat superior. It imposes vicarious liability on the employer: the master (employer) will be liable if the employee was in the zone of activity creating a risk for the employer ("zone of risk" test), that is—generally—if the employee was where he was supposed to be, when he was supposed to be there, and the incident arose out of the employee's interest (however perverted) in promoting the employer's business.

Special cases of vicarious liability arise in several circumstances. For example, the owner of an automobile may be liable for torts committed by one who borrows it, or if it is—even if indirectly—used for family purposes. Parents are, by statute in many states, liable for their children's torts. Similarly by statute, the sellers and employers of sellers of alcohol or adulterated or short-weight foodstuffs may be liable. The employer of one who commits a crime is not usually liable unless the employer put the employee up to the crime or knew that a crime was being committed. But some prophylactic statutes impose liability on the employer for the employee's crime—even if the employee had no intention to commit it—as a means to force the employer to prevent such actions.

EXERCISES

1. What is the difference between direct and vicarious employer tort liability?
2. What is meant by the "zone of risk" test?
3. Under what circumstances will an employer be liable for intentional torts of the employee?
4. When will the employer be liable for an employee's criminal acts?

39.3 Agent's Personal Liability for Torts and Contracts; Termination of Agency

LEARNING OBJECTIVES

1. Understand the agent's personal liability for tort.
2. Understand the agent's personal liability for contract.
3. Recognize the ways the agency relationship is terminated.

Agent's Personal Liability for Torts and Contracts

Tort Liability

That a principal is held vicariously liable and must pay damages to an injured third person does not excuse the agent who actually committed the tortious acts. A person is always liable for his or her own torts (unless the person is insane, involuntarily intoxicated, or acting under extreme duress). The agent is personally liable for his wrongful acts and must reimburse the principal for any damages the principal was forced to pay, as long as the principal did not authorize the wrongful conduct. The agent directed to commit a tort remains liable for his own conduct but is not obliged to repay the principal. Liability as an agent can be burdensome, sometimes perhaps more burdensome than as a principal. The latter normally purchases insurance to cover against wrongful acts of agents, but liability insurance policies frequently do not cover the employee's personal liability if the employee is named in a lawsuit individually. Thus doctors' and hospitals' malpractice policies protect a doctor from both her own mistakes and those of nurses and others that the doctor would be responsible for; nurses, however, might need their own coverage. In the absence of insurance, an agent is at serious risk in this lawsuit-conscious age. The risk is not total. The agent is not liable for torts of other agents unless he is personally at fault—for example, by negligently supervising a junior or by giving faulty instructions. For example, an agent, the general manager for a principal, hires Brown as a subordinate. Brown is competent to do the job but by failing to exercise proper control over a machine negligently injures Ted, a visitor to the premises. The principal and Brown are liable to Ted, but the agent is not.

Contract Liability

It makes sense that an agent should be liable for her own torts; it would be a bad social policy indeed if a person could escape tort liability based on her own fault merely because she acted in an agency capacity. It also makes sense that—as is the

general rule—an agent is not liable on contracts she makes on the principal's behalf; the agent is not a party to a contract made by the agent on behalf of the principal. No public policy would be served by imposing liability, and in many cases it would not make sense. Suppose an agent contracts to buy \$25 million of rolled aluminum for a principal, an airplane manufacturer. The agent personally could not reasonably perform such contract, and it is not intended by the parties that she should be liable. (Although the rule is different in England, where an agent residing outside the country is liable even if it is clear that he is signing in an agency capacity.) But there are three exceptions to this rule: (1) if the agent is undisclosed or partially disclosed, (2) if the agent lacks authority or exceeds it, or (3) if the agent entered into the contract in a personal capacity. We consider each situation.

Agent for Undisclosed or Partially Disclosed Principal

An agent need not, and frequently will not, inform the person with whom he is negotiating that he is acting on behalf of a principal. The secret principal is usually called an “undisclosed principal.” Or the agent may tell the other person that he is acting as an agent but not disclose the principal's name, in which event the principal is “partially disclosed.” To understand the difficulties that may occur, consider the following hypothetical but common example. A real estate developer known for building amusement parks wants to acquire several parcels of land to construct a new park. He wants to keep his identity secret to hold down the land cost. If the landowners realized that a major building project was about to be launched, their asking price would be quite high. So the developer obtains two options to purchase land by using two secret agents—Betty and Clem.

Betty does not mention to sellers that she is an agent; therefore, to those sellers the developer is an undisclosed principal. Clem tells those with whom he is dealing that he is an agent but refuses to divulge the developer's name or his business interest in the land. Thus the developer is, to the latter sellers, a partially disclosed principal. Suppose the sellers get wind of the impending construction and want to back out of the deal. Who may enforce the contracts against them?

The developer and the agents may sue to compel transfer of title. The undisclosed or partially disclosed principal may act to enforce his rights unless the contract specifically prohibits it or there is a representation that the signatories are not signing for an undisclosed principal. The agents may also bring suit to enforce the principal's contract rights because, as agents for an undisclosed or partially disclosed principal, they are considered parties to their contracts.

Now suppose the developer attempts to call off the deal. Whom may the sellers sue? Both the developer and the agents are liable. That the sellers had no knowledge of

the developer's identity—or even that there was a developer—does not invalidate the contract. If the sellers first sue agent Betty (or Clem), they may still recover the purchase price from the developer as long as they had no knowledge of his identity prior to winning the first lawsuit. The developer is discharged from liability if, knowing his identity, the plaintiffs persist in a suit against the agents and recover a judgment against them anyway. Similarly, if the seller sues the principal and recovers a judgment, the agents are relieved of liability. The seller thus has a “right of election” to sue either the agent or the undisclosed principal, a right that in many states may be exercised any time before the seller collects on the judgment.

Lack of Authority in Agent

An agent who purports to make a contract on behalf of a principal, but who in fact has no authority to do so, is liable to the other party. The theory is that the agent has warranted to the third party that he has the requisite authority. The principal is not liable in the absence of apparent authority or ratification. But the agent does not warrant that the principal has capacity. Thus an agent for a minor is not liable on a contract that the minor later disavows unless the agent expressly warranted that the principal had attained his majority. In short, the implied warranty is that the agent has authority to make a deal, not that the principal will necessarily comply with the contract once the deal is made.

Agent Acting on Own Account

An agent will be liable on contracts made in a personal capacity—for instance, when the agent personally guarantees repayment of a debt. The agent's intention to be personally liable is often difficult to determine on the basis of his signature on a contract. Generally, a person signing a contract can avoid personal liability only by showing that he was in fact signing as an agent. If the contract is signed “Jones, Agent,” Jones can introduce evidence to show that there was never an intention to hold him personally liable. But if he signed “Jones” and neither his agency nor the principal's name is included, he will be personally liable. This can be troublesome to agents who routinely indorse checks and notes. There are special rules governing these situations, which are discussed in [Chapter 25 "Liability and Discharge"](#) dealing with commercial paper.

Termination of Agency

The agency relationship is not permanent. Either by action of the parties or by law, the relationship will eventually terminate.

By Act of the Parties

Certainly the parties to an agency contract can terminate the agreement. As with the creation of the relationship, the agreement may be terminated either expressly or implicitly.

Express Termination

Many agreements contain specified circumstances whose occurrence signals the end of the agency. The most obvious of these circumstances is the expiration of a fixed period of time (“agency to terminate at the end of three months” or “on midnight, December 31”). An agreement may also terminate on the accomplishment of a specified act (“on the sale of the house”) or following a specific event (“at the conclusion of the last horse race”).

Mutual consent between the parties will end the agency. Moreover, the principal may revoke the agency or the agent may renounce it; such a **revocation**⁹ or **renunciation of agency**¹⁰ would be an express termination. Even a contract that states the agreement is irrevocable will not be binding, although it can be the basis for a damage suit against the one who breached the agreement by revoking or renouncing it. As with any contract, a person has the *power* to breach, even in absence of the *right* to do so. If the agency is coupled with an interest, however, so that the authority to act is given to secure an interest that the agent has in the subject matter of the agency, then the principal lacks the power to revoke the agreement.

Implied Termination

There are a number of other circumstances that will spell the end of the relationship by implication. Unspecified events or changes in business conditions or the value of the subject matter of the agency might lead to a reasonable inference that the agency should be terminated or suspended; for example, the principal desires the agent to buy silver but the silver market unexpectedly rises and silver doubles in price overnight. Other circumstances that end the agency include disloyalty of the agent (e.g., he accepts an appointment that is adverse to his first principal or embezzles from the principal), bankruptcy of the agent or of the principal, the outbreak of war (if it is reasonable to infer that the principal, knowing of the war, would not want the agent to continue to exercise authority), and a change in the law that makes a continued carrying out of the task illegal or seriously interferes with it.

9. The principal’s unilateral termination of the agency relationship.

10. The agent’s unilateral termination of the agency relationship.

By Operation of Law

Aside from the express termination (by agreement of both or upon the insistence of one), or the necessary or reasonable inferences that can be drawn from their agreements, the law voids agencies under certain circumstances. The most frequent termination by operation of law is the death of a principal or an agent. The death of an agent also terminates the authority of subagents he has appointed, unless the principal has expressly consented to the continuing validity of their appointment. Similarly, if the agent or principal loses capacity to enter into an agency relationship, it is suspended or terminated. The agency terminates if its purpose becomes illegal.

Even though authority has terminated, whether by action of the parties or operation of law, the principal may still be subject to liability. Apparent authority in many instances will still exist; this is called **lingering authority**¹¹. It is imperative for a principal on termination of authority to notify all those who may still be in a position to deal with the agent. The only exceptions to this requirement are when termination is effected by death, loss of the principal's capacity, or an event that would make it impossible to carry out the object of the agency.

KEY TAKEAWAY

A person is always liable for her own torts, so an agent who commits a tort is liable; if the tort was in the scope of employment the principal is liable too. Unless the principal put the agent up to committing the tort, the agent will have to reimburse the principal. An agent is not generally liable for contracts made; the principal is liable. But the agent will be liable if he is undisclosed or partially disclosed, if the agent lacks authority or exceeds it, or, of course, if the agent entered into the contract in a personal capacity.

Agencies terminate expressly or impliedly or by operation of law. An agency terminates expressly by the terms of the agreement or mutual consent, or by the principal's revocation or the agent's renunciation. An agency terminates impliedly by any number of circumstances in which it is reasonable to assume one or both of the parties would not want the relationship to continue. An agency will terminate by operation of law when one or the other party dies or becomes incompetent, or if the object of the agency becomes illegal. However, an agent may have apparent lingering authority, so the principal, upon termination of the agency, should notify those who might deal with the agent that the relationship is severed.

11. Authority that arises where actual authority has been terminated, but third parties are led by the principal's negligence to believe it still exists.

EXERCISES

1. Pauline, the owner of a large bakery business, wishes to expand her facilities by purchasing the adjacent property. She engages Alice as an agent to negotiate the deal with the property owner but instructs her not to tell the property owner that she—Alice—is acting as an agent because Pauline is concerned that the property owner would demand a high price. A reasonable contract is made. When the economy sours, Pauline decides not to expand and cancels the plan. Who is liable for the breach?
2. Peter, the principal, instructs his agent, Alice, to tour England and purchase antique dining room furniture for Peter's store. Alice buys an antique bed set. Who is liable, Peter or Alice? Suppose the seller did not know of the limit on Alice's authority and sells the bed set to Alice in good faith. What happens when Peter discovers he owes the seller for the set?
3. Under what circumstances will the agency terminate expressly?
4. Agent is hired by Principal to sell a new drug, Phobbot. Six months later, as it becomes apparent that Phobbot has nasty side effects (including death), the Food and Drug Administration orders the drug pulled from the shelves. Agent's agency is terminated; what terminology is appropriate to describe how?
5. Principal engages Agent to buy lumber, and in that capacity Agent deals with several large timber owners. Agent's contract ends on July 31; on August 1, Agent buys \$150,000 worth of lumber from a seller with whom he had dealt previously on Principal's behalf. Who is liable and why?

Implied Authority

Kanavos v. Hancock Bank & Trust Company

439 N.E.2d 311 (Mass. 1982)

KASS, J.

At the close of the plaintiff's evidence, the defendant moved for a directed verdict, which the trial judge allowed. The judge's reason for so doing was that the plaintiff, in his contract action, failed to introduce sufficient evidence tending to prove that the bank officer who made the agreement with which the plaintiff sought to charge the bank had any authority to make it. Upon review of the record we are of opinion that there was evidence which, if believed, warranted a finding that the bank officer had the requisite authority or that the bank officer had apparent authority to make the agreement in controversy. We therefore reverse the judgment.

For approximately ten years prior to 1975, Harold Kanavos and his brother borrowed money on at least twenty occasions from the Hancock Bank & Trust Company (the Bank), and, during that period, the loan officer with whom Kanavos always dealt was James M. Brown. The aggregate loans made by the Bank to Kanavos at any given time went as high as \$800,000.

Over that same decade, Brown's responsibilities at the Bank grew, and he had become executive vice-president. Brown was also the chief loan officer for the Bank, which had fourteen or fifteen branches in addition to its head office. Physically, Brown's office was at the head office, toward the rear of the main banking floor, opposite the office of the president—whose name was Kelley. Often Brown would tell Kanavos that he had to check an aspect of a loan transaction with Kelley, but Kelley always backed Brown up on those occasions....

[The plaintiff, Harold Kanavos, entered into an agreement with the defendant Bank whereby stock owned by the Kanavos brothers was sold to the Bank and the plaintiff was given an option to repurchase the stock. Kanavos' suit against the Bank was based on an amendment to the agreement offered by Brown.]

Kanavos was never permitted to introduce in evidence the terms of the offer Brown made. That offer was contained in a writing, dated July 16, 1976, on bank letterhead, which read as follows: "This letter is to confirm our conversation regarding your option to re-purchase the subject property. In lieu of your not exercising your option, we agree to pay you \$40,000 representing a commission upon our sale of the subject property, and in addition, will give you the option to match the price of sale of said property to extend for a 60 day period from the time our offer is received." Brown signed the letter as executive vice-president. The basis of exclusion was that the plaintiff had not established the authority of Brown to make with Kanavos the arrangement memorialized in the July 16, 1976, letter.

Whether Brown's job description impliedly authorized the right of last refusal or cash payment modification is a question of how, in the circumstances, a person in Brown's position could reasonably interpret his authority. Whether Brown had apparent authority to make the July 16, 1976, modification is a question of how, in the circumstances, a third person, e.g., a customer of the Bank such as Kanavos, would reasonably interpret Brown's authority in light of the manifestations of his principal, the Bank.

Titles of office generally do not establish apparent authority. Brown's status as executive vice-president was not, therefore, a badge of apparent authority to modify agreements to which the Bank was a party.

Trappings of office, e.g., office and furnishing, private secretary, while they may have some tendency to suggest executive responsibility, do not without other evidence provide a basis for finding apparent authority. Apparent authority is drawn from a variety of circumstances. Thus in *Federal Nat. Bank v. O'Connell*... (1940), it was held apparent authority could be found because an officer who was a director, vice-president and treasurer took an active part in directing the affairs of the bank in question and was seen by third parties talking with customers and negotiating with them. In *Costonis v. Medford Housing Authy*... (1961), the executive director of a public housing authority was held to have apparent authority to vary specifications on the basis of the cumulative effect of what he had done and what the authority appeared to permit him to do.

In the instant case there was evidence of the following variety of circumstances: Brown's title of executive vice-president; the location of his office opposite the president; his frequent communications with the president; the long course of dealing and negotiations; the encouragement of Kanavos by the president to deal with Brown; the earlier amendment of the agreement by Brown on behalf of the Bank on material points, namely the price to be paid by the Bank for the shares and the repurchase price; the size of the Bank (fourteen or fifteen branches in addition

to the main office); the secondary, rather than fundamental, nature of the change in the terms of the agreement now repudiated by the Bank, measured against the context of the overall transaction; and Brown's broad operating authority...all these added together would support a finding of apparent authority. When a corporate officer, as here, is allowed to exercise general executive responsibilities, the "public expectation is that the corporation should be bound to engagements made on its behalf by those who presume to have, and convincingly appear to have, the power to agree." [Citation] This principle does not apply, of course, where in the business context, the requirement of specific authority is presumed, e.g., the sale of a major asset by a corporation or a transaction which by its nature commits the corporation to an obligation outside the scope of its usual activity. The modification agreement signed by Brown and dated July 16, 1976, should have been admitted in evidence, and a verdict should not have been directed.

Judgment reversed.

CASE QUESTIONS

1. Why are "titles of office" insufficient to establish apparent authority?
2. Why are "trappings of office" insufficient to establish apparent authority?
3. What is the relationship between apparent authority and estoppel? Who is estopped to do what, and why?

Employer's Liability for Employee's Intentional Torts: Scope of Employment

Lyon v. Carey

533 F.2d 649 (Cir. Ct. App. DC 1976)

McMillan, J.:

Corene Antoinette Lyon, plaintiff, recovered a \$33,000.00 verdict [about \$142,000 in 2010 dollars] in the United States District Court for the District of Columbia before Judge Barrington T. Parker and a jury, against the corporate defendants, George's Radio and Television Company, Inc., and Pep Line Trucking Company, Inc. The suit for damages arose out of an assault, including rape, committed with a knife and other weapons upon the plaintiff on May 9, 1972, by Michael Carey, a nineteen-

year-old deliveryman for Pep Line Trucking Company, Inc. Three months after the trial, Judge Parker set aside the verdict and rendered judgment for both defendants notwithstanding the verdict. Plaintiff appealed....

Although the assault was perhaps at the outer bounds of respondeat superior, the case was properly one for the jury. Whether the assault in this case was the outgrowth of a job-related controversy or simply a personal adventure of the deliveryman, was a question for the jury. This was the import of the trial judge's instructions. The verdict as to Pep Line should not have been disturbed.

Irene Lyon bought a mattress and springs for her bed from the defendant George's Radio and Television Company, Inc. The merchandise was to be delivered on May 9, 1972. Irene Lyon had to be at work and the plaintiff [Irene's sister] Corene Lyon, had agreed to wait in her sister's apartment to receive the delivery.

A C.O.D. balance of \$13.24 was due on the merchandise, and Irene Lyon had left a check for \$13.24 to cover that balance. Plaintiff had been requested by her sister to "wait until the mattress and the springs came and to check and make sure they were okay."

Plaintiff, fully clothed, answered the door. Her description of what happened is sufficiently brief and unqualified that it will bear repeating in full. She testified, without objection, as follows:

I went to the door, and I looked in the peephole, and I asked who was there. The young man told me he was a delivery man from George's. He showed me a receipt, and it said, 'George's.' He said he [needed cash on delivery—COD], so I let him in, and I told him to bring the mattress upstairs and he said, 'No,' that he wasn't going to lug them upstairs, and he wanted the COD first, and I told him I wanted to see the mattress and box springs to make sure they were okay, and he said no, he wasn't going to lug them upstairs [until he got the check].

So this went back and forwards and so he was getting angry, and I told him to wait right here while I go get the COD. I went to the bedroom to get the check, and I picked it up, and I turned around and he was right there.

And then I was giving him the check and then he told me that his boss told him not to accept a check, that he wanted cash money, and that if I didn't give him cash money, he was going to take it on my ass, and he told me that he was no delivery man, he was a rapist and then he threw me on the bed.

[The Court] Talk louder, young lady, the jury can't hear you.

[The witness] And then he threw me on the bed, and he had a knife to my throat.

[Plaintiff's attorney] Then what happened?

And then he raped me.

Plaintiff's pre-trial deposition was a part of the record on appeal, and it shows that Carey raped plaintiff at knife point; that then he chased her all over the apartment with a knife and scissors and cut plaintiff in numerous places on her face and body, beat and otherwise attacked her. All of the physical injury other than the rape occurred after rather than before the rape had been accomplished....

[Carey was convicted of rape and sent to prison. The court determined that George's was properly dismissed because Pep Line, Carey's employer, was an independent contractor over which George's had no control.]

The principal question, therefore, is whether the evidence discloses any other basis upon which a jury could reasonably find Pep Line, the employer of Carey, liable for the assault.

Michael Carey was in the employment of the defendant Pep Line as a deliveryman. He was authorized to make the delivery of the mattress and springs plaintiff's sister had bought. He gained access to the apartment only upon a showing of the delivery receipt for the merchandise. His employment contemplated that he visit and enter that particular apartment. Though the apartment was not owned by nor in the control of his employer, it was nevertheless a place he was expected by his employer to enter.

After Carey entered, under the credentials of his employment and the delivery receipt, a dispute arose naturally and immediately between him and the plaintiff about two items of great significance in connection with his job. These items were the request of the plaintiff, the customer's agent, to inspect the mattress and springs before payment (which would require their being brought upstairs before the payment was made), and Carey's insistence on getting cash rather than a check.

The dispute arose out of the very transaction which had brought Carey to the premises, and, according to the plaintiff's evidence, out of the employer's instructions to get cash only before delivery.

On the face of things, Pep Line Trucking Company, Inc. is liable, under two previous decisions of the Court of Appeals for the District of Columbia Circuit. [Citation (1953)] held a taxi owner liable for damages (including a broken leg) sustained by a customer who had been run over by the taxi in pursuit of a dispute between the driver and the customer about a fare. [Citation (1939)], held a restaurant owner liable to a restaurant patron who was beaten with a stick by a restaurant employee, after a disagreement over the service. The theory was that:

It is well established that an employer may be held responsible in tort for assaults committed by an employee while he is acting within the scope of his employment, even though he may act wantonly and contrary to his employer's instructions. [Citations] "...having placed [the employee] in charge and committed the management of the business to his care, defendants may not escape liability either on the ground of his infirmity of temperament or because, under the influence of passion aroused by plaintiff's threat to report the circumstances, he went beyond the ordinary line of duty and inflicted the injury shown in this case. [Citations]"

Munick v. City of Durham ([Citation], Supreme Court of North Carolina, 1921), though not a binding precedent, is informative and does show that the theory of liability advanced by the plaintiff is by no means recent in origin. The plaintiff, Munick, a Russian born Jew, testified that he went to the Durham, North Carolina city water company office on April 17, 1919, and offered to pay his bill with "three paper dollars, one silver dollar, and fifty cents in pennies." The pennies were in a roll "like the bank fixes them." The clerk gave a receipt and the plaintiff prepared to leave the office. The office manager came into the room, saw the clerk counting the pennies, became enraged at the situation, shoved the pennies onto the floor and ordered Munick to pick them up. Bolton, the manager, "locked the front door and took me by the jacket and called me 'God damned Jew,' and said, 'I want only bills.' I did not say anything and he hit me in the face. I did not resist, and the door was locked and I could not get out...." With the door locked, Bolton then repeatedly choked and beat the plaintiff, finally extracted a bill in place of the pennies, and ordered him off the premises with injuries including finger marks on his neck that could be seen for eight or ten days. Bolton was convicted of unlawful assault [but the case against the water company was dismissed].

The North Carolina Supreme Court (Clark, C. J.) reversed the trial court's dismissal and held that the case should have gone to the jury. The court...said [Citation]:

"It is now fully established that corporations may be held liable for negligent and malicious torts, and that responsibility will be imputed whenever such wrongs are committed by their employees and agents in the course of their employment and within its scope * * * in many of the cases, and in reliable textbooks * * * 'course of

employment' is stated and considered as sufficiently inclusive; but, whether the one or the other descriptive term is used, they have the same significance in importing liability on the part of the principal when the agent is engaged in the work that its principal has employed or directed him to do and * * * in the effort to accomplish it. When such conduct comes within the description that constitutes an actionable wrong, the corporation principal, as in other cases of principal and agent, is liable not only for 'the act itself, but for the ways and means employed in the performance thereof.'

"In 1 Thompson, Negligence, s 554, it is pointed out that, unless the above principle is maintained:

"It will always be more safe and profitable for a man to conduct his business vicariously than in his own person. He would escape liability for the consequences of many acts connected with his business, springing from the imperfections of human nature, because done by another, for which he would be responsible if done by himself. Meanwhile, the public, obliged to deal or come in contact with his agent, for injuries done by them must be left wholly without redress. He might delegate to persons pecuniarily irresponsible the care of large factories, of extensive mines, of ships at sea, or of railroad trains on land, and these persons, by the use of the extensive power thus committed to them, might inflict wanton and malicious injuries on third persons, without other restraint than that which springs from the imperfect execution of the criminal laws. A doctrine so fruitful of mischief could not long stand unshaken in an enlightened jurisprudence.' This court has often held the master liable, even if the agent was willful, provided it was committed in the course of his employment. [Citation]"

"The act of a servant done to effect some independent purpose of his own and not with reference to the service in which he is employed, or while he is acting as his own master for the time being, is not within the scope of his employment so as to render the master liable therefor. In these circumstances the servant alone is liable for the injury inflicted." [Citation]..."The general idea is that the employee at the time of doing the wrongful act, in order to fix liability on the employer, must have been acting in behalf of the latter and not on his own account [Citation]."

The principal physical (as opposed to psychic) damage to the plaintiff is a number of disfiguring knife wounds on her head, face, arms, breasts and body. If the instrumentalities of assault had not included rape, the case would provoke no particular curiosity nor interest because it comes within all the classic requirements for recovery against the master. The verdict is not attacked as excessive, and could not be excessive in light of the physical injuries inflicted.

It may be suggested that [some of the cases discussed] are distinguishable because in each of those cases the plaintiff was a business visitor on the defendant's "premises." ...Home delivery customers are usually in their homes, sometimes alone; and deliveries of merchandise may expose householders to one-on-one confrontations with deliverymen. It would be a strange rule indeed which, while allowing recovery for assaults committed in "the store," would deny a master's liability for an assault committed on a lone woman in her own home, by a deliveryman required by his job to enter the home....

If, as in [one case discussed], the assault was not motivated or triggered off by anything in the employment activity but was the result of only propinquity and lust, there should be no liability. However, if the assault, sexual or otherwise, was triggered off or motivated or occasioned by a dispute over the conduct then and there of the employer's business, then the employer should be liable.

It is, then, a question of fact for the trier of fact, rather than a question of law for the court, whether the assault stemmed from purely and solely personal sources or arose out of the conduct of the employer's business; and the trial judge so instructed the jury.

It follows that, under existing decisions of the District of Columbia Circuit, plaintiff has made out a case for the jury against Pep Line Trucking, Inc. unless the sexual character of one phase of the assault bars her from recovery for damages from all phases of the assault.

We face, then, this question: Should the entire case be taken from the jury because, instead of a rod of wood (as in [one case]), in addition to weapons of steel (as in [one case, a knife]); and in addition to his hands (as in [the third case, regarding the dispute about the pennies]), Carey also employed a sexual weapon, a rod of flesh and blood in the pursuit of a job-related controversy?

The answer is, No. It is a jury's job to decide how much of plaintiff's story to believe, and how much if any of the damages were caused by actions, including sexual assault, which stemmed from job-related sources rather than from purely personal origins....

The judgment is affirmed as to the defendant George's and reversed as to the defendant Pep Line Trucking Company, Inc.

CASE QUESTIONS

1. What triggered the dispute here?
2. The court observes, “On the face of things, Pep Line Trucking Company, Inc. is liable.” But there are two issues that give the court cause for more explanation. (1) Why does the court discuss the point that the assault did not occur on the employer’s premises? (2) Why does the court mention that the knife assault happened *after* the rape?
3. It is difficult to imagine that a sexual assault could be anything other than some “purely and solely personal” gratification, unrelated to the employer’s business. How did the court address this?
4. What is the controlling rule of law as to the employer’s liability for intentional torts here?
5. What does the court mean when it says, “the assault was perhaps at the outer bounds of respondeat superior”?
6. Would the jury think about who had the “deep pocket” here? Who did have it?

Employer’s Liability for Employee’s Intentional Torts: Scope of Employment

Cockrell v. Pearl River Valley Water Supply Dist.

865 So.2d 357 (Miss. 2004)

The Pearl River Valley Water Supply District (“District”) was granted summary judgment pursuant to the Mississippi Tort Claims Act (MTCA) dismissing with prejudice all claims asserted against it by Sandra Cockrell. Cockrell appeals the ruling of the circuit court citing numerous errors. Finding the motion for summary judgment was properly granted in favor of the District, this Court affirms the final judgment entered by the Circuit Court of Rankin County.

Facts and Proceedings in the Trial Court

On June 28, 1998, Sandra Cockrell was arrested for suspicion of driving under the influence of alcohol by Officer Joey James who was employed as a security patrol officer with the Reservoir Patrol of the Pearl River Valley Water Supply District. Officer James then transported Cockrell to the Reservoir Patrol office and administered an intoxilyzer test. The results of the test are not before us; however, we do know that after the test was administered, Officer James apologized to Cockrell for arresting her, and he assured her that he would prepare her paperwork

so that she would not have to spend much time in jail. As they were leaving the Reservoir Patrol office, Officer James began asking Cockrell personal questions such as where she lived, whether she was dating anyone and if she had a boyfriend. Officer James then asked Cockrell for her cell phone number so that he could call and check on her. As they were approaching his patrol car for the trip to the Rankin County jail, Officer James informed Cockrell that she should be wearing handcuffs; however, he did not handcuff Cockrell, and he allowed her to ride in the front seat of the patrol car with him. In route to the jail, Cockrell became emotional and started crying. As she was fixing her makeup using the mirror on the sun visor, Officer James pulled his patrol car into a church parking lot and parked the car. He then pulled Cockrell towards him in an embrace and began stroking her back and hair telling her that things would be fine. Cockrell told Officer James to release her, but he continued to embrace her for approximately five minutes before continuing on to the jail.

On June 30, 1998, Cockrell returned to the Reservoir Patrol office to retrieve her driver's license. Officer James called Cockrell into his office and discussed her DUI charge with her. As she was leaving, Officer James grabbed her from behind, turned her around, pinned both of her arms behind her and pulled her to his chest. When Officer James bent down to kiss her, she ducked her head, thus causing Officer James to instead kiss her forehead. When Officer James finally released Cockrell, she ran out of the door and drove away. [Subsequently, Cockrell's attorney threatened civil suit against Patrol; James was fired in October 1998.]

On September 22, 1999, Cockrell filed a complaint for damages against the District alleging that on the nights of June 28 and June 30, 1998, Officer James was acting within the course and scope of his employment with the District and that he acted with reckless disregard for her emotional well-being and safety....On April 2, 2002, the District filed its motion for summary judgment alleging that there was no genuine issue of material fact regarding Cockrell's claim of liability. The motion alleged that the conduct described by Cockrell was outside the course and scope of Officer James's public employment as he was intending to satisfy his lustful urges. Cockrell responded to the motion arguing that the misconduct did occur in the course and scope of Officer James's employment with the District and also that the misconduct did not reach the level of a criminal offense such that the District could be found not liable under the MTCA.

The trial court entered a final judgment granting the District's motion for summary judgment and dismissing the complaint with prejudice. The trial court found that the District could not be held liable under the MTCA for the conduct of Officer James which was both criminal and outside the course and scope of his employment. Cockrell...appeal[ed].

Discussion

Summary judgment is granted in cases where there is “no genuine issue as to any material fact and that the moving party is entitled to a judgment as a matter of law.” ...

Cockrell contends there is a genuine issue of material of fact regarding whether Officer James was acting in the course and scope of his employment with the District during the incidents which occurred on the nights of June 28 and June 30, 1998. Cockrell argues Officer James’s conduct, although inappropriate, did not rise to the level of criminal conduct. Cockrell contends Officer James’s action of hugging Cockrell was similar to an officer consoling a victim of a crime. Cockrell does admit that Officer James’s action of kissing her is more difficult to view as within the course and scope of his employment...

The District argues that although Officer James acted within the course and scope of his duties when he arrested Cockrell, his later conduct, which was intended to satisfy his lustful desires, was outside the scope of his employment with it....

“Mississippi law provides that an activity must be in furtherance of the employer’s business to be within the scope and course of employment.” [Citation] To be within the course and scope of employment, an activity must carry out the employer’s purpose of the employment or be in furtherance of the employer’s business. [Citations] Therefore, if an employee steps outside his employer’s business for some reason which is not related to his employment, the relationship between the employee and the employer “is temporarily suspended and this is so ‘no matter how short the time and the [employer] is not liable for [the employee’s] acts during such time.’” “An employee’s personal unsanctioned recreational endeavors are beyond the course and scope of his employment.” [Citation]

[In one case cited,] Officer Kerry Collins, a Jackson Police officer, was on duty when he came upon the parked car of L.T., a minor, and her boyfriend, who were about to engage in sexual activity. [Citation] Officer Collins instructed L.T. to take her boyfriend home, and he would follow her to make sure she followed his orders. After L.T. dropped off her boyfriend, Officer Collins continued to follow her until he pulled L.T. over. Officer Collins then instructed L.T. to follow him to his apartment or else he would inform L.T.’s parents of her activities. L.T. followed Officer Collins to his apartment where they engaged in sexual activity. Upon returning home, L.T. told her parents everything that had happened. L.T. and her parents filed suit against Officer Collins, the City of Jackson and the Westwood Apartments, where Officer Collins lived rent free in return for his services as a security guard....The district court granted summary judgment in favor of the City finding that Officer

Collins acted outside the course and scope of his employment with the Jackson Police Department. [Citation]

In [Citation] the plaintiff sued the Archdiocese of New Orleans for damages that allegedly resulted from his sexual molestation by a Catholic priest. The Fifth Circuit found that the priest was not acting within the course and scope of his employment. The Fifth Circuit held that “smoking marijuana and engaging in sexual acts with minor boys” in no way furthered the interests of his employer.

The Southern District of Mississippi and the Fifth Circuit, applying Mississippi law, have held that sexual misconduct falls outside the course and scope of employment. There is no question that Officer James was within the course and scope of his employment when he first stopped Cockrell for suspicion of driving under the influence of alcohol. However, when Officer James diverted from his employment for personal reasons, he was no longer acting in the furtherance of his employer’s interests...Therefore, the District cannot be held liable...for the misconduct of Officer James which occurred outside the course and scope of his employment.

Affirmed.

CASE QUESTIONS

1. How can this case and *Lyon v. Carey* (Section 39.4.2 "Employer’s Liability for Employee’s Intentional Torts: Scope of Employment") be reconciled? Both involve an agent’s unacceptable behavior—assault—but in *Lyon* the agent’s actions were imputed to the principal, and in *Cockrell* the agent’s actions were not imputed to the principal.
2. What is the controlling rule of law governing the principal’s liability for the agent’s actions?
3. The law governing the liability of principals for acts of their agents is well settled. Thus the cases turn on the facts. Who decides what the facts are in a lawsuit?

39.5 Summary and Exercises

Summary

A contract made by an agent on behalf of the principal legally binds the principal. Three types of authority may bind the principal: (1) express authority—that which is actually given and spelled out, (2) implied authority—that which may fairly be inferred from the parties' relationship and which is incidental to the agent's express authority, and (3) apparent authority—that which reasonably appears to a third party under the circumstances to have been given by the principal. Even in the absence of authority, a principal may ratify the agent's acts.

The principal may be liable for tortious acts of the agent but except under certain regulatory statutes may not be held criminally liable for criminal acts of agents not prompted by the principal. Under the doctrine of respondeat superior, a principal is generally liable for acts by a servant within the scope of employment. A principal usually will not be held liable for acts of nonservant agents that cause physical damage, although he will be held liable for nonphysical torts, such as misrepresentation. The principal will not be held liable for tortious acts of independent contractors, although the principal may be liable for injuries resulting from his failure to act in situations in which he was not legally permitted to delegate a duty to act. Whenever an agent is acting to further the principal's business interests, the principal will be held vicariously liable for the agent's intentional torts. What constitutes scope of employment is not easy to determine; the modern trend is to hold a principal liable for the conduct of an agent if it was foreseeable that the agent might act as he did.

Most states have special rules of vicarious liability for special situations; for example, liability of an automobile owner for use by another. Spouses are not vicariously liable for each other, nor are parents for children, except for failing to control children known to be dangerous.

In general, an agent is not personally liable on contracts he has signed on behalf of a principal. This general rule has several exceptions recognized in most states: (1) when the agent is serving an undisclosed or partially disclosed principal, (2) when the agent lacks authority or exceeds his authority, and (3) if the agent entered into the contract in a personal capacity.

The agency relationship may be terminated by mutual consent, by express agreement of the parties that the agency will end at a certain time or on the occurrence of a certain event, or by an implied agreement arising out of the circumstances in each case. The agency may also be unilaterally revoked by the principal—unless the agency is coupled with an interest—or renounced by the agent. Finally, the agency will terminate by operation of law under certain circumstances, such as death of the principal or agent.

EXERCISES

1. Parke-Bernet Galleries, acting as agent for an undisclosed principal, sold a painting to Weisz. Weisz later discovered that the painting was a forgery and sued Parke-Bernet for breach of contract. In defense, Parke-Bernet argued that as a general rule, agents are not liable on contracts made for principals. Is this a good defense? Explain.
2. Lynch was the loan officer at First Bank. Patterson applied to borrow \$25,000. Bank policy required that Lynch obtain a loan guaranty from Patterson's employer, a milk company. The manager of the milk company visited the bank and signed a guaranty on behalf of the company. The last paragraph of the guaranty stated, "This guaranty is signed by an officer having legal right to bind the company through authorization of the Board of Directors." Should Lynch be satisfied with this guaranty? Would he be satisfied if the president of the milk company, who was also a director, affirmed that the manager had authority to sign the guaranty? Explain.
3. Ralph owned a retail meat market. Ralph's agent Sam, without authority but purporting to act on Ralph's behalf, borrowed \$7,500 from Ted. Although he never received the money, Ralph repaid \$700 of the alleged loan and promised to repay the rest. If Sam had no authority to make the loan, is Ralph liable? Why?
4. A guest arrived early one morning at the Hotel Ohio. Clemens, a person in the hotel office who appeared to be in charge, walked behind the counter, registered the guest, gave him a key, and took him to his room. The guest also checked valuables (a diamond pin and money) with Clemens, who signed a receipt on behalf of the hotel. Clemens in fact was a roomer at the hotel, not an employee, and had no authority to act on behalf of the hotel. When Clemens absconded with the valuables, the guest sued the hotel. Is the hotel liable? Why?
5. A professional basketball player punched an opposing player in the face during the course of a game. The opponent, who was seriously injured, sued the owner of the team for damages. A jury awarded the player \$222,000 [about \$800,000 in 2010 dollars] for medical expenses, \$200,000 [\$700,000] for physical pain, \$275,000 [\$963,000] for mental anguish, \$1,000,000 [\$3.5 million] for lost earnings, and \$1,500,000 [\$5.2 million] in punitive damages (which was \$500,000 more than requested by the player). The jury also awarded \$50,000 [\$150,000] to the player's wife for loss of companionship. If we assume that the player who threw the punch acted out of personal anger and had no intention to further the business, how could the damage award against his principal be legally justified?

6. A doctor in a University of Chicago hospital seriously assaulted a patient in an examining room. The patient sued the hospital on the theory that the doctor was an agent or employee of the hospital and the assault occurred within the hospital. Is the hospital liable for the acts of its agent? Why?
7. Hector was employed by a machine shop. One day he made a delivery for his employer and proceeded back to the shop. When he was four miles from the shop and on the road where it was located, he turned left onto another road to visit a friend. The friend lived five miles off the turnoff. On the way to the friend's house, Hector caused an accident. The injured person sued Hector's employer. Is the employer liable? Discuss.
8. A fourteen-year-old boy, who had no driver's license, took his parents' car without permission and caused an automobile accident. A person injured in the accident sued the boy's parents under the relevant state's Parental Responsibility Law (mentioned in [Section 39.2.1 "Principal's Tort Liability"](#)). Are the parents liable? Discuss.
9. In the past decades the Catholic Church has paid out hundreds of millions of dollars in damage awards to people—mostly men—who claimed that when they were boys and teenagers they were sexually abused by their local parish priests, often on Church premises. That is, the men claimed they had been victims of child rape. Obviously, such behavior is antithetical to any reasonable standard of clergy behavior: the priests could not have been in the scope of employment. How is the Church liable?

SELF-TEST QUESTIONS

1. Authority that legally may bind the principal includes
 - a. implied authority
 - b. express authority
 - c. apparent authority
 - d. all of the above

2. As a general rule, a principal is not
 - a. liable for tortious acts of an agent, even when the principal is negligent
 - b. liable for acts of a servant within the scope of employment
 - c. criminally liable for acts of the agent
 - d. liable for nondelegable duties performed by independent contractors

3. An agent may be held personally liable on contracts signed on behalf of a principal when
 - a. the agent is serving an undisclosed or partially disclosed principal
 - b. the agent exceeds his authority
 - c. the agent entered into the contract in a personal capacity
 - d. all of the above are true

4. An agency relationship may be terminated by
 - a. an implied agreement arising out of the circumstances
 - b. mutual consent of parties
 - c. death of the principal or agent
 - d. all of the above

5. The principal's liability for the agent's acts of which the principal had no knowledge or intention to commit is called
 - a. contract liability
 - b. implied liability
 - c. respondeat superior

d. all of the above

Chapter 40

Partnerships: General Characteristics and Formation

LEARNING OBJECTIVES

After reading this chapter, you should understand the following:

1. The importance of partnership and the present status of partnership law
2. The extent to which a partnership is an entity
3. The tests that determine whether a partnership exists
4. Partnership by estoppel
5. Partnership formation

40.1 Introduction to Partnerships and Entity Theory

LEARNING OBJECTIVES

1. Describe the importance of partnership.
2. Understand partnership history.
3. Identify the entity characteristics of partnerships.

Importance of Partnership Law

It would be difficult to conceive of a complex society that did not operate its businesses through organizations. In this chapter we study partnerships, limited partnerships, and limited liability companies, and we touch on joint ventures and business trusts.

When two or more people form their own business or professional practice, they usually consider becoming partners. Partnership law defines a **partnership**¹ as “the association of two or more persons to carry on as co-owners a business for profit...whether or not the persons intend to form a partnership.” Revised Uniform Partnership Act, Section 202(a). In 2011, there were more than three million business firms in the United States as partnerships (see [Table 40.1 "Selected Data: Number of US Partnerships, Limited Partnerships, and Limited Liability Companies"](#), showing data to 2006), and partnerships are a common form of organization among accountants, lawyers, doctors, and other professionals. When we use the word *partnership*, we are referring to the *general business partnership*. There are also limited partnerships and limited liability partnerships, which are discussed in [Chapter 42 "Hybrid Business Forms"](#).

Table 40.1 Selected Data: Number of US Partnerships, Limited Partnerships, and Limited Liability Companies

	2003	2004	2005	2006
Total number of active partnerships	2,375,375	2,546,877	2,763,625	2,947,116
Number of partners	14,108,458	15,556,553	16,211,908	16,727,803
Number of limited partnerships	378,921	402,238	413,712	432,550
Number of partners	6,262,103	7,023,921	6,946,986	6,738,737

1. Two or more persons carrying on a business as co-owners for profit.

	2003	2004	2005	2006
Number of limited liability companies	1,091,502	1,270,236	1,465,223	1,630,161
Number of partners	4,226,099	4,949,808	5,640,146	6,361,958

Partnerships are also popular as investment vehicles. Partnership law and tax law permit an investor to put capital into a limited partnership and realize tax benefits without liability for the acts of the general partners.

Even if you do not plan to work within a partnership, it can be important to understand the law that governs it. Why? Because it is possible to become someone's partner without intending to or even realizing that a partnership has been created. Knowledge of the law can help you avoid partnership liability.

History of Partnership Law Through the Twentieth Century

Partnership is an ancient form of business enterprise, and special laws governing partnerships date as far back as 2300 BC, when the Code of Hammurabi explicitly regulated the relations between partners. Partnership was an important part of Roman law, and it played a significant role in the law merchant, the international commercial law of the Middle Ages.

In the nineteenth century, in both England and the United States, partnership was a popular vehicle for business enterprise. But the law governing it was jumbled. Common-law principles were mixed with equitable standards, and the result was considerable confusion. Parliament moved to reduce the uncertainty by adopting the Partnership Act of 1890, but codification took longer in the United States. The Commissioners on Uniform State Laws undertook the task at the turn of the twentieth century. The Uniform Partnership Act (UPA), completed in 1914, and the Uniform Limited Partnership Act (ULPA), completed in 1916, were the basis of partnership law for many decades. UPA and ULPA were adopted by all states except Louisiana.

The Current State of Partnership Law

Despite its name, UPA was not enacted uniformly among the states; moreover, it had some shortcomings. So the states tinkered with it, and by the 1980s, the National Conference of Commissioners on Uniform Laws (NCCUL) determined that a

revised version was in order. An amended UPA appeared in 1992, and further amendments were promulgated in 1993, 1994, 1996, and 1997. The NCCUL reports that thirty-nine states have adopted some version of the revised act. This chapter will discuss the Revised Uniform Partnership Act (RUPA) as promulgated in 1997, but because not all jurisdictions have not adopted it, where RUPA makes significant changes, the original 1914 UPA will also be considered. NCCUSL, Uniform Law Commission, “Acts: Partnership Act,” <http://www.nccusl.org/Act.aspx?title=Partnership%20Act>. The following states *have* adopted the RUPA: Alabama, Alaska, Arizona, Arkansas, California, Colorado, Delaware, District of Columbia, Florida, Hawaii, Idaho, Illinois, Iowa, Kansas, Kentucky, Maine, Maryland, Minnesota, Mississippi, Montana, Nebraska, Nevada, New Jersey, New Mexico, North Dakota, Oklahoma, Oregon, Puerto Rico, South Dakota (substantially similar), Tennessee, Texas (substantially similar), US Virgin Islands, Vermont, Virginia, and Washington. Connecticut, West Virginia, and Wyoming adopted the 1992 or 1994 version. Here are the states that have *not* adopted RUPA (Louisiana never adopted UPA at all): Georgia, Indiana, Massachusetts, Michigan, Mississippi, New Hampshire, New York, North Carolina, Ohio, Pennsylvania, Rhode Island, and Wisconsin. The NCCUL observes in its “prefatory note” to the 1997 act: “The Revised Act is largely a series of ‘default rules’ that govern the relations among partners in situations they have not addressed in a partnership agreement. The primary focus of RUPA is the small, often informal, partnership. Larger partnerships generally have a partnership agreement addressing, and often modifying, many of the provisions of the partnership act.” University of Pennsylvania Law School, Biddle Law Library, “Uniform Partnership Act (1997),” NCCUSL Archives, <http://www.law.upenn.edu/bll/archives/ulc/fnact99/1990s/upa97fa.pdf>.

Entity Theory

Meaning of “Legal Entity”

A significant difference between a partnership and most other kinds of business organization relates to whether, and the extent to which, the business is a legal entity. A legal entity is a person or group that the law recognizes as having legal rights, such as the right to own and dispose of property, to sue and be sued, and to enter into contracts; the **entity theory**² is the concept of a business firm as a legal person, with existence and accountability separate from its owners. When individuals carry out a common enterprise as partners, a threshold legal question is whether the partnership is a legal entity. The common law said no. In other words, under the common-law theory, a partnership was but a convenient name for an aggregate of individuals, and the rights and duties recognized and imposed by law are those of the individual partners. By contrast, the mercantile theory of the law merchant held that a partnership is a legal entity that can have rights and duties independent of those of its members.

2. The concept of a business firm as a legal person, with existence and accountability separate from its owners.

During the drafting of the 1914 UPA, a debate raged over which theory to adopt. The drafters resolved the debate through a compromise. In Section 6(1), UPA provides a neutral definition of partnership (“an association of two or more persons to carry on as co-owners a business for profit”) and retained the common-law theory that a partnership is an aggregation of individuals—the **aggregate theory**³.

RUPA moved more toward making partnerships entities. According to the NCCUL, “The Revised Act enhances the entity treatment of partnerships to achieve simplicity for state law purposes, particularly in matters concerning title to partnership property. RUPA does not, however, relentlessly apply the entity approach. The aggregate approach is retained for some purposes, such as partners’ joint and several liability.” University of Pennsylvania Law School, Biddle Law Library, “Uniform Partnership Act (1997),” NCCUSL Archives, <http://www.law.upenn.edu/bll/archives/ulc/fnact99/1990s/upa97fa.pdf>. Section 201(a) provides, “A partnership is an entity distinct from its partners.” RUPA, Section 201(a).

Entity Characteristics of a Partnership

Under RUPA, then, a partnership has entity characteristics, but the partners remain guarantors of partnership obligations, as always—that is the partners’ joint and several liability noted in the previous paragraph (and discussed further in [Chapter 41 "Partnership Operation and Termination"](#)). This is a very important point and a primary weakness of the partnership form: all partners are, and each one of them is, ultimately personally liable for the obligations of the partnership, without limit, which includes personal and unlimited liability. This personal liability is very distasteful, and it has been abolished, subject to some exceptions, with limited partnerships and limited liability companies, as discussed in [Chapter 42 "Hybrid Business Forms"](#). And, of course, the owners of corporations are also not generally liable for the corporation’s obligations, which is a major reason for the corporate form’s popularity.

For Accounting Purposes

Under both versions of the law, the partnership may keep business records as if it were a separate entity, and its accountants may treat it as such for purposes of preparing income statements and balance sheets.

For Purposes of Taxation

Under both versions of the law, partnerships are *not* taxable entities, so they do not pay income taxes. Instead, each partner’s distributive share, which includes income

3. The theory that a business firm is not an entity but rather a collection of individual owners who bind themselves together to share profits.

or other gain, loss, deductions, and credits, must be included in the partner's personal income tax return, whether or not the share is actually distributed.

For Purposes of Litigation

In litigation, the aggregate theory causes some inconvenience in naming and serving partnership defendants: under UPA, lawsuits to enforce a partnership contract or some other right must be filed in the name of all the partners. Similarly, to sue a partnership, the plaintiff must name and sue each of the partners. This cumbersome procedure was modified in many states, which enacted special statutes expressly permitting suits by and against partnerships in the firm name. In suits on a claim in federal court, a partnership may sue and be sued in its common name. The move by RUPA to make partnerships entities changed very little. Certainly it provides that "a partnership may sue and be sued in the name of the partnership"—that's handy where the plaintiff hopes for a judgment against the partnership, without recourse to the individual partners' personal assets. RUPA, Section 307(a). But a plaintiff must still name the partnership and the partners individually to have access to both estates, the partnership and the individuals': "A judgment against a partnership is not by itself a judgment against a partner. A judgment against a partnership may not be satisfied from a partner's assets unless there is also a judgment against the partner." RUPA, Section 307(c).

For Purposes of Owning Real Estate

Aggregate theory concepts bedeviled property co-ownership issues, so UPA finessed the issue by stating that partnership property, real or personal, could be held in the name of the partners as "tenants in partnership"—a type of co-ownership—or it could be held in the name of the partnership. Uniform Partnership Act, Section 25(1); UPA, Section 8(3). Under RUPA, "property acquired by the partnership is property of the partnership and not of the partners." RUPA, Section 203. But RUPA is no different from UPA in practical effect. The latter provides that "property originally brought into the partnership stock or subsequently acquired by purchase...on account of the partnership, is partnership property." UPA, Section 8(1). Under either law, a partner may bring onto the partnership premises her own property, not acquired in the name of the partnership or with its credit, and it remains her separate property. Under neither law can a partner unilaterally dispose of partnership property, however labeled, for the obvious reason that one cannot dispose of another's property or property rights without permission. UPA, Sections 9(3)(a) and 25; RUPA, Section 302. And keep in mind that partnership law is the default: partners are free to make up partnership agreements as they like, subject to some limitations. They are free to set up property ownership rules as they like.

For Purposes of Bankruptcy

Under federal bankruptcy law—state partnership law is preempted—a partnership is an entity that may voluntarily seek the haven of a bankruptcy court or that may involuntarily be thrust into a bankruptcy proceeding by its creditors. The partnership cannot discharge its debts in a liquidation proceeding under Chapter 7 of the bankruptcy law, but it can be rehabilitated under Chapter 11 (see [Chapter 30 "Bankruptcy"](#)).

KEY TAKEAWAY

Partnership law is very important because it is the way most small businesses are organized and because it is possible for a person to become a partner without intending to. Partnership law goes back a long way, but in the United States, most states—but not all—have adopted the Revised Uniform Partnership Act (RUPA, 1997) over the previous Uniform Partnership Act, originally promulgated in 1914. One salient change made by RUPA is to directly announce that a partnership is an entity: it is like a person for purposes of accounting, litigation, bankruptcy, and owning real estate. Partnerships do not pay taxes; the individual partners do. But in practical terms, what RUPA does is codify already-existing state law on these matters, and partners are free to organize their relationship as they like in the partnership agreement.

EXERCISES

1. When was UPA set out for states to adopt? When was RUPA promulgated for state adoption?
2. What does it mean to say that the partnership act is the “default position”? For what types of partnership is UPA (or RUPA) likely to be of most importance?
3. What is the aggregate theory of partnership? The entity theory?

40.2 Partnership Formation

LEARNING OBJECTIVES

1. Describe the creation of an express partnership.
2. Describe the creation of an implied partnership.
3. Identify tests of partnership existence.
4. Understand partnership by estoppel.

Creation of an Express Partnership

Creation in General

The most common way of forming a partnership is expressly—that is, in words, orally or in writing. Such a partnership is called an **express partnership**⁴. If parties have an express partnership with no partnership agreement, the relevant law—the Uniform Partnership Act (UPA) or the Revised Uniform Partnership Act (RUPA)—applies the governing rules.

Assume that three persons have decided to form a partnership to run a car dealership. Able contributes \$250,000. Baker contributes the building and space in which the business will operate. Carr contributes his services; he will manage the dealership.

The first question is whether Able, Baker, and Carr must have a partnership agreement. As should be clear from the foregoing discussion, no agreement is necessary as long as the tests of partnership are met. However, they *ought* to have an agreement in order to spell out their rights and duties among themselves.

The agreement itself is a contract and should follow the principles and rules spelled out in [Chapter 8 "Introduction to Contract Law"](#) through [Chapter 16 "Remedies"](#) of this book. Because it is intended to govern the relations of the partners toward themselves and their business, every partnership contract should set forth clearly the following terms: (1) the name under which the partners will do business; (2) the names of the partners; (3) the nature, scope, and location of the business; (4) the capital contributions of each partner; (5) how profits and losses are to be divided; (6) how salaries, if any, are to be determined; (7) the responsibilities of each partner for managing the business; (8) limitations on the power of each partner to bind the firm; (9) the method by which a given partner may withdraw from the partnership;

4. A partnership intentionally created and recognized, orally or in writing.

(10) continuation of the firm in the event of a partner's death and the formula for paying a partnership interest to his heirs; and (11) method of dissolution.

Specific Issues of Concern

In forming a partnership, three of these items merit special attention. And note again that if the parties do not provide for these in their agreement, RUPA will do it for them as the default.

Who Can Be a Partner?

As discussed earlier in this chapter, a partnership is not limited to a direct association between human beings but may also include an association between other entities, such as corporations or even partnerships themselves. A **joint venture**—sometimes known as a joint adventure, coadventure, joint enterprise, joint undertaking, syndicate, group, or pool—is an association of persons to carry on a particular task until completed. In essence, a joint venture is a “temporary partnership.” In the United States, the use of joint ventures began with the railroads in the late 1800s. Throughout the middle part of the twentieth century joint ventures were common in the manufacturing sector. By the late 1980s, they increasingly appeared in both manufacturing and service industries as businesses looked for new, competitive strategies. They are aggressively promoted on the Internet: “Joint Ventures are in, and if you're not utilizing this strategic weapon, chances are your competition is, or will soon be, using this to their advantage....possibly against you!” (Scott Allen, “Joint Venturing 101,” About.com Entrepreneurs, <http://entrepreneurs.about.com/od/beyondstartup/a/jointventures.htm>). As a risk-avoiding device, the joint venture allows two or more firms to pool their differing expertise so that neither needs to “learn the ropes” from the beginning; neither needs the entire capital to start the enterprise. Partnership rules generally apply, although the relationship of the joint venturers is closer to that of special than general agency as discussed in Chapter 38 "Relationships between Principal and Agent". Joint venturers are fiduciaries toward one another. Although no formality is necessary, the associates will usually sign an agreement. The joint venture need have no group name, though it may have one. Property may be owned jointly. Profits and losses will be shared, as in a partnership, and each associate has the right to participate in management. Liability is unlimited. Sometimes two or more businesses will form a joint venture to carry out a specific task—prospecting for oil, building a nuclear reactor, doing basic scientific research—and will incorporate the joint venture. In that case, the resulting business—known as a “joint venture corporation”—is governed by corporation law, not the law of partnership, and is not a joint venture in the sense described here. Increasingly, companies are forming joint ventures to do business abroad; foreign investors or governments own significant interests in these joint

ventures. For example, in 1984 General Motors entered into a joint venture with Toyota to revive GM's shuttered Fremont, California, assembly plant to create New United Motor Manufacturing, Inc. (NUMMI). For GM the joint venture was an opportunity to learn about lean manufacturing from the Japanese company, while Toyota gained its first manufacturing base in North America and a chance to test its production system in an American labor environment. Until May 2010, when the copartnership ended and the plant closed, NUMMI built an average of six thousand vehicles a week, or nearly eight million cars and trucks. These vehicles were the Chevrolet Nova (1984–88), the Geo Prizm (1989–97), the Chevrolet Prizm (1998–2002), and the Hilux (1991–95, predecessor of the Tacoma), as well as the Toyota Voltz, the Japanese right-hand-drive version of the Pontiac Vibe. The latter two were based on the Toyota Matrix. Paul Stenquist, "GM and Toyota's Joint Venture Ends in California," *New York Times*, April 2, 2010, <http://wheels.blogs.nytimes.com/2010/04/02/g-m-and-toyotas-joint-venture-ends-in-california>. Family members can be partners, and partnerships between parents and minor children are lawful, although a partner who is a minor may disaffirm the agreement.

Written versus Oral Agreements

If the business cannot be performed within one year from the time that the agreement is entered into, the partnership agreement should be in writing to avoid invalidation under the Statute of Frauds. Most partnerships have no fixed term, however, and are partnerships "at will" and therefore not covered by the Statute of Frauds.

Validity of the Partnership Name

Able, Baker, and Carr decide that it makes good business sense to choose an imposing, catchy, and well-known name for their dealership—General Motors Corporation. There are two reasons why they cannot do so. First, their business is a partnership, not a corporation, and should not be described as one. Second, the name is deceptive because it is the name of an existing business. Furthermore, if not registered, the name would violate the assumed or fictitious name statutes of most states. These require that anyone doing business under a name other than his real name register the name, together with the names and addresses of the proprietors, in some public office. (Often, the statutes require the proprietors to publish this information in the newspapers when the business is started.) As *Loomis v. Whitehead* in [Section 40.3.2 "Creation of a Partnership: Registering the Name"](#) shows, if a business fails to comply with the statute, it could find that it will be unable to file suit to enforce its contracts.

Creation of Implied Partnership

An **implied partnership**⁵ exists when in fact there are two or more persons carrying on a business as co-owners for profit. For example, Carlos decides to paint houses during his summer break. He gathers some materials and gets several jobs. He hires Wally as a helper. Wally is very good, and pretty soon both of them are deciding what jobs to do and how much to charge, and they are splitting the profits. They have an implied partnership, without intending to create a partnership at all.

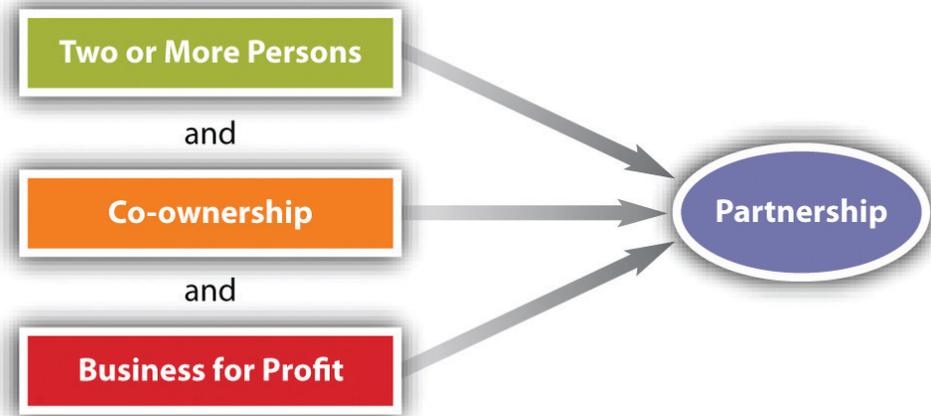

Tests of Partnership Existence

But how do we know whether an implied partnership *has* been created? Obviously, we know if there is an express agreement. But partnerships can come into existence quite informally, indeed, without any formality—they can be created accidentally. In contrast to the corporation, which is the creature of statute, partnership is a catchall term for a large variety of working relationships, and frequently, uncertainties arise about whether or not a particular relationship is that of partnership. The law can reduce the uncertainty in advance only at the price of severely restricting the flexibility of people to associate. As the chief drafter of the Uniform Partnership Act (UPA, 1914) explained,

All other business associations are statutory in origin. They are formed by the happening of an event designated in a statute as necessary to their formation. In corporations this act may be the issuing of a charter by the proper officer of the state; in limited partnerships, the filing by the associates of a specified document in a public office. On the other hand, an infinite number of combinations of circumstances may result in co-ownership of a business. Partnership is the residuum, including all forms of co-ownership, of a business except those business associations organized under a specific statute. W. D. Lewis, “The Uniform Partnership Act,” *Yale Law Journal* 24 (1915): 617, 622.

5. A partnership that arises where parties' behavior objectively manifests an intention to create a relationship that the law recognizes as a partnership.

Figure 40.1 Partnership Tests

Because it is frequently important to know whether a partnership exists (as when a creditor has dealt with only one party but wishes to also hold others liable by claiming they were partners, see [Section 40.3.1 "Tests of Partnership Existence"](#), *Chaiken v. Employment Security Commission*), a number of tests have been established that are clues to the existence of a partnership (see [Figure 40.1 "Partnership Tests"](#)). We return to the definition of a partnership: “the association of two or more persons to carry on as co-owners a business for profit[.]” The three elements are (1) the association of persons, (2) as co-owners, (3) for profit.

Association of Persons

This element is pretty obvious. A partnership is a contractual agreement among persons, so the persons involved need to have *capacity* to contract. But RUPA does not provide that only *natural* persons can be partners; it defines *person* as follows: “‘Person’ means an individual, corporation, business trust, estate, trust, partnership, association, joint venture, government, governmental subdivision, agency, or instrumentality, or any other legal or commercial entity.” RUPA, Section 101(10). Thus unless state law precludes it, a corporation can be a partner in a partnership. The same is true under UPA.

Co-owners of a Business

If what two or more people own is clearly a business—including capital assets, contracts with employees or agents, an income stream, and debts incurred on behalf of the operation—a partnership exists. A tougher question arises when two or more persons co-own property. Do they automatically become partners? The answer can be important: if one of the owners while doing business pertinent to the

property injures a stranger, the latter could sue the other owners if there is a partnership.

Co-ownership comes in many guises. The four most common are joint tenancy, tenancy in common, tenancy by the entirety, and community property. In joint tenancy, the owners hold the property under a single instrument, such as a deed, and if one dies, the others automatically become owners of the deceased's share, which does not descend to his heirs. Tenancy in common has the reverse rule: the survivor tenants do not take the deceased's share. Each tenant in common has a distinct estate in the property. The tenancy by the entirety and community property (in community-property states) forms of ownership are limited to spouses, and their effects are similar to that of joint tenancy. These concepts are discussed in more detail in relation to real property in [Chapter 34 "The Transfer of Real Estate by Sale"](#).

Suppose a husband and wife who own their home as tenants by the entirety (or community property) decide to spend the summer at the seashore and rent their home for three months. Is their co-ownership sufficient to establish that they are partners? The answer is no. By UPA Section 7(2) and RUPA Section 202(b)(1), the various forms of joint ownership by themselves do not establish partnership, whether or not the co-owners share profits made by the use of the property. To establish a partnership, the ownership must be of a business, not merely of property.

Sharing of Profits

There are two aspects to consider with regard to profits: first, whether the business is for-profit, and second, whether there is a sharing of the profit.

Business for Profit

Unincorporated nonprofit organizations (UNAs) cannot be partnerships. The paucity of coherent law governing these organizations gave rise in 2005 to the National Conference of Commissioners of Uniform Laws' promulgation of the Revised Uniform Unincorporated Nonprofit Association Act (RUUNAA). The prefatory note to this act says, "RUUNAA was drafted with small informal associations in mind. These informal organizations are likely to have no legal advice and so fail to consider legal and organizational questions, including whether to incorporate. The act provides better answers than the common law for a limited number of legal problems...There are probably hundreds of thousands of UNAs in the United States including unincorporated nonprofit philanthropic, educational, scientific and literary clubs, sporting organizations, unions, trade associations,

political organizations, churches, hospitals, and condominium and neighborhood associations.” Revised Uniform Unincorporated Nonprofit Associations Act, http://www.abanet.org/intlaw/leadership/policy/RUUNAA_Final_08.pdf. At least twelve states have adopted RUUNAA or its predecessor.

Sharing the Profit

While co-ownership does not establish a partnership unless there is a business, a business by itself is not a partnership unless co-ownership is present. Of the tests used by courts to determine co-ownership, perhaps the most important is sharing of profits. Section 202(c) of RUPA provides that “a person who receives a share of the profits of a business is presumed to be a partner in the business,” but this presumption can be rebutted by showing that the share of the profits paid out was (1) to repay a debt; (2) wages or compensation to an independent contractor; (3) rent; (4) an annuity, retirement, or health benefit to a representative of a deceased or retired partner; (5) interest on a loan, or rights to income, proceeds, or increase in value from collateral; or (5) for the sale of the goodwill of a business or other property. Section 7(4) of UPA is to the same effect.

Other Factors

Courts are not limited to the profit-sharing test; they also look at these factors, among others: the right to participate in decision making, the duty to share liabilities, and the manner in which the business is operated. Section 40.3.1 "Tests of Partnership Existence", *Chaiken v. Employment Security Commission*, illustrates how these factors are weighed in court.

Creation of Partnership by Estoppel

Ordinarily, if two people are not legally partners, then third parties cannot so regard them. For example, Mr. Tot and Mr. Tut own equal shares of a house that they rent but do not regard it as a business and are not in fact partners. They do have a loose “understanding” that since Mr. Tot is mechanically adept, he will make necessary repairs whenever the tenants call. On his way to the house one day to fix its boiler, Mr. Tot injures a pedestrian, who sues both Mr. Tot and Mr. Tut. Since they are not partners, the pedestrian cannot sue them as if they were; hence Mr. Tut has no partnership liability.

Suppose that Mr. Tot and Mr. Tut happened to go to a lumberyard together to purchase materials that Mr. Tot intended to use to add a room to the house. Short of cash, Mr. Tot looks around and espies Mr. Tat, who greets his two friends heartily by saying within earshot of the salesman who is debating whether to extend credit,

“Well, how are my two partners this morning?” Messrs. Tot and Tut say nothing but smile faintly at the salesman, who mistakenly but reasonably believes that the two are acknowledging the partnership. The salesman knows Mr. Tat well and assumes that since Mr. Tat is rich, extending credit to the “partnership” is a “sure thing.” Messrs. Tot and Tut fail to pay. The lumberyard is entitled to collect from Mr. Tat, even though he may have forgotten completely about the incident by the time suit is filed. Under Uniform Partnership Act Section 16(1), Mr. Tat would be liable for the debt as being part of a **partnership by estoppel**⁶. The Revised Uniform Partnership Act is to the same effect:

Section 308. Liability of Purported Partner.

(a) If a person, by words or conduct, purports to be a partner, or consents to being represented by another as a partner, in a partnership or with one or more persons not partners, the purported partner is liable to a person to whom the representation is made, if that person, relying on the representation, enters into a transaction with the actual or purported partnership.

Partnership by estoppel has two elements: (1) a representation to a third party that there is in fact a partnership and (2) reliance by the third party on the representation. See [Section 40.3.3 "Partnership by Estoppel"](#), *Chavers v. Epsco, Inc.*, for an example of partnership by estoppel.

KEY TAKEAWAY

A partnership is any two or more persons—including corporate persons—carrying on a business as co-owners for profit. A primary test of whether a partnership exists is whether there is a sharing of profits, though other factors such as sharing decision making, sharing liabilities, and how the business is operated are also examined.

Most partnerships are expressly created. Several factors become important in the partnership agreement, whether written or oral. These include the name of the business, the capital contributions of each partner, profit sharing, and decision making. But a partnership can also arise by implication or by estoppel, where one has held herself as a partner and another has relied on that representation.

6. Partnership arising when in fact none exists, where one allows himself or herself to be represented as a partner, thus incurring partnership liability.

EXERCISES

1. Why is it necessary—or at least useful—to have tests to determine whether a partnership exists?
2. What elements of the business organization are examined to make this determination?
3. Jacob rents farmland from Davis and pays Davis a part of the profits from the crop in rent. Is Davis a partner? What if Davis offers suggestions on what to plant and when? Now is he a partner?
4. What elements should be included in a written partnership agreement?
5. What is an implied partnership?
6. What is a partnership by estoppel, and why are its “partners” estopped to deny its existence?

40.3 Cases

Tests of Partnership Existence

Chaiken v. Employment Security Commission

274 A.2d 707 (Del. 1971)

STOREY, J.

The Employment Security Commission, hereinafter referred to as the Commission, levied an involuntary assessment against Richard K. Chaiken, complainant, hereinafter referred to as Chaiken, for not filing his unemployment security assessment report. Pursuant to the same statutory section, a hearing was held and a determination made by the Commission that Chaiken was the employer of two barbers in his barber shop and that he should be assessed as an employer for his share of unemployment compensation contributions. Chaiken appealed the Commission's decision....

Both in the administrative hearing and in his appeal brief Chaiken argues that he had entered into partnership agreements with each of his barbers and, therefore, was and is not subject to unemployment compensation assessment. The burden is upon the individual assessed to show that he is outside the ambit of the statutory sections requiring assessment. If Chaiken's partnership argument fails he has no secondary position and he fails to meet his burden.

Chaiken contends that he and his "partners":

1. properly registered the partnership name and names of partners in the prothonotary's office, in accordance with [the relevant statute], The word *prothonotary* means first notary of the court. The prothonotary is the keeper of the civil records for the court system. The office is responsible for the creation, maintenance, and certification of matters pending or determined by the court. The office is also responsible for certain reporting and collection duties to state agencies.
2. properly filed federal partnership information returns and paid federal taxes quarterly on an estimated basis, and
3. duly executed partnership agreements.

Of the three factors, the last is most important. Agreements of “partnership” were executed between Chaiken and Mr. Strazella, a barber in the shop, and between Chaiken and Mr. Spitzer, similarly situated. The agreements were nearly identical. The first paragraph declared the creation of a partnership and the location of business. The second provided that Chaiken would provide barber chair, supplies, and licenses, while the other partner would provide tools of the trade. The paragraph also declared that upon dissolution of the partnership, ownership of items would revert to the party providing them. The third paragraph declared that the income of the partnership would be divided 30% for Chaiken, 70% for Strazella; 20% for Chaiken and 80% for Spitzer. The fourth paragraph declared that all partnership policy would be decided by Chaiken, whose decision was final. The fifth paragraph forbade assignment of the agreement without permission of Chaiken. The sixth paragraph required Chaiken to hold and distribute all receipts. The final paragraph stated hours of work for Strazella and Spitzer and holidays.

The mere existence of an agreement labeled “partnership” agreement and the characterization of signatories as “partners” does not conclusively prove the existence of a partnership. Rather, the intention of the parties, as explained by the wording of the agreement, is paramount.

A partnership is defined as an association of two or more persons to carry on as co-owners a business for profit. As co-owners of a business, partners have an equal right in the decision making process. But this right may be abrogated by agreement of the parties without destroying the partnership concept, provided other partnership elements are present.

Thus, while paragraph four reserves for Chaiken all right to determine partnership policy, it is not standing alone, fatal to the partnership concept. Co-owners should also contribute valuable consideration for the creation of the business. Under paragraph two, however, Chaiken provides the barber chair (and implicitly the barber shop itself), mirror, licenses and linen, while the other partners merely provide their tools and labor—nothing more than any barber-employee would furnish. Standing alone, however, mere contribution of work and skill can be valuable consideration for a partnership agreement.

Partnership interests may be assignable, although it is not a violation of partnership law to prohibit assignment in a partnership agreement. Therefore, paragraph five on assignment of partnership interests does not violate the partnership concept. On the other hand, distribution of partnership assets to the partners upon dissolution is only allowed after all partnership liabilities are satisfied. But paragraph two of the agreement, in stating the ground rules for dissolution, makes no declaration that the partnership assets will be utilized to pay

partnership expenses before reversion to their original owners. This deficiency militates against a finding in favor of partnership intent since it is assumed Chaiken would have inserted such provision had he thought his lesser partners would accept such liability. Partners do accept such liability, employees do not.

Most importantly, co-owners carry on “a business for profit.” The phrase has been interpreted to mean that partners share in the profits and the losses of the business. The intent to divide the profits is an indispensable requisite of partnership. Paragraph three of the agreement declares that each partner shall share in the income of the business. There is no sharing of the profits, and as the agreement is drafted, there are no profits. Merely sharing the gross returns does not establish a partnership. Nor is the sharing of profits prima facie evidence of a partnership where the profits received are in payment of wages.

The failure to share profits, therefore, is fatal to the partnership concept here.

Evaluating Chaiken’s agreement in light of the elements implicit in a partnership, no partnership intent can be found. The absence of the important right of decision making or the important duty to share liabilities upon dissolution individually may not be fatal to a partnership. But when both are absent, coupled with the absence of profit sharing, they become strong factors in discrediting the partnership argument. Such weighing of the elements against a partnership finding compares favorably with *Fenwick v. Unemployment Compensation Commission*, which decided against the partnership theory on similar facts, including the filing of partnership income tax forms.

In addition, the total circumstances of the case taken together indicate the employer-employee relationship between Chaiken and his barbers. The agreement set forth the hours of work and days off—unusual subjects for partnership agreements. The barbers brought into the relationship only the equipment required of all barber shop operators. And each barber had his own individual “partnership” with Chaiken. Furthermore, Chaiken conducted all transactions with suppliers, and purchased licenses, insurance, and the lease for the business property in his own name. Finally, the name “Richard’s Barber Shop” continued to be used after the execution of the so-called partnership agreements. [The Commission’s decision is affirmed.]

CASE QUESTIONS

1. Why did the unemployment board sue Chaiken?
2. Why did Chaiken set up this “partnership”?
3. What factors did the court examine to determine whether there was a partnership here? Which one was the most important?
4. Why would it be unusual in a partnership agreement to set forth the hours of work and days off?

Creation of a Partnership: Registering the Name

Loomis v. Whitehead

183 P.3d 890 (Nev. 2008)

Per Curiam.

In this appeal, we address whether [Nevada Revised Statute] NRS 602.070 bars the partners of an unregistered fictitious name partnership from bringing an action arising out of a business agreement that was not made under the fictitious name. [The statute] prohibits persons who fail to file an assumed or fictitious name certificate from suing on any contract or agreement made under the assumed or fictitious name. We conclude that it does not bar the partners from bringing the action so long as the partners did not conduct the business or enter into an agreement under the fictitious name or otherwise mislead the other party into thinking that he was doing business with some entity other than the partners themselves.

Background Facts

Appellants Leroy Loomis and David R. Shanahan raised and sold cattle in Elko County, Nevada. Each of the appellants had certain responsibilities relating to the cattle business. Loomis supplied the livestock and paid expenses, while Shanahan managed the day-to-day care of the cattle. Once the cattle were readied for market and sold, Loomis and Shanahan would share the profits equally. While Loomis and Shanahan often called themselves the 52 Cattle Company, they had no formal partnership agreement and did not file an assumed or fictitious name certificate in that name. Loomis and Shanahan bring this appeal after an agreement entered into with respondent Jerry Carr Whitehead failed.

In the fall of 2003, Shanahan entered into a verbal agreement with Whitehead, a rancher, through Whitehead's ranch foreman to have their cattle wintered at Whitehead's ranch. Neither Loomis nor Whitehead was present when the ranch foreman made the deal with Shanahan, but the parties agree that there was no mention of the 52 Cattle Company at the time they entered into the agreement or anytime during the course of business thereafter. Shanahan and Loomis subsequently alleged that their cattle were malnourished and that a number of their cattle died from starvation that winter at Whitehead's ranch. Whitehead denied these allegations.

Suit against Whitehead

The following summer, Shanahan and Loomis sued Whitehead, claiming negligence and breach of contract. Later, well into discovery, Whitehead was made aware of the existence of the 52 Cattle Company when Shanahan stated in his deposition that he did not actually own any of the cattle on Whitehead's ranch. In his deposition, he described the partnership arrangement. At about the same time, Whitehead learned that the name "52 Cattle Company" was not registered with the Elko County Clerk.

Whitehead then filed a motion for partial summary judgment, asserting that, pursuant to NRS 602.070, Loomis and Shanahan's failure to register their fictitiously named partnership with the county clerk barred them from bringing a legal action. The district court agreed with Whitehead, granted the motion, and dismissed Loomis and Shanahan's claims. Loomis and Shanahan timely appealed.

Discussion

The district court found that Loomis and Shanahan conducted business under a fictitious name without filing a fictitious name certificate with the Elko County Clerk as required by NRS 602.010. NRS 602.010(1): "Every person doing business in this state under an assumed or fictitious name that is in any way different from the legal name of each person who owns an interest in the business must file with the county clerk of each county in which the business is being conducted a certificate containing the information required by NRS 602.020." The district court therefore concluded that, pursuant to NRS 602.070, they were barred from bringing an action against Whitehead because they did not file a fictitious name certificate for the 52 Cattle Company. NRS 602.070: "No action may be commenced or maintained by any person...upon or on account of any contract made or transaction had under the assumed or fictitious name, or upon or on account of any cause of action arising or growing out of the business conducted under that name, unless before the commencement of the action the certificate required by NRS 602.010 has been filed."

Loomis and Shanahan contend that the district court erred in granting partial summary judgment because they did not enter into a contract with Whitehead under the name of the 52 Cattle Company, and they did not conduct business with Whitehead under that name. Loomis and Shanahan argue that NRS 602.070 is not applicable to their action against Whitehead because they did not mislead Whitehead into thinking that he was doing business with anyone other than them. We agree....

When looking at a statute's language, this court is bound to follow the statute's plain meaning, unless the plain meaning was clearly not intended. Here, in using the phrase "under the assumed or fictitious name," the statute clearly bars bringing an action when the claims arise from a contract, transaction, or business conducted beneath the banner of an unregistered fictitious name. However, NRS 602.070 does not apply to individual partners whose transactions or business with another party were not performed under the fictitious name.

Here, Whitehead knew that Shanahan entered into the oral contract under his own name. He initially thought that Shanahan owned the cattle and Loomis had "some type of interest." Shanahan did not enter into the contract under the fictitious "52 Cattle Company" name. Moreover, Whitehead does not allege that he was misled by either Loomis or Shanahan in any way that would cause him to think he was doing business with the 52 Cattle Company. In fact, Whitehead did not know of the 52 Cattle Company until Shanahan mentioned it in his deposition. Under these circumstances, when there simply was no indication that Loomis and Shanahan represented that they were conducting business as the 52 Cattle Company and no reliance by Whitehead that he was doing business with the 52 Cattle Company, NRS 602.070 does not bar the suit against Whitehead.

We therefore reverse the district court's partial summary judgment in this instance and remand for trial because, while the lawsuit between Loomis and Whitehead involved partnership business, the transaction at issue was not conducted and the subsequent suit was not maintained under the aegis of the fictitiously named partnership.

CASE QUESTIONS

1. The purpose of the fictitious name statute might well be, as the court here describes it, “to prevent fraud and to give the public information about those entities with which they conduct business.” But that’s not what the statute says; it says nobody can sue on a cause of action arising out of business conducted under a fictitious name if the name is not registered. The legislature determined the consequence of failure to register. Should the court disregard the statute’s plain, unambiguous meaning?
2. That was one of two arguments by the dissent in this case. The second one was based on this problem: Shanahan and Loomis agreed that the cattle at issue were partnership cattle bearing the “52” brand. That is, the cows were *not* Shanahan’s; they were the partnership’s. When Whitehead moved to dismiss Shanahan’s claim—again, because the cows weren’t Shanahan’s—Shanahan conceded that but for the existence of the partnership he would have no claim against Whitehead. If there is no claim against the defendant except insofar as he harmed the partnership business (the cattle), how could the majority assert that claims against Whitehead did not arise out of “the business” conducted under 52 Cattle Company? Who has the better argument, the majority or the dissent?
3. Here is another problem along the same lines but with a different set of facts and a Uniform Partnership Act (UPA) jurisdiction (i.e., pre-Revised Uniform Partnership Act [RUPA]). Suppose the plaintiffs had a partnership (as they did here), but the claim by one was that the other partner had stolen several head of cattle, and UPA was in effect so that the partnership property was owned as “tenant in partnership”—the cattle would be owned by the partners as a whole. A person who steals his own property cannot be criminally liable; therefore, a partner cannot be guilty of stealing (or misappropriating) firm property. Thus under UPA there arise anomalous cases, for example, in *People v. Zinke*, 555 N.E.2d 263 (N.Y. 1990), which is a criminal case, Zinke embezzled over a million dollars from his own investment firm but the prosecutor’s case against him was dismissed because, the New York court said, “partners cannot be prosecuted for stealing firm property.” If the partnership is a legal entity, as under RUPA, how is this result changed?

Partnership by Estoppel

Chavers v. Epsco, Inc.

98 S.W.3d 421 (Ark. 2003)

Hannah, J.

Appellants Reggie Chavers and Mark Chavers appeal a judgment entered against them by the Craighead County Circuit Court. Reggie and Mark argue that the trial court erred in holding them liable for a company debt based upon partnership by estoppel because the proof was vague and insufficient and there was no detrimental reliance on the part of a creditor. We hold that the trial court was not clearly erroneous in finding liability based upon partnership by estoppel. Accordingly, we affirm.

Facts

Gary Chavers operated Chavers Welding and Construction (“CWC”), a construction and welding business, in Jonesboro. Gary’s sons Reggie Chavers and Mark Chavers joined their father in the business after graduating from high school. Gary, Mark, and Reggie maintain that CWC was a sole proprietorship owned by Gary, and that Reggie and Mark served only as CWC employees, not as CWC partners.

In February 1999, CWC entered into an agreement with Epsco, Inc. (“Epsco”), a staffing service, to provide payroll and employee services for CWC. Initially, Epsco collected payments for its services on a weekly basis, but later, Epsco extended credit to CWC. Melton Clegg, President of Epsco, stated that his decision to extend credit to CWC was based, in part, on his belief that CWC was a partnership.

CWC’s account with Epsco became delinquent, and Epsco filed a complaint against Gary, Reggie, and Mark, individually, and doing business as CWC, to recover payment for the past due account. Gary discharged a portion of his obligation to Epsco due to his filing for bankruptcy. Epsco sought to recover CWC’s remaining debt from Reggie and Mark. After a hearing on March 7, 2002, the trial court issued a letter opinion, finding that Reggie and Mark “represented themselves to [Epsco] as partners in an existing partnership and operated in such a fashion to give creditors in general, and Epsco in particular, the impression that such creditors/potential creditors were doing business with a partnership....” On May 21, 2002, the trial court entered an order stating that Reggie and Mark were partners by estoppel as relates to Epsco. The trial court found that Reggie and Mark were jointly and severally liable for the debt of CWC in the amount of \$80,360.92. In addition, the trial court awarded Epsco pre-judgment interest at the rate of six percent, post-judgment interest at the rate of ten percent, and attorney’s fees in the amount of \$8,036.92.

[The relevant Arkansas statute provides]:

(1) When a person, by words spoken or written or by conduct, represents himself, or consents to another representing him to any one, as a partner in an existing partnership or with one (1) or more persons not actual partners, he is liable to any person to whom such representation has been made, who has, on the faith of such representation, given credit to the actual or apparent partnership, and if he has made such representation or consented to its being made in a public manner, he is liable to that person, whether the representation has or has not been made or communicated to that person so giving credit by or with the knowledge of the apparent partner making the representation or consenting to it being made.

(a) When a partnership liability results, he is liable as though he were an actual member of the partnership.

We have long recognized the doctrine of partnership by estoppel. [Citation, 1840], the court stated that

they who hold themselves out to the world as partners in business or trade, are to be so regarded as to creditors and third persons; and the partnership may be established by any evidence showing that they so hold themselves out to the public, and were so regarded by the trading community.

Further, we have stated that “[p]artnerships may be proved by circumstantial evidence; and evidence will sometimes fix a joint liability, where persons are charged as partners, in a suit by a third person, when they are not, in fact, partners as between themselves.” [Citation, 1843.]

In [Citation, 1906], the court noted that

[a] person who holds himself out as a partner of a firm is estopped to deny such representation, not only as to those as to whom the representation was directly made, but as to all others who had knowledge of such holding out and in reliance thereon sold goods to the firm....

In addition, “if the party himself puts out the report that he is a partner, he will be liable to all those selling goods to the firm on the faith and credit of such report.” [Citation] When a person holds himself out as a member of partnership, any one dealing with the firm on the faith of such representation is entitled to assume the

relation continues until notice of some kind is given of its discontinuance.
[Citations]

In [Citation, 1944], the court wrote:

It is a thoroughly well-settled rule that persons who are not as between themselves partners, or as between whom there is in fact no legal partnership, may nevertheless become subject to the liabilities of partners, either by holding themselves out as partners to the public and the world generally or to particular individuals, or by knowingly or negligently permitting another person to do so. All persons who hold themselves out, or knowingly permit others to hold them out, to the public as partners, although they are not in partnership, become bound as partners to all who deal with them in their apparent relation.

The liability as a partner of a person who holds himself out as a partner, or permits others to do so, is predicated on the doctrine of estoppel and on the policy of the law seeking to prevent frauds on those who lend their money on the apparent credit of those who are held out as partners. One holding himself out as a partner or knowingly permitting himself to be so held out is estopped from denying liability as a partner to one who has extended credit in reliance thereon, although no partnership has in fact existed.

In the present case, the trial court cited specific examples of representations made by Reggie and Mark indicating that they were partners of CWC, including correspondence to Epsco, checks written to Epsco, business cards distributed to the public, and credit applications. We will discuss each in turn.

The Faxed Credit References

Epsco argues that Plaintiff's Exhibit # 1, a faxed list of credit references, clearly indicates that Gary was the owner and that Reggie and Mark were partners in the business. The fax lists four credit references, and it includes CWC's contact information. The contact information lists CWC's telephone number, fax number, and federal tax number. The last two lines of the contact information state: "Gary Chavers Owner" and "Reggie Chavers and Mark Chavers Partners."

Gary testified that he did not know that the list of credit references was faxed to Epsco. In addition, he testified that his signature was not at the bottom of the fax. He testified that his former secretary might have signed his name to the fax; however, he stated that he did not authorize his secretary to sign or fax a list of

credit references to Epsco. Moreover, Gary testified that the first time he saw the list of credit references was at the bench trial.

This court gives deference to the superior position of the trial judge to determine the credibility of the witnesses and the weight to be accorded their testimony. [Citations] Though there was a dispute concerning whether Gary faxed the list to Epsco, the trial court found that Epsco received the faxed credit references from CWC and relied on CWC's statement that Reggie and Mark were partners. The trial court's finding is not clearly erroneous.

The Fax Cover Sheet

At trial, Epsco introduced Plaintiff's Exhibit # 2, a fax cover sheet from "Chavers Construction" to Epsco. The fax cover sheet was dated July 19, 2000. The fax cover sheet contained the address, telephone number, and fax number of the business. Listed under this information was "Gary, Reggie, or Mark Chavers." Epsco argues that Gary, Reggie, and Mark are all listed on the fax cover sheet, and that this indicates that they were holding themselves out to the public as partners of the business. The trial court's finding that the fax cover sheet indicated that Reggie and Mark were holding themselves out as partners of CWC is not clearly erroneous.

The Epsco Personnel Credit Application

Epsco introduced Plaintiff's Exhibit # 9, a personnel credit application, which was received from CWC. Adams testified that the exhibit represented a completed credit application that she received from CWC. The type of business checked on the credit application is "partnership." Adams testified that the application showed the company to be a partnership, and that this information was relied upon in extending credit. Clegg testified that he viewed the credit application which indicated that CWC was a partnership, and that his decision to extend credit to CWC was based, in part, on his belief that CWC was a partnership. Gary denied filling out the credit application form.

It was within the trial court's discretion to find Adams's and Clegg's testimony more credible than Gary's testimony and to determine that Epsco relied on the statement of partnership on the credit application before extending credit to CWC. The trial court's finding concerning the credit application is not clearly erroneous.

The Checks to Epsco

Epsco argues that Plaintiff's Exhibit # 3 and Plaintiff's Exhibit # 11, checks written to Epsco showing the CWC account to be in the name of "Gary A. or Reggie J. Chavers,"

indicates that Reggie was holding himself out to be a partner of CWC. Plaintiff's Exhibit # 3 was signed by Gary, and Plaintiff's Exhibit # 11 was signed by Reggie. The checks are evidence that Reggie was holding himself out to the public as a partner of CWC, and Epsco could have detrimentally relied on the checks before extending credit to CWC. The trial court was not clearly erroneous in finding that the checks supported a finding of partnership by estoppel.

The Business Card

Epsco introduced Plaintiff's Exhibit # 4, a business card that states "Chavers Welding, Construction & Crane Service." Listed on the card as "owners" are Gary Chavers and Reggie Chavers. Gary testified that the business cards were printed incorrectly, and that Reggie's name should not have been included as an owner. He also testified that some of the cards might have been handed out, and that it was possible that he might have given one of the cards to a business listed as one of CWC's credit references on Plaintiff's Exhibit # 1.

The business card listing Reggie as an owner indicates that Reggie was holding himself out as a partner. As we stated in [Citation] when a person holds himself out as a member of partnership, any one dealing with the firm on the faith of such representation is entitled to assume the relation continues until notice of some kind is given of its discontinuance. There is no indication that Reggie ever informed any person who received a business card that the business relationship listed on the card was incorrect or had been discontinued. The trial court's finding concerning the business card is not clearly erroneous.

The Dealership Application

Epsco introduced Plaintiff's Exhibit # 5, an application form from "Chavers Welding," signed by Reggie, seeking a dealership from Sukup Manufacturing. The application, dated January 23, 1997, lists "Gary & Reggie Chavers" as owners of "Chavers Welding." The application is signed by Reggie. Reggie admits that he signed the dealership application and represented that he was an owner of "Chavers Welding," but he dismisses his statement of ownership as mere "puffery" on his part. Epsco argues that instead, the application shows that Reggie was holding himself out to the public as being a partner. The trial court's determination that Reggie's dealership application supports a finding of partnership by estoppel is not clearly erroneous.

In sum, the trial court was not clearly erroneous in finding that Reggie and Mark held themselves out as partners of CWC and that Epsco detrimentally relied on the existence of the partnership before extending credit to CWC. The appellants argue

that even if we find Reggie liable based upon partnership by estoppel, there was scant proof of Mark being liable based upon partnership by estoppel. We disagree. We are aware that some examples of holding out cited in the trial court's order pertain only to Reggie. However, the representations attributed to both Reggie and Mark are sufficient proof to support the trial court's finding that both Reggie and Mark are estopped from denying liability to Epsco.

Affirmed.

CASE QUESTIONS

1. What is the rationale for the doctrine of partnership by estoppel?
2. Gary and Reggie claimed the evidence brought forth to show the existence of a partnership was unconvincing. How credible were their claims?

40.4 Summary and Exercises

Summary

The basic law of partnership is found in the Uniform Partnership Act and Revised Uniform Partnership Act. The latter has been adopted by thirty-five states. At common law, a partnership was not a legal entity and could not sue or be sued in the partnership name. Partnership law defines a partnership as “an association of two or more persons to carry on as co-owners a business for profit.” The Uniform Partnership Act (UPA) assumes that a partnership is an aggregation of individuals, but it also applies a number of rules characteristic of the legal entity theory. The Revised Uniform Partnership Act (RUPA) assumes a partnership is an entity, but it applies one crucial rule characteristic of the aggregate theory: the partners are ultimately liable for the partnership’s obligations. Thus a partnership may keep business records as if it were a legal entity, may hold real estate in the partnership name, and may sue and be sued in federal court and in many state courts in the partnership name.

Partnerships may be created informally. Among the clues to the existence of a partnership are (1) co-ownership of a business, (2) sharing of profits, (3) right to participate in decision making, (4) duty to share liabilities, and (5) manner in which the business is operated. A partnership may also be formed by implication; it may be formed by estoppel when a third party reasonably relies on a representation that a partnership in fact exists.

No special rules govern the partnership agreement. As a practical matter, it should sufficiently spell out who the partners are, under what name they will conduct their business, the nature and scope of the business, capital contributions of each partner, how profits are to be divided, and similar pertinent provisions. An oral agreement to form a partnership is valid unless the business cannot be performed wholly within one year from the time that the agreement is made. However, most partnerships have no fixed terms and hence are “at-will” partnerships not subject to the Statute of Frauds.

EXERCISES

1. Able, Baker, and Carr own, as partners, a warehouse. The income from the warehouse during the current year is \$300,000, two-thirds of which goes to Able. Who must file a tax return listing this as income, the partnership or Able? Who pays the tax, the partnership or Able?
2. The Havana Club operated in Salt Lake City under a lease running to defendant Dale Bowen, who owned the equipment, furnishings, and inventory. He did not himself work in operating the club. He made an oral agreement with Frances Cutler, who had been working for him as a bartender, that she take over the management of the club. She was to have the authority and the responsibility for the entire active management and operation: to purchase the supplies, pay the bills, keep the books, hire and fire employees, and do whatever else was necessary to run the business. As compensation, the arrangement was for a down-the-middle split; each was to receive \$300 per week plus one half of the net profits. This went on for four years until the city took over the building for a redevelopment project. The city offered Bowen \$30,000 as compensation for loss of business while a new location was found for the club. Failing to find a suitable location, the parties decided to terminate the business. Bowen then contended he was entitled to the entire \$30,000 as the owner, Cutler being an employee only. She sued to recover half as a partner. What was the result? Decide and discuss.
3. Raul, a business student, decided to lease and operate an ice cream stand during his summer vacation. Because he could not afford rent payments, his lessor agreed to take 30 percent of the profits as rent and provide the stand and the parcel of real estate on which it stood. Are the two partners?
4. Able, Baker, and Carr formed the ABC Partnership in 2001. In 2002 Able gave her three sons, Duncan, Eldon, and Frederick, a gift of her 41 percent interest in the partnership to provide money to pay for their college expenses. The sons reported income from the partnership on their individual tax returns, and the partnership reported the payment to them on its information return. The sons were listed as partners on unaudited balance sheets in 2003, and the 2004 income statement listed them as partners. The sons never requested information about the management of the firm, never attended any meetings or voted, and never attempted to withdraw the firm's money or even speak with the other partners about the firm. Two of the sons didn't know where the firm was located, but they all once received "management fees" totaling \$3,000, without any showing of what the "fees" were for. In 2005, the partnership incurred liability for pension-fund contributions to an employee, and a trustee for the fund asserted that Able's sons were

personally liable under federal law for the money owing because they were partners. The sons moved for summary judgment denying liability. How should the court rule?

5. The Volkman family wanted to build a house and contacted David McNamee for construction advice. He told them that he was doing business with Phillip Carroll. Later the Volkman family got a letter from McNamee on stationery that read “DP Associates,” which they assumed was derived from the first names of David and Phillip. At the DP Associates office McNamee introduced Mr. Volkman to Carroll, who said to Volkman, “I hope we’ll be working together.” At one point during the signing process a question arose and McNamee said, “I will ask Phil.” He returned with the answer to the question. After the contract was signed but before construction began, Mr. Volkman visited the DP Associates office where the two men chatted; Carroll said to him, “I am happy that we will be working with you.” The Volkman family never saw Carroll on the construction site and knew of no other construction supervised by Carroll. They understood they were purchasing Carroll’s services and construction expertise through DP Associates. During construction, Mr. Volkman visited the DP offices several times and saw Carroll there. During one visit, Mr. Volkman expressed concerns about delays and expressed the same to Carroll, who replied, “Don’t worry. David will take care of it.” But David did not, and the Volkman family sued DP Associates, McNamee, and Carroll. Carroll asserted he could not be liable because he and McNamee were not partners. The trial court dismissed Carroll on summary judgment; the Volkman family appealed. How should the court rule on appeal?
6. Wilson and VanBeek want to form a partnership. Wilson is seventeen and VanBeek is twenty-two. May they form a partnership? Explain.
7. Diane and Rachel operate a restaurant at the county fair every year to raise money for the local 4-H Club. They decide together what to serve, what hours to operate, and generally how to run the business. Do they have a partnership?

SELF-TEST QUESTIONS

1. The basic law of partnership is currently found in
 - a. common law
 - b. constitutional law
 - c. statutory law
 - d. none of the above

2. Existence of a partnership may be established by
 - a. co-ownership of a business for profit
 - b. estoppel
 - c. a formal agreement
 - d. all of the above

3. Which is false?
 - a. An oral agreement to form a partnership is valid.
 - b. Most partnerships have no fixed terms and are thus not subject to the Statute of Frauds.
 - c. Strict statutory rules govern partnership agreements.
 - d. A partnership may be formed by estoppel.

4. Partnerships
 - a. are not taxable entities
 - b. may buy, sell, or hold real property in the partnership name
 - c. may file for bankruptcy
 - d. have all of the above characteristics

5. Partnerships
 - a. are free to select any name not used by another partnership
 - b. must include the partners' names in the partnership name
 - c. can be formed by two corporations
 - d. cannot be formed by two partnerships

Chapter 41

Partnership Operation and Termination

LEARNING OBJECTIVES

After reading this chapter, you should understand the following:

1. The operation of a partnership, including the relations among partners and relations between partners and third parties
2. The dissolution and winding up of a partnership

41.1 Operation: Relations among Partners

LEARNING OBJECTIVES

1. Recognize the duties partners owe each other: duties of service, loyalty, care, obedience, information, and accounting.
2. Identify the rights that partners have, including the rights to distributions of money, to management, to choice of copartners, to property of the partnership, to assign partnership interest, and to enforce duties and rights.

Most of the rules discussed in this section apply unless otherwise agreed, and they are really intended for the small firm. “The basic mission of RUPA is to serve the small firm. Large partnerships can fend for themselves by drafting partnership agreements that suit their special needs.” Donald J. Weidner, “RUPA and Fiduciary Duty: The Texture of Relationship,” *Law and Contemporary Problems* 58, no. 2 (1995): 81, 83. The Uniform Partnership Act (UPA) and the Revised Uniform Partnership Act (RUPA) do not dictate what the relations among partners must be; the acts supply rules in the event that the partners have not done so for themselves. In this area, it is especially important for the partners to elaborate their agreement in writing. If the partners should happen to continue their business beyond the term fixed for it in their agreement, the terms of the agreement continue to apply.

Duties Partners Owe Each Other

Among the duties partners owe each other, six may be called out here: (1) the duty to serve, (2) the duty of loyalty, (3) the duty of care, (4) the duty of obedience, (5) the duty to inform copartners, and (6) the duty to account to the partnership. These are all very similar to the duty owed by an agent to the principal, as partnership law is based on agency concepts. Revised Uniform Partnership Act, Section 404, Comment 3: “Indeed, the law of partnership reflects the broader law of principal and agent, under which every agent is a fiduciary.”

Duty to Serve

Unless otherwise agreed, expressly or impliedly, a partner is expected to work for the firm. The partnership, after all, is a profit-making co-venture, and it would not do for one to loaf about and still expect to get paid. For example, suppose Joan takes her two-week vacation from the horse-stable partnership she operates with Sarah

and Sandra. Then she does not return for four months because she has gone horseback riding in the Southwest. She might end up having to pay if the partnership hired a substitute to do her work.

Duty of Loyalty

In general, this requires partners to put the firm's interests ahead of their own. Partners are *fiduciaries* as to each other and as to the partnership, and as such, they owe a **fiduciary duty**¹ to each other and the partnership. Judge Benjamin Cardozo, in an often-quoted phrase, called the fiduciary duty "something stricter than the morals of the market place. Not honesty alone, but the punctilio of an honor the most sensitive, is then the standard of behavior." *Meinhard v. Salmon*, 164 N.E. 545 (N.Y. 1928). Breach of the fiduciary duty gives rise to a claim for compensatory, consequential, and incidental damages; recoupment of compensation; and—rarely—punitive damages. See [Section 41.4.1 "Breach of Partnership Fiduciary Duty"](#), *Gilroy v. Conway*, for an example of breach of fiduciary duty.

Application of the Fiduciary Standard to Partnership Law

Under UPA, all partners are fiduciaries of each other—they are all principals and agents of each other—though the word *fiduciary* was not used except in the *heading* to Section 21. The section reads, "Every partner must account to the partnership for any benefit, and hold as trustee for it any profits derived by him without the consent of the other partners from any transaction connected with the formation, conduct, or liquidation of the partnership or from any use by him of its property."

Section 404 of RUPA specifically provides that a partner has a fiduciary duty to the partnership and other partners. It imposes the fiduciary standard on the duty of loyalty in three circumstances:

(1) to account to the partnership and hold as trustee for it any property, profit, or benefit derived by the partner in the conduct and winding up of the partnership business or derived from a use by the partner of partnership property, including the appropriation of a partnership opportunity;

(2) to refrain from dealing with the partnership in the conduct or winding up of the partnership business as or on behalf of a party having an interest adverse to the partnership; and

(3) to refrain from competing with the partnership in the conduct of the partnership business before the dissolution of the partnership.

1. The highest duty of good faith and trust, imposed on partners as to each other and the firm.

Limits on the Reach of the Fiduciary Duty

This sets out a fairly limited scope for application of the fiduciary standard, which is reasonable because partners do not delegate open-ended control to their copartners. Further, there are some specific limits on how far the fiduciary duty reaches (which means parties are held to the lower standard of “good faith”). Here are two examples. First, RUPA—unlike UPA—does not extend to the *formation* of the partnership; Comment 2 to RUPA Section 404 says that would be inappropriate because then the parties are “really dealing at arm’s length.” Second, fiduciary duty doesn’t apply to a dissociated partner (one who leaves the firm—discussed in [Section 41 "Dissociation"](#)) who can immediately begin competing without the others’ consent; and it doesn’t apply if a partner violates the standard “merely because the partner’s conduct furthers the partner’s own interest.” RUPA, Section 503(b)(2); RUPA, Section 404 (e). Moreover, the partnership agreement may eliminate the duty of loyalty so long as that is not “manifestly unreasonable.” RUPA, Section 103(2)(c).

Activities Affected by the Duty of Loyalty

The duty of loyalty means, again, that partners must put the firm’s interest above their own. Thus it is held that a partner

- may not compete with the partnership,
- may not make a secret profit while doing partnership business,
- must maintain the confidentiality of partnership information.

This is certainly not a comprehensive list, and courts will determine on a case-by-case basis whether the duty of loyalty has been breached.

Duty of Care

Stemming from its roots in agency law, partnership law also imposes a duty of care on partners. Partners are to faithfully serve to the best of their ability. Section 404 of RUPA imposes the fiduciary standard on the duty of care, but rather confusingly: how does the “punctilio of an honor the most sensitive”—as Judge Cardozo described that standard—apply when under RUPA Section 404(c) the “the duty of care...is limited to refraining from engaging in grossly negligent or reckless conduct, intentional misconduct, or a knowing violation of law”? Recognize that a person can attend to business both loyally and negligently. For example, Alice Able, a partner in a law firm who is not very familiar with the firm’s computerized bookkeeping system, attempts to trace a missing check and in so doing erases a month’s worth of records. She has not breached her duty of care: maybe she was

negligent, but not grossly negligent under RUPA Section 404(c). The partnership agreement may reduce the duty of care so long as it is not “unreasonably reduce[d]”; it may increase the standard too. RUPA, Section 103(2)(d); RUPA, Section 103.

Duty of Obedience

The partnership is a contractual relationship among the partners; they are all agents and principals of each other. Expressly or impliedly that means no partner can disobey the partnership agreement or fail to follow any properly made partnership decision. This includes the duty to act within the authority expressly or impliedly given in the partnership agreement, and a partner is responsible to the other partners for damages or losses arising from unauthorized activities.

Duty to Inform Copartners

As in the agency relationship, a partner is expected to inform copartners of notices and matters coming to her attention that would be of interest to the partnership.

Duty to Account

The partnership—and necessarily the partners—have a duty to allow copartners and their agents access to the partnership’s books and records and to provide “any information concerning the partnership’s business and affairs reasonably required for the proper exercise of the partner’s rights and duties under the partnership agreement [or this Act].” UPA, Sections 19 and 20; RUPA, Section 403. The fiduciary standard is imposed upon the duty to account for “it any property, profit, or benefit derived by [a] partner,” as noted in RUPA Section 404. RUPA, Section 404(1).

The Rights That Partners Have in a Partnership

Necessarily, for every duty owed there is a correlative right. So, for example, if a partner has a duty to account, the other partners and the partnership have a right to an accounting. Beyond that, partners have recognized rights affecting the operation of the partnership.

Here we may call out the following salient rights: (1) to distributions of money, (2) to management, (3) to choose copartners, (4) to property of the partnership, (5) to assign partnership interest, and (6) to enforce duties and rights.

Rights to Distributions

The purpose of a partnership is ultimately to distribute “money or other property from a partnership to a partner in the partner’s capacity.” RUPA, Section 101(3). There are, however, various types of money distributions, including profits (and losses), indemnification, capital, and compensation.

Right to Profits (and Losses)

Profits and losses may be shared according to any formula on which the partners agree. For example, the partnership agreement may provide that two senior partners are entitled to 35 percent each of the profit from the year and the two junior partners are entitled to 15 percent each. The next year the percentages will be adjusted based on such things as number of new clients garnered, number of billable hours, or amount of income generated. Eventually, the senior partners might retire and each be entitled to 2 percent of the firm’s income, and the previous junior partners become senior, with new junior partners admitted.

If no provision is stated, then under RUPA Section 401(b), “each partner is entitled to an equal share of the partnership profits and is chargeable with a share of the partnership losses in proportion to the partner’s share of the profits.” Section 18(a) of the Uniform Partnership Act is to the same effect. The right to share in the profits is the reason people want to “make partner”: a partner will reap the benefits of other partners’ successes (and pay for their failures too). A person working for the firm who is not a partner is an associate and usually only gets only a salary.

Right to Indemnification

A partner who incurs liabilities in the normal course of business or to preserve its business or property is entitled to indemnification (UPA Section 18(b), RUPA Section 401(c)). The liability is a loan owing to the partner by the firm.

Right to Return of Capital Contribution

When a partner joins a partnership, she is expected to make a capital contribution to the firm; this may be deducted from her share of the distributed profit and banked by the firm in its capital account. The law provides that “the partnership must reimburse a partner for an advance of funds beyond the amount of the partner’s agreed capital contribution, thereby treating the advance as a loan.” UPA, Section 18(c); RUPA, Section 401(d). A partner may get a return of capital under UPA after creditors are paid off if the business is wound down and terminated. UPA, Section 40(b); RUPA, Section 807(b).

Right to Compensation

Section 401(d) of RUPA provides that “a partner is not entitled to remuneration for services performed for the partnership, except for reasonable compensation for services rendered in winding up the business of the partnership”; UPA Section 18(f) is to the same effect. A partner gets his money from the firm by sharing the profits, *not* by a salary or wages.

Right to Management

All partners are entitled to share equally in the management and conduct of the business, unless the partnership agreement provides otherwise. UPA, Section 18(e); RUPA, Section 401(f). The partnership agreement could be structured to delegate more decision-making power to one class of partners (senior partners) than to others (junior partners), or it may give more voting weight to certain individuals. For example, perhaps those with the most experience will, for the first four years after a new partner is admitted, have more voting weight than the new partner.

Right to Choose Partners

A business partnership is often analogized to a marriage partnership. In both there is a relationship of trust and confidence between (or among) the parties; in both the poor judgment, negligence, or dishonesty of one can create liabilities on the other(s). In a good marriage or good partnership, the partners are friends, whatever else the legal relationship imposes. Thus no one is compelled to accept a partner against his or her will. Section 401(i) of RUPA provides, “A person may become a partner only with the consent of all of the partners.” UPA Section 18(g) is to the same effect; the doctrine is called **delectus personae**². The freedom to select new partners, however, is not absolute. In 1984, the Supreme Court held that Title VII of the Civil Rights Act of 1964—which prohibits discrimination in employment based on race, religion, national origin, or sex—applies to partnerships. *Hishon v. King & Spalding*, 467 U.S. 69 (1984).

Right to Property of the Partnership

Partners are the owners of the partnership, which might not include any physical property; that is, one partner could contribute the building, furnishings, and equipment and rent those to the partnership (or those could count as her partnership capital contribution and become the partnership’s). But partnership property consists of all property originally advanced or contributed to the partnership or subsequently acquired by purchase or contribution. Unless a contrary intention can be shown, property acquired with partnership funds is partnership property, not an individual partner’s: “Property acquired by a

2. The theory that a new partner can only be admitted to a firm with the unanimous consent of all.

partnership is property of the partnership and not of the partners individually.”RUPA, Section 203; UPA, Sections 8(1) and 25.

Rights in Specific Partnership Property: UPA Approach

Suppose that Able, who contributed the building and grounds on which the partnership business is conducted, suddenly dies. Who is entitled to her share of the specific property, such as inventory, the building, and the money in the cash register—her husband and children, or the other partners, Baker and Carr? Section 25(1) of UPA declares that the partners hold the partnership property as **tenants in partnership**³. As spelled out in Section 25(2), the specific property interest of a tenant in partnership vests in the surviving partners, not in the heirs. But the heirs are entitled to the deceased partner’s interest in the partnership itself, so that while Baker and Carr may use the partnership property for the benefit of the partnership without consulting Able’s heirs, they must account to her heirs for her proper share of the partnership’s profits.

Rights in Specific Property: RUPA Approach

Section 501 of RUPA provides, “A partner is not a co-owner of partnership property and has no interest in partnership property which can be transferred, either voluntarily or involuntarily.” Partnership property is owned by the entity; UPA’s concept of tenants in partnership is abolished in favor of adoption of the entity theory. The result, however, is not different.

Right to Assign Partnership Interest

One of the hallmarks of the capitalistic system is that people should be able to dispose of their property interests more or less as they see fit. Partnership interests may be assigned to some extent.

Voluntary Assignment

At common law, assignment of a partner’s interest in the business—for example, as a mortgage in return for a loan—would result in a legal dissolution of the partnership. Thus in the absence of UPA, which changed the law, Baker’s decision to mortgage his interest in the car dealership in return for a \$20,000 loan from his bank would mean that the three—Able, Baker, and Carr—were no longer partners. Section 27 of UPA declares that assignment of an interest in the partnership neither dissolves the partnership nor entitles the assignee “to interfere in the management or administration of the partnership business or affairs, or to require any information or account of partnership transactions, or to inspect the partnership books.” The assignment merely entitles the assignee to receive whatever profits the

3. Under UPA, how partnership property is held by the partners: jointly.

assignor would have received—this is the assignor’s transferable interest. UPA, Section 26. Under UPA, this interest is assignable. UPA, Section 27.

Under RUPA, the same distinction is made between a partner’s interest in the partnership and a partner’s transferable interest. The Official Comment to Section 101 reads as follows: “‘Partnership interest’ or ‘partner’s interest in the partnership’ is defined to mean all of a partner’s interests in the partnership, including the partner’s transferable interest and all management and other rights. A partner’s ‘transferable interest’ is a more limited concept and means only his share of the profits and losses and right to receive distributions, that is, the partner’s economic interests.” RUPA, Official Comment to Section 101.

This transferable interest is assignable under RUPA 503 (unless the partners agree to restrict transfers, Section 103(a)). It does not, by itself, cause the dissolution of the partnership; it does not entitle the transferee to access to firm information, to participate in running the firm, or to inspect or copy the books. The transferee is entitled to whatever distributions the transferor partner would have been entitled to, including, upon dissolution of the firm, the net amounts the transferor would have received had there been no assignment.

RUPA Section 101(b)(3) confers standing on a transferee to seek a judicial dissolution and winding up of the partnership business as provided in Section 801(6), thus continuing the rule of UPA Section 32(2). But under RUPA 601(4)(ii), the other partners may by unanimous vote expel a partner who has made “a transfer of all or substantially all of that partner’s transferable interest in the partnership, other than a transfer for security purposes [as for a loan].” Upon a creditor *foreclosure* of the security interest, though, the partner may be expelled.

Involuntary Assignment

It may be a misnomer to describe an involuntary assignment as a “right”; it might better be thought of as a consequence of the right to own property. In any event, if a partner is sued in his personal capacity and a judgment is rendered against him, the question arises: may the judgment creditor seize partnership property? Section 28 of UPA and RUPA Section 504 permit a judgment creditor to obtain a **charging order**⁴, which charges the partner’s interest in the partnership with obligation to satisfy the judgment. The court may appoint a receiver to ensure that partnership proceeds are paid to the judgment creditor. But the creditor is not entitled to specific partnership property. The partner may always pay off the debt and redeem his interest in the partnership. If the partner does not pay off the debt, the holder of the charging order may acquire legal ownership of the partner’s interest. That confers upon the judgment creditor an important power: he may, if the partnership

4. A court order directing a partnership to pay a partner’s judgment creditor the distribution that the partner would normally receive.

is one at will, dissolve the partnership and claim the partner’s share of the assets. For that reason, the copartners might wish to redeem the interest—pay off the creditor—in order to preserve the partnership. As with the voluntary assignment, the assignee of an involuntary assignment does not become a partner. See [Figure 41.1 "Property Rights"](#).

Figure 41.1 *Property Rights*

	Specific Property	Interest
1. At Death	To Surviving Partners	To Estate
2. Assignment by One Partner?	No	Yes
3. Claims by a Partner's Creditors?	No	Yes

Right to Enforce Partnership Rights

The rights and duties imposed by partnership law are, of course, valueless unless they can be enforced. Partners and partnerships have mechanisms under the law to enforce them.

Right to Information and Inspection of Books

We noted in [Section 41.1.1 "Duties Partners Owe Each Other"](#) of this chapter that partners have a duty to account; the corollary right is the right to access books and records, which is usually very important in determining partnership rights. Section 403(b) of RUPA provides, “A partnership shall provide partners and their agents and attorneys access to its books and records. It shall provide former partners and their agents and attorneys access to books and records pertaining to the period during which they were partners. The right of access provides the opportunity to inspect and copy books and records during ordinary business hours. A partnership may impose a reasonable charge, covering the costs of labor and material, for copies of documents furnished.”RUPA Section 403(b).

Section 19 of UPA is basically in accord. This means that without demand—and for any purpose—the partnership must provide any information concerning its business and affairs reasonably required for the proper exercise of the partner’s rights and duties under the partnership agreement or the act; and on demand, it must provide any other information concerning the partnership’s business and affairs, unless the demand is unreasonable or improper.RUPA, Section 403(c)(1);

RUPA, Section 403(c)(2). Generally, the partnership agreement cannot deny the right to inspection.

The duty to account mentioned in Section 41.1.1 "Duties Partners Owe Each Other" of this chapter normally means that the partners and the partnership should keep reasonable records so everyone can tell what is going on. A formal accounting under UPA is different.

Under UPA Section 22, any partner is entitled to a formal account (or accounting) of the partnership affairs under the following conditions:

1. If he is wrongfully excluded from the partnership business or possession of its property by his copartners;
2. If the right exists under the terms of any agreement;
3. If a partner profits in violation of his fiduciary duty (as per UPA 22);
and
4. Whenever it is otherwise just and reasonable.

At common law, partners could not obtain an accounting except in the event of dissolution. But from an early date, equity courts would appoint a referee, auditor, or special master to investigate the books of a business when one of the partners had grounds to complain, and UPA broadened considerably the right to an accounting. The court has plenary power to investigate all facets of the business, evaluate claims, declare legal rights among the parties, and order money judgments against any partner in the wrong.

Under RUPA Section 405, this “accounting” business is somewhat modified. Reflecting the entity theory, the *partnership* can sue a partner for wrongdoing, which is not allowed under UPA. Moreover, to quote from the Official Comment, RUPA “provides that, during the term of the partnership, partners may maintain a variety of legal or equitable actions, including an action for an accounting, as well as a final action for an accounting upon dissolution and winding up. It reflects a new policy choice that partners should have access to the courts during the term of the partnership to resolve claims against the partnership and the other partners, leaving broad judicial discretion to fashion appropriate remedies[, and] an accounting is not a prerequisite to the availability of the other remedies a partner may have against the partnership or the other partners.”RUPA Official Comment 2, Section 405(b).

KEY TAKEAWAY

Partners have important duties in a partnership, including (1) the duty to serve—that is, to devote herself to the work of the partnership; (2) the duty of loyalty, which is informed by the fiduciary standard: the obligation to act always in the best interest of the partnership and not in one’s own best interest; (3) the duty of care—that is, to act as a reasonably prudent partner would; (4) the duty of obedience not to breach any aspect of the agreement or act without authority; (5) the duty to inform copartners; and (6) the duty to account to the partnership.

Partners also have rights. These include the rights (1) to distributions of money, including profits (and losses), indemnification, and return of capital contribution (but not a right to compensation); (2) to management; (3) to choose copartners; (4) to property of the partnership, and no partner has any rights to specific property; (5) to assign (voluntarily or involuntarily) the partnership interest; and (6) to enforce duties and rights by suits in law or equity. (Under RUPA, a formal accounting is not first required.)

EXERCISES

1. What is the “fiduciary duty,” and why is it imposed on some partners’ actions with the partnership?
2. Distinguish between ownership of partnership property under UPA as opposed to under RUPA.
3. Carlos obtained a judgment against Pauline, a partner in a partnership, for negligently crashing her car into Carlos’s while she was not in the scope of partnership business. Carlos wants to satisfy the judgment from her employer. How can Carlos do that?
4. What is the difference between the duty to account and a formal partnership accounting?
5. What does it mean to say a partnership interest has been involuntarily assigned?

41.2 Operation: The Partnership and Third Parties

LEARNING OBJECTIVES

1. Understand the partners' and partnership's contract liability.
2. Understand the partners' and partnership's tort and criminal liability.
3. Describe the partners' and partnership's tax liability.

By express terms, the law of agency applies to partnership law. Every partner is an agent of the partnership for the purpose of its business. Consequently, the following discussion will be a review of agency law, covered in Chapter 40 "Partnerships: General Characteristics and Formation" as it applies to partnerships. The Revised Uniform Partnership Act (RUPA) adds a few new wrinkles to the liability issue.

Contract Liability

Liability of the Partnership

Recall that an agent can make contracts on behalf of a principal under three types of authority: express, implied, and apparent. *Express authority* is that explicitly delegated to the agent, *implied authority* is that necessary to the carrying out of the express authority, and *apparent authority* is that which a third party is led to believe has been conferred by the principal on the agent, even though in fact it was not or it was revoked. When a partner has authority, the partnership is bound by contracts the partner makes on its behalf. Section 41.4.2 "Partnership Authority, Express or Apparent", *Hodge v. Garrett*, discusses all three types of authority.

The General Rule

Section 305 of RUPA restates agency law: "A partnership is liable for loss or injury, or for a penalty incurred, as a result of a wrongful act or omission, or other actionable conduct, of a partner acting in the ordinary course" RUPA Section 305. of partnership business or with its authority. The ability of a partner to bind the partnership to contract liability is problematic, especially where the authority is apparent: the firm denies liability, lawsuits ensue, and unhappiness generally follows.

But the firm is not liable for an act not apparently in the ordinary course of business, unless the act was authorized by the others. RUPA, Section 301(2); UPA, Section 9(2). Section 401(j) of RUPA requires the unanimous consent of the partners

for a grant of authority outside the ordinary course of business, unless the partnership agreement provides otherwise.

Under the Uniform Partnership Act (UPA) Section 9(3), the firm is not liable for five actions that no single partner has implied or apparent authority to do, because they are not “in the ordinary course of partnership.” These actions are: (1) assignment of partnership property for the benefit of creditors, (2) disposing of the firm’s goodwill (selling the right to do business with the firm’s clients to another business), (3) actions that make it impossible to carry on the business, (4) confessing a judgment against the partnership, and (5) submitting a partnership claim or liability. RUPA omits that section, leaving it to the courts to decide the outer limits of the agency power of a partner. In any event, unauthorized actions by a partner may be ratified by the partnership.

Partnership “Statements”

New under RUPA is the ability of partnerships, partners, or even nonpartners to issue and file “statements” that announce to the world the establishment or denial of authority. The goal here is to control the reach of apparent authority. There are several kinds of statements authorized.

A **statement of partnership authority**⁵ is allowed by RUPA Section 303. It specifies the names of the partners authorized, or not authorized, to enter into transactions on behalf of the partnership and any other matters. The most important goal of the statement of authority is to facilitate the transfer of real property held in the name of the partnership. A statement must specify the names of the partners authorized to execute an instrument transferring that property.

A **statement of denial**⁶, RUPA Section 304, operates to allow partners (and persons named as partners) an opportunity to deny any fact asserted in a statement of partnership authority.

A **statement of dissociation**⁷, RUPA Section 704, may be filed by a partnership or a dissociated partner, informing the world that the person is no longer a partner. This tells the world that the named person is no longer in the partnership.

There are three other statements authorized: a *statement of qualification* establishes that the partnership has satisfied all conditions precedent to the qualification of the partnership as a limited liability partnership; a *statement of foreign qualification* means a limited liability partnership is qualified and registered to do business in a state other than that in which it is originally registered; and a *statement of*

5. A public filing setting out or limiting partners’ authority.

6. A public filing that a partner has no authority to perform some act(s) on the firm’s behalf or that a person is not a partner.

7. A public filing that a partner is withdrawing from the firm.

amendment or cancellation of any of the foregoing. RUPA, Section 1001(d); RUPA, Section 1102. Limited liability partnerships are taken up in [Chapter 42 "Hybrid Business Forms"](#).

Generally, RUPA Section 105 allows partnerships to file these statements with the state secretary of state's office; those affecting real estate need to be filed with (or also with) the local county land recorder's office. The notices bind those who know about them right away, and they are constructive notice to the world after ninety days as to authority to transfer real property in the partnership's name, as to dissociation, and as to dissolution. However, as to other grants or limitations of authority, "only a third party who knows or has received a notification of a partner's lack of authority in an ordinary course transaction is bound." RUPA, Section 303, Comment 3.

Since RUPA is mostly intended to provide the rules for the small, unsophisticated partnership, it is questionable whether these arcane "statements" are very often employed.

Personal Liability of Partners, in General

It is clear that the *partnership* is liable for contracts by authorized partners, as discussed in the preceding paragraphs. The bad thing about the partnership as a form of business organization is that it imposes liability on the partners *personally and without limit*. Section 306 of RUPA provides that "all partners are liable jointly and severally for all obligations of the partnership unless otherwise agreed by the claimant or provided by law." RUPA, Section 306. Section 13 of UPA is in accord.

Liability of Existing Partners

Contract liability is joint and several: that is, all partners are liable ("joint") and each is "several." (We usually do not use *several* in modern English to mean "each"; it's an archaic usage.) But—and here's the intrusion of entity theory—generally RUPA requires the judgment creditor to exhaust the partnership's assets before going after the separate assets of a partner. Thus under RUPA the partners are *guarantors* of the partnership's liabilities. RUPA Section 306.

Under UPA, contract liability is joint only, not also several. This means the partners must be sued in a joint action brought against them all. A partner who is not named cannot later be sued by a creditor in a separate proceeding, though the ones who were named could see a proportionate contribution from the ones who were not.

Liability of Incoming Partners

Under RUPA Section 306(b), a new partner has no personal liability to existing creditors of the partnership, and only her capital investment in the firm is at risk for the satisfaction of existing partnership debts. Sections 17 and 41(7) of UPA are in accord. But, again, under either statute a new partner's personal assets are at risk with respect to partnership liabilities incurred after her admission as a partner. This is a daunting prospect, and it is the reason for the invention of hybrid forms of business organization: limited partnerships, limited liability companies, and limited liability partnerships. The corporate form, of course, also (usually) obviates the owners' personal liability.

Tort and Criminal Liability **Partnership Liability for Torts**

The rules affecting partners' tort liability (discussed in [Section 41.2.1 "Contract Liability"](#)) and those affecting contract liability are the same. Section 13 of UPA says the partnership is liable for "any wrongful act or omission of any partner acting in the ordinary course of the business of the partnership or with the authority of his co-partners." UPA, Section 13. A civil "wrongful act" is necessarily either a tort or a breach of contract, so no distinction is made between them. (Section 305 of RUPA changed the phraseology slightly by adding after *any wrongful act or omission* the words *or other actionable conduct*; this makes the partnership liable for its partner's no-fault torts.) That the principal should be liable for its agents' wrongdoings is of course basic agency law. RUPA does expand liability by allowing a partner to sue during the term of the partnership without first having to get out of it, as is required under UPA.

For tortious acts, the partners are said to be jointly and severally liable under both UPA and RUPA, and the plaintiff may separately sue one or more partners. Even after winning a judgment, the plaintiff may sue other partners unnamed in the original action. Each and every partner is separately liable for the entire amount of the debt, although the plaintiff is not entitled to recover more than the total of his damages. The practical effect of the rules making partners personally liable for partnership contracts and torts can be huge. In his classic textbook *Economics*, Professor Paul Samuelson observed that unlimited liability "reveals why partnerships tend to be confined to small, personal enterprises....When it becomes a question of placing their personal fortunes in jeopardy, people are reluctant to put their capital into complex ventures over which they can exercise little control....In the field of investment banking, concerns like JPMorgan Chase used to advertise proudly 'not incorporated' so that their creditors could have extra assurance. But even these concerns have converted themselves into corporate entities." Paul A. Samuelson, *Economics* (New York: McGraw-Hill, 1973), 106.

Partners' Personal Liability for Torts

Of course, a person is always liable for his own torts. All partners are also liable for any partner's tort committed in the scope of partnership business under agency law, and this liability is—again—personal and unlimited, subject to RUPA's requirement that the judgment creditor exhaust the partnership's assets before going after the separate assets of the partners. The partner who commits a tort or breach of trust must indemnify the partnership for losses paid to the third party. RUPA, Section 405(a).

Liability for Crimes

Criminal liability is generally personal to the miscreant. Nonparticipating copartners are ordinarily not liable for crimes if guilty intent is an element. When guilty intent is not an element, as in certain regulatory offenses, all partners may be guilty of an act committed by a partner in the course of the business.

Liability for Taxes

Corporate income gets taxed twice under federal law: once to the corporation and again to the shareholders who receive income as dividends. However, the partnership's income "passes through" the partnership and is distributed to the partners under the **conduit theory**⁸. When partners get income from the firm they have to pay tax on it, but the partnership pays no tax (it files an information return). This is perceived to be a significant advantage of the partnership form.

8. The theory that a business entity does not itself owe taxes on income; it only acts as a pass-through for its members to receive income.

KEY TAKEAWAY

The partnership is generally liable for any contract made by a partner with authority express, implied, or apparent. Under RUPA the firm, partners, or even nonpartners may to some extent limit their liability by filing “statements” with the appropriate state registrar; such statements only affect those who know of them, except that a notice affecting the right of a partner to sell real estate or regarding dissociation or dissolution is effective against the world after ninety days.

All partners are liable for contracts entered into and torts committed by any partner acting in or apparently in the normal course of business. This liability is personal and unlimited, joint and several (although under UPA contract liability it is only joint). Incoming partners are not liable, in contract or in tort, for activities predating their arrival, but their capital contribution is at risk. Criminal liability is generally personal unless the crime requires no intention.

EXERCISES

1. What is the partnership’s liability for contracts entered into by its partners?
2. What is the personal liability of partners for breach of a contract made by one of the partnership’s members?
3. Why would people feel more comfortable knowing that JPMorgan Bank—Morgan was at one time the richest man in the United States—was a partnership and not a corporation?
4. What is the point of RUPA’s “statements”? How can they be of use to a partner who has, for example, retired and is no longer involved in the firm?
5. Under what circumstances is the partnership liable for crimes committed by its partners?
6. How is a partnership taxed more favorably than a corporation?

41.3 Dissolution and Winding Up

LEARNING OBJECTIVES

1. Understand the dissolution of general partnerships under the Uniform Partnership Act (UPA).
2. Understand the dissociation and dissolution of general partnerships under the Revised Uniform Partnership Act (RUPA).
3. Explain the winding up of partnerships under UPA and RUPA.

It is said that a partnership is like a marriage, and that extends to its ending too. It's easier to get into a partnership than it is to get out of it because legal entanglements continue after a person is no longer a partner. The rules governing "getting out" of a partnership are different under the Revised Uniform Partnership Act (RUPA) than under the Uniform Partnership Act (UPA). We take up UPA first.

Dissolution of Partnerships under UPA

Dissolution, in the most general sense, means a separation into component parts.

Meaning of Dissolution under UPA

People in business are sometimes confused about the meaning of **dissolution**⁹. It does not mean the termination of a business. It has a precise legal definition, given in UPA Section 29: "The dissolution of a partnership is the change in the relation of the partners caused by any partner ceasing to be associated in the carrying on as distinguished from the winding up of the business." The partnership is not necessarily terminated on dissolution; rather, it continues until the winding up of partnership affairs is completed, and the remaining partners may choose to continue on as a new partnership if they want. UPA, Section 30. But, again, under UPA the partnership dissolves upon the withdrawal of any partner.

Causes of Dissolution

Partnerships can dissolve for a number of reasons. UPA, Section 31.

9. A legal severance or breaking up; under UPA the change in relations caused by a partner's withdrawal from the firm.

In Accordance with the Agreement

The term of the partnership agreement may have expired or the partnership may be at will and one of the partners desires to leave it. All the partners may decide that it is preferable to dissolve rather than to continue. One of the partners may have been expelled in accordance with a provision in the agreement. In none of these circumstances is the agreement violated, though its spirit surely might have been. Professor Samuelson calls to mind the example of William Dean Howells's Silas Lapham, who forces his partner to sell out by offering him an ultimatum: "You may buy me out or I'll buy you out." The ultimatum was given at a time when the partner could not afford to buy Lapham out, so the partner had no choice.

In Violation of the Agreement

Dissolution may also result from violation of the agreement, as when the partners decide to discharge a partner though no provision permits them to do so, or as when a partner decides to quit in violation of a term agreement. In the former case, the remaining partners are liable for damages for wrongful dissolution, and in the latter case, the withdrawing partner is liable to the remaining partners the same way.

By Operation of Law

A third reason for dissolution is the occurrence of some event, such as enactment of a statute, that makes it unlawful to continue the business. Or a partner may die or one or more partners or the entire partnership may become bankrupt. Dissolution under these circumstances is said to be by operation of law. UPA, Section 31.

By Court Order

Finally, dissolution may be by court order. Courts are empowered to dissolve partnerships when "on application by or for a partner" a partner is shown to be a lunatic, of unsound mind, incapable of performing his part of the agreement, "guilty of such conduct as tends to affect prejudicially the carrying on of the business," or otherwise behaves in such a way that "it is not reasonably practicable to carry on the business in partnership with him." A court may also order dissolution if the business can only be carried on at a loss or whenever equitable. In some circumstances, a court will order dissolution upon the application of a purchaser of a partner's interest. UPA, Section 32.

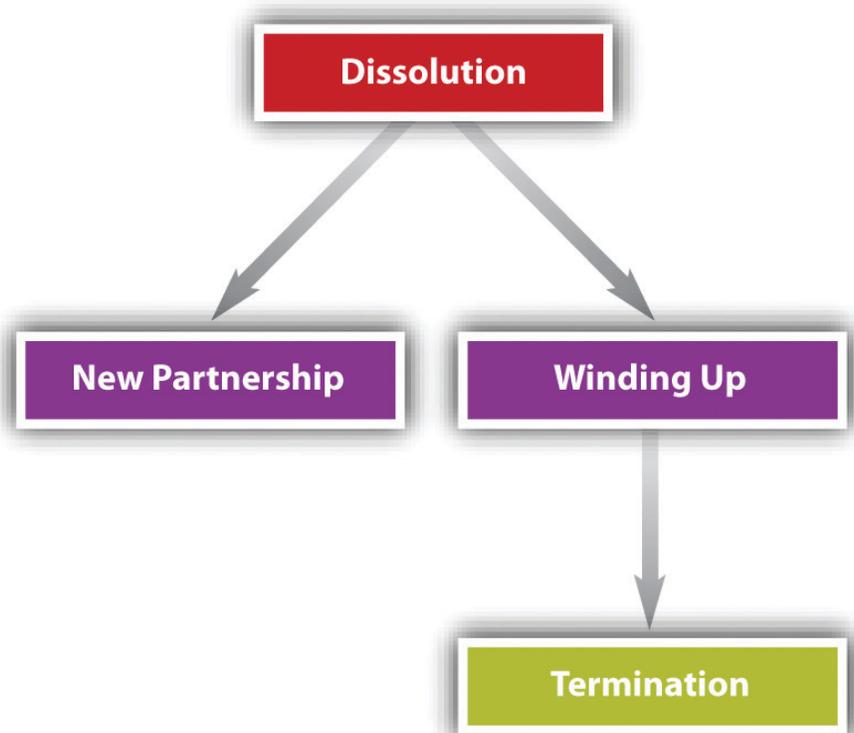

Effect of Dissolution on Authority

For the most part, dissolution terminates the authority of the partners to act for the partnership. The only significant exceptions are for acts necessary to wind up partnership affairs or to complete transactions begun but not finished at the time of dissolution. UPA, Section 33. Notwithstanding the latter exception, no partner can bind the partnership if it has dissolved because it has become unlawful to carry on the business or if the partner seeking to exercise authority has become bankrupt.

After Dissolution

After a partnership has dissolved, it can follow one of two paths. It can carry on business as a new partnership, or it can wind up the business and cease operating (see [Figure 41.2 "Alternatives Following UPA Dissolution"](#)).

Figure 41.2 Alternatives Following UPA Dissolution

Forming a New Partnership

In order to carry on the business as a new partnership, there must be an agreement—preferably as part of the original partnership agreement but maybe

only after dissolution (and maybe oral)—that upon dissolution (e.g., if a partner dies, retires, or quits) the others will regroup and carry on.

Under UPA the remaining partners have the right to carry on when (1) the dissolution was in contravention of the agreement, (2) a partner was expelled according to the partnership agreement, or (3) all partners agree to carry on. UPA, Sections 37 and 38.

Whether the former partner dies or otherwise quits the firm, the noncontinuing one or his, her, or its legal representative is entitled to an accounting and to be paid the value of the partnership interest, less damages for wrongful dissolution. UPA, Section 38. The firm may need to borrow money to pay the former partner or her estate; or, in the case of a deceased partner, the money to pay the former partner is obtained through a life insurance buyout policy.

Partnerships routinely insure the lives of the partners, who have no ownership interests in the insurance policies. The policies should bear a face amount equal to each partner's interest in the partnership and should be adjusted as the fortunes of the partnership change. Proceeds of the insurance policy are used on death to pay the purchase price of the interest inherited by the deceased's estate. If the insurance policy pays out more than the interest at stake, the partnership retains the difference. If the policy pays out less, the partnership agrees to pay the difference in installments.

Another set of issues arises when the partnership changes because an old partner departs and a new one joins. Suppose that Baker leaves the car dealership business and his interest is purchased by Alice, who is then admitted to the partnership. Assume that when Baker left, the business owed Mogul Parts Company \$5,000 and Laid Back Upholsterers \$4,000. After Baker left and Alice joined, Mogul sells another \$5,000 worth of parts to the firm on credit, and Sizzling Radiator Repair, a new creditor, advances \$3,000 worth of radiator repair parts. These circumstances pose four questions.

First, do creditors of the old partnership remain creditors of the new partnership? Yes. UPA, Section 41(1).

Second, does Baker, the old partner, remain liable to the creditors of the old partnership? Yes. UPA, Section 36(1). That could pose uncomfortable problems for Baker, who may have left the business because he lost interest in it and wished to put his money elsewhere. The last thing he wants is the threat of liability hanging over his head when he can no longer profit from the firm's operations. That is all

the more true if he had a falling out with his partners and does not trust them. The solution is given in UPA Section 36(2), which says that an old partner is discharged from liability if the creditors and the new partnership agree to discharge him.

Third, is Alice, the new partner, liable to creditors of the old partnership? Yes, but only to the extent of her capital contribution. UPA, Section 17.

Fourth, is Baker, the old partner, liable for debts incurred after his withdrawal from the partnership? Surprisingly, yes, unless Baker takes certain action toward old and new creditors. He must provide actual notice that he has withdrawn to anyone who has extended credit in the past. Once he has done so, he has no liability to these creditors for credit extended to the partnership thereafter. Of course, it would be difficult to provide notice to future creditors, since at the time of withdrawal they would not have had a relationship with the partnership. To avoid liability to new creditors who knew of the partnership, the solution required under UPA Section 35(l)(b)(II) is to advertise Baker's departure in a general circulation newspaper in the place where the partnership business was regularly carried on.

Winding Up and Termination

Because the differences between UPA's and RUPA's provisions for winding up and termination are not as significant as those between their provisions for dissolution, the discussion for winding up and termination will cover both acts at once, following the discussion of dissociation and dissolution under RUPA.

Dissociation and Dissolution of Partnerships under RUPA

Comment 1 to RUPA Section 601 is a good lead-in to this section. According to the comment, RUPA dramatically changes the law governing partnership breakups and dissolution. An entirely new concept, "dissociation," is used in lieu of UPA term "dissolution" to denote the change in the relationship caused by a partner's ceasing to be associated in the carrying on of the business. "Dissolution" is retained but with a different meaning. The entity theory of partnership provides a conceptual basis for continuing the firm itself despite a partner's withdrawal from the firm.

Under UPA, the partnership is an aggregate, a collection of individuals; upon the withdrawal of any member from the collection, the aggregate dissolves. But because RUPA conforms the partnership as an entity, there is no conceptual reason for it to dissolve upon a member's withdrawal. "Dissociation" occurs when any partner ceases to be involved in the business of the firm, and "dissolution" happens when RUPA requires the partnership to wind up and terminate; dissociation does not necessarily cause dissolution.

Dissociation

Dissociation¹⁰, as noted in the previous paragraph, is the change in relations caused by a partner's withdrawal from the firm's business.

Causes of Dissociation

Dissociation is caused in ten possible ways: (1) a partner says she wants out; (2) an event triggers dissociation as per the partnership agreement; (3) a partner is expelled as per the agreement; (4) a partner is expelled by unanimous vote of the others because it is unlawful to carry on with that partner, because that partner has transferred to a transferee all interest in the partnership (except for security purposes), or because a corporate partner's or partnership partner's existence is effectively terminated; (5) by a court order upon request by the partnership or another partner because the one expelled has been determined to have misbehaved (engaged in serious wrongful conduct, persists in abusing the agreement, acts in ways making continuing the business impracticable); (6) the partner has declared bankruptcy; (7) the partner has died or had a guardian appointed, or has been adjudicated as incompetent; (8) the partner is a trust whose assets are exhausted; (9) the partner is an estate and the estate's interest in the partnership has been entirely transferred; (10) the partner dies or, if the partner is another partnership or a corporation trust or estate, that entity's existence is terminated. RUPA, Section 601.

Effect of Dissociation

After a partner dissociates, the partner's right to participate in management terminates. (However, if the dissociation goes on to dissolution and winding up, partners who have not wrongfully caused the dissociation may participate in winding-up activities.) RUPA, Sections 603(b) and 804(a). The dissociated partner's duty of loyalty and care terminates; the former partner may compete with the firm, except for matters arising before the dissociation. RUPA, Section 603(b)(3).

When partners come and go, as they do, problems may arise. What power does the dissociated partner have to bind the partnership? What power does the partnership have to impose liability on the dissociated one? RUPA provides that the dissociated partner loses any actual authority upon dissociation, and his or her apparent authority lingers for not longer than two years if the dissociated one acts in a way that would have bound the partnership before dissociation, provided the other party (1) reasonably believed the dissociated one was a partner, (2) did not have notice of the dissociation, and (3) is not deemed to have constructive notice from a filed "statement of dissociation." RUPA, Section 603(b)(1). The dissociated partner, of course, is liable for damages to the partnership if third parties had cause to think

10. Under RUPA, the withdrawal of a partner from the firm.

she was still a partner and the partnership became liable because of that; she is liable to the firm as an unauthorized agent. RUPA, Section 702.

A partner's dissociation does nothing to change that partner's liability for predissociation obligations. RUPA, Section 703(a). For postdissociation liability, exposure is for two years if at the time of entering into the transaction the other party (1) reasonably believed the dissociated one was a partner, (2) didn't have notice of the dissociation, and (3) is not deemed to have constructive notice from a filed "statement of dissociation." For example, Baker withdraws from the firm of Able, Baker, and Carr. Able contracts with HydroLift for a new hydraulic car lift that costs \$25,000 installed. HydroLift is not aware at the time of contracting that Baker is disassociated and believes she is still a partner. A year later, the firm not having been paid, HydroLift sues Able, Baker, and Carr and the partnership. Baker has potential liability. Baker could have protected herself by filing a "statement of dissociation," or—better—the partnership agreement should provide that the firm would file such statements upon the dissociation of any partner (and if it does not, it would be liable to her for the consequences).

Dissolution

Dissociation does not necessarily cause dissolution (see the discussion later in this section of how the firm continues after a dissociation); dissolution and winding up happen only for the causes stated in RUPA Section 801, discussed in the following paragraphs.

Causes of Dissolution

There are three causes of dissolution: (1) by act of the partners—some dissociations do trigger dissolution; (2) by operation of law; or (3) by court order. The partnership agreement may change or eliminate the dissolution trigger as to (1); dissolution by the latter two means cannot be tinkered with. RUPA, Section 103.

(1) Dissolution by *act of the partners* may occur as follows:

- Any member of an **at-will partnership**¹¹ can dissociate at any time, triggering dissolution and liquidation. The partners who wish to continue the business of a **term partnership**¹², though, cannot be forced to liquidate the business by a partner who withdraws prematurely in violation of the partnership agreement. In any event, common agreement formats for dissolution will provide for built-in dispute resolution, and enlightened partners often agree to such mechanisms in advance to avoid the kinds of problems listed here.

11. A partnership with no stated term of continuation or existence.

12. A partnership with a time period for its duration expressed.

- Any partnership will dissolve upon the happening of an event the partners specified would cause dissolution in their agreement. They may change their minds, of course, agree to continue, and amend the partnership agreement accordingly.
- A term partnership may be dissolved before its term expires in three ways. First, if a partner dissociated by death, declaring bankruptcy, becoming incapacitated, or wrongfully dissociates, the partnership will dissolve if within ninety days of that triggering dissociation at least half the remaining partners express their will to wind it up. Second, the partnership may be dissolved if the term expires. Third, it may be dissolved if all the partners agree to amend the partnership agreement by expressly agreeing to dissolve.

(2) Dissolution will happen in some cases by *operation of law* if it becomes illegal to continue the business, or substantially all of it. For example, if the firm's business was the manufacture and distribution of trans fats and it became illegal to do that, the firm would dissolve. Trans fats are hydrogenated vegetable oils; the process of hydrogenation essentially turns the oils into semisolids, giving them a higher melting point and extending their shelf life but, unfortunately, also clogging consumers' arteries and causing heart disease. California banned their sale effective January 1, 2010; other jurisdictions have followed suit. This cause of dissolution is not subject to partnership agreement.

(3) *Dissolution by court order* can occur on application by a partner. A court may declare that it is, for various reasons specified in RUPA Section 801(5), no longer reasonably practicable to continue operation. Also, a court may order dissolution upon application by a transferee of a partner's transferable interest or by a purchaser at a foreclosure of a charging order if the court determines it is equitable. For example, if a creditor gets a charging order against Paul Partner and the obligation cannot reasonably be paid by the firm, a court could order dissolution so the creditor would get paid from the liquidated assets of the firm.

Effect of Dissolution

A partnership continues after dissolution only for the purpose of winding up its business. The partnership is terminated when the winding up of its business is completed. RUPA, Section 802. However, before winding up is completed, the partners—except any wrongfully dissociating—may agree to carry on the partnership, in which case it resumes business as if dissolution never happened. RUPA, Section 802(b).

Continuing after Dissociation

Dissociation, again, does not necessarily cause dissolution. In an at-will partnership, the death (including termination of an entity partner), bankruptcy, incapacity, or expulsion of a partner will not cause dissolution. RUPA, Sections 601 and 801. In a term partnership, the firm continues if, within ninety days of an event triggering dissociation, fewer than half the partners express their will to wind up. The partnership agreement may provide that RUPA's dissolution-triggering events, including dissociation, will not trigger dissolution. However, the agreement cannot change the rules that dissolution is caused by the business becoming illegal or by court order. Creditors of the partnership remain as before, and the dissociated partner is liable for partnership obligations arising before dissociation.

Section 701 of RUPA provides that if the firm continues in business after a partner dissociates, without winding up, then the partnership must purchase the dissociated partner's interest; RUPA Section 701(b) explains how to determine the buyout price. It is the amount that would have been distributed to the dissociated partner if, on the date of dissociation, the firm's assets were sold "at a price equal to the greater of the liquidation value or the value based on a sale of the entire business as a going concern," minus damages for wrongful dissociation. A wrongful dissociator may have to wait a while to get paid in full, unless a court determines that immediate payment "will not cause an undue hardship to the partnership," but the longest nonwrongful dissociators need to wait is 120 days. RUPA, Section 701(e). A dissociated partner can sue the firm to determine the buyout price and the court may assess attorney's, appraiser's, and expert's fees against a party the court finds "acted arbitrarily, vexatiously, or in bad faith." RUPA, Section 701(h)(4)(i).

Winding Up the Partnership under UPA and RUPA

If the partners decide not to continue the business upon dissolution, they are obliged to wind up the business. The partnership continues after dissolution only for the purpose of winding up its business, after which it is terminated. UPA, Section 30; RUPA, Section 802(a). **Winding up**¹³ entails concluding all unfinished business pending at the date of dissolution and payment of all debts. The partners must then settle accounts among themselves in order to distribute the remaining assets. At any time after dissolution and before winding up is completed, the partners (except a wrongfully dissociated one) can stop the process and carry on the business.

UPA and RUPA are not significantly different as to winding up, so they will be discussed together. Two issues are discussed here: who can participate in winding up and how the assets of the firm are distributed on liquidation.

13. Finishing the business at hand, settling accounts, and terminating a firm.

Who Can Participate in Winding Up

The partners who have not wrongfully dissociated may participate in winding up the partnership business. On application of any partner, a court may for good cause judicially supervise the winding up. UPA, Section 37; RUPA, Section 803(a).

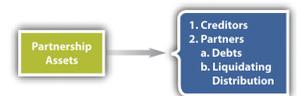

Settlement of Accounts among Partners

Determining the priority of liabilities can be problematic. For instance, debts might be incurred to both outside creditors and partners, who might have lent money to pay off certain accounts or for working capital.

An agreement can spell out the order in which liabilities are to be paid, but if it does not, UPA Section 40(a) and RUPA Section 807(1) rank them in this order: (1) to creditors other than partners, (2) to partners for liabilities other than for capital and profits, (3) to partners for capital contributions, and finally (4) to partners for their share of profits (see [Figure 41.3 "Priority Partnership Liabilities under RUPA"](#)). However, RUPA eliminates the distinction between capital and profits when the firm pays partners what is owed to them; RUPA Section 807(b) speaks simply of the right of a partner to a liquidating distribution.

Partners are entitled to share equally in the profits and surplus remaining after all liabilities, including those owed to partners, are paid off, although the partnership agreement can state a different share—for example, in proportion to capital contribution. If after winding up there is a net loss, whether capital or otherwise, each partner must contribute toward it in accordance with his share in the profits, had there been any, unless the agreement states otherwise. If any of the partners is insolvent or refuses to contribute and cannot be sued, the others must contribute their own share to pay off the liabilities and in addition must contribute, in proportion to their share of the profits, the additional amount necessary to pay the liabilities of their defaulting partners.

Figure 41.3 Priority Partnership Liabilities under RUPA

In the event of insolvency, a court may take possession of both partnership property and individual assets of the partners; this again is a big disadvantage to the partnership form.

The estate of a deceased partner is credited or liable as that partner would have been if she were living at the time of the distribution.

KEY TAKEAWAY

Under UPA, the withdrawal of any partner from the partnership causes dissolution; the withdrawal may be caused in accordance with the agreement, in violation of the agreement, by operation of law, or by court order. Dissolution terminates the partners' authority to act for the partnership, except for winding up, but remaining partners may decide to carry on as a new partnership or may decide to terminate the firm. If they continue, the old creditors remain as creditors of the new firm, the former partner remains liable for obligations incurred while she was a partner (she may be liable for debts arising after she left, unless proper notice is given to creditors), and the former partner or her estate is entitled to an accounting and payment for the partnership interest. If the partners move to terminate the firm, winding up begins.

Under RUPA, a partner who ceases to be involved in the business is dissociated, but dissociation does not necessarily cause dissolution. Dissociation happens when a partner quits, voluntarily or involuntarily; when a partner dies or becomes incompetent; or on request by the firm or a partner upon court order for a partner's wrongful conduct, among other reasons. The dissociated partner loses actual authority to bind the firm but remains liable for predissociation obligations and may have lingering authority or lingering liability for two years provided the other party thought the dissociated one was still a partner; a notice of dissociation will, after ninety days, be good against the world as to dissociation and dissolution. If the firm proceeds to termination (though partners can stop the process before its end), the next step is dissolution, which occurs by acts of partners, by operation of law, or by court order upon application by a partner if continuing the business has become untenable. After dissolution, the only business undertaken is to wind up affairs. However, the firm may continue after dissociation; it must buy out the dissociated one's interest, minus damages if the dissociation was wrongful.

If the firm is to be terminated, winding up entails finishing the business at hand, paying off creditors, and splitting the remaining surplus or liabilities according to the parties' agreement or, absent any, according to the relevant act (UPA or RUPA).

EXERCISES

1. Under UPA, what is the effect on the partnership of a partner's ceasing to be involved in the business?
2. Can a person no longer a partner be held liable for partnership obligations after her withdrawal? Can such a person incur liability to the partnership?
3. What obligation does a partnership or its partners owe to a partner who wrongfully terminates the partnership agreement?
4. What bearing does RUPA's use of the term *dissociate* have on the entity theory that informs the revised act?
5. When a partnership is wound up, who gets paid first from its assets? If the firm winds up toward termination and has inadequate assets to pay its creditors, what recourse, if any, do the creditors have?

41.4 Cases

Breach of Partnership Fiduciary Duty

Gilroy v. Conway

391 N.W. 2d 419 (Mich. App. 1986)

PETERSON, J.

Defendant cheated his partner and appeals from the trial court's judgment granting that partner a remedy.

Plaintiff was an established commercial photographer in Kalamazoo who also had a partnership interest in another photography business, Colonial Studios, in Coldwater. In 1974, defendant became plaintiff's partner in Colonial Studios, the name of which was changed to Skylight Studios. Under the partnership agreement, defendant was to be the operating manager of the partnership, in return for which he would have a guaranteed draw. Except for the guaranteed draw, the partnership was equal in ownership and the sharing of profits.

Prior to defendant's becoming a partner, the business had acquired a small contractual clientele of schools for which the business provided student portrait photographs. The partners agreed to concentrate on this type of business, and both partners solicited schools with success. Gross sales, which were \$40,000 in 1974, increased every year and amounted to \$209,085 in 1980 [about \$537,000 in 2011 dollars].

In the spring of 1981, defendant offered to buy out plaintiff and some negotiations followed. On June 25, 1981, however, plaintiff was notified by the defendant that the partnership was dissolved as of July 1, 1981. Plaintiff discovered that defendant: had closed up the partnership's place of business and opened up his own business; had purchased equipment and supplies in preparation for commencing his own business and charged them to the partnership; and had taken with him the partnership employees and most of its equipment.

Defendant had also stolen the partnership's business. He had personally taken over the business of some customers by telling them that the partnership was being dissolved; in other cases he simply took over partnership contracts without telling

the customers that he was then operating on his own. Plaintiff also learned that defendant's deceit had included the withdrawal, without plaintiff's knowledge, of partnership funds for defendant's personal use in 1978 in an amount exceeding \$11,000 [about \$36,000 in 2011 dollars].

The trial judge characterized the case as a "classic study of greed" and found that defendant had in effect appropriated the business enterprise, holding that defendant had "knowingly and willfully violated his fiduciary relationship as a partner by converting partnership assets to his use and, in doing so, literally destroying the partnership." He also found that the partnership could have been sold as a going business on June 30, 1981, and that after a full accounting, it had a value on that date of \$94,596 less accounts payable of \$17,378.85, or a net value of \$77,217.15. The division thereof after adjustments for plaintiff's positive equity or capital resulted in an award to plaintiff for his interest in the business of \$53,779.46 [about \$126,000 in 2011 dollars]....

Plaintiff also sought exemplary [punitive] damages. Count II of the complaint alleged that defendant's conduct constituted a breach of defendant's fiduciary duty to his partner under §§ 19-22 of the Uniform Partnership Act, and Count III alleged conversion of partnership property. Each count contained allegations that defendant's conduct was willful, wanton and in reckless disregard of plaintiff's rights and that such conduct had caused injury to plaintiff's feelings, including humiliation, indignity and a sense of moral outrage. The prayer for relief sought exemplary damages therefore.

Plaintiff's testimony on the point was brief. He said:

The effect of really the whole situation, and I think it was most apparent when I walked into the empty building, was extreme disappointment and really total outrage at the fact that something that I had given the utmost of my talent and creativity, energy, and whatever time was necessary to build, was totally destroyed and there was just nothing of any value that was left....My business had been stolen and there wasn't a thing that I could do about it. And to me, that was very humiliating that one day I had something that I had worked 10 years on, and the next day I had absolutely nothing of any value.

As noted above, the trial judge found that defendant had literally destroyed the partnership by knowingly and willfully converting partnership assets in violation of his fiduciary duty as a partner. He also found that plaintiff had suffered a sense of outrage, indignity and humiliation and awarded him \$10,000 [\$23,000 in 2011 dollars] as exemplary damages.

Defendant appeals from that award, asserting that plaintiff's cause of action arises from a breach of the partnership contract and that exemplary damages may not be awarded for breach of that contract....

If it were to be assumed that a partner's breach of his fiduciary duty or appropriation of partnership equipment and business contract to his own use and profit are torts, it is clear that the duty breached arises from the partnership contract. One acquires the property interest of a co-tenant in partnership only by the contractual creation of a partnership; one becomes a fiduciary in partnership only by the contractual undertaking to become a partner. There is no tortious conduct here existing independent of the breach of the partnership contract.

Neither do we see anything in the Uniform Partnership Act to suggest that an aggrieved partner is entitled to any remedy other than to be made whole economically. The act defines identically the partnership fiduciary duty and the remedy for its breach, i.e., to account:

Sec. 21. (1) Every partner must account to the partnership for any benefit, and hold as trustee for it any profits derived by him without the consent of the other partners from any transaction connected with the formation, conduct, or liquidation of the partnership or from any use by him of its property.

So, the cases involving a partner's breach of the fiduciary duty to their partners have been concerned solely with placing the wronged partners in the economic position that they would have enjoyed but for the breach.

[Judgment for plaintiff affirmed, as modified with regard to damages.]

CASE QUESTIONS

1. For what did the court award the plaintiff \$53,000?
2. The court characterizes the defendant as having “cheated his partner”—that is, Conway committed fraud. (Gilroy said his business had been “stolen.”) Fraud is a tort. Punitive damages may be awarded against a tortfeasor, even in a jurisdiction that generally disallows punitive damages in contract. In fact, punitive damages are sometimes awarded for breach of the partnership fiduciary duty. In *Cadwalader, Wickersham & Taft v. Beasley*, 728 So.2d 253 (Florida Ct. App., 1998), a New York law firm was found to have wrongfully expelled a partner lawyer, Beasley, from membership in its Palm Beach, Florida, offices. New York law controlled. The trial court awarded Beasley \$500,000 in punitive damages. The appeals court, construing the same UPA as the court construed in *Gilroy*, said:

Under New York law, the nature of the conduct which justifies an award of punitive damages is conduct having a high degree of moral culpability, or, in other words, conduct which shows a “conscious disregard of the rights of others or conduct so reckless as to amount to such disregard.”...[S]ince the purpose of punitive damages is to both punish the wrongdoer and deter others from such wrongful behavior, as a matter of policy, courts have the discretion to award punitive damages[.]...[The defendant] was participating in a clandestine plan to wrongfully expel some partners for the financial gain of other partners. Such activity cannot be said to be honorable, much less to comport with the “punctilio of an honor.” Because these findings establish that [the defendant] consciously disregarded the rights of Beasley, we affirm the award of punitive damages.

As a matter of social policy, which is the better ruling, the Michigan court’s in *Gilroy* or the Florida court’s in *Cadwalader*?

Partnership Authority, Express or Apparent

Hodge v Garrett

614 P.2d 420 (Idaho 1980)

Bistline, J.

[Plaintiff] Hodge and defendant-appellant Rex E. Voeller, the managing partner of the Pay-Ont Drive-In Theatre, signed a contract for the sale of a small parcel of land belonging to the partnership. That parcel, although adjacent to the theater, was not used in theater operations except insofar as the east 20 feet were necessary for the operation of the theater's driveway. The agreement for the sale of land stated that it was between Hodge and the Pay-Ont Drive-In Theatre, a partnership. Voeller signed the agreement for the partnership, and written changes as to the footage and price were initialed by Voeller. (The trial court found that Hodge and Voeller had orally agreed that this 20 foot strip would be encumbered by an easement for ingress and egress to the partnership lands.)

Voeller testified that he had told Hodge prior to signing that Hodge would have to present him with a plat plan which would have to be approved by the partners before the property could be sold. Hodge denied that a plat plan had ever been mentioned to him, and he testified that Voeller did not tell him that the approval of the other partners was needed until after the contract was signed. Hodge also testified that he offered to pay Voeller the full purchase price when he signed the contract, but Voeller told him that that was not necessary.

The trial court found that Voeller had actual and apparent authority to execute the contract on behalf of the partnership, and that the contract should be specifically enforced. The partners of the Pay-Ont Drive-In Theatre appeal, arguing that Voeller did not have authority to sell the property and that Hodge knew that he did not have that authority.

At common law one partner could not, "without the concurrence of his copartners, convey away the real estate of the partnership, bind his partners by a deed, or transfer the title and interest of his copartners in the firm real estate." [Citation] This rule was changed by the adoption of the Uniform Partnership Act....[citing the statute].

The meaning of these provisions was stated in one text as follows:

"If record title is in the partnership and a partner conveys in the partnership name, legal title passes. But the partnership may recover the property (except from a bona fide purchaser from the grantee) if it can show (A) that the conveying partner was not apparently carrying on business in the usual way or (B) that he had in fact no authority and the grantee had knowledge of that fact. The burden of proof with respect to authority is thus on the partnership." [Citation]

Thus this contract is enforceable if Voeller had the actual authority to sell the property, or, even if Voeller did not have such authority, the contract is still enforceable if the sale was in the usual way of carrying on the business and Hodge did not know that Voeller did not have this authority.

As to the question of actual authority, such authority must affirmatively appear, “for the authority of one partner to make and acknowledge a deed for the firm will not be presumed....” [Citation] Although such authority may be implied from the nature of the business, or from similar past transactions [Citation], nothing in the record in this case indicates that Voeller had express or implied authority to sell real property belonging to the partnership. There is no evidence that Voeller had sold property belonging to the partnership in the past, and obviously the partnership was not engaged in the business of buying and selling real estate.

The next question, since actual authority has not been shown, is whether Voeller was conducting the partnership business in the usual way in selling this parcel of land such that the contract is binding under [the relevant section of the statute] i.e., whether Voeller had apparent authority. Here the evidence showed, and the trial court found:

1. “That the defendant, Rex E. Voeller, was one of the original partners of the Pay-On Drive In Theatre; that the other defendants obtained their partnership interest by inheritance upon the death of other original partners; that upon the death of a partner the partnership affairs were not wound up, but instead, the partnership merely continued as before, with the heirs of the deceased partner owning their proportionate share of the partnership interest.
2. “That at the inception of the partnership, and at all times thereafter, Rex E. Voeller was the exclusive, managing partner of the partnership and had the full authority to make all decisions pertaining to the partnership affairs, including paying the bills, preparing profit and loss statements, income tax returns and the ordering of any goods or services necessary to the operation of the business.”

The court made no finding that it was customary for Voeller to sell real property, or even personal property, belonging to the partnership. Nor was there any evidence to this effect. Nor did the court discuss whether it was in the usual course of business for the managing partner of a theater to sell real property. Yet the trial court found that Voeller had apparent authority to sell the property. From this it must be inferred that the trial court believed it to be in the usual course of business for a partner who has exclusive control of the partnership business to sell real property belonging to the partnership, where that property is not being used in the

partnership business. We cannot agree with this conclusion. For a theater, “carrying on in the usual way the business of the partnership,” [Citation to relevant section of the statute] means running the operations of the theater; it does not mean selling a parcel of property adjacent to the theater. Here the contract of sale stated that the land belonged to the partnership, and, even if Hodge believed that Voeller as the exclusive manager had authority to transact all business for the firm, Voeller still could not bind the partnership through a unilateral act which was not in the usual business of the partnership. We therefore hold that the trial court erred in holding that this contract was binding on the partnership.

Judgment reversed. Costs to appellant.

CASE QUESTIONS

1. What was the argument that Voeller had actual authority? What did the court on appeal say about that argument?
2. What was the argument that Voeller had apparent authority? What did the court on appeal say about that argument? To rephrase the question, what facts would have been necessary to confer on Voeller apparent authority?

Partnership Bound by Contracts Made by a Partner on Its Behalf; Partners’ Duties to Each Other; Winding Up

Long v. Lopez

115 S.W.3d 221 (Texas App. 2003)

Holman, J.

Wayne A. Long [plaintiff at the trial court] sued Appellee Sergio Lopez to recover from him, jointly and severally, his portion of a partnership debt that Long had paid. After a bench trial, the trial court ruled that Long take nothing from Appellee. We reverse and render, and remand for calculation of attorney’s fees in this suit and pre- and post-judgment interest.

Long testified that in September 1996, Long, Lopez, and Don Bannister entered into an oral partnership agreement in which they agreed to be partners in Wood Relo (“the partnership”), a trucking business located in Gainesville, Texas. Wood Relo

located loads for and dispatched approximately twenty trucks it leased from owner-operators....

The trial court found that Long, Lopez, and Bannister formed a partnership, Wood Relo, without a written partnership agreement. Lopez does not contest these findings.

Long testified that to properly conduct the partnership's business, he entered into an office equipment lease with IKON Capital Corporation ("IKON") on behalf of the partnership. The lease was a thirty-month contract under which the partnership leased a telephone system, fax machine, and photocopier at a rate of \$577.91 per month. The lease agreement was between IKON and Wood Relo; the "authorized signer" was listed as Wayne Long, who also signed as personal guarantor.

Long stated that all three partners were authorized to buy equipment for use by the partnership. He testified that the partners had agreed that it was necessary for the partnership to lease the equipment and that on the day the equipment was delivered to Wood Relo's office, Long was the only partner at the office; therefore, Long was the only one available to sign the lease and personal guaranty that IKON required. [The partnership disintegrated when Bannister left and he later filed for bankruptcy.]...Long testified that when Bannister left Wood Relo, the partnership still had "quite a few" debts to pay, including the IKON lease....

Eventually, IKON did repossess all the leased equipment. Long testified that he received a demand letter from IKON, requesting payment by Wood Relo of overdue lease payments and accelerating payment of the remaining balance of the lease. IKON sought recovery of past due payments in the amount of \$2,889.55 and accelerated future lease payments in the amount of \$11,558.20, for a total of \$14,447.75, plus interest, costs, and attorney's fees, with the total exceeding \$16,000. Long testified that he advised Lopez that he had received the demand letter from IKON.

Ultimately, IKON filed a lawsuit against Long individually and d/b/a Wood Relo, but did not name Lopez or Bannister as parties to the suit. Through his counsel, Long negotiated a settlement with IKON for a total of \$9,000. An agreed judgment was entered in conjunction with the settlement agreement providing that if Long did not pay the settlement, Wood Relo and Long would owe IKON \$12,000.

After settling the IKON lawsuit, Long's counsel sent a letter to Lopez and Bannister regarding the settlement agreement, advising them that they were jointly and

severally liable for the \$9,000 that extinguished the partnership's debt to IKON, plus attorney's fees....

The trial court determined that Long was not entitled to reimbursement from Lopez because Long was not acting for the partnership when he settled IKON's claim against the partnership. The court based its conclusion on the fact that Long had no "apparent authority with respect to lawsuits" and had not notified Lopez of the IKON lawsuit.

Analysis

To the extent that a partnership agreement does not otherwise specify, the provisions of the Texas Revised Partnership Act govern the relations of the partners and between the partners and the partnership. [Citations] Under the Act, each partner has equal rights in the management and conduct of the business of a partnership. With certain inapplicable exceptions, all partners are liable jointly and severally for all debts and obligations of the partnership unless otherwise agreed by the claimant or provided by law. A partnership may be sued and may defend itself in its partnership name. Each partner is an agent of the partnership for the purpose of its business; unless the partner does not have authority to act for the partnership in a particular matter and the person with whom the partner is dealing knows that the partner lacks authority, an act of a partner, including the execution of an instrument in the partnership name, binds the partnership if "the act is for apparently carrying on in the ordinary course: (1) the partnership business." [Citation] If the act of a partner is not apparently for carrying on the partnership business, an act of a partner binds the partnership only if authorized by the other partners. [Citation]

The extent of authority of a partner is determined essentially by the same principles as those measuring the scope of the authority of an agent. [Citation] As a general rule, each partner is an agent of the partnership and is empowered to bind the partnership in the normal conduct of its business. [Citation] Generally, an agent's authority is presumed to be coextensive with the business entrusted to his care. [Citations] An agent is limited in his authority to such contracts and acts as are incident to the management of the particular business with which he is entrusted. [Citation]

Winding Up the Partnership

A partner's duty of care to the partnership and the other partners is to act in the conduct and winding up of the partnership business with the care an ordinarily prudent person would exercise in similar circumstances. [Citation] During the

winding up of a partnership's business, a partner's fiduciary duty to the other partners and the partnership is limited to matters relating to the winding up of the partnership's affairs. [Citation]

Long testified that he entered into the settlement agreement with IKON to save the partnership a substantial amount of money. IKON's petition sought over \$16,000 from the partnership, and the settlement agreement was for \$9,000; therefore, Long settled IKON's claim for 43% less than the amount for which IKON sued the partnership.

Both Long and Lopez testified that the partnership "fell apart," "virtually was dead," and had to move elsewhere....The inability of the partnership to continue its trucking business was an event requiring the partners to wind up the affairs of the partnership. See [Citation]...

The Act provides that a partner winding up a partnership's business is authorized, to the extent appropriate for winding up, to perform the following in the name of and for and on behalf of the partnership:

- (1) prosecute and defend civil, criminal, or administrative suits;
- (2) settle and close the partnership's business;
- (3) dispose of and convey the partnership's property;
- (4) satisfy or provide for the satisfaction of the partnership's liabilities;
- (5) distribute to the partners any remaining property of the partnership; and
- (6) perform any other necessary act. [Citation]

Long accrued the IKON debt on behalf of the partnership when he secured the office equipment for partnership operations, and he testified that he entered into the settlement with IKON when the partnership was in its final stages and the partners were going their separate ways. Accordingly, Long was authorized by the Act to settle the IKON lawsuit on behalf of the partnership....

Lopez's Liability for the IKON Debt

If a partner reasonably incurs a liability in excess of the amount he agreed to contribute in properly conducting the business of the partnership or for preserving the partnership's business or property, he is entitled to be repaid by the partnership for that excess amount. [Citation] A partner may sue another partner for reimbursement if the partner has made such an excessive payment. [Citation]

With two exceptions not applicable to the facts of this case, all partners are liable jointly and severally for all debts and obligations of the partnership unless otherwise agreed by the claimant or provided by law. Because Wood Relo was sued for a partnership debt made in the proper conduct of the partnership business, and Long settled this claim in the course of winding up the partnership, he could maintain an action against Lopez for reimbursement of Long's disproportionate payment. [Citations]

Attorneys' Fees

Long sought to recover the attorney's fees expended in defending the IKON claim, and attorney's fees expended in the instant suit against Lopez. Testimony established that it was necessary for Long to employ an attorney to defend the action brought against the partnership by IKON; therefore, the attorney's fees related to defending the IKON lawsuit on behalf of Wood Relo are a partnership debt for which Lopez is jointly and severally liable. As such, Long is entitled to recover from Lopez one-half of the attorney's fees attributable to the IKON lawsuit. The evidence established that reasonable and necessary attorney's fees to defend the IKON lawsuit were \$1725. Therefore, Long is entitled to recover from Lopez \$862.50.

Long also seeks to recover the attorney's fees expended pursuing the instant lawsuit. See [Texas statute citation] (authorizing recovery of attorney's fees in successful suit under an oral contract); see also [Citation] (holding attorney's fees are recoverable by partner under because action against other partner was founded on partnership agreement, which was a contract). We agree that Long is entitled to recover reasonable and necessary attorney's fees incurred in bringing the instant lawsuit. Because we are remanding this case so the trial court can determine the amount of pre- and post-judgment interest to be awarded to Long, we also remand to the trial court the issue of the amount of attorney's fees due to Long in pursuing this lawsuit against Lopez for collection of the amount paid to IKON on behalf of the partnership.

Conclusion

We hold the trial court erred in determining that Long did not have authority to act for Wood Relo in defending, settling, and paying the partnership debt owed by Wood Relo to IKON. Lopez is jointly and severally liable to IKON for \$9,000, which represents the amount Long paid IKON to defend and extinguish the partnership debt. We hold that Lopez is jointly and severally liable to Long for \$1725, which represents the amount of attorney's fees Long paid to defend against the IKON claim. We further hold that Long is entitled to recover from Lopez reasonable and necessary attorney's fees in pursuing the instant lawsuit.

We reverse the judgment of the trial court. We render judgment that Lopez owes Long \$5362.50 (one-half of the partnership debt to IKON plus one-half of the corresponding attorney's fees). We remand the case to the trial court for calculation of the amount of attorney's fees owed by Lopez to Long in the instant lawsuit, and calculation of pre- and post-judgment interest.

CASE QUESTIONS

1. Why did the trial court determine that Lopez owed Long nothing?
2. Absent a written partnership agreement, what rules control the operation and winding up of the partnership?
3. Why did the appeals court determine that Long did have authority to settle the lawsuit with IKON?
4. Lopez was not named by IKON when it sued Long and the partnership. Why did the court determine that did not matter, that Lopez was still liable for one-half the costs of settling that case?
5. Why was Long awarded compensation for the attorneys' fees expended in dealing with the IKON matter and in bringing this case?

Dissolution under RUPA

Horizon/CMS Healthcare Corp. v. Southern Oaks Health Care, Inc.

732 So.2d 1156 (Fla. App. 1999)

Goshorn, J.

Horizon is a large, publicly traded provider of both nursing home facilities and management for nursing home facilities. It wanted to expand into Osceola County

in 1993. Southern Oaks was already operating in Osceola County[.]...Horizon and Southern Oaks decided to form a partnership to own the proposed [new] facility, which was ultimately named Royal Oaks, and agreed that Horizon would manage both the Southern Oaks facility and the new Royal Oaks facility. To that end, Southern Oaks and Horizon entered into several partnership and management contracts in 1993.

In 1996, Southern Oaks filed suit alleging numerous defaults and breaches of the twenty-year agreements....[T]he trial court found largely in favor of Southern Oaks, concluding that Horizon breached its obligations under two different partnership agreements [and that] Horizon had breached several management contracts. Thereafter, the court ordered that the partnerships be dissolved, finding that “the parties to the various agreements which are the subject of this lawsuit are now incapable of continuing to operate in business together” and that because it was dissolving the partnerships, “there is no entitlement to future damages....” In its cross appeal, Southern Oaks asserts that because Horizon unilaterally and wrongfully sought dissolution of the partnerships, Southern Oaks should receive a damage award for the loss of the partnerships’ seventeen remaining years’ worth of future profits. We reject its argument.

Southern Oaks argues Horizon wrongfully caused the dissolution because the basis for dissolution cited by the court is not one of the grounds for which the parties contracted. The pertinent contracts provided in section 7.3 “Causes of Dissolution”: “In addition to the causes for dissolution set forth in Section 7.2(c), the Partnership shall be dissolved in the event that:...(d) upon thirty (30) days prior written notice to the other Partner, either Partner elects to dissolve the Partnership on account of an Irreconcilable Difference which arises and cannot, after good faith efforts, be resolved....”

Southern Oaks argues that what Horizon relied on at trial as showing irreconcilable differences—the decisions of how profits were to be determined and divided—were not “good faith differences of opinion,” nor did they have “a material and adverse impact on the conduct of the Partnerships’ Business.” Horizon’s refusal to pay Southern Oaks according to the terms of the contracts was not an “irreconcilable difference” as defined by the contract, Southern Oaks asserts, pointing out that Horizon’s acts were held to be breaches of the contracts. Because there was no contract basis for dissolution, Horizon’s assertion of dissolution was wrongful, Southern Oaks concludes.

Southern Oaks contends further that not only were there no contractual grounds for dissolution, dissolution was also wrongful under the Florida Statutes. Southern Oaks argues that pursuant to section [of that statute] Horizon had the power to

dissociate from the partnership, but, in the absence of contract grounds for the dissociation, Horizon wrongfully dissociated. It asserts that it is entitled to lost future profits under Florida's partnership law....

We find Southern Oaks' argument without merit. First, the trial court's finding that the parties are incapable of continuing to operate in business together is a finding of "irreconcilable differences," a permissible reason for dissolving the partnerships under the express terms of the partnership agreements. Thus, dissolution was not "wrongful," assuming there can be "wrongful" dissolutions, and Southern Oaks was not entitled to damages for lost future profits. Additionally, the partnership contracts also permit dissolution by "judicial decree." Although neither party cites this provision, it appears that pursuant thereto, the parties agreed that dissolution would be proper if done by a trial court for whatever reason the court found sufficient to warrant dissolution.

Second, even assuming the partnership was dissolved for a reason not provided for in the partnership agreements, damages were properly denied. Under RUPA, it is clear that wrongful *dissociation* triggers liability for lost future profits. *See* [RUPA:] "A partner who wrongfully dissociates is liable to the partnership and to the other partners for damages caused by the dissociation. The liability is in addition to any other obligation of the partner to the partnership or to the other partners." However, RUPA does *not* contain a similar provision for dissolution; RUPA does not refer to the dissolutions as rightful or wrongful. [RUPA sets out] "Events causing dissolution and winding up of partnership business," [and] outlines the events causing dissolution without any provision for liability for damages....[RUPA] recognizes judicial dissolution:

A partnership is dissolved, and its business must be wound up, only upon the occurrence of any of the following events:...

(5) On application by a partner, a judicial determination that:

(a) The economic purpose of the partnership is likely to be unreasonably frustrated;

(b) Another partner has engaged in conduct relating to the partnership business which makes it not reasonably practicable to carry on the business in partnership with such partner; or

(c) It is not otherwise reasonably practicable to carry on the partnership business in conformity with the partnership agreement[.]...

Paragraph (5)(c) provides the basis for the trial court's dissolution in this case. While "reasonably practicable" is not defined in RUPA, the term is broad enough to encompass the inability of partners to continue working together, which is what the court found.

Certainly the law predating RUPA allowed for recovery of lost profits upon the wrongful dissolution of a partnership. *See e.g.*, [Citation]: "A partner who assumes to dissolve the partnership before the end of the term agreed on in the partnership articles is liable, in an action at law against him by his co-partner for the breach of the agreement, to respond in damages for the value of the profits which the plaintiff would otherwise have received."

However, RUPA brought significant changes to partnership law, among which was the adoption of the term "dissociation." Although the term is undefined in RUPA, dissociation appears to have taken the place of "dissolution" as that word was used pre-RUPA. "Dissolution" under RUPA has a different meaning, although the term is undefined in RUPA. It follows that the pre-RUPA cases providing for future damages upon wrongful dissolution are no longer applicable to a partnership dissolution. In other words a "wrongful dissolution" referred to in the pre-RUPA case law is now, under RUPA, known as "wrongful dissociation." Simply stated, under [RUPA], only when a partner *dissociates* and the dissociation is wrongful can the remaining partners sue for damages. When a partnership is *dissolved*, RUPA...provides the parameters of liability of the partners upon dissolution....

[Citation]: "Dissociation is not a condition precedent to dissolution....Most dissolution events are dissociations. On the other hand, it is not necessary to have a dissociation to cause a dissolution and winding up."

Southern Oaks' attempt to bring the instant dissolution under the statute applicable to dissociation is rejected. The trial court ordered dissolution of the partnership, not the dissociation of Horizon for wrongful conduct. There no longer appears to be "wrongful" dissolution—either dissolution is provided for by contract or statute or the dissolution was improper and the dissolution order should be reversed. In the instant case, because the dissolution either came within the terms of the partnership agreements or [RUPA] (judicial dissolution where it is not reasonably practicable to carry on the partnership business), Southern Oaks' claim for lost future profits is without merit. Affirmed.

CASE QUESTIONS

1. Under RUPA, what is a dissociation? What is a dissolution?
2. Why did Southern Oaks claim there was no contractual basis for dissolution, notwithstanding the determination that Horizon had breached the partnership agreement and the management contract?
3. Given those findings, what did Southern Oaks *not* get at the lower-court trial that it wanted on this appeal?
4. Why didn't Southern Oaks get what it wanted on this appeal?

41.5 Summary and Exercises

Summary

Most of the Uniform Partnership Act (UPA) and Revised Uniform Partnership Act (RUPA) rules apply only in the absence of agreement among the partners. Under both, unless the agreement states otherwise, partners have certain duties: (1) the duty to serve—that is, to devote themselves to the work of the partnership; (2) the duty of loyalty, which is informed by the fiduciary standard: the obligation to act always in the best interest of the partnership and not in one's own best interest; (3) the duty of care—that is, to act as a reasonably prudent partner would; (4) the duty of obedience not to breach any aspect of the agreement or act without authority; (5) the duty to inform copartners; and (6) the duty to account to the partnership. Ordinarily, partners operate through majority vote, but no act that contravenes the partnership agreement itself can be undertaken without unanimous consent.

Partners' rights include rights (1) to distributions of money, including profits (and losses) as per the agreement or equally, indemnification, and return of capital contribution (but not a right to compensation); (2) to management as per the agreement or equally; (3) to choose copartners; (4) to property of the partnership, but no partner has any rights to specific property (under UPA the partners own property as tenants in partnership; under RUPA the partnership as entity owns property, but it will be distributed upon liquidation); (5) to assign (voluntarily or involuntarily) the partnership interest; the assignee does not become a partner or have any management rights, but a judgment creditor may obtain a charging order against the partnership; and (6) to enforce duties and rights by suits in law or equity (under RUPA a formal accounting is not required).

Under UPA, a change in the relation of the partners dissolves the partnership but does not necessarily wind up the business. Dissolution may be voluntary, by violation of the agreement, by operation of law, or by court order. Dissolution terminates the authority of the partners to act for the partnership. After dissolution, a new partnership may be formed.

Under RUPA, a change in the relation of the partners is a dissociation, leaving the remaining partners with two options: continue on; or wind up, dissolve, and terminate. In most cases, a partnership may buy out the interest of a partner who leaves without dissolving the partnership. A term partnership also will not dissolve so long as at least one-half of the partners choose to remain. When a partner's dissociation triggers dissolution, partners are allowed to vote subsequently to continue the partnership.

When a dissolved partnership is carried on as a new one, creditors of the old partnership remain creditors of the new one. A former partner remains liable to the creditors of the former partnership. A new partner is liable to the creditors of the former partnership, but only to the extent of the new partner's capital contribution. A former partner remains liable for debts incurred after his withdrawal unless he gives proper notice of his withdrawal; his actual authority terminates upon dissociation and apparent authority after two years.

If the firm is to be terminated, it is wound up. The assets of the partnership include all required contributions of partners, and from the assets liabilities are paid off (1) to creditors and (2) to partners on their accounts. Under RUPA, nonpartnership creditors share equally with unsatisfied partnership creditors in the personal assets of their debtor-partners.

EXERCISES

1. Anne and Barbara form a partnership. Their agreement specifies that Anne will receive two-thirds of the profit and Barbara will get one-third. The firm suffers a loss of \$3,000 the first year. How are the losses divided?
2. Two lawyers, Glenwood and Higgins, formed a partnership. Glenwood failed to file Client's paperwork on time in a case, with adverse financial consequences to Client. Is Higgins liable for Glenwood's malpractice?
3. When Client in Exercise 2 visited the firm's offices to demand compensation from Glenwood, the two got into an argument. Glenwood became very agitated; in an apparent state of rage, he threw a law book at Client, breaking her nose. Is Higgins liable?
4. Assume Glenwood from Exercise 2 entered into a contract on behalf of the firm to buy five computer games. Is Higgins liable?
5. Grosberg and Goldman operated the Chatham Fox Hills Shopping Center as partners. They agreed that Goldman would deposit the tenants' rental checks in an account in Grosberg's name at First Bank. Without Grosberg's knowledge or permission, Goldman opened an account in both their names at Second Bank, into which Goldman deposited checks payable to the firm or the partners. He indorsed each check by signing the name of the partnership or the partners. Subsequently, Goldman embezzled over \$100,000 of the funds. Second Bank did not know Grosberg and Goldman were partners. Grosberg then sued Second Bank for converting the funds by accepting checks on which Grosberg's or the partnership's indorsement was forged. Is Second Bank liable? Discuss.
6. Pearson Collings, a partner in a criminal defense consulting firm, used the firm's phones and computers to operate a side business cleaning carpets. The partnership received no compensation for the use of its equipment. What claim would the other partners have against Collings?
7. Follis, Graham, and Hawthorne have a general partnership, each agreeing to split losses 20 percent, 20 percent, and 60 percent, respectively. While on partnership business, Follis negligently crashes into a victim, causing \$100,000 in damages. Follis declares bankruptcy, and the firm's assets are inadequate to pay the damages. Graham says she is liable for only \$20,000 of the obligation, as per the agreement. Is she correct?
8. Ingersoll and Jackson are partners; Kelly, after much negotiation, agreed to join the firm effective February 1. But on January 15, Kelly changed his mind. Meanwhile, however, the other two had already arranged for the local newspaper to run a notice that Kelly was joining the firm. The notice ran on February 1. Kelly did nothing in response. On February 2, Creditor, having seen the newspaper notice, extended credit to the firm.

When the firm did not pay, Creditor sought to have Kelly held liable as a partner. Is Kelly liable?

SELF-TEST QUESTIONS

1. Under UPA, a partner is generally entitled to a formal accounting of partnership affairs
 - a. whenever it is just and reasonable
 - b. if a partner is wrongfully excluded from the business by copartners
 - c. if the right exists in the partnership agreement
 - d. all of the above

2. Donners, Inc., a partner in CDE Partnership, applies to Bank to secure a loan and assigns to Bank its partnership interest. After the assignment, which is true?
 - a. Bank steps into Donners's shoes as a partner.
 - b. Bank does not become a partner but has the right to participate in the management of the firm to protect its security interest until the loan is paid.
 - c. Bank is entitled to Donners's share of the firm's profits.
 - d. Bank is liable for Donners's share of the firm's losses.
 - e. None of these is true.

3. Which of these requires unanimous consent of the partners in a general partnership?
 - a. the assignment of a partnership interest
 - b. the acquisition of a partnership debt
 - c. agreement to be responsible for the tort of one copartner
 - d. admission of a new partner
 - e. agreement that the partnership should stand as a surety for a third party's obligation

4. Paul Partner (1) bought a computer and charged it to the partnership's account; (2) cashed a firm check and used the money to buy a computer in his own name; (3) brought from home a computer and used it at the office. In which scenario does the computer become partnership property?
 - a. 1 only

- b. 1 and 2
 - c. 1, 2, and 3
5. That partnerships are entities under RUPA means they have to pay federal income tax in their own name.
- a. true
 - b. false
6. That partnerships are entities under RUPA means the partners are not personally liable for the firm's debts beyond their capital contributions.
- a. true
 - b. false

SELF-TEST ANSWERS

- 1. d
- 2. c
- 3. d
- 4. b
- 5. a
- 6. b

Chapter 42

Hybrid Business Forms

LEARNING OBJECTIVES

After reading this chapter, you should understand the following:

1. The limited partnership
2. The limited liability company
3. Other hybrid business forms: the sub-S corporation, limited liability partnerships, and limited liability limited partnerships

This chapter provides a bridge between the partnership and the corporate form. It explores several types of associations that are hybrid forms—that is, they share some aspects of partnerships and some of corporations. Corporations afford the inestimable benefit of limited liability, partnerships the inestimable benefit of limited taxation. Businesspeople always seek to limit their risk and their taxation.

At base, whether to allow businesspeople and investors to grasp the holy grail of limited liability is a political issue. When we say a person is “irresponsible,” it means he (or she, or it) does not take responsibility for his harmful actions; the loss is borne by others. Politically speaking, there is an incentive to allow businesspeople insulation from liability: it encourages them to take risks and invest, thus stimulating economic activity and forestalling unemployment. So the political trade-off with allowing various inventive forms of business organization is between providing business actors with the security that they will lose only their calculable investment, thus stimulating the economy, versus the “moral hazard” of allowing them to emerge mostly unscathed from their own harmful or foolish activities, thus externalizing resulting losses upon others. Some people feel that during the run-up to the “Great Recession” of 2007–09, the economic system allowed too much risk taking. When the risky investments collapsed, though, instead of forcing the risk takers to suffer loss, the government intervened—it “bailed them out,” as they say, putting the consequences of the failed risks on the taxpayer.

The risk-averseness and inventiveness of businesspeople is seemingly unlimited, as is investors’ urge to make profits through others’ efforts with as little risk as possible. The rationale for the invention of these hybrid business forms, then, is (1)

risk reduction and (2) tax reduction. Here we take up the most common hybrid types first: limited partnerships and limited liability companies. Then we cover them in the approximate chronological order of their invention: sub-S corporations, limited liability partnerships, and limited liability limited partnerships. All these forms are entities.

42.1 Limited Partnerships

LEARNING OBJECTIVES

Understand the following aspects of the limited partnership:

1. Governing law and definition
2. Creation and capitalization
3. Control and compensation
4. Liabilities
5. Taxation
6. Termination

Governing Law and Definition

The limited partnership is attractive because of its treatment of taxation and its imposition of limited liability on its limited partners.

Governing Law

The original source of limited partnership law is the Uniform Limited Partnership Act (ULPA), which was drafted in 1916. A revised version, the Revised Uniform Limited Partnership Act (RULPA), was adopted by the National Conference of Commissioners on Uniform Laws in 1976 and further amended in 1985 and in 2001.

The 2001 act was

drafted for a world in which limited liability partnerships and limited liability companies can meet many of the needs formerly met by limited partnerships. This Act therefore targets two types of enterprises that seem largely beyond the scope of LLPs and LLCs: (i) sophisticated, manager-entrenched commercial deals whose participants commit for the long term, and (ii) estate planning arrangements (family limited partnerships). The Act accordingly assumes that, more often than not, people utilizing it will want (1) strong centralized management, strongly entrenched, and (2) passive investors with little control over or right to exit the entity. The Act's rules, and particularly its default rules, have been designed to reflect these assumptions. "Uniform Limited Partnership Act (2001), Prefatory Note," NCCUSL Archives, <http://www.law.upenn.edu/bll/archives/ulc/ulpa/final2001.pdf>.

All states except Louisiana adopted the 1976 or 1985 act—most opting for the 1985 version—and sixteen states have adopted the 2001 version. The acts may be properly referred to with a hyphen: “ULPA-1985,” or “ULPA-2001”; the word *revised* has been dropped. Here, we mainly discuss ULPA-1985. The Uniform Partnership Act (UPA) or the Revised Uniform Partnership Act (RUPA) also applies to limited partnerships except where it is inconsistent with the limited partnership statutes. The ULPA-2001 is not so much related to UPA or RUPA as previous versions were.

Definition

A **limited partnership**¹ (LP) is defined as “a partnership formed by two or more persons under the laws of a State and having one or more general partners and one or more limited partners.” ULPA, Section 102(11). The form tends to be attractive in business situations that focus on a single or limited-term project, such as making a movie or developing real estate; it is also widely used by private equity firms.

Creation and Capitalization

Unlike a general partnership, a limited partnership is created in accordance with the state statute authorizing it. There are two categories of partners: limited and general. The limited partners capitalize the business and the general partners run it.

Creation

The act requires that the firm’s promoters file a **certificate of limited partnership**² with the secretary of state; if they do not, or if the certificate is substantially defective, a general partnership is created. The certificate must be signed by all general partners. It must include the name of the limited partnership (which must include the words *limited partnership* so the world knows there are owners of the firm who are not liable beyond their contribution) and the names and business addresses of the general partners. If there are any changes in the general partners, the certificate must be amended. The general partner may be, and often is, a corporation. Having a general partner be a corporation achieves the goal of limited liability for everyone, but it is somewhat of a “clunky” arrangement. That problem is obviated in the limited liability company, discussed in [Section 42.2 “Limited Liability Companies”](#). Here is an example of a limited partnership operating agreement: <http://www.wyopa.com/Articles%20of%20limited%20partnership.htm>.

Any natural person, partnership, limited partnership (domestic or foreign), trust, estate, association, or corporation may become a partner of a limited partnership.

1. A partnership formed by two or more persons under state law and having one or more general partners and one or more limited partners.
2. The document filed with the appropriate state authority that, when approved, marks the legal existence of the limited partnership.

Capitalization

The money to capitalize the business typically comes mostly from the **limited partners**³, who may themselves be partnerships or corporations. That is, the limited partners use the business as an investment device: they hope the managers of the firm (the general partners) will take their contributions and give them a positive return on it. The contributions may be money, services, or property, or promises to make such contributions in the future.

Control and Compensation

Control

Control is *not* generally shared by both classes of partners.

General Partners

The control of the limited partnership is in the hands of the general partners, which may—as noted—be partnerships or corporations.

Limited Partners

Under ULPA-1985 and its predecessors, a limited partner who exercised any significant control would incur liability like a general partner as to third parties who believed she was one (the “control rule”). However, among the things a limited partner could do that would *not* risk the loss of insulation from personal liability were these “safe harbors”:

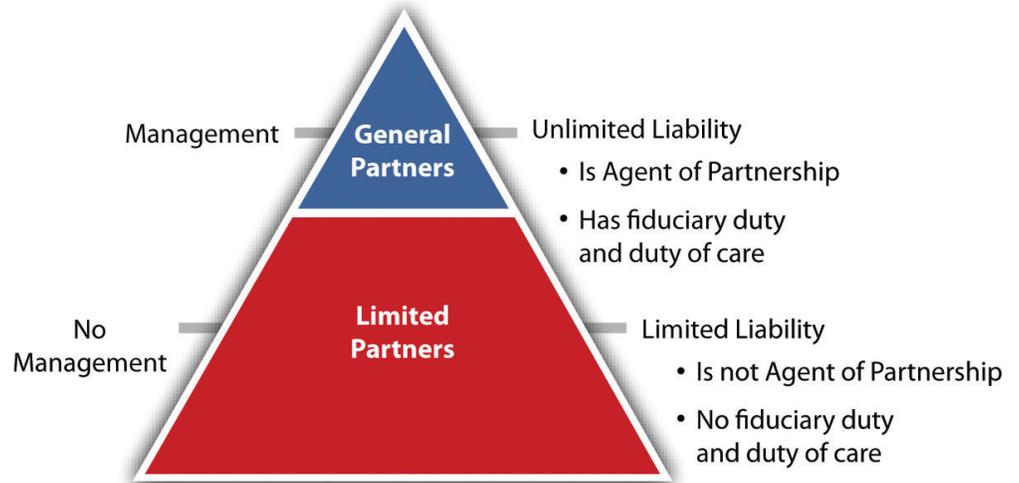

- Acting as an agent, employee, or contractor for the firm; or being an officer, director, or shareholder of a corporate general partner
- Consulting with the general partner of the firm
- Requesting or attending a meeting of partners
- Being a surety for the firm
- Voting on amendments to the agreement, on dissolution or winding up the partnership, on loans to the partnership, on a change in its nature of business, on removing or admitting a general or limited partner

However, see [Section 42.3.3 "Limited Liability Limited Partnerships"](#) for how this “control rule” has been abolished under ULPA-2001.

3. A member of a limited partnership who is not involved in running the firm but rather stands as a passive investor.

General partners owe fiduciary duties to other general partners, the firm, and the limited partners; limited partners who do not exercise control do not owe fiduciary duties. See [Figure 42.1 "The Limited Partnership under ULPA-1985"](#).

Figure 42.1 *The Limited Partnership under ULPA-1985*

The partnership agreement may specify which general or limited partners have the right to vote on any matter, but if the agreement grants limited partners voting rights beyond the “safe harbor,” a court may abolish that partner’s limited liability.

Assignment of Partnership Rights

Limited partnership interests may be assigned in whole or in part; if in whole, the assignor ceases to be a partner unless otherwise agreed. An assignment is usually made as security for a loan. The assignee becomes a new limited partner only if all the others consent or if provided for in the certificate; the assignment does not cause dissolution. The happy ease with which a limited partner can divest himself of the partnership interest makes the investment in the firm here more like that in a corporation than in a general partnership.

Inspection of Books

Limited partners have the right to inspect the firm’s books and records, they may own competing interests, they may be creditors of the firm, and they may bring derivative suits on the firm’s behalf. They may not withdraw their capital contribution if that would impair creditors’ rights.

Addition of New Partners

Unless the partnership agreement provides otherwise (it usually does), the admission of additional limited partners requires the written consent of all. A general partner may withdraw at any time with written notice; if withdrawal is a violation of the agreement, the limited partnership has a right to claim of damages. A limited partner can withdraw any time after six months' notice to each general partner, and the withdrawing partner is entitled to any distribution as per the agreement or, if none, to the fair value of the interest based on the right to share in distributions.

Compensation

We noted in discussing partnerships that the partners are not entitled to "compensation," that is, payment for their work; they are entitled to a share of the profits. For limited partnerships, the rule is a bit different.

General Partners

Often, general partners are paid for their management work on a sliding scale, receiving a greater share of each dollar of cash flow as the limited partners' cash distributions rise, thus giving the general partner an incentive to increase limited-partner distributions.

Limited Partners

Profits or losses are shared as agreed in the certificate or, if there is no agreement, in accordance with the percentages of capital contributions made.

Liabilities

Liability is not shared.

General Partners

The general partners are liable as in a general partnership, and they have the same fiduciary duty and duty of care as partners in a general partnership. However, see the discussion in [Section 42.3.3 "Limited Liability Limited Partnerships"](#) of the newest type of LP, the limited liability limited partnership (triple LP), where the general partner is also afforded limited liability under ULPA-2001.

Limited Partners

The limited partners are only liable up to the amount of their capital contribution, provided the surname of the limited partner does not appear in the partnership name (unless his name is coincidentally the same as that of one of the general partners whose name does appear) and provided the limited partner does not participate in control of the firm. See [Section 42.4.1 "Limited Partnerships: Limited Partners' Liability for Managing Limited Partnership"](#) for a case that highlights liability issues for partners.

We have been discussing ULPA-1985 here. But in a world of limited liability companies, limited liability partnerships, and limited liability limited partnerships, “the control rule has become an anachronism”; ULPA-2001 “provides a full, status-based liability shield for each limited partner, ‘even if the limited partner participates in the management and control of the limited partnership.’” ULPA-2001, Section 303. The section thus eliminates the so-called control rule with respect to personal liability for entity obligations and brings limited partners into parity with LLC members, LLP partners and corporate shareholders.” Official Comment to Uniform Limited Partnership Act 2001, Section 303. And as will be noted in [Section 42.3.3 "Limited Liability Limited Partnerships"](#) under ULPA-2001 the *general partner* is also shielded from liability.

Taxation

Assuming the limited partnership meets a minimum number of criteria related to limited liability, centralized management, duration, and transferability of ownership, it can enjoy the benefits of pass-through taxation; otherwise it will be taxed as a corporation. Pass-through (“conduit”) taxation is usually very important to partners.

Termination

The limited partnership’s termination involves the same three steps as in a general partnership: (1) dissolution, (2) winding up, and (3) termination.

Dissolution

Dissolution of a limited partnership is the first step toward termination (but termination does not necessarily follow dissolution). The limited partners have no power to dissolve the firm except on court order, and the death or bankruptcy of a limited partner does not dissolve the firm. The following events may cause dissolution: (1) termination of the partnership as per the certificate’s provisions; (2)

termination upon an event specified in the partnership agreement; (3) the unanimous written consent of the partners; (4) the withdrawal of a general partner, unless at least one remains and the agreement says one is enough, or if within ninety days all partners agree to continue; (5) an event that causes the business to be illegal; and (6) judicial decree of dissolution when it is not reasonable to carry on. If the agreement has no term, its dissolution is not triggered by some agreed-to event, and none of the other things listed cause dissolution.

Dissolution requires the filing of a certificate of cancellation with the state if winding up commences.

Winding Up

General partners who have not wrongfully dissolved the partnership may wind it up, and so may the limited partners if all the general partners have wrongfully dissolved the firm. Any partner or that person's legal representative can petition a court for winding up, with cause.

Upon winding up, the assets are distributed (1) to creditors, including creditor-partners, not including liabilities for distributions of profit; (2) to partners and ex-partners to pay off unpaid distributions; (3) to partners as return of capital contributions, unless otherwise agreed; and (4) to partners for partnership interests in proportion as they share in distributions, unless otherwise agreed. No distinction is made between general and limited partners—they share equally, unless otherwise agreed. When winding up is completed, the firm is terminated.

It is worth reiterating the part about “unless otherwise agreed”: people who form any kind of a business organization—partnership, a hybrid form, or corporations—can to a large extent choose to structure their relationship as they see fit. Any aspect of the company's formation, operation, or ending that is not included in an agreement flops into the default provisions of the relevant law.

KEY TAKEAWAY

A limited partnership is a creature of statute: it requires filing a certificate with the state because it confers on some of its members the marvel of limited liability. It is an investment device composed of one or more general partners and one or more limited partners; limited partners may leave with six months' notice and are entitled to an appropriate payout. The general partner is liable as a partner in a general partnership; the limited partners' liability is limited to the loss of their investment, unless they exercise so much control of the firm as to become general partners. The general partner is paid, and the general and limited partners split profit as per the agreement or, if none, in the proportion as they made capital contributions. The firm is usually taxed like a general partnership: it is a conduit for the partners' income. The firm is dissolved upon the end of its term, upon an event specified in the agreement, or in several other circumstances, but it may have indefinite existence.

EXERCISES

1. Why does the fact that the limited liability company provides limited liability for some of its members mean that a state certificate must be filed?
2. What liability has the general partner? The limited partner?
3. How easy is it for the limited partner to dispose of (sell) her partnership interest?

42.2 Limited Liability Companies

LEARNING OBJECTIVES

1. Understand the history and law governing limited liability companies (LLCs).
2. Identify the creation and capitalization of an LLC.
3. Understand control and compensation of a firm.
4. Recognize liabilities in the LLC form.
5. Explain the taxation of an LLC.
6. Identify how LLCs are terminated.

History and Law Governing Limited Liability Companies

History of the Limited Liability Company

The **limited liability company**⁴ (LLC) gained sweeping popularity in the late twentieth century because it combines the best aspects of partnership and the best aspects of corporations: it allows all its owners (members) insulation from personal liability and pass-through (conduit) taxation. The first efforts to form LLCs were thwarted by IRS rulings that the business form was too much like a corporation to escape corporate tax complications. Tinkering by promoters of the LLC concept and flexibility by the IRS solved those problems in interesting and creative ways.

Corporations have six characteristics: (1) associates, (2) an objective to carry on a business and divide the gains, (3) continuity of life, (4) centralized management, (5) limited liability, and (6) free transferability of interests. Partnerships also, necessarily, have the first two corporate characteristics; under IRS rulings, if the LLC is *not* to be considered a corporation for tax purposes, it must lack at least one-half of the remaining four characteristics of a corporation: the LLC, then, must lack two of these corporate characteristics (otherwise it will be considered a corporation): (1) limited liability, (2) centralized management, (3) continuity of life, or (4) free transferability of interests. But limited liability is essential and centralized management is necessary for passive investors who don't want to be involved in decision making, so pass-through taxation usually hinges on whether an LLC has continuity of life and free transferability of accounts. Thus it is extremely important that the LLC promoters avoid the corporate characteristics of continuity of life and free transferability of interests.

We will see how the LLC can finesse these issues.

4. An unincorporated organization of one or more persons or entities established in accordance with applicable state laws and whose members may actively participate in the organization without being personally liable for the debts, obligations, or liabilities of the organization.

Governing Law

All states have statutes allowing the creation of LLCs, and while a Uniform Limited Liability Company Act has been promulgated, only eight states have adopted it as of January 2011. That said, the LLC has become the entity of choice for many businesses.

Creation and Capitalization

Creation of the LLC

An LLC is created according to the statute of the state in which it is formed. It is required that the LLC members file a “certificate of organization” with the secretary of state, and the name must indicate that it is a limited liability company. Partnerships and limited partnerships may convert to LLCs; the partners’ previous liability under the other organizational forms is not affected, but going forward, limited liability is provided. The members’ operating agreement spells out how the business will be run; it is subordinate to state and federal law. Unless otherwise agreed, the operating agreement can be amended only by unanimous vote. The LLC is an entity. Foreign LLCs must register with the secretary of state before doing business in a “foreign” state, or they cannot sue in state courts.

As compared with corporations, the LLC is not a good form if the owners expect to have multiple investors or to raise money from the public. The typical LLC has relatively few members (six or seven at most), all of whom usually are engaged in running the firm.

Most early LLC statutes, at least, prohibited their use by professionals. That is, practitioners who need professional licenses, such as certified public accountants, lawyers, doctors, architects, chiropractors, and the like, could not use this form because of concern about what would happen to the standards of practice if such people could avoid legitimate malpractice claims. For that reason, the limited liability partnership was invented.

Capitalization

Capitalization is like a partnership: members contribute capital to the firm according to their agreement. As in a partnership, the LLC property is not specific to any member, but each has a personal property interest in general. Contributions may be in the form of cash, property or services rendered, or a promise to render them in the future.

Control and Compensation

Control

The LLC operating agreement may provide for either a member-managed LLC or a manager-managed (centralized) LLC. If the former, all members have actual and apparent authority to bind the LLC to contracts on its behalf, as in a partnership, and all members' votes have equal weight unless otherwise agreed. Member-managers have duty of care and a fiduciary duty, though the parameters of those duties vary from state to state. If the firm is manager managed, only managers have authority to bind the firm; the managers have the duty of care and fiduciary duty, but the nonmanager members usually do not. Some states' statutes provide that voting is based on the financial interests of the members. Most statutes provide that any extraordinary firm decisions be voted on by all members (e.g., amend the agreement, admit new members, sell all the assets prior to dissolution, merge with another entity). Members can make their own rules without the structural requirements (e.g., voting rights, notice, quorum, approval of major decisions) imposed under state corporate law.

If the firm has a centralized manager system, it gets a check in its "corporate-like" box, so it will need to make sure there are enough noncorporate-like attributes to make up for this one. If it looks too much like a corporation, it will be taxed like one.

One of the real benefits of the LLC as compared with the corporation is that no annual meetings are required, and no minutes need to be kept. Often, owners of small corporations ignore these formalities to their peril, but with the LLC there are no worries about such record keeping.

Compensation

Distributions are allocated among members of an LLC according to the operating agreement; managing partners may be paid for their services. Absent an agreement, distributions are allocated among members in proportion to the values of contributions made by them or required to be made by them. Upon a member's dissociation that does not cause dissolution, a dissociating member has the right to distribution as provided in the agreement, or—if no agreement—the right to receive the fair value of the member's interest within a reasonable time after dissociation. No distributions are allowed if making them would cause the LLC to become insolvent.

Liability

The great accomplishment of the LLC is, again, to achieve limited liability for all its members: no general partner hangs out with liability exposure.

Liability to Outsiders

Members are not liable to third parties for contracts made by the firm or for torts committed in the scope of business (but of course a person is always liable for her own torts), regardless of the owner's level of participation—unlike a limited partnership, where the general partner is liable. Third parties' only recourse is against the firm's property. See *Puleo v. Topel*, (see [Section 42.4.2 "Liability Issues in LLCs"](#)), for an analysis of owner liability in an LLC.

Internal Liabilities

Unless the operating agreement provides otherwise, members and managers of the LLC are generally not liable to the firm or its members except for acts or omissions constituting gross negligence, intentional misconduct, or knowing violations of the law. Members and managers, though, must account to the firm for any personal profit or benefit derived from activities not consented to by a majority of disinterested members or managers from the conduct of the firm's business or member's or managers use of firm property—which is the same as in partnership law.

Taxation

Assuming the LLC is properly formed so that it is not too much like a corporation, it will—upon its members' election—be treated like a partnership for tax purposes.

Termination

Termination, loosely speaking, refers either to how the entity's life as a business ends (continuity of life) or to how a member's interest in the firm ends—that is, how freely the interest is transferable.

Continuity of Life

The first step in the termination of the LLC is dissolution, though dissolution is not necessarily followed by termination.

Dissolution and Winding Up

The IRS has determined that continuity of life does *not* exist “if the death, insanity, bankruptcy, retirement, resignation, or expulsion of any member will cause a dissolution of the organization,” Treasury Regulation, § 301.7701-2(b)(1). and that if one of these events occurs, the entity may continue only with the members’ unanimous consent. Dissolution may occur even if the business is continued by the remaining members.

The typical LLC statute provides that an LLC will dissolve upon (1) expiration of the LLC’s term as per its agreement; (2) events specified in the agreement; (3) written consent of all members; (4) an “event of dissociation” of a member, unless within ninety days of the event all remaining members agree to continue, or the right to continue is stated in the LLC; (5) the entry of a judicial decree of dissolution; (6) a change in membership that results in there being fewer than two members; or (7) the expiration of two years after the effective date of administrative dissolution.

And an “event of dissociation” is typically defined as (1) a member’s voluntary withdrawal, (2) her assignment of the entire LLC interest, (3) her expulsion, (4) her bankruptcy, (5) her becoming incompetent, (6) dissolution of an entity member (as an LLC, limited partnership, or corporation), or (7) any other event specified in the agreement.

Thus under most statutes’ default position, if a member dies, becomes insane or bankrupt, retires, resigns, or is expelled, the LLC will dissolve *unless* within ninety days the rest of the members unanimously agree to continue. And by this means the firm does *not* have continuity of life. Some states provide opportunities for even more flexibility regarding the “unanimous” part. In the mid-1990s, the IRS issued revenue rulings (as opposed to regulations) that it would be enough if a “majority in interest” of remaining partners agreed to continue the business, and the “flexible” statute states adopted this possibility (the ones that did not are called “bulletproof” statutes). “Majority in interests” means a majority of profits and capital.

If the firm does dissolve, some states require public filings to that effect. If dissolution leads to winding up, things progress as in a general partnership: the business at hand is finished, accounts are rendered, bills paid, assets liquidated, and remaining assets are distributed to creditors (including member and manager creditors, but not for their shares in profits); to members and past members for unpaid distributions; to members for capital contributions; and to members as agreed or in proportion to contributions made. Upon dissolution, actual authority of members or managers terminates except as needed to wind up; members may

have apparent authority, though, unless the third party had notice of the dissolution.

Free Transferability of Interest

Again, the problem here is that if a member's interest in the LLC is as freely transferable as a shareholder's interest in a corporation (an owner can transfer all attributes of his interest without the others' consent), the LLC will probably be said to have a check mark in the "corporate-like" box: too many of those and the firm will not be allowed pass-through taxation. Thus the trick for the LLC promoters is to limit free transferability enough to pass the test of not being a corporation, but not limit so much as to make it really difficult to divest oneself of the interest (then it's not a very liquid or desirable investment).

Some states' LLC statutes have as the default rule that the remaining members must unanimously consent to allow an assignee or a transferee of a membership interest to participate in managing the LLC. Since this prevents a member from transferring *all* attributes of the interest (the right to participate in management isn't transferred or assigned), the LLC formed under the default provision will not have "free transferability of interest." But if the LLC agreement allows *majority* consent for the transfer of all attributes, that also would satisfy the requirement that there not be free transferability of interests. Then we get into the question of how to define "majority": by number of members or by value of their membership? And what if only the managing partners need to consent? Or if there are two classes of membership and the transfer of interests in one class requires the consent of the other? The point is that people keep pushing the boundaries to see how close their LLC can come to corporation-like status without being called a corporation.

Statutes for LLCs allow other business entities to convert to this form upon application.

KEY TAKEAWAY

The limited liability company has become the entity of choice for many businesspeople. It is created by state authority that, upon application, issues the “certificate of organization.” It is controlled either by managers or by members, it affords its members limited liability, and it is taxed like a partnership. But these happy results are obtained only if the firm lacks enough corporate attributes to escape being labeled as a corporation. To avoid too much “corporateness,” the firm’s certificate usually limits its continuity of life and the free transferability of interest. The ongoing game is to finesse these limits: to make them as nonconstraining as possible, to get right up to the line to preserve continuity, and to make the interest as freely transferable as possible.

EXERCISES

1. What are the six attributes of a corporation? Which are automatically relevant to the LLC? Which two corporate attributes are usually dropped in an LLC?
2. Why does the LLC not want to be treated like a corporation?
3. Why does the name of the LLC have to include an indication that it is an LLC?
4. How did LLCs finesse the requirement that they not allow too-free transferability of the interest?

42.3 Other Forms

LEARNING OBJECTIVE

1. Recognize other business forms: sub-S corporations, limited liability partnerships, and limited liability limited partnerships.

Sub-S Corporation

History

The sub-S corporation or the **S corporation**⁵ gets its name from the IRS Code, Chapter 1, Subchapter S. It was authorized by Congress in 1958 to help small corporations and to stem the economic and cultural influence of the relatively few, but increasingly powerful, huge multinational corporations. According to the website of an S corporation champion, “a half century later, S corporations are the most popular corporate structure in America. The IRS estimates that there were 4.5 million S corporation owners in the United States in 2007—about twice the number of C [standard] corporations.” “The History and Challenges of America’s Dominant Business Structure,” *S Corp: Defending America’s Small and Family-Owned Businesses*, <http://www.s-corp.org/our-history>.

Creation and Capitalization

The S corporation is a regular corporation created upon application to the appropriate secretary of state’s office and operated according to its bylaws and shareholders’ agreements. There are, however, some limits on how the business is set up, among them the following:

- It must be incorporated in the United States.
- It cannot have more than one hundred shareholders (a married couple counts as one shareholder).
- The only shareholders are individuals, estates, certain exempt organizations, or certain trusts.
- Only US citizens and resident aliens may be shareholders.
- The corporation has only one class of stock.
- With some exceptions, it cannot be a bank, thrift institution, or insurance company.
- All shareholders must consent to the S corporation election.
- It is capitalized as is a regular corporation.

5. A corporation whose owners elect to have it treated as a partnership for tax purposes.

Liability

The owners of the S corporation have limited liability.

Taxation

Taxation is the crux of the matter. The S corporation pays no corporate income tax (unless it has a lot of passive income). The S corporation's shareholders include on their personal income statements, and pay tax on, their share of the corporation's separately stated items of income, deduction, and loss. That is, the S corporation avoids the dreaded double taxation of corporate income.

Transferability of Ownership

S corporations' shares can be bought or sold via share purchase agreements, and all changes in the ownership are reflected in the share ledger in the corporate minute book.

Limited Liability Partnerships

Background

In 1991, Texas enacted the first **limited liability partnership**⁶ (LLP) statute, largely in response to the liability that had been imposed on partners in partnerships sued by government agencies in relation to massive savings and loan failures in the 1980s. Christine M. Przybysz, "Shielded Beyond State Limits: Examining Conflict-Of-Law Issues In Limited Liability Partnerships," *Case Western Reserve Law Review* 54, no. 2 (2003): 605. (Here we see an example of the legislature allowing business owners to externalize the risks of business operation.) More broadly, the success of the limited liability company attracted the attention of professionals like accountants, lawyers, and doctors who sought insulation from personal liability for the mistakes or malpractice of their partners. Their wish was granted with the adoption in all states of statutes authorizing the creation of the limited liability partnership in the early 1990s. Most partnership law under the Revised Uniform Partnership Act applies to LLPs.

Creation

Members of a partnership (only a majority is required) who want to form an LLP must file with the secretary of state; the name of the firm must include "limited liability partnership" or "LLP" to notify the public that its members will not stand personally for the firm's liabilities.

6. A partnership in which some or all partners (depending on the jurisdiction) have limited liability.

Liability

As noted, the purpose of the LLP form of business is to afford insulation from liability for its members. A typical statute provides as follows: “Any obligation of a partnership incurred while the partnership is a limited liability partnership, whether arising in contract, tort or otherwise, is solely the obligation of the partnership. A partner is not personally liable, directly or indirectly, by way of indemnification, contribution, assessment or otherwise, for such an obligation solely by reason of being or so acting as a partner.” Revised Code of Washington (RCW), Section 25.05.130.

However, the statutes vary. The early ones only allowed limited liability for negligent acts and retained unlimited liability for other acts, such as malpractice, misconduct, or wrongful acts by partners, employees, or agents. The second wave eliminated all these as grounds for unlimited liability, leaving only breaches of ordinary contract obligation. These two types of legislation are called *partial shield* statutes. The third wave of LLP legislation offered *full shield* protection—no unlimited liability at all. Needless to say, the full-shield type has been most popular and most widely adopted. Still, however, many statutes require specified amounts of professional malpractice insurance, and partners remain fully liable for their own negligence or for wrongful acts of those in the LLP whom they supervise.

In other respects, the LLP is like a partnership.

Limited Liability Limited Partnerships

The progress toward achieving limited liability continues. A **limited liability limited partnership**⁷ (LLLP, or triple LP) is the latest invention. It is a limited partnership that has invoked the LLLP provisions of its state partnership law by filing with a specified public official the appropriate documentation to become an LLLP. This form completely eliminates the automatic personal liability of the general partner for partnership obligations and, under most statutes, also eliminates the “control rule” liability exposure for all limited partners. It is noteworthy that California law does not allow for an LLLP to be formed in California; however, it does recognize LLLPs formed in other states. A “foreign” LLLP doing business in California must register with the secretary of state. As of February 2011, twenty-one states allow the formation of LLLPs.

7. A limited partnership that has chosen to limit the liability of the general partnership under state law.

The 2001 revision of the Uniform Limited Partnership Act (ULPA) provides this definition of an LLLP: “‘Limited liability limited partnership’...means a limited partnership whose certificate of limited partnership states that the limited partnership is a limited liability limited partnership.” “Uniform Limited

Partnership Act (2001),” NCCUSL Archives, <http://www.law.upenn.edu/bll/archives/ulc/ulpa/final2001.htm>; ULPA Section, 102(9). Section 404(c) gets to the point: “An obligation of a limited partnership incurred while the limited partnership is a limited liability limited partnership, whether arising in contract, tort, or otherwise, is solely the obligation of the limited partnership. A general partner is not personally liable, directly or indirectly, by way of contribution or otherwise, for such an obligation solely by reason of being or acting as a general partner. This subsection applies despite anything inconsistent in the partnership agreement that existed immediately before the consent required to become a limited liability limited partnership[.]”ULPA Section, 404(c).

In the discussion of limited partnerships, we noted that ULPA-2001 eliminates the “control rule” so that limited partners who exercise day-to-day control are *not* thereby liable as general partners. Now, in the section quoted in the previous paragraph, the *general partner’s* liability for partnership obligations is vaporized too. (Of course, the general partner is liable for its, his, or her own torts.) The preface to ULPA-2001 explains, “In a limited liability limited partnership (‘LLLP’), no partner—whether general or limited—is liable on account of partner status for the limited partnership’s obligations. Both general and limited partners benefit from a full, status-based liability shield that is equivalent to the shield enjoyed by corporate shareholders, LLC members, and partners in an LLP.”

Presumably, most existing limited partnerships will switch over to LLLPs. The ULPA-2001 provides that “the Act makes LLLP status available through a simple statement in the certificate of limited partnership.”

Ethical Concerns

There was a reason that partnership law imposed personal liability on the partners: people tend to be more careful when they are personally liable for their own mistakes and bad judgment. Many government programs reflect peoples’ interest in adverting risk: federal deposit insurance, Social Security, and bankruptcy, to name three. And of course corporate limited liability has existed for two hundred years. See, for example, David A. Moss, “Risk, Responsibility, and the Role of Government,” *Drake Law Review* 56, no. 2 (2008): 541. Whether the movement to allow almost anybody the right to a business organization that affords limited liability will encourage entrepreneurship and business activity or whether it will usher in a new era of **moral hazard**⁸—people being allowed to escape the consequences of their own irresponsibility—is yet to be seen.

8. The lack of incentive to guard against a risk when a person is protected against it, as by being afforded limited liability.

KEY TAKEAWAY

Businesspeople always prefer to reduce their risks. The partnership form imposes serious potential risk: unlimited personal liability. The corporate form eliminates that risk but imposes some onerous formalities and double taxation. Early on, then, the limited partnership form was born, but it still imposed unlimited liability on the general partner and on the limited partner if she became too actively involved. Congress was induced in the mid-1950s to allow certain small US corporations the right to single taxation, but the sub-S corporation still suffered from various limitations on its structure. In the 1980s, the limited liability company was invented; it has become the entity of choice for many businesspeople, but its availability for professionals was limited. In the late 1980s, the limited liability partnership form gained favor, and in the early 2000s, the limited liability limited partnership finished off unlimited liability for limited partnerships.

EXERCISES

1. The principal disadvantage of the general partnership is that it imposes unlimited personal liability on the partners. What is the disadvantage of the corporate form?
2. Why isn't the limited partnership an entirely satisfactory solution to the liability problem of the partnership?
3. Explain the issue of "moral hazard" and the business organization form.

42.4 Cases

Limited Partnerships: Limited Partners' Liability for Managing Limited Partnership

Frigidaire Sales Corp. v. Union Properties, Inc.

562 P.2d 244 (Wash. 1977)

Plaintiff [Frigidaire] entered into a contract with Commercial Investors (Commercial), a limited partnership. Defendants, Leonard Mannon and Raleigh Baxter, were limited partners of Commercial. Defendants were also officers, directors, and shareholders of Union Properties, Inc., the only general partner of Commercial. Defendants controlled Union Properties, and through their control of Union Properties they exercised the day-to-day control and management of Commercial. Commercial breached the contract, and Plaintiff brought suit against Union Properties and Defendants. The trial court concluded that Defendants did not incur general liability for Commercial's obligations by reason of their control of Commercial, and the Court of Appeals affirmed.

[Plaintiff] does not contend that Defendants acted improperly by setting up the limited partnership with a corporation as the sole general partner. Limited partnerships are a statutory form of business organization, and parties creating a limited partnership must follow the statutory requirements. In Washington, parties may form a limited partnership with a corporation as the sole general partner. [Citations]

Plaintiff's sole contention is that Defendants should incur general liability for the limited partnership's obligations under RCW 25.08.070, because they exercised the day-to-day control and management of Commercial. Defendants, on the other hand, argue that Commercial was controlled by Union Properties, a separate legal entity, and not by Defendants in their individual capacities. [RCW 25.08.070 then read: "A limited partner shall not become liable as a general partner unless, in addition to the exercise of his rights and powers as limited partner, he takes part in the control of the business."]

...The pattern of operation of Union Properties was to investigate and conceive of real estate investment opportunities and, when it found such opportunities, to cause the creation of limited partnerships with Union Properties acting as the general partner. Commercial was only one of several limited partnerships so

conceived and created. Defendants did not form Union Properties for the sole purpose of operating Commercial. Hence, their acts on behalf of Union Properties were not performed merely for the benefit of Commercial....

[P]etitioner was never led to believe that Defendants were acting in any capacity other than in their corporate capacities. The parties stipulated at the trial that Defendants never acted in any direct, personal capacity. When the shareholders of a corporation, who are also the corporation's officers and directors, conscientiously keep the affairs of the corporation separate from their personal affairs, and no fraud or manifest injustice is perpetrated upon third persons who deal with the corporation, the corporation's separate entity should be respected. [Citations]

For us to find that Defendants incurred general liability for the limited partnership's obligations under RCW 25.08.070 would require us to apply a literal interpretation of the statute and totally ignore the corporate entity of Union Properties, when Plaintiff knew it was dealing with that corporate entity. There can be no doubt that Defendants, in fact, controlled the corporation. However, they did so only in their capacities as agents for their principal, the corporate general partner. Although the corporation was a separate entity, it could act only through its board of directors, officers, and agents. [Citations] Plaintiff entered into the contract with Commercial. Defendants signed the contract in their capacities as president and secretary-treasurer of Union Properties, the general partner of Commercial. In the eyes of the law it was Union Properties, as a separate corporate entity, which entered into the contract with Plaintiff and controlled the limited partnership.

Further, because Defendants scrupulously separated their actions on behalf of the corporation from their personal actions, Plaintiff never mistakenly assumed that Defendants were general partners with general liability. [Citations] Plaintiff knew Union Properties was the sole general partner and did not rely on Defendants' control by assuming that they were also general partners. If Plaintiff had not wished to rely on the solvency of Union Properties as the only general partner, it could have insisted that Defendants personally guarantee contractual performance. Because Plaintiff entered into the contract knowing that Union Properties was the only party with general liability, and because in the eyes of the law it was Union Properties, a separate entity, which controlled the limited partnership, there is no reason for us to find that Defendants incurred general liability for their acts done as officers of the corporate general partner.

The decision of the Court of Appeals is affirmed.

CASE QUESTIONS

1. Frigidaire entered into a contract with Commercial Investors, a limited partnership. The general partner in the limited partnership was Union Properties, Inc., a corporation. Who were the limited partners in the limited partnership? Who were the controlling principals of the corporate general partner?
2. Why is it common for the general partner in a limited partnership to be a corporation?
3. Why does the court reiterate that the plaintiff knew it was dealing with a limited partnership that had a corporate general partner?
4. What could the plaintiff have done in this case to protect itself?
5. The court ruled in favor of the defendants, but is this setup kind of a scam? What is the “moral hazard” problem lurking in this case?

Liability Issues in LLCs

Puleo v. Topel

856 N.E.2d 1152 (Ill. App. 2006)

Plaintiffs Philip Puleo [and others]...appeal the order of the circuit court dismissing their claims against defendant Michael Topel.

The record shows that effective May 30, 2002, Thinktank, a limited liability company (LLC) primarily involved in web design and web marketing, was involuntarily dissolved by the Illinois Secretary of State...due to Thinktank's failure to file its 2001 annual report as required by the Illinois Limited Liability Company Act (the Act) [Citation].

[In December 2002], plaintiffs, independent contractors hired by Topel, filed a complaint against Topel and Thinktank in which they alleged breach of contract, unjust enrichment, and claims under the account stated theory. Those claims stemmed from plaintiffs' contention that Topel, who plaintiffs alleged was the sole manager and owner of Thinktank, knew or should have known of Thinktank's involuntary dissolution, but nonetheless continued to conduct business as Thinktank from May 30, 2002, through the end of August 2002. They further contended that on or about August 30, 2002, Topel informed Thinktank employees and independent contractors, including plaintiffs, that the company was ceasing

operations and that their services were no longer needed. Thinktank then failed to pay plaintiffs for work they had performed....

On September 2, 2003, the circuit granted plaintiffs' motion for judgment on the pleadings against Thinktank. Thereafter, on October 16, 2003, plaintiffs filed a separate motion for summary judgment against Topel [personally]. Relying on [Citation], plaintiffs contended that Topel, as a principal of Thinktank, an LLC, had a legal status similar to a shareholder or director of a corporation, who courts have found liable for a dissolved corporation's debts. Thus, plaintiffs argued that Topel was personally liable for Thinktank's debts....

...The circuit court denied plaintiffs' motion for summary judgment against Topel....In doing so, the circuit court acknowledged that Topel continued to do business as Thinktank after its dissolution and that the contractual obligations at issue were incurred after the dissolution.

However...the court entered a final order dismissing all of plaintiffs' claims against Topel with prejudice....The court stated in pertinent part:

Based upon the Court's...finding that the Illinois Legislature did not intend to hold a member of a Limited Liability Company liable for debts incurred after the Limited Liability Company had been involuntarily dissolved, the Court finds that all of Plaintiffs' claims against Defendant Topel within the Complaint fail as a matter of law, as they are premised upon Defendant Topel's alleged personal liability for obligations incurred in the name of Thinktank LLC after it had been involuntarily dissolved by the Illinois Secretary of State.

Plaintiffs now appeal that order...[contending] that...the circuit court erred in dismissing their claims against Topel. In making that argument, plaintiffs acknowledge that the issue as to whether a member or manager of an LLC may be held personally liable for obligations incurred by an involuntarily dissolved LLC appears to be one of first impression under the Act. That said, plaintiffs assert that it has long been the law in Illinois that an officer or director of a dissolved corporation has no authority to exercise corporate powers and thus is personally liable for any debts he incurs on behalf of the corporation after its dissolution. [Citations] Plaintiffs reason that Topel, as managing member of Thinktank, similarly should be held liable for debts the company incurred after its dissolution.

We first look to the provisions of the Act as they provided the trial court its basis for its ruling....

(a) Except as otherwise provided in subsection (d) of this Section, the debts, obligations, and liabilities of a limited liability company, whether arising in contract, tort, or otherwise, are solely the debts, obligations, and liabilities of the company. A member or manager is not personally liable for a debt, obligation, or liability of the company solely by reason of being or acting as a member or manager....

(c) The failure of a limited liability company to observe the usual company formalities or requirements relating to the exercise of its company powers or management of its business is not a ground for imposing personal liability on the members or managers for liabilities of the company.

(d) All or specified members of a limited liability company are liable in their capacity as members for all or specified debts, obligations, or liabilities of the company if:

(1) a provision to that effect is contained in the articles of organization; and

(2) a member so liable has consented in writing to the adoption of the provision or to be bound by the provision.

[Another relevant section provides]:

(a) A limited liability company is bound by a member or manager's act after dissolution that:

(1) is appropriate for winding up the company's business; or

(2) would have bound the company before dissolution, if the other party to the transaction did not have notice of the dissolution.

(b) A member or manager who, with knowledge of the dissolution, subjects a limited liability company to liability by an act that is not appropriate for winding up the company's business is liable to the company for any damage caused to the company arising from the liability.

[The statute] clearly indicates that a member or manager of an LLC is not personally liable for debts the company incurs unless each of the provisions in subsection (d) is met. In this case, plaintiffs cannot establish either of the provisions in subsection

(d). They have not provided this court with Thinktank's articles of organization, much less a provision establishing Topel's personal liability, nor have they provided this court with Topel's written adoption of such a provision. As such, under the express language of the Act, plaintiffs cannot establish Topel's personal liability for debts that Thinktank incurred after its dissolution....

In 1998...the legislature amended [the LLC statute]...and in doing so removed...language which explicitly provided that a member or manager of an LLC could be held personally liable for his or her own actions or for the actions of the LLC to the same extent as a shareholder or director of a corporation could be held personally liable [which would include post-dissolution acts undertaken without authority]. As we have not found any legislative commentary regarding that amendment, we presume that by removing the noted statutory language, the legislature meant to shield a member or manager of an LLC from personal liability. [Citation] "When a statute is amended, it is presumed that the legislature intended to change the law as it formerly existed."

Nonetheless, plaintiffs ask this court to disregard the 1998 amendment and to imply a provision into the Act similar to...the Business Corporation Act. We cannot do so....When the legislature amended section [the relevant section] it clearly removed the provision that allowed a member or manager of an LLC to be held personally liable in the same manner as provided in section 3.20 of the Business Corporation Act. Thus, the Act does not provide for a member or manager's personal liability to a third party for an LLC's debts and liabilities, and no rule of construction authorizes this court to declare that the legislature did not mean what the plain language of the statute imports.

We, therefore, find that the circuit court did not err in concluding that the Act did not permit it to find Topel personally liable to plaintiffs for Thinktank's debts and liabilities. We agree with plaintiff that the circuit court's ruling does not provide an equitable result. However, the circuit court, like this court, was bound by the statutory language.

Accordingly, we affirm the judgment of the circuit court of Cook County.

CASE QUESTIONS

1. Is it possible the defendant did not know his LLC had been involuntarily dissolved because it failed to file its required annual report? Should he have known it was dissolved?
2. If Topel's business had been a corporation, he would not have had insulation from liability for postdissolution contracts—he would have been liable. Is the result here equitable? Is it fraud?
3. Seven months after the LLC's existence was terminated by the state, the defendant hired a number of employees, did not pay them, and then avoided liability under the LLC shield. How else could the court have ruled here? It is possible that the legislature's intent was simply to eliminate compulsory piercing (see [Chapter 43 "Corporation: General Characteristics and Formation"](#) under corporate law principles and leave the question of LLC piercing to the courts. If so was the court's decision correct? The current LLC act language is similar to the Model Business Corporation Act, which surely permits piercing (see [Chapter 43 "Corporation: General Characteristics and Formation"](#)).

Defective Registration as a Limited Liability Partnership

Campbell v. Lichtenfels

2007 WL 447919 (Conn. Super. 2007)

This case concerns the aftermath of the dissolution of the parties' law practice. Following a hearing on January 2 and 3, 2007, this court issued a memorandum of decision on January 5, 2007 granting the plaintiff a prejudgment remedy in the amount of \$15,782.01. The plaintiff has now moved for reargument, contending that the court improperly considered as a setoff one-half of a malpractice settlement paid personally by the defendant, which sum the court found to be a debt of a partnership. [The defendant was sued for malpractice by a third party; he paid the entire claim personally and when the law firm dissolved, the plaintiff's share from the liquidated assets was reduced by one-half to account for the amount the defendant had paid.]

In support of his motion to reargue, the plaintiff relies on General Statutes Sec. 34-427(c) and, in that motion, italicizes those portions which he believes apply to his request for reargument. That section states (with emphasis as supplied in the plaintiff's motion) that:

a partner in a registered limited liability partnership is not liable directly or indirectly, *including by way of indemnification, contribution or otherwise*, for any debts, obligations and liabilities of or chargeable to *the partnership or another partner* or partners, *whether arising in contract, tort, or otherwise*, arising in the course of the partnership business while the partnership is a registered limited liability partnership. (emphasis in original)

While italicizing the phrases that appear to suit his purposes, the plaintiff completely ignores the most important phrase: “a partner in a registered limited liability partnership.” At the hearing, neither party presented any evidence at the hearing that tended to prove that the nature of the business relationship between the parties was that of a “registered limited liability partnership.” To the contrary, the testimony presented at the hearing revealed that the parties had a general partnership in which they had orally agreed to share profits and losses equally and that they never signed a partnership agreement. There was certainly no testimony or tangible evidence to the effect that the partnership had filed “a certificate of limited liability partnership with the Secretary of the State, stating the name of the partnership, which shall conform to the requirements of [the statute]; the address of its principal office;...a brief statement of the business in which the partnership engages; any other matters the partnership may determine to include; and that the partnership therefore applies for status as a registered limited liability partnership.” [Citation]

It is true that certain of the exhibits, such as copies of checks and letters written on the law firm letterhead, refer to the firm as “Campbell and Lichtenfels, LLP.” These exhibits, however, were not offered for the purpose of establishing the partnership’s character, and merely putting the initials “LLP” on checks and letterhead is not, in and of itself, proof of having met the statutory requirements for registration as a limited liability partnership. The key to establishing entitlement to the protections offered by [the limited liability partnership statute] is proof that the partnership has filed “a certificate of limited liability partnership with the Secretary of the State,” and the plaintiff presented no such evidence to the court.

Because the evidence presented at the hearing does not support a claim that the nature of the relationship between the parties to this case was that of partners in a registered limited liability partnership, the provisions of [the limited liability partnership statute] do not apply. Rather, this partnership is governed by the provisions of [the Uniform Partnership Act] which states: “Except as otherwise provided...all partners are liable jointly and severally for all obligations of the partnership unless otherwise agreed by the claimant or provided by law.” Because there has been no evidence that this partnership falls within [any exceptions] the court finds Campbell and Lichtenfels to have been a general partnership in which

the plaintiff shares the liability for the malpractice claim, even if he was not the partner responsible for the alleged negligence that led to that claim.

The plaintiff correctly points out that reargument is appropriate when the court has “overlooked” a “...principle of law which would have a controlling effect...” on the outcome of the case at hand. [Citation] The principle of law now raised by the plaintiff was “overlooked” by the court at the time of the hearing for two good reasons. First, it was not brought to the court’s attention at the time of the hearing. Second, and more importantly, the plaintiff presented no evidence that would have supported the claim that the principle of law in question, namely the provisions of [the limited liability partnership] was applicable to the facts of this case. Because the provisions of [that statute] are inapplicable, they are quite obviously not “controlling.” The principle of law which does control this issue is found in [general partnership law] and that principle makes the plaintiff liable for his share of the malpractice settlement, as the court has previously found. The motion for reargument is therefore denied.

CASE QUESTIONS

1. If the parties had been operating as a limited liability partnership, how would that have changed the result?
2. Why did the court find that there was no limited liability partnership?
3. How does general partnership law treat a debt by one partner incurred in the course of partnership business?
4. Here, as in the case in [Section 42.4.2 "Liability Issues in LLCs"](#), there really is no inequitable result. Why is this true?

42.5 Summary and Exercises

Summary

Between partnerships and corporations lie a variety of hybrid business forms: limited partnerships, sub-S corporations, limited liability companies, limited liability partnerships, and limited liability limited partnerships. These business forms were invented to achieve, as much as possible, the corporate benefits of limited liability, centralized control, and easy transfer of ownership interest with the tax treatment of a partnership.

Limited partnerships were recognized in the early twentieth century and today are governed mostly by the Uniform Limited Partnership Act (ULPA-1985 or ULPA-2001). These entities, not subject to double taxation, are composed of one or more general partners and one or more limited partners. The general partner controls the firm and is liable like a partner in a general partnership (except under ULPA-2001 liability is limited); the limited partners are investors and have little say in the daily operations of the firm. If they get too involved, they lose their status as limited partners (except this is not so under ULPA-2001). The general partner, though, can be a corporation, which finesses the liability problem. A limited partnership comes into existence only when a certificate of limited partnership is filed with the state.

In the mid-twentieth century, Congress was importuned to allow small corporations the benefit of pass-through taxation. It created the sub-S corporation (referring to a section of the IRS code). It affords the benefits of taxation like a partnership and limited liability for its members, but there are several inconvenient limitations on how sub-S corporations can be set up and operate.

The 1990s saw the limited liability company become the entity of choice for many businesspeople. It deftly combines limited liability for all owners—managers and nonmanagers—with pass-through taxation and has none of the restrictions perceived to hobble the sub-S corporate form. Careful crafting of the firm’s bylaws and operating certificate allow it to combine the best of all possible business forms. There remained, though, one fly in the ointment: most states did not allow professionals to form limited liability companies (LLCs).

This last barrier was hurttled with the development of the limited liability partnership. This form, though mostly governed by partnership law, eschews the vicarious liability of nonacting partners for another’s torts, malpractice, or partnership breaches of contract. The extent to which such exoneration from liability presents a moral hazard—allowing bad actors to escape their just liability—is a matter of concern.

Having polished off liability for all owners with the LLC and the LLP, the next logical step occurred when eyes returned to the venerable limited partnership. The invention of the limited liability limited partnership in ULPA-2001 not only abolished the “control test” that made limited partners liable if they got too involved in the firm’s operations but also eliminated the general partner’s liability.

Table 42.1 Comparison of Business Organization Forms

Type of Business Form	Formation and Ownership Rules	Funding	Management	Liability	Taxes	Dissolution
Limited partnership	Formal filing of articles of partnership; unlimited number of general and limited partners	General and limited partners contribute capital	General partner	General partner personally liable; limited partners to extent of contribution Under ULPA-2001, the general partner has limited liability.	Flow-through as in partnership	Death or termination of general partner, unless otherwise agreed
S corporation	Formal filing of articles of incorporation; up to 100 shareholders allowed but only one class of stock	Equity (sell stock) or debt funding (issue bonds); members share profits and losses	Board of directors, officers	Owners not personally liable absent piercing corporate veil (see Chapter 43 "Corporation: General Characteristics and Formation")	Flow-through as in partnership	Only if limited duration or shareholders vote to dissolve
Limited liability company	Formal filing of articles of organization; unlimited "members"	Members make capital contributions, share profits and losses	Member managed or manager managed	Limited liability	Flow-through as in partnership.	Upon death or bankruptcy, unless otherwise agreed
Limited liability partnership (LLP)	Formal filing of articles of LLP	Members make capital contributions, share profits and losses	All partners or delegated to managing partner	Varies, but liability is generally on partnership; nonacting partners have limited liability	Flow-through as in partnership	Upon death or bankruptcy, unless otherwise agreed
Limited liability limited partnership (LLLP)	Formal filing of articles of LLP; choosing LLLP form	Same as above	Same as above	Liability on general partner abolished: all members have limited liability	Flow-through as in partnership	Same as above

EXERCISES

1. Yolanda and Zachary decided to restructure their small bookstore as a limited partnership, called “Y to Z’s Books, LP.” Under their new arrangement, Yolanda contributed a new infusion of \$300; she was named the general partner. Zachary contributed \$300 also, and he was named the limited partner: Yolanda was to manage the store on Monday, Wednesday, and Friday, and Zachary to manage it on Tuesday, Thursday, and Saturday. Y to Z Books, LP failed to pay \$800 owing to Vendor. Moreover, within a few weeks, Y to Z’s Books became insolvent. Who is liable for the damages to Vendor?
2. What result would be obtained in Exercise 1 if Yolanda and Zachary had formed a limited liability company?
3. Suppose Yolanda and Zachary had formed a limited liability partnership. What result would be obtained then?
4. Jacobsen and Kelly agreed to form an LLC. They filled out the appropriate paperwork and mailed it with their check to the secretary of state’s office. However, they made a mistake: instead of sending it to “Boston, MA”—Boston, Massachusetts—they sent it to “Boston, WA”—Boston, Washington. There is a town in Washington State called “Little Boston” that is part of an isolated Indian reservation. The paperwork got to Little Boston but then was much delayed. After two weeks, Jacobsen and Kelly figured the secretary of state in Boston, MA, was simply slow to respond. They began to use their checks, business cards, and invoices labeled “Jacobsen and Kelly, LLC.” They made a contract to construct a wind turbine for Pablo; Kelly did the work but used guy wires that were too small to support the turbine. During a modest wind a week after the turbine’s erection, it crashed into Pablo’s house. The total damages exceeded \$35,000. Pablo discovered Jacobsen and Kelly’s LLC was defectively created and sought judgment against them personally. May Pablo proceed against them both personally?
5. Holden was the manager of and a member of Frost LLLP, an investment firm. In that capacity, he embezzled \$30,000 from one of the firm’s clients, Backus. Backus sued the firm and Holden personally, but the latter claimed he was shielded from liability by the firm. Is Holden correct?
6. Bellamy, Carlisle, and Davidson formed a limited partnership. Bellamy and Carlisle were the general partners and Davidson the limited partner. They contributed capital in the amounts of \$100,000, \$100,000, and \$200,000, respectively, but then could not agree on a profit-sharing formula. At the end of the first year, how should they divide their profits?

SELF-TEST QUESTIONS

1. Peron and Quinn formed P and Q Limited Partnership. Peron made a capital contribution of \$20,000 and became a general partner. Quinn made a capital contribution of \$10,000 and became a limited partner. At the end of the first year of operation, a third party sued the partnership and both partners in a tort action. What is the potential liability of Peron and Quinn, respectively?
 - a. \$20,000 and \$10,000
 - b. \$20,000 and \$0
 - c. unlimited and \$0
 - d. unlimited and \$10,000
 - e. unlimited and unlimited

2. A limited partnership
 - a. comes into existence when a certificate of partnership is filed
 - b. always provides limited liability to an investor
 - c. gives limited partners a say in the daily operation of the firm
 - d. is not likely to be the business form of choice if a limited liability limited partnership option is available
 - e. two of these (specify)

3. Puentes is a limited partner of ABC, LP. He paid \$30,000 for his interest and he also loaned the firm \$20,000. The firm failed. Upon dissolution and liquidation,
 - a. Puentes will get his loan repaid pro rata along with other creditors.
 - b. Puentes will get repaid, along with other limited partners, in respect to his capital and loan after all other creditors have been paid.
 - c. if any assets remain, the last to be distributed will be the general partners' profits.
 - d. if Puentes holds partnership property as collateral, he can resort to it to satisfy his claim if partnership assets are insufficient to meet creditors' claims.

4. Reference to “moral hazard” in conjunction with hybrid business forms gets to what concern?
 - a. that general partners in a limited partnership will run the firm for their benefit, not the limited partners’ benefit
 - b. that the members of a limited liability company or limited liability partnership will engage in activities that expose themselves to potential liability
 - c. that the trend toward limited liability gives bad actors little incentive to behave ethically because the losses caused by their behavior are mostly not borne by them
 - d. that too few modern professional partnerships will see any need for malpractice insurance

5. One of the advantages to the LLC form over the sub-S form is
 - a. in the sub-S form, corporate profits are effectively taxed twice.
 - b. the sub-S form does not provide “full-shield” insulation of liability for its members.
 - c. the LLC cannot have a “manager-manager” form of control, whereas that is common for sub-S corporations.
 - d. the LLC form requires fewer formalities in its operation (minutes, annual meetings, etc.).

SELF-TEST ANSWERS

1. d
2. e (that is, a and d)
3. d (Choice a is wrong because as a secured creditor Puentes can realize on the collateral without regard to other creditors’ payment.)
4. c
5. d

Chapter 43

Corporation: General Characteristics and Formation

LEARNING OBJECTIVES

After reading this chapter, you should understand the following:

1. The historical background of the corporation
2. How partnerships compare with corporations
3. What the corporation is as a legal entity, and how corporate owners can lose limited liability by certain actions
4. How corporations are classified

The corporation is the dominant form of the business enterprise in the modern world. As a legal entity, it is bound by much of the law discussed in the preceding chapters. However, as a significant institutional actor in the business world, the corporation has a host of relationships that have called forth a separate body of law.

43.1 Historical Background

LEARNING OBJECTIVES

1. Comprehend the historical significance of corporate formation.
2. Learn about key court decisions and their effect on interstate commerce and corporate formation.
3. Become acquainted with how states formed their corporate laws.

A Fixture of Every Major Legal System

Like partnership, the corporation is an ancient concept, recognized in the Code of Hammurabi, and to some degree a fixture in every other major legal system since then. The first corporations were not business enterprises; instead, they were associations for religious and governmental ends in which perpetual existence was a practical requirement. Thus until relatively late in legal history, kings, popes, and jurists assumed that corporations could be created only by political or ecclesiastical authority and that corporations were creatures of the state or church. By the seventeenth century, with feudalism on the wane and business enterprise becoming a growing force, kings extracted higher taxes and intervened more directly in the affairs of businesses by refusing to permit them to operate in corporate form except by royal grant. This came to be known as the **concession theory**¹, because incorporation was a concession from the sovereign.

The most important concessions, or charters, were those given to the giant foreign trading companies, including the Russia Company (1554), the British East India Company (1600), Hudson's Bay Company (1670, and still operating in Canada under the name "the Bay"), and the South Sea Company (1711). These were **joint-stock companies**²—that is, individuals contributed capital to the enterprise, which traded on behalf of all the stockholders. Originally, trading companies were formed for single voyages, but the advantages of a continuing fund of capital soon became apparent. Also apparent was the legal characteristic that above all led shareholders to subscribe to the stock: limited liability. They risked only the cash they put in, not their personal fortunes.

1. Incorporation was a concession given by royal grant of a sovereign.
2. Companies in which stock or company funds are held jointly.

Some companies were wildly successful. The British East India Company paid its original investors a fourfold return between 1683 and 1692. But perhaps nothing excited the imagination of the British more than the discovery of gold bullion aboard a Spanish shipwreck; 150 companies were quickly formed to salvage the

sunken Spanish treasure. Though most of these companies were outright frauds, they ignited the search for easy wealth by a public unwary of the risks. In particular, the South Sea Company promised the sun and the moon: in return for a monopoly over the slave trade to the West Indies, it told an enthusiastic public that it would retire the public debt and make every person rich.

In 1720, a fervor gripped London that sent stock prices soaring. Beggars and earls alike speculated from January to August; and then the bubble burst. Without considering the ramifications, Parliament had enacted the highly restrictive Bubble Act, which was supposed to do away with unchartered **joint-stock** companies. When the government prosecuted four companies under the act for having fraudulently obtained charters, the public panicked and stock prices came tumbling down, resulting in history's first modern financial crisis.

As a consequence, corporate development was severely retarded in England. Distrustful of the chartered company, Parliament issued few corporate charters, and then only for public or quasi-public undertakings, such as transportation, insurance, and banking enterprises. Corporation law languished: William Blackstone devoted less than 1 percent of his immensely influential *Commentaries on the Law of England* (1765) to corporations and omitted altogether any discussion of limited liability. In *The Wealth of Nations* (1776), Adam Smith doubted that the use of corporations would spread. England did not repeal the Bubble Act until 1825, and then only because the value of true incorporation had become apparent from the experience of its former colonies.

US Corporation Formation

The United States remained largely unaffected by the Bubble Act. Incorporation was granted only by special acts of state legislatures, even well into the nineteenth century, but many such acts were passed. Before the Revolution, perhaps fewer than a dozen business corporations existed throughout the thirteen colonies. During the 1790s, two hundred businesses were incorporated, and their numbers swelled thereafter. The theory that incorporation should not be accomplished except through special legislation began to give way. As industrial development accelerated in the mid-1800s, it was possible in many states to incorporate by adhering to the requirements of a general statute. Indeed, by the late nineteenth century, all but three states constitutionally *forbade* their legislatures from chartering companies through special enactments.

The US Supreme Court contributed importantly to the development of corporate law. In *Gibbons v. Ogden*, *Gibbons v. Ogden*, 22 U.S. 1 (1824). a groundbreaking case, the Court held that the Commerce Clause of the US Constitution (Article I, Section 8,

Clause 3) granted Congress the power to regulate interstate commerce. However, in *Paul v. Virginia*, *Paul v. Virginia*, 75 U.S. 168 (1868). the Court said that a state could prevent corporations not chartered there—that is, **out-of-state or foreign corporations**³—from engaging in what it considered the local, and not interstate, business of issuing insurance policies. The inference made by many was that states could not bar foreign corporations engaged in *interstate* business from their borders.

This decision brought about a competition in corporation laws. The early general laws had imposed numerous restrictions. The breadth of corporate enterprise was limited, ceilings were placed on total capital and indebtedness, incorporators were required to have residence in the state, the duration of the company often was not perpetual but was limited to a term of years or until a particular undertaking was completed, and the powers of management were circumscribed. These restrictions and limitations were thought to be necessary to protect the citizenry of the chartering legislature’s own state. But once it became clear that companies chartered in one state could operate in others, states began in effect to “sell” incorporation for tax revenues.

New Jersey led the way in 1875 with a general incorporation statute that greatly liberalized the powers of management and lifted many of the former restrictions. The Garden State was ultimately eclipsed by Delaware, which in 1899 enacted the most liberal corporation statute in the country, so that to the present day there are thousands of “Delaware corporations” that maintain no presence in the state other than an address on file with the secretary of state in Dover.

During the 1920s, the National Conference of Commissioners on Uniform State Laws drafted a Uniform Business Corporation Act, the final version of which was released in 1928. It was not widely adopted, but it did provide the basis during the 1930s for revisions of some state laws, including those in California, Illinois, Michigan, Minnesota, and Pennsylvania. By that time, in the midst of the Great Depression, the federal government for the first time intruded into corporate law in a major way by creating federal agencies, most notably the Securities and Exchange Commission in 1934, with power to regulate the interstate issuance of corporate stock.

Corporate Law Today

Following World War II, most states revised their general corporation laws. A significant development for states was the preparation of the Model Business Corporation Act by the American Bar Association’s Committee on Corporate Laws. About half of the states have adopted all or major portions of the act. The 2005

3. A company incorporated outside the state in which it is doing business.

version of this act, the Revised Model Business Corporation Act (RMBCA), will be referred to throughout our discussion of corporation law.

KEY TAKEAWAY

Corporations have their roots in political and religious authority. The concept of limited liability and visions of financial rewards fueled the popularity of joint-stock companies, particularly trading companies, in late-seventeenth- and early eighteenth-century England. The English Parliament successfully enacted the Bubble Act in 1720 to curb the formation of these companies; the restrictions weren't loosened until over one hundred years later, after England viewed the success of corporations in its former colonies. Although early corporate laws in the United States were fairly restrictive, once states began to "sell" incorporation for tax revenues, the popularity of liberal and corporate-friendly laws caught on, especially in Delaware beginning in 1899. A corporation remains a creature of the state—that is, the state in which it is incorporated. Delaware remains the state of choice because more corporations are registered there than in any other state.

EXERCISES

1. If the English Parliament had not enacted the Bubble Act in 1720, would the "bubble" have burst? If so, what would have been the consequences to corporate development?
2. What were some of the key components of early US corporate laws? What was the rationale behind these laws?
3. In your opinion, what are some of the liberal laws that attract corporations to Delaware?

43.2 Partnerships versus Corporations

LEARNING OBJECTIVES

1. Distinguish basic aspects of partnership formation from those of corporate formation.
2. Explain ownership and control in partnerships and in publicly held and closely held corporations.
3. Know how partnerships and corporations are taxed.

Let us assume that three people have already formed a partnership to run a bookstore business. Bob has contributed \$80,000. Carol has contributed a house in which the business can lawfully operate. Ted has contributed his services; he has been managing the bookstore, and the business is showing a slight profit. A friend has been telling them that they ought to incorporate. What are the major factors they should consider in reaching a decision?

Ease of Formation

Partnerships are easy to form. If the business is simple enough and the partners are few, the agreement need not even be written down. Creating a corporation is more complicated because formal documents must be placed on file with public authorities.

Ownership and Control

All general partners have equal rights in the management and conduct of the business. By contrast, ownership and control of corporations are, in theory, separated. In the **publicly held corporation**⁴, which has many shareholders, the separation is real. Ownership is widely dispersed because millions of shares are outstanding and it is rare that any single shareholder will own more than a tiny percentage of stock. It is difficult under the best of circumstances for shareholders to exert any form of control over corporate operations. However, in the **closely held corporation**⁵, which has few shareholders, the officers or senior managers are usually also the shareholders, so the separation of ownership and control may be less pronounced or even nonexistent.

4. A firm that is traded publicly through the sale of stock subscriptions, has many shareholders and widely dispersed ownership, and in which shareholders have little control.

5. A corporation with few shareholders, so that separation of ownership and control may be less pronounced than in a publicly held corporation or even nonexistent.

Transferability of Interests

Transferability of an interest in a partnership is a problem because a transferee cannot become a member unless all partners consent. The problem can be addressed and overcome in the partnership agreement. **Transfer of interest**⁶ in a corporation, through a sale of stock, is much easier; but for the stock of a small corporation, there might not be a market or there might be contractual restrictions on transfer.

Financing

Partners have considerable flexibility in financing. They can lure potential investors by offering interests in profits and, in the case of general partnerships, control. Corporations can finance by selling freely transferable stock to the public or by incurring debt. Different approaches to the financing of corporations are discussed in [Chapter 44 "Legal Aspects of Corporate Finance"](#).

Taxation

The partnership is a conduit for income and is not taxed as a separate entity. Individual partners are taxed, and although limited by the 1986 Tax Reform Act, they can deduct partnership losses. Corporate earnings, on the other hand, are subject to double taxation. The corporation is first taxed on its own earnings as an entity. Then, when profits are distributed to shareholders in the form of dividends, the shareholders are taxed again. (A small corporation, with no more than one hundred shareholders, can elect S corporation status. Because S corporations are taxed as partnerships, they avoid double taxation.) However, incorporating brings several tax benefits. For example, the corporation can take deductions for life, medical, and disability insurance coverage for its employees, whereas partners or sole proprietors cannot.

KEY TAKEAWAY

Partnerships are easier to form than corporations, especially since no documents are required. General partners share both ownership and control, but in publicly held corporations, these functions are separated. Additional benefits for a partnership include flexibility in financing, single taxation, and the ability to deduct losses. Transfer of interest in a partnership can be difficult if not addressed in the initial agreement, since all partners must consent to the transfer.

6. Transferring an ownership interest through the sale of stock from one person to the next.

EXERCISES

1. Provide an example of when it would be best to form a partnership, and cite the advantages and disadvantages of doing so.
2. Provide an example of when it would be best to form a corporation, and cite the advantages and disadvantages of doing so.

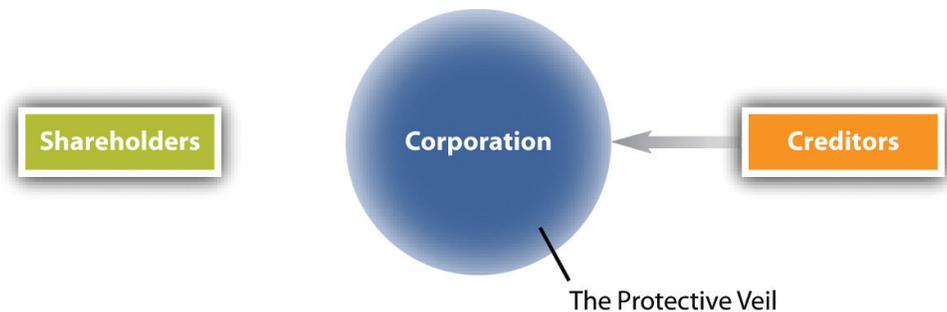

43.3 The Corporate Veil: The Corporation as a Legal Entity

LEARNING OBJECTIVES

1. Know what rights a corporate “person” and a natural person have in common.
2. Recognize when a corporate “veil” is pierced and shareholder liability is imposed.
3. Identify other instances when a shareholder will be held personally liable.

In comparing partnerships and corporations, there is one additional factor that ordinarily tips the balance in favor of incorporating: the corporation is a legal entity in its own right, one that can provide a “veil” that protects its shareholders from personal liability.

Figure 43.1 *The Corporate Veil*

This crucial factor accounts for the development of much of corporate law. Unlike the individual actor in the legal system, the corporation is difficult to deal with in conventional legal terms. The business of the sole proprietor and the sole proprietor herself are one and the same. When a sole proprietor makes a decision, she risks her own capital. When the managers of a corporation take a corporate action, they are risking the capital of others—the shareholders. Thus accountability is a major theme in the system of law constructed to cope with legal entities other than natural persons.

The Basic Rights of the Corporate “Person”

To say that a **corporation is a “person”**⁷ does not automatically describe what its rights are, for the courts have not accorded the corporation every right guaranteed a natural person. Yet the Supreme Court recently affirmed in *Citizens United v. Federal Election Commission* (2010) that the government may not suppress the First Amendment right of political speech because the speaker is a corporation rather than a natural person. According to the Court, “No sufficient governmental interest justifies limits on the political speech of nonprofit or for-profit corporations.” *Citizens United v. Federal Election Commission*, 558 U.S. ___ (2010).

The courts have also concluded that corporations are entitled to the essential constitutional protections of due process and equal protection. They are also entitled to Fourth Amendment protection against unreasonable search and seizure; in other words, the police must have a search warrant to enter corporate premises and look through files. Warrants, however, are not required for highly regulated industries, such as those involving liquor or guns. The Double Jeopardy Clause applies to criminal prosecutions of corporations: an acquittal cannot be appealed nor can the case be retried. For purposes of the federal courts’ diversity jurisdiction, a corporation is deemed to be a citizen of both the state in which it is incorporated and the state in which it has its principal place of business (often, the corporate “headquarters”).

Until relatively recently, few cases had tested the power of the state to limit the right of corporations to spend their own funds to speak the “corporate mind.” Most cases involving corporate free speech address advertising, and few states have enacted laws that directly impinge on the freedom of companies to advertise. But those states that have done so have usually sought to limit the ability of corporations to sway voters in public referenda. In 1978, the Supreme Court finally confronted the issue head on in *First National Bank of Boston v. Bellotti* ([Section 43.7.1 "Limiting a Corporation’s First Amendment Rights"](#)). The ruling in *Bellotti* was reaffirmed by the Supreme Court in *Citizens United v. Federal Election Commission*. In *Citizens United*, the Court struck down the part of the McCain-Feingold Act/The Bipartisan Campaign Reform Act of 2002 (BCRA, McCain–Feingold Act, Pub.L. 107-155, 116 Stat. 81, enacted March 27, 2002, H.R. 2356). that prohibited all corporations, both for-profit and not-for-profit, and unions from broadcasting “electioneering communications.”

Absence of Rights

7. When corporations are granted the same rights as natural persons.

Corporations lack certain rights that natural persons possess. For example, corporations do not have the privilege against self-incrimination guaranteed for natural persons by the Fifth and Fourteenth Amendments. In any legal proceeding,

the courts may force a corporation to turn over incriminating documents, even if they also incriminate officers or employees of the corporation. As we explore in [Chapter 47 "Corporate Expansion, State and Federal Regulation of Foreign Corporations, and Corporate Dissolution"](#), corporations are not citizens under the Privileges and Immunities Clause of the Constitution, so that the states can discriminate between domestic and foreign corporations. And the corporation is not entitled to federal review of state criminal convictions, as are many individuals.

Piercing the Corporate Veil

Given the importance of the corporate entity as a veil that limits shareholder liability, it is important to note that in certain circumstances, the courts may reach beyond the wall of protection that divides a corporation from the people or entities that exist behind it. This is known as **piercing the corporate veil**⁸, and it will occur in two instances: (1) when the corporation is used to commit a fraud or an injustice and (2) when the corporation does not act as if it were one.

Fraud

The Felsenthal Company burned to the ground. Its president, one of the company's largest creditors and also virtually its sole owner, instigated the fire. The corporation sued the insurance company to recover the amount for which it was insured. According to the court in the Felsenthal case, "The general rule of law is that the willful burning of property by a stockholder in a corporation is not a defense against the collection of the insurance by the corporation, and...the corporation cannot be prevented from collecting the insurance because its agents willfully set fire to the property without the participation or authority of the corporation or of all of the stockholders of the corporation." *D. I. Felsenthal Co. v. Northern Assurance Co., Ltd.*, 284 Ill. 343, 120 N.E. 268 (1918). But because the fire was caused by the beneficial owner of "practically all" the stock, who also "has the absolute management of [the corporation's] affairs and its property, and is its president," the court refused to allow the company to recover the insurance money; allowing the company to recover would reward fraud. *Felsenthal Co. v. Northern Assurance Co., Ltd.*, 120 N.E. 268 (Ill. 1918).

8. The protection of the corporation (the veil) is set aside for litigation purposes, and liability can be imposed on individual shareholders or entities that exist behind the corporation.

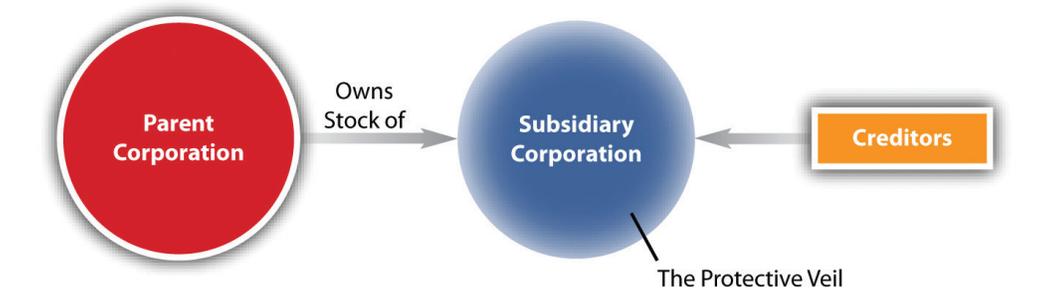

9. A failure to follow corporate formalities—for example, inadequate capitalization or commingling of assets—can subject stockholders to personal liability.

Failure to Act as a Corporation

In other limited circumstances, individual stockholders may also be found personally liable. Failure to follow corporate formalities, for example, may subject stockholders to **personal liability**⁹. This is a special risk that small, especially one-person, corporations run. Particular factors that bring this rule into play include inadequate capitalization, omission of regular meetings, failure to record minutes of meetings, failure to file annual reports, and commingling of corporate and

personal assets. Where these factors exist, the courts may look through the corporate veil and pluck out the individual stockholder or stockholders to answer for a tort, contract breach, or the like. The classic case is the taxicab operator who incorporates several of his cabs separately and services them through still another corporation. If one of the cabs causes an accident, the corporation is usually “judgment proof” because the corporation will have few assets (practically worthless cab, minimum insurance). The courts frequently permit plaintiffs to proceed against the common owner on the grounds that the particular corporation was inadequately financed.

Figure 43.2 *The Subsidiary as a Corporate Veil*

When a corporation owns a subsidiary corporation, the question frequently arises whether the subsidiary is acting as an independent entity (see [Figure 43.2 "The Subsidiary as a Corporate Veil"](#)). The Supreme Court addressed this question of derivative versus direct liability of the corporate parent vis-à-vis its subsidiary in *United States v. Bestfoods*, (see [Section 43.7.2 "Piercing the Corporate Veil"](#)).

Other Types of Personal Liability

Even when a corporation is formed for a proper purpose and is operated as a corporation, there are instances in which individual shareholders will be personally liable. For example, if a shareholder involved in company management commits a tort or enters into a contract in a personal capacity, he will remain personally liable for the consequences of his actions. In some states, statutes give employees special rights against shareholders. For example, a New York statute permits employees to recover wages, salaries, and debts owed them by the company from the ten largest shareholders of the corporation. (Shareholders of public companies whose stock is traded on a national exchange or over the counter are exempt.) Likewise, federal law permits the IRS to recover from the “responsible persons” any withholding taxes collected by a corporation but not actually paid over to the US Treasury.

KEY TAKEAWAY

Corporations have some of the legal rights of a natural person. They are entitled to the constitutional protections of due process and equal protection, Fourth Amendment protection against unreasonable search and seizure, and First Amendment protection of free speech and expression. For purposes of the federal courts' diversity jurisdiction, a corporation is deemed to be a citizen of both the state in which it is incorporated and the state in which it has its principal place of business. However, corporations do not have the privilege against self-incrimination guaranteed for natural persons by the Fifth and Fourteenth Amendments. Further, corporations are not free from liability. Courts will pierce the corporate veil and hold a corporation liable when the corporation is used to perpetrate fraud or when it fails to act as a corporation.

EXERCISES

1. Do you think that corporations should have rights similar to those of natural persons? Should any of these rights be curtailed?
2. What is an example of speaking the "corporate mind"?
3. If Corporation BCD's president and majority stockholder secretly sells all of his stock before resigning a few days later, and the corporation's unexpected change in majority ownership causes the share price to plummet, do corporate stockholders have a cause of action? If so, under what theory?

43.4 Classifications of Corporations

LEARNING OBJECTIVES

1. Distinguish the “public,” or municipal, corporation from the publicly held corporation.
2. Explain how the tax structure for professional corporations evolved.
3. Define the two types of business corporations.

Nonprofit Corporations

One of the four major classifications of corporations is the **nonprofit corporation**¹⁰ (also called not-for-profit corporation). It is defined in the American Bar Association’s Model Non-Profit Corporation Act as “a corporation no part of the income of *which* is distributable to its members, directors or officers.” Nonprofit corporations may be formed under this law for charitable, educational, civil, religious, social, and cultural purposes, among others.

Public Corporations

The true public corporation is a governmental entity. It is often called a **municipal corporation**¹¹, to distinguish it from the publicly held corporation, which is sometimes also referred to as a “public” corporation, although it is in fact private (i.e., it is not governmental). Major cities and counties, and many towns, villages, and special governmental units, such as sewer, transportation, and public utility authorities, are incorporated. These corporations are not organized for profit, do not have shareholders, and operate under different statutes than do business corporations.

Professional Corporations

Until the 1960s, lawyers, doctors, accountants, and other professionals could not practice their professions in corporate form. This inability, based on a fear of professionals’ being subject to the direction of the corporate owners, was financially disadvantageous. Under the federal income tax laws then in effect, corporations could establish far better pension plans than could the self-employed. During the 1960s, the states began to let professionals incorporate, but the IRS balked, denying them many tax benefits. In 1969, the IRS finally conceded that it would tax a **professional corporation**¹² just as it would any other corporation, so

10. A corporation in which no part of the income is distributable to its members, directors, or officers.

11. A governmental entity; also called a public corporation.

12. A corporation of lawyers, doctor, accountants, or other professionals who enjoy the same benefits in corporate form as do other corporations.

that professionals could, from that time on, place a much higher proportion of tax-deductible income into a tax-deferred pension. That decision led to a burgeoning number of professional corporations.

Business Corporations

The Two Types

It is the **business corporation**¹³ proper that we focus on in this unit. There are two broad types of business corporations: publicly held (or public) and closely held (or close or private) corporations. Again, both types are private in the sense that they are not governmental.

The publicly held corporation is one in which stock is widely held or available for wide public distribution through such means as trading on a national or regional stock exchange. Its managers, if they are also owners of stock, usually constitute a small percentage of the total number of shareholders and hold a small amount of stock relative to the total shares outstanding. Few, if any, shareholders of public corporations know their fellow shareholders.

By contrast, the shareholders of the closely held corporation are fewer in number. Shares in a closely held corporation could be held by one person, and usually by no more than thirty. Shareholders of the closely held corporation often share family ties or have some other association that permits each to know the others.

Though most closely held corporations are small, no economic or legal reason prevents them from being large. Some are huge, having annual sales of several billion dollars each. Roughly 90 percent of US corporations are closely held.

The giant publicly held companies with more than \$1 billion in assets and sales, with initials such as IBM and GE, constitute an exclusive group. Publicly held corporations outside this elite class fall into two broad (nonlegal) categories: those that are quoted on stock exchanges and those whose stock is too widely dispersed to be called closely held but is not traded on exchanges.

KEY TAKEAWAY

There are four major classifications of corporations: (1) nonprofit, (2) municipal, (3) professional, and (4) business. Business corporations are divided into two types, publicly held and closely held corporations.

13. In contrast to public (municipal), professional, or nonprofit corporations, business corporations are of two types: publicly held and closely held, referring to how the stock is held within the corporation.

EXERCISES

1. Why did professionals, such as doctors, lawyers, and accountants, wait so long to incorporate?
2. Distinguish a publicly held corporation from a closely held one.
3. Are most corporations in the US publicly or closely held? Are closely held corporations subject to different provisions than publicly held ones?

43.5 Corporate Organization

LEARNING OBJECTIVES

1. Recognize the steps to issue a corporate charter.
2. Know the states' rights in modifying a corporate charter.
3. Discuss factors to consider in selecting a state in which to incorporate.
4. Explain the functions and liability of a promoter.
5. Understand the business and legal requirements in executing and filing the articles of incorporation.

As discussed in [Section 43.4 "Classifications of Corporations"](#), corporate status offers companies many protections. If the owners of a business decide to incorporate after weighing the pros and cons of incorporation, they need to take the steps explained in this section.

The Corporate Charter

Function of the Charter

The ultimate goal of the incorporation process is issuance of a **corporate charter**¹⁴. The term used for the document varies from state to state. Most states call the basic document filed in the appropriate public office the “articles of incorporation” or “certificate of incorporation,” but there are other variations. There is no legal significance to these differences in terminology.

Chartering is basically a state prerogative. Congress has chartered several enterprises, including national banks (under the National Banking Act), federal savings and loan associations, national farm loan associations, and the like, but virtually all business corporations are chartered at the state level.

Originally a legislative function, chartering is now an administrative function in every state. The secretary of state issues the final indorsement to the articles of incorporation, thus giving them legal effect.

Charter as a Contract

The charter is a contract between the state and the corporation. Under the Contracts Clause of Article I of the Constitution, no state can pass any law

14. The basic document of incorporation filed in the appropriate public office, also referred to as articles of incorporation.

“impairing the obligation of contracts.” In 1816, the question arose whether a state could revoke or amend a corporate charter once granted. The corporation in question was Dartmouth College. The New Hampshire legislature sought to turn the venerable private college, operating under an old royal charter, into a public institution by changing the membership of its board. The case wound up in the Supreme Court. Chief Justice John Marshall ruled that the legislature’s attempt was unconstitutional, because to amend a charter is to impair a contract. *Trustees of Dartmouth College v. Woodward*, 17 U.S. 518 (1819).

This decision pleased incorporators because it implied that once a corporation had been created, the state could never modify the powers it had been granted. But, in addition, the ruling seemed to favor monopolies. The theory was that by granting a charter to, say, a railroad corporation, the state was barred from creating any further railroad corporations. Why? Because, the lawyers argued, a competitor would cut into the first company’s business, reducing the value of the charter, hence impairing the contract. Justice Joseph Story, concurring in the *Dartmouth* case, had already suggested the way out for the states: “If the legislature mean to claim such an authority [to alter or amend the charter], it must be reserved in the grant. The charter of Dartmouth College contains no such reservation....” The states quickly picked up on Justice Story’s suggestion and wrote into the charter explicit language giving legislatures the authority to modify corporations’ charters at their pleasure. So the potential immutability of corporate charters had little practical chance to develop.

Selection of a State

Where to Charter

Choosing the particular venue in which to incorporate is the first critical decision to be made after deciding to incorporate. Some corporations, though headquartered in the United States, choose to incorporate offshore to take advantage of lenient taxation laws. Advantages of an offshore corporation include not only lenient tax laws but also a great deal of privacy as well as certain legal protections. For example, the names of the officers and directors can be excluded from documents filed. In the United States, over half of the *Fortune* 500 companies hold Delaware charters for reasons related to Delaware’s having a lower tax structure, a favorable business climate, and a legal system—both its statutes and its courts—seen as being up to date, flexible, and often probusiness. Delaware’s success has led other states to compete, and the political realities have caused the Revised Model Business Corporation Act (RMBCA), which was intentionally drafted to balance the interests of all significant groups (management, shareholders, and the public), to be revised from time to time so that it is more permissive from the perspective of management.

Why Choose Delaware?

Delaware remains the most popular state in which to incorporate for several reasons, including the following: (1) low incorporation fees; (2) only one person is needed to serve the incorporator of the corporation; the RMBC requires three incorporators; (3) no minimum capital requirement; (4) favorable tax climate, including no sales tax; (5) no taxation of shares held by nonresidents; and (5) no corporate income tax for companies doing business outside of Delaware. In addition, Delaware's Court of Chancery, a court of equity, is renowned as a premier business court with a well-established body of corporate law, thereby affording a business a certain degree of predictability in judicial decision making.

The Promoter Functions

Once the state of incorporation has been selected, it is time for **promoters**¹⁵, the midwives of the enterprise, to go to work. Promoters are the individuals who take the steps necessary to form the corporation, and they often will receive stock in exchange for their efforts. They have four principal functions: (1) to seek out or discover business opportunities, (2) to raise capital by persuading investors to sign stock subscriptions, (3) to enter into contracts on behalf of the corporation to be formed, (4) and to prepare the articles of incorporation.

Promoters have acquired an unsavory reputation as fast talkers who cajole investors out of their money. Though some promoters fit this image, it is vastly overstated. Promotion is difficult work often carried out by the same individuals who will manage the business.

Contract Liability

Promoters face two major legal problems. First, they face possible liability on contracts made on behalf of the business before it is incorporated. For example, suppose Bob is acting as promoter of the proposed BCT Bookstore, Inc. On September 15, he enters into a contract with Computogram Products to purchase computer equipment for the corporation to be formed. If the incorporation never takes place, or if the corporation is formed but the corporation refuses to accept the contract, Bob remains liable.

Now assume that the corporation is formed on October 15, and on October 18 it formally accepts all the contracts that Bob signed prior to October 15. Does Bob remain liable? In most states, he does. The ratification theory of agency law will not help in many states that adhere strictly to agency rules, because there was no

15. An individual who takes the initial steps needed to form a corporation.

principal (the corporation) in existence when the contract was made and hence the promoter must remain liable. To avoid this result, Bob should seek an express novation (see [Chapter 15 "Discharge of Obligations"](#)), although in some states, a novation will be implied. The intention of the parties should be stated as precisely as possible in the contract, as the promoters learned in *RKO-Stanley Warner Theatres, Inc. v. Graziano*, (see [Section 43.7.3 "Corporate Promoter"](#)).

The promoters' other major legal concern is the duty owed to the corporation. The law is clear that promoters owe a fiduciary duty. For example, a promoter who transfers real estate worth \$250,000 to the corporation in exchange for \$750,000 worth of stock would be liable for \$500,000 for breach of fiduciary duty.

Preincorporation Stock Subscriptions

One of the promoter's jobs is to obtain **preincorporation stock subscriptions**¹⁶ to line up offers by would-be investors to purchase stock in the corporation to be formed. These stock subscriptions are agreements to purchase, at a specified price, a certain number of shares of stock of a corporation, which is to be formed at some point in the future. The contract, however, actually comes into existence *after* formation, once the corporation itself accepts the offer to subscribe. Alice agrees with Bob to invest \$10,000 in the BCT Bookstore, Inc. for one thousand shares. The agreement is treated as an offer to purchase. The offer is deemed accepted at the moment the bookstore is incorporated.

The major problem for the corporation is an attempt by subscribers to revoke their offers. A basic rule of contract law is that offers are revocable before acceptance. Under RMBCA, Section 6.20, however, a subscription for shares is irrevocable for six months unless the subscription agreement itself provides otherwise or unless all the subscribers consent to revocation. In many states that have not adopted the model act, the contract rule applies and the offer is always revocable. Other states use various common-law devices to prevent revocation. For example, the subscription by one investor is held as consideration for the subscription of another, so that a binding contract has been formed.

Execution and Filing of the Articles of Incorporation

Once the business details are settled, the promoters, now known as incorporators, must sign and deliver the articles of incorporation to the secretary of state. The articles of incorporation typically include the following: the corporate name; the address of the corporation's initial registered office; the period of the corporation's duration (usually perpetual); the company's purposes; the total number of shares, the classes into which they are divided, and the par value of each; the limitations

16. Offers by would-be investors to purchase stock in a corporation that is not as yet formed.

and rights of each class of shareholders; the authority of the directors to establish preferred or special classes of stock; provisions for preemptive rights; provisions for the regulation of the internal affairs of the corporation, including any provision restricting the transfer of shares; the number of directors constituting the initial board of directors and the names and addresses of initial members; and the name and address of each incorporator. Although compliance with these requirements is largely a matter of filling in the blanks, two points deserve mention.

First, the choice of a name is often critical to the business. Under RMBCA, Section 4.01, the name must include one of the following words (or abbreviations): corporation, company, incorporated, or limited (Corp., Co., Inc., or Ltd.). The name is not allowed to deceive the public about the corporation's purposes, nor may it be the same as that of any other company incorporated or authorized to do business in the state.

These legal requirements are obvious; the business requirements are much harder. If the name is not descriptive of the business or does not anticipate changes in the business, it may have to be changed, and the change can be expensive. For example, when Standard Oil Company of New Jersey changed its name to Exxon in 1972, the estimated cost was over \$100 million. (And even with this expenditure, some shareholders grumbled that the new name sounded like a laxative.)

The second point to bear in mind about the articles of incorporation is that drafting the clause stating corporate purposes requires special care, because the corporation will be limited to the purposes set forth. In one famous case, the charter of Cornell University placed a limit on the amount of contributions it could receive from any one benefactor. When Jennie McGraw died in 1881, leaving to Cornell the carillon that still plays on the Ithaca, New York, campus to this day, she also bequeathed to the university her residuary estate valued at more than \$1 million. This sum was greater than the ceiling placed in Cornell's charter. After lengthy litigation, the university lost in the US Supreme Court, and the money went to her family. *Cornell University v. Fiske*, 136 U.S. 152 (1890). The dilemma is how to draft a clause general enough to allow the corporation to expand, yet specific enough to prevent it from engaging in undesirable activities.

Some states require the purpose clauses to be specific, but the usual approach is to permit a broad statement of purposes. Section 3.01 of the RMBCA goes one step further in providing that a corporation automatically "has the purpose of engaging in any lawful business" unless the articles specify a more limited purpose. Once completed, the articles of incorporation are delivered to the secretary of state for filing. The existence of a corporation begins once the articles have been filed.

Organizational Meeting of Directors

The first order of business, once the certificate of incorporation is issued, is a meeting of the board of directors named in the articles of incorporation. They must adopt bylaws, elect officers, and transact any other business that may come before the meeting (RMBCA, Section 2.05). Other business would include accepting (ratifying) promoters' contracts, calling for the payment of stock subscriptions, and adopting bank resolution forms, giving authority to various officers to sign checks drawn on the corporation.

Section 10.20 of the RMBCA vests in the directors the power to alter, amend, or repeal the bylaws adopted at the initial meeting, subject to repeal or change by the shareholders. The articles of incorporation may reserve the power to modify or repeal exclusively to the shareholders. The bylaws may contain any provisions that do not conflict with the articles of incorporation or the law of the state.

Typical provisions in the bylaws include fixing the place and time at which annual stockholders' meetings will be held, fixing a quorum, setting the method of voting, establishing the method of choosing directors, creating committees of directors, setting down the method by which board meetings may be called and the voting procedures to be followed, determining the offices to be filled by the directors and the powers with which each officer shall be vested, fixing the method of declaring dividends, establishing a fiscal year, setting out rules governing issuance and transfer of stock, and establishing the method of amending the bylaws.

Section 2.07 of the RMBCA provides that the directors may adopt bylaws that will operate during an emergency. An emergency is a situation in which "a quorum of the corporation's directors cannot readily be assembled because of some catastrophic event."

KEY TAKEAWAY

Articles of incorporation represent a corporate charter—that is, a contract between the corporation and the state. Filing these articles, or “chartering,” is accomplished at the state level. The secretary of state’s final approval gives these articles legal effect. A state cannot change a charter unless it reserves the right when granting the charter.

In selecting a state in which to incorporate, a corporation looks for a favorable corporate climate. Delaware remains the state of choice for incorporation, particularly for publicly held companies. Most closely held companies choose to incorporate in their home states.

Following the state selection, the promoter commences his or her functions, which include entering into contracts on behalf of the corporation to be formed (for which he or she can be held liable) and preparing the articles of incorporation.

The articles of incorporation must include the corporation’s name and its corporate purpose, which can be broad. Finally, once the certificate of incorporation is issued, the corporation’s board of directors must hold an organizational meeting.

EXERCISES

1. Does the Contracts Clause of the Constitution, which forbids a state from impeding a contract, apply to corporations?
2. What are some of the advantages of selecting Delaware as the state of incorporation?
3. What are some of the risks that a promoter faces for his or her actions on behalf of the corporation? Can he or she limit these risks?
4. What are the dangers of limiting a corporation’s purpose?
5. What is the order of business at the first board of directors’ meeting?

43.6 Effect of Organization

LEARNING OBJECTIVES

1. Distinguish between a de jure and a de facto corporation.
2. Define the doctrine of corporation by estoppel.

De Jure and De Facto Corporations

If promoters meet the requirements of corporate formation, a **de jure corporation**¹⁷, considered a legal entity, is formed. Because the various steps are complex, the formal prerequisites are not always met. Suppose that a company, thinking its incorporation has taken place when in fact it hasn't met all requirements, starts up its business. What then? Is everything it does null and void? If three conditions exist, a court might decide that a **de facto corporation**¹⁸ has been formed; that is, the business will be recognized as a corporation. The state then has the power to force the de facto corporation to correct the defect(s) so that a de jure corporation will be created.

The three traditional conditions are the following: (1) a statute must exist under which the corporation could have been validly incorporated, (2) the promoters must have made a bona fide attempt to comply with the statute, and (3) corporate powers must have been used or exercised.

A frequent cause of defective incorporation is the promoters' failure to file the articles of incorporation in the appropriate public office. The states are split on whether a de facto corporation results if every other legal requirement is met.

Corporation by Estoppel

Even if the incorporators omit important steps, it is still possible for a court, under estoppel principles, to treat the business as a corporation. Assume that Bob, Carol, and Ted have sought to incorporate the BCT Bookstore, Inc., but have failed to file the articles of incorporation. At the initial directors' meeting, Carol turns over to the corporation a deed to her property. A month later, Bob discovers the omission and hurriedly submits the articles of incorporation to the appropriate public office. Carol decides she wants her land back. It is clear that the corporation was not de jure at the time she surrendered her deed, and it was probably not de facto either. Can she recover the land? Under equitable principles, the answer is no. She is

17. A corporation that exists in law, having met all of the necessary legal requirements.

18. A corporation that exists in fact, though it has not met all of the necessary legal requirements.

estopped from denying the existence of the corporation, because it would be inequitable to permit one who has conducted herself as though there were a corporation to deny its existence in order to defeat a contract into which she willingly entered. As *Cranson v. International Business Machines Corp.* indicates (Section 43.7.4 "De Jure and De Facto Corporations"), the doctrine of **corporation by estoppel**¹⁹ can also be used by the corporation against one of its creditors.

KEY TAKEAWAY

A court will find that a corporation might exist under fact (de facto), and not under law (de jure) if the following conditions are met: (1) a statute exists under which the corporation could have been validly incorporated, (2) the promoters must have made a bona fide attempt to comply with the statute, and (3) corporate powers must have been used or exercised. A de facto corporation may also be found when a promoter fails to file the articles of incorporation. In the alternative, the court may look to estoppel principles to find a corporation.

EXERCISES

1. What are some of the formal prerequisites to forming a de jure corporation?
2. Are states in agreement over what represents a de facto corporation if a promoter fails to file the articles of incorporation?
3. What is the rationale for corporation by estoppel?

19. Use of the equitable principle of estoppel by a court to treat a business as a corporation.

43.7 Cases

Limiting a Corporation's First Amendment Rights

First National Bank of Boston v. Bellotti

435 U.S. 765 (1978)

MR. JUSTICE POWELL delivered the opinion of the Court.

In sustaining a state criminal statute that forbids certain expenditures by banks and business corporations for the purpose of influencing the vote on referendum proposals, the Massachusetts Supreme Judicial Court held that the First Amendment rights of a corporation are limited to issues that materially affect its business, property, or assets. The court rejected appellants' claim that the statute abridges freedom of speech in violation of the First and Fourteenth Amendments. The issue presented in this context is one of first impression in this Court. We postponed the question of jurisdiction to our consideration of the merits. We now reverse.

The statute at issue, Mass. Gen. Laws Ann., Ch. 55, § 8 (West Supp. 1977), prohibits appellants, two national banking associations and three business corporations, from making contributions or expenditures "for the purpose of...influencing or affecting the vote on any question submitted to the voters, other than one materially affecting any of the property, business or assets of the corporation." The statute further specifies that "[no] question submitted to the voters solely concerning the taxation of the income, property or transactions of individuals shall be deemed materially to affect the property, business or assets of the corporation." A corporation that violates § 8 may receive a maximum fine of \$50,000; a corporate officer, director, or agent who violates the section may receive a maximum fine of \$10,000 or imprisonment for up to one year, or both. Appellants wanted to spend money to publicize their views on a proposed constitutional amendment that was to be submitted to the voters as a ballot question at a general election on November 2, 1976. The amendment would have permitted the legislature to impose a graduated tax on the income of individuals. After appellee, the Attorney General of Massachusetts, informed appellants that he intended to enforce § 8 against them, they brought this action seeking to have the statute declared unconstitutional.

The court below framed the principal question in this case as whether and to what extent corporations have First Amendment rights. We believe that the court posed

the wrong question. The Constitution often protects interests broader than those of the party seeking their vindication. The First Amendment, in particular, serves significant societal interests. The proper question therefore is not whether corporations “have” First Amendment rights and, if so, whether they are coextensive with those of natural persons. Instead, the question must be whether § 8 abridges expression that the First Amendment was meant to protect. We hold that it does. The speech proposed by appellants is at the heart of the First Amendment’s protection.

The freedom of speech and of the press guaranteed by the Constitution embraces at the least the liberty to discuss publicly and truthfully all matters of public concern without previous restraint or fear of subsequent punishment. Freedom of discussion, if it would fulfill its historic function in this nation, must embrace all issues about which information is needed or appropriate to enable the members of society to cope with the exigencies of their period. *Thornhill v. Alabama*, 310 U.S. 88, 101-102 (1940).

The referendum issue that appellants wish to address falls squarely within this description. In appellants’ view, the enactment of a graduated personal income tax, as proposed to be authorized by constitutional amendment, would have a seriously adverse effect on the economy of the State. The importance of the referendum issue to the people and government of Massachusetts is not disputed. Its merits, however, are the subject of sharp disagreement.

We thus find no support in the First or Fourteenth Amendment, or in the decisions of this Court, for the proposition that speech that otherwise would be within the protection of the First Amendment loses that protection simply because its source is a corporation that cannot prove, to the satisfaction of a court, a material effect on its business or property. The “materially affecting” requirement is not an identification of the boundaries of corporate speech etched by the Constitution itself. Rather, it amounts to an impermissible legislative prohibition of speech based on the identity of the interests that spokesmen may represent in public debate over controversial issues and a requirement that the speaker have a sufficiently great interest in the subject to justify communication.

Section 8 permits a corporation to communicate to the public its views on certain referendum subjects—those materially affecting its business—but not others. It also singles out one kind of ballot question—individual taxation as a subject about which corporations may never make their ideas public. The legislature has drawn the line between permissible and impermissible speech according to whether there is a sufficient nexus, as defined by the legislature, between the issue presented to the voters and the business interests of the speaker.

In the realm of protected speech, the legislature is constitutionally disqualified from dictating the subjects about which persons may speak and the speakers who may address a public issue. If a legislature may direct business corporations to “stick to business,” it also may limit other corporations—religious, charitable, or civic—to their respective “business” when addressing the public. Such power in government to channel the expression of views is unacceptable under the First Amendment. Especially where, as here, the legislature’s suppression of speech suggests an attempt to give one side of a debatable public question an advantage in expressing its views to the people, the First Amendment is plainly offended.

Because that portion of § 8 challenged by appellants prohibits protected speech in a manner unjustified by a compelling state interest, it must be invalidated. The judgment of the Supreme Judicial Court is reversed.

CASE QUESTIONS

1. According to the court, does § 8 abridge a freedom that the First Amendment is intended to protect? If so, which freedom(s)?
2. Must a corporation prove a material effect on its business or property to maintain protection under the First Amendment?
3. Can a state legislature dictate the subjects on which a corporation may “speak”?

Piercing the Corporate Veil

United States v. Bestfoods

113 F.3d 572 (1998)

SOUTER, JUSTICE

The United States brought this action under §107(a)(2) of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA) against, among others, respondent CPC International, Inc., the parent corporation of the defunct Ott Chemical Co. (Ott II), for the costs of cleaning up industrial waste generated by Ott II’s chemical plant. Section 107(a)(2) authorizes suits against, among others, “any person who at the time of disposal of any hazardous substance owned or operated any facility.” The trial focused on whether CPC, as a parent corporation, had “owned or operated” Ott II’s plant within the meaning of §107(a)(2). The District Court said that operator liability may attach to a parent

corporation both indirectly, when the corporate veil can be pierced under state law, and directly, when the parent has exerted power or influence over its subsidiary by actively participating in, and exercising control over, the subsidiary's business during a period of hazardous waste disposal. Applying that test, the court held CPC liable because CPC had selected Ott II's board of directors and populated its executive ranks with CPC officials, and another CPC official had played a significant role in shaping Ott II's environmental compliance policy.

The Sixth Circuit reversed. Although recognizing that a parent company might be held directly liable under §107(a)(2) if it actually operated its subsidiary's facility in the stead of the subsidiary, or alongside of it as a joint venturer, that court refused to go further. Rejecting the District Court's analysis, the Sixth Circuit explained that a parent corporation's liability for operating a facility ostensibly operated by its subsidiary depends on whether the degree to which the parent controls the subsidiary and the extent and manner of its involvement with the facility amount to the abuse of the corporate form that will warrant piercing the corporate veil and disregarding the separate corporate entities of the parent and subsidiary. Applying Michigan veil-piercing law, the court decided that CPC was not liable for controlling Ott II's actions, since the two corporations maintained separate personalities and CPC did not utilize the subsidiary form to perpetrate fraud or subvert justice.

Held:

1. When (but only when) the corporate veil may be pierced, a parent corporation may be charged with derivative CERCLA liability for its subsidiary's actions in operating a polluting facility. It is a general principle of corporate law that a parent corporation (so-called because of control through ownership of another corporation's stock) is not liable for the acts of its subsidiaries. CERCLA does not purport to reject this bedrock principle, and the Government has indeed made no claim that a corporate parent is liable as an owner or an operator under §107(a)(2) simply because its subsidiary owns or operates a polluting facility. But there is an equally fundamental principle of corporate law, applicable to the parent-subsidiary relationship as well as generally, that the corporate veil may be pierced and the shareholder held liable for the corporation's conduct when, *inter alia*, the corporate form would otherwise be misused to accomplish certain wrongful purposes, most notably fraud, on the shareholder's behalf. CERCLA does not purport to rewrite this well-settled rule, either, and against this venerable common-law backdrop, the congressional silence is audible. Cf. *Edmonds v. Compagnie Generale Transatlantique*, 443 U.S. 256, 266-267. CERCLA's failure to speak to a matter as fundamental as the liability implications of corporate ownership demands application of the rule that, to abrogate a common-law principle, a statute must speak directly to the question addressed by the common law. *United States v. Texas*, 507 U.S. 529, 534.

2. A corporate parent that actively participated in, and exercised control over, the operations of its subsidiary's facility may be held directly liable in its own right under §107(a)(2) as an operator of the facility.

(a) Derivative liability aside, CERCLA does not bar a parent corporation from direct liability for its own actions. Under the plain language of §107(a)(2), any person who operates a polluting facility is directly liable for the costs of cleaning up the pollution, and this is so even if that person is the parent corporation of the facility's owner. Because the statute does not define the term "operate," however, it is difficult to define actions sufficient to constitute direct parental "operation." In the organizational sense obviously intended by CERCLA, to "operate" a facility ordinarily means to direct the workings of, manage, or conduct the affairs of the facility. To sharpen the definition for purposes of CERCLA's concern with environmental contamination, an operator must manage, direct, or conduct operations specifically related to the leakage or disposal of hazardous waste, or decisions about compliance with environmental regulations.

(b) The Sixth Circuit correctly rejected the direct liability analysis of the District Court, which mistakenly focused on the relationship between parent and subsidiary, and premised liability on little more than CPC's ownership of Ott II and its majority control over Ott II's board of directors. Because direct liability for the parent's operation of the facility must be kept distinct from derivative liability for the subsidiary's operation of the facility, the analysis should instead have focused on the relationship between CPC and the facility itself, *i.e.*, on whether CPC "operated" the facility, as evidenced by its direct participation in the facility's activities. That error was compounded by the District Court's erroneous assumption that actions of the joint officers and directors were necessarily attributable to CPC, rather than Ott II, contrary to time-honored common-law principles. The District Court's focus on the relationship between parent and subsidiary (rather than parent and facility), combined with its automatic attribution of the actions of dual officers and directors to CPC, erroneously, even if unintentionally, treated CERCLA as though it displaced or fundamentally altered common-law standards of limited liability. The District Court's analysis created what is in essence a relaxed, CERCLA-specific rule of derivative liability that would banish traditional standards and expectations from the law of CERCLA liability. Such a rule does not arise from congressional silence, and CERCLA's silence is dispositive.

(c) Nonetheless, the Sixth Circuit erred in limiting direct liability under CERCLA to a parent's sole or joint venture operation, so as to eliminate any possible finding that CPC is liable as an operator on the facts of this case. The ordinary meaning of the word "operate" in the organizational sense is not limited to those two parental actions, but extends also to situations in which, *e.g.*, joint officers or directors conduct the affairs of the facility on behalf of the parent, or agents of the parent

with no position in the subsidiary manage or direct activities at the subsidiary's facility. Norms of corporate behavior (undisturbed by any CERCLA provision) are crucial reference points, both for determining whether a dual officer or director has served the parent in conducting operations at the facility, and for distinguishing a parental officer's oversight of a subsidiary from his control over the operation of the subsidiary's facility. There is, in fact, some evidence that an agent of CPC alone engaged in activities at Ott II's plant that were eccentric under accepted norms of parental oversight of a subsidiary's facility: The District Court's opinion speaks of such an agent who played a conspicuous part in dealing with the toxic risks emanating from the plant's operation. The findings in this regard are enough to raise an issue of CPC's operation of the facility, though this Court draws no ultimate conclusion, leaving the issue for the lower courts to reevaluate and resolve in the first instance.

113 F.3d 572, vacated and remanded.

CASE QUESTIONS

1. In what ways can operator liability attach to a parent corporation? How did the Sixth Circuit Court disagree with the district court's analysis?
2. Is direct liability for a parent company's operation of the facility distinct from derivative liability for the subsidiary's operation of the facility? Should the focus be on parent and subsidiary or on parent and facility?
3. What norms of corporate behavior does the court look to in determining whether an officer or a director is involved in the operation of a facility?

Corporate Promoter

RKO-Stanley Warner Theatres, Inc. v. Graziano

355 A.2d. 830 (1976)

EAGEN, JUSTICE.

On April 30, 1970, RKO-Stanley Warner Theatres, Inc. [RKO], as seller, entered into an agreement of sale with Jack Jenofsky and Ralph Graziano, as purchasers. This agreement contemplated the sale of the Kent Theatre, a parcel of improved commercial real estate located at Cumberland and Kensington Avenues in Philadelphia, for a total purchase price of \$70,000. Settlement was originally scheduled for September 30, 1970, and, at the request of Jenofsky and Graziano,

continued twice, first to October 16, 1970, and then to October 21, 1970. However, Jenofsky and Graziano failed to complete settlement on the last scheduled date.

Subsequently, on November 13, 1970, RKO filed a complaint in equity seeking judicial enforcement of the agreement of sale. Although Jenofsky, in his answer to the complaint, denied personal liability for the performance of the agreement, the chancellor, after a hearing, entered a decree nisi granting the requested relief sought by RKO....This appeal ensued.

At the time of the execution of this agreement, Jenofsky and Graziano were engaged in promoting the formation of a corporation to be known as Kent Enterprises, Inc. Reflecting these efforts, Paragraph 19 of the agreement, added by counsel for Jenofsky and Graziano, recited:

It is understood by the parties hereto that it is the intention of the Purchaser to incorporate. Upon condition that such incorporation be completed by closing, all agreements, covenants, and warranties contained herein shall be construed to have been made between Seller and the resultant corporation and all documents shall reflect same.

In fact, Jenofsky and Graziano did file Articles of Incorporation for Kent Enterprises, Inc., with the State Corporation Bureau on October 9, 1971, twelve days prior to the scheduled settlement date. Jenofsky now contends the inclusion of Paragraph 19 in the agreement and the subsequent filing of incorporation papers, released him from any personal liability resulting from the non-performance of the agreement.

The legal relationship of Jenofsky to Kent Enterprises, Inc., at the date of the execution of the agreement of sale was that of promoter. As such, he is subject to the general rule that a promoter, although he may assume to act on behalf of a projected corporation and not for himself, will be held personally liable on contracts made by him for the benefit of a corporation he intends to organize. This personal liability will continue even after the contemplated corporation is formed and has received the benefits of the contract, unless there is a novation or other agreement to release liability.

The imposition of personal liability upon a promoter where that promoter has contracted on behalf of a corporation is based upon the principle that one who assumes to act for a nonexistent principal is himself liable on the contract in the absence of an agreement to the contrary.

[T]here [are] three possible understandings that parties may have when an agreement is executed by a promoter on behalf of a proposed corporation:

When a party is acting for a proposed corporation, he cannot, of course, bind it by anything he does, at the time, but he may (1) take on its behalf an offer from the other which, being accepted after the formation of the company, becomes a contract; (2) make a contract at the time binding himself, with the stipulation or understanding, that if a company is formed it will take his place and that then he shall be relieved of responsibility; or (3) bind himself personally without more and look to the proposed company, when formed, for indemnity.

Both RKO and Jenofsky concede the applicability of alternative No. 2 to the instant case. That is, they both recognize that Jenofsky (and Graziano) was to be initially personally responsible with this personal responsibility subsequently being released. Jenofsky contends the parties, by their inclusion of Paragraph 19 in the agreement, manifested an intention to release him from personal responsibility upon the mere formation of the proposed corporation, provided the incorporation was consummated prior to the scheduled closing date. However, while Paragraph 19 does make provision for recognition of the resultant corporation as to the closing documents, it makes no mention of any release of personal liability. Indeed, the entire agreement is silent as to the effect the formation of the projected corporation would have upon the personal liability of Jenofsky and Graziano. Because the agreement fails to provide expressly for the release of personal liability, it is, therefore, subject to more than one possible construction.

In *Consolidated Tile and Slate Co. v. Fox*, 410 Pa. 336, 339, 189 A.2d 228, 229 (1963), we stated that where an agreement is ambiguous and reasonably susceptible of two interpretations, “it must be construed most strongly against those who drew it.”...Instantly, the chancellor determined that the intent of the parties to the agreement was to hold Jenofsky personally responsible until such time as a corporate entity was formed and until such time as that corporate entity adopted the agreement. We believe this construction represents the only rational and prudent interpretation of the parties’ intent.

As found by the court below, this agreement was entered into on the financial strength of Jenofsky and Graziano, alone as individuals. Therefore, it would have been illogical for RKO to have consented to the release of their personal liability upon the mere formation of a resultant corporation prior to closing. For it is a well-settled rule that a contract made by a promoter, even though made for and in the name of a proposed corporation, in the absence of a subsequent adoption (either expressly or impliedly) by the corporation, will not be binding upon the corporation. If, as Jenofsky contends, the intent was to release personal

responsibility upon the mere incorporation prior to closing, the effect of the agreement would have been to create the possibility that RKO, in the event of non-performance, would be able to hold no party accountable: there being no guarantee that the resultant corporation would ratify the agreement. Without express language in the agreement indicating that such was the intention of the parties, we may not attribute this intention to them.

Therefore, we hold that the intent of the parties in entering into this agreement was to have Jenofsky and Graziano personally liable until such time as the intended corporation was formed and ratified the agreement. [And there is no evidence that Kent Enterprises ratified the agreement. The decree is affirmed.]

CASE QUESTIONS

1. Does a promoter's personal liability continue even after the corporation is formed? Can he or she look to the corporation for indemnity after the corporation is formed?
2. In what instance(s) is a contract made by a promoter not binding on a corporation?
3. In whose favor does a court construe an ambiguous agreement?

De Jure and De Facto Corporations

Cranson v. International Business Machines Corp.

234 Md. 477, 200 A.2d 33 (1964)

HORNEY, JUDGE

On the theory that the Real Estate Service Bureau was neither a *de jure* nor a *de facto* corporation and that Albion C. Cranson, Jr., was a partner in the business conducted by the Bureau and as such was personally liable for its debts, the International Business Machines Corporation brought this action against Cranson for the balance due on electric typewriters purchased by the Bureau. At the same time it moved for summary judgment and supported the motion by affidavit. In due course, Cranson filed a general issue plea and an affidavit in opposition to summary judgment in which he asserted in effect that the Bureau was a *de facto* corporation and that he was not personally liable for its debts.

The agreed statement of facts shows that in April 1961, Cranson was asked to invest in a new business corporation which was about to be created. Towards this purpose he met with other interested individuals and an attorney and agreed to purchase stock and become an officer and director. Thereafter, upon being advised by the attorney that the corporation had been formed under the laws of Maryland, he paid for and received a stock certificate evidencing ownership of shares in the corporation, and was shown the corporate seal and minute book. The business of the new venture was conducted as if it were a corporation, through corporate bank accounts, with auditors maintaining corporate books and records, and under a lease entered into by the corporation for the office from which it operated its business. Cranson was elected president and all transactions conducted by him for the corporation, including the dealings with I.B.M., were made as an officer of the corporation. At no time did he assume any personal obligation or pledge his individual credit to I.B.M. Due to an oversight on the part of the attorney, of which Cranson was not aware, the certificate of incorporation, which had been signed and acknowledged prior to May 1, 1961, was not filed until November 24, 1961. Between May 17 and November 8, the Bureau purchased eight typewriters from I.B.M., on account of which partial payments were made, leaving a balance due of \$4,333.40, for which this suit was brought.

Although a question is raised as to the propriety of making use of a motion for summary judgment as the means of determining the issues presented by the pleadings, we think the motion was appropriate. Since there was no genuine dispute as to the material facts, the only question was whether I.B.M. was entitled to judgment as a matter of law. The trial court found that it was, but we disagree.

The fundamental question presented by the appeal is whether an officer of a defectively incorporated association may be subjected to personal liability under the circumstances of this case. We think not.

Traditionally, two doctrines have been used by the courts to clothe an officer of a defectively incorporated association with the corporate attribute of limited liability. The first, often referred to as the doctrine of *de facto* corporations, has been applied in those cases where there are elements showing: (1) the existence of law authorizing incorporation; (2) an effort in good faith to incorporate under the existing law; and (3) actual use or exercise of corporate powers. The second, the doctrine of estoppel to deny the corporate existence, is generally employed where the person seeking to hold the officer personally liable has contracted or otherwise dealt with the association in such a manner as to recognize and in effect admit its existence as a corporate body.

* * *

There is, as we see it, a wide difference between creating a corporation by means of the *de facto* doctrine and estopping a party, due to his conduct in a particular case, from setting up the claim of no incorporation. Although some cases tend to assimilate the doctrines of incorporation *de facto* and by estoppel, each is a distinct theory and they are not dependent on one another in their application. Where there is a concurrence of the three elements necessary for the application of the *de facto* corporation doctrine, there exists an entity which is a corporation *de jure* against all persons but the state.

On the other hand, the estoppel theory is applied only to the facts of each particular case and may be invoked even where there is no corporation *de facto*. Accordingly, even though one or more of the requisites of a *de facto* corporation are absent, we think that this factor does not preclude the application of the estoppel doctrine in a proper case, such as the one at bar.

I.B.M. contends that the failure of the Bureau to file its certificate of incorporation debarred *all* corporate existence. But, in spite of the fact that the omission might have prevented the Bureau from being either a corporation *de jure* or *de facto*, Jones v. Linden Building Ass'n, we think that I.B.M. having dealt with the Bureau as if it were a corporation and relied on its credit rather than that of Cranson, is estopped to assert that the Bureau was not incorporated at the time the typewriters were purchased. In 1 Clark and Marshall, Private Corporations, § 89, it is stated:

The doctrine in relation to estoppel is based upon the ground that it would generally be inequitable to permit the corporate existence of an association to be denied by persons who have represented it to be a corporation, or held it out as a corporation, or by any persons who have recognized it as a corporation by dealing with it as such; and by the overwhelming weight of authority, therefore, a person may be estopped to deny the legal incorporation of an association which is not even a corporation *de facto*.

In cases similar to the one at bar, involving a failure to file articles of incorporation, the courts of other jurisdictions have held that where one has recognized the corporate existence of an association, he is estopped to assert the contrary with respect to a claim arising out of such dealings.

Since I.B.M. is estopped to deny the corporate existence of the Bureau, we hold that Cranson was not liable for the balance due on account of the typewriters.

Judgment reversed; the appellee to pay the costs.

CASE QUESTIONS

1. What is the fundamental question presented by the case?
2. What are the differences between creating a corporation de facto and by estoppel?

43.8 Summary and Exercises

Summary

The hallmark of the corporate form of business enterprise is limited liability for its owners. Other features of corporations are separation of ownership and management, perpetual existence, and easy transferability of interests. In the early years of the common law, corporations were thought to be creatures of sovereign power and could be created only by state grant. But by the late nineteenth century, corporations could be formed by complying with the requirements of general corporation statutes in virtually every state. Today the standard is the Revised Model Business Corporation Act.

The corporation, as a legal entity, has many of the usual rights accorded natural persons. The principle of limited liability is broad but not absolute: when the corporation is used to commit a fraud or an injustice or when the corporation does not act as if it were one, the courts will pierce the corporate veil and pin liability on stockholders.

Besides the usual business corporation, there are other forms, including not-for-profit corporations and professional corporations. Business corporations are classified into two types: publicly held and closely held corporations.

To form a corporation, the would-be stockholders must choose the state in which they wish to incorporate. The goal of the incorporation process is issuance of a corporate charter. The charter is a contract between the state and the corporation. Although the Constitution prohibits states from impairing the obligation of contracts, states reserve the right to modify corporate charters.

The corporation is created by the incorporators (or promoters), who raise capital, enter into contracts on behalf of the corporation to be formed, and prepare the articles of incorporation. The promoters are personally liable on the contracts they enter into before the corporation is formed. Incorporators owe a fiduciary duty to each other, to investors, and to the corporation.

The articles of incorporation typically contain a number of features, including the corporate name, corporate purposes, total number of shares and classes into which they are divided, par value, and the like. The name must include one of the following words (or abbreviations): corporation, company, incorporated, or limited (Corp., Co., Inc., or Ltd.). The articles of incorporation must be filed with the secretary of state. Once they have been filed, the board of directors named in the articles must adopt bylaws, elect officers, and conduct other necessary business. The directors are empowered to alter the bylaws, subject to repeal or change by the shareholders.

Even if the formal prerequisites to incorporation are lacking, a de facto corporation will be held to have been formed if (1) a statute exists under which the corporation could have been validly incorporated, (2) the

promoters made a bona fide attempt to comply with the statute, and (3) a corporate privilege was exercised. Under appropriate circumstances, a corporation will be held to exist by estoppel.

EXERCISES

1. Two young business school graduates, Laverne and Shirley, form a consulting firm. In deciding between the partnership and corporation form of organization, they are especially concerned about personal liability for giving bad advice to their clients; that is, in the event they are sued, they want to prevent plaintiffs from taking their personal assets to satisfy judgments against the firm. Which form of organization would you recommend? Why?
2. Assume that Laverne and Shirley in Exercise 1 must negotiate a large loan from a local bank in order to finance their firm. A friend advises them that they should incorporate in order to avoid personal liability for the loan. Is this good advice? Why?
3. Assume that Laverne and Shirley decide to form a corporation. Before the incorporation process is complete, Laverne enters into a contract on behalf of the corporation to purchase office furniture and equipment for \$20,000. After the incorporation process has been completed, the corporation formally accepts the contract made by Laverne. Is Laverne personally liable on the contract before corporate acceptance? After corporate acceptance? Why?
4. Assume that Laverne and Shirley have incorporated their business. One afternoon, an old college friend visits Shirley at the office. Shirley and her friend decide to go out for dinner to discuss old times. Shirley, being short of cash, takes money from a petty cash box to pay for dinner. (She first obtains permission from Laverne, who has done the same thing many times in the past.) Over dinner, Shirley learns that her friend is now an IRS agent and is investigating Shirley's corporation. What problems does Shirley face in the investigation? Why?
5. Assume that Laverne and Shirley prepare articles of incorporation but forget to send the articles to the appropriate state office. A few months after they begin to operate their consulting business as a corporation, Laverne visits a client. After her meeting, in driving out of a parking lot, Laverne inadvertently backs her car over the client, causing serious bodily harm. Is Shirley liable for the accident? Why?
6. Ralph, a resident of Oklahoma, was injured when using a consumer product manufactured by a corporation whose principal offices were in Tulsa. Since his damages exceeded \$10,000, he filed a products-liability action against the company, which was incorporated in Delaware, in federal court. Does the federal court have jurisdiction? Why?
7. Alice is the president and only shareholder of a corporation. The IRS is investigating Alice and demands that she produce her corporate records. Alice refuses, pleading the Fifth Amendment privilege against

self-incrimination. May the IRS force Alice to turn over her corporate records? Why?

SELF-TEST QUESTIONS

1. In comparing partnerships with corporations, the major factor favoring the corporate form is
 - a. ease of formation
 - b. flexible financing
 - c. limited liability
 - d. control of the business by investors

2. A corporation with no part of its income distributable to its members, directors, or officers is called
 - a. a publicly held corporation
 - b. a closely held corporation
 - c. a professional corporation
 - d. a nonprofit corporation

3. A corporation in which stock is widely held or available through a national or regional stock exchange is called
 - a. a publicly held corporation
 - b. a closely held corporation
 - c. a public corporation
 - d. none of the above

4. Essential to the formation of a de facto corporation is
 - a. a statute under which the corporation could have been validly incorporated
 - b. promoters who make a bona fide attempt to comply with the corporation statute
 - c. the use or exercise of corporate powers
 - d. each of the above

5. Even when incorporators miss important steps, it is possible to create
 - a. a corporation by estoppel
 - b. a de jure corporation

- c. an S corporation
- d. none of the above

SELF-TEST ANSWERS

1. c

Chapter 44

Legal Aspects of Corporate Finance

LEARNING OBJECTIVES

After reading this chapter, you should understand the following:

1. The general sources of corporate funds
2. The basics of corporate bonds and other debt leveraging
3. What the various types of stocks are
4. Initial public offerings and consideration for stock
5. What dividends are
6. Some of the modern trends in corporate finance

A corporation requires money for many reasons. In this chapter, we look at the methods available to a corporation for raising funds, focusing on how firms generate large amounts of funds and finance large projects, such as building a new factory.

One major method of finance is the sale of stock. A corporation sells shares of stock, often in an initial public offering. In exchange for consideration—usually cash—the purchaser acquires stock in the corporation. This stock may give the owner a share in earnings, the right to transfer the stock, and, depending on the size of the corporation and the number of shares, power to exercise control. Other methods of corporate finance include bank financing and bonds. We also discuss some more modern financing methods, such as private equity and venture capital. Additional methods of corporate finance, such as commercial paper (see [Chapter 22 "Nature and Form of Commercial Paper"](#) and [Chapter 23 "Negotiation of Commercial Paper"](#)), are discussed elsewhere in this book.

44.1 General Sources of Corporate Funds

LEARNING OBJECTIVES

1. Discuss the main sources for raising corporate funds.
2. Examine the reinvestment of earnings to finance growth.
3. Review debt and equity as methods of raising funds.
4. Consider private equity and venture capital, and compare their utility to other forms of financing.

Sources

To finance growth, any ongoing business must have a source of funds. Apart from bank and trade debt, the principal sources are plowback, debt securities, equity securities, and private equity.

Plowback

A significant source of new funds that corporations spend on capital projects is earnings. Rather than paying out earnings to shareholders, the corporation plows those earnings back into the business. **Plowback**¹ is simply reinvesting earnings in the corporation. It is an attractive source of capital because it is subject to managerial control. No approval by governmental agencies is necessary for its expenditure, as it is when a company seeks to sell securities, or stocks and bonds. Furthermore, stocks and bonds have costs associated with them, such as the interest payments on bonds (discussed in [Section 44.1.3 "Debt Securities"](#)), while retaining profits avoids these costs.

Debt Securities

A second source of funds is borrowing through debt securities. A corporation may take out a debt security such as a loan, commonly evidenced by a note and providing security to the lender. This is covered in [Chapter 28 "Secured Transactions and Suretyship"](#) and [Chapter 29 "Mortgages and Nonconsensual Liens"](#). A common type of corporate debt security is a **bond**², which is a promise to repay the face value of the bond at maturity and make periodic interest payments called the coupon rate. For example, a bond may have a face value of \$1,000 (the amount to be repaid at maturity) and a coupon rate of 7 percent paid annually; the corporation pays \$70 interest on such a bond each year. Bondholders have priority

1. Reinvesting corporate earnings in the corporation as a method of raising funds.
2. A debt security to raise corporate funds where the corporation pays periodic interest (the coupon rate) and the face value at maturity.

over stockholders because a bond is a debt, and in the event of bankruptcy, creditors have priority over equity holders.

Equity Securities

The third source of new capital funds is equity securities—namely, **stock**³. **Equity**⁴ is an ownership interest in property or a business. Stock is the smallest source of new capital but is of critical importance to the corporation in launching the business and its initial operations. Stock gives the investor a bundle of legal rights—ownership, a share in earnings, transferability and, to some extent, the power to exercise control through voting. The usual way to acquire stock is by paying cash or its equivalent as consideration. Both stock and consideration are discussed in more detail in [Section 44.3.2 "Par Value and No-Par Stock"](#) and [Section 44.4 "Initial Public Offerings and Consideration for Stock"](#).

Other Forms of Finance

While stock, debt securities, and reinvested profits are the most common types of finance for major corporations (particularly publicly traded corporations), smaller corporations or start-ups cannot or do not want to avail themselves of these financing options. Instead, they seek to raise funds through **private equity**⁵, which involves private investors providing funds to a company in exchange for an interest in the company. A private equity firm is a group of investors who pool their money together for investment purposes, usually to invest in other companies. Looking to private equity firms is an option for start-ups—companies newly formed or in the process of being formed—that cannot raise funds through the bond market or that wish to avoid debt or a public stock sale. Start-ups need money to begin operations, expand, or conduct further research and development. A private equity firm might provide **venture capital**⁶ financing for these start-ups. Generally, private equity firms that provide a lot of venture capital must be extremely savvy about the start-up plans of new businesses and must ask the start-up entrepreneurs numerous challenging and pertinent questions. Such private equity firms expect a higher rate of return on their investment than would be available from established companies. Today, venture capital is often used to finance entrepreneurial start-ups in biotechnology and clean technology.

Sometimes, a private equity firm will buy all the publicly traded shares of a company—a process commonly termed “going private.” Private equity may also be involved in providing financing to established firms.

Another source of private equity is angel investors, affluent individuals who operate like venture capitalists, providing capital for a business to get started in

3. An ownership interest in a corporation (synonymous with *shares*).

4. Ownership interest, such as stock, in property or a business.

5. Finance conducted through private investors, either individuals or firms.

6. Financial capital provided to early-stage, high-potential, high-risk start-up companies by investors who often expect a return on the investment by an eventual sale of the company or by taking the firm public.

exchange for repayment with interest or an ownership interest. The main difference between an angel investor and a venture capitalist is the source of funds: an angel investor invests his or her own money, while venture capitalists use pooled funds.

Private equity firms may also use a **leveraged buyout (LBO)**⁷ to finance the acquisition of another firm. Discussed further in [Chapter 47 "Corporate Expansion, State and Federal Regulation of Foreign Corporations, and Corporate Dissolution"](#) on Corporate Expansion, in the realm of private equity, an LBO is a financing option using debt to acquire another firm. In an LBO, private equity investors use the assets of the target corporation as collateral for a loan to purchase that target corporation. Such investors may pursue an LBO as a debt acquisition option since they do not need to use much—or even any—of their own money in order to finance the acquisition.

A major drawback to private equity, whether through a firm or through venture capital, is the risk versus return trade-off. Private equity investors may demand a significant interest in the firm, or a high return, to compensate them for the riskiness of their investment. They may demand a say in how the firm is operated or a seat on the board of directors.

KEY TAKEAWAY

There are four main sources of corporate finance. The first is plowback, or reinvesting profits in the corporation. The second is borrowing, commonly through a bond issue. A corporation sells a bond, agreeing to periodic interest payments and repayment of the face value of the bond at maturity. The third source is equity, usually stock, whereby a corporation sells an ownership interest in the corporation. The fourth source is private equity and venture capital.

EXERCISES

1. What are the main sources of corporate finance?
2. What are some of the legal rights associated with stock ownership?
3. Describe private equity. What are some similarities and differences between private equity and venture capital?

7. The acquisition of another company using a significant amount of borrowed money to pay for the acquisition. Often, the assets of the company being acquired may be used as collateral for the loans.

44.2 Bonds

LEARNING OBJECTIVES

1. Discuss the basics of corporate bonds.
2. Review the advantages and disadvantages to the corporation of issuing bonds.

Basics of Corporate Bonds

Corporations often raise money through debt. This can be done through loans or bank financing but is often accomplished through the sale of bonds. Large corporations, in particular, use the bond market. Private equity is not ideal for established firms because of the high cost to them, both monetarily and in terms of the potential loss of control.

For financing, many corporations sell corporate bonds to investors. A bond is like an IOU. When a corporation sells a bond, it owes the bond purchaser periodic interest payments as well as a lump sum at the end of the life of the bond (the maturity date). A typical bond is issued with a face value, also called the par value, of \$1,000 or some multiple of \$1,000. The **face value**⁸ is the amount that the corporation must pay the purchaser at the end of the life of the bond. Interest payments, also called **coupon payments**⁹, are usually made on a biannual basis but could be of nearly any duration. There are even zero coupon bonds, which pay only the face value at maturity.

Advantages and Disadvantages of Bonds

One advantage of issuing bonds is that the corporation does not give away ownership interests. When a corporation sells stock, it changes the ownership interest in the firm, but bonds do not alter the ownership structure. Bonds provide flexibility for a corporation: it can issue bonds of varying durations, value, payment terms, convertibility, and so on. Bonds also expand the number of investors available to the corporation. From an investor standpoint, bonds are generally less risky than stock. Most corporate bonds are given ratings—a measurement of the risk associated with holding a particular bond. Therefore, risk-averse investors who would not purchase a corporation's stock could seek lower-risk returns in highly rated corporate bonds. Investors are also drawn to bonds because the bond market

8. The amount that a corporation pays a bondholder at the bond's maturity.

9. The interest payment made by a corporation to the holder of a bond.

is much larger than the stock market and bonds are highly liquid and less risky than many other types of investments.

Another advantage to the corporation is the ability to make bonds “callable”—the corporation can force the investor to sell bonds back to the corporation before the maturity date. Often, there is an additional cost to the corporation (a call premium) that must be paid to the bondholder, but the call provision provides another level of flexibility for the corporation. Bonds may also be convertible; the corporation can include a provision that permits bondholders to convert their bonds into equity shares in the firm. This would permit the corporation to decrease the cost of the bonds, because bondholders would ordinarily accept lower coupon payments in exchange for the option to convert the bonds into equity. Perhaps the most important advantage to issuing bonds is from a taxation standpoint: the interest payments made to the bondholders may be deductible from the corporation’s taxes.

A key disadvantage of bonds is that they are debt. The corporation must make its bond interest payments. If a corporation cannot make its interest payments, the bondholders can force it into bankruptcy. In bankruptcy, the bondholders have a liquidation preference over investors with ownership—that is, the shareholders. Additionally, being highly leveraged can be risky: a corporation could load itself up with too much debt and not be able to make its interest payments or face-value payments. Another major consideration is the “cost” of debt. When interest rates are high, corporations must offer higher interest rates to attract investors.

KEY TAKEAWAY

Corporations often raise capital and finance operations through debt. Bank loans are one source of debt, but large corporations often turn to bonds for financing. Bonds are an IOU, whereby the corporation sells a bond to an investor; agrees to make periodic interest payments, such as 5 percent of the face value of the bond annually; and at the maturity date, pays the face value of the bond to the investor. There are several advantages to the corporation in using bonds as a financial instrument: the corporation does not give up ownership in the firm, it attracts more investors, it increases its flexibility, and it can deduct the interest payments from corporate taxes. Bonds do have some disadvantages: they are debt and can hurt a highly leveraged company, the corporation must pay the interest and principal when they are due, and the bondholders have a preference over shareholders upon liquidation.

EXERCISES

1. Describe a bond.
2. What are some advantages to the corporation in issuing bonds?
3. What are some disadvantages to the corporation in using bonds?

44.3 Types of Stock

LEARNING OBJECTIVES

1. Understand the basic features of corporate stock.
2. Be familiar with the basic terminology of corporate stock.
3. Discuss preferred shares and the rights of preferred shareholders.
4. Compare common stock with preferred stock.
5. Describe treasury stock, and explain its function.
6. Analyze whether debt or equity is a better financing option.

Stocks¹⁰, or **shares**¹¹, represent an ownership interest in a corporation. Traditionally, stock was the original capital paid into a business by its founders. This stock was then divided into shares, or fractional ownership of the stock. In modern usage, the two terms are used interchangeably, as we will do here. Shares in closely held corporations are often identical: each share of stock in BCT Bookstore, Inc. carries with it the same right to vote, to receive dividends, and to receive a distribution of the net assets of the company upon liquidation. Many large corporations do not present so simple a picture. Large corporations may have many different types of stock: different classes of common stock, preferred stock, stock with par value and no-par stock, voting and nonvoting stock, outstanding stock, and treasury stock. To find out which types of stock a company has issued, look at the shareholders' (or stockholders') equity section of the company's balance sheet.

Authorized, Issued, and Outstanding Stock

Stocks have different designations depending on who holds them. The articles of incorporation spell out how many shares of stock the corporation may issue: these are its **authorized shares**¹². The corporation is not obliged to issue all authorized shares, but it may not issue more than the total without amending the articles of incorporation. The total of stock sold to investors is the issued stock of the corporation; the issued stock in the hands of all shareholders is called outstanding stock.

Par Value and No-Par Stock

Par value¹³ is the face value of stock. Par value, though, is not the market value; it is a value placed on the stock by the corporation but has little to do with the buying and selling value of that stock on the open market.

10. An ownership interest in a corporation (synonymous with *shares*).

11. An ownership interest in a corporation (synonymous with *stock*).

12. The maximum number of shares of stock that a company can issue, although management will typically keep the amount higher than those actually issued.

13. The face value of a stock.

When a value is specified on a stock certificate, it is said to be par value. Par value is established in the articles of incorporation and is the floor price of the stock; the corporation may not accept less than par value for the stock.

Companies in most states can also issue no-par shares. No-par stock may be sold for whatever price is set by the board of directors or by the market—unless the shareholders themselves are empowered to establish the price. But many states permit (and some states require) no-par stock to have a stated value. Corporations issue no-par stock to reduce their exposure to liability: if the par value is greater than the market value, the corporation may be liable for that difference.

Once the universal practice, issuance of par value common stock is now limited. However, preferred stock usually has a par value, which is useful in determining dividend and liquidation rights.

The term *stated capital* describes the sum of the par value of the issued par value stock and the consideration received (or stated value) for the no-par stock. The excess of net assets of a corporation over stated capital is its **surplus**¹⁴. Surplus is divided into earned surplus (essentially the company's retained earnings) and capital surplus (all surpluses other than earned surplus). We will return to these concepts in our discussion of dividends.

Preferred Stock

The term *preferred* has no set legal meaning, but shareholders of **preferred stock**¹⁵ often have different rights than shareholders of common stock. Holders of preferred stock must look to the articles of incorporation to find out what their rights are. Preferred stock has elements of both stock (equity) and bonds (debt). Thus corporations issue preferred stock to attract more conservative investors: common stock is riskier than preferred stock, so corporations can attract more investors if they have both preferred and common stock.

Preference to Dividends

A dividend is a payment made to stockholders from corporate profits. Assume that one class of preferred stock is entitled to a 7 percent dividend. The percentage applies to the par value; if par value is \$100, each share of preferred is entitled to a dividend of \$7 per year. Assuming the articles of incorporation say so, this 7 percent preferred stock has preference over other classes of shares for dividend payments.

14. The excess of net assets of a corporation over its stated capital.

15. A variety of stock that differs from common stock in provisions for dividends and/or preference upon liquidation.

Liquidation Preference

An additional right of preferred shareholders is the right to share in the distribution of assets in the event of liquidation, after having received assets under a liquidation preference—that is, a preference, according to a predetermined formula, to receive the assets of the company on liquidation ahead of other classes of shareholders.

Convertible Shares

With one exception, the articles of incorporation may grant the right to convert any class of stock into any other at the holder's option according to a fixed ratio. Alternatively, the corporation may force a conversion of a shareholder's convertible stock. Thus if permitted, a preferred shareholder may convert his or her preferred shares into common stock, or vice versa. The exception bars conversion of stock into a class with an asset liquidation preference, although some states permit even that type of so-called upstream conversion to a senior security. Convertible preferred shares can be used as a poison pill (a corporate strategy to avoid a hostile takeover): when an outsider seeks to gain control, convertible shareholders may elect to convert their preferred shares into common stock, thus increasing the number of common shares and increasing the number of shares the outsider must purchase in order to gain control.

Redeemable Shares

The articles of incorporation may provide for the redemption of shares, unless in doing so the corporation would become insolvent. Redemption may be either at an established price and time or by election of the corporation or the shareholder. Redeemed stock is called cancelled stock. Unless the articles of incorporation prohibit it, the shares are considered authorized but unissued and can be reissued as the need arises. If the articles of incorporation specifically make the cancellation permanent, then the total number of authorized shares is reduced, and new shares cannot be reissued without amending the articles of incorporation. In this case, the redeemed shares cannot be reissued and must be marked as cancelled stock.

Voting Rights

Ordinarily, the articles of incorporation provide that holders of preferred shares do not have a voting right. Or they may provide for contingent voting rights, entitling preferred shareholders to vote on the happening of a particular event—for example, the nonpayment of a certain number of dividends. The articles may allow class voting for directors, to ensure that the class of preferred stockholders has some representation on the board.

Common Stock

Common stock¹⁶ is different from preferred stock. Common stock represents an ownership interest in a corporation. Unless otherwise provided in the articles of incorporation, common stockholders have the following rights:

1. Voting rights. This is a key difference: preferred shareholders usually do not have the right to vote. Common shareholders express their ownership interest in the corporation by voting. Votes are cast at meetings, typically the annual meetings, and the shareholders can vote for directors and on other important corporate decisions (e.g., there has been a recent push to allow shareholders to vote on executive compensation).
2. The right to ratable participation in earnings (i.e., in proportion to the total shares) and/or the right to ratable participation in the distribution of net assets on liquidation. Bondholders and other creditors have seniority upon liquidation, but if they have been satisfied, or the corporation has no debt, the common shareholders may ratably recover from what is left over in liquidation.
3. Some shares may give holders preemptive rights to purchase additional shares. This right is often invoked in two instances. First, if a corporation is going to issue more shares, a shareholder may invoke this right so that his or her total percentage ownership is not diluted. Second, the right to purchase additional shares can be invoked to prevent a hostile takeover (a poison pill, discussed in [Section 44.3.3 "Preferred Stock"](#)).

Corporations may issue different classes of shares (including both common and preferred stock). This permits a corporation to provide different rights to shareholders. For example, one class of common stock may give holders more votes than another class of common stock. Stock is a riskier investment for its purchasers compared with bonds and preferred stock. In exchange for this increased risk and junior treatment, common stockholders have the rights noted here.

Treasury Shares

Treasury shares¹⁷ are those that were originally issued and then reacquired by the company (such as in a buyback, discussed next) or, alternatively, never sold to the public in the first place and simply retained by the corporation. Thus treasury shares are shares held or owned by the corporation. They are considered to be issued shares but not outstanding shares.

16. A security that represents ownership in a corporation and allows the holder to elect a board of directors.

17. Stock that was issued and then later reacquired by a company (a buyback) or that was never sold to the public in the first place and simply retained by the company.

Buyback

Corporations often reacquire their shares, for a variety of reasons, in a process sometimes called a **buyback**¹⁸. If the stock price has dropped so far that the shares are worth considerably less than book value, the corporation might wish to buy its shares to prevent another company from taking it over. The company might decide that investing in itself is a better strategic decision than making other potential expenditures or investments. And although it is essentially an accounting trick, buybacks improve a company's per-share earnings because profits need to be divided into fewer outstanding shares.

Buybacks can also be used to go private. Private equity may play a role in going-private transactions, as discussed in [Section 44.1.5 "Other Forms of Finance"](#). The corporation may not have sufficient equity to buy out all its public shareholders and thus will partner with private equity to finance the stock buyback to go private. For example, in early 2011, Playboy Enterprises, Inc., publisher of *Playboy* magazine, went private. Hugh Hefner, the founder of Playboy, teamed up with private equity firm Rizvi Traverse Management to buy back the public shares. Hefner said that the transaction "will give us the resources and flexibility to return Playboy to its unique position and to further expand our business around the world." Dawn C. Chmielewski and Robert Channick, "Hugh Hefner Reaches Deal to Take Playboy Private," *Los Angeles Times*, January 11, 2011. <http://articles.latimes.com/2011/jan/11/business/la-fi-ct-playboy-hefner-20110111>.

Corporations may go private to consolidate control, because of a belief that the shares are undervalued, to increase flexibility, or because of a tender offer or hostile takeover. Alternatively, an outside investor may think that a corporation is not being managed properly and may use a tender offer to buy all the public shares.

Stocks and Bonds and Bears, Oh My!

Suppose that BCT Bookstore, Inc. has become a large, well-established corporation after a round of private equity and bank loans (since repaid) but needs to raise capital. What is the best method? There is no one right answer. Much of the decision will depend on the financial and accounting standing of the corporation: if BCT already has a lot of debt, it might be better to issue stock rather than bring on more debt. Alternatively, BCT could wish to remain a privately held corporation, and thus a stock sale would not be considered, as it would dilute the ownership. The economy in general could impact the decision: a bear market could push BCT more toward using debt, while a bull market could push BCT more toward an initial public offering (discussed in [Section 44.4.1 "Sale of stock"](#)) or stock sale. Interest rates could be low, increasing the bang-for-the-buck factor of debt. Additionally, public stock sales can be risky for the corporation: the corporation could

18. A process whereby a corporation reacquires or repurchases its shares (the shares then become treasury shares).

undervalue its stock in the initial sale, selling the stock for less than what the marketplace thinks it is worth, missing out on additional funds because of this undervaluation. Debt may also be beneficial because of the tax treatment of interest payments—the corporation can deduct the interest payments from corporate profits. Thus there are many factors a corporation must consider when deciding whether to finance through debt or equity.

KEY TAKEAWAY

Stock, or shares (equity), express an ownership interest in a corporation. Shares have different designations, depending on who holds the shares. The two main types of stock are preferred stock and common stock, each with rights that often differ from the rights of the other. Preferred stock has elements of both debt and equity. Holders of preferred shares have a dividend preference and have a right to share in the distribution of assets in liquidation. Holders of common stock have a different set of rights, namely, the right to vote on important corporate decisions such as the election of directors. A corporation may purchase some of its shares from its shareholders in a process called a buyback. Stock in the hands of the corporation is called treasury stock. There are a variety of factors that a corporation must consider in determining whether to raise capital through bonds or through stock issuance.

EXERCISES

1. What are some key rights of holders of preferred shares?
2. What is the major difference between preferred stock and common stock?
3. Why would a corporation buy back its own shares?
4. What are some factors a corporation must consider in deciding whether to issue stock or bonds?

44.4 Initial Public Offerings and Consideration for Stock

LEARNING OBJECTIVES

1. Understand what an initial public offering is and under what circumstances one is usually done.
2. Examine the various requirements of selling stock.
3. Discuss what adequate and valid consideration is in exchange for stock.

Sale of stock

Rather than using debt to finance operations, a corporation may instead sell stock. This is most often accomplished through an **initial public offering (IPO)**¹⁹, or the first time a corporation offers stock for sale to the public. The sale of securities, such as stock, is governed by the Securities Act of 1933. In particular, Section 5 of the 1933 act governs the specifics of the sale of securities. To return to BCT Bookstore, Inc., suppose the company wishes to sell stock on the New York Stock Exchange (NYSE) for the first time. That would be an IPO. The company would partner with securities lawyers and investment banks to accomplish the sale. The banks underwrite the sale of the securities: in exchange for a fee, the bank will buy the shares from BCT and then sell them. The company and its team prepare a registration statement, which contains required information about the IPO and is submitted to the Securities and Exchange Commission (SEC). The SEC reviews the registration statement and makes the decision whether to permit or prohibit BCT's IPO. Once the SEC approves the IPO, BCT's investment banks purchase the shares in the primary market and then resell them to investors on the secondary market on the NYSE. (For a further discussion of these two markets, see [Chapter 46 "Securities Regulation"](#)). Stock sales are not limited to an IPO—publicly traded corporations may sell stock several times after going public. The requirements of the 1933 act remain but are loosened for well-known corporations (well-known seasoned issuers).

An IPO or stock sale has several advantages. A corporation may have too much debt and would prefer to raise funds through a sale of stock rather than increasing its debt. The total costs of selling stock are often lower than financing through debt: the IPO may be expensive, but debt costs can vastly exceed the IPO cost because of the interest payments on the debt. Also, IPOs are a popular method of increasing a firm's exposure, bringing the corporation many more investors and increasing its public image. Issuing stock is also beneficial for the corporation because the corporation can use shares as compensation; for example, employment

19. The first time a corporation offers stock for sale to the public.

compensation may be in the form of stock, such as in an employee stock ownership plan. Investors also seek common stock, whether in an IPO or in the secondary market. While common stock is a riskier investment than a bond, stock ownership can have tremendous upside—after all, the sky is the limit on the price of a stock. On the other hand, there is the downside: the price of the stock can plummet, causing the shareholder significant monetary loss.

Certainly, an IPO has some disadvantages. Ownership is diluted: BCT had very few owners before its IPO but may have millions of owners after the IPO. As mentioned, an IPO can be expensive. An IPO can also be undervalued: the corporation and its investment banks may undervalue the IPO stock price, causing the corporation to lose out on the difference between its determined price and the market price. Being a public corporation also places the corporation under the purview of the SEC and requires ongoing disclosures. Timing can be problematic: the registration review process can take several weeks. The stock markets can change drastically over that waiting period. Furthermore, the offering could have insufficient purchasers to raise sufficient funds; that is, the public might not have enough interest in purchasing the company's stock to bring in sufficient funds to the corporation. Finally, a firm that goes public releases information that is available to the public, which could be useful to competitors (trade secrets, innovations, new technology, etc.).

As mentioned, one of the main disadvantages of going public is the SEC review and disclosure requirements. The Securities Exchange Act of 1934 governs most secondary market transactions. The 1934 act places certain requirements on corporations that have sold securities. Both the 1933 and 1934 acts require corporations to disseminate information to the public and/or its investors. These requirements were strengthened after the collapse of Enron in 2001. The SEC realized that its disclosure requirements were not strong enough, as demonstrated by the accounting tricks and downfall of Enron and its accountant, Arthur Andersen. For a full discussion of Enron, see Bethany McLean and Peter Elkind, *Enron: The Smartest Guys in the Room* (New York: Portfolio, 2004).

As a result of Enron's accounting scandal, as well as problems with other corporations, Congress tightened the noose by passing the Sarbanes-Oxley Act of 2002. Sarbanes-Oxley Act can be viewed at University of Cincinnati, "The Sarbanes-Oxley Act of 2002," *Securities Lawyer's Deskbook*, <http://taft.law.uc.edu/CCL/SOact/toc.html>. This act increased the disclosure of financial information, increased transparency, and required the dissemination of information about what a corporation was doing. For example, Section 302 of Sarbanes-Oxley requires that a corporation's chief executive officer and chief financial officer certify annual and quarterly reports and state that the report does not contain any material falsehoods and that the financial data accurately reflect the corporation's condition.

Nature of the Consideration

Consideration²⁰ is property or services exchanged for stock. While cash is commonly used to purchase stock, a stock purchaser may pay with something other than cash, such as property, whether tangible or intangible, or services or labor performed for the corporation. In most states, promissory notes and contracts for future services are not lawful forms of consideration. The case *United Steel Industries, Inc. v. Manhart*, (see [Section 44.7.1 "Consideration in Exchange for Stock"](#)), illustrates the problems that can arise when services or promises of future delivery are intended as payment for stock.

Evaluating the Consideration: Watered Stock

In *United Steel Industries* ([Section 44.7.1 "Consideration in Exchange for Stock"](#)), assume that Griffiths's legal services had been thought by the corporation to be worth \$6,000 but in fact were worth \$1,000, and that he had received stock with par value of \$6,000 (i.e., 6,000 shares of \$1 par value stock) in exchange for his services. Would Griffiths be liable for the \$5,000 difference between the actual value of his services and the stock's par value? This is the problem of **watered stock**²¹: the inflated consideration is in fact less than par value. The term itself comes from the ancient fraud of farmers and ranchers who increased the weight of their cattle (also known as stock) by forcing them to ingest excess water.

The majority of states follow the **good-faith rule**²². As noted near the end of the *United Steel Industries* case, in the absence of fraud, "the judgment of the board of directors 'as to the value of consideration received for shares' is conclusive." In other words, if the directors or shareholders conclude in good faith that the consideration does fairly reflect par value, then the stock is not watered and the stock buyer cannot be assessed for the difference. This is in line with the business judgment rule, discussed in [Chapter 45 "Corporate Powers and Management"](#). If the directors concluded in good faith that the consideration provided by Griffiths's services accurately reflected the value of the shares, they would not be liable. The minority approach is the true value rule: the consideration must in fact equal par value by an objective standard at the time the shares are issued, regardless of the board's good-faith judgment.

A shareholder may commence a derivative lawsuit (a suit by a shareholder, on behalf of the corporation, often filed against the corporation; see [Chapter 45 "Corporate Powers and Management"](#)). In a watered stock lawsuit, the derivative suit is filed against a shareholder who has failed to pay full consideration under either rule to recover the difference between the value received by the corporation and the par value.

20. The surrender of any legal right (a detriment) in return for the promise of some benefit in return.

21. When consideration is inflated such that the property given for consideration in exchange for shares is in fact less than par value.

22. Directors' judgment as to the value of consideration received for shares is deemed conclusive.

KEY TAKEAWAY

Corporations may raise funds through the sale of stock. This can be accomplished through an initial public offering (IPO)—the first time a corporation sells stock—or through stock sales after an IPO. The SEC is the regulatory body that oversees the sale of stock. A sale of stock has several benefits for the corporation, such as avoiding the use of debt, which can be much more expensive than selling stock. Stock sales also increase the firm's exposure and attract investors who prefer more risk than bonds. On the other hand, stock sales have some disadvantages, namely, the dilution of ownership of the corporation. Also, the corporation may undervalue its shares, thus missing out on additional capital because of the undervaluation. Being a publicly traded company places the corporation under the extensive requirements of the SEC and the 1933 and 1934 securities acts, such as shareholder meetings and annual financial reports. The Sarbanes-Oxley Act adds yet more requirements that a corporation may wish to avoid.

Consideration is property or services exchanged for stock. Most investors will exchange money for stock. Certain forms of consideration are not permitted. Finally, a corporation may be liable if it sells watered stock, where consideration received by the corporation is less than the stock par value.

EXERCISES

1. Describe the process of conducting an IPO.
2. What are some advantages of selling stock?
3. What are some disadvantages of selling stock?
4. What is consideration? What are some types of consideration that may not be acceptable?

44.5 Dividends

LEARNING OBJECTIVES

1. Discuss several types of dividends.
2. Review legal limitations on distributing dividends.
3. Define the duties of directors when paying dividends.

Types of Dividends

A **dividend**²³ is a share of profits, a dividing up of the company's earnings. The law does not require a corporation to give out a specific type of dividend.

Cash Dividend

If a company's finances are such that it can declare a dividend to stockholders, a cash dividend always is permissible. It is a payment (by check, ordinarily) to the stockholders of a certain amount of money per share. Under current law, qualified dividends are taxed as a long-term capital gain (usually 15 percent, but the figure can be as low as zero percent under current law). These rules are set to expire in 2013, when dividends will be taxed as ordinary income (i.e., at the recipient's ordinary income tax rate).

Stock Dividend

Next to cash, the most frequent type of dividend is stock itself. Normally, the corporation declares a small percentage dividend (between 1 and 10 percent), so that a holder of one hundred shares would receive four new shares on a 4 percent dividend share. Although each shareholder winds up with more stock, he realizes no personal net gain at that moment, as he would with a cash dividend, because each stockholder has the same relative proportion of shares and has not sold or otherwise transferred the shares or dividend. The total outstanding stock represents no greater amount of assets than before. The corporation may issue share dividends either from treasury stock or from authorized but unissued shares.

Property Dividend

23. A share of a corporation's profits.

Rarely, corporations pay dividends in property rather than in cash. Armand Hammer, the legendary financier and CEO of Occidental Petroleum Corporation,

recounts how during World War II he founded a liquor business by buying shares of the American Distilling Company. American Distilling was giving out one barrel of whiskey per share as a dividend. Whiskey was in short supply during the war, so Hammer bought five thousand shares and took five thousand barrels of whiskey as a dividend.

Stock Split

A stock dividend should be distinguished from a stock split. In a **stock split**²⁴, one share is divided into more shares—for example, a two-for-one split means that for every one share the stockholder owned before the split, he now has two shares. In a reverse stock split, shares are absorbed into one. In a one-for-two reverse split, the stockholder will get one share in place of the two he held before the split.

The stock split has no effect on the assets of the company, nor is the interest of any shareholder diluted. No transfer from surplus into stated capital is necessary. The only necessary accounting change is the adjustment of par value and stated value. Because par value is being changed, many states require not only the board of directors but also the shareholders to approve a stock split.

Why split? The chief reason is to reduce the current market price of the stock in order to make it affordable to a much wider class of investors. For example, in 1978, IBM, whose stock was then selling for around \$284, split four for one, reducing the price to about \$70 a share. That was the lowest IBM's stock had been since 1932. Stock need not sell at stratospheric prices to be split, however; for example, American Telnet Corporation, whose stock had been selling at \$0.4375 a share, declared a five-for-one split in 1980. Apparently the company felt that the stock would be more affordable at \$0.0875 a share. At the opposite end of the spectrum are Class A shares of Warren Buffett's Berkshire Hathaway, which routinely trade for more than \$100,000 a share. Buffett has rebuffed efforts to split the Class A shares, but in 2010, shareholders approved a fifty-for-one split of Class B shares. *BusinessWeek* covers many stock splits and reverse splits in its finance section, available at <http://www.businessweek.com/finance>.

Legal Limitations on Dividends

The law imposes certain limitations on cash or property dividends a corporation may disburse. Dividends may not be paid if (1) the business is insolvent (i.e., unable to pay its debts as they become due), (2) paying dividends would make it insolvent, or (3) payment would violate a restriction in the articles of incorporation. Most states also restrict the funds available for distribution to those available in earned

24. Increasing the number of a firm's outstanding shares by issuing more shares to current shareholders, adjusting the price to keep the firm's market capitalization the same.

surplus. Under this rule, a corporation that ran a deficit in the current year could still declare a dividend as long as the total earned surplus offset the deficit.

A few states—significantly, Delaware is one of them—permit dividends to be paid out of the net of current earnings and those of the immediately preceding year, both years taken as a single period, even if the balance sheet shows a negative earned surplus. Such dividends are known as nimble dividends. See *Weinberg v. Baltimore Brick Co.* *Weinberg v. Baltimore Brick Co.*, 35 Del. Ch. 225; 114 A.2d 812 (Del. 1955).

Distribution from Capital Surplus

Assets in the form of cash or property may be distributed from capital surplus if the articles of incorporation so provide or if shareholders approve the distribution. Such distributions must be identified to the shareholders as coming from capital surplus.

Record Date, Payment Date, Rights of Stockholders

Under the securities exchange rules, the board of directors cannot simply declare a dividend payable on the date of the board meeting and instruct the treasurer to hand out cash. The board must fix two dates: a record date and a payment date. By the first, the board declares a dividend for shareholders of record as of a certain future date—perhaps ten days hence. Actual payment of the dividend is postponed until the payment date, which could be a month after the record date.

The board's action creates a debtor-creditor relationship between the corporation and its shareholders. The company may not revoke a cash dividend unless the shareholders consent. It may revoke a share dividend as long as the shares have not been issued.

Discretion of Directors to Pay Dividends When Directors Are Too Stingy

In every state, dividends are normally payable only at the discretion of the directors. Courts will order distribution only if they are expressly mandatory or if it can be shown that the directors abused their discretion by acting fraudulently or in a manner that was manifestly unreasonable. *Dodge v. Ford Motor Co.*, (see [Section 44.7.2 "Payment of Dividends"](#)), involves Henry Ford's refusal in 1916 to pay dividends in order to reinvest profits; it is often celebrated in business annals because of Ford's testimony at trial, although, as it turned out, the courts held his refusal to be an act of miserliness and an abuse of discretion. Despite this ruling,

many corporations today do not pay dividends. Corporations may decide to reinvest profits in the corporation rather than pay a dividend to its shareholders, or to just sit on the cash. For example, Apple Computer, Inc., maker of many popular computers and consumer electronics, saw its share price skyrocket in the late 2000s. Apple also became one of the most valuable corporations in the world. Despite an immense cash reserve, Apple has refused to pay a dividend, choosing instead to reinvest in the business, stating that they require a large cash reserve as a security blanket for acquisitions or to develop new products. Thus despite the ruling in *Dodge v. Ford Motor Co.*, courts will usually not intercede in a corporation's decision not to pay dividends, following the business judgment rule and the duties of directors. (For further discussion of the duties of directors, see [Chapter 45 "Corporate Powers and Management"](#)).

When Directors Are Too Generous

Directors who vote to declare and distribute dividends in excess of those allowed by law or by provisions in the articles of incorporation personally may become jointly and severally liable to the corporation (but liability may be reduced or eliminated under the business judgment rule). Shareholders who receive a dividend knowing it is unlawful must repay any directors held liable for voting the illegal dividend. The directors are said to be entitled to contribution from such shareholders. Even when directors have not been sued, some courts have held that shareholders must repay dividends received when the corporation is insolvent or when they know that the dividends are illegal.

KEY TAKEAWAY

A dividend is a payment made from the corporation to its shareholders. A corporation may pay dividends through a variety of methods, although money and additional shares are the most common. Corporations may increase or decrease the total number of shares through either a stock split or a reverse stock split. A corporation may decide to pay dividends but is not required to do so and cannot issue dividends if the corporation is insolvent. Directors may be liable to the corporation for dividend payments that violate the articles of incorporation or are illegal.

EXERCISES

1. What is a dividend, and what are the main types of dividends?
2. Is a corporation required to pay dividends? Under what circumstances is a corporation barred from paying dividends?
3. You have ten shares of BCT, valued at \$10 each. The company engages in a two-for-one stock split. How many shares do you now have? What is the value of each share, and what is the total value of all of your BCT shares?

44.6 The Winds of Change

LEARNING OBJECTIVES

1. Know the modern changes to corporate finance terminology and specific requirements imposed by states.
2. Compare the application of the Uniform Commercial Code to corporate finance with the applicability of the 1933 and 1934 federal securities acts.

Changes in the Revised Model Business Corporation Act

Perhaps the most dramatic innovations incorporated into the Revised Model Business Corporation Act (RMBCA) are the financial provisions. The revisions recommend eliminating concepts such as par value stock, no-par stock, stated capital, capital surplus, earned surplus, and treasury shares. It was felt that these concepts—notably par value and stated capital—no longer serve their original purpose of protecting creditors.

A key definition under the revisions is that of *distributions*—that is, any transfer of money or property to the shareholders. In order to make distributions, a corporation must meet the traditional insolvency test and balance sheet tests. Under the balance sheet test, corporate assets must be greater than or equal to liabilities and liquidation preferences on senior equity. The RMBCA also provides that promissory notes and contracts for future services may be used in payment for shares.

It is important to note that the RMBCA is advisory. Not every state has abandoned *par value* or the other financial terms. For example, Delaware is quite liberal with its requirements:

Every corporation may issue 1 or more classes of stock or 1 or more series of stock within any class thereof, any or all of which classes may be of stock with par value or stock without par value and which classes or series may have such voting powers, full or limited, or no voting powers, and such designations, preferences and relative, participating, optional or other special rights, and qualifications, limitations or restrictions thereof, as shall be stated and expressed in the certificate of incorporation or of any amendment thereto, or in the resolution or resolutions providing for the issue of such stock adopted by the board of directors pursuant to

authority expressly vested in it by the provisions of its certificate of incorporation. Del. Code Ann. tit. 8, § 151 (2011).

Therefore, although the modern trend is to move away from *par value* as well as some other previously discussed terms—and despite the RMBCA's abandonment of these concepts—they still, in large measure, persist.

Introduction to Article 8 of the Uniform Commercial Code

Partial ownership of a corporation would be an awkward investment if there were no ready means of transfer. The availability of paper certificates as tangible evidence of the ownership of equity securities solves the problem of what to transfer, but since a corporation must maintain records of its owners, a set of rules is necessary to spell out how transfers are to be made. That set of rules is Article 8 of the Uniform Commercial Code (UCC). Article 8 governs certificated securities, uncertificated securities, registration requirements, transfer, purchase, and other specifics of securities. Article 8 can be viewed at <http://www.law.cornell.edu/ucc/8/overview.html>.

The UCC and the 1933 and 1934 Securities Acts

The Securities Act of 1933 requires the registration of securities that are sold or offered to be sold using interstate commerce. The Securities Exchange Act of 1934 governs the secondary trading of securities, such as stock market sales. The UCC also governs securities, through Articles 8 and 9. The key difference is that the 1933 and 1934 acts are federal law, while the UCC operates at the state level. The UCC was established to standardize state laws governing sales and commercial transactions. There are some substantial differences, however, between the two acts and the UCC. Without going into exhaustive detail, it is important to note a few of them. For one, the definition of *security* in the UCC is different from the definition in the 1933 and 1934 acts. Thus a security may be governed by the securities acts but not by the UCC. The definition of a private placement of securities also differs between the UCC and the securities acts. Other differences exist. See Lynn Soukup, "Securities Law and the UCC: When Godzilla Meets Bambi," *Uniform Commercial Code Law Journal* 38, no. 1 (Summer 2005): 3–28. The UCC, as well as state-specific laws, and the federal securities laws should all be considered in financial transactions.

KEY TAKEAWAY

The RMBCA advises doing away with financial concepts such as stock par value. Despite this suggestion, these concepts persist. Corporate finance is regulated through a variety of mechanisms, most notably Articles 8 and 9 of the Uniform Commercial Code and the 1933 and 1934 securities acts.

EXERCISES

1. What suggested changes are made by the RMBCA?
2. What does UCC Article 8 govern?

44.7 Cases

Consideration in Exchange for Stock

United Steel Industries, Inc. v. Manhart

405 S.W.2d 231 (Tex. 1966)

MCDONALD, CHIEF JUSTICE

This is an appeal by defendants, United Steel Industries, Inc., J. R. Hurt and W. B. Griffitts, from a judgment declaring void and cancelling 5000 shares of stock in United Steel Industries, Inc. issued to Hurt, and 4000 shares of stock in such corporation issued to Griffitts.

Plaintiffs Manhart filed this suit individually and as major stockholders against defendants United Steel Industries, Inc., Hurt, and Griffitts, alleging the corporation had issued Hurt 5000 shares of its stock in consideration of Hurt agreeing to perform CPA and bookkeeping services for the corporation for one year in the future; and had issued Griffitts 4000 shares of its stock in consideration for the promised conveyance of a 5 acre tract of land to the Corporation, which land was never conveyed to the Corporation. Plaintiffs assert the 9000 shares of stock were issued in violation of Article 2.16 Business Corporation Act, and prayed that such stock be declared void and cancelled.

Trial was before the Court without a jury which, after hearing, entered judgment declaring the 5000 shares of stock issued to Hurt, and the 4000 shares issued to Griffitts, issued without valid consideration, void, and decreeing such stock cancelled.

* * *

The trial court found (on ample evidence) that the incorporators of the Corporation made an agreement with Hurt to issue him 5000 shares in consideration of Hurt's agreement to perform bookkeeping and accounting services for the Corporation for the first year of its operation. The Corporation minutes reflect the 5000 shares issued to Hurt "in consideration of labor done, services in the incorporation and organization of the Corporation." The trial court found (on ample evidence) that such minutes do not reflect the true consideration agreed upon, and that Hurt

performed no services for the Corporation prior to February 1, 1965. The Articles of Incorporation were filed on January 28, 1965, and the 5000 shares were issued to Hurt on May 29, 1965. There is evidence that Hurt performed some services for the Corporation between January and May 29, 1965; but Hurt himself testified the “5000 (shares) were issued to me for services rendered or to be rendered for the first year in keeping the books....”

The situation is thus one where the stock was issued to Hurt both for services already performed and for services to be rendered in the future.

The trial court concluded the promise of future services was not a valid consideration for the issuance of stock under Article 2.16 Business Corporation Act; that the issuance was void; and that since there was no apportionment of the value of future services from the value of services already rendered, the entire 5000 shares were illegally issued and void.

Article 12, Section 6, Texas Constitution, provides: “No corporation shall issue stock...except for money paid, labor done, or property actually received....” And Article 2.16 Texas Business Corporation Act provides: “Payment for Shares.

“A. The consideration paid for the issuance of shares shall consist of money paid, labor done, or property actually received. Shares may not be issued until the full amount of the consideration, fixed as provided by law, has been paid....

“B. Neither promissory notes nor the promise of future services shall constitute payment or part payment for shares of a corporation.

“C. In the absence of fraud in the transaction, the judgment of the board of directors...as to the value of the consideration received for shares shall be conclusive.”

The Fifth Circuit in *Champion v. CIR*, 303 Fed. 2d 887 construing the foregoing constitutional provision and Article 2.16 of the Business Corporation Act, held:

Where it is provided that stock can be issued for labor done, as in Texas...the requirement is not met where the consideration for the stock is work or services to be performed in the future....The situation is not changed by reason of the provision that the stock was to be given...for services rendered as well as to be rendered, since there was no allocation or apportionment of stock between services performed and services to be performed.”

The 5000 shares were issued before the future services were rendered. Such stock was illegally issued and void.

Griffitts was issued 10,000 shares partly in consideration for legal services to the Corporation and partly in exchange for the 5 acres of land. The stock was valued at \$1 per share and the land had an agreed value of \$4000. The trial court found (upon ample evidence) that the 4000 shares of stock issued to Griffitts was in consideration of his promise to convey the land to the Corporation; that Griffitts never conveyed the land; and the issuance of the stock was illegal and void.

The judgment of the board of directors “as to the value of consideration received for shares” is conclusive, but such does not authorize the board to issue shares contrary to the Constitution, for services to be performed in the future (as in the case of Hurt), or for property not received (as in the case of Griffitts).

The judgment is correct. Defendants’ points and contentions are overruled.

AFFIRMED.

CASE QUESTIONS

1. What was wrong with the consideration in the transaction between United Steel and Hurt?
2. What if Hurt had completed one year of bookkeeping prior to receiving his shares?
3. What was wrong with the consideration Griffitts provided for the 4,000 shares he received?

Payment of Dividends

Dodge v. Ford Motor Co.

204 Mich. 459, 170 N.W. 668 (Mich. 1919)

[Action by plaintiffs John F. Dodge and Horace E. Dodge against defendant Ford Motor Company and its directors. The lower court ordered the directors to declare a dividend in the amount of \$19,275,385.96. The court also enjoined proposed expansion of the company. The defendants appealed.]

[T]he case for plaintiffs must rest upon the claim, and the proof in support of it, that the proposed expansion of the business of the corporation, involving the further use of profits as capital, ought to be enjoined because it is inimical to the best interests of the company and its shareholders, and upon the further claim that in any event the withholding of the special dividend asked for by plaintiffs is arbitrary action of the directors requiring judicial interference.

The rule which will govern courts in deciding these questions is not in dispute. It is, of course, differently phrased by judges and by authors, and, as the phrasing in a particular instance may seem to lean for or against the exercise of the right of judicial interference with the actions of corporate directors, the context, or the facts before the court, must be considered.

* * *

In 1 Morawetz on Corporations (2d Ed.), § 447, it is stated:

Profits earned by a corporation may be divided among its shareholders; but it is not a violation of the charter if they are allowed to accumulate and remain invested in the company's business. The managing agents of a corporation are impliedly invested with a discretionary power with regard to the time and manner of distributing its profits. They may apply profits in payment of floating or funded debts, or in development of the company's business; and so long as they do not abuse their discretionary powers, or violate the company's charter, the courts cannot interfere.

But it is clear that the agents of a corporation, and even the majority, cannot arbitrarily withhold profits earned by the company, or apply them to any use which is not authorized by the company's charter....

Mr. Henry Ford is the dominant force in the business of the Ford Motor Company. No plan of operations could be adopted unless he consented, and no board of directors can be elected whom he does not favor. One of the directors of the company has no stock. One share was assigned to him to qualify him for the position, but it is not claimed that he owns it. A business, one of the largest in the world, and one of the most profitable, has been built up. It employs many men, at good pay.

"My ambition," said Mr. Ford, "is to employ still more men, to spread the benefits of this industrial system to the greatest possible number, to help them build up their

lives and their homes. To do this we are putting the greatest share of our profits back in the business.”

“With regard to dividends, the company paid sixty per cent on its capitalization of two million dollars, or \$1,200,000, leaving \$58,000,000 to reinvest for the growth of the company. This is Mr. Ford’s policy at present, and it is understood that the other stockholders cheerfully accede to this plan.”

He had made up his mind in the summer of 1916 that no dividends other than the regular dividends should be paid, “for the present.”

“Q. For how long? Had you fixed in your mind any time in the future, when you were going to pay—

“A. No.

“Q. That was indefinite in the future?

“A. That was indefinite, yes, sir.”

The record, and especially the testimony of Mr. Ford, convinces that he has to some extent the attitude towards shareholders of one who has dispensed and distributed to them large gains and that they should be content to take what he chooses to give. His testimony creates the impression, also, that he thinks the Ford Motor Company has made too much money, has had too large profits, and that although large profits might be still earned, a sharing of them with the public, by reducing the price of the output of the company, ought to be undertaken. We have no doubt that certain sentiments, philanthropic and altruistic, creditable to Mr. Ford, had large influence in determining the policy to be pursued by the Ford Motor Company—the policy which has been herein referred to.

* * *

The difference between an incidental humanitarian expenditure of corporate funds for the benefit of the employees, like the building of a hospital for their use and the employment of agencies for the betterment of their condition, and a general purpose and plan to benefit mankind at the expense of others, is obvious. There should be no confusion (of which there is evidence) of the duties which Mr. Ford conceives that he and the stockholders owe to the general public and the duties which in law he and his codirectors owe to protesting, minority stockholders. A

business corporation is organized and carried on primarily for the profit of the stockholders. The powers of the directors are to be employed for that end. The discretion of directors is to be exercised in the choice of means to attain that end and does not extend to a change in the end itself, to the reduction of profits or to the nondistribution of profits among stockholders in order to devote them to other purposes.

* * *

We are not, however, persuaded that we should interfere with the proposed expansion of the business of the Ford Motor Company. In view of the fact that the selling price of products may be increased at any time, the ultimate results of the larger business cannot be certainly estimated. The judges are not business experts. It is recognized that plans must often be made for a long future, for expected competition, for a continuing as well as an immediately profitable venture. The experience of the Ford Motor Company is evidence of capable management of its affairs. It may be noticed, incidentally, that it took from the public the money required for the execution of its plan and that the very considerable salaries paid to Mr. Ford and to certain executive officers and employees were not diminished. We are not satisfied that the alleged motives of the directors, in so far as they are reflected in the conduct of the business, menace the interests of shareholders. It is enough to say, perhaps, that the court of equity is at all times open to complaining shareholders having a just grievance.

[The court affirmed the lower court's order that the company declare a dividend and reversed the lower court's decision that halted company expansion].

CASE QUESTIONS

1. What basis does the court use to order the payment of dividends?
2. Does the court have a positive view of Mr. Ford?
3. How do you reconcile 1 Morawetz on Corporations (2d Ed.), § 447 (“Profits earned by a corporation may be divided among its shareholders; but it is not a violation of the charter if they are allowed to accumulate and remain invested in the company’s business”) with the court’s decision?
4. Would the business judgment rule have changed the outcome of this case? Note: The business judgment rule, generally summarized, is that the directors are presumed to act in the best interest of the corporation and its shareholders and to fulfill their fiduciary duties of good faith, loyalty, and due care. The burden is on the plaintiff to prove that a transaction was so one sided that no business person of ordinary judgment would conclude that the transaction was proper and/or fair.

44.8 Summary and Exercises

Summary

Corporations finance through a variety of mechanisms. One method is to reinvest profits in the corporation. Another method is to use private equity. Private equity involves financing from private investors, whether individuals (angel investors) or a private equity firm. Venture capital is often used as a fundraising mechanism by businesses that are just starting operations.

A third method is to finance through debt, such as a loan or a bond. A corporation sells a bond and agrees to make interest payments over the life of the bond and to pay the face value of the bond at the bond's maturity.

The final important method of raising capital is by the sale of stock. The articles of incorporation govern the total number of shares of stock that the corporation may issue, although it need not issue the maximum. Stock in the hands of shareholders is said to be authorized, issued, and outstanding. Stock may have a par value, which is usually the floor price of the stock. No-par shares may be sold for any price set by the directors.

Preferred stock (1) may have a dividend preference, (2) takes preference upon liquidation, and (3) may be convertible. Common stock normally has the right to (1) ratable participation in earnings, (2) ratable participation in the distribution of net assets on liquidation, and (3) ratable vote.

Ordinarily, the good-faith judgment of the directors concerning the fair value of the consideration received for stock is determinative. A minority of states adhere to a true value rule that holds to an objective standard.

A corporation that sells shares for the first time engages in an initial public offering (IPO). The Securities Act of 1933 governs most IPOs and initial stock sales. A corporation that has previously issued stock may do so many times afterward, depending on the corporation's needs. The Securities Exchange Act of 1934 governs most secondary market stock sales. The Sarbanes-Oxley Act of 2002 adds another layer of regulation to the financial transactions discussed in this chapter.

A dividend is a share of a corporation's profits. Dividends may be distributed as cash, property, or stock. The law imposes certain limitations on the amount that the corporation may disburse; most states restrict the cash or property available for distribution to earned surplus. However, a few states, including Delaware, permit dividends to be paid out of the net of current earnings and those of the immediately preceding year, both years taken as a single period; these are known as nimble dividends. The directors have discretion, within broad limits, to set the level of dividends; however, they will be jointly and severally liable if they approve dividends higher than allowed by law or under the articles of incorporation.

With several options available, corporations face many factors to consider in deciding how to raise funds. Each option is not available to every corporation. Additionally, each option has advantages and disadvantages. A corporation must carefully weigh the pros and cons of each before making a decision to proceed on a particular financing path.

EXERCISES

1. Ralph and Alice have decided to incorporate their sewer cleaning business under the name R & A, Inc. Their plans call for the authorization and issuance of 5,000 shares of par value stock. Ralph argues that par value must be set at the estimated market value of the stock, while Alice feels that par value is the equivalent of book value—that is, assets divided by the number of shares. Who is correct? Why?
2. In Exercise 1, Ralph feels that R & A should have an IPO of 1 million shares of common stock, to be sold on the New York Stock Exchange (NYSE). What are the pros and cons of conducting an IPO?
3. Assume that Ralph and Alice decide to issue preferred stock. What does this entail from R & A's standpoint? From the standpoint of a preferred stock purchaser?
4. Alice changes her mind and wants to sell bonds in R & A. What are the pros and cons of selling bonds?
5. Assume that Ralph and Alice go on to consider options other than financing through an IPO or through the sale of bonds. They want to raise \$5 million to get their business up and running, to purchase a building, and to acquire machines to clean sewers. What are some other options Ralph and Alice should consider? What would you suggest they do? Would your suggestion be different if Ralph and Alice wanted to raise \$500 million? \$50,000?

SELF-TEST QUESTIONS

1. Corporate funds that come from earnings are called
 - a. equity securities
 - b. depletion
 - c. debt securities
 - d. plowback

2. When a value is specified on a stock certificate, it is said to be
 - a. par value
 - b. no-par
 - c. an authorized share
 - d. none of the above

3. Common stockholders normally
 - a. have the right to vote ratably
 - b. do not have the right to vote ratably
 - c. never have preemptive rights
 - d. hold all of the company's treasury shares

4. Preferred stock may be
 - a. entitled to cumulative dividends
 - b. convertible
 - c. redeemable
 - d. all of the above

5. When a corporation issues stock to the public for the first time, the corporation engages in
 - a. a distribution
 - b. an initial public offering
 - c. underwriting
 - d. a stock split

Chapter 45

Corporate Powers and Management

LEARNING OBJECTIVES

After reading this chapter, you should understand the following:

1. The powers of a corporation to act
2. The rights of shareholders
3. The duties, powers, and liability of officers and directors

Power within a corporation is present in many areas. The corporation itself has powers, although with limitations. There is a division of power between shareholders, directors, and officers. Given this division of power, certain duties are owed amongst the parties. We focus this chapter upon these powers and upon the duties owed by shareholders, directors, and officers. In [Chapter 46 "Securities Regulation"](#), we will continue discussion of officers' and directors' liability within the context of securities regulation and insider trading.

45.1 Powers of a Corporation

LEARNING OBJECTIVES

1. Understand the two types of corporate power.
2. Consider the ramifications when a corporation acts outside its prescribed powers.
3. Review legal issues surrounding corporate actions.

Two Types of Corporate Powers

A corporation generally has three parties sharing power and control: directors, officers, and shareholders. Directors are the managers of the corporation, and officers control the day-to-day decisions and work more closely with the employees. The shareholders are the owners of the corporation, but they have little decision-making authority. The corporation itself has powers; while a corporation is not the same as a person (e.g., a corporation cannot be put in prison), it is allowed to conduct certain activities and has been granted certain rights.

Express Powers

The corporation may exercise all powers expressly given it by statute and by its articles of incorporation. Section 3.02 of the Revised Model Business Corporation Act (RMBCA) sets out a number of **express powers**¹, including the following: to sue and be sued in the corporate name; to purchase, use, and sell land and dispose of assets to the same extent a natural person can; to make contracts, borrow money, issue notes and bonds, lend money, invest funds, make donations to the public welfare, and establish pension plans; and to join in partnerships, joint ventures, trusts, or other enterprises. The powers set out in this section need not be included in the articles of incorporation.

Implied Powers

Corporate powers beyond those explicitly established are **implied powers**². For example, suppose BCT Bookstore, Inc.'s statement of purpose reads simply, "to operate a bookstore." The company may lawfully conduct all acts that are necessary or appropriate to running a bookstore—hiring employees, advertising special sales, leasing trucks, and so forth. Could Ted, its vice president and general manager, authorize the expenditure of funds to pay for a Sunday afternoon lecture on the perils of nuclear war or the adventures of a professional football player? Yes—if the

1. Powers granted to a corporation through statute and its articles of incorporation.

2. Corporate powers that extend beyond those powers explicitly defined as express powers.

lectures are relevant to current books on sale or serve to bring people into the store, they comply with the corporation's purpose.

The Ultra Vires Doctrine

The law places limitations upon what acts a corporation may undertake. Corporations cannot do anything they wish, but rather, must act within the prescribed rules as laid out in statute, case law, their articles of incorporation, and their bylaws. Sometimes, though, a corporation will step outside its permitted power (literally "beyond the powers). The **ultra vires doctrine**³ holds that certain legal consequences attach to an attempt by a corporation to carry out acts that are outside its lawful powers. Ultra vires (literally "beyond the powers") is not limited to illegal acts, although it encompasses actions barred by statute as well as by the corporate charter. Under the traditional approach, either the corporation or the other party could assert ultra vires as a defense when refusing to abide by a wholly executory contract. The ultra vires doctrine loses much of its significance when corporate powers are broadly stated in a corporation's articles. Furthermore, RMBCA Section 3.04 states that "the validity of corporate action may not be challenged on the ground that the corporation lacks or lacked power to act."

Nonetheless, ultra vires acts are still challenged in courts today. For example, particularly in the area of environmental law, plaintiffs are challenging corporate environmental actions as ultra vires. Delaware corporation law states that the attorney general shall revoke the charter of a corporation for illegal acts. Additionally, the Court of Chancery of Delaware has jurisdiction to forfeit or revoke a corporate charter for abuse of corporate powers. Del. Code Ann., Title 8, Section 284 (2011). See Adam Sulkowski's "Ultra Vires Statutes: Alive, Kicking, and a Means of Circumventing the Scalia Standing Gauntlet." Adam Sulkowski, "Ultra Vires Statutes: Alive, Kicking, and a Means of Circumventing the Scalia Standing Gauntlet," *Journal of Environmental Law and Litigation* 14, no. 1 (2009): 75.

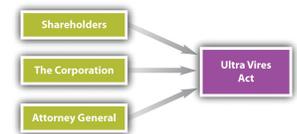

In essence, ultra vires retains force in three circumstances:

1. Shareholders may bring suits against the corporation to enjoin it from acting beyond its powers.
2. The corporation itself, through receivers, trustees, or shareholders, may sue incumbent or former officers or directors for causing the corporation to act ultra vires.
3. The state attorney general may assert the doctrine in a proceeding to dissolve the corporation or to enjoin it from transacting unauthorized business (see [Figure 45.1 "Attacks on Ultra Vires Acts"](#)).

3. A doctrine holding that certain legal consequences attach to an attempt by a corporation to carry out acts that are outside its lawful powers.

Suppose an incorporated luncheon club refuses to admit women as club members or guests. What happens if this action is ultra vires? *Cross v. The Midtown Club, Inc.* (see [Section 45.5.1 "Ultra Vires Acts"](#)), focuses on this issue. An ultra vires act is not necessarily criminal or tortious. However, every crime and tort is in some sense ultra vires because a corporation never has legal authority to commit crimes or torts. They raise special problems, to which we now turn.

Figure 45.1 Attacks on Ultra Vires Acts

Criminal, Tortious, and Other Illegal Acts

The early common law held that a corporation could not commit a crime because it did not have a mind and could not therefore have the requisite intent. An additional dilemma was that society could not literally imprison a corporation. Modern law is not so constricting. Illegal acts of its agents may be imputed to the corporation. Thus if the board of directors specifically authorizes the company to carry out a criminal scheme, or the president instructs his employees to break a regulatory law for the benefit of the company, the corporation itself may be convicted. Of course, it is rare for people in a corporate setting to avow their criminal intentions, so in most cases courts determine the corporation's liability by deciding whether an employee's crime was part of a job-related activity. The individuals within the corporation are much more likely to be held legally liable, but the corporation may be as well. For example, in extreme cases, a court could order the dissolution of the corporation; revoke some or all of its ability to operate, such as by revoking a license the corporation may hold; or prevent the corporation from engaging in a critical aspect of its business, such as acting as a trustee or engaging in securities transactions. But these cases are extremely rare.

That a corporation is found guilty of a violation of the law does not excuse company officials who authorized or carried out the illegal act. They, too, can be prosecuted and sent to jail. Legal punishments are being routinely added to the newer regulatory statutes, such as the Occupational Safety and Health Act, and the Toxic Substances Control Act—although prosecution depends mainly on whether and where a particular administration wishes to spend its enforcement dollars. Additionally, state prosecuting attorneys have become more active in filing criminal charges against management when employees are injured or die on the job. For instance, a trial court judge in Chicago sentenced a company president, plant manager, and foreman to twenty-five years in prison after they were convicted of murder following the death of a worker as a result of unsafe working conditions at a plant; *People v. O'Neil*, 550 N.E.2d 1090 (Ill. App. 1990). The punishments were later overturned, but the three pled guilty several years later and served shorter sentences of varying duration.

More recently, prosecutors have been expanding their prosecutions of corporations and developing methodologies to evaluate whether a corporation has committed a criminal act; for example, US Deputy Attorney General Paul McNulty revised “Principles of Federal Prosecutions of Business Organizations” in 2006 to further guide prosecutors in indicting corporations. The Securities and Exchange Commission, the Department of Justice, other regulatory bodies, and legal professionals have increasingly sought legal penalties against both corporations and its employees. See Exercise 2 at the end of this section to consider the legal ramifications of a corporation and its employees for the drunk-driving death of one of its patrons.

In certain cases, the liability of an executive can be vicarious. The Supreme Court affirmed the conviction of a chief executive who had no personal knowledge of a violation by his company of regulations promulgated by the Food and Drug Administration. In this case, an officer was held strictly liable for his corporation’s violation of the regulations, regardless of his knowledge, or lack thereof, of the actions (see [Chapter 6 "Criminal Law"](#)). *United States v. Park*, 421 U.S. 658 (1975). This stands in contrast to the general rule that an individual must know, or should know, of a violation of the law in order to be liable. Strict liability does not require knowledge. Thus a corporation’s top managers can be found criminally responsible even if they did not directly participate in the illegal activity. Employees directly responsible for violation of the law can also be held liable, of course. In short, violations of tort law, criminal law, and regulatory law can result in negative consequences for both the corporation and its employees.

KEY TAKEAWAY

A corporation has two types of powers: express powers and implied powers. When a corporation is acting outside its permissible power, it is said to be acting ultra vires. A corporation engages in ultra vires acts whenever it engages in illegal activities, such as criminal acts.

EXERCISES

1. What is an ultra vires act?
2. A group of undergraduate students travel from their university to a club. The club provides dinner and an open bar. One student becomes highly intoxicated and dies as the result of an automobile collision caused by the student. Can the club be held liable for the student's death? See *Commonwealth v. Penn Valley Resorts*. *Commonwealth v. Penn Valley Resorts*, 494 A.2d 1139 (Pa. Super. 1985).

45.2 Rights of Shareholders

LEARNING OBJECTIVES

1. Explain the various parts of the corporate management structure and how they relate to one another.
2. Describe the processes and practices of typical corporate meetings, including annual meetings.
3. Explain the standard voting process in most US corporations and what the respective roles of management and shareholders are.
4. Understand what corporate records can be reviewed by a shareholder and under what circumstances.

General Management Functions

In the modern publicly held corporation, ownership and control are separated. The shareholders “own” the company through their ownership of its stock, but power to manage is vested in the directors. In a large publicly traded corporation, most of the ownership of the corporation is diluted across its numerous shareholders, many of whom have no involvement with the corporation other than through their stock ownership. On the other hand, the issue of separation and control is generally irrelevant to the closely held corporation, since in many instances the shareholders are the same people who manage and work for the corporation.

Shareholders do retain some degree of control. For example, they elect the directors, although only a small fraction of shareholders control the outcome of most elections because of the diffusion of ownership and modern proxy rules; proxy fights are extremely difficult for insurgents to win. Shareholders also may adopt, amend, and repeal the corporation’s bylaws; they may adopt resolutions ratifying or refusing to ratify certain actions of the directors. And they must vote on certain extraordinary matters, such as whether to amend the articles of incorporation, merge, or liquidate.

Meetings

In most states, the corporation must hold at least one meeting of shareholders each year. The board of directors or shareholders representing at least 10 percent of the stock may call a special shareholders’ meeting at any time unless a different threshold number is stated in the articles or bylaws. Timely notice is required: not

more than sixty days nor less than ten days before the meeting, under Section 7.05 of the Revised Model Business Corporation Act (RMBCA). Shareholders may take actions without a meeting if every shareholder entitled to vote consents in writing to the action to be taken. This option is obviously useful to the closely held corporation but not to the giant publicly held companies.

Right to Vote

Who Has the Right to Vote?

Through its bylaws or by resolution of the board of directors, a corporation can set a “record date.” Only the shareholders listed on the corporate records on that date receive notice of the next shareholders’ meeting and have the right to vote. Every share is entitled to one vote unless the articles of incorporation state otherwise.

The one-share, one-vote principle, commonly called **regular voting**⁴ or statutory voting, is not required, and many US companies have restructured their voting rights in an effort to repel corporate raiders. For instance, a company might decide to issue both voting and nonvoting shares (as we discussed in [Chapter 45 "Corporate Powers and Management"](#)), with the voting shares going to insiders who thereby control the corporation. In response to these new corporate structures, the Securities and Exchange Commission (SEC) adopted a one-share, one-vote rule in 1988 that was designed to protect a shareholder’s right to vote. In 1990, however, a federal appeals court overturned the SEC rule on the grounds that voting rights are governed by state law rather than by federal law. *Business Roundtable v. SEC*, 905 F.2d 406 (D.C. Cir. 1990).

Quorum

When the articles of incorporation are silent, a **shareholder quorum**⁵ is a simple majority of the shares entitled to vote, whether represented in person or by proxy, according to RMBCA Section 7.25. Thus if there are 1 million shares, 500,001 must be represented at the shareholder meeting. A simple majority of those represented shares is sufficient to carry any motion, so 250,001 shares are enough to decide upon a matter other than the election of directors (governed by RMBCA, Section 7.28). The articles of incorporation may decree a different quorum but not less than one-third of the total shares entitled to vote.

Cumulative Voting

Cumulative voting⁶ means that a shareholder may distribute his total votes in any manner that he chooses—all for one candidate or several shares for different candidates. With cumulative voting, each shareholder has a total number of votes

4. The principle of one share, one vote. Also called statutory voting.

5. Minimum number of shareholders needed to have a valid vote. Also, when a simple majority of the shares entitled to vote is sufficient to effectuate a meeting.

6. Shareholder voting method permitting the holder to distribute his total votes in any manner that he chooses—all for one candidate or several shares for different candidates.

equal to the number of shares he owns multiplied by the number of directors to be elected. Thus if a shareholder has 1,000 shares and there are five directors to be elected, the shareholder has 5,000 votes, and he may vote those shares in a manner he desires (all for one director, or 2,500 each for two directors, etc.). Some states permit this right unless the articles of incorporation deny it. Other states deny it unless the articles of incorporation permit it. Several states have constitutional provisions requiring cumulative voting for corporate directors.

Cumulative voting is meant to provide minority shareholders with representation on the board. Assume that Bob and Carol each owns 2,000 shares, which they have decided to vote as a block, and Ted owns 6,000 shares. At their annual shareholder meeting, they are to elect five directors. Without cumulative voting, Ted's slate of directors would win: under statutory voting, each share represents one vote available for each director position. With this method, by placing as many votes as possible for each director, Ted could cast 6,000 votes for each of his desired directors. Thus each of Ted's directors would receive 6,000 votes, while each of Bob and Carol's directors would receive only 4,000. Under cumulative voting, however, each shareholder has as many votes as there are directors to be elected. Hence with cumulative voting Bob and Carol could strategically distribute their 20,000 votes (4,000 votes multiplied by five directors) among the candidates to ensure representation on the board. By placing 10,000 votes each on two of their candidates, they would be guaranteed two positions on the board. (The candidates from the two slates are not matched against each other on a one-to-one basis; instead, the five candidates with the highest number of votes are elected.) Various formulas and computer programs are available to determine how votes should be allocated, but the principle underlying the calculations is this: cumulative voting is democratic in that it allows the shareholders who own 40 percent of the stock—Bob and Carol—to elect 40 percent of the board.

RMBCA Section 8.08 provides a safeguard against attempts to remove directors. Ordinarily, a director may be removed by a majority vote of the shareholders. Cumulative voting will not aid a given single director whose ouster is being sought because the majority obviously can win on a straight vote. So Section 8.08 provides, "If cumulative voting is authorized, a director may not be removed if the number of votes sufficient to elect him under cumulative voting is voted against his removal."

Voting Arrangements to Concentrate Power

Shareholders use three types of arrangements to concentrate their power: proxies, voting agreements, and voting trusts.

Proxies

A **proxy**⁷ is the representative of the shareholder. A proxy may be a person who stands in for the shareholder or may be a written instrument by which the shareholder casts her votes before the shareholder meeting. Modern proxy voting allows shareholders to vote electronically through the Internet, such as at <http://www.proxyvoting.com>. Proxies are usually solicited by and given to management, either to vote for proposals or people named in the proxy or to vote however the proxy holder wishes. Through the proxy device, management of large companies can maintain control over the election of directors. Proxies must be signed by the shareholder and are valid for eleven months from the time they are received by the corporation unless the proxy explicitly states otherwise. Management may use reasonable corporate funds to solicit proxies if corporate policy issues are involved, but misrepresentations in the solicitation can lead a court to nullify the proxies and to deny reimbursement for the solicitation cost. Only the last proxy given by a particular shareholder can be counted.

Proxy solicitations are regulated by the SEC. For instance, SEC rules require companies subject to the Securities Exchange Act of 1934 to file proxy materials with the SEC at least ten days before proxies are mailed to shareholders. Proxy statements must disclose all material facts, and companies must use a proxy form on which shareholders can indicate whether they approve or disapprove of the proposals.

Dissident groups opposed to management's position are entitled to solicit their own proxies at their own expense. The company must either furnish the dissidents with a list of all shareholders and addresses or mail the proxies at corporate expense. Since management usually prefers to keep the shareholder list private, dissidents can frequently count on the corporation to foot the mailing bill.

Voting Agreements

Unless they intend to commit fraud on a minority of stockholders, shareholders may agree in advance to vote in specific ways. Such a **voting agreement**⁸, often called a shareholder agreement, is generally legal. Shareholders may agree in advance, for example, to vote for specific directors; they can even agree to vote for the dissolution of the corporation in the event that a predetermined contingency occurs. A voting agreement is easier to enter into than a voting trust (discussed next) and can be less expensive, since a trustee is not paid to administer a voting agreement. A voting agreement also permits shareholders to retain their shares rather than turning the shares over to a trust, as would be required in a voting trust.

7. A method whereby a shareholder elects a representative, commonly another individual or a written document, through which the shareholder casts his vote at the annual meeting.

8. An agreement made in advance among shareholders to vote in a particular manner. Also called shareholder agreement.

Voting Trusts

To ensure that shareholder agreements will be honored, shareholders in most states can create a **voting trust**⁹. By this device, voting shares are given to voting trustees, who are empowered to vote the shares in accordance with the objectives set out in the trust agreement. Section 7.30 of the RMBCA limits the duration of voting trusts to ten years. The voting trust is normally irrevocable, and the shareholders' stock certificates are physically transferred to the voting trustees for the duration of the trust. The voting trust agreement must be on file at the corporation, open for inspection by any shareholder.

Inspection of Books and Records

Shareholders are legally entitled to inspect the records of the corporation in which they hold shares. These records include the articles of incorporation, bylaws, and corporate resolutions. As a general rule, shareholders who want certain records (such as minutes of a board of directors' meeting or accounting records) must also have a "proper purpose," such as to determine the propriety of the company's dividend policy or to ascertain the company's true financial worth. Improper purposes include uncovering trade secrets for sale to a competitor or compiling mailing lists for personal business purposes. A shareholder's motivation is an important factor in determining whether the purpose is proper, as the courts attempt to balance the rights of both the shareholders and the corporation. For example, a Minnesota court applied Delaware law in finding that a shareholder's request to view the corporation's shareholder ledger to identify shareholders and communicate with them about the corporation's involvement in the Vietnam War was improper. A desire to communicate with the other corporate shareholders was found to be insufficient to compel inspection. *Pillsbury v. Honeywell*, 291 Minn. 322; 191 N.W.2d 406 (Minn. 1971). Contrast that finding with a Delaware court's finding that a shareholder had a proper purpose in requesting a corporation's shareholder list in order to communicate with them about the economic risks of the firm's involvement in Angola. *The Conservative Caucus Research, Analysis & Education Foundation, Inc. v. Chevron*, 525 A.2d 569 (Del. 1987). See Del. Code Ann., Title 8, Section 220 (2011).

Preemptive Rights

Assume that BCT Bookstore has outstanding 5,000 shares with par value of ten dollars and that Carol owns 1,000. At the annual meeting, the shareholders decide to issue an additional 1,000 shares at par and to sell them to Alice. Carol vehemently objects because her percentage of ownership will decline. She goes to court seeking an injunction against the sale or an order permitting her to purchase 200 of the shares (she currently has 20 percent of the total). How should the court rule?

9. A trust created among shareholders where the shareholders elect a trust agreement, the provisions of which are effectuated by a voting trustee.

The answer depends on the statutory provision dealing with **preemptive rights**¹⁰—that is, the right of a shareholder to be protected from dilution of her percentage of ownership. In some states, shareholders have no preemptive rights unless expressly declared in the articles of incorporation, while other states give shareholders preemptive rights unless the articles of incorporation deny it. Preemptive rights were once strongly favored, but they are increasingly disappearing, especially in large publicly held companies where ownership is already highly diluted.

Derivative Actions

Suppose Carol discovers that Ted has been receiving kickbacks from publishers and has been splitting the proceeds with Bob. When at a directors' meeting, Carol demands that the corporation file suit to recover the sums they pocketed, but Bob and Ted outvote her. Carol has another remedy. She can file a **derivative action**¹¹ against them. A derivative lawsuit is one brought on behalf of the corporation by a shareholder when the directors refuse to act. Although the corporation is named as a defendant in the suit, the corporation itself is the so-called real party in interest—the party entitled to recover if the plaintiff wins.

While derivative actions are subject to abuse by plaintiffs' attorneys seeking settlements that pay their fees, safeguards have been built into the law. At least ninety days before starting a derivative action, for instance, shareholders must demand in writing that the corporation take action. Shareholders may not commence derivative actions unless they were shareholders at the time of the wrongful act. Derivative actions may be dismissed if disinterested directors decide that the proceeding is not in the best interests of the corporation. (A **disinterested director**¹² is a director who has no interest in the disputed transaction.) Derivative actions are discussed further in Chapter 45 "Corporate Powers and Management".

10. The rights of shareholders to protect dilution of their percentage of share ownership.

11. Lawsuit brought on behalf of the corporation by a shareholder when the directors refuse to act.

12. A director who has no interest in the disputed transaction.

KEY TAKEAWAY

In large publicly traded corporations, shareholders own the corporation but have limited power to affect decisions. The board of directors and officers exercise much of the power. Shareholders exercise their power at meetings, typically through voting for directors. Statutes, bylaws, and the articles of incorporation determine how voting occurs—such as whether a quorum is sufficient to hold a meeting or whether voting is cumulative. Shareholders need not be present at a meeting—they may use a proxy to cast their votes or set up voting trusts or voting agreements. Shareholders may view corporate documents with proper demand and a proper purpose. Some corporations permit shareholders preemptive rights—the ability to purchase additional shares to ensure that the ownership percentage is not diluted. A shareholder may also file suit on behalf of the corporation—a legal proceeding called a derivative action.

EXERCISES

1. Explain cumulative voting. What is the different between cumulative voting and regular voting? Who benefits from cumulative voting?
2. A shareholder will not be at the annual meeting. May that shareholder vote? If so, how?
3. The BCT Bookstore is seeking an additional store location. Ted, a director of BCT, knows of the ideal building that would be highly profitable for BCT and finds out that it is for sale. Unbeknownst to BCT, Ted is starting a clothing retailer. He purchases the building for his clothing business, thereby usurping a corporate opportunity for BCT. Sam, a BCT shareholder, finds out about Ted's business deal. Does Sam have any recourse? See RMBCA Section 8.70.

45.3 Duties and Powers of Directors and Officers

LEARNING OBJECTIVES

1. Examine the responsibility of directors and the delegation of decisions.
2. Discuss the qualifications, election, and removal of directors.
3. Determine what requirements are placed on directors for meetings and compensation.

General Management Responsibility of the Directors

Directors derive their power to manage the corporation from statutory law. Section 8.01 of the Revised Model Business Corporation Act (RMBCA) states that “all corporate powers shall be exercised by or under the authority of, and the business and affairs of the corporation managed under the direction of, its board of directors.” A director is a **fiduciary**¹³, a person to whom power is entrusted for another’s benefit, and as such, as the RMBCA puts it, must perform his duties “in good faith, with the care an ordinarily prudent person in a like position would exercise under similar circumstances” (Section 8.30). A director’s main responsibilities include the following: (1) to protect shareholder investments, (2) to select and remove officers, (3) to delegate operating authority to the managers or other groups, and (4) to supervise the company as a whole.

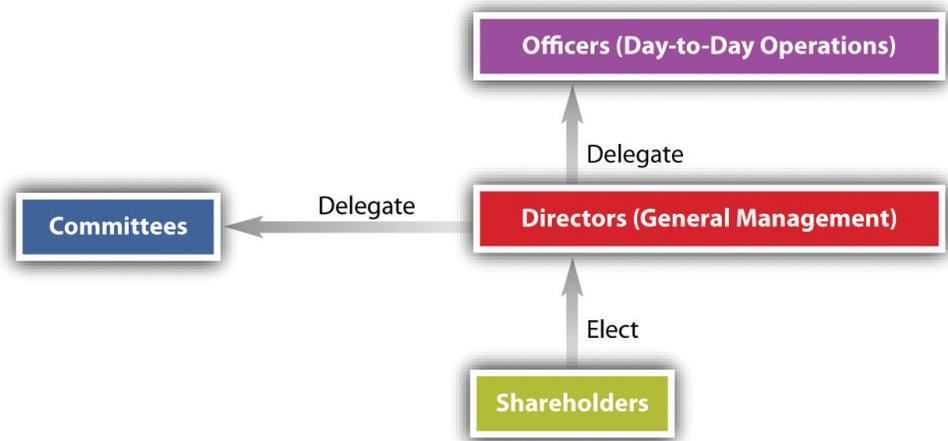

Delegation to Committees

Under RMBCA Section 8.25, the board of directors, by majority vote, may delegate its powers to various committees. This authority is limited to some degree. For example, only the full board can determine dividends, approve a merger, and amend the bylaws. The delegation of authority to a committee does not, by itself, relieve a director from the duty to exercise due care.

13. A person to whom power is entrusted for the benefit of another.

Delegation to Officers

Figure 45.2 *The Corporate Governance Model*

The directors often delegate to officers the day-to-day authority to execute the policies established by the board and to manage the firm (see [Figure 45.2 "The Corporate Governance Model"](#)). Normally, the president is the chief executive officer (CEO) to whom all other officers and employees report, but sometimes the CEO is also the chairman of the board.

Number and Election of Directors

Section 8.03 of the RMBCA provides that there must be one director, but there may be more, the precise number to be fixed in the articles of incorporation or bylaws. The initial members of the board hold office until the first annual meeting, when elections occur. (The initial board members are permitted to succeed themselves.) Directors are often chosen to serve one-year terms and must be elected or reelected by the shareholders annually, unless there are nine or more directors. In that case, if the articles of incorporation so provide, the board may be divided into two or three roughly equal classes and their terms staggered, so that the second class is elected at the second annual meeting and the third at the third annual meeting. A staggered board allows for the continuity of directors or as a defense against a hostile takeover.

Directors' Qualifications and Characteristics

The statutes do not catalog qualifications that directors are expected to possess. In most states, directors need not be residents of the state or shareholders of the

corporation unless required by the articles of incorporation or bylaws, which may also set down more precise qualifications if desired.

Until the 1970s, directors tended to be a homogeneous lot: white male businessmen or lawyers. Political change—rising consumer, environmental, and public interest consciousness—and embarrassment stemming from disclosures made in the wake of Securities and Exchange Commission (SEC) investigations growing out of Watergate prompted companies to diversify their boardrooms. Today, members of minority groups and women are being appointed in increasing numbers, although their proportion to the total is still small. Outside directors (directors who are not employees, officers, or otherwise associated with the corporation; they are also called nonexecutive directors) are becoming a potent force on corporate boards. The trend to promote the use of outside directors has continued—the Sarbanes-Oxley Act of 2002 places emphasis on the use of outside directors to provide balance to the board and protect the corporation’s investors.

Removal of Directors and Officers

In 1978, one week before he was scheduled to unveil the 1979 Mustang to trade journalists in person, Lee Iacocca, president of the Ford Motor Company, was summarily fired by unanimous vote of the board of directors, although his departure was billed as a resignation. Iacocca was reported to have asked company chairman Henry Ford II, “What did I do wrong?” To which Ford was said to have replied, “I just don’t like you.” “Friction Triggers Iacocca Ouster,” *Michigan Daily*, July 15, 1978. To return to our usual example: BCT Bookstore is set to announce its acquisition of Borders Group, Inc., a large book retailer that is facing bankruptcy. Alice, one of BCT’s directors, was instrumental in the acquisition. One day prior to the announcement of the acquisition, BCT’s board relieved Alice of her directorship, providing no reason for the decision. The story raises this question: May a corporate officer, or director for that matter, be fired without cause?

Yes. Many state statutes expressly permit the board to fire an officer with or without cause. However, removal does not defeat an officer’s rights under an employment contract. Shareholders may remove directors with or without cause at any meeting called for the purpose. A majority of the shares entitled to vote, not a majority of the shares represented at the meeting, are required for removal.

Meetings

Directors must meet, but the statutes themselves rarely prescribe how frequently. More often, rules prescribing time and place are set out in the bylaws, which may

permit members to participate in any meeting by conference telephone. In practice, the frequency of board meetings varies.

The board or committees of the board may take action without meeting if all members of the board or committee consent in writing. A majority of the members of the board constitutes a quorum, unless the bylaws or articles of incorporation specify a larger number. Likewise, a majority present at the meeting is sufficient to carry any motion unless the articles or bylaws specify a larger number.

Compensation

In the past, directors were supposed to serve without pay, as shareholder representatives. The modern practice is to permit the board to determine its own pay unless otherwise fixed in the articles of incorporation. Directors' compensation has risen sharply in recent years. The Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010, however, has made significant changes to compensation, allowing shareholders a "say on pay," or the ability to vote on compensation.

KEY TAKEAWAY

The directors exercise corporate powers. They must exercise these powers with good faith. Certain decisions may be delegated to a committee or to corporate officers. There must be at least one director, and directors may be elected at once or in staggered terms. No qualifications are required, and directors may be removed without cause. Directors, just like shareholders, must meet regularly and may be paid for their involvement on the board.

EXERCISES

1. What are the fiduciary duties required of a director? What measuring comparison is used to evaluate whether a director is meeting these fiduciary duties?
2. How would a staggered board prevent a hostile takeover?

45.4 Liability of Directors and Officers

LEARNING OBJECTIVES

1. Examine the fiduciary duties owed by directors and officers.
2. Consider constituency statutes.
3. Discuss modern trends in corporate compliance and fiduciary duties.

Nature of the Problem

Not so long ago, boards of directors of large companies were quiescent bodies, virtual rubber stamps for their friends among management who put them there. By the late 1970s, with the general increase in the climate of litigiousness, one out of every nine companies on the *Fortune* 500 list saw its directors or officers hit with claims for violation of their legal responsibilities. “D & O Claims Incidence Rises,” *Business Insurance*, November 12, 1979, 18. In a seminal case, the Delaware Supreme Court found that the directors of TransUnion were grossly negligent in accepting a buyout price of \$55 per share without sufficient inquiry or advice on the adequacy of the price, a breach of their duty of care owed to the shareholders. The directors were held liable for \$23.5 million for this breach. *Smith v. Van Gorkom*, 488 A.2d 858 (Del. 1985). Thus serving as a director or an officer was never free of business risks. Today, the task is fraught with legal risk as well.

Two main fiduciary duties apply to both directors and officers: one is a duty of loyalty, the other the duty of care. These duties arise from responsibilities placed upon directors and officers because of their positions within the corporation. The requirements under these duties have been refined over time. Courts and legislatures have both narrowed the duties by defining what is or is not a breach of each duty and have also expanded their scope. Courts have further refined the duties, such as laying out tests such as in the *Caremark* case, outlined in [Section 45.4.3 "Duty of Care"](#). Additionally, other duties have been developed, such as the duties of good faith and candor.

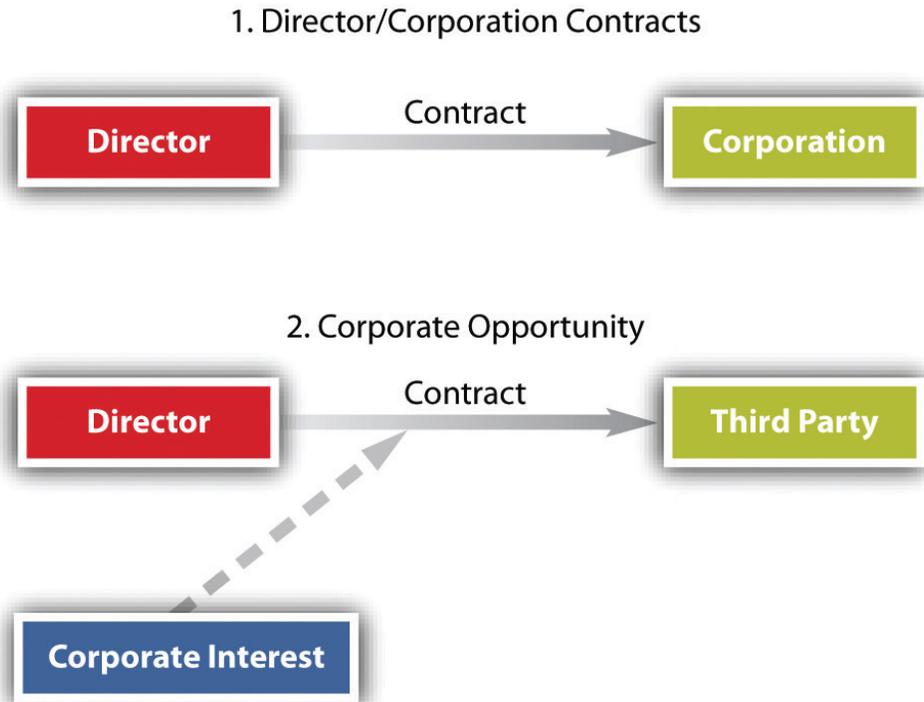

Duty of Loyalty

As a fiduciary of the corporation, the director owes his primary loyalty to the corporation and its stockholders, as do the officers and majority shareholders. This responsibility is called the **duty of loyalty**¹⁴. When there is a conflict between a director’s personal interest and the interest of the corporation, he is legally bound

14. Fiduciary obligation requiring loyalty of directors and officers to the corporation and its shareholders.

to put the corporation's interest above his own. This duty was mentioned in Exercise 3 of [Section 45.2 "Rights of Shareholders"](#) when Ted usurped a corporate opportunity and will be discussed later in this section.

Figure 45.3 *Common Conflict Situations*

Two situations commonly give rise to the director or officer's duty of loyalty: (1) contracts with the corporation and (2) corporate opportunity (see [Figure 45.3 "Common Conflict Situations"](#)).

Contracts with the Corporation

The law does not bar a director from contracting with the corporation he serves. However, unless the contract or transaction is "fair to the corporation," Sections 8.61, 8.62, and 8.63 of the Revised Model Business Corporation Act (RMBCA) impose on him a stringent duty of disclosure. In the absence of a fair transaction, a contract between the corporation and one of its directors is voidable. If the transaction is unfair to the corporation, it may still be permitted if the director has made full disclosure of his personal relationship or interest in the contract and if disinterested board members or shareholders approve the transaction.

Corporate Opportunity

Whenever a director or officer learns of an opportunity to engage in a variety of activities or transactions that might be beneficial to the corporation, his first obligation is to present the opportunity to the corporation. The rule encompasses the chance of acquiring another corporation, purchasing property, and licensing or marketing patents or products. This duty of disclosure was placed into legal lexicon by Judge Cardozo in 1928 when he stated that business partners owe more than a general sense of honor among one another; rather, they owe “the punctilio of honor most sensitive.” *Meinhard v. Salmon*, 164 N.W. 545 (N.Y. 1928). Thus when a corporate opportunity arises, business partners must disclose the opportunity, and a failure to disclose is dishonest—a breach of the duty of loyalty.

Whether a particular opportunity is a corporate opportunity can be a delicate question. For example, BCT owns a golf course and a country club. A parcel of land adjacent to their course comes on the market for sale, but BCT takes no action. Two BCT officers purchase the land personally, later informing the BCT board about the purchase and receiving board ratification of their purchase. Then BCT decides to liquidate and enters into an agreement with the two officers to sell both parcels of land. A BCT shareholder brings a derivative suit against the officers, alleging that purchasing the adjacent land stole a corporate opportunity. The shareholder would be successful in his suit. In considering *Farber v. Servan Land Co., Inc.*, *Farber v. Servan Land Co., Inc.*, 662 F.2d 371 (5th Cir. 1981). a case just like the one described, the *Farber* court laid out four factors in considering whether a corporate opportunity has been usurped:

1. Whether there is an actual corporate opportunity that the firm is considering
2. Whether the corporation’s shareholders declined to follow through on the opportunity
3. Whether the board or its shareholders ratified the purchase and, specifically, whether there were a sufficient number of disinterested voters
4. What benefit was missed by the corporation

In considering these factors, the *Farber* court held that the officers had breached a duty of loyalty to the corporation by individually purchasing an asset that would have been deemed a corporate opportunity.

When a director serves on more than one board, the problem of corporate opportunity becomes even more complex, because he may be caught in a situation of conflicting loyalties. Moreover, multiple board memberships pose another

serious problem. A **direct interlock**¹⁵ occurs when one person sits on the boards of two different companies; an **indirect interlock**¹⁶ happens when directors of two different companies serve jointly on the board of a third company. The Clayton Act prohibits interlocking directorates between direct competitors. Despite this prohibition, as well as public displeasure, corporate board member overlap is commonplace. According to an analysis by *USA Today* and The Corporate Library, eleven of the fifteen largest companies have at least two board members who also sit together on the board of another corporation. Furthermore, CEOs of one corporation often sit on the boards of other corporations. Bank board members may sit on the boards of other corporations, including the bank's own clients. This web of connections has both pros and cons. For a further discussion of board member connectedness, see Matt Krant, "Web of Board Members Ties Together Corporation America," at http://www.usatoday.com/money/companies/management/2002-11-24-interlock_x.htm.

Duty of Care

The second major aspect of the director's responsibility is that of **duty of care**¹⁷. Section 8.30 of RMBCA calls on the director to perform his duties "with the care an ordinarily prudent person in a like position would exercise under similar circumstances." An "ordinarily prudent person" means one who directs his intelligence in a thoughtful way to the task at hand. Put another way, a director must make a reasonable effort to inform himself before making a decision, as discussed in the next paragraph. The director is not held to a higher standard required of a specialist (finance, marketing) unless he is one. A director of a small, closely held corporation will not necessarily be held to the same standard as a director who is given a staff by a large, complex, diversified company. The standard of care is that which an ordinarily prudent person would use who is in "a like position" to the director in question. Moreover, the standard is not a timeless one for all people in the same position. The standard can depend on the circumstances: a fast-moving situation calling for a snap decision will be treated differently later, if there are recriminations because it was the wrong decision, than a situation in which time was not of the essence.

15. A situation where one person sits on the board of directors of two different companies.

16. A situation where directors of two different companies serve jointly on the board of a third company.

17. Fiduciary obligation upon directors and officers to act with the care an ordinarily prudent person in a like position would exercise under similar circumstances.

What of the care itself? What kind of care would an ordinarily prudent person in any situation be required to give? Unlike the standard of care, which can differ, the care itself has certain requirements. At a minimum, the director must pay attention. He must attend meetings, receive and digest information adequate to inform him about matters requiring board action, and monitor the performance of those to whom he has delegated the task of operating the corporation. Of course, documents can be misleading, reports can be slanted, and information coming from self-interested management can be distorted. To what heights must suspicion be raised? Section 8.30 of the RMBCA forgives directors the necessity of playing

detective whenever information, including financial data, is received in an apparently reliable manner from corporate officers or employees or from experts such as attorneys and public accountants. Thus the director does not need to check with another attorney once he has received financial data from one competent attorney.

A New Jersey Supreme Court decision considered the requirements of fiduciary duties, particularly the duty of care. Pritchard & Baird was a reissuance corporation owned by Pritchard and having four directors: Pritchard, his wife, and his two sons. Pritchard and his sons routinely took loans from the accounts of the firm's clients. After Pritchard died, his sons increased their borrowing, eventually sending the business into bankruptcy. During this time, Mrs. Pritchard developed a fondness for alcohol, drinking heavily and paying little attention to her directorship responsibilities. Creditors sued Mrs. Pritchard for breaches of her fiduciary duties, essentially arguing that the bankruptcy would not have occurred had she been acting properly. After both the trial court and appellate court found for the creditors, the New Jersey Supreme Court took up the case. The court held that a director must have a basic understanding of the business of the corporation upon whose board he or she sits. This can be accomplished by attending meetings, reviewing and understanding financial documents, investigating irregularities, and generally being involved in the corporation. The court found that Mrs. Pritchard's being on the board because she was the spouse was insufficient to excuse her behavior, and that had she been performing her duties, she could have prevented the bankruptcy. *Francis v. United Jersey Bank*, 87 N.J. 15, 432 A.2d 814 (N.J. 1981).

Despite the fiduciary requirements, in reality a director does not spend all his time on corporate affairs, is not omnipotent, and must be permitted to rely on the word of others. Nor can directors be infallible in making decisions. Managers work in a business environment, in which risk is a substantial factor. No decision, no matter how rigorously debated, is guaranteed. Accordingly, courts will not second-guess decisions made on the basis of good-faith judgment and due care. This is the **business judgment rule**¹⁸, mentioned in previous chapters. The business judgment rule was coming into prominence as early as 1919 in *Dodge v. Ford*, discussed in [Chapter 44 "Legal Aspects of Corporate Finance"](#). It has been a pillar of corporate law ever since. As described by the Delaware Supreme Court: "The business judgment rule is an acknowledgment of the managerial prerogatives of Delaware directors....It is a presumption that in making a business decision the directors of a corporation acted on an informed basis, in good faith and in the honest belief that the action taken was in the best interests of the company." *Aronson v. Lewis*, 473 A.2d 805, 812 (Del. 1984).

Under the business judgment rule, the actions of directors who fulfill their fiduciary duties will not be second-guessed by a court. The general test is whether a

18. Presumption given by the courts to corporate directors that their actions were informed and done with good faith and with an honest belief that the actions were in the best interests of the corporation.

director's decision or transaction was so one sided that no businessperson of ordinary judgment would reach the same decision. The business judgment rule has been refined over time. While the business judgment rule may seem to provide blanket protection for directors (the rule was quite broad as outlined by the court in *Dodge v. Ford*), this is not the case. The rule does not protect every decision made by directors, and they may face lawsuits, a topic to which we now turn. For further discussions of the business judgment rule, see *Cede & Co. v. Technicolor, Inc.*, *Cede & Co. v. Technicolor, Inc.*, 634 A.2d 345 (Del. 1993). *In re The Walt Disney Co. Derivative Litigation*, *In re The Walt Disney Co. Derivative Litigation*, 906 A.2d 27 (Del. 2006). and *Smith v. Van Gorkom*. *Smith v. Van Gorkom*, 488 A.2d 858 (Del. 1985).

If a shareholder is not pleased by a director's decision, that shareholder may file a derivative suit. The derivative suit may be filed by a shareholder on behalf of the corporation against directors or officers of the corporation, alleging breach of their fiduciary obligations. However, a shareholder, as a prerequisite to filing a derivative action, must first demand that the board of directors take action, as the actual party in interest is the corporation, not the shareholder (meaning that if the shareholder is victorious in the lawsuit, it is actually the corporation that "wins"). If the board refuses, is its decision protected by the business judgment rule? The general rule is that the board may refuse to file a derivative suit and will be protected by the business judgment rule. And even when a derivative suit is filed, directors can be protected by the business judgment rule for decisions even the judge considers to have been poorly made. See *In re The Walt Disney Co. Derivative Litigation*, (see [Section 45.5.2 "Business Judgment Rule"](#)).

In a battle for control of a corporation, directors (especially "inside" directors, who are employees of the corporation, such as officers) often have an inherent self-interest in preserving their positions, which can lead them to block mergers that the shareholders desire and that may be in the firm's best interest. As a result, Delaware courts have modified the usual business judgment presumption in this situation. In *Unocal Corp. v. Mesa Petroleum*, *Unocal Corp. v. Mesa Petroleum*, 493 A.2d 946 (Del. 1985). for instance, the court held that directors who adopt a defensive mechanism "must show that they had reasonable grounds for believing that a danger to corporate policy and effectiveness existed....[T]hey satisfy that burden 'by showing good faith and reasonable investigation.'" The business judgment rule clearly does not protect every decision of the board. The *Unocal* court developed a test for the board: the directors may only work to prevent a takeover when they can demonstrate a threat to the policies of the corporation and that any defensive measures taken to prevent the takeover were reasonable and proportional given the depth of the threat. The *Unocal* test was modified further by requiring a finding, before a court steps in, that the actions of a board were coercive, a step back toward the business judgment rule. *Unitrin v. American General Corp.*, 651 A.2d 1361 (Del. 1995).

In a widely publicized case, the Delaware Supreme Court held that the board of Time, Inc. met the *Unocal* test—that the board reasonably concluded that a tender offer by Paramount constituted a threat and acted reasonably in rejecting Paramount’s offer and in merging with Warner Communications. *Paramount Communications, Inc. v. Time, Inc.*, 571 A.2d 1140 (Del. 1989).

The specific elements of the fiduciary duties are not spelled out in stone. For example, the Delaware courts have laid out three factors to examine when determining whether a duty of care has been breached: *In re Caremark International Inc. Derivative Litigation*, 698 A.2d 959 (Del. Ch. 1996).

1. The directors knew, or should have known, that legal breaches were occurring.
2. The directors took no steps to prevent or resolve the situation.
3. This failure caused the losses about which the shareholder is complaining in a derivative suit.

Thus the court expanded the duty of oversight (which is included under the umbrella of the duty of care; these duties are often referred to as the *Caremark* duties). Furthermore, courts have recognized a **duty of good faith**¹⁹—a duty to act honestly and avoid violations of corporate norms and business practices. For more information, see Melvin Eisenberg, “The Duty of Good Faith in Corporate Law,” 31 *Delaware Journal of Corporate Law*, 1 (2005). Therefore, the split in ownership and decision making within the corporate structure causes rifts, and courts are working toward balancing the responsibilities of the directors to their shareholders with their ability to run the corporation.

Constituency Statutes and Corporate Social Responsibility

Until the 1980s, the law in all the states imposed on corporate directors the obligation to advance shareholders’ economic interests to ensure the long-term profitability of the corporation. Other groups—employees, local communities and neighbors, customers, suppliers, and creditors—took a back seat to this primary responsibility of directors. Of course, directors could consider the welfare of these other groups if in so doing they promoted the interests of shareholders. But directors were not legally permitted to favor the interests of others over shareholders. The prevailing rule was, and often still is, that maximizing shareholder value is the primary duty of the board. Thus in *Revlon, Inc. v. MacAndrews & Forbes Holdings, Inc.*, *Revlon, Inc. v. MacAndrews & Forbes Holdings, Inc.*, 506 A.2d 173 (Del. 1986). the Delaware Supreme Court held that Revlon’s directors had breached their fiduciary duty to the company’s shareholders in response to a hostile tender offer from Pantry Pride. While the facts of the case are intricate, the

19. Fiduciary duty to act honestly and avoid violations of corporate norms and business practices.

general gist is that the Revlon directors thwarted the hostile tender by adopting a variation of a poison pill involving a tender offer for their own shares in exchange for debt, effectively eliminating Pantry Pride's ability to take over the firm. Pantry Pride upped its offer price, and in response, Revlon began negotiating with a leveraged buyout by a third party, Forstmann Little. Pantry Pride publicly announced it would top any bid made by Forstmann Little. Despite this, the Revlon board negotiated a deal with Forstmann Little. The court noted an exception to the general rule that permitted directors to consider the interests of other groups as long as "there are rationally related benefits accruing to the stockholders." But when a company is about to be taken over, the object must be to sell it to the highest bidder, Pantry Pride in this case. It is then, said the court, in situations where the corporation is to be sold, that "concern for nonstockholder interests is inappropriate," thus giving rise to what are commonly called the Revlon duties.

Post-*Revlon*, in response to a wave of takeovers in the late 1980s, some states have enacted laws to give directors legal authority to take account of interests other than those of shareholders in deciding how to defend against hostile mergers and acquisitions. These laws are known as **constituency statutes**²⁰, because they permit directors to take account of the interests of other constituencies of corporations. These do not permit a corporation to avoid its Revlon duties (that when a corporation is up for sale, it must be sold to the highest bidder) but will allow a corporation to consider factors other than shareholder value in determining whether to make charitable donations or reinvest profits. This ability has been further expanding as the concept of corporate social responsibility has grown, as discussed later in this section.

Although the other constituency statutes are not identically worded, they are all designed to release directors from their formal legal obligation to keep paramount the interests of shareholders. The Pennsylvania and Indiana statutes make this clear; statutes in other states are worded a bit more ambiguously, but the intent of the legislatures in enacting these laws seems clear: directors may give voice to employees worried about the loss of jobs or to communities worried about the possibility that an out-of-state acquiring company may close down a local factory to the detriment of the local economy. So broadly worded are these laws that although the motive for enacting them was to give directors a weapon in fighting hostile tender offers, in some states the principle applies to any decision by a board of directors. So, for example, it is possible that a board might legally decide to give a large charitable grant to a local community—a grant so large that it would materially decrease an annual dividend, contrary to the general rule that at some point the interests of shareholders in dividends clearly outweighs the board's power to spend corporate profits on "good works."

20. Statutes that permit corporate directors to take into account interests other than maximizing shareholder value.

Critics have attacked the constituency statutes on two major grounds: first, they substitute a clear principle of conduct for an amorphous one, because they give no guidance on how directors are supposed to weigh the interests of a corporation's various constituencies. Second, they make it more difficult for shareholders to monitor the performance of a company's board; measuring decisions against the single goal of profit maximization is far easier than against the subjective goal of "balancing" a host of competing interests. Constituency statutes run contrary to the concept of shareholders as owners, and of the fiduciary duties owed to them, effectively softening shareholder power. Nevertheless, since many states now have constituency statutes, it is only reasonable to expect that the traditional doctrine holding shareholder interests paramount will begin to give way, even as the shareholders challenge new decisions by directors that favor communities, employees, and others with an important stake in the welfare of the corporations with which they deal. For a more complete discussion of constituency statutes, see "Corporate Governance and the Sarbanes-Oxley Act: Corporate Constituency Statutes and Employee Governance." Brett H. McDonnell, "Corporate Governance and the Sarbanes-Oxley Act: Corporate Constituency Statutes and Employee Governance," *William Mitchell Law Review* 30 (2004): 1227.

Many modern corporations have begun to promote socially responsible behavior. While dumping toxic waste out the back door of the manufacturing facility rather than expending funds to properly dispose of the waste may result in an increase in value, the consequences of dumping the waste can be quite severe, whether from fines from regulatory authorities or from public backlash. Corporate social responsibility results from internal corporate policies that attempt to self-regulate and fulfill legal, ethical, and social obligations. Thus under corporate social responsibility, corporations may make donations to charitable organizations or build environmentally friendly or energy-efficient buildings. Socially irresponsible behavior can be quite disastrous for a corporation. Nike, for example, was hit by consumer backlash due to its use of child labor in other countries, such as India and Malaysia. British Petroleum (BP) faced public anger as well as fines and lawsuits for a massive oil spill in the Gulf of Mexico. This spill had serious consequences for BP's shareholders—BP stopped paying dividends, its stock price plummeted, and it had to set aside significant amounts of money to compensate injured individuals and businesses.

Many businesses try to fulfill what is commonly called the triple bottom line, which is a focus on profits, people, and the planet. For example, Ben and Jerry's, the ice cream manufacturer, had followed a triple bottom line practice for many years. Nonetheless, when Ben and Jerry's found itself the desired acquisition of several other businesses, it feared that a takeover of the firm would remove this focus, since for some firms, there is only one bottom line—profits. Unilever offered \$43.60 per share for Ben and Jerry's. Several Ben and Jerry's insiders made a counteroffer

at \$38 per share, arguing that a lower price was justified given the firm's focus. Ultimately, in a case like this, the Revlon duties come into play: when a corporation is for sale, corporate social responsibility goes out the window and only one bottom line exists—maximum shareholder value. In the case of Ben and Jerry's, the company was acquired in 2000 for \$326 million by Unilever, the Anglo-Dutch corporation that is the world's largest consumer products company.

Sarbanes-Oxley and Other Modern Trends

The Sarbanes-Oxley Act of 2002, enacted following several accounting scandals, strengthens the duties owed by the board and other corporate officers. In particular, Title III contains corporate responsibility provisions, such as requiring senior executives to vouch for the accuracy and completeness of their corporation's financial disclosures. While the main goal of Sarbanes-Oxley is to decrease the incidents of financial fraud and accounting tricks, its operative goal is to strengthen the fiduciary duties of loyalty and care as well as good faith.

The modern trend has been to impose more duties. Delaware has been adding to the list of fiduciary responsibilities other than loyalty and care. As mentioned previously, the Delaware judicial system consistently recognizes a duty of good faith. The courts have further added a duty of candor with shareholders when the corporation is disseminating information to its investors. Particular duties arise in the context of mergers, acquisitions, and tender offers. As mentioned previously in the *Revlon* case, the duty owed to shareholders in situations of competing tender offers is that of maximum value. Other duties may arise, such as when directors attempt to retain their positions on the board in the face of a hostile tender offer. Trends in fiduciary responsibilities, as well as other changes in the business legal field, are covered extensively by the American Bar Association at http://www.americanbar.org/groups/business_law.html.

Liability Prevention and Insurance

Alice, the director of BCT, has been charged with breaching her duty of care. Is she personally liable for a breach of the duty of care? How can a director avoid liability? Of course, she can never avoid defending a lawsuit, for in the wake of any large corporate difficulty—from a thwarted takeover bid to a bankruptcy—some group of shareholders will surely sue. But the director can immunize herself ultimately by carrying out her duties of loyalty and care. In practice, this often means that she should be prepared to document the reasonableness of her reliance on information from all sources considered. Second, if the director dissents from action that she considers mistaken or unlawful, she should ensure that her negative vote is recorded. Silence is construed as assent to any proposition before the board, and assent to a woefully mistaken action can be the basis for staggering liability.

Corporations, however, are permitted to limit or eliminate the personal liability of its directors. For example, Delaware law permits the articles of incorporation to contain a provision eliminating or limiting the personal liability of directors to the corporation, with some limitations. Del. Code Ann., Title 8, Section 102(b)(7) (2011).

Beyond preventive techniques, another measure of protection from director liability is **indemnification**²¹ (reimbursement). In most states, the corporation may agree under certain circumstances to indemnify directors, officers, and employees for expenses resulting from litigation when they are made party to suits involving the corporation. In third-party actions (those brought by outsiders), the corporation may reimburse the director, officer, or employee for all expenses (including attorneys' fees), judgments, fines, and settlement amounts. In derivative actions, the corporation's power to indemnify is more limited. For example, reimbursement for litigation expenses of directors adjudged liable for negligence or misconduct is allowed only if the court approves. In both third-party and derivative actions, the corporation must provide indemnification expenses when the defense is successful.

Whether or not they have the power to indemnify, corporations may purchase liability insurance for directors, officers, and employees (for directors and officers, the insurance is commonly referred to as D&O insurance). But insurance policies do not cover every act. Most exclude "willful negligence" and criminal conduct in which intent is a necessary element of proof. Furthermore, the cost of liability insurance has increased dramatically in recent years, causing some companies to cancel their coverage. This, in turn, jeopardizes the recent movement toward outside directors because many directors might prefer to leave or decline to serve on boards that have inadequate liability coverage. As a result, most states have enacted legislation that allows a corporation, through a charter amendment approved by shareholders, to limit the personal liability of its outside directors for failing to exercise due care. In 1990, Section 2.02 of the RMBCA was amended to provide that the articles of incorporation may include "a provision eliminating or limiting the liability of a director to the corporation or its shareholders for money damages...." This section includes certain exceptions; for example, the articles may not limit liability for intentional violations of criminal law. Delaware Code Section 102(b)(7), as mentioned previously, was enacted after *Smith v. Van Gorkom* (discussed in [Section 45.4.3 "Duty of Care"](#)) and was prompted by an outcry about the court's decision. As a result, many corporations now use similar provisions to limit director liability. For example, Delaware and California permit the limitation or abolition of liability for director's breach of the duty of care except in instances of fraud, bad faith, or willful misconduct.

21. A method of protecting directors and officers whereby the corporation agrees to pay legal expenses incurred by the directors or officers.

KEY TAKEAWAY

Directors and officers have two main fiduciary duties: the duty of loyalty and the duty of care. The duty of loyalty is a responsibility to act in the best interest of the corporation, even when that action may conflict with a personal interest. This duty commonly arises in contracts with the corporation and with corporate opportunities. The duty of care requires directors and officers to act with the care of an ordinarily prudent person in like circumstances. The business judgment rule may protect directors and officers, since courts give a presumption to the corporation that its personnel are informed and act in good faith. A shareholder may file a derivative lawsuit on behalf of the corporation against corporate insiders for breaches of these fiduciary obligations or other actions that harm the corporation. While directors and officers have obligations to the corporation and its shareholders, they may weigh other considerations under constituency statutes. In response to recent debacles, state and federal laws, such as Sarbanes-Oxley, have placed further requirements on officers and directors. Director and officer expenses in defending claims of wrongful acts may be covered through indemnification or insurance.

EXERCISES

1. What are the two major fiduciary responsibilities that directors and officers owe to the corporation and its shareholders?
2. What are some benefits of having interlocking directorates? What are some disadvantages?
3. Is there any connection between the business judgment rule and constituency statutes?

45.5 Cases

Ultra Vires Acts

Cross v. The Midtown Club, Inc.

33 Conn. Supp. 150; 365 A.2d 1227 (Conn. 1976)

STAPLETON, JUDGE.

The following facts are admitted or undisputed: The plaintiff is a member in good standing of the defendant nonstock Connecticut corporation. Each of the individual defendants is a director of the corporation, and together the individual defendants constitute the entire board of directors. The certificate of incorporation sets forth that the sole purpose of the corporation is “to provide facilities for the serving of luncheon or other meals to members.” Neither the certificate of incorporation nor the bylaws of the corporation contain any qualifications for membership, nor does either contain any restrictions on the luncheon guests members may bring to the club. The plaintiff sought to bring a female to lunch with him, and both he and his guest were refused seating at the luncheon facility. The plaintiff wrote twice to the president of the corporation to protest the action, but he received no reply to either letter. On three different occasions, the plaintiff submitted applications for membership on behalf of a different female, and only on the third of those occasions did the board process the application, which it then rejected. Shortly after both of the above occurrences, the board of directors conducted two separate pollings of its members, one by mail, the other by a special meeting held to vote on four alternative proposals for amending the bylaws of corporation concerning the admission of women members and guests. None of these proposed amendments to the bylaws received the required number of votes for adoption. Following that balloting, the plaintiff again wrote to the president of the corporation and asked that the directors stop interfering with his rights as a member to bring women guests to the luncheon facility and to propose women for membership. The president’s reply was that “the existing bylaws, house rules and customs continue in effect, and therefore [the board] consider[s] the matter closed.”

* * *

In addition to seeking a declaratory judgment which will inform him of his rights vis-à-vis the corporation and its directors, the plaintiff is also seeking injunctive relief, orders directing the admission of the plaintiff’s candidate to membership and

denying indemnity to the directors, money damages, and costs and expenses including reasonable attorney's fees. It should be noted at the outset that the plaintiff is not making a claim under either the federal or state civil rights or equal accommodations statutes, but that he is solely asserting his membership rights under the certificate of incorporation, the bylaws, and the statutes governing the regulation of this nonstock corporation. As such, this is a case of first impression in Connecticut.

* * *

Connecticut has codified the common-law right of a member to proceed against his corporation or its directors in the event of an ultra vires act. In fact, it has been done specifically under the Nonstock Corporation Act.

No powers were given to the defendant corporation in its certificate of incorporation, only a purpose, and as a result the only incidental powers which the defendant would have under the common law are those which are necessary to effect its purpose, that being to serve lunch to its members. Since the club was not formed for the purpose of having an exclusively male luncheon club, it cannot be considered necessary to its stated purpose for the club to have the implied power at common law to exclude women members.

Under the Connecticut Nonstock Corporation Act, the corporation could have set forth in its certificate of incorporation that its purpose was to engage in any lawful activity permitted that corporation. That was not done. Its corporate purposes were very narrowly stated to be solely for providing "facilities for the serving of luncheon or other meals to members." The certificate did not restrict the purpose to the serving of male members. Section 33-428 of the General Statutes provides that the corporate powers of a nonstock corporation are those set forth in the Nonstock Corporation Act, those specifically stated in the certificate of incorporation, neither of which includes the power to exclude women members, and the implied power to "exercise all legal powers necessary or convenient to effect any or all of the purposes stated in its certificate of incorporation...."

We come, thus, to the nub of this controversy and the basic legal question raised by the facts in this case: Is it necessary or convenient to the purpose for which this corporation was organized for it to exclude women members? This court concludes that it is not. While a corporation might be organized for the narrower purpose of providing a luncheon club for men only, this one was not so organized. Its stated purpose is broader and this court cannot find that it is either necessary or convenient to that purpose for its membership to be restricted to men. It should be borne in mind that this club is one of the principal luncheon clubs for business and

professional people in Stamford. It is a gathering place where a great many of the civic, business, and professional affairs of the Stamford community are discussed in an atmosphere of social intercourse. Given the scope of the entry of women today into the business and professional life of the community and the changing status of women before the law and in society, it would be anomalous indeed for this court to conclude that it is either necessary or convenient to the stated purpose for which it was organized for this club to exclude women as members or guests.

While the bylaws recognize the right of a member to bring guests to the club, the exclusion of women guests is nowhere authorized and would not appear to be any more necessary and convenient to the purpose of the club than the exclusion of women members. The bylaws at present contain no restrictions against female members or guests and even if they could be interpreted as authorizing those restrictions, they would be of no validity in light of the requirement of § 33-459 (a) of the General Statutes, that the bylaws must be “reasonable [and] germane to the purposes of the corporation....”

The court therefore concludes that the actions and policies of the defendants in excluding women as members and guests solely on the basis of sex is ultra vires and beyond the power of the corporation and its management under its certificate of incorporation and the Nonstock Corporation Act, and in derogation of the rights of the plaintiff as a member thereof. The plaintiff is entitled to a declaratory judgment to that effect and one may enter accordingly.

CASE QUESTIONS

1. What is the basis of the plaintiff's claim?
2. Would the club have had a better defense against the plaintiff's claim if its purpose was “to provide facilities for the serving of luncheon or other meals to male members”?
3. Had the corporation's purpose read as it does in Question 2, would the plaintiff have had other bases for a claim?

Business Judgment Rule

In re The Walt Disney Co. Derivative Litigation

907 A.2d 693 (Del. Ch. 2005)

JACOBS, Justice:

[The Walt Disney Company hired Ovitz as its executive president and as a board member for five years after lengthy compensation negotiations. The negotiations regarding Ovitz's compensation were conducted predominantly by Eisner and two of the members of the compensation committee (a four-member panel). The terms of Ovitz's compensation were then presented to the full board. In a meeting lasting around one hour, where a variety of topics were discussed, the board approved Ovitz's compensation after reviewing only a term sheet rather than the full contract. Ovitz's time at Disney was tumultuous and short-lived.]...In December 1996, only fourteen months after he commenced employment, Ovitz was terminated without cause, resulting in a severance payout to Ovitz valued at approximately \$ 130 million. [Disney shareholders then filed derivative actions on behalf of Disney against Ovitz and the directors of Disney at the time of the events complained of (the "Disney defendants"), claiming that the \$130 million severance payout was the product of fiduciary duty and contractual breaches by Ovitz and of breaches of fiduciary duty by the Disney defendants and a waste of assets. The Chancellor found in favor of the defendants. The plaintiff appealed.]

We next turn to the claims of error that relate to the Disney defendants. Those claims are subdivisible into two groups: (A) claims arising out of the approval of the OEA [Ovitz employment agreement] and of Ovitz's election as President; and (B) claims arising out of the NFT [nonfault termination] severance payment to Ovitz upon his termination. We address separately those two categories and the issues that they generate....

...[The due care] argument is best understood against the backdrop of the presumptions that cloak director action being reviewed under the business judgment standard. Our law presumes that "in making a business decision the directors of a corporation acted on an informed basis, in good faith, and in the honest belief that the action taken was in the best interests of the company." Those presumptions can be rebutted if the plaintiff shows that the directors breached their fiduciary duty of care or of loyalty or acted in bad faith. If that is shown, the burden then shifts to the director defendants to demonstrate that the challenged act or transaction was entirely fair to the corporation and its shareholders....

The appellants' first claim is that the Chancellor erroneously (i) failed to make a "threshold determination" of gross negligence, and (ii) "conflated" the appellants' burden to rebut the business judgment presumptions, with an analysis of whether the directors' conduct fell within the 8 *Del. C.* § 102(b)(7) provision that precludes exculpation of directors from monetary liability "for acts or omissions not in good faith." The argument runs as follows: *Emerald Partners v. Berlin* required the Chancellor first to determine whether the business judgment rule presumptions were rebutted based upon a showing that the board violated its duty of care, *i.e.*, acted with gross negligence. If gross negligence were established, the burden would

shift to the directors to establish that the OEA was entirely fair. Only if the directors failed to meet that burden could the trial court then address the directors' Section 102(b)(7) exculpation defense, including the statutory exception for acts not in good faith.

This argument lacks merit. To make the argument the appellants must ignore the distinction between (i) a determination of bad faith for the threshold purpose of rebutting the business judgment rule presumptions, and (ii) a bad faith determination for purposes of evaluating the availability of charter-authorized exculpation from monetary damage liability after liability has been established. Our law clearly permits a judicial assessment of director good faith for that former purpose. Nothing in *Emerald Partners* requires the Court of Chancery to consider only evidence of lack of due care (*i.e.* gross negligence) in determining whether the business judgment rule presumptions have been rebutted....

The appellants argue that the Disney directors breached their duty of care by failing to inform themselves of all material information reasonably available with respect to Ovitz's employment agreement....[but the] only properly reviewable action of the entire board was its decision to elect Ovitz as Disney's President. In that context the sole issue, as the Chancellor properly held, is "whether [the remaining members of the old board] properly exercised their business judgment and acted in accordance with their fiduciary duties when they elected Ovitz to the Company's presidency." The Chancellor determined that in electing Ovitz, the directors were informed of all information reasonably available and, thus, were not grossly negligent. We agree.

...[The court turns to good faith.] The Court of Chancery held that the business judgment rule presumptions protected the decisions of the compensation committee and the remaining Disney directors, not only because they had acted with due care but also because they had not acted in bad faith. That latter ruling, the appellants claim, was reversible error because the Chancellor formulated and then applied an incorrect definition of bad faith.

...Their argument runs as follows: under the Chancellor's 2003 definition of bad faith, the directors must have "*consciously and intentionally disregarded their responsibilities*, adopting a 'we don't care about the risks' attitude concerning a material corporate decision." Under the 2003 formulation, appellants say, "directors violate their duty of good faith if they are making material decisions without adequate information and without adequate deliberation[.]" but under the 2005 post-trial definition, bad faith requires proof of a subjective bad motive or intent. This definitional change, it is claimed, was procedurally prejudicial because appellants relied on the 2003 definition in presenting their evidence of bad faith at the trial....

Second, the appellants claim that the Chancellor's post-trial definition of bad faith is erroneous substantively. They argue that the 2003 formulation was (and is) the correct definition, because it is "logically tied to board decision-making under the duty of care." The post-trial formulation, on the other hand, "wrongly incorporated substantive elements regarding the rationality of the decisions under review rather than being constrained, as in a due care analysis, to strictly procedural criteria." We conclude that both arguments must fail.

The appellants' first argument—that there is a real, significant difference between the Chancellor's pre-trial and post-trial definitions of bad faith—is plainly wrong. We perceive no substantive difference between the Court of Chancery's 2003 definition of bad faith—a "conscious and intentional disregard [of] responsibilities, adopting a we don't care about the risks' attitude..."—and its 2005 post-trial definition—an "intentional dereliction of duty, a conscious disregard for one's responsibilities." Both formulations express the same concept, although in slightly different language.

The most telling evidence that there is no substantive difference between the two formulations is that the appellants are forced to contrive a difference. Appellants assert that under the 2003 formulation, "directors violate their duty of good faith if they are making material decisions without adequate information and without adequate deliberation." For that *ipse dixit* they cite no legal authority. That comes as no surprise because their verbal effort to collapse the duty to act in good faith into the duty to act with due care, is not unlike putting a rabbit into the proverbial hat and then blaming the trial judge for making the insertion.

...The precise question is whether the Chancellor's articulated standard for bad faith corporate fiduciary conduct—intentional dereliction of duty, a conscious disregard for one's responsibilities—is legally correct. In approaching that question, we note that the Chancellor characterized that definition as "*an* appropriate (*although not the only*) standard for determining whether fiduciaries have acted in good faith." That observation is accurate and helpful, because as a matter of simple logic, at least three different categories of fiduciary behavior are candidates for the "bad faith" pejorative label.

The first category involves so-called "subjective bad faith," that is, fiduciary conduct motivated by an actual intent to do harm. That such conduct constitutes classic, quintessential bad faith is a proposition so well accepted in the liturgy of fiduciary law that it borders on axiomatic....The second category of conduct, which is at the opposite end of the spectrum, involves lack of due care—that is, fiduciary action taken solely by reason of gross negligence and without any malevolent intent. In this case, appellants assert claims of gross negligence to establish

breaches not only of director due care but also of the directors' duty to act in good faith. Although the Chancellor found, and we agree, that the appellants failed to establish gross negligence, to afford guidance we address the issue of whether gross negligence (including a failure to inform one's self of available material facts), without more, can also constitute bad faith. The answer is clearly no.

..."issues of good faith are (to a certain degree) inseparably and necessarily intertwined with the duties of care and loyalty..." But, in the pragmatic, conduct-regulating legal realm which calls for more precise conceptual line drawing, the answer is that grossly negligent conduct, without more, does not and cannot constitute a breach of the fiduciary duty to act in good faith. The conduct that is the subject of due care may overlap with the conduct that comes within the rubric of good faith in a psychological sense, but from a legal standpoint those duties are and must remain quite distinct....

The Delaware General Assembly has addressed the distinction between bad faith and a failure to exercise due care (*i.e.*, gross negligence) in two separate contexts. The first is Section 102(b)(7) of the DGCL, which authorizes Delaware corporations, by a provision in the certificate of incorporation, to exculpate their directors from monetary damage liability for a breach of the duty of care. That exculpatory provision affords significant protection to directors of Delaware corporations. The statute carves out several exceptions, however, including most relevantly, "for acts or omissions not in good faith...." Thus, a corporation can exculpate its directors from monetary liability for a breach of the duty of care, but not for conduct that is not in good faith. To adopt a definition of bad faith that would cause a violation of the duty of care automatically to become an act or omission "not in good faith," would eviscerate the protections accorded to directors by the General Assembly's adoption of Section 102(b)(7).

A second legislative recognition of the distinction between fiduciary conduct that is grossly negligent and conduct that is not in good faith, is Delaware's indemnification statute, found at 8 *Del. C.* § 145. To oversimplify, subsections (a) and (b) of that statute permit a corporation to indemnify (*inter alia*) any person who is or was a director, officer, employee or agent of the corporation against expenses...where (among other things): (i) that person is, was, or is threatened to be made a party to that action, suit or proceeding, and (ii) that person "acted in good faith and in a manner the person reasonably believed to be in or not opposed to the best interests of the corporation...." Thus, under Delaware statutory law a director or officer of a corporation can be indemnified for liability (and litigation expenses) incurred by reason of a violation of the duty of care, but not for a violation of the duty to act in good faith.

Section 145, like Section 102(b)(7), evidences the intent of the Delaware General Assembly to afford significant protections to directors (and, in the case of Section 145, other fiduciaries) of Delaware corporations. To adopt a definition that conflates the duty of care with the duty to act in good faith by making a violation of the former an automatic violation of the latter, would nullify those legislative protections and defeat the General Assembly's intent. There is no basis in policy, precedent or common sense that would justify dismantling the distinction between gross negligence and bad faith.

That leaves the third category of fiduciary conduct, which falls in between the first two categories of (1) conduct motivated by subjective bad intent and (2) conduct resulting from gross negligence. This third category is what the Chancellor's definition of bad faith—intentional dereliction of duty, a conscious disregard for one's responsibilities—is intended to capture. The question is whether such misconduct is properly treated as a non-exculpable, non-indemnifiable violation of the fiduciary duty to act in good faith. In our view it must be, for at least two reasons.

First, the universe of fiduciary misconduct is not limited to either disloyalty in the classic sense (*i.e.*, preferring the adverse self-interest of the fiduciary or of a related person to the interest of the corporation) or gross negligence. Cases have arisen where corporate directors have no conflicting self-interest in a decision, yet engage in misconduct that is more culpable than simple inattention or failure to be informed of all facts material to the decision. To protect the interests of the corporation and its shareholders, fiduciary conduct of this kind, which does not involve disloyalty (as traditionally defined) but is qualitatively more culpable than gross negligence, should be proscribed. A vehicle is needed to address such violations doctrinally, and that doctrinal vehicle is the duty to act in good faith. The Chancellor implicitly so recognized in his Opinion, where he identified different examples of bad faith as follows:

The good faith required of a corporate fiduciary includes not simply the duties of care and loyalty, in the narrow sense that I have discussed them above, but all actions required by a true faithfulness and devotion to the interests of the corporation and its shareholders. A failure to act in good faith may be shown, for instance, where the fiduciary intentionally acts with a purpose other than that of advancing the best interests of the corporation, where the fiduciary acts with the intent to violate applicable positive law, or where the fiduciary intentionally fails to act in the face of a known duty to act, demonstrating a conscious disregard for his duties. There may be other examples of bad faith yet to be proven or alleged, but these three are the most salient.

...Second, the legislature has also recognized this intermediate category of fiduciary misconduct, which ranks between conduct involving subjective bad faith and gross negligence. Section 102(b)(7)(ii) of the DGCL expressly denies money damage exculpation for “acts or omissions not in good faith or which involve intentional misconduct or a knowing violation of law.” By its very terms that provision distinguishes between “intentional misconduct” and a “knowing violation of law” (both examples of subjective bad faith) on the one hand, and “acts...not in good faith,” on the other. Because the statute exculpates directors only for conduct amounting to gross negligence, the statutory denial of exculpation for “acts...not in good faith” must encompass the intermediate category of misconduct captured by the Chancellor’s definition of bad faith.

For these reasons, we uphold the Court of Chancery’s definition as a legally appropriate, although not the exclusive, definition of fiduciary bad faith. We need go no further. To engage in an effort to craft (in the Court’s words) “a definitive and categorical definition of the universe of acts that would constitute bad faith” would be unwise and is unnecessary to dispose of the issues presented on this appeal....

For the reasons stated above, the judgment of the Court of Chancery is affirmed.

CASE QUESTIONS

1. How did the court view the plaintiff’s argument that the Chancellor had developed two different types of bad faith?
2. What are the three types of bad faith that the court discusses?
3. What two statutory provisions has the Delaware General Assembly passed that address the distinction between bad faith and a failure to exercise due care (i.e., gross negligence)?

45.6 Summary and Exercises

Summary

A corporation may exercise two types of powers: (1) express powers, set forth by statute and in the articles of incorporation, and (2) implied powers, necessary to carry out its stated purpose. The corporation may always amend the articles of incorporation to change its purposes. Nevertheless, shareholders may enjoin their corporation from acting ultra vires, as may the state attorney general. However, an individual stockholder, director, or officer (except in rare instances under certain regulatory statutes) may not be held vicariously liable if he did not participate in the crime or tort.

Because ownership and control are separated in the modern publicly held corporation, shareholders generally do not make business decisions. Shareholders who own voting stock do retain the power to elect directors, amend the bylaws, ratify or reject certain corporate actions, and vote on certain extraordinary matters, such as whether to amend the articles of incorporation, merge, or liquidate.

In voting for directors, various voting methodologies may be used, such as cumulative voting, which provides safeguards against removal of minority-shareholder-supported directors. Shareholders may use several voting arrangements that concentrate power, including proxies, voting agreements, and voting trusts. Proxies are regulated under rules promulgated by the Securities and Exchange Commission (SEC).

Corporations may deny preemptive rights—the rights of shareholders to prevent dilution of their percentage of ownership—by so stating in the articles of incorporation. Some states say that in the absence of such a provision, shareholders do have preemptive rights; others say that there are no preemptive rights unless the articles specifically include them.

Directors have the ultimate authority to run the corporation and are fiduciaries of the firm. In large corporations, directors delegate day-to-day management to salaried officers, whom they may fire, in most states, without cause. The full board of directors may, by majority, vote to delegate its authority to committees.

Directors owe the company a duty of loyalty and of care. A contract between a director and the company is voidable unless fair to the corporation or unless all details have been disclosed and the disinterested directors or shareholders have approved. Any director or officer is obligated to inform fellow directors of any corporate opportunity that affects the company and may not act personally on it unless he has received approval. The duty of care is the obligation to act “with the care an ordinarily prudent person in a like position would exercise under similar circumstances.” Other fiduciary duties have also been recognized, and constituency statutes permit the corporation to consider factors other than shareholders in making decisions. Shareholders may file derivative suits alleging breaches of fiduciary responsibilities. The duties have been expanded. For example, when the corporation is being sold, the directors have a duty to maximize shareholder value. Duties of oversight, good faith, and candor have been applied.

The corporation may agree, although not in every situation, to indemnify officers, directors, and employees for litigation expenses when they are made party to suits involving the corporation. The corporation may purchase insurance against legal expenses of directors and officers, but the policies do not cover acts of willful negligence and criminal conduct in which intent is a necessary element of proof. Additionally, the business judgment rule may operate to protect the decisions of the board.

The general rule is to maximize shareholder value, but over time, corporations have been permitted to consider other factors in decision making. Constituency statutes, for example, allow the board to consider factors other than maximizing shareholder value. Corporate social responsibility has increased, as firms consider things such as environmental impact and consumer perception in making decisions.

EXERCISES

1. First Corporation, a Massachusetts company, decides to expend \$100,000 to publicize its support of a candidate in an upcoming presidential election. A Massachusetts statute forbids corporate expenditures for the purpose of influencing the vote in elections. Chauncey, a shareholder in First Corporation, feels that the company should support a different presidential candidate and files suit to stop the company's publicizing efforts. What is the result? Why?
2. Assume in Exercise 1 that Chauncey is both an officer and a director of First Corporation. At a duly called meeting of the board, the directors decide to dismiss Chauncey as an officer and a director. If they had no cause for this action, is the dismissal valid? Why?
3. A book publisher that specializes in children's books has decided to publish pornographic literature for adults. Amanda, a shareholder in the company, has been active for years in an antipornography campaign. When she demands access to the publisher's books and records, the company refuses. She files suit. What arguments should Amanda raise in the litigation? Why?
4. A minority shareholder brought suit against the Chicago Cubs, a Delaware corporation, and their directors on the grounds that the directors were negligent in failing to install lights in Wrigley Field. The shareholder specifically alleged that the majority owner, Philip Wrigley, failed to exercise good faith in that he personally believed that baseball was a daytime sport and felt that night games would cause the surrounding neighborhood to deteriorate. The shareholder accused Wrigley and the other directors of not acting in the best financial interests of the corporation. What counterarguments should the directors assert? Who will win? Why?
5. The CEO of First Bank, without prior notice to the board, announced a merger proposal during a two-hour meeting of the directors. Under the proposal, the bank was to be sold to an acquirer at \$55 per share. (At the time, the stock traded at \$38 per share.) After the CEO discussed the proposal for twenty minutes, with no documentation to support the adequacy of the price, the board voted in favor of the proposal. Although senior management strongly opposed the proposal, it was eventually approved by the stockholders, with 70 percent in favor and 7 percent opposed. A group of stockholders later filed a class action, claiming that the directors were personally liable for the amount by which the fair value of the shares exceeded \$55—an amount allegedly in excess of \$100 million. Are the directors personally liable? Why or why not?

SELF-TEST QUESTIONS

1. Acts that are outside a corporation's lawful powers are considered
 - a. ultra vires
 - b. express powers
 - c. implied powers
 - d. none of the above

2. Powers set forth by statute and in the articles of incorporation are called
 - a. implied powers
 - b. express powers
 - c. ultra vires
 - d. incorporation by estoppel

3. The principle that mistakes made by directors on the basis of good-faith judgment can be forgiven
 - a. is called the business judgment rule
 - b. depends on whether the director has exercised due care
 - c. involves both of the above
 - d. involves neither of the above

4. A director of a corporation owes
 - a. a duty of loyalty
 - b. a duty of care
 - c. both a duty of loyalty and a duty of care
 - d. none of the above

5. A corporation may purchase indemnification insurance
 - a. to cover acts of simple negligence
 - b. to cover acts of willful negligence
 - c. to cover acts of both simple and willful negligence
 - d. to cover acts of criminal conduct

SELF-TEST ANSWERS

Chapter 46

Securities Regulation

LEARNING OBJECTIVES

After reading this chapter, you should understand the following:

1. The nature of securities regulation
2. The Securities Act of 1933 and the Securities Exchange Act of 1934
3. Liability under securities laws
4. What insider trading is and why it's unlawful
5. Civil and criminal penalties for violations of securities laws

In Chapter 44 "Legal Aspects of Corporate Finance", we examined state law governing a corporation's issuance and transfer of stock. In Chapter 45 "Corporate Powers and Management", we covered the liability of directors and officers. This chapter extends and ties together the themes raised in Chapter 44 "Legal Aspects of Corporate Finance" and Chapter 45 "Corporate Powers and Management" by examining government regulation of securities and insider trading. Both the registration and the trading of securities are highly regulated by the Securities and Exchange Commission (SEC). A violation of a securities law can lead to severe criminal and civil penalties. But first we examine the question, Why is there a need for securities regulation?

46.1 The Nature of Securities Regulation

LEARNING OBJECTIVES

1. Recognize that the definition of *security* encompasses a broad range of interests.
2. Understand the functions of the Securities and Exchange Commission and the penalties for violations of the securities laws.
3. Understand which companies the Securities Exchange Act of 1934 covers.
4. Explore the purpose of state Blue Sky Laws.
5. Know the basic provisions of the Dodd-Frank Wall Street Reform and Consumer Protection Act.

What we commonly refer to as “**securities**” are essentially worthless pieces of paper. Their inherent value lies in the interest in property or an ongoing enterprise that they represent. This disparity between the tangible property—the stock certificate, for example—and the intangible interest it represents gives rise to several reasons for regulation. First, there is need for a mechanism to inform the buyer accurately what it is he is buying. Second, laws are necessary to prevent and provide remedies for deceptive and manipulative acts designed to defraud buyers and sellers. Third, the evolution of stock trading on a massive scale has led to the development of numerous types of specialists and professionals, in dealings with whom the public can be at a severe disadvantage, and so the law undertakes to ensure that they do not take unfair advantage of their customers.

The **Securities Act of 1933** and the **Securities Exchange Act of 1934** are two federal statutes that are vitally important, having virtually refashioned the law governing corporations during the past half century. In fact, it is not too much to say that although they deal with securities, they have become the general federal law of corporations. This body of federal law has assumed special importance in recent years as the states have engaged in a race to the bottom in attempting to compete with Delaware’s permissive corporation law (see [Chapter 43 "Corporation: General Characteristics and Formation"](#)).

What Is a Security?

Securities law questions are technical and complex and usually require professional counsel. For the nonlawyer, the critical question on which all else turns is whether

the particular investment or document is a **security**¹. If it is, anyone attempting any transaction beyond the routine purchase or sale through a broker should consult legal counsel to avoid the various civil and criminal minefields that the law has strewn about.

The definition of *security*, which is set forth in the Securities Act of 1933, is comprehensive, but it does not on its face answer all questions that financiers in a dynamic market can raise. Under Section 2(1) of the act, “security” includes “any note, stock, treasury stock, bond, debenture, evidence of indebtedness, certificate of interest or participation in any profit-sharing agreement, collateral-trust certificate, preorganization certificate or subscription, transferable share, investment contract, voting-trust certificate, certificate of deposit for a security, fractional undivided interest in oil, gas, or other mineral rights, or, in general, any interest or instrument commonly known as a ‘security,’ or any certificate of interest or participation in, temporary or interim certificate for, receipt for, guarantee of, or warrant or right to subscribe to or purchase, any of the foregoing.”

Under this definition, an investment may not be a security even though it is so labeled, and it may actually be a security even though it is called something else. For example, does a service contract that obligates someone who has sold individual rows in an orange orchard to cultivate, harvest, and market an orange crop involve a security subject to regulation under federal law? Yes, said the Supreme Court in *Securities & Exchange Commission v. W. J. Howey Co.*². The Court said the test is whether “the person invests his money in a common enterprise and is led to expect profits solely from the efforts of the promoter or a third party.” Under this test, courts have liberally interpreted “**investment contract**” and “certificate of interest or participation in any profit-sharing agreement” to be securities interests in such property as real estate condominiums and cooperatives, commodity option contracts, and farm animals.

The Supreme Court ruled that notes that are not “investment contracts” under the *Howey* test can still be considered securities if certain factors are present, as discussed in *Reves v. Ernst & Young*, (see [Section 46.3.1 "What Is a Security?"](#)). These factors include (1) the motivations prompting a reasonable seller and buyer to enter into the transaction, (2) the plan of distribution and whether the instruments are commonly traded for speculation or investment, (3) the reasonable expectations of the investing public, and (4) the presence of other factors that significantly reduce risk so as to render the application of the Securities Act unnecessary.

1. Any note, stock, treasury stock, bond, debenture, evidence of indebtedness, certificate of interest or participation in any profit-sharing agreement, collateral-trust certificate, or subscription, transferable share, investment contract, voting-trust certificate, certificate of deposit for a security, fractional undivided interest in oil, gas, or other mineral rights, or, in general, any interest or instrument commonly known as a security.

2. A commitment of money or capital to purchase financial instruments as a means to gain profitable returns in the form of income, interest, or the appreciation of the value of the instrument itself. It can be interpreted by the courts to be a security for purposes of the federal securities laws.

The Securities and Exchange Commission Functions

The **Securities and Exchange Commission**³ (SEC) is over half a century old, having been created by Congress in the Securities Exchange Act of 1934. It is an independent regulatory agency, subject to the rules of the Administrative Procedure Act (see [Chapter 5 "Administrative Law"](#)). The commission is composed of five members, who have staggered five-year terms. Every June 5, the term of one of the commissioners expires. Although the president cannot remove commissioners during their terms of office, he does have the power to designate the chairman from among the sitting members. The SEC is bipartisan: not more than three commissioners may be from the same political party.

The SEC's primary task is to investigate complaints or other possible violations of the law in securities transactions and to bring enforcement proceedings when it believes that violations have occurred. It is empowered to conduct information inquiries, interview witnesses, examine brokerage records, and review trading data. If its requests are refused, it can issue subpoenas and seek compliance in federal court. Its usual leads come from complaints of investors and the general public, but it has authority to conduct surprise inspections of the books and records of brokers and dealers. Another source of leads is price fluctuations that seem to have been caused by manipulation rather than regular market forces.

3. An independent federal regulatory agency whose primary task is to investigate complaints or other possible violations of the law in securities transactions and to bring enforcement proceedings when it believes that violations have occurred.
4. The process of bringing a legal action against a defendant for criminal behavior.
5. A judicial process or order requiring a person or entity to do a particular act or to refrain from doing a particular act.
6. A term used to describe when a state entity, government agency, or private party seeks monetary relief, fines, and/or restitution for wrongdoing by another.

Among the violations the commission searches out are these: (1) unregistered sale of securities subject to the registration requirement of the Securities Act of 1933, (2) fraudulent acts and practices, (3) manipulation of market prices, (4) carrying out of a securities business while insolvent, (5) misappropriation of customers' funds by brokers and dealers, and (4) other unfair dealings by brokers and dealers.

When the commission believes that a violation has occurred, it can take one of three courses. First, it can refer the case to the Justice Department with a recommendation for **criminal prosecution**⁴ in cases of fraud or other willful violation of law.

Second, the SEC can seek a **civil injunction**⁵ in federal court against further violations. As a result of amendments to the securities laws in 1990 (the Securities Enforcement Remedies and Penny Stock Reform Act), the commission can also ask the court to impose **civil penalties**⁶. The maximum penalty is \$100,000 for each violation by a natural person and \$500,000 for each violation by an entity other than a natural person. Alternatively, the defendant is liable for the gain that resulted from violating securities law if the gain exceeds the statutory penalty. The court is also authorized to bar an individual who has committed securities fraud

from serving as an officer or a director of a company registered under the securities law.

Third, the SEC can proceed administratively—that is, hold its own hearing, with the usual due process rights, before an **administrative law judge**⁷. If the commissioners by majority vote accept the findings of the administrative law judge after reading briefs and hearing oral argument, they can impose a variety of sanctions: suspend or expel members of exchanges; deny, suspend, or revoke the registrations of broker-dealers; censure individuals for misconduct; and bar censured individuals (temporarily or permanently) from employment with a registered firm. The 1990 securities law amendments allow the SEC to impose civil fines similar to the court-imposed fines described. The amendments also authorize the SEC to order individuals to cease and desist from violating securities law.

Fundamental Mission

The SEC’s fundamental mission is to ensure adequate disclosure in order to facilitate informed investment decisions by the public. However, whether a particular security offering is worthwhile or worthless is a decision for the public, not for the SEC, which has no legal authority to pass on the merits of an offering or to bar the sale of securities if proper disclosures are made.

One example of SEC’s regulatory mandate with respect to disclosures involved the 1981 sale of \$274 million in limited partnership interests in a company called Petrogene Oil & Gas Associates, New York. The Petrogene offering was designed as a tax shelter. The company’s filing with the SEC stated that the offering involved “a high degree of risk” and that only those “who can afford the complete loss of their investment” should contemplate investing. Other disclosures included one member of the controlling group having spent four months in prison for conspiracy to commit securities fraud; that he and another principal were the subject of a New Mexico cease and desist order involving allegedly unregistered tax-sheltered securities; that the general partner, brother-in-law of one of the principals, had no experience in the company’s proposed oil and gas operations (Petrogene planned to extract oil from plants by using radio frequencies); that one of the oils to be produced was potentially carcinogenic; and that the principals “stand to benefit substantially” whether or not the company fails and whether or not purchasers of shares recovered any of their investment. The prospectus went on to list specific risks. Despite this daunting compilation of troublesome details, the SEC permitted the offering because all disclosures were made (*Wall Street Journal*, December 29, 1981). It is the business of the marketplace, not the SEC, to determine whether the risk is worth taking.

7. The presiding officer of an administrative hearing.

The SEC enforces securities laws through two primary federal acts: The Securities Act of 1933 and The Securities Exchange Act of 1934.

Securities Act of 1933

Goals

The **Securities Act of 1933**⁸ is the fundamental “truth in securities” law. Its two basic objectives, which are written in its preamble, are “to provide full and fair disclosure of the character of securities sold in interstate and foreign commerce and through the mails, and to prevent frauds in the sale thereof.”

Registration

The primary means for realizing these goals is the requirement of registration. Before securities subject to the act can be offered to the public, the issuer must file a **registration statement**⁹ and **prospectus**¹⁰ with the SEC, laying out in detail relevant and material information about the offering as set forth in various schedules to the act. If the SEC approves the registration statement, the issuer must then provide any prospective purchaser with the prospectus. Since the SEC does not pass on the fairness of price or other terms of the offering, it is unlawful to state or imply in the prospectus that the commission has the power to disapprove securities for lack of merit, thereby suggesting that the offering is meritorious.

The SEC has prepared special forms for registering different types of issuing companies. All call for a description of the registrant’s business and properties and of the significant provisions of the security to be offered, facts about how the issuing company is managed, and detailed financial statements certified by independent public accountants.

Once filed, the registration and prospectus become public and are open for public inspection. Ordinarily, the effective date of the registration statement is twenty days after filing. Until then, the offering may not be made to the public. Section 2(10) of the act defines *prospectus* as any “notice, circular, advertisement, letter, or communication, written or by radio or television, which offers any security for sale or confirms the sale of any security.” (An exception: brief notes advising the public of the availability of the formal prospectus.) The import of this definition is that any communication to the public about the offering of a security is unlawful unless it contains the requisite information.

The SEC staff examines the registration statement and prospectus, and if they appear to be materially incomplete or inaccurate, the commission may suspend or refuse the effectiveness of the registration statement until the deficiencies are

8. The first law enacted by Congress to regulate the securities market. This act regulates the public offering of new securities and provides for securities registration requirements, and prevention of fraudulent conduct.

9. A set of documents that a company must file with the SEC before it proceeds with an initial public offering.

10. A document that provides details about an investment offering for sale to the public—the facts an investor needs to make an informed decision.

corrected. Even after the securities have gone on sale, the agency has the power to issue a stop order that halts trading in the stock.

Section 5(c) of the act bars any person from making any sale of any security unless it is first registered. Nevertheless, there are certain classes of exemptions from the registration requirement. Perhaps the most important of these is Section 4(3), which exempts “transactions by any person other than an issuer, underwriter or dealer.” Section 4(3) also exempts most transactions of dealers. So the net is that trading in outstanding securities (the secondary market) is exempt from registration under the Securities Act of 1933: you need not file a registration statement with the SEC every time you buy or sell securities through a broker or dealer, for example. Other exemptions include the following: (1) private offerings to a limited number of persons or institutions who have access to the kind of information registration would disclose and who do not propose to redistribute the securities; (2) offerings restricted to the residents of the state in which the issuing company is organized and doing business; (3) securities of municipal, state, federal and other government instrumentalities, of charitable institutions, of banks, and of carriers subject to the Interstate Commerce Act; (4) offerings not in excess of certain specified amounts made in compliance with regulations of the Commission...; and (5) offerings of “small business investment companies” made in accordance with rules and regulations of the Commission.

Penalties

Section 24 of the Securities Act of 1933 provides for fines not to exceed \$10,000 and a prison term not to exceed five years, or both, for willful violations of any provisions of the act. This section makes these criminal penalties specifically applicable to anyone who “willfully, in a registration statement filed under this title, makes any untrue statement of a material fact or omits to state any material fact required to be stated therein or necessary to make the statements therein not misleading.”

Sections 11 and 12 provide that anyone injured by false declarations in registration statements, prospectuses, or oral communications concerning the sale of the security—as well as anyone injured by the unlawful failure of an issuer to register—may file a civil suit to recover the net consideration paid for the security or for damages if the security has been sold.

11. A ruling by the Supreme Court that allows individuals who have been defrauded to seek damages resulting from a violation of SEC rules.

Although these civil penalty provisions apply only to false statements in connection with the registration statement, prospectus, or oral communication, the Supreme Court held, in *Case v. Borak*, *Case v. Borak*, 377 U.S. 426 (1964). that there is an “**implied private right of action**”¹¹ for damages resulting from a violation of SEC

rules under the act. The Court's ruling in *Borak* opened the courthouse doors to many who had been defrauded but were previously without a practical remedy.

Securities Exchange Act of 1934

Companies Covered

The Securities Act of 1933 is limited, as we have just seen, to new securities issues—that is the **primary market**¹². The trading that takes place in the **secondary market**¹³ is far more significant, however. In a normal year, trading in outstanding stock totals some twenty times the value of new stock issues.

To regulate the secondary market, Congress enacted the **Securities Exchange Act of 1934**¹⁴. This law, which created the SEC, extended the disclosure rationale to securities listed and registered for public trading on the national securities exchanges. Amendments to the act have brought within its ambit every corporation whose equity securities are traded over the counter if the company has at least \$10 million in assets and five hundred or more shareholders.

Reporting Proxy Solicitation

Any company seeking listing and registration of its stock for public trading on a national exchange—or over the counter, if the company meets the size test—must first submit a registration application to both the exchange and the SEC. The registration statement is akin to that filed by companies under the Securities Act of 1933, although the Securities Exchange Act of 1934 calls for somewhat fewer disclosures. Thereafter, companies must file annual and certain other periodic reports to update information in the original filing.

The Securities Exchange Act of 1934 also covers **proxy solicitation**¹⁵. Whenever management, or a dissident minority, seeks votes of holders of registered securities for any corporate purpose, disclosures must be made to the stockholders to permit them to vote yes or no intelligently.

Penalties

The logic of the *Borak* case (discussed in [Section 46.1.3 "Securities Act of 1933"](#)) also applies to this act, so that private investors may bring suit in federal court for violations of the statute that led to financial injury. Violations of any provision and the making of false statements in any of the required disclosures subject the defendant to a maximum fine of \$5 million and a maximum twenty-year prison sentence, but a defendant who can show that he had no knowledge of the particular rule he was convicted of violating may not be imprisoned. The maximum fine for a

12. The market in which the money or capital for the security is received by the issuer of the security directly from investors (such as in an initial public offering transaction).
13. The market in which securities are bought and sold subsequent to original issuance and are typically held by one investor selling them to another investor.
14. A law that was enacted to provide governance of securities transactions on the secondary market and to regulate the exchanges and broker-dealers in order to protect the investing public. This act also established the SEC.
15. An attempt by a group or delegation to obtain the authorization from other individuals to vote on their behalf.

violation of the act by a person other than a natural person is \$25 million. Any issuer omitting to file requisite documents and reports is liable to pay a fine of \$100 for each day the failure continues.

Blue Sky Laws

Long before congressional enactment of the securities laws in the 1930s, the states had legislated securities regulations. Today, every state has enacted a **blue sky law**¹⁶, so called because its purpose is to prevent “speculative schemes which have no more basis than so many feet of ‘blue sky.’” *Hall v. Geiger-Jones Co.*, 242 U.S. 539 (1917). The federal Securities Act of 1933, discussed in [Section 46.1.3 "Securities Act of 1933"](#), specifically preserves the jurisdiction of states over securities.

Blue sky laws are divided into three basic types of regulation. The simplest is that which prohibits fraud in the sale of securities. Thus at a minimum, issuers cannot mislead investors about the purpose of the investment. All blue sky laws have antifraud provisions; some have no other provisions. The second type calls for registration of broker-dealers, and the third type for registration of securities. Some state laws parallel the federal laws in intent and form of proceeding, so that they overlap; other blue sky laws empower state officials (unlike the SEC) to judge the merits of the offerings, often referred to as **merit review laws**¹⁷. As part of a movement toward deregulation, several states have recently modified or eliminated merit provisions.

Many of the blue sky laws are inconsistent with each other, making national uniformity difficult. In 1956, the National Conference of Commissioners on Uniform State Laws approved the Uniform Securities Act. It has not been designed to reconcile the conflicting philosophies of state regulation but to take them into account and to make the various forms of regulation as consistent as possible. States adopt various portions of the law, depending on their regulatory philosophies. The Uniform Securities Act has antifraud, broker-dealer registration, and securities registration provisions. More recent acts have further increased uniformity. These include the National Securities Markets Improvement Act of 1996, which preempted differing state philosophies with regard to registration of securities and regulation of brokers and advisors, and the Securities Litigation Uniform Standards Act of 1998, which preempted state law securities fraud claims from being raised in class action lawsuits by investors.

Dodd-Frank Wall Street Reform and Consumer Protection Act

In 2010, Congress passed the **Dodd-Frank Wall Street Reform and Consumer Protection Act**¹⁸, which is the largest amendment to financial regulation in the

16. A state law that regulates the offering and sale of securities to protect the public from fraud.
17. Laws that regulate the disclosure and the substantive merits and fairness of the securities offerings to investors.
18. A federal law aimed at financial reform and designed to promote financial stability, it was established to enhance the power of regulatory agencies and add additional enforcement agencies.

United States since the Great Depression. This amendment was enacted in response to the economic recession of the late 2000s for the following purposes: (1) to promote the financial stability of the United States by improving accountability and transparency in the financial system, (2) to end “too big to fail” institutions, (3) to protect the American taxpayer by ending bailouts, and (4) to protect consumers from abusive financial services practices. The institutions most affected by the regulatory changes include those involved in monitoring the financial system, such as the Federal Deposit Insurance Corporation (FDIC) and the SEC. Importantly, the amendment ended the exemption for investment advisors who previously were not required to register with the SEC because they had fewer than fifteen clients during the previous twelve months and did not hold out to the public as investment advisors. This means that in practice, numerous investment advisors, as well as hedge funds and private equity firms, are now subject to registration requirements. For more information on the Dodd-Frank Wall Street Reform and Consumer Protection Act (Pub.L. 111-203, H.R. 4173), see Thomas, “Major Actions,” Bill Summary & Status 111th Congress (2009–2010) H.R.4173, <http://thomas.loc.gov/cgi-bin/bdquery/z?d111:HR04173:@@L&summ2=m&#major%20actions>.

KEY TAKEAWAY

The SEC administers securities laws to prevent the fraudulent practices in the sales of securities. The definition of *security* is intentionally broad to protect the public from fraudulent investments that otherwise would escape regulation. The Securities Act of 1933 focuses on the issuance of securities, and the Securities Exchange Act of 1934 deals predominantly with trading in issued securities. Numerous federal and state securities laws are continuously created to combat securities fraud, with penalties becoming increasingly severe.

EXERCISES

1. What differentiates an ordinary investment from a security? List all the factors.
2. What is the main objective of the SEC?
3. What are the three courses of action that the SEC may take against one who violates a securities law?
4. What is the difference between the Securities Act of 1933 and the Securities Exchange Act of 1934?
5. What do blue sky laws seek to protect?

46.2 Liability under Securities Law

LEARNING OBJECTIVES

1. Understand how the Foreign Corrupt Practices Act prevents American companies from using bribes to enter into contracts or gain licenses from foreign governments.
2. Understand the liability for insider trading for corporate insiders, “tippees,” and secondary actors under Sections 16(b) and 10(b) of the 1934 Securities Exchange Act.
3. Recognize how the Sarbanes-Oxley Act has amended the 1934 act to increase corporate regulation, transparency, and penalties.

Corporations may be found liable if they engage in certain unlawful practices, several of which we explore in this section.

The Foreign Corrupt Practices Act

Investigations by the Securities and Exchange Commission (SEC) and the Watergate Special Prosecutor in the early 1970s turned up evidence that hundreds of companies had misused corporate funds, mainly by bribing foreign officials to induce them to enter into contracts with or grant licenses to US companies. Because revealing the bribes would normally be self-defeating and, in any event, could be expected to stir up immense criticism, companies paying bribes routinely hid the payments in various accounts. As a result, one of many statutes enacted in the aftermath of Watergate, the **Foreign Corrupt Practices Act (FCPA)**¹⁹ of 1977, was incorporated into the 1934 Securities Exchange Act. The SEC’s legal interest in the matter is not premised on the morality of bribery but rather on the falsity of the financial statements that are being filed.

Congress’s response to abuses of financial reporting, the FCPA, was much broader than necessary to treat the violations that were uncovered. The FCPA prohibits an issuer (i.e., any US business enterprise), a stockholder acting on behalf of an issuer, and “any officer, director, employee, or agent” of an issuer from using either the mails or interstate commerce corruptly to offer, pay, or promise to pay anything of value to foreign officials, foreign political parties, or candidates if the purpose is to gain business by inducing the foreign official to influence an act of the government to render a decision favorable to the US corporation.

19. A US law, enacted 1977, that in part prohibits US firms from bribing foreign officials to obtain or retain business.

But not all payments are illegal. Under 1988 amendments to the FCPA, payments may be made to expedite routine governmental actions, such as obtaining a visa. And payments are allowed if they are lawful under the written law of a foreign country. More important than the foreign-bribe provisions, the act includes accounting provisions, which broaden considerably the authority of the SEC. These provisions are discussed in *SEC v. World-Wide Coin Investments, Ltd.*, *SEC v. World-Wide Coin Investments, Ltd.*, 567 F.Supp. 724 (N.D. Ga. 1983). the first accounting provisions case brought to trial.

Insider Trading

Corporate insiders²⁰—directors, officers, or important shareholders—can have a substantial trading advantage if they are privy to important confidential information. Learning bad news (such as financial loss or cancellation of key contracts) in advance of all other stockholders will permit the privileged few to sell shares before the price falls. Conversely, discovering good news (a major oil find or unexpected profits) in advance gives the insider a decided incentive to purchase shares before the price rises.

Because of the unfairness to those who are ignorant of inside information, federal law prohibits **insider trading**²¹. Two provisions of the 1934 Securities Exchange Act are paramount: **Section 16(b)**²² and 10(b).

Recapture of Short-Swing Profits: Section 16(b)

The Securities Exchange Act assumes that any director, officer, or shareholder owning 10 percent or more of the stock in a corporation is using inside information if he or any family member makes a profit from trading activities, either buying and selling or selling and buying, during a six-month period. Section 16(b) penalizes any such person by permitting the corporation or a shareholder suing on its behalf to recover the **short-swing profits**²³. The law applies to any company with more than \$10 million in assets and at least five hundred or more shareholders of any class of stock.

Suppose that on January 1, Bob (a company officer) purchases one hundred shares of stock in BCT Bookstore, Inc., for \$60 a share. On September 1, he sells them for \$100 a share. What is the result? Bob is in the clear, because his \$4,000 profit was not realized during a six-month period. Now suppose that the price falls, and one month later, on October 1, he repurchases one hundred shares at \$30 a share and holds them for two years. What is the result? He will be forced to pay back \$7,000 in profits even if he had no inside information. Why? In August, Bob held one hundred shares of stock, and he did again on October 1—within a six-month period. His net

20. A corporate director, officer, or shareholder with more than 10 percent of a registered security who through influence of position obtains knowledge that may be used to gain an unfair advantage to the detriment of others. The definition has been broadened to include relatives and others.
21. Buying or selling securities of a publicly held company by those who have privileged access to information concerning a company's financial condition or plans.
22. 16(b) A section of the 1934 Securities Exchange Act that allows shareholders to sue corporate officers, directors, or owners of more than 10% of the company's shares for any profits made by insider trading. 16(b) is not enforced by the SEC, but by private parties, and covers profits made within a "short swing" (six month) period.
23. Any profits made from the purchase and sale of company stock if both transactions occur within a six-month period; insiders are required to return any profits made from the purchase and sale of company stock if both transactions occur within a six-month period.

gain on these transactions was \$7,000 (\$10,000 realized on the sale less the \$3,000 cost of the purchase).

As a consequence of Section 16(b) and certain other provisions, trading in securities by directors, officers, and large stockholders presents numerous complexities. For instance, the law requires people in this position to make periodic reports to the SEC about their trades. As a practical matter, directors, officers, and large shareholders should not trade in their own company stock in the short run without legal advice.

Insider Trading: Section 10(b) and Rule 10b-5

Section 10(b)²⁴ of the Securities Exchange Act of 1934 prohibits any person from using the mails or facilities of interstate commerce “to use or employ, in connection with the purchase or sale of any security...any manipulative or deceptive device or contrivance in contravention of such rules and regulations as the Commission may prescribe as necessary or appropriate in the public interest or for the protection of investors.” In 1942, the SEC learned of a company president who misrepresented the company’s financial condition in order to buy shares at a low price from current stockholders. So the commission adopted a rule under the authority of Section 10(b). **Rule 10b-5**²⁵, as it was dubbed, has remained unchanged for more than forty years and has spawned thousands of lawsuits and SEC proceedings. It reads as follows:

It shall be unlawful for any person, directly or indirectly, by the use of any means or instrumentality of interstate commerce, or of the mails, or of any facility of any national securities exchange,

(1) to employ any device, scheme, or artifice to defraud,

(2) to make any untrue statement of a material fact or to omit to state a material fact necessary in order to make the statements made, in the light of circumstances under which they were made, not misleading, or

(3) to engage in any act, practice, or course of business which operates or would operate as a fraud or deceit upon any person, in connection with the purchase or sale of any security.

Rule 10b-5 applies to any person who purchases or sells any security. It is not limited to securities registered under the 1934 Securities Exchange Act. It is not limited to publicly held companies. It applies to any security issued by any

24. A section of the Securities Exchange Act of 1934 that prohibits any person from using the mails or facilities of interstate commerce “to use or employ, in connection with the purchase or sale of any security...any manipulative or deceptive device...”

25. A rule by the SEC that applies to any person who purchases or sells any security and that prohibits fraud related to securities trading.

company, including the smallest closely held company. In substance, it is an antifraud rule, enforcement of which seems, on its face, to be limited to action by the SEC. But over the years, the courts have permitted people injured by those who violate the statute to file private damage suits. This sweeping rule has at times been referred to as the “federal law of corporations” or the “catch everybody” rule.

Insider trading ran headlong into Rule 10b-5 beginning in 1964 in a series of cases involving Texas Gulf Sulphur Company (TGS). On November 12, 1963, the company discovered a rich deposit of copper and zinc while drilling for oil near Timmins, Ontario. Keeping the discovery quiet, it proceeded to acquire mineral rights in adjacent lands. By April 1964, word began to circulate about TGS’s find.

Newspapers printed rumors, and the Toronto Stock Exchange experienced a wild speculative spree. On April 12, an executive vice president of TGS issued a press release downplaying the discovery, asserting that the rumors greatly exaggerated the find and stating that more drilling would be necessary before coming to any conclusions. Four days later, on April 16, TGS publicly announced that it had uncovered a strike of 25 million tons of ore. In the months following this announcement, TGS stock doubled in value.

The SEC charged several TGS officers and directors with having purchased or told their friends, so-called **tippees**²⁶, to purchase TGS stock from November 12, 1963, through April 16, 1964, on the basis of material inside information. The SEC also alleged that the April 12, 1964, press release was deceptive. The US Court of Appeals, in *SEC v. Texas Gulf Sulphur Co.*, *SEC v. Texas Gulf Sulphur Co.*, 401 F.2d 833 (2d Cir. 1968), decided that the defendants who purchased the stock before the public announcement had violated Rule 10b-5. According to the court, “anyone in possession of material inside information must either disclose it to the investing public, or, if he is disabled from disclosing to protect a corporate confidence, or he chooses not to do so, must abstain from trading in or recommending the securities concerned while such inside information remains undisclosed.” On remand, the district court ordered certain defendants to pay \$148,000 into an escrow account to be used to compensate parties injured by the insider trading.

The court of appeals also concluded that the press release violated Rule 10b-5 if “misleading to the reasonable investor.” On remand, the district court held that TGS failed to exercise “due diligence” in issuing the release. Sixty-nine private damage actions were subsequently filed against TGS by shareholders who claimed they sold their stock in reliance on the release. The company settled most of these suits in late 1971 for \$2.7 million.

26. Someone who receives and acts on insider information.

Following the TGS episode, the Supreme Court refined Rule 10b-5 on several fronts. First, in *Ernst & Ernst v. Hochfelder*,²⁷ *Ernst & Ernst v. Hochfelder*, 425 U.S. 185 (1976). the Court decided that proof of **scienter**²⁷—defined as “mental state embracing intent to deceive, manipulate, or defraud”—is required in private damage actions under Rule 10b-5. In other words, negligence alone will not result in Rule 10b-5 liability. The Court also held that scienter, which is an intentional act, must be established in SEC injunctive actions. *Aaron v. SEC*, 446 U.S. 680 (1980).

The Supreme Court has placed limitations on the liability of tippees under Rule 10b-5. In 1980, the Court reversed the conviction of an employee of a company that printed tender offer and merger prospectuses. Using information obtained at work, the employee had purchased stock in target companies and later sold it for a profit when takeover attempts were publicly announced. In *Chiarella v. United States*, the Court held that the employee was not an insider or a fiduciary and that “a duty to disclose under Section 10(b) does not arise from the mere possession of nonpublic market information.” *Chiarella v. United States*, 445 U.S. 222 (1980). Following *Chiarella*, the Court ruled in *Dirks v. Securities and Exchange Commission* (see [Section 46.3.2 "Tippee Liability"](#)), that tippees are liable if they had reason to believe that the tipper breached a fiduciary duty in disclosing confidential information and the tipper received a personal benefit from the disclosure.

The Supreme Court has also refined Rule 10b-5 as it relates to the duty of a company to disclose **material information**²⁸, as discussed in *Basic, Inc. v. Levinson* (see [Section 46.3.3 "Duty to Disclose Material Information"](#)). This case is also important in its discussion of the degree of reliance investors must prove to support a Rule 10b-5 action.

27. A legal term that refers to having intent or knowledge of wrongdoing.

28. Information that would be likely to affect a stock's price once it became known to the public.

29. A provision that defines when a purchase or sale constitutes trading “on the basis of” material nonpublic information as any time a person trades while aware of material nonpublic information.

30. A theory based on the act of stealing, or misappropriating, confidential information and then trading securities based on the misappropriated insider knowledge.

In 2000, the SEC enacted **Rule 10b5-1**²⁹, which defines trading “on the basis of” inside information as any time a person trades while aware of material nonpublic information. Therefore, a defendant is not saved by arguing that the trade was made independent of knowledge of the nonpublic information. However, the rule also creates an affirmative defense for trades that were planned prior to the person's receiving inside information.

In addition to its decisions relating to intent (*Ernst & Ernst*), tippees (*Dirks*), materiality (*Basic*), and awareness of nonpublic information (10b5-1), the Supreme Court has considered the **misappropriation theory**³⁰, under which a person who misappropriates information from an employer faces insider trading liability. In a leading misappropriation theory case, the Second Circuit Court of Appeals reinstated an indictment against employees who traded on the basis of inside information obtained through their work at investment banking firms. The court concluded that the employees' violation of their fiduciary duty to the firms violated

securities law. *United States v. Newman*, 664 F.2d 12 (2d Cir. 1981). The US Supreme Court upheld the misappropriation theory in *United States v. O'Hagan*, *United States v. O'Hagan*, 521 U.S. 642 (1997). and the SEC adopted the theory as new **Rule 10b5-2**³¹. Under this new rule, the duty of trust or confidence exists when (1) a person agrees to maintain information in confidence; (2) the recipient knows or should have known through history, pattern, or practice of sharing confidences that the person communicating the information expects confidentiality; and (3) a person received material nonpublic information from his or her spouse, parent, child, or sibling.

In 1987, in *Carpenter v. United States*, *Carpenter v. United States*, 484 U.S. 19 (1987). the Supreme Court affirmed the conviction of a *Wall Street Journal* reporter who leaked advanced information about the contents of his "Heard on the Street" column. The reporter, who was sentenced to eighteen months in prison, had been convicted on both mail and wire fraud and securities law charges for misappropriating information. The Court upheld the mail and wire fraud conviction by an 8-0 vote and the securities law conviction by a 4-4 vote. (In effect, the tie vote affirmed the conviction.) *Carpenter v. United States*, 484 U.S. 19 (1987).

Beyond these judge-made theories of liability, Congress had been concerned about insider trading, and in 1984 and 1988, it substantially increased the penalties. A person convicted of insider trading now faces a maximum criminal fine of \$1 million and a possible ten-year prison term. A civil penalty of up to three times the profit made (or loss avoided) by insider trading can also be imposed. This penalty is in addition to liability for profits made through insider trading. For example, financier Ivan Boesky, who was sentenced in 1987 to a three-year prison term for insider trading, was required to disgorge \$50 million of profits and was liable for another \$50 million as a civil penalty. In 2003, Martha Stewart was indicted on charges of insider trading but was convicted for obstruction of justice, serving only five months. More recently, in 2009, billionaire founder of the Galleon Group, Raj Rajaratnam, was arrested for insider trading; he was convicted in May 2011 of all 14 counts of insider trading. For the SEC release on the Martha Stewart case, see <http://www.sec.gov/news/press/2003-69.htm>.

Companies that knowingly and recklessly fail to prevent insider trading by their employees are subject to a civil penalty of up to three times the profit gained or loss avoided by insider trading or \$1 million, whichever is greater. Corporations are also subject to a criminal fine of up to \$2.5 million.

31. A provision that includes a nonexclusive definition of circumstances and that establishes a duty of trust or confidence for purposes of the misappropriation theory of insider trading.

Secondary Actor

In *Stoneridge Investment Partners v. Scientific-Atlanta*, *Stoneridge Investment Partners v. Scientific-Atlanta*, 552 U.S. 148 (2008). the US Supreme Court held that "aiders and

abettors” of fraud cannot be held secondarily liable under 10(b) for a private cause of action. This means that **secondary actors**³², such as lawyers and accountants, cannot be held liable unless their conduct satisfies all the elements for 10(b) liability.

For an overview of insider trading, go to <http://www.sec.gov/answers/insider.htm>.

Sarbanes-Oxley Act

Congress enacted the Sarbanes-Oxley Act in 2002 in response to major corporate and accounting scandals, most notably those involving Enron, Tyco International, Adelphia, and WorldCom. The act created the **Public Company Accounting Oversight Board**³³, which oversees, inspects, and regulates accounting firms in their capacity as auditors of public companies. As a result of the act, the SEC may include civil penalties to a disgorgement fund for the benefit of victims of the violations of the Securities Act of 1933 and the Securities Exchange Act of 1934.

KEY TAKEAWAY

Corrupt practices, misuse of corporate funds, and insider trading unfairly benefit the minority and cost the public billions. Numerous federal laws have been enacted to create liability for these bad actors in order to prevent fraudulent trading activities. Both civil and criminal penalties are available to punish those actors who bribe officials or use inside information unlawfully.

EXERCISES

1. Why is the SEC so concerned with bribery? What does the SEC really aim to prevent through the FCPA?
2. What are short-swing profits?
3. To whom does Section 16(b) apply?
4. Explain how Rule 10b-5 has been amended “on the basis of” insider information.
5. Can a secondary actor (attorney, accountant) be liable for insider trading? What factors must be present?

32. A ruling by the Supreme Court stating that “aiders and abettors” of fraud cannot be held secondarily liable under 10(b) for a private cause of action.

33. A body created by Sarbanes-Oxley that oversees, inspects, and regulates accounting firms in their capacity as auditors of public companies.

46.3 Cases

What Is a Security?

Reves v. Ernst & Young

494 U.S. 56, 110 S.Ct. 945 (1990)

JUSTICE MARSHALL delivered the opinion of the Court.

This case presents the question whether certain demand notes issued by the Farmer's Cooperative of Arkansas and Oklahoma are "securities" within the meaning of § 3(a)(10) of the Securities and Exchange Act of 1934. We conclude that they are.

The Co-Op is an agricultural cooperative that, at the same time relevant here, had approximately 23,000 members. In order to raise money to support its general business operations, the Co-Op sold promissory notes payable on demand by the holder. Although the notes were uncollateralized and uninsured, they paid a variable rate of interest that was adjusted monthly to keep it higher than the rate paid by local financial institutions. The Co-Op offered the notes to both members and nonmembers, marketing the scheme as an "Investment Program." Advertisements for the notes, which appeared in each Co-Op newsletter, read in part: "YOUR CO-OP has more than \$11,000,000 in assets to stand behind your investments. The Investment is not Federal [sic] insured but it is...Safe...Secure...and available when you need it." App. 5 (ellipses in original). Despite these assurances, the Co-Op filed for bankruptcy in 1984. At the time of the filing, over 1,600 people held notes worth a total of \$10 million.

After the Co-Op filed for bankruptcy, petitioners, a class of holders of the notes, filed suit against Arthur Young & Co., the firm that had audited the Co-Op's financial statements (and the predecessor to respondent Ernst & Young). Petitioners alleged, inter alia, that Arthur Young had intentionally failed to follow generally accepted accounting principles in its audit, specifically with respect to the valuation of one of the Co-Op's major assets, a gasohol plant. Petitioners claimed that Arthur Young violated these principles in an effort to inflate the assets and net worth of the Co-Op. Petitioners maintained that, had Arthur Young properly treated the plant in its audits, they would not have purchased demand notes because the Co-Op's insolvency would have been apparent. On the basis of these

allegations, petitioners claimed that Arthur Young had violated the antifraud provisions of the 1934 Act as well as Arkansas' securities laws.

Petitioners prevailed at trial on both their federal and state claims, receiving a \$6.1 million judgment. Arthur Young appealed, claiming that the demand notes were not "securities" under either the 1934 Act or Arkansas law, and that the statutes' antifraud provisions therefore did not apply. A panel of the Eighth Circuit, agreeing with Arthur Young on both the state and federal issues, reversed. *Arthur Young & Co. v. Reves*, 856 F.2d 52 (1988). We granted certiorari to address the federal issue, 490 U.S. 1105, 109 S.Ct. 3154, 104 L.Ed.2d 1018 (1989), and now reverse the judgment of the Court of Appeals.

* * *

The fundamental purpose undergirding the Securities Acts is "to eliminate serious abuses in a largely unregulated securities market." *United Housing Foundation, Inc. v. Forman*, 421 U.S. 837, 849, 95 S.Ct. 2051, 2059, 44 L.Ed.2d 621 (1975). In defining the scope of the market that it wished to regulate, Congress painted with a broad brush. It recognized the virtually limitless scope of human ingenuity, especially in the creation of "countless and variable schemes devised by those who seek the use of the money of others on the promise of profits," *SEC v. W.J. Howey Co.*, 328 U.S. 293, 299, 66 S.Ct. 1100, 1103, 90 L.Ed. 1244 (1946), and determined that the best way to achieve its goal of protecting investors was "to define 'the term "security" in sufficiently broad and general terms so as to include within that definition the many types of instruments that in our commercial world fall within the ordinary concept of a security.'" *Forman*, supra, 421 U.S., at 847-848, 95 S.Ct., at 2058-2059 (quoting H.R.Rep. No. 85, 73d Cong., 1st Sess., 11 (1933)). Congress therefore did not attempt precisely to cabin the scope of the Securities Acts. Rather, it enacted a definition of "security" sufficiently broad to encompass virtually any instrument that might be sold as an investment.

* * *

[In deciding whether this transaction involves a "security," four factors are important.] First, we examine the transaction to assess the motivations that would prompt a reasonable seller and buyer to enter into it. If the seller's purpose is to raise money for the general use of a business enterprise or to finance substantial investments and the buyer is interested primarily in the profit the note is expected to generate, the instrument is likely to be a "security." If the note is exchanged to facilitate the purchase and sale of a minor asset or consumer good, to correct for the seller's cash-flow difficulties, or to advance some other commercial or consumer purpose, on the other hand, the note is less sensibly described as a

“security.” Second, we examine the “plan of distribution” of the instrument to determine whether it is an instrument in which there is “common trading for speculation or investment.” Third, we examine the reasonable expectations of the investing public: The Court will consider instruments to be “securities” on the basis of such public expectations, even where an economic analysis of the circumstances of the particular transaction might suggest that the instruments are not “securities” as used in that transaction. Finally, we examine whether some factor such as the existence of another regulatory scheme significantly reduces the risk of the instrument, thereby rendering application of the Securities Acts unnecessary.

* * *

[We] have little difficulty in concluding that the notes at issue here are “securities.”

CASE QUESTIONS

1. What are the four factors the court uses to determine whether or not the transaction involves a security?
2. How does the definition of security in this case differ from the definition in *Securities & Exchange Commission v. W. J. Howey*?

Tippee Liability

Dirks v. Securities and Exchange Commission

463 U.S. 646 (1983)

[A] tippee assumes a fiduciary duty to the shareholders of a corporation not to trade on material nonpublic information only when the insider has breached his fiduciary duty to the shareholders by disclosing the information to the tippee and the tippee knows or should know that there has been a breach.

* * *

Whether disclosure is a breach of duty therefore depends in large part on the purpose of the disclosure. This standard was identified by the SEC itself in *Cady, Roberts*: a purpose of the securities laws was to eliminate “use of inside information for personal advantage.” Thus, the test is whether the insider personally will benefit, directly or indirectly, from his disclosure. Absent some personal gain, there

has been no breach of duty to stockholders. And absent a breach by the insider, there is no derivative breach.

* * *

Under the inside-trading and tipping rules set forth above, we find that there was no actionable violation by Dirks. It is undisputed that Dirks himself was a stranger to Equity Funding, with no preexisting fiduciary duty to its shareholders. He took no action, directly, or indirectly, that induced the shareholders or officers of Equity Funding to repose trust or confidence in him. There was no expectation by Dirk's sources that he would keep their information in confidence. Nor did Dirks misappropriate or illegally obtain the information about Equity Funding. Unless the insiders breached their Cady, Roberts duty to shareholders in disclosing the nonpublic information to Dirks, he breached no duty when he passed it on to investors as well as to the Wall Street Journal.

* * *

It is clear that neither Secrist nor the other Equity Funding employees violated their Cady, Roberts duty to the corporation's shareholders by providing information to Dirks. The tippers received no monetary or personal benefit for revealing Equity Funding's secrets, nor was their purpose to make a gift of valuable information to Dirks. As the facts of this case clearly indicate, the tippers were motivated by a desire to expose the fraud. In the absence of a breach of duty to shareholders by the insiders, there was no derivative breach by Dirks. Dirks therefore could not have been "a participant after the fact in [an] insider's breach of a fiduciary duty." *Chiarella*, 445 U.S., at 230, n. 12.

* * *

We conclude that Dirks, in the circumstances of this case, had no duty to abstain from the use of the inside information that he obtained. The judgment of the Court of Appeals therefore is reversed.

CASE QUESTIONS

1. When does a tippee assume a fiduciary duty to shareholders of a corporation?
2. Did Dirks violate any insider trading laws? Why or why not?
3. How does this case refine Rule 10b-5?

Duty to Disclose Material Information

Basic Inc v. Levinson

485 U.S. 224 (1988)

[In December 1978, Basic Incorporated agreed to merge with Consolidated Engineering. Prior to the merger, Basic made three public statements denying it was involved in merger negotiations. Shareholders who sold their stock after the first of these statements and before the merger was announced sued Basic and its directors under Rule 10b-5, claiming that they sold their shares at depressed prices as a result of Basic's misleading statements. The district court decided in favor of Basic on the grounds that Basic's statements were not material and therefore were not misleading. The court of appeals reversed, and the Supreme Court granted certiorari.]

JUSTICE BLACKMUN.

We granted certiorari to resolve the split among the Courts of Appeals as to the standard of materiality applicable to preliminary merger discussions, and to determine whether the courts below properly applied a presumption of reliance in certifying the class, rather than requiring each class member to show direct reliance on Basic's statements.

* * *

The Court previously has addressed various positive and common-law requirements for a violation of § 10(b) or of Rule 10b-5. The Court also explicitly has defined a standard of materiality under the securities laws, see *TSC Industries, Inc. v. Northway, Inc.*, 426 U.S. 438 (1976), concluding in the proxy-solicitation context that “[a]n omitted fact is material if there is a substantial likelihood that a reasonable shareholder would consider it important in deciding how to vote.”...We

now expressly adopt the TSC Industries standard of materiality for the 5 10(b) and Rule 10b-5 context.

The application of this materiality standard to preliminary merger discussions is not self-evident. Where the impact of the corporate development on the target's fortune is certain and clear, the TSC Industries materiality definition admits straight-forward application. Where, on the other hand, the event is contingent or speculative in nature, it is difficult to ascertain whether the "reasonable investor" would have considered the omitted information significant at the time. Merger negotiations, because of the ever-present possibility that the contemplated transaction will not be effectuated, fall into the latter category.

* * *

Even before this Court's decision in TSC Industries, the Second Circuit had explained the role of the materiality requirement of Rule 10b-5, with respect to contingent or speculative information or events, in a manner that gave that term meaning that is independent of the other provisions of the Rule. Under such circumstances, materiality "will depend at any given time upon a balancing of both the indicated probability that the event will occur and the anticipated magnitude of the event in light of the totality of the company activity." SEC v. Texas Gulf Sulphur Co., 401 F.2d, at 849.

* * *

Whether merger discussions in any particular case are material therefore depends on the facts. Generally, in order to assess the probability that the event will occur, a factfinder will need to look to indicia of interest in the transactions at the highest corporate levels. Without attempting to catalog all such possible factors, we note by way of example that board resolutions, instructions to investment bankers, and actual negotiations between principals or their intermediaries may serve as indicia of interest. To assess the magnitude of the transaction to the issuer of the securities allegedly manipulated, a factfinder will need to consider such facts as the size of the two corporate entities and of the potential premiums over market value. No particular event or factor short of closing the transaction need to be either necessary or sufficient by itself to render merger discussions material.

As we clarify today, materiality depends on the significance the reasonable investor would place on the withheld or misrepresented information. The fact-specific inquiry we endorse here is consistent with the approach a number of courts have taken in assessing the materiality of merger negotiations. Because the standard of

materiality we have adopted differs from that used by both courts below, we remand the case for reconsideration of the question whether a grant of summary judgment is appropriate on this record.

We turn to the question of reliance and the fraud on-the-market theory. Succinctly put:

The fraud on the market theory is based on the hypothesis that, in an open and developed securities market, the price of a company's stock is determined by the available information regarding the company and its business....Misleading statements will therefore defraud purchasers of stock even if the purchasers do not directly rely on the misstatements....The causal connection between the defendants' fraud and the plaintiff's purchase of stock in such a case is no less significant than in a case of direct reliance on misrepresentations. *Peil v. Speiser*, 806 F.2d 1154, 1160-1161 (CA3 1986).

* * *

We agree that reliance is an element of a Rule 10b-5 cause of action. Reliance provides the requisite causal connection between a defendant's misrepresentation and a plaintiff's misrepresentation and a plaintiff's injury. There is, however, more than one way to demonstrate the causal connection.

* * *

Presumptions typically serve to assist courts in managing circumstances in which direct proof, for one reason or another, is rendered difficult. The courts below accepted a presumption, created by the fraud-on-the-market theory and subject to rebuttal by petitioners, that persons who had traded Basic shares had done so in reliance on the integrity of the price set by the market, but because of petitioners' material misrepresentations that price had been fraudulently depressed. Requiring a plaintiff to show a speculative state of facts, i.e., how he would have acted if omitted material information had been disclosed, or if the misrepresentation had not been made, would place an unnecessarily unrealistic evidentiary burden on the Rule 10b-5 plaintiff who has traded on an impersonal market.

Arising out of considerations of fairness, public policy, and probability, as well as judicial economy, presumptions are also useful devices for allocating the burdens of proof between parties. The presumption of reliance employed in this case is consistent with, and, by facilitating Rule 10b-5 litigation, supports, the congressional policy embodied in the 1934 Act....

The presumption is also supported by common sense and probability. Recent empirical studies have tended to confirm Congress' premise that the market price of shares traded on well-developed markets reflects all publicly available information, and, hence, any material misrepresentations. It has been noted that "it is hard to imagine that there ever is a buyer or seller who does not rely on market integrity. Who would knowingly roll the dice in a crooked crap game?" *Schlanger v. Four-Phase Systems, Inc.*, 555 F.Supp. 535, 538 (SDNY 1982)...An investor who buys or sells stock at the price set by the market does so in reliance on the integrity of that price. Because most publicly available information is reflected in market price, an investor's reliance on any public material misrepresentations, therefore, may be presumed for purposes of a Rule 10b-5 action.

* * *

The judgment of the Court of Appeals is vacated and the case is remanded to that court for further proceedings consistent with this opinion.

CASE QUESTIONS

1. How does the court determine what is or is not material information? How does this differ from its previous rulings?
2. What is the fraud-on-the-market theory?

46.4 Summary and Exercises

Summary

Beyond state corporation laws, federal statutes—most importantly, the Securities Act of 1933 and the Securities Exchange Act of 1934—regulate the issuance and trading of corporate securities. The federal definition of *security* is broad, encompassing most investments, even those called by other names.

The law does not prohibit risky stock offerings; it bans only those lacking adequate disclosure of risks. The primary means for realizing this goal is the registration requirement: registration statements, prospectuses, and proxy solicitations must be filed with the Securities and Exchange Commission (SEC). Penalties for violation of securities law include criminal fines and jail terms, and damages may be awarded in civil suits by both the SEC and private individuals injured by the violation of SEC rules. A 1977 amendment to the 1934 act is the Foreign Corrupt Practices Act, which prohibits an issuer from paying a bribe or making any other payment to foreign officials in order to gain business by inducing the foreign official to influence his government in favor of the US company. This law requires issuers to keep accurate sets of books reflecting the dispositions of their assets and to maintain internal accounting controls to ensure that transactions comport with management's authorization.

The Securities Exchange Act of 1934 presents special hazards to those trading in public stock on the basis of inside information. One provision requires the reimbursement to the company of any profits made from selling and buying stock during a six-month period by directors, officers, and shareholders owning 10 percent or more of the company's stock. Under Rule 10b-5, the SEC and private parties may sue insiders who traded on information not available to the general public, thus gaining an advantage in either selling or buying the stock. Insiders include company employees.

The Sarbanes-Oxley Act amended the 1934 act, creating more stringent penalties, increasing corporate regulation, and requiring greater transparency.

EXERCISES

1. Anne operated a clothing store called Anne's Rags, Inc. She owned all of the stock in the company. After several years in the clothing business, Anne sold her stock to Louise, who personally managed the business. Is the sale governed by the antifraud provisions of federal securities law? Why?
2. While waiting tables at a campus-area restaurant, you overhear a conversation between two corporate executives who indicate that their company has developed a new product that will revolutionize the computer industry. The product is to be announced in three weeks. If you purchase stock in the company before the announcement, will you be liable under federal securities law? Why?
3. Eric was hired as a management consultant by a major corporation to conduct a study, which took him three months to complete. While working on the study, Eric learned that someone working in research and development for the company had recently made an important discovery. Before the discovery was announced publicly, Eric purchased stock in the company. Did he violate federal securities law? Why?
4. While working for the company, Eric also learned that it was planning a takeover of another corporation. Before announcement of a tender offer, Eric purchased stock in the target company. Did he violate securities law? Why?
5. The commercial lending department of First Bank made a substantial loan to Alpha Company after obtaining a favorable confidential earnings report from Alpha. Over lunch, Heidi, the loan officer who handled the loan, mentioned the earnings report to a friend who worked in the bank's trust department. The friend proceeded to purchase stock in Alpha for several of the bank's trusts. Discuss the legal implications.
6. In Exercise 5, assume that a week after the loan to Alpha, First Bank financed Beta Company's takeover of Alpha. During the financing negotiations, Heidi mentioned the Alpha earnings report to Beta officials; furthermore, the report was an important factor in Heidi's decision to finance the takeover. Discuss the legal implications.
7. In Exercise 6, assume that after work one day, Heidi told her friend in the trust department that Alpha was Beta's takeover target. The friend proceeded to purchase additional stock in Alpha for a bank trust he administered. Discuss the legal implications.

SELF-TEST QUESTIONS

1. The issuance of corporate securities is governed by
 - a. various federal statutes
 - b. state law
 - c. both of the above
 - d. neither of the above

2. The law that prohibits the payment of a bribe to foreign officials to gain business is called
 - a. the Insider Trading Act
 - b. the blue sky law
 - c. the Foreign Corrupt Practices Act
 - d. none of the above

3. The primary means for banning stock offerings that inadequately disclose risks is
 - a. the registration requirement
 - b. SEC prohibition of risky stock offerings
 - c. both of the above
 - d. neither of the above

4. To enforce its prohibition under insider trading, the SEC requires reimbursement to the company of any profits made from selling and buying stock during any six-month period by directors owing
 - a. 60 percent or more of company stock
 - b. 40 percent or more of company stock
 - c. 10 percent or more of company stock
 - d. none of the above

5. Under Rule 10b-5, insiders include
 - a. all company employees
 - b. any person who possesses nonpublic information
 - c. all tippees

- d. none of the above
6. The purpose of the Dodd-Frank Act is to
- a. promote financial stability
 - b. end “too big to fail”
 - c. end bailouts
 - d. protect against abusive financial services practices
 - e. all of the above

Chapter 47

Corporate Expansion, State and Federal Regulation of Foreign Corporations, and Corporate Dissolution

LEARNING OBJECTIVES

After reading this chapter, you should understand the following:

1. How a corporation can expand by purchasing assets of another company without purchasing stock or otherwise merging with the company whose assets are purchased
2. The benefits of expanding through a purchase of assets rather than stock
3. Both the benefits and potential detriments of merging with another company
4. How a merger differs from a stock purchase or a consolidation
5. Takeovers and tender offers
6. Appraisal rights
7. Foreign corporations and the requirements of the US Constitution
8. The taxation of foreign corporations
9. Corporate dissolution and its various types

This chapter begins with a discussion of the various ways a corporation can expand. We briefly consider successor liability—whether a successor corporation, such as a corporation that purchases all of the assets of another corporation, is liable for debts, lawsuits, and other liabilities of the purchased corporation. We then turn to appraisal rights, which are a shareholder’s right to dissent from a corporate expansion. Next, we look at several aspects, such as jurisdiction and taxation, of foreign corporations—corporations that are incorporated in a state that is different from the one in which they do business. We conclude the chapter with dissolution of the corporation.

47.1 Corporate Expansion

LEARNING OBJECTIVE

1. Understand the four methods of corporate expansion: purchase of assets other than in the regular course of business, merger, consolidation, and purchase of stock in another corporation.

In popular usage, “**merger**¹” often is used to mean any type of expansion by which one corporation acquires part or all of another corporation. But in legal terms, merger is only one of four methods of achieving expansion other than by internal growth.

Antitrust law—an important aspect of corporate expansion—will be discussed in [Chapter 48 "Antitrust Law"](#). There, in the study of Section 7 of the Clayton Act, we note the possible antitrust hazards of merging or consolidating with a competing corporation.

Purchase of Assets

One method of corporate expansion is the **purchase of assets**² of another corporation. At the most basic level, ABC Corporation wishes to expand, and the assets of XYZ Corporation are attractive to ABC. So ABC purchases the assets of XYZ, resulting in the expansion of ABC. After the purchase, XYZ may remain in corporate form or may cease to exist, depending on how many of its assets were purchased by ABC.

There are several advantages to an asset purchase, most notably, that the acquiring corporation can pick what assets and liabilities (with certain limitations, discussed further on in this section) it wishes to acquire. Furthermore, certain transactions may avoid a shareholder vote. If the selling corporation does not sell substantially all of its assets, then its shareholders may not get a vote to approve the sale.

1. Any type of corporate expansion by which one corporation acquires part or all of another corporation.
2. One corporation purchases the assets of another corporation in order to expand.

For example, after several years of successful merchandising, a corporation formed by Bob, Carol, and Ted (BCT Bookstore, Inc.) has opened three branch stores around town and discovered its transportation costs mounting. Inventory arrives in trucks operated by the Flying Truckman Co., Inc. The BCT corporation concludes that the economics of delivery do not warrant purchasing a single truck dedicated to

hauling books for its four stores alone. Then Bob learns that the owners of Flying Truckman might be willing to part with their company because it has not been earning money lately. If BCT could reorganize Flying Truckman's other routes, it could reduce its own shipping costs while making a profit on other lines of business.

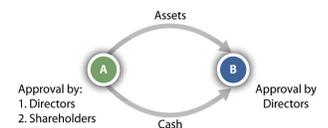

Under the circumstances, the simplest and safest way to acquire Flying Truckman is by purchasing its assets. That way BCT would own the trucks and whatever routes it chooses, without taking upon itself the stigma of the association. It could drop the name Flying Truckman.

In most states, the board of directors of both the seller and the buyer must approve a transfer of assets. Shareholders of the selling corporation must also consent by majority vote, but shareholders of the acquiring company need not be consulted, so Ted's opposition can be effectively mooted; see [Figure 47.1 "Purchase of Assets"](#). (When inventory is sold in bulk, the acquiring company must also comply with the law governing bulk transfers; see [Chapter 18 "Title and Risk of Loss"](#).) By purchasing the assets—trucks, truck routes, and the trademark Flying Truckman (to prevent anyone else from using it)—the acquiring corporation can carry on the functions of the acquired company without carrying on its business as such. For a discussion of asset purchases see *Airborne Health v. Squid Soap*, 984 A.2d 126 (Del. 2010).

Successor Liability

One of the principal advantages of this method of expansion is that the acquiring company generally is not liable for the debts and/or lawsuits of the corporation whose assets it purchased, generally known as **successor liability**³. Suppose BCT paid Flying Truckman \$250,000 for its trucks, routes, and name. With that cash, Flying Truckman paid off several of its creditors. Its shareholders then voted to dissolve the corporation, leaving one creditor unsatisfied. The creditor can no longer sue Flying Truckman since it does not exist. So he sues BCT. Unless certain circumstances exist, as discussed in *Ray v. Alad Corporation* (see [Section 47.4.1 "Successor Liability"](#)), BCT is not liable for Flying Truckman's debts.

Figure 47.1 Purchase of Assets

3. The liability of an acquiring company for the debts and/or lawsuits of the corporation whose assets it purchased.

Several states, although not a majority, have adopted the Ray product-line exception approach to successor liability. The general rule is that the purchasing corporation does not take the liabilities of the acquired corporation. Several exceptions exist, as described in *Ray*, the principal exception being the product-line approach. This minority exception has been further limited in several jurisdictions

by applying it solely to cases involving products liability. Other jurisdictions also permit a continuity-of-enterprise exception, whereby the court examines how closely the acquiring corporation's business is to the acquired corporation's business (e.g., see *Turner v. Bituminous Casualty Co.*). *Turner v. Bituminous Casualty Co.*, 244 N.W.2d 873 (Mich. 1976).

Merger

When the assets of a company are purchased, the selling company itself may or may not go out of existence. By contrast, in a merger, the acquired company goes out of existence by being absorbed into the acquiring company. In the example in [Section 47.1.2 "Merger"](#), Flying Truck would merge into BCT, resulting in Flying Truckman losing its existence. The acquiring company receives all of the acquired company's assets, including physical property and intangible property such as contracts and goodwill. The acquiring company also assumes all debts of the acquired company.

A merger begins when two or more corporations negotiate an agreement outlining the specifics of a merger, such as which corporation survives and the identities of management personnel. There are two main types of merger: a cash merger and a noncash merger. In a cash merger, the shareholders of the disappearing corporation surrender their shares for cash. These shareholders retain no interest in the surviving corporation, having been bought out. This is often called a freeze-out merger, since the shareholders of the disappearing corporation are frozen out of an interest in the surviving corporation.

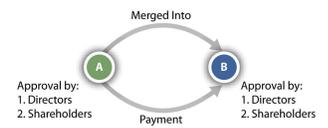

In a noncash merger, the shareholders of the disappearing corporation retain an interest in the surviving corporation. The shareholders of the disappearing corporation trade their shares for shares in the surviving corporation; thus they retain an interest in the surviving corporation when they become shareholders of that surviving corporation.

Unless the articles of incorporation state otherwise, majority approval of the merger by both boards of directors and both sets of shareholders is necessary (see [Figure 47.2 "Merger"](#)). The shareholder majority must be of the total shares eligible to vote, not merely of the total actually represented at the special meeting called for the purpose of determining whether to merge.

Consolidation

Consolidation⁴ is virtually the same as a merger. The companies merge, but the resulting entity is a new corporation. Returning to our previous example, BCT and Flying Truckman could consolidate and form a new corporation. As with mergers, the boards and shareholders must approve the consolidation by majority votes (see **Figure 47.3 "Consolidation"**). The resulting corporation becomes effective when the secretary of state issues a certificate of merger or incorporation.

Figure 47.2 Merger

For more information on mergers and consolidation under Delaware law, see Del. Code Ann., Title 8, Sections 251-267 (2011), at <http://delcode.delaware.gov/title8/index.shtml#TopOfPage>.

Figure 47.3 Consolidation

Purchase of Stock Takeovers

The fourth method of expanding, purchase of a company's stock, is more complicated than the other methods. The takeover has become a popular method for gaining control because it does not require an affirmative vote by the target company's board of directors. In a **takeover**⁵, the acquiring company appeals directly to the target's shareholders, offering either money or other securities, often at a premium over market value, in exchange for their shares. The acquiring company usually need not purchase 100 percent of the shares. Indeed, if the shares are numerous and widely enough dispersed, control can be achieved by acquiring less than half the outstanding stock. In our example, if Flying Truckman has shareholders, BCT would make an offer directly to those shareholders to acquire their shares.

Tender Offers

In the case of closely held corporations, it is possible for a company bent on takeover to negotiate with each stockholder individually, making a direct offer to purchase his or her shares. That is impossible in the case of large publicly held companies since it is impracticable and/or too expensive to reach each individual shareholder. To reach all shareholders, the acquiring company must make a tender offer, which is a public offer to purchase shares. In fact, the tender offer is not really an offer at all in the technical sense; the **tender offer**⁶ is an invitation to shareholders to sell their shares at a stipulated price. The tender offer might express the price in cash or in shares of the acquiring company. Ordinarily, the

4. A corporate expansion similar to a merger but resulting in an entity that is an entirely new corporation.

5. An appeal directly to the shareholders of a target corporation by offering money or other securities in exchange for the shareholders' shares.

6. An invitation to the shareholders of a target corporation to tender their shares for a stipulated price. Often used when a target has many shareholders.

offeror will want to purchase only a controlling interest, so it will limit the tender to a specified number of shares and reserve the right not to purchase any above that number. It will also condition the tender offer on receiving a minimum number of shares so that it need buy none if stockholders do not offer a threshold number of shares for purchase.

Leveraged Buyouts

A tender offer or other asset purchase can be financed as a **leveraged buyout (LBO)**⁷, a purchase financed by debt. A common type of LBO involves investors who are members of the target corporation and/or outsiders who wish to take over the target or retain a controlling interest. These purchasers use the assets of the target corporation, such as its real estate or a manufacturing plant, as security for a loan to purchase the target. The purchasers also use other types of debt, such as the issuance of bonds or a loan, to implement the LBO.

For more information about tender offers and mergers, see *Unocal v. MesaUnocal Corp. v. Mesa Petroleum*, 493 A.2d 946 (Del. 1985). and *Revlon v. MacAndrews & Forbes*. *Revlon, Inc. v. MacAndrews & Forbes Holdings, Inc.*, 506 A.2d 173 (Del. 1985). The *Wall Street Journal* provides comprehensive coverage of tender offers, mergers, and LBOs, at <http://www.wsj.com>.

State versus Federal Regulation of Takeovers

Under the federal Williams Act, upon commencement of a tender offer for more than 5 percent of the target's stock, the offeror must file a statement with the Securities and Exchange Commission (SEC) stating the source of funds to be used in making the purchase, the purpose of the purchase, and the extent of its holdings in the target company. Even when a tender offer has not been made, the Williams Act requires any person who acquires more than 5 percent ownership of a corporation to file a statement with the SEC within ten days. The Williams Act, which made certain amendments to the Securities Exchange Act of 1934, can be viewed at <http://taft.law.uc.edu/CCL/34Act/>. The US Constitution is also implicated in the regulation of foreign corporations. The Commerce Clause of Article I, Section 8, of the Constitution provides that Congress has power "to regulate Commerce...among the several States."

7. The acquisition of another company using a significant amount of borrowed money to pay for the acquisition. Often, the assets of the company being acquired may be used as collateral for the loans.

Because officers and directors of target companies have no legal say in whether stockholders will tender their shares, many states began, in the early 1970s, to enact takeover laws. The first generation of these laws acted as delaying devices by imposing lengthy waiting periods before a tender offer could be put into effect. Many of the laws expressly gave management of the target companies a right to a

hearing, which could be dragged out for weeks or months, giving the target time to build up a defense. The political premise of the laws was the protection of incumbent managers from takeover by out-of-state corporations, although the “localness” of some managers was but a polite fiction. One such law was enacted in Illinois. It required notifying the Illinois secretary of state and the target corporation of the intent to make a tender offer twenty days prior to the offer. During that time, the corporation seeking to make the tender offer could not spread information about the offer. Finally, the secretary of state could delay the tender offer by ordering a hearing and could even deny the offer if it was deemed inequitable. In 1982, the Supreme Court, in *Edgar v. Mite Corp.*, struck down the Illinois takeover law because it violated the Commerce Clause, which prohibits states from unduly burdening the flow of interstate commerce, and also was preempted by the Williams Act. *Edgar v. Mite Corp.*, 457 U.S. 624 (1982).

Following the *Mite* decision, states began to enact a second generation of takeover laws. In 1987, in *CTS Corporation v. Dynamics Corporation of America*, the Supreme Court upheld an Indiana second-generation statute that prevents an offeror who has acquired 20 percent or more of a target’s stock from voting unless other shareholders (not including management) approve. The vote to approve can be delayed for up to fifty days from the date the offeror files a statement reporting the acquisition. The Court concluded that the Commerce Clause was not violated nor was the Williams Act, because the Indiana law, unlike the Illinois law in *Mite*, was consistent with the Williams Act, since it protects shareholders, does not unreasonably delay the tender offer, and does not discriminate against interstate commerce. *CTS Corporation v. Dynamics Corporation of America*, 481 U.S. 69 (1987).

Emboldened by the *CTS* decision, almost half the states have adopted a third-generation law that requires a bidder to wait several years before merging with the target company unless the target’s board agrees in advance to the merger. Because in many cases a merger is the reason for the bid, these laws are especially powerful. In 1989, the Seventh Circuit Court of Appeals upheld Wisconsin’s third-generation law, saying that it did not violate the Commerce Clause and that it was not preempted by the Williams Act. The Supreme Court decided not to review the decision. *Amanda Acquisition Corp. v. Universal Foods Corp.*, 877 F.2d 496 (7th Cir. 1989).

Short-Form Mergers

If one company acquires 90 percent or more of the stock of another company, it can merge with the target company through the so-called **short-form merger**⁸. Only the parent company’s board of directors need approve the merger; consent of the shareholders of either company is unnecessary.

8. If the one company acquires 90 percent or more of the stock of another company, it can initiate a merger without the consent of the shareholders.

Appraisal Rights

If a shareholder has the right to vote on a corporate plan to merge, consolidate, or sell all or substantially all of its assets, that shareholder has the right to dissent and invoke **appraisal rights**⁹. Returning again to BCT, Bob and Carol, as shareholders, are anxious to acquire Flying Truckman, but Ted is not sure of the wisdom of doing that. Ted could invoke his appraisal rights to dissent from an expansion involving Flying Truckman. The law requires the shareholder to file with the corporation, before the vote, a notice of intention to demand the fair value of his shares. If the plan is approved and the shareholder does not vote in favor, the corporation must send a notice to the shareholder specifying procedures for obtaining payment, and the shareholder must demand payment within the time set in the notice, which cannot be less than thirty days. Fair value means the value of shares immediately before the effective date of the corporate action to which the shareholder has objected. Appreciation and depreciation in anticipation of the action are excluded, unless the exclusion is unfair.

If the shareholder and the company cannot agree on the fair value, the shareholder must file a petition requesting a court to determine the fair value. The method of determining fair value depends on the circumstances. When there is a public market for stock traded on an exchange, fair value is usually the price quoted on the exchange. In some circumstances, other factors, especially net asset value and investment value—for example, earnings potential—assume greater importance.

See *Hariton v. Arco Electronics, Inc.*, 40 Del. Ch. 326; 182 A.2d 22 (Del. 1962). and *M.P.M. Enterprises, Inc. v. Gilbert*, 731 A.2d 790 (Del. 1999). for further discussion of appraisal rights and when they may be invoked.

9. If a shareholder has the right to vote on a corporate plan to merge, consolidate, or sell all or substantially all of its assets, that shareholder has the right to dissent and demand compensation.

KEY TAKEAWAY

There are four main methods of corporate expansion. The first involves the purchase of assets not in the ordinary course of business. Using this method, the purchase expands the corporation. The second and third methods, merger and consolidation, are very similar: two or more corporations combine. In a merger, one of the merging companies survives, and the other ceases to exist. In a consolidation, the merging corporations cease to exist when they combine to form a new corporation. The final method is a stock purchase, accomplished via a tender offer, takeover, or leveraged buyout. Federal and state regulations play a significant role in takeovers and tender offers, particularly the Williams Act. A shareholder who does not wish to participate in a stock sale may invoke his appraisal rights and demand cash compensation for his shares.

EXERCISES

1. What are some dangers in purchasing the assets of another corporation?
2. What are some possible rationales behind statutes such as the Williams Act and state antitakeover statutes?
3. When may a shareholder invoke appraisal rights?

47.2 Foreign Corporations

LEARNING OBJECTIVES

1. Discuss state-imposed conditions on the admission of foreign corporations.
2. Discuss state court jurisdiction over foreign corporations.
3. Explain how states may tax foreign corporations.
4. Apply the US Constitution to foreign corporations.

A **foreign corporation**¹⁰ is a company incorporated outside the state in which it is doing business. A Delaware corporation, operating in all states, is a foreign corporation in forty-nine of them.

Conditions on Admission to Do Business

States can impose on foreign corporations conditions on admission to do business if certain constitutional barriers are surmounted. One potential problem is the Privileges and Immunities Clause in Article IV, Section 2, of the Constitution, which provides that “citizens shall be entitled to all privileges and immunities of citizens in the several states.” The Supreme Court has interpreted this murky language to mean that states may not discriminate between their own citizens and those of other states. For example, the Court voided a tax New Hampshire imposed on out-of-state commuters on the grounds that “the tax falls exclusively on the incomes of nonresidents.” *Austin v. New Hampshire*, 420 U.S. 656 (1975). However, corporations are uniformly held not to be citizens for purposes of this clause, so the states may impose burdens on foreign corporations that they do not put upon companies incorporated under their laws. But these burdens may only be imposed on companies that conduct intrastate business, having some level of business transactions within that state.

Other constitutional rights of the corporation or its members may also come into play when states attempt to license foreign corporations. Thus when Arkansas sought to revoke the license of a Missouri construction company to do business within the state, the Supreme Court held that the state had acted unconstitutionally (violating Article III, Section 2, of the US Constitution) in conditioning the license on a waiver of the right to remove a case from the state courts to the federal courts. *Terral v. Burke Construction Co.*, 257 U.S. 529 (1922).

10. A company incorporated outside the state in which it is doing business.

Typical Requirements for Foreign Corporations

Certain preconditions for doing business are common to most states. Foreign corporations are required to obtain from the secretary of state a certificate of authority to conduct business. The foreign corporation also must maintain a registered office with a registered agent who works there. The registered agent may be served with all legal process, demands, or notices required by law to be served on the corporation. Foreign corporations are generally granted every right and privilege enjoyed by domestic corporations.

These requirements must be met whenever the corporation transacts business within the state. As mentioned previously, some activities do not fall within the definition of **transacting business**¹¹ and may be carried on even if the foreign corporation has not obtained a certificate of authority. These include filing or defending a lawsuit, holding meetings of directors or shareholders, maintaining bank accounts, maintaining offices for the transfer of the company's own securities, selling through independent contractors, soliciting orders through agents or employees (but only if the orders become binding contracts upon acceptance outside the state), creating or acquiring security interests in real or personal property, securing or collecting debts, transacting any business in interstate commerce, and "conducting an isolated transaction that is completed within 30 days and that is not one in the course of repeated transactions of a like nature" (Revised Model Business Corporation Act, Section 15.01).

Penalties for Failure to Comply with a Statute

A corporation may not sue in the state courts to enforce its rights until it obtains a certificate of authority. It may defend any lawsuits brought against it, however. The state attorney general has authority to collect civil penalties that vary from state to state. Other sanctions in various states include fines and penalties on taxes owed; fines and imprisonment of corporate agents, directors, and officers; nullification of corporate contracts; and personal liability on contracts by officers and directors. In some states, contracts made by a corporation that has failed to qualify are void.

Jurisdiction over Foreign Corporations

Whether corporations are subject to state court jurisdiction depends on the extent to which they are operating within the state. If the corporation is qualified to do business within the state and has a certificate of authority or license, then state courts have jurisdiction and process may be served on the corporation's registered agent. If the corporation has failed to name an agent or is doing business without a certificate, the plaintiff may serve the secretary of state on the corporation's behalf.

11. A minimum level of corporate activities required for a corporation to need a certificate of authority.

Even if the corporation is not transacting enough business within the state to be required to qualify for a certificate or license, it may still be subject to suit in state courts under long-arm statutes. These laws permit state courts to exercise personal jurisdiction over a corporation that has sufficient contacts with the state.

The major constitutional limitation on long-arm statutes is the Due Process Clause. The Supreme Court upheld the validity of long-arm statutes applied to corporations in *International Shoe Co. v. Washington*. *International Shoe Co. v. Washington*, 326 U.S. 310 (1945). But the long-arm statute will only be constitutionally valid where there are minimum contacts—that is, for a state to exercise personal jurisdiction over a foreign corporation, the foreign corporation must have at least “minimum contacts” the state. That jurisdictional test is still applied many years after the *International Shoe* decision was handed down. *Judas Priest v. District Court*, 104 Nev. 424; 760 P.2d 137 (Nev. 1988); *Pavlovich v. Superior Court*, 29 Cal. 4th 262; 58 P.3d 2 (Cal. 2002). Since *International Shoe*, the nationalization of commerce has given way to the internationalization of commerce. This change has resulted in difficult jurisdictional questions that involve conflicting policy considerations. *Asahi Metal Industry v. Superior Court of California*, 480 U.S. 102, 107 S.Ct. 1026, 94 L. Ed. 92 (1987).

Taxing Authority

May states tax foreign corporations? Since a state may obviously tax its domestic corporations, the question might seem surprising. Why should a state ever be barred from taxing foreign corporations licensed to do business in the state? If the foreign corporation was engaged in purely local, intrastate business, no quarrel would arise. The constitutional difficulty is whether the tax constitutes an unreasonable burden on the company’s interstate business, in violation of the **Commerce Clause**¹². The basic approach, illustrated in *D. H. Holmes Co., Ltd. v. McNamara* (see [Section 47.4.2 "Constitutional Issues Surrounding Taxation of a Foreign Corporation"](#)), is that a state can impose a tax on activities for which the state gives legal protection, so long as the tax does not unreasonably burden interstate commerce.

State taxation of corporate income raises special concerns. In the absence of ground rules, a company doing business in many states could be liable for paying income tax to several different states on the basis of its total earnings. A company doing business in all fifty states, for example, would pay five times its earnings in income taxes if each state were to charge a 10 percent tax on those earnings. Obviously, such a result would seriously burden interstate commerce. The courts have long held, therefore, that the states may only tax that portion of the company’s earnings attributable to the business carried on in the state. To compute the proportion of a company’s total earnings subject to tax within the state, most states have adopted a

12. Provision in the US Constitution that gives Congress the power to regulate commerce between the states.

formula based on the local percentage of the company's total sales, property, and payroll.

KEY TAKEAWAY

A foreign corporation is a company incorporated outside of the state in which it is doing business. States can place reasonable limitations upon foreign corporations subject to constitutional requirements. A foreign corporation must do something that is sufficient to rise to the level of transacting business within a state in order to fall under the jurisdiction of that state. These transactions must meet the minimum-contacts requirement for jurisdiction under long-arm statutes. A state may tax a foreign corporation as long as it does not burden interstate commerce.

EXERCISES

1. What are some typical requirements that a corporation must meet in order to operate in a foreign state?
2. Provide examples of business activities that rise to the level of minimum contacts such as that a state may exercise jurisdiction over a foreign corporation.
3. What are some possible jurisdictional problems that arise from increasing globalization and from many corporations providing input for a particular product? For more information, see the *Asahi Metal* and *Pavlovich* court cases, cited in endnotes 13 and 14 below.

47.3 Dissolution

LEARNING OBJECTIVES

1. Define and distinguish dissolution and liquidation.
2. Discuss the different types of dissolution and liquidation.
3. Discuss claims against a dissolved corporation.

Dissolution¹³ is the end of the legal existence of the corporation, basically “corporate death.” It is not the same as **liquidation**¹⁴, which is the process of paying the creditors and distributing the assets. Until dissolved, a corporation endures, despite the vicissitudes of the economy or the corporation’s internal affairs. As Justice Cardozo said while serving as chief judge of the New York court of appeals: “Neither bankruptcy...nor cessation of business...nor dispersion of stockholders, nor the absence of directors...nor all combined, will avail without more to stifle the breath of juristic personality. The corporation abides as an ideal creation, impervious to the shocks of these temporal vicissitudes. Not even the sequestration of the assets at the hands of a receiver will terminate its being.” *Petrogradsky Mejdunarodny Kommerchesky Bank v. National City Bank*, 170 N.E. 479, 482 (N.Y. 1930).

See <http://www.irs.gov/businesses/small/article/0,,id=98703,00.html> for the Internal Revenue Service’s checklist of closing and dissolving a business. State and local government regulations may also apply.

Voluntary Dissolution

Any corporation may be dissolved with the unanimous written consent of the shareholders; this is a **voluntary dissolution**¹⁵. This provision is obviously applicable primarily to closely held corporations. Dissolution can also be accomplished even if some shareholders dissent. The directors must first adopt a resolution by majority vote recommending the dissolution. The shareholders must then have an opportunity to vote on the resolution at a meeting after being notified of its purpose. A majority of the outstanding voting shares is necessary to carry the resolution. Although this procedure is most often used when a company has been inactive, nothing bars its use by large corporations. In 1979, UV Industries, 357th on the *Fortune* 500 list, with profits of \$40 million annually, voted to dissolve and to distribute some \$500 million to its stockholders, in part as a means of fending off a

13. The end of the existence of a corporation.
14. The process of paying creditors and distributing the assets of a corporation.
15. Dissolution of a corporation by unanimous written consent of its shareholders.

hostile takeover. *Fortune* magazine referred to it as “a company that’s worth more dead than alive.” *Fortune*, February 26, 1979, 42–44.

Once dissolution has been approved, the corporation may dissolve by filing a certificate or articles of dissolution with the secretary of state. The certificate may be filed as the corporation begins to wind up its affairs or at any time thereafter. The process of winding up is liquidation. The company must notify all creditors of its intention to liquidate. It must collect and dispose of its assets, discharge all obligations, and distribute any remainder to its stockholders.

Involuntary Dissolution

In certain cases, a corporation can face **involuntary dissolution**¹⁶. A state may bring an action to dissolve a corporation on one of five grounds: failure to file an annual report or pay taxes, fraud in procuring incorporation, exceeding or abusing authority conferred, failure for thirty days to appoint and maintain a registered agent, and failure to notify the state of a change of registered office or agent. State-specific differences exist as well. Delaware permits its attorney general to involuntarily dissolve a corporation for abuse, misuse, or nonuse of corporate powers, privileges, or franchise. Del. Code Ann. tit. 8, § 282 (2011). California, on the other hand, permits involuntary dissolution for abandonment of a business, board deadlocks, internal strife and deadlocked shareholders, mismanagement, fraud or abuse of authority, expiration of term of corporation, or protection of a complaining shareholder if there are fewer than thirty-five shareholders. Cal. Corp. Code § 1800 et seq. (West 2011). California permits the initiation of involuntary dissolution by either half of the directors in office or by a third of shareholders.

Judicial Liquidation Action by Shareholder

A shareholder may file suit to have a court dissolve the company on a showing that the company is being irreparably injured because the directors are deadlocked in the management of corporate affairs and the shareholders cannot break the deadlock. Shareholders may also sue for liquidation if corporate assets are being misapplied or wasted, or if directors or those in control are acting illegally, oppressively, or fraudulently.

Claims against a Dissolved Corporation

Under Sections 14.06 and 14.07 of the Revised Model Business Corporation Act, a dissolved corporation must provide written notice of the dissolution to its creditors. The notice must state a deadline, which must be at least 120 days after

16. A state action to dissolve a corporation.

the notice, for receipt of creditors' claims. Claims not received by the deadline are barred. The corporation may also publish a notice of the dissolution in a local newspaper. Creditors who do not receive written notice or whose claim is not acted on have five years to file suit against the corporation. If the corporate assets have been distributed, shareholders are personally liable, although the liability may not exceed the assets received at liquidation.

Bankruptcy

As an alternative to dissolution, a corporation in financial trouble may look to federal bankruptcy law for relief. A corporation may use liquidation proceedings under Chapter 7 of the Bankruptcy Reform Act or may be reorganized under Chapter 11 of the act. Both remedies are discussed in detail in [Chapter 30 "Bankruptcy"](#).

KEY TAKEAWAY

Dissolution is the end of the legal existence of a corporation. It usually occurs after liquidation, which is the process of paying debts and distributing assets. There are several methods by which a corporation may be dissolved. The first is voluntary dissolution, which is an elective decision to dissolve the entity. A second is involuntary dissolution, which occurs upon the happening of statute-specific events such as a failure to pay taxes. Last, a corporation may be dissolved judicially, either by shareholder or creditor lawsuit. A dissolved corporation must provide notice to its creditors of upcoming dissolution.

47.4 Cases

Successor Liability

Ray v. Alad Corporation

19 Cal. 3d 22; 560 P2d 3; 136 Cal. Rptr. 574 (Cal. 1977)

Claiming damages for injury from a defective ladder, plaintiff asserts strict tort liability against defendant Alad Corporation (Alad II) which neither manufactured nor sold the ladder but prior to plaintiff's injury succeeded to the business of the ladder's manufacturer, the now dissolved "Alad Corporation" (Alad I), through a purchase of Alad I's assets for an adequate cash consideration. Upon acquiring Alad I's plant, equipment, inventory, trade name, and good will, Alad II continued to manufacture the same line of ladders under the "Alad" name, using the same equipment, designs, and personnel, and soliciting Alad I's customers through the same sales representatives with no outward indication of any change in the ownership of the business. The trial court entered summary judgment for Alad II and plaintiff appeals....

Our discussion of the law starts with the rule ordinarily applied to the determination of whether a corporation purchasing the principal assets of another corporation assumes the other's liabilities. As typically formulated, the rule states that the purchaser does not assume the seller's liabilities unless (1) there is an express or implied agreement of assumption, (2) the transaction amounts to a consolidation or merger of the two corporations, (3) the purchasing corporation is a mere continuation of the seller, or (4) the transfer of assets to the purchaser is for the fraudulent purpose of escaping liability for the seller's debts.

If this rule were determinative of Alad II's liability to plaintiff it would require us to affirm the summary judgment. None of the rule's four stated grounds for imposing liability on the purchasing corporation is present here. There was no express or implied agreement to assume liability for injury from defective products previously manufactured by Alad I. Nor is there any indication or contention that the transaction was prompted by any fraudulent purpose of escaping liability for Alad I's debts.

With respect to the second stated ground for liability, the purchase of Alad I's assets did not amount to a consolidation or merger. This exception has been invoked where one corporation takes all of another's assets without providing any

consideration that could be made available to meet claims of the other's creditors or where the consideration consists wholly of shares of the purchaser's stock which are promptly distributed to the seller's shareholders in conjunction with the seller's liquidation. In the present case the sole consideration given for Alad I's assets was cash in excess of \$ 207,000. Of this amount Alad I was paid \$ 70,000 when the assets were transferred and at the same time a promissory note was given to Alad I for almost \$ 114,000. Shortly before the dissolution of Alad I the note was assigned to the Hamblys, Alad I's principal stockholders, and thereafter the note was paid in full. The remainder of the consideration went for closing expenses or was paid to the Hamblys for consulting services and their agreement not to compete. There is no contention that this consideration was inadequate or that the cash and promissory note given to Alad I were not included in the assets available to meet claims of Alad I's creditors at the time of dissolution. Hence the acquisition of Alad I's assets was not in the nature of a merger or consolidation for purposes of the aforesaid rule.

Plaintiff contends that the rule's third stated ground for liability makes Alad II liable as a mere continuation of Alad I in view of Alad II's acquisition of all Alad I's operating assets, its use of those assets and of Alad I's former employees to manufacture the same line of products, and its holding itself out to customers and the public as a continuation of the same enterprise. However, California decisions holding that a corporation acquiring the assets of another corporation is the latter's mere continuation and therefore liable for its debts have imposed such liability only upon a showing of one or both of the following factual elements: (1) no adequate consideration was given for the predecessor corporation's assets and made available for meeting the claims of its unsecured creditors; (2) one or more persons were officers, directors, or stockholders of both corporations....

We therefore conclude that the general rule governing succession to liabilities does not require Alad II to respond to plaintiff's claim....

[However], we must decide whether the policies underlying strict tort liability for defective products call for a special exception to the rule that would otherwise insulate the present defendant from plaintiff's claim.

The purpose of the rule of strict tort liability "is to insure that the costs of injuries resulting from defective products are borne by the manufacturers that put such products on the market rather than by the injured persons who are powerless to protect themselves." However, the rule "does not rest on the analysis of the financial strength or bargaining power of the parties to the particular action. It rests, rather, on the proposition that 'The cost of an injury and the loss of time or health may be an overwhelming misfortune to the person injured, and a needless

one, for the risk of injury can be insured by the manufacturer and distributed among the public as a cost of doing business. (*Escola v. Coca Cola Bottling Co.*, 24 Cal.2d 453, 462 [150 P.2d 436] [concurring opinion]) Thus, “the paramount policy to be promoted by the rule is the protection of otherwise defenseless victims of manufacturing defects and the *spreading throughout society* of the cost of compensating them.” Justification for imposing strict liability upon a successor to a manufacturer under the circumstances here presented rests upon (1) the virtual destruction of the plaintiff’s remedies against the original manufacturer caused by the successor’s acquisition of the business, (2) the successor’s ability to assume the original manufacturer’s risk-spreading role, and (3) the fairness of requiring the successor to assume a responsibility for defective products that was a burden necessarily attached to the original manufacturer’s good will being enjoyed by the successor in the continued operation of the business.

We therefore conclude that a party which acquires a manufacturing business and continues the output of its line of products under the circumstances here presented assumes strict tort liability for defects in units of the same product line previously manufactured and distributed by the entity from which the business was acquired.

The judgment is reversed.

CASE QUESTIONS

1. What is the general rule regarding successor liability?
2. How does the *Ray* court deviate from this general rule?
3. What is the court’s rationale for this deviation?
4. What are some possible consequences for corporations considering expansion?

Constitutional Issues Surrounding Taxation of a Foreign Corporation

D. H. Holmes Co. Ltd. V. McNamara

486 U.S. 24; 108 S.Ct. 1619, 100 L. Ed. 2d 21 (1988)

Appellant D. H. Holmes Company, Ltd., is a Louisiana corporation with its principal place of business and registered office in New Orleans. Holmes owns and operates 13 department stores in various locations throughout Louisiana that employ about

5,000 workers. It has approximately 500,000 credit card customers and an estimated 1,000,000 other customers within the State.

In 1979–1981, Holmes contracted with several New York companies for the design and printing of merchandise catalogs. The catalogs were designed in New York, but were actually printed in Atlanta, Boston, and Oklahoma City. From these locations, 82% of the catalogs were directly mailed to residents of Louisiana; the remainder of the catalogs was mailed to customers in Alabama, Mississippi, and Florida, or was sent to Holmes for distribution at its flagship store on Canal Street in New Orleans. The catalogs were shipped free of charge to the addressee, and their entire cost (about \$ 2 million for the 3-year period), including mailing, was borne by Holmes. Holmes did not, however, pay any sales tax where the catalogs were designed or printed.

Although the merchandise catalogs were mailed to selected customers, they contained instructions to the postal carrier to leave them with the current resident if the addressee had moved, and to return undeliverable catalogs to Holmes' Canal Street store. Holmes freely concedes that the purpose of the catalogs was to promote sales at its stores and to instill name recognition in future buyers. The catalogs included inserts which could be used to order Holmes' products by mail.

The Louisiana Department of Revenue and Taxation, of which appellee is the current Secretary, conducted an audit of Holmes' tax returns for 1979–1981 and determined that it was liable for delinquent use taxes on the value of the catalogs. The Department of Revenue and Taxation assessed the use tax pursuant to La. Rev. Stat. Ann. §§ 47:302 and 47:321 (West 1970 and Supp. 1988), which are set forth in the margin. Together, §§ 47:302(A)(2) and 47:321(A)(2) impose a use tax of 3% on all tangible personal property used in Louisiana. "Use," as defined elsewhere in the statute, is the exercise of any right or power over tangible personal property incident to ownership, and includes consumption, distribution, and storage. The use tax is designed to compensate the State for sales tax that is lost when goods are purchased out-of-state and brought for use into Louisiana, and is calculated on the retail price the property would have brought when imported.

When Holmes refused to pay the use tax assessed against it, the State filed suit in Louisiana Civil District Court to collect the tax. [The lower courts held for the State.]...

The Commerce Clause of the Constitution, Art. I, § 8, cl. 3, provides that Congress shall have the power "to regulate Commerce with foreign Nations, and among the several States, and with the Indian Tribes." Even where Congress has not acted affirmatively to protect interstate commerce, the Clause prevents States from

discriminating against that commerce. The “distinction between the power of the State to shelter its people from menaces to their health or safety and from fraud, even when those dangers emanate from interstate commerce, and its lack of power to retard, burden or constrict the flow of such commerce for their economic advantage, is one deeply rooted in both our history and our law.” *H. P. Hood & Sons v. Du Mond*, 336 U.S. 525, 533, 93 L. Ed. 865, 69 S.Ct. 657 (1949).

One frequent source of conflict of this kind occurs when a State seeks to tax the sale or use of goods within its borders. This recurring dilemma is exemplified in what has come to be the leading case in the area. *Complete Auto Transit, Inc. v. Brady*, 430 U.S. 274, 51 L. Ed. 2d 326, 97 S.Ct. 1076 (1977). In *Complete Auto*, Mississippi imposed a tax on appellant’s business of in-state transportation of motor vehicles manufactured outside the State. We found that the State’s tax did not violate the Commerce Clause, because appellant’s activity had a substantial nexus with Mississippi, and the tax was fairly apportioned, did not discriminate against interstate commerce, and was fairly related to benefits provided by the State.

Complete Auto abandoned the abstract notion that interstate commerce “itself” cannot be taxed by the States. We recognized that, with certain restrictions, interstate commerce may be required to pay its fair share of state taxes. Accordingly, in the present case, it really makes little difference for Commerce Clause purposes whether Holmes’ catalogs “came to rest” in the mailboxes of its Louisiana customers or whether they were still considered in the stream of interstate commerce....

In the case before us, then, the application of Louisiana’s use tax to Holmes’ catalogs does not violate the Commerce Clause if the tax complies with the four prongs of *Complete Auto*. We have no doubt that the second and third elements of the test are satisfied. The Louisiana taxing scheme is fairly apportioned, for it provides a credit against its use tax for sales taxes that have been paid in other States. Holmes paid no sales tax for the catalogs where they were designed or printed; if it had, it would have been eligible for a credit against the use tax exacted. Similarly, Louisiana imposed its use tax only on the 82% of the catalogs distributed in-state; it did not attempt to tax that portion of the catalogs that went to out-of-state customers.

The Louisiana tax structure likewise does not discriminate against interstate commerce. The use tax is designed to compensate the State for revenue lost when residents purchase out-of-state goods for use within the State. It is equal to the sales tax applicable to the same tangible personal property purchased in-state; in fact, both taxes are set forth in the same sections of the Louisiana statutes.

Complete Auto requires that the tax be fairly related to benefits provided by the State, but that condition is also met here. Louisiana provides a number of services that facilitate Holmes' sale of merchandise within the State: It provides fire and police protection for Holmes' stores, runs mass transit and maintains public roads which benefit Holmes' customers, and supplies a number of other civic services from which Holmes profits. To be sure, many others in the State benefit from the same services; but that does not alter the fact that the use tax paid by Holmes, on catalogs designed to increase sales, is related to the advantages provided by the State which aid Holmes' business.

Finally, we believe that Holmes' distribution of its catalogs reflects a substantial nexus with Louisiana. To begin with, Holmes' contention that it lacked sufficient control over the catalogs' distribution in Louisiana to be subject to the use tax verges on the nonsensical. Holmes ordered and paid for the catalogs and supplied the list of customers to whom the catalogs were sent; any catalogs that could not be delivered were returned to it. Holmes admits that it initiated the distribution to improve its sales and name recognition among Louisiana residents. Holmes also has a significant presence in Louisiana, with 13 stores and over \$100 million in annual sales in the State. The distribution of catalogs to approximately 400,000 Louisiana customers was directly aimed at expanding and enhancing its Louisiana business. There is "nexus" aplenty here. [Judgment affirmed.]

CASE QUESTIONS

1. What is the main constitutional issue in this case?
2. What are the four prongs to test whether a tax violates the Constitution, as laid out in *Complete Auto*?
3. Does this case hold for the proposition that a state may levy any tax upon a foreign corporation?

47.5 Summary and Exercises

Summary

Beyond the normal operations of business, a corporation can expand in one of four ways: (1) purchase of assets, (2) merger, (3) consolidation, and (4) purchase of another corporation's stock.

A purchase of assets occurs when one corporation purchases some or all of the assets of another corporation. When assets are purchased, the purchasing corporation is not generally liable for the debts of the corporation whose assets were sold. There are several generally recognized exceptions, such as when the asset purchase is fraudulent or to avoid creditors. Some states have added additional exceptions, such as in cases involving products liability.

In a merger, the acquired company is absorbed into the acquiring company and goes out of business. The acquiring corporation assumes the other company's debts. Unless the articles of incorporation say otherwise, a majority of directors and shareholders of both corporations must approve the merger. There are two main types of merger: a cash merger and a noncash merger. A consolidation is virtually the same as a merger, except that the resulting entity is a new corporation.

A corporation may take over another company by purchasing a controlling interest of its stock, commonly referred to as a takeover. This is accomplished by appealing directly to the target company's shareholders. In the case of a large publicly held corporation, the appeal is known as a tender offer, which is not an offer but an invitation to shareholders to tender their stock at a stated price. A leveraged buyout involves using the target corporation's assets as security for a loan used to purchase the target.

A shareholder has the right to fair value for his stock if he dissents from a plan to merge, consolidate, or sell all or substantially all of the corporate assets, referred to as appraisal rights. If there is disagreement over the value, the shareholder has the right to a court appraisal. When one company acquires 90 percent of the stock of another, it may merge with the target through a short-form merger, which eliminates the requirement of consent of shareholders and the target company's board.

Certain federal regulations are implicated in corporate expansion, particularly the Williams Act. States may impose conditions on admission of a foreign corporation to do business of a purely local nature but not if its business is exclusively interstate in character, which would violate the Commerce Clause. Among the requirements are obtaining a certificate of authority from the secretary of state and maintaining a registered office with a registered agent. But certain activities do not constitute doing business, such as filing lawsuits and collecting debts, and may be carried on even if the corporation is not licensed to do business in a state. Under long-arm statutes, state courts have jurisdiction over foreign corporations as long as the corporations have minimum contacts in the state. States may also tax corporate activities as long as the tax does not unduly burden interstate commerce.

Dissolution is the legal termination of a corporation's existence, as distinguished from liquidation, the process of paying debts and distributing assets. A corporation may be dissolved by shareholders if they unanimously agree in writing, or by majority vote of the directors and shareholders. A corporation may also be dissolved involuntarily on one of five grounds, including failure to file an annual report or to pay taxes. Shareholders may sue for judicial liquidation on a showing that corporate assets are being wasted or directors or officers are acting illegally or fraudulently.

EXERCISES

1. Preston Corporation sold all of its assets to Adam Corporation in exchange for Adam stock. Preston then distributed the stock to its shareholders, without paying a debt of \$150,000 owed to a major supplier, Corey. Corey, upon discovery that Preston is now an empty shell, attempts to recover the debt from Adam. What is the result? Why?
2. Would the result in Exercise 1 be different if Adam and Preston had merged? Why?
3. Would the result in Exercise 1 be different if Gorey had a products-liability claim against Preston? Why? What measures might you suggest to Adam to prevent potential losses from such claims?
4. In Exercise 1, assuming that Preston and Adam had merged, what are the rights of Graham, a shareholder who opposed the merger? Explain the procedure for enforcing his rights.
5. A bus driver from Massachusetts was injured when his seat collapsed while he was driving his bus through Maine. He brought suit in Massachusetts against the Ohio corporation that manufactured the seat. The Ohio corporation did not have an office in Massachusetts but occasionally sent a sales representative there and delivered parts to the state. Assuming that process was served on the company at its Ohio office, would a Massachusetts court have jurisdiction over the Ohio corporation? Why?

SELF-TEST QUESTIONS

1. In a merger, the acquired company
 - a. goes out of existence
 - b. stays in existence
 - c. is consolidated into a new corporation
 - d. does none of the above

2. An offer by an acquiring company to buy shareholders' stock at a stipulated price is called
 - a. an appraisal
 - b. a short-form merger
 - c. a tender offer
 - d. none of the above

3. The legal termination of a corporation's existence is called
 - a. liquidation
 - b. bankruptcy
 - c. extinguishment
 - d. dissolution

4. The most important constitutional provision relating to a state's ability to tax foreign corporations is
 - a. the Commerce Clause
 - b. the First Amendment
 - c. the Due Process Clause
 - d. the Privileges and Immunities Clause

5. An act that is considered to be a corporation's "transacting business" in a state is
 - a. collecting debts
 - b. holding directors' meetings
 - c. filing lawsuits
 - d. none of the above

SELF-TEST ANSWERS

3. d
4. a
5. d

Chapter 48

Antitrust Law

LEARNING OBJECTIVES

After reading this chapter, you should understand the following:

1. The history and basic framework of antitrust laws on horizontal restraints of trade
2. The distinction between vertical restraints of trade and horizontal restraints of trade
3. The various exemptions from antitrust law that Congress has created
4. Why monopolies pose a threat to competitive markets, and what kinds of monopolies are proscribed by the Sherman Act and the Clayton Act

This chapter will describe the history and current status of federal laws to safeguard the US market from anticompetitive practices, especially those of very large companies that may have a **monopoly**¹. Companies that have a monopoly in any market segment have the potential to exercise **monopoly power**² in ways that are harmful to consumers and competitors. Economic theory assures us that for the most part, competition is good: that sound markets will offer buyers lots of choices and good information about products and services being sold and will present few barriers to entry for buyers and sellers. By encouraging more, rather than fewer, competitors in a given segment of the market, US antitrust law attempts to preserve consumer choice and to limit barriers to entry, yet it does allow some businesses to achieve considerable size and market share on the belief that size can create efficiencies and pass along the benefits to consumers.

1. A company has a monopoly where it has a large enough percentage of a given market segment to exercise monopoly power in a manner that would adversely affect competition.
2. The ability of a monopoly to dictate prices and other characteristics in a given market segment.

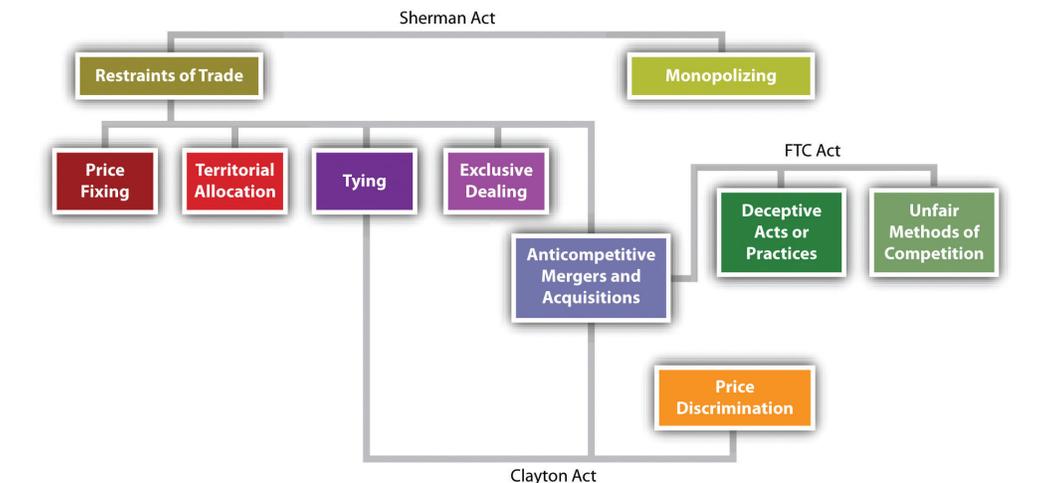

48.1 History and Basic Framework of Antitrust Laws in the United States

LEARNING OBJECTIVES

1. Know the history and basic framework of antitrust laws in the United States.
2. Understand how US antitrust laws may have international application.
3. Explain how US antitrust laws are enforced and what kinds of criminal and civil penalties may apply.

In this chapter, we take up the origins of the federal antitrust laws and the basic rules governing restraints of trade. Sherman Act, Section 1; Clayton Act, Section 3. We also look at concentrations of market power: monopoly and acquisitions and mergers. Sherman Act, Section 2; Clayton Act, Section 7. In [Chapter 49 "Unfair Trade Practices and the Federal Trade Commission"](#), we explore the law of deceptive acts and unfair trade practices, both as administered by the Federal Trade Commission (FTC) and as regulated at common law.

Figure 48.1 An Antitrust Schematic

The antitrust laws are aimed at maintaining competition as the driving force of the US economy. The very word *antitrust* implies opposition to the giant trusts that began to develop after the Civil War. Until then, the economy was largely local; manufacturers, distributors, and retailers were generally small. The Civil War demonstrated the utility of large-scale enterprise in meeting the military's ferocious production demands, and business owners were quick to understand the

advantage of size in attracting capital. For the first time, immense fortunes could be made in industry, and adventurous entrepreneurs were quick to do so in an age that lauded the acquisitive spirit.

The first great business combinations were the railroads. To avoid ruinous price wars, railroad owners made private agreements, known as “pools,” through which they divided markets and offered discounts to favored shippers who agreed to ship goods on certain lines. The pools discriminated against particular shippers and certain geographic regions, and public resentment grew.

Farmers felt the effects first and hardest, and they organized politically to express their opposition. In time, they persuaded many state legislatures to pass laws regulating railroads. In *Munn v. Illinois*, the Supreme Court rejected a constitutional attack on a state law regulating the transportation and warehousing of grain; the court declared that the “police powers” of the states permit the regulation of property put to public uses. *Munn v. Illinois*, 94 U.S. 113 (1877). But over time, many state railroad laws were struck down because they interfered with interstate commerce, which only Congress may regulate constitutionally. The consequence was federal legislation: the Interstate Commerce Act of 1887, establishing the first federal administrative agency, the Interstate Commerce Commission.

In the meantime, the railroads had discovered that their pools lacked enforcement power. Those who nominally agreed to be bound by the pooling arrangement could and often did cheat. The corporate form of business enterprise allowed for potentially immense accumulations of capital to be under the control of a small number of managers; but in the 1870s and 1880s, the corporation was not yet established as the dominant legal form of operation. To overcome these disadvantages, clever lawyers for John D. Rockefeller organized his Standard Oil of Ohio as a common-law *trust*. Trustees were given corporate stock certificates of various companies; by combining numerous corporations into the trust, the trustees could effectively manage and control an entire industry. Within a decade, the Cotton Trust, Lead Trust, Sugar Trust, and Whiskey Trust, along with oil, telephone, steel, and tobacco trusts, had become, or were in the process of becoming, monopolies.

Consumers howled in protest. The political parties got the message: In 1888, both Republicans and Democrats put an antitrust plank in their platforms. In 1889, the new president, Republican Benjamin Harrison, condemned monopolies as “dangerous conspiracies” and called for legislation to remedy the tendency of monopolies that would “crush out” competition.

The result was the Sherman Antitrust Act of 1890, sponsored by Senator John Sherman of Ohio. Its two key sections forbade combinations in restraint of trade and monopolizing. Senator Sherman and other sponsors declared that the act had roots in a common-law policy that frowned on monopolies. To an extent, it did, but it added something quite important for the future of business and the US economy: the power of the federal government to enforce a national policy against monopoly and restraints of trade. Nevertheless, passage of the Sherman Act did not end the public clamor, because fifteen years passed before a national administration began to enforce the act, when President Theodore Roosevelt—"the Trustbuster"—sent his attorney general after the Northern Securities Corporation, a transportation holding company.

During its seven years, the Roosevelt administration initiated fifty-four antitrust suits. The pace picked up under the Taft administration, which in only four years filed ninety antitrust suits. But the pressure for further reform did not abate, especially when the Supreme Court, in the *Standard Oil* case of 1911, *Standard Oil Co. of New Jersey v. United States*, 221 U.S. 1 (1911). declared that the Sherman Act forbids only "unreasonable" restraints of trade. A congressional investigation of US Steel Corporation brought to light several practices that had gone unrestrained by the Sherman Act. It also sparked an important debate, one that has echoes in our own time, about the nature of national economic policy: should it enforce competition or regulate business in a partnership kind of arrangement?

Big business was firmly on the side of regulation, but Congress opted for the policy followed waveringly to the present: competition enforced by government, not a partnership of government and industry, must be the engine of the economy. Accordingly, in 1914, at the urging of President Woodrow Wilson, Congress enacted two more antitrust laws, the Clayton Act and the Federal Trade Commission Act. The Clayton Act outlawed price discrimination, exclusive dealing and tying contracts, acquisition of a company's competitors, and interlocking directorates. The FTC Act outlawed "unfair methods" of competition, established the FTC as an independent administrative agency, and gave it power to enforce the antitrust laws alongside the Department of Justice.

The Sherman, Clayton, and FTC Acts remain the basic texts of antitrust law. Over the years, many states have enacted antitrust laws as well; these laws govern intrastate competition and are largely modeled on the federal laws. The various state antitrust laws are beyond the scope of this textbook.

Two additional federal statutes were adopted during the next third of a century as amendments to the Clayton Act. Enacted in the midst of the Depression in 1936, the Robinson-Patman Act prohibits various forms of price discrimination. The Celler-

Kefauver Act, strengthening the Clayton Act's prohibition against the acquisition of competing companies, was enacted in 1950 in the hopes of stemming what seemed to be a tide of corporate mergers and acquisitions. We will examine these laws in turn.

The Sherman Act

Section 1 of the Sherman Act declares, "Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several states, or with foreign nations, is declared to be illegal." This is sweeping language. What it embraces seems to depend entirely on the meaning of the words "restraint of trade or commerce." Whatever they might mean, *every* such restraint is declared unlawful. But in fact, as we will see, the proposition cannot be stated quite so categorically, for in 1911 the Supreme Court limited the reach of this section to *unreasonable* restraints of trade.

What does "restraint of trade" mean? The Sherman Act's drafters based the act on a common-law policy against monopolies and other infringements on competition. But common law regarding restraints of trade had been developed in only rudimentary form, and the words have come to mean whatever the courts say they mean. In short, the antitrust laws, and the Sherman Act in particular, authorize the courts to create a federal "common law" of competition.

Section 2 of the Sherman Act prohibits monopolization: "Every person who shall monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several states, or with foreign nations, shall be deemed guilty of a misdemeanor." In 1976, Congress upped the ante: violations of the Sherman Act are now felonies. Unlike Section 1, Section 2 does not require a combination between two or more people. A single company acting on its own can be guilty of monopolizing or attempting to monopolize.

The Clayton Act

The Clayton Act was enacted in 1914 to plug what many in Congress saw as loopholes in the Sherman Act. Passage of the Clayton Act was closely linked to that of the FTC Act. Unlike the Sherman Act, the Clayton Act is not a criminal statute; it merely declares certain defined practices as unlawful and leaves it to the government or to private litigants to seek to enjoin those practices. But unlike the FTC Act, the Clayton Act does spell out four undesirable practices. Violations of the Sherman Act require an *actual* adverse impact on competition, whereas violations of the Clayton Act require merely a *probable* adverse impact. Thus the enforcement of

the Clayton Act involves a prediction that the defendant must rebut in order to avoid an adverse judgment.

The four types of proscribed behavior are these:

1. Discrimination in prices charged different purchasers of the same commodities.
2. Conditioning the sale of one commodity on the purchaser's refraining from using or dealing in commodities of the seller's competitors. Clayton Act, Section 3.
3. Acquiring the stock of a competing corporation. Clayton Act, Section 7. Because the original language did not prohibit various types of acquisitions and mergers that had grown up with modern corporate law and finance, Congress amended this section in 1950 (the Celler-Kefauver Act) to extend its prohibition to a wide variety of acquisitions and mergers.
4. Membership by a single person on more than one corporate board of directors if the companies are or were competitors. Clayton Act, Section 8.

The Federal Trade Commission Act

Like the Clayton Act, the FTC Act is a civil statute, involving no criminal penalties. Unlike the Clayton Act, its prohibitions are broadly worded. Its centerpiece is Section 5, which forbids "unfair methods of competition in commerce, and unfair or deceptive acts or practices in commerce." We examine Section 5 in [Chapter 49 "Unfair Trade Practices and the Federal Trade Commission"](#).

Enforcement of Antitrust Laws

General Enforcement

There are four different means of enforcing the antitrust laws.

First, the US Department of Justice may bring civil actions to enjoin violations of any section of the Sherman and Clayton Acts and may institute criminal prosecutions for violations of the Sherman Act. Both civil and criminal actions are filed by the offices of the US attorney in the appropriate federal district, under the direction of the US attorney general. In practice, the Justice Department's guidance comes through its Antitrust Division in Washington, headed by an assistant attorney general. With several hundred lawyers and dozens of economists and other professionals, the Antitrust Division annually files fewer than one hundred civil and criminal actions combined. On average, far more criminal cases are filed

than civil cases. In 2006, thirty-four criminal cases and twelve civil cases were filed; in 2007, forty criminal cases and six civil cases; in 2008, fifty-four criminal cases and nineteen civil cases; and in 2009, seventy-two criminal cases and nine civil cases.

The number of cases can be less important than the complexity and size of a particular case. For example, *U.S. v. American Telephone & Telegraph* and *U.S. v. IBM* were both immensely complicated, took years to dispose of, and consumed tens of thousands of hours of staff time and tens of millions of dollars in government and defense costs.

Second, the FTC hears cases under the Administrative Procedure Act, as described in [Chapter 5 "Administrative Law"](#). The commission's decisions may be appealed to the US courts of appeals. The FTC may also promulgate "trade regulation rules," which define fair practices in specific industries. The agency has some five hundred lawyers in Washington and a dozen field offices, but only about half the lawyers are directly involved in antitrust enforcement. The government's case against Microsoft was, like the cases against AT&T and IBM, a very complex case that took a large share of time and resources from both the government and Microsoft.

Third, in the Antitrust Improvements Act of 1976, Congress authorized state attorneys general to file antitrust suits in federal court for damages on behalf of their citizens; such a suit is known as a *parens patriae* claim. Any citizen of the state who might have been injured by the defendant's actions may opt out of the suit and bring his or her own private action. The states have long had the authority to file antitrust suits seeking injunctive relief on behalf of their citizens.

Fourth, private individuals and companies may file suits for damages or injunctions if they have been directly injured by a violation of the Sherman or Clayton Act. Private individuals or companies may not sue under the FTC Act, no matter how unfair or deceptive the behavior complained of; only the FTC may do so. In the 1980s, more than 1,500 private antitrust suits were filed in the federal courts each year, compared with fewer than 100 suits filed by the Department of Justice. More recently, from 2006 to 2008, private antitrust suits numbered above 1,000 but dropped significantly, to 770, in 2009. The pace was even slower for the first half of 2010. Meanwhile, the Department of Justice filed 40 or fewer criminal antitrust cases from 2006 to 2008; that pace has quickened under the Obama administration (72 cases in 2009).

Enforcement in International Trade

The Sherman and Clayton Acts apply when a company's activities affect US commerce. This means that these laws apply to US companies that agree to fix the

price of goods to be shipped abroad and to the acts of a US subsidiary of a foreign company. It also means that non-US citizens and business entities can be prosecuted for violations of antitrust laws, even if they never set foot in the United States, as long as their anticompetitive activities are aimed at the US market. For example, in November of 2010, a federal grand jury in San Francisco returned an indictment against three former executives in Taiwan. They had conspired to fix prices on color display tubes (CDTs), a type of cathode-ray tube used in computer monitors and other specialized applications.

The indictment charged Seung-Kyu “Simon” Lee, Yeong-Ug “Albert” Yang, and Jae-Sik “J. S.” Kim with conspiring with unnamed coconspirators to suppress and eliminate competition by fixing prices, reducing output, and allocating market shares of CDTs to be sold in the United States and elsewhere. Lee, Yang, and Kim allegedly participated in the conspiracy during various time periods between at least as early as January 2000 and as late as March 2006. The conspirators met in Taiwan, Korea, Malaysia, China, and elsewhere, but not in the United States. They allegedly met for the purpose of exchanging CDT sales, production, market share, and pricing information for the purpose of implementing, monitoring, and enforcing their agreements. Because the intended effects of their actions were to be felt in the United States, the US antitrust laws could apply.

Criminal Sanctions

Until 1976, violations of the Sherman Act were misdemeanors. The maximum fine was \$50,000 for each count on which the defendant was convicted (only \$5,000 until 1955), and the maximum jail sentence was one year. But in the CDT case just described, each of the three conspirators was charged with violating the Sherman Act, which carries a maximum penalty of ten years in prison and a \$1 million fine for individuals. The maximum fine may be increased to twice the gain derived from the crime or twice the loss suffered by the victims if either of those amounts is greater than the statutory maximum fine of \$1 million.

Forfeitures

One provision in the Sherman Act, not much used, permits the government to seize any property in transit in either interstate or foreign commerce if it was the subject of a contract, combination, or conspiracy outlawed under Section 1.

Injunctions and Consent Decrees

The Justice Department may enforce violations of the Sherman and Clayton Acts by seeking injunctions in federal district court. The injunction can be a complex set of

instructions, listing in some detail the practices that a defendant is to avoid and even the way in which it will be required to conduct its business thereafter. Once an injunction is issued and affirmed on appeal, or the time for appeal has passed, it confers continuing jurisdiction on the court to hear complaints by those who say the defendant is violating it. In a few instances, the injunction or a consent decree is in effect the basic “statute” by which an industry operates. A 1956 decree against American Telephone & Telegraph Company (AT&T) kept the company out of the computer business for a quarter-century, until the government’s monopoly suit against AT&T was settled and a new decree issued in 1983. The federal courts also have the power to break up a company convicted of monopolizing or to order **divestiture**³ when the violation consists of unlawful mergers and acquisitions.

The FTC may issue cease and desist orders against practices condemned under Section 5 of the FTC Act—which includes violations of the Sherman and Clayton Acts—and these orders may be appealed to the courts.

Rather than litigate a case fully, defendants may agree to **consent decrees**⁴, in which, without admitting guilt, they agree not to carry on the activity complained of. Violations of injunctions, cease and desist orders, and consent decrees subject companies to a fine of \$10,000 a day for every day the violation continues. Companies frequently enter into consent decrees—and not just because they wish to avoid the expense and trouble of trial. Section 5 of the Clayton Act says that whenever an antitrust case brought by the federal government under either the Clayton Act or the Sherman Act goes to final judgment, the judgment can be used, in a private suit in which the same facts are at issue, as prima facie evidence that the violation was committed. This is a powerful provision, because it means that a private plaintiff need prove only that the violation in fact injured him. He need not prove that the defendant committed the acts that amount to antitrust violations. Since this provision makes it relatively easy for private plaintiffs to prevail in subsequent suits, defendants in government suits have a strong inducement to enter into consent decrees, because these are not considered judgments. Likewise, a guilty plea in a criminal case gives the plaintiff in a later private civil suit prima facie evidence of the defendant’s liability. However, a plea of *nolo contendere* will avoid this result. Section 5 has been the spur for a considerable proportion of all private antitrust suits. For example, the government’s price-fixing case against the electric equipment industry that sent certain executives of General Electric to jail in the 1950s led to more than 2,200 private suits.

3. A remedy, occasionally used, to break up a firm into smaller, independent units, where the firm has exercised its monopoly power in ways that harm competition. For example, the breakup of AT&T was a divestiture.

4. A judicial order entered into by defendants in lieu of litigating, in which they admit their guilt but agree to not carry on certain activities complained of. Failure to comply with the terms will result in fines. Similar to an injunction or a cease and desist order.

Treble Damages

The crux of the private suit is its unique damage award: any successful plaintiff is entitled to collect *three times* the amount of damages actually suffered—treble damages, as they are known—and to be paid the cost of his attorneys. These fees

can be huge: defendants have had to pay out millions of dollars for attorneys' fees alone in single cases. The theory of **treble damages**⁵ is that they will serve as an incentive to private parties to police industry for antitrust violations, thus saving the federal government the immense expense of maintaining an adequate staff for that job.

Class Actions

One of the most important developments in antitrust law during the 1970s was the rise of the class action. Under liberalized rules of federal procedure, a single plaintiff may sue on behalf of the entire class of people injured by an antitrust violation. This device makes it possible to bring numerous suits that would otherwise never have been contemplated. A single individual who has paid one dollar more than he would have been charged in a competitive market obviously will not file suit. But if there are ten million consumers like him, then in a class action he may seek—on behalf of the entire class, of course—\$30 million (\$10 million trebled), plus attorneys' fees. Critics charge that the class action is a device that in the antitrust field benefits only the lawyers, who have a large incentive to find a few plaintiffs willing to have their names used in a suit run entirely by the lawyers. Nevertheless, it is true that the class action permits antitrust violations to be rooted out that could not otherwise be attacked privately. During the 1970s, suits against drug companies and the wallboard manufacturing industry were among the many large-scale antitrust class actions.

Interpreting the Laws

Vagueness

The antitrust laws, and especially Section 1 of the Sherman Act, are exceedingly vague. As Chief Justice Charles Evans Hughes once put it, "The Sherman Act, as a charter of freedom, has a generality and adaptability comparable to that found to be desirable in constitutional provisions." *Appalachian Coals v. United States*, 288 U.S. 344, 359 (1933). Without the sweeping but vague language, the antitrust laws might quickly have become outdated. As written, they permit courts to adapt the law to changing circumstances. But the vagueness can lead to uncertainty and uneven applications of the law.

The "Rule of Reason"

Section 1 of the Sherman Act says that "every" restraint of trade is illegal. But is a literal interpretation really possible? No, for as Justice Louis Brandeis noted in 1918 in one of the early price-fixing cases, "Every agreement concerning trade, every regulation of trade restrains. To bind, to restrain, is of their very essence." *Chicago Board of Trade v. United States*, 246 U.S. 231 (1918). When a manufacturing company

5. For private lawsuits, successful plaintiffs may collect three times the amount of damages actually suffered.

contracts to buy raw materials, trade in those goods is restrained: no one else will have access to them. But to interpret the Sherman Act to include such a contract is an absurdity. Common sense says that “every” cannot really mean *every* restraint.

Throughout this century, the courts have been occupied with this question. With the hindsight of thousands of cases, the broad outlines of the answer can be confidently stated. Beginning with *Standard Oil Co. of New Jersey v. United States*, the Supreme Court has held that only *unreasonable* restraints of trade are unlawful. *Standard Oil Co. of New Jersey v. United States*, 221 U.S. 1 (1911).

Often called the **rule of reason**⁶, the interpretation of Section 1 made in *Standard Oil* itself has two possible meanings, and they have been confused over the years. The rule of reason could mean that a restraint is permissible only if it is *ancillary* to a legitimate business purpose. The standard example is a covenant not to compete. Suppose you decide to purchase a well-regarded bookstore in town. The proprietor is well liked and has developed loyal patrons. He says he is going to retire in another state. You realize that if he changed his mind and stayed in town to open another bookstore, your new business would suffer considerably. So you negotiate as a condition of sale that he agrees not to open another bookstore within ten miles of the town for the next three years. Since your intent is not to prevent him from going into business—as it would be if he had agreed never to open a bookstore anywhere—but merely to protect the value of your purchase, this restraint of trade is ancillary to your business purpose. The rule of reason holds that this is not an unlawful restraint of trade.

Another interpretation of the rule of reason is even broader. It holds that agreements that might directly impair competition are not unlawful unless the particular impairment itself is unreasonable. For example, several retailers of computer software are distraught at a burgeoning price war that will possibly reduce prices so low that they will not be able to offer their customers proper service. To avert this “cutthroat competition,” the retailers agree to set a price floor—a floor that, under the circumstances, is reasonable. Chief Justice Edward White, who wrote the *Standard Oil* opinion, might have found that such an agreement was reasonable because, in view of its purposes, it was not *unduly* restrictive and did not unduly restrain trade.

But this latter view is not the law. Almost any business agreement could enhance the market power of one or more parties to the agreement, and thus restrain trade. “The true test of legality,” Justice Brandeis wrote in 1918 in *Chicago Board of Trade*, “is whether the restraint imposed is such as merely regulates and perhaps thereby promotes competition or whether it is such as may suppress or even destroy competition.” *Chicago Board of Trade v. United States*, 246 U.S. 231 (1918). Section 1

6. A judicial test balancing the positive effects of an agreement against its potentially anticompetitive effects.

violations analyzed under the rule of reason will look at several factors, including the purpose of the agreement, the parties' power to implement the agreement to achieve that purpose, and the effect or potential effect of the agreement on competition. If the parties could have used less restrictive means to achieve their purpose, the Court would more likely have seen the agreement as unreasonable. *Chicago Board of Trade v. United States*, 246 U.S. 231 (1918).

“Per Se” Rules

Not every act or commercial practice needs to be weighed by the rule of reason. Some acts have come to be regarded as intrinsically or necessarily impairing competition, so that no further analysis need be made if the plaintiff can prove that the defendant carried them out or attempted or conspired to do so. Price-fixing is an example. Price-fixing is said to be **per se illegal**⁷ under the Sherman Act—that is, unlawful on its face. The question in a case alleging **price-fixing**⁸ is not whether the price was reasonable or whether it impaired or enhanced competition, but whether the price in fact was fixed by two sellers in a market segment. Only that question can be at issue.

Under the Clayton Act

The rule of reason and the per se rules apply to the Sherman Act. The Clayton Act has a different standard. It speaks in terms of acts that may tend substantially to lessen competition. The courts must construe these terms too, and in the sections that follow, we will see how they have done so.

KEY TAKEAWAY

The preservation of competition is an important part of public policy in the United States. The various antitrust laws were crafted in response to clear abuses by companies that sought to claim easier profits by avoiding competition through the exercise of monopoly power, price-fixing, or territorial agreements. The Department of Justice and the Federal Trade Commission have substantial criminal and civil penalties to wield in their enforcement of the various antitrust laws.

7. Unlawful on its face. Applies to acts that by their very nature are regarded as impairing competition. For example, price-fixing is said to be per se illegal under the Sherman Act.

8. Agreements, usually among competitors, that directly set prices, exchange price information, control output, or regulate competitive benefits.

EXERCISES

1. Why did industries become so much larger after the US Civil War, and how did this lead to abusive practices? What role did politics play in creating US laws fostering competition?
2. Go to the Department of Justice website and see how many antitrust enforcement actions have taken place since 2008.
3. Consider whether the US government should break up the biggest US banks. Why or why not? If the United States does so, and other nations have very large government banks, or have very large private banks, can US banks remain competitive?

48.2 Horizontal Restraints of Trade

LEARNING OBJECTIVES

1. Know why competitors are the likely actors in horizontal restraints of trade.
2. Explain what it means when the Supreme Court declares a certain practice to be a per se violation of the antitrust laws.
3. Describe at least three ways in which otherwise competing parties can fix prices.
4. Recognize why dividing territories is a horizontal restraint of trade.

Classification of antitrust cases and principles is not self-evident because so many cases turn on complex factual circumstances. One convenient way to group the cases is to look to the relationship of those who have agreed or conspired. If the parties are competitors—whether competing manufacturers, wholesalers, retailers, or others—there could be a **horizontal restraint of trade**⁹. If the parties are at different levels of the distribution chain—for example, manufacturer and retailer—their agreement is said to involve a **vertical restraint of trade**¹⁰. These categories are not airtight: a retailer might get competing manufacturers to agree not to supply a competitor of the retailer. This is a vertical restraint with horizontal effects.

Price-Fixing

Direct Price-Fixing Agreements

Price-fixing agreements are per se violations of Section 1 of the Sherman Act. The per se rule was announced explicitly in *United States v. Trenton Potteries*. *United States v. Trenton Potteries*, 273 U.S. 392 (1927). In that case, twenty individuals and twenty-three corporations, makers and distributors of 82 percent of the vitreous pottery bathroom fixtures used in the United States, were found guilty of having agreed to establish and adhere to a price schedule. On appeal, they did not dispute that they had combined to fix prices. They did argue that the jury should have been permitted to decide whether what they had done was reasonable. The Supreme Court disagreed, holding that any fixing of prices is a clear violation of the Sherman Act.

Twenty-four years later, the Court underscored this categorical per se rule in *Kiefer-Stewart Co. v. Joseph E. Seagram & Sons*. *Kiefer-Stewart Co. v. Joseph E. Seagram & Sons*, 340

9. An agreement that in some way restrains competition between rival firms competing in the same market.

10. Any restraint on trade created by agreements between firms at different levels in the manufacturing and distribution process.

U.S. 211 (1951). The defendants were distillers who had agreed to sell liquor only to those wholesalers who agreed to resell it for no more than a *maximum* price set by the distillers. The defendants argued that setting maximum prices did not violate the Sherman Act because such prices promoted rather than restrained competition. Again, the Supreme Court disagreed: “[S]uch agreements, no less than those to fix minimum prices, cripple the freedom of traders and thereby restrain their ability to sell in accordance with their own judgment.”

The per se prohibition against price-fixing is not limited to agreements that directly fix prices. Hundreds of schemes that have the effect of controlling prices have been tested in court and found wanting, some because they were per se restraints of trade, others because their effects were unreasonable—that is, because they impaired competition—under the circumstances. In the following sections, we examine some of these cases briefly.

Exchanging Price Information

Knowledge of competitors’ prices can be an effective means of controlling prices throughout an industry. Members of a trade association of hardwood manufacturers adopted a voluntary “open competition” plan. About 90 percent of the members adhered to the plan. They accounted for one-third of the production of hardwood in the United States. Under the plan, members reported daily on sales and deliveries and monthly on production, inventory, and prices. The association, in turn, sent out price, sales, and production reports to the participating members. Additionally, members met from time to time to discuss these matters, and they were exhorted to refrain from excessive production in order to keep prices at profitable levels. In *American Column and Lumber Company v. United States*, the Supreme Court condemned this plan as a per se violation of Section 1 of the Sherman Act. *American Column and Lumber Company v. United States*, 257 U.S. 377 (1921).

Not every exchange of information is necessarily a violation, however. A few years after *American Column and Lumber*, in *Maple Flooring Manufacturers’ Association v. United States*, the Court refused to find a violation in the practice of an association of twenty-two hardwood-floor manufacturers in circulating a list to all members of average costs and freight rates, as well as summaries of sales, prices, and inventories. *Maple Flooring Manufacturers’ Association v. United States*, 268 U.S. 563 (1925). The apparent difference between *American Column and Lumber* and *Maple Flooring* was that in the latter, the members did not discuss prices at their meetings, and their rules permitted them to charge individually whatever they wished. It is not unlawful, therefore, for members of an industry to meet to discuss common problems or to develop statistical information about the industry through a common association, as long as the discussions do not border on price or on

techniques of controlling prices, such as by restricting output. Usually, it takes evidence of collusion to condemn the exchange of prices or other data.

Controlling Output

Competitors also fix prices by controlling an industry's output. For example, competitors could agree to limit the amount of goods each company makes or by otherwise limiting the amount that comes to market. This latter technique was condemned in *United States v. Socony-Vacuum Oil Co.* *United States v. Socony-Vacuum Oil Co.*, 310 U.S. 150 (1940). To prevent oil prices from dropping, dominant oil companies agreed to and did purchase from independent refiners surplus gasoline that the market was forcing them to sell at distress prices. By buying up this gasoline, the large companies created a price floor for their own product. This conduct, said the Court, is a per se violation.

Regulating Competitive Methods

Many companies may wish to eliminate certain business practices—for example, offering discounts or premiums such as trading stamps on purchase of goods—but are afraid or powerless to do so unless their competitors also stop. The temptation is strong to agree with one's competitors to jointly end these practices; in most instances, doing so is unlawful when the result would be to affect the price at which the product is sold. But not every agreed-on restraint or standard is necessarily unlawful. Companies might decide that it would serve their customers' interests as well as their own if the product could be standardized, so that certain names or marks signify a grade or quality of product. When no restriction is placed on what grades are to be sold or at what prices, no restraint of trade has occurred.

In *National Society of Professional Engineers v. United States*, [Section 48.8.1 "Horizontal Restraints of Trade"](#), a canon of ethics of the National Society of Professional Engineers prohibited members from making competitive bids. This type of prohibition has been common in the codes of ethics of all kinds of occupational groups that claim professional status. These groups justify the ban by citing public benefits, though not necessarily price benefits, that flow from observance of the "ethical" rule.

Nonprice Restraints of Trade Allocating Territories

Suppose four ice-cream manufacturers decided one day that their efforts to compete in all four corners of the city were costly and destructive. Why not simply strike a bargain: each will sell ice cream to retail shops in only one quadrant of the

city. This is not a pricing arrangement; each is free to sell at whatever price it desires. But it is a restraint of trade, for in carving up the territory in which each may sell, they make it impossible for grocery stores to obtain a choice among all four manufacturers. The point becomes obvious when the same kind of agreement is put on a national scale: suppose Ford and Toyota agreed that Ford would not sell its cars in New York and Toyota would not sell Toyotas in California.

Most cases of **territorial allocation**¹¹ are examples of vertical restraints in which manufacturers and distributors strike a bargain. But some cases deal with horizontal allocation of territories. In *United States v. Sealy*, the defendant company licensed manufacturers to use the Sealy trademark on beds and mattresses and restricted the territories in which the manufacturers could sell. *United States v. Sealy*, 388 U.S. 350 (1967). The evidence showed that the licensees, some thirty small bedding manufacturers, actually owned the licensor and were using the arrangement to allocate the territory. It was held to be unlawful per se.

Exclusionary Agreements

We said earlier that it might be permissible for manufacturers, through a trade association, to establish certain quality standards for the convenience of the public. As long as these standards are not exclusionary and do not reflect any control over price, they might not inhibit competition. The UL mark on electrical and other equipment—a mark to show that the product conforms to specifications of the private Underwriters Laboratory—is an example. But suppose that certain widget producers establish the Scientific Safety Council, a membership association whose staff ostensibly assigns quality labels, marked SSC, to those manufacturers who meet certain engineering and safety standards. In fact, however, the manufacturers are using the widespread public acceptance of the SSC mark to keep the market to themselves by refusing to let nonmembers join and by refusing to let nonmembers use the SSC mark, even if their widgets conform to the announced standards. This subterfuge would be a violation of Section 1 of the Sherman Act.

Boycotts

Agreements by competitors to boycott (refuse to deal with) those who engage in undesirable practices are unlawful. In an early case, a retailers' trade association circulated a list of wholesale distributors who sold directly to the public. The intent was to warn member retailers not to buy from those wholesalers. Although each member was free to act however it wanted, the Court saw in this blacklist a plan to promote a boycott. *Eastern State Lumber Dealers' Association v. United States*, 234 U.S. 600 (1914).

11. Horizontal allocations of territory are per se illegal under Section 1 of the Sherman Act. But producers may wish to assign dealers an exclusive area within which to sell their products. For these vertical allocations of territory, the rule of reason is followed.

This policy remains true even if the objective of the boycott is to prevent unethical or even illegal activities. Members of a garment manufacturers association agreed with a textile manufacturers association not to use any textiles that had been “pirated” from designs made by members of the textile association. The garment manufacturers also pledged, among other things, not to sell their goods to any retailer who did not refrain from using pirated designs. The argument that this was the only way to prevent unscrupulous design pirates from operating fell on deaf judicial ears; the Supreme Court held the policy unlawful under Section 5 of the Federal Trade Commission (FTC) Act, the case having been brought by the *FTC. Fashion Originators’ Guild of America v. Federal Trade Commission*, 312 U.S. 457 (1941).

Proof of Agreement

It is vital for business managers to realize that once an agreement or a conspiracy is shown to have existed, they or their companies can be convicted of violating the law even if neither agreement nor conspiracy led to concrete results. Suppose the sales manager of Extremis Widget Company sits down over lunch with the sales manager of De Minimis Widget Company and says, “Why are we working so hard? I have a plan that will let us both relax.” He explains that their companies can put into operation a data exchange program that will stabilize prices. The other sales manager does not immediately commit himself, but after lunch, he goes to the stationery store and purchases a notebook in which to record the information he will get from a telephone test of the plan. That action is probably enough to establish a conspiracy to fix prices, and the government could file criminal charges at that point. Discussion with your competitors of prices, discounts, production quotas, rebates, bid rigging, trade-in allowances, commission rates, salaries, advertising, and the like is exceedingly dangerous. It can lead to criminal conduct and potential jail terms.

Proof of Harm

It is unnecessary to show that the public is substantially harmed by a restraint of trade as long as the plaintiff can show that the restraint injured him. In *Klor’s, Inc. v. Broadway-Hale Stores*, the plaintiff was a small retail appliance shop in San Francisco. *Klor’s, Inc. v. Broadway-Hale Stores*, 359 U.S. 207 (1959). Next door to the shop was a competing appliance store, one of a chain of stores run by Broadway-Hale. Klor’s alleged that Broadway-Hale, using its “monopolistic buying power,” persuaded ten national manufacturers and their distributors, including GE, RCA, Admiral, Zenith, and Emerson, to cease selling to Klor’s or to sell at discriminatory prices. The defendants did not dispute the allegations. Instead, they moved for summary judgment on the ground that even if true, the allegations did not give rise to a legal claim because the public could not conceivably have been injured as a

result of their concerted refusal to deal. As evidence, they cited the uncontradicted fact that within blocks of Klor's, hundreds of household appliance retailers stood ready to sell the public the very brands Klor's was unable to stock as a result of the boycott. The district court granted the motion and dismissed Klor's complaint. The court of appeals affirmed. But the Supreme Court reversed, saying as follows:

This combination takes from Klor's its freedom to buy appliances in an open competitive market and drives it out of business as a dealer in the defendants' products. It deprives the manufacturers and distributors of their freedom to sell to Klor's....It interferes with the natural flow of interstate commerce. It clearly has, by its "nature" and "character," a "monopolistic tendency." As such it is not to be tolerated merely because the victim is just one merchant whose business is so small that *his* destruction makes little difference to the economy. Monopoly can surely thrive by the elimination of such small businessmen, one at a time, as it can by driving them out in large groups.

We have been exploring the Sherman Act as it applies to horizontal restraints of trade—that is, restraints of trade between competitors. We now turn our attention to vertical restraints—those that are the result of agreements or conspiracies between different levels of the chain of distribution, such as manufacturer and wholesaler or wholesaler and retailer.

KEY TAKEAWAY

Competitors can engage in horizontal restraints of trade by various means of price-fixing. They can also engage in horizontal price restraints of trade by allocating territories or by joint boycotts (refusals to deal). These restraints need not be substantial in order to be actionable as a violation of US antitrust laws.

EXERCISES

1. Suppose that BMW of North America tells its dealers that the prestigious M100 cannot be sold for more than \$230,000. Explain why this could be a violation of antitrust law.
2. Suppose that JPMorgan Chase, the Bank of England, and the Bank of China agree that they will not compete for investment services, and that JPMorgan Chase is given an exclusive right to North and South America, Bank of England is given access rights to Europe, and Bank of China is given exclusive rights to Asia, India, and Australia. Is there a violation of US antitrust law here? If not, why not? If so, what act does it violate, and how?
3. “It’s a free country.” Why are agreements by competitors to boycott (to refuse to deal with) certain others considered a problem that needs to be dealt with by law?

48.3 Vertical Restraints of Trade

LEARNING OBJECTIVES

1. Distinguish vertical restraints of trade from horizontal restraints of trade.
2. Describe exclusive dealing, and explain why exclusive dealing is anticompetitive in any way.
3. Explain how tying one product's sale to that of another could be anticompetitive.

We have been exploring the Sherman Act as it applies to horizontal restraints of trade, restraints that are created between competitors. We now turn to vertical restraints—those that result from agreements between different levels of the chain of distribution, such as manufacturer and wholesaler or wholesaler and retailer.

Resale Price Maintenance

Is it permissible for manufacturers to require distributors or retailers to sell products at a set price? Generally, the answer is no, but the strict per se rule against any kind of **resale price maintenance**¹² has been somewhat relaxed.

But why would a manufacturer want to fix the price at which the retailer sells its goods? There are several possibilities. For instance, sustained, long-term sales of many branded appliances and other goods depend on reliable servicing by the retailer. Unless the retailer can get a fair price, it will not provide good service. Anything less than good service will ultimately hurt the brand name and lead to fewer sales. Another possible argument for resale price maintenance is that unless all retailers must abide by a certain price, some goods will not be stocked at all. For instance, the argument runs, bookstores will not stock slow-selling books if they cannot be guaranteed a good price on best sellers. Stores free to discount best sellers will not have the profit margin to stock other types of books. To guarantee sales of best sellers to bookstores carrying many lines of books, it is necessary to put a floor under the price of books. Still another argument is that brand-name goods are inviting targets for loss-leader sales; if one merchant drastically discounts Extremis Widgets, other merchants may not want to carry the line, and the manufacturer may experience unwanted fluctuations in sales.

12. An agreement between a manufacturer and a retailer in which the manufacturer specifies what the retail prices of its products must be.

None of these reasons has completely appeased the critics of price-fixing, including the most important critics—the US federal judges. As long ago as 1910, in *Dr. Miles Medical Co. v. John D. Park & Sons Co.*, the Supreme Court declared vertical price-fixing (what has come to be called resale price maintenance) unlawful under the Sherman Act. Dr. Miles Medical Company required wholesalers that bought its proprietary medicines to sign an agreement in which they agreed not to sell below a certain price and not to sell to retailers who did not have a “retail agency contract” with Dr. Miles. The retail agency contract similarly contained a price floor. Dr. Miles argued that since it was free to make or not make the medicines, it should be free to dictate the prices at which purchasers could sell them. The Court said that Dr. Miles’s arrangement with more than four hundred jobbers (wholesale distributors) and twenty-five thousand retailers was no different than if the wholesalers or retailers agreed among themselves to fix the price. Dr. Miles “having sold its product at prices satisfactory to itself, the public is entitled to whatever advantage may be derived from a competition in the subsequent traffic.” *Dr. Miles Medical Co. v. John D. Park & Sons Co.*, 220 U.S. 373 (1910).

In *Dr. Miles*, the company’s restrictions impermissibly limited the freedom of choice of other drug distributors and retailers. Society was therefore deprived of various benefits it would have received from unrestricted distribution of the drugs. But academics and some judges argue that most vertical price restraints do not limit competition among competitors, and manufacturers retain the power to restrict output, and the power to raise prices. Arguably, vertical price restraints help to ensure economic efficiencies and maximize consumer welfare. Some of the same arguments noted in this section—such as the need to ensure good service for retail items—continue to be made in support of a rule of reason.

The Supreme Court has not accepted these arguments with regard to minimum prices but has increased the plaintiff’s burden of proof by requiring evidence of an agreement on specific price levels. Where a discounter is terminated by a manufacturer, it will probably not be told exactly why, and very few manufacturers would be leaving evidence in writing that insists on dealers agreeing to minimum prices.

Moreover, in *State Oil Company v. Khan*, the Supreme Court held that “vertical maximum price fixing, like the majority of commercial arrangements subject to the antitrust laws, should be evaluated under the rule of reason.” *State Oil Company v. Khan*, 522 U.S. 3 (1997). Vertical maximum price-fixing is not legal per se but should be analyzed under a rule of reason “to identify the situations in which it amounts to anti-competitive conduct.” The *Khan* case is at the end of this chapter, in [Section 48.8.2 "Vertical Maximum Price Fixing and the Rule of Reason"](#).

Exclusive Dealing and Tying

We move now to a nonprice vertical form of restraint. Suppose you went to the grocery store intent on purchasing a bag of potato chips to satisfy a late-night craving. Imagine your surprise—and indignation—if the store manager waved a paper in your face and said, “I’ll sell you this bag only on the condition that you sign this agreement to buy all of your potato chips in the next five years from me.” Or if he said, “I’ll sell only if you promise never to buy potato chips from my rival across the street.” This is an **exclusive dealing agreement**¹³, and if the effect may be to lessen competition substantially, it is unlawful under Section 3 of the Clayton Act. It also may be unlawful under Section 1 of the Sherman Act and Section 5 of the Federal Trade Commission (FTC) Act. Another form of exclusive dealing, known as a **tying contract**¹⁴, is also prohibited under Section 3 of the Clayton Act and under the other statutes. A tying contract results when you are forced to take a certain product in order to get the product you are really after: “I’ll sell you the potato chips you crave, but only if you purchase five pounds of my Grade B liver.”

Section 3 of the Clayton Act declares it unlawful for any person engaged in commerce

to lease or make a sale or contract for sale of goods, wares, merchandise, machinery, supplies or other commodities, whether patented or unpatented, for use, consumption or resale...or fix a price charged therefore, or discount from or rebate upon, such price, **on the condition...that the lessee or purchaser...shall not use or deal in the goods, wares, merchandise, machinery, supplies, or other commodities of a competitor or competitors of the lessor or seller**, where the effect of such lease, sale, or contract for sale or such condition...may be to substantially lessen competition or tend to erect a monopoly in any line of commerce. (emphasis added)

Under Section 3, the potato chip example is not unlawful, for you would not have much of an effect on competition nor tend to create a monopoly if you signed with your corner grocery. But the Clayton Act has serious ramifications for a producer who might wish to require a dealer to sell only its products—such as a fast-food franchisee that can carry cooking ingredients bought only from the franchisor (**Chapter 49 "Unfair Trade Practices and the Federal Trade Commission"**), an appliance store that can carry only one national brand of refrigerators, or an ice-cream parlor that must buy ice-cream supplies from the supplier of its machinery.

13. A contract—as between buyer and seller—where the parties agree only to deal with each other.

14. A form of exclusive dealing, prohibited under Section 3 of the Clayton Act, forcing you to take an additional product in order to get the product you really want.

A situation like the one in the ice-cream example came under review in *International Salt Co. v. United States*. *International Salt Co. v. United States*, 332 U.S. 392 (1947). International Salt was the largest US producer of salt for industrial uses. It held

patents on two machines necessary for using salt products; one injected salt into foodstuffs during canning. It leased most of these machines to canners, and the lease required the lessees to purchase from International Salt all salt to be used in the machines. The case was decided on summary judgment; the company did not have the chance to prove the reasonableness of its conduct. The Court held that it was not entitled to. International Salt's valid patent on the machines did not confer on it the right to restrain trade in unpatented salt. Justice Tom Clark said that doing so was a violation of both Section 1 of the Sherman Act and Section 3 of the Clayton Act:

Not only is price-fixing unreasonable, *per se*, but also it is unreasonable, *per se*, to foreclose competitors from any substantial market. The volume of business affected by these contracts cannot be said to be insignificant or insubstantial, and the tendency of the arrangement to accomplishment of monopoly seems obvious. Under the law, agreements are forbidden which "tend to create a monopoly," and it is immaterial that the tendency is a creeping one rather than one that proceeds at full gallop; nor does the law await arrival at the goal before condemning the direction of the movement.

In a case involving the sale of newspaper advertising space (to purchase space in the morning paper, an advertiser would have to take space in the company's afternoon paper), the government lost because it could not use the narrower standards of Section 3 and could not prove that the defendant had monopoly power over the sale of advertising space. (Another afternoon newspaper carried advertisements, and its sales did not suffer.) In the course of his opinion, Justice Clark set forth the rule for determining legality of tying arrangements under both the Clayton and Sherman Acts:

When the seller enjoys a monopolistic position in the market for the "tying" product [*i.e.*, the product that the buyer wants] or if a substantial volume of commerce in the "tied" product [*i.e.*, the product that the buyer does not want] is restrained, a tying arrangement violates the narrower standards expressed in section 3 of the Clayton Act because from either factor the requisite potential lessening of competition is inferred. And because for even a lawful monopolist it is "unreasonable *per se* to foreclose competitors from any substantial market" a tying arrangement is banned by section 1 of the Sherman Act wherever both conditions are met. *Times-Picayune Publishing Co. v. United States*, 345 U.S. 594 (1953).

This rule was broadened in 1958 in a Sherman Act case involving the Northern Pacific Railroad Company, which had received forty million acres of land from Congress in the late nineteenth century in return for building a rail line from the Great Lakes to the Pacific. For decades, Northern Pacific leased or sold the land on

condition that the buyer or lessee use Northern Pacific to ship any crops grown on the land or goods manufactured there. To no avail, the railroad argued that unlike International Salt's machines, the railroad's "tying product" (its land) was not patented, and that the land users were free to ship on other lines if they could find cheaper rates. Wrote Justice Hugo Black,

[A] tying arrangement may be defined as an agreement by a party to sell one product but only on the condition that the buyer also purchases a different (or tied) product, or at least agrees that he will not purchase that product from any other supplier. Where such conditions are successfully exacted competition on the merits with respect to the tied product is inevitably curbed....They deny competitors free access to the market for the tied product, not because the party imposing the tying requirements has a better product or a lower price but because of his power or leverage in another market. At the same time buyers are forced to forego their free choice between competing products....**They are unreasonable in and of themselves whenever a party has sufficient economic power with respect to the tying product to appreciably restrain free competition in the market for the tied product and a "not insubstantial" amount of interstate commerce is affected.** In this case...the undisputed facts established beyond any genuine question that the defendant possessed substantial economic power by virtue of its extensive landholdings which it used as leverage to induce large numbers of purchasers and lessees to give it preference.*Northern Pacific Railway Co. v. United States*, 356 U.S. 1 (1958). (emphasis in original)

Taken together, the tying cases suggest that anyone with certain market power over a commodity or other valuable item (such as a trademark) runs a serious risk of violating the Clayton Act or Sherman Act or both if he insists that the buyer must also take some other product as part of the bargain. Microsoft learned about the perils of "tying" in a case brought by the United States, nineteen individual states, and the District of Columbia. The allegation was that Microsoft had tied together various software programs on its operating system, Microsoft Windows. Windows came prepackaged with Microsoft's Internet Explorer (IE), its Windows Media Player, Outlook Express, and Microsoft Office. The United States claimed that Microsoft had bundled (or "tied") IE to sales of Windows 98, making IE difficult to remove from Windows 98 by not putting it on the Remove Programs list.

The government alleged that Microsoft had designed Windows 98 to work "unpleasantly" with Netscape Navigator and that this constituted an illegal tying of Windows 98 and IE. Microsoft argued that its web browser and mail reader were just parts of the operating system, included with other personal computer operating systems, and that the integration of the products was technologically justified. The United States Court of Appeals for the District of Columbia Circuit rejected Microsoft's claim that IE was simply one facet of its operating system, but the court

held that the tie between Windows and IE should be analyzed deferentially under the rule of reason. The case settled before reaching final judicial resolution. (See *United States v. Microsoft*. *United States v. Microsoft*, 253 F.3d 34 (D.C. Cir. 2001).)

Nonprice Vertical Restraints: Allocating Territory and Customers

With horizontal restraints of trade, we have already seen that it is a per se violation of Section 1 of the Sherman Act for competitors to allocate customers and territory. But a vertical allocation of customers or territory is only illegal if competition to the markets as a whole is adversely affected. The key here is distinguishing intrabrand competition from interbrand competition. Suppose that Samsung electronics has relationships with ten different retailers in Gotham City. If Samsung decides to limit its contractual relationships to only six retailers, the market for consumer electronics in Gotham City is still competitive in terms of interbrand competition. Intrabrand competition, however, is now limited. It could be that consumers will pay slightly higher prices for Samsung electronics with only six different retailers selling those products in Gotham City. That is, intrabrand competition is lowered, but interbrand competition remains strong.

Notice that it is unlikely that the six remaining retailers will raise their prices substantially, since there is still strong interbrand competition. If the retailer only deals in Samsung electronics, it is unlikely to raise prices that much, given the strength of interbrand competition.

If the retailer carries Samsung and other brands, it will also not want to raise prices too much, for then its inventory of Samsung electronics will pile up, while its inventory of other electronics products will move off the shelves.

Why would Samsung want to limit its retail outlets in Gotham City at all? It may be that Samsung has decided that by firming up its dealer network, it can enhance service, offer a wider range of products at each of the remaining retailers, ensure improved technical and service support, increase a sense of commitment among the remaining retail outlets, or other good business reasons. Where the retailer deals in other electronic consumer brands as well, making sure that well-trained sales and service support is available for Samsung products can promote interbrand competition in Gotham City. Thus vertical allocation of retailers within the territory is not a per se violation of the Sherman Act. It is instead a rule of reason violation, or the law will intervene only if Samsung's activities have an anticompetitive effect on the market as a whole. Notice here that the only likely objections to the new allocation would come from those dealers who were contractually terminated and who are then effectively restricted from selling Samsung electronics.

There are other potentially legitimate territorial restrictions, and limits on what kind of customer the retailer can sell to will prevent a dealer or distributor from selling outside a certain territory or to a certain class of customers. Samsung may reduce its outlets in Iowa from four to two, and it may also impose limits on those retail outlets from marketing beyond certain areas in and near Iowa.

Suppose that a Monsanto representative selling various kinds of fertilizers and pesticides was permitted to sell only to individual farmers and not to co-ops or retail distributors, or was limited to the state of Iowa. The Supreme Court has held that such vertical territorial or customer searches are not per se violations of Section 1 of the Sherman Act, as the situations often increase “interbrand competition.” Thus the rule of reason will apply to vertical allocation of customers and territory.

Nonprice Vertical Restraints: Exclusive Dealing Agreements

Often, a distributor or retailer agrees with the manufacturer or supplier not to carry the products of any other supplier. This is not in itself (per se) illegal under Section 1 of the Sherman Act or Section 3 of the Clayton Act. Only if these **exclusive dealing contracts** have an anticompetitive effect will there be an antitrust violation. Ideally, in a competitive market, there are no significant barriers to entry. In the real world, however, various deals are made that can and do restrict entry. Suppose that on his farm in Greeley, Colorado, Richard Tucker keeps goats, and he creates a fine, handcrafted goat cheese for the markets in Denver, Fort Collins, and Boulder, Colorado, and Cheyenne, Wyoming. In these markets, if Safeway, Whole Foods, Albertsons, and King Soopers already have suppliers, and the suppliers have gained exclusive dealing agreements, Tucker will be effectively barred from the market.

Suppose that Billy Goat Cheese is a nationally distributed brand of goat cheese and has created exclusive dealing arrangements with the four food chains in the four cities. Tucker could sue Billy Goat for violating antitrust laws if he finds out about the arrangements. But the courts will not assume a per se violation has taken place. Instead, the courts will look at the number of other distributors available, the portion of the market foreclosed by the exclusive dealing arrangements, the ease with which new distributors could enter the market, the possibility that Tucker could distribute the product himself, and legitimate business reasons that led the distributors to accept exclusive dealing contracts from Billy Goat Cheese.

KEY TAKEAWAY

Vertical restraints of trade can be related to price, can be in the form of tying arrangements, and can be in the form of allocating customers and territories. Vertical restraints can also come in the form of exclusive dealing agreements.

EXERCISES

1. Explain how a seller with a monopoly in one product and tying the sale of that product to a new product that has no such monopoly is in any way hurting competition. How “free” is the buyer to choose a product different from the seller’s?
2. If your company wants to maintain its image as a high-end product provider, is it legal to create a floor for your product’s prices? If so, under what circumstances?

48.4 Price Discrimination: The Robinson-Patman Act

LEARNING OBJECTIVES

1. Understand why Congress legislated against price-cutting by large companies.
2. Recognize why price discrimination is not per se illegal.
3. Identify and explain the defenses to a Robinson-Patman price discrimination charge.

If the relatively simple and straightforward language of the Sherman Act can provide litigants and courts with interpretive headaches, the law against price discrimination—the Robinson-Patman Act—can strike the student with a crippling migraine. Technically, Section 2 of the Clayton Act, the Robinson-Patman Act, has been verbally abused almost since its enactment in 1936. It has been called the “Typhoid Mary of Antitrust,” a “grotesque manifestation of the scissors and paste-pot method” of draftsmanship. Critics carp at more than its language; many have asserted over the years that the act is anticompetitive because it prevents many firms from lowering their prices to attract more customers.

Despite this rhetoric, the Robinson-Patman Act has withstood numerous attempts to modify or repeal it, and it can come into play in many everyday situations. Although in recent years the Justice Department has declined to enforce it, leaving government enforcement efforts to the Federal Trade Commission (FTC), *private* plaintiffs are actively seeking treble damages in numerous cases. So whether it makes economic sense or not, the act is a living reality for marketers. This section introduces certain problems that lurk in deciding how to price goods and how to respond to competitors’ prices.

The Clayton Act’s original Section 2, enacted in 1914, was aimed at the price-cutting practice of the large trusts, which would reduce the price of products below cost where necessary in a particular location to wipe out smaller competitors who could not long sustain such losses. But the original Clayton Act exempted from its terms any “discrimination in price...on account of differences in the quantity of the commodity sold.” This was a gaping loophole that made it exceedingly difficult to prove a case of price discrimination.

Not until the Depression in the 1930s did sufficient cries of alarm over price discrimination force Congress to act. The alarm was centered on the practices of

large grocery chains. Their immense buying power was used as a lever to pry out price discounts from food processors and wholesalers. Unable to extract similar price concessions, the small mom-and-pop grocery stores found that they could not offer the retail customer the lower food prices set by the chains. The small shops began to fail. In 1936, Congress strengthened Section 2 by enacting the Robinson-Patman Act. Although prompted by concern about how large buyers could use their purchasing power, the act in fact places most of its restrictions on the pricing decisions of sellers.

The Statutory Framework

The heart of the act is Section 2(a), which reads in pertinent part as follows: “[I]t shall be unlawful for any person engaged in commerce...to discriminate in price between different purchasers of commodities of like grade and quality...where the effect of such discrimination may be substantially to lessen competition or tend to create a monopoly in any line of commerce, or to injure, destroy or prevent competition with any person who either grants or knowingly receives the benefit of such discrimination, or with customers of either of them.”

This section provides certain defenses to a charge of price discrimination. For example, differentials in price are permissible whenever they “make only due allowances for differences in the cost of manufacture, sale, or delivery resulting from the differing methods or quantities in which such commodities are to such purchasers sold or delivered.” This section also permits sellers to change prices in response to changing marketing conditions or the marketability of the goods—for example, if perishable goods begin to deteriorate, the seller may drop the price in order to move the goods quickly.

Section 2(b) provides the major defense to price discrimination: any price is lawful if made in good faith to meet competition.

Discrimination by the Seller

Preliminary Matters

Simultaneous Sales

To be discriminatory, the different prices must have been charged in sales made at the same time or reasonably close in time. What constitutes a reasonably close time depends on the industry and the circumstances of the marketplace. The time span for dairy sales would be considerably shorter than that for sales of mainframe computers, given the nature of the product, the frequency of sales, the unit cost, and the volatility of the markets.

Identity of Purchaser

Another preliminary issue is the identity of the actual purchaser. A supplier who deals through a dummy wholesaler might be charged with price discrimination even though on paper only one sale appears to have been made. Under the “indirect purchaser” doctrine, a seller who deals with two or more retail customers but passes their orders on to a single wholesaler and sells the total quantity to the wholesaler in one transaction, can be held to have violated the act. The retailers are treated as indirect purchasers of the supplier.

Sales of Commodities

The act applies only to *sales of commodities*. A lease, a rental, or a license to use a product does not constitute a sale; hence price differentials under one of those arrangements cannot be unlawful under Robinson-Patman. Likewise, since the act applies only to commodities—tangible things—the courts have held that it does not apply to the sale of intangibles, such as rights to license or use patents, shares in a mutual fund, newspaper or television advertising, or title insurance.

Goods of Like Grade and Quality

Only those sales involving goods of “like grade and quality” can be tested under the act for discriminatory pricing. What do these terms mean? The leading case is *FTC v. Borden Co.*, in which the Supreme Court ruled that trademarks and labels do not, for Robinson-Patman purposes, distinguish products that are otherwise the same. *FTC v. Borden Co.*, 383 U.S. 637 (1966). Grade and quality must be determined “by the characteristics of the product itself.” When the products are physically or chemically identical, they are of like grade and quality, regardless of how imaginative marketing executives attempt to distinguish them. But physical differences that affect marketability can serve to denote products as being of different grade and quality, even if the differences are slight and do not affect the seller’s cost in manufacturing or marketing.

Competitive Injury

To violate the Robinson-Patman Act, the seller’s price discrimination must have an anticompetitive effect. The usual Clayton Act standard for measuring injury applies to Robinson-Patman violations—that is, a violation occurs when the effect may be substantially to lessen competition or tend to create a monopoly in any line of commerce. But because the Robinson-Patman Act has a more specific test of competitive injury, the general standard is rarely cited.

The more specific test measures the impact on particular persons affected. Section 2(a) says that it is unlawful to discriminate in price where the effect is “to injure, destroy, or prevent competition with any person who grants or knowingly receives the benefit of such discrimination or to customers of either of them.” The effect—injury, destruction, or prevention of competition—is measured against three types of those suffering it: (1) competitors of the seller or supplier (i.e., competitors of the person who “grants” the price discrimination), (2) competitors of the buyer (i.e., competitors of the buyer who “knowingly receives the benefit” of the price differential), and (3) customers of either of the two types of competitors. As we will see, the third category presents many difficulties.

For purposes of our discussion, assume the following scenario: Ace Brothers Widget Company manufactures the usual sizes and styles of American domestic widgets. It competes primarily with National Widget Corporation, although several smaller companies make widgets in various parts of the country. Ace Brothers is the largest manufacturer and sells throughout the United States. National sells primarily in the western states. The industry has several forms of distribution. Many retailers buy directly from Ace and National, but several regional and national wholesalers also operate, including Widget Jobbers, Ltd. and Widget Pushers, LLC. The retailers in any particular city compete directly against each other to sell to the general public. Jobbers and Pushers are in direct competition. Jobbers also sells directly to the public, so that it is in direct competition with retailers as well as Widget Pushers. As everyone knows, widgets are extremely price sensitive, being virtually identical in physical appearance and form.

Primary-Line Injury

Now consider the situation in California, Oregon, and Wisconsin. The competing manufacturers, Ace Brothers and National Widgets, both sell to wholesalers in California and Oregon, but only Ace has a sales arm in Wisconsin. Seeing an opportunity, Ace drops its prices to wholesalers in California and Oregon and raises them in Wisconsin, putting National at a competitive disadvantage. This situation, illustrated in [Figure 48.2 "Primary-Line Injury"](#), is an example of **primary-line injury**¹⁵—the injury is done directly to a competitor of the company that differentiates its prices. This is price discrimination, and it is prohibited under Section 2(a).

15. Price discrimination under the Robinson-Patman Act that directly injures a competitor, in violation of Section 2(a).

Most forms of primary-line injury have a geographical basis, but they need not. Suppose National sells exclusively to Jobbers in northern California, and Ace Brothers sells both to Jobbers and several other wholesalers. If Ace cuts its prices to Jobbers while charging higher prices to the other wholesalers, the effect is also primary-line injury to National. Jobbers will obviously want to buy more from Ace at lower prices, and National's reduced business is therefore a direct injury. If Ace intends to drive National out of business, this violation of Section 2(a) could also be an attempt to monopolize in violation of Section 2 of the Sherman Act.

Figure 48.2 Primary-Line Injury

Secondary-Line Injury

Next, we consider injury done to competing buyers. Suppose that Ace Brothers favors Jobbers—or that Jobbers, a powerful and giant wholesaler, induces Ace to act favorably by threatening not to carry Ace's line of widgets otherwise. Although Ace continues to supply both Jobbers and Widget Pushers, it cuts its prices to Jobbers. As a result, Jobbers can charge its retail customers lower prices than can Pushers, so that Pushers's business begins to slack off. This is **secondary-line injury**¹⁶ at the buyer's level. Jobbers and Pushers are in direct competition, and by impairing Pushers's ability to compete, the requisite injury has been committed. This situation is illustrated in Figure 48.3 "Secondary-Line Injury".

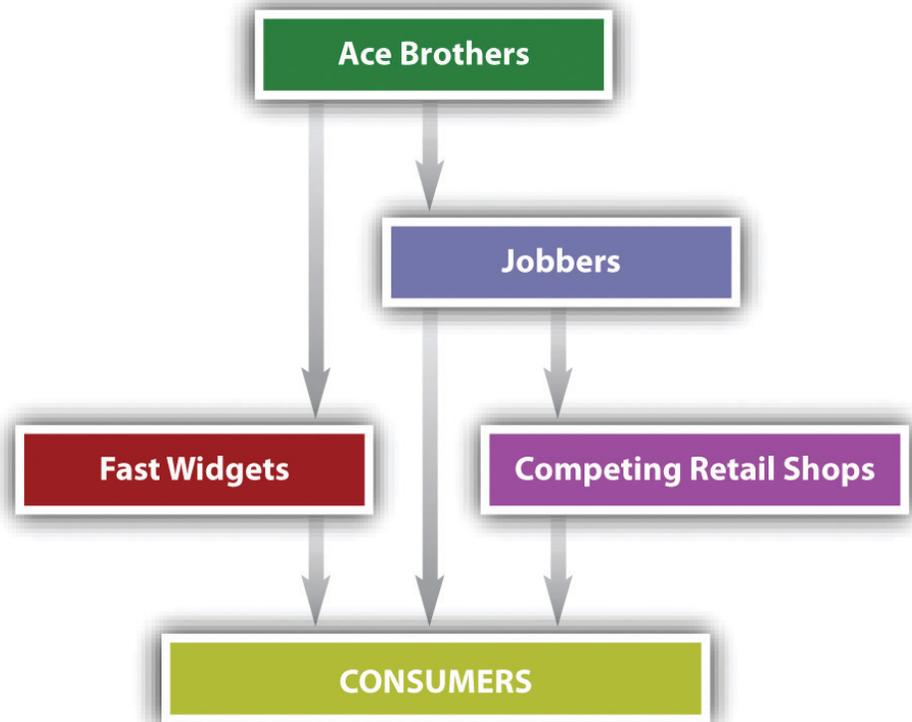

Variations on this secondary-line injury are possible. Assume Ace Brothers sells directly to Fast Widgets, a retail shop, and also to Jobbers. Jobbers sells to retail shops that compete with Fast Widgets and also directly to consumers. The situation is illustrated in Figure 48.4 "Variation on Secondary-Line Injury".

Figure 48.3 Secondary-Line Injury

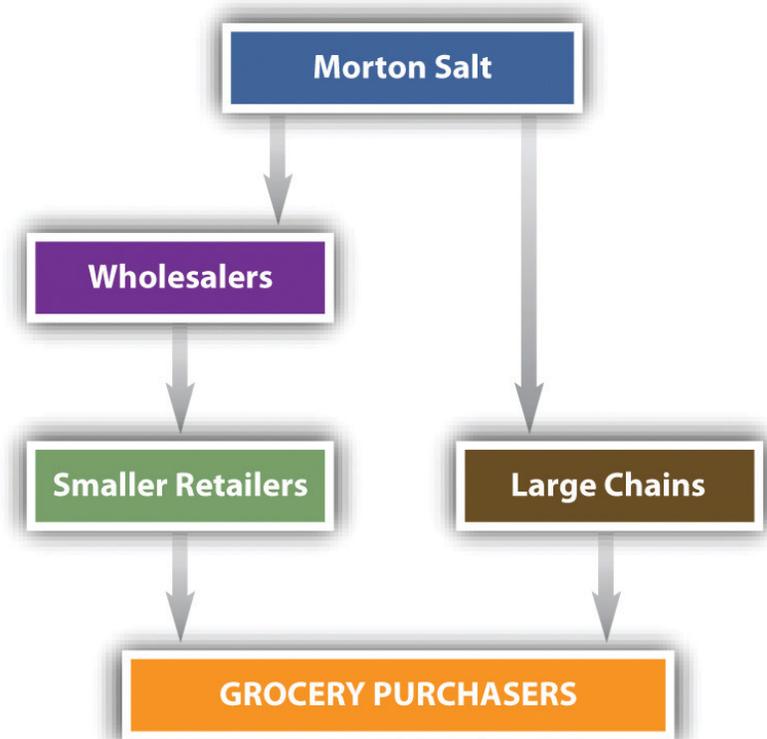

16. Price discrimination under the Robinson-Patman act that injures a competitor of a buyer, in violation of Section 2(a).

Figure 48.4 Variation on Secondary-Line Injury

If Ace favors Jobbers by cutting its prices, discriminating against Fast Widgets, the transaction is unlawful, even though Jobbers and Fast Widgets do not compete for sales to other retailers. Their competition for the business of ultimate consumers is sufficient to establish the illegality of the discrimination. A variation on this situation was at issue in the first important case to test Section 2(a) as it affects buyers. Morton Salt sold to both wholesalers and retailers, offering quantity discounts. Its pricing policy was structured to give large buyers great savings, computed on a yearly total, not on shipments made at any one time. Only five retail chains could take advantage of the higher discounts, and as a result, these chains could sell salt to grocery shoppers at a price below that at which the chains' retail competitors could buy it from their wholesalers. See [Figure 48.5 "Variation: Morton Salt Co."](#) for a schematic illustration. In this case, *FTC v. Morton Salt Co.*, the Supreme Court for the first time declared that the impact of the discrimination does not have to be actual; it is enough if there is a "reasonable possibility" of competitive injury. *FTC v. Morton Salt Co.*, 334 U.S. 37 (1948).

Figure 48.5 Variation: Morton Salt Co.

In order to make out a case of secondary-line injury, it is necessary to show that the buyers purchasing at different prices are in fact competitors. Suppose that Ace Brothers sells to Fast Widgets, the retailer, and also to Boron Enterprises, a manufacturer that incorporates widgets in most of its products. Boron does not compete against Fast Widgets, and therefore Ace Brothers may charge different prices to Boron and Fast without fearing Robinson-Patman repercussions. Figure 48.6 "Variation: Boron-Fast Schematic" shows the Boron-Fast schematic.

Third-Line Injury

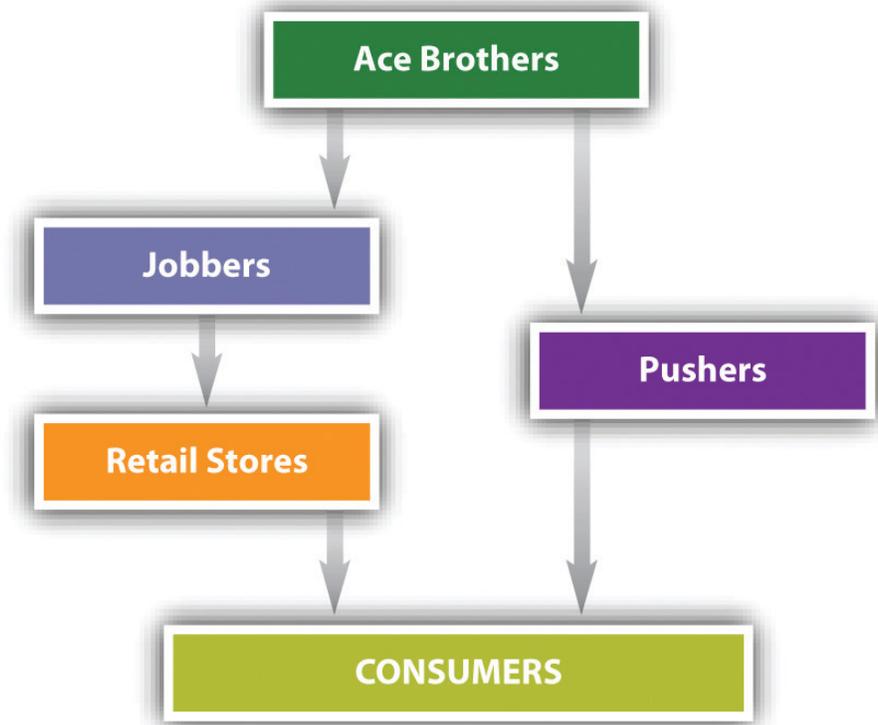

Second-line injury to buyers does not exhaust the possibilities. Robinson-Patman also works against so-called third-line or tertiary-line injury. At stake here is injury another rung down the chain of distribution. Ace Brothers sells to Pushers, which processes unfinished widgets in its own factory and sells them in turn directly to retail customers. Ace also sells to Jobbers, a wholesaler without processing facilities. Jobbers sells to retail shops that can process the goods and sell directly

Figure 48.6 Variation: Boron-Fast Schematic

to consumers, thus competing with Pushers for the retail business. This distribution chain is shown schematically in Figure 48.7 "Third-Line Injury".

Figure 48.7 *Third-Line Injury*

If Ace's price differs between Pushers and Jobbers so that Jobbers is able to sell at a lower price to the ultimate consumers than Pushers, a Robinson-Patman violation has occurred.

Fourth-Line Injury

In a complex economy, the distribution chain can go on and on. So far, we have examined discrimination on the level of competing supplier-sellers, on the level of competing customers of the supplier-seller, and on the level of competing customers of customers of the supplier-seller. Does the vigilant spotlight of Robinson-Patman penetrate below this level? The Supreme Court has said yes. In *Perkins v. Standard Oil Co.*, the Court said that "customer" in Section 2(a) means any person who distributes the supplier-seller's product, regardless of how many intermediaries are involved in getting the product to him. *Perkins v. Standard Oil Co.*, 395 U.S. 642 (1969).

Seller's Defenses

Price discrimination is not per se unlawful. The Robinson-Patman Act allows the seller two general defenses: (1) cost justification and (2) meeting competition. If the seller can demonstrate that sales to one particular buyer are cheaper than sales to others, a price differential is permitted if it is based entirely on the cost differences. For example, if one buyer is willing to have the goods packed in cheaper containers or larger crates that save money, that savings can be passed along to the buyer. Similarly, a buyer who takes over a warehousing function formerly undertaken by the seller is entitled to have the cost saving reflected in the selling price. Suppose the buyer orders its entire requirements for the year from the manufacturer, a quantity many times greater than that taken by any other customer. This large order permits the manufacturer to make the goods at a considerably reduced unit cost. May the manufacturer pass those savings along to the quantity buyer? It may, as long as it does not pass along the entire savings but only that attributable to the particular buyer, for other buyers add to its total production run and thus contribute to the final unit production cost. The marketing manager should be aware that the courts strictly construe cost-justification claims, and few companies have succeeded with this defense.

Meeting Competition

Lowering a price to meet competition is a complete defense to a charge of price discrimination. Assume Ace Brothers is selling widgets to retailers in Indiana and Kentucky at \$100 per dozen. National Widgets suddenly enters the Kentucky market and, because it has lower manufacturing costs than Ace, sells widgets to the four Kentucky widget retailers at \$85 per dozen. Ace may lower its price to that amount in Kentucky without lowering its Indiana price. However, if National's price violated the Robinson-Patman Act and Ace knew or should have known that it did, Ace may not reduce its price.

The defense of meeting competition has certain limitations. For example, the seller may not use this defense as an excuse to charge different customers a price differential over the long run. Moreover, if National's lower prices result from quantity orders, Ace may reduce its prices only for like quantities. Ace may not reduce its price for lesser quantities if National charges more for smaller orders. And although Ace may meet National's price to a given customer, Ace may not legally charge less.

Section 2(c) prohibits payment of commissions by one party in a transaction to the opposite party (or to the opposite party's agent) in a sale of goods unless services are actually rendered for them. Suppose the buyer's broker warehouses the goods. May the seller pass along this cost to the broker in the form of a rebate? Isn't that

“services rendered”? Although it might seem so, the courts have said no, because they refuse to concede that a buyer’s broker or agent can perform services for the seller. Because Section 2(c) of the Robinson-Patman Act stands on its own, the plaintiff need prove only that a single payment was made. Further proof of competitive impact is unnecessary. Hence Section 2(c) cases are relatively easy to win once the fact of a brokerage commission is uncovered.

Allowances for Merchandising and Other Services

Sections 2(d) and 2(e) of the Robinson-Patman Act prohibit sellers from granting discriminatory allowances for merchandising and from performing other services for buyers on a discriminatory basis. These sections are necessary because price alone is far from the only way to offer discounts to favored buyers. Allowances and services covered by these sections include advertising allowances, floor and window displays, warehousing, return privileges, and special packaging.

KEY TAKEAWAY

Under the Robinson-Patman Act, it is illegal to charge different prices to different purchasers if the items are the same and the price discrimination lessens competition. It is legal, however, to charge a lower price to a specific buyer if the cost of serving that buyer is lower or if the seller is simply “meeting competition.”

EXERCISES

1. Nikon sells its cameras to retailers at 5 percent less in the state of California than in Nevada or Arizona. Without knowing more, can you say that this is illegal?
2. Tysons Foods sells its chicken wings to GFS and other very large distributors at a price per wing that is 10 percent less than it sells to most grocery store chains. The difference is attributable to transportation costs, since GFS and others accept shipments in very large containers, which cost less to deliver than smaller containers. Is the price differential legal?
3. Your best customer, who has high volume with your company, asks you for a volume discount. Actually, he demands this, rather than just asking. Under what circumstances, if any, can you grant this request without violating antitrust laws?

48.5 Exemptions

LEARNING OBJECTIVE

1. Know and describe the various exemptions from US antitrust law.

Regulated Industries

Congress has subjected several industries to oversight by specific regulatory agencies. These include banking, securities and commodities exchanges, communications, transportation, and fuel and energy. The question often arises whether companies within those industries are immune to antitrust attack. No simple answer can be given. As a general rule, activities that fall directly within the authority of the regulatory agency are immune. The agency is said to have exclusive jurisdiction over the conduct—for example, the rate structure of the national stock exchanges, which are supervised by the Securities and Exchange Commission. But determining whether a particular case falls within a specific power of an agency is still up to the courts, and judges tend to read the antitrust laws broadly and the regulatory laws narrowly when they seem to clash. A doctrine known as primary jurisdiction often dictates that the question of regulatory propriety must first be submitted to the agency before the courts will rule on an antitrust question. If the agency decides the activity complained of is otherwise impermissible, the antitrust question becomes moot.

Organized Labor

In the Clayton Act, Congress explicitly exempted labor unions from the antitrust laws in order to permit workers to band together. Section 6 says that “the labor of a human being is not a commodity or article of commerce. Nothing contained in the antitrust laws shall be construed to forbid the existence and operation of labor...organizations,...nor shall such organizations, or the members thereof, be held or construed to be illegal combinations or conspiracies in restraint of trade, under the antitrust laws.” This provision was included to reverse earlier decisions of the courts that had applied the Sherman Act more against labor than business. Nevertheless, the immunity is not total, and unions have run afoul of the laws when they have combined with nonlabor groups to achieve a purpose unlawful under the antitrust laws. Thus a union could not bargain with an employer to sell its products above a certain price floor.

Insurance Companies

Under the McCarran-Ferguson Act of 1945, insurance companies are not covered by the antitrust laws to the extent that the states regulate the business of insurance. Whether or not the states adequately regulate insurance and the degree to which the exemption applies are complex questions, and there has been some political pressure to repeal the insurance exemption.

State Action

In 1943, the Supreme Court ruled in *Parker v. Brown* that when a valid state law regulates a particular industry practice and the industry members are bound to follow that law, then they are exempt from the federal antitrust laws. *Parker v. Brown*, 317 U.S. 341 (1943). Such laws include regulation of public power and licensing and regulation of the professions. This exemption for “state action” has proved troublesome and, like the other exemptions, a complex matter to apply. But it is clear that the state law must require or compel the action and not merely permit it. No state law would be valid if it simply said, “Bakers in the state may jointly establish tariffs for the sale of cookies.”

The recent trend of Supreme Court decisions is to construe the exemption as narrowly as possible. A city, county, or other subordinate unit of a state is not immune under the *Parker* doctrine. A municipality can escape the consequences of antitrust violations—for example, in its operation of utilities—only if it is carrying out express policy of the state. Even then, a state-mandated price-fixing scheme may not survive a federal antitrust attack. New York law required liquor retailers to charge a certain minimum price, but because the state itself did not actively supervise the policy it had established, it fell to the Supreme Court’s antitrust axe.

Group Solicitation of Government

Suppose representatives of the railroad industry lobby extensively and eventually successfully for state legislation that hampers truckers, the railroads’ deadly enemies. Is this a combination or conspiracy to restrain trade? In *Eastern Railroad President’s Conference v. Noerr Motor Freight, Inc.*, the Supreme Court said no. *Eastern Railroad President’s Conference v. Noerr Motor Freight, Inc.*, 365 U.S. 127 (1961). What has come to be known as the *Noerr* doctrine holds that applying the antitrust laws to such activities would violate First Amendment rights to petition the government. One exception to this rule of immunity for soliciting action by the government comes when certain groups seek to harass competitors by instituting state or federal proceedings against them if the claims are baseless or known to be false. Nor does the *Noerr* doctrine apply to horizontal boycotts even if the object is to force the government to take action. In *FTC v. Superior Court Trial Lawyers Assn.*, the

Supreme Court held that a group of criminal defense lawyers had clearly violated the Sherman Act when they agreed among themselves to stop handling cases on behalf of indigent defendants to force the local government to raise the lawyers' fees. *FTC v. Superior Court Trial Lawyers Assn.*, 493 U.S. 411 (1990). The Court rejected their claim that they had a First Amendment right to influence the government through a boycott to pay a living wage so that indigent defendants could be adequately represented.

Baseball

Baseball, the Supreme Court said back in 1923, is not “in commerce.” Congress has never seen fit to overturn this doctrine. Although some inroads have been made in the way that the leagues and clubs may exercise their power, the basic decision stands. Some things are sacred.

KEY TAKEAWAY

For various reasons over time, certain industries and organized groups have been exempted from the operation of US antitrust laws. These include organized labor, insurance companies, and baseball. In addition, First Amendment concerns allow trade groups to solicit both state and federal governments, and state law may sometimes provide a “state action” exemption.

EXERCISE

1. Do a little Internet research. Find out why Curt Flood brought an antitrust lawsuit against Major League Baseball and what the Supreme Court did with his case.

48.6 Sherman Act, Section 2: Concentrations of Market Power

LEARNING OBJECTIVES

1. Understand the ways in which monopoly power can be injurious to competition.
2. Explain why not all monopolies are illegal under the Sherman Act.
3. Recognize the importance of defining the relevant market in terms of both geography and product.
4. Describe the remedies for Sherman Act Section 2 violations.

Introduction

Large companies, or any company that occupies a large portion of any market segment, can thwart competition through the exercise of **monopoly power**. Indeed, monopoly means the lack of competition, or at least of effective competition. As the Supreme Court has long defined it, **monopoly** is “the power to control market prices or exclude competition.” *United States v. Grinnell Corp.*, 384 U.S. 563, 571 (1966). Public concern about the economic and political power of the large trusts, which tended to become monopolies in the late nineteenth century, led to Section 2 of the Sherman Act in 1890 and to Section 7 of the Clayton Act in 1914. These statutes are not limited to the giants of American industry, such as ExxonMobil, Microsoft, Google, or AT&T. A far smaller company that dominates a relatively small geographic area or that merges with another company in an area where few others compete can be in for trouble under Sections 2 or 7. These laws should therefore be of concern to all businesses, not just those on the *Fortune* 500 list. In this section, we will consider how the courts have interpreted both the Section 2 prohibition against monopolizing and the Section 7 prohibition against mergers and acquisitions that tend to lessen competition or to create monopolies.

Section 2 of the Sherman Act reads as follows: “Every person who shall monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several states, or with foreign nations, shall be deemed guilty of a [felony].”

We begin the analysis of Section 2 with the basic proposition that a monopoly is not per se unlawful. Section 2 itself makes this proposition inescapable: it forbids the act of *monopolizing*, not the condition or attribute of *monopoly*. Why should that be

so? If monopoly power is detrimental to a functioning competitive market system, why shouldn't the law ban the very existence of a monopoly?

The answer is that we cannot hope to have "perfect competition" but only "workable competition." Any number of circumstances might lead to monopolies that we would not want to eliminate. Demand for a product might be limited to what one company could produce, there thus being no incentive for any competitor to come into the market. A small town may be able to support only one supermarket, newspaper, or computer outlet. If a company is operating efficiently through economies of scale, we would not want to split it apart and watch the resulting companies fail. An innovator may have a field all to himself, yet we would not want to penalize the inventor for his very act of invention. Or a company might simply be smarter and more efficient, finally coming to stand alone through the very operation of competitive pressures. It would be an irony indeed if the law were to condemn a company that was forged in the fires of competition itself. As the Supreme Court has said, the Sherman Act was designed to protect competition, not competitors.

A company that has had a monopoly position "thrust upon it" is perfectly lawful. The law penalizes not the monopolist as such but the competitor who gains his monopoly power through illegitimate means with an intent to become a monopolist, or who after having become a monopolist acts illegitimately to maintain his power.

A Section 2 case involves three essential factors:

1. What is the **relevant market**¹⁷ for determining dominance? The question of relevant market has two aspects: a geographic market dimension and a **relevant product market**¹⁸ dimension. It makes a considerable difference whether the company is thought to be a competitor in ten states or only one. A large company in one state may appear tiny matched against competitors operating in many states. Likewise, if the product itself has real substitutes, it makes little sense to brand its maker a monopolist. For instance, Coca-Cola is made by only one company, but that does not make the Coca-Cola Company a monopoly, for its soft drink competes with many in the marketplace.
2. How much monopoly power is too much? What share of the market must a company have to be labeled a monopoly? Is a company with 50 percent of the market a monopoly? 75 percent? 90 percent?
3. What constitutes an illegitimate means of gaining or maintaining monopoly power?

17. For a court to determine if a firm has a dominant market share, it must first define the relevant market, which consists of two elements: a relevant product market and a relevant geographic market.

18. The market that includes all products that have identical attributes or are reasonably interchangeable. If customers treat different products as acceptable substitutes for one another, the products are reasonably interchangeable.

These factors are often closely intertwined, especially the first two. This makes it difficult to examine each separately, but to the extent possible, we will address each factor in the order given.

Relevant Markets: Product Market and Geographic Market

Product Market

The monopolist never exercises power in the abstract. When exercised, monopoly power is used to set prices or exclude competition in the market for a particular product or products. Therefore it is essential in any Section 2 case to determine what products to include in the relevant market.

The Supreme Court looks at “cross-elasticity of demand” to determine the relevant market. That is, to what degree can a substitute be found for the product in question if the producer sets the price too high? If consumers stay with the product as its price rises, moving to a substitute only at a very high price, then the product is probably in a market by itself. If consumers shift to another product with slight rises in price, then the product market is “elastic” and must include all such substitutes.

Geographic Market

A company doesn’t have to dominate the world market for a particular product or service in order to be held to be a monopolist. The Sherman Act speaks of “any part” of the trade or commerce. The Supreme Court defines this as the “area of effective competition.” Ordinarily, the smaller the part the government can point to, the greater its chances of prevailing, since a company usually will have greater control over a single marketplace than a regional or national market. Because of this, alleged monopolists will usually argue for a broad geographic market, while the government tries to narrow it by pointing to such factors as transportation costs and the degree to which consumers will shop outside the defined area.

Monopoly Power

After the relevant product and geographic markets are defined, the next question is whether the defendant has sufficient power within them to constitute a monopoly. The usual test is the market share the alleged monopolist enjoys, although no rigid rule or mathematical formula is possible. In *United States v. Aluminum Company of America*, presented in [Section 48.8.3 "Acquiring and Maintaining a Monopoly"](#) of this chapter, Judge Learned Hand said that Alcoa’s 90 percent share of the ingot market was enough to constitute a monopoly but that 64 percent would have been doubtful. *United States v. Aluminum Co. of America*, 148 F.2d 416 (2d Cir. 1945). In a case

against DuPont many years ago, the court looked at a 75 percent market share in cellophane but found that the relevant market (considering the cross-elasticity of demand) was not restricted to cellophane.

Monopolization: Acquiring and Maintaining a Monopoly

Possessing a monopoly is not per se unlawful. Once a company has been found to have monopoly power in a relevant market, the final question is whether it either acquired its monopoly power in an unlawful way or has acted unlawfully to maintain it. This additional element of “deliberateness” does not mean that the government must prove that the defendant *intended* monopolization, in the sense that what it *desired* was the complete exclusion of all competitors. It is enough to show that the monopoly would probably result from its actions, for as Judge Hand put it, “No monopolist monopolizes unconscious of what he is doing.”

What constitutes proof of unlawful acquisition or maintenance of a monopoly? In general, proof is made by showing that the defendant’s acts were aimed at or had the probable effect of excluding competitors from the market. Violations of Section 1 or other provisions of the antitrust laws are examples. “Predatory pricing”—charging less than cost—can be evidence that the defendant’s purpose was monopolistic, for small companies cannot compete with large manufacturers capable of sustaining continued losses until the competition folds up and ceases operations.

In *United States v. Lorain Journal Company*, the town of Lorain, Ohio, could support only one newspaper. *United States v. Lorain Journal Company*, 342 U.S. 143 (1951). With a circulation of twenty thousand, the *Lorain Journal* reached more than 99 percent of the town’s families. The *Journal* had thus lawfully become a monopoly. But when a radio station was set up, the paper found itself competing directly for local and national advertising. To retaliate, the *Journal* refused to accept advertisements unless the advertiser agreed not to advertise on the local station. The Court agreed that this was an unlawful attempt to boycott and hence was a violation of Section 2 because the paper was using its monopoly power to exclude a competitor. (Where was the *interstate* commerce that would bring the activity under federal law? The Court said that the radio station was in interstate commerce because it broadcast national news supported by national advertising.)

Practices that help a company acquire or maintain its monopoly position need not be unlawful in themselves. In the *Aluminum Company* case, Alcoa claimed its monopoly power was the result of superior business skills and techniques. These superior skills led it to constantly build plant capacity and expand output at every opportunity. But Judge Hand thought otherwise, given that for a quarter of a

century other producers could not break into the market because Alcoa acted at every turn to make it impossible for them to compete, even as Alcoa increased its output by some 800 percent. Judge Hand's explanation remains the classic exposition.

Innovation as Evidence of Intent to Monopolize

During the 1970s, several monopolization cases seeking huge damages were filed against a number of well-known companies, including Xerox, International Business Machines (IBM), and Eastman Kodak. In particular, IBM was hit with several suits as an outgrowth of the Justice Department's lawsuit against the computer maker. (*United States v. IBM* was filed in 1969 and did not terminate until 1982, when the government agreed to drop all charges, a complete victory for the company.) The plaintiffs in many of these suits—SCM Corporation against Xerox, California Computer Products Incorporated against IBM (the *Calcomp* case), Berkey Photo Incorporated against Kodak—charged that the defendants had maintained their alleged monopolies by strategically introducing key product innovations that rendered competitive products obsolete. For example, hundreds of computer companies manufacture peripheral equipment “plug-compatible” with IBM computers. Likewise, Berkey manufactured film usable in Kodak cameras. When the underlying products are changed—mainframe computers, new types of cameras—the existing manufacturers are left with unusable inventory and face a considerable time lag in designing new peripheral equipment. In some of these cases, the plaintiffs managed to obtain sizable treble damage awards—SCM won more than \$110 million, IBM initially lost one case in the amount of \$260 million, and Berkey bested Kodak to the tune of \$87 million. Had these cases been sustained on appeal, a radical new doctrine would have been imported into the antitrust laws—that innovation for the sake of competing is unlawful.

None of these cases withstood appellate scrutiny. The Supreme Court has not heard cases in this area, so the law that has emerged is from decisions of the federal courts of appeals. A typical case is *ILC Peripherals Leasing Corp. v. International Business Machines* (the *Memorex* case). *ILC Peripherals Leasing Corp. v. International Business Machines*, 458 F.Supp. 423 (N.D. Cal. 1978). Memorex argued that among other things, IBM's tactic of introducing a new generation of computer technology at lower prices constituted monopolization. The court disagreed, noting that other companies could “reverse engineer” IBM equipment much more cheaply than IBM could originally design it and that IBM computers and related products were subject to intense competition to the benefit of plug-compatible equipment users. The actions of IBM undoubtedly hurt Memorex, but they were part and parcel of the competitive system, the very essence of competition. “This kind of conduct by IBM,” the court said, “is precisely what the antitrust laws were meant to encourage....Memorex sought to use the antitrust laws to make time stand still and

preserve its very profitable position. This court will not assist it and the others who would follow after in this endeavor.”

The various strands of the innovation debate are perhaps best summed up in *Berkey Photo, Inc. v. Eastman Kodak Company*, [Section 48.8.4 "Innovation and Intent to Monopolize"](#).

Attempts to Monopolize

Section 2 prohibits not only actual monopolization but also attempts to monopolize. An attempt need not succeed to be unlawful; a defendant who tries to exercise sway over a relevant market can take no legal comfort from failure. In any event, the plaintiff must show a specific intent to monopolize, not merely an intent to commit the act or acts that constitute the attempt.

Remedies

Since many of the defendant’s acts that constitute Sherman Act Section 2 monopolizing are also violations of Section 1 of the Clayton Act, why should plaintiffs resort to Section 2 at all? What practical difference does Section 2 make? One answer is that not every act of monopolizing is a violation of another law. Leasing and pricing practices that are perfectly lawful for an ordinary competitor may be unlawful only because of Section 2. But the more important reason is the remedy provided by the Sherman Act: divestiture. In the right case, the courts may order the company broken up.

In the *Standard Oil* decision of 1911, the Supreme Court held that the Standard Oil Company constituted a monopoly and ordered it split apart into separate companies. Several other trusts were similarly dealt with. In many of the early cases, doing so posed no insuperable difficulties, because the companies themselves essentially consisted of separate manufacturing plants knit together by financial controls. But not every company is a loose confederation of potentially separate operating companies.

The *Alcoa* case ([Section 48.8.3 "Acquiring and Maintaining a Monopoly"](#)) was fraught with difficult remedial issues. Judge Hand’s opinion came down in 1945, but the remedial side of the case did not come up until 1950. By then the industry had changed radically, with the entrance of Reynolds and Kaiser as effective competitors, reducing Alcoa’s share of the market to 50 percent. Because any aluminum producer needs considerable resources to succeed and because aluminum production is crucial to national security, the later court refused to order the company broken apart. The court ordered Alcoa to take a series of measures

that would boost competition in the industry. For example, Alcoa stockholders had to divest themselves of the stock of a closely related Canadian producer in order to remove Alcoa's control of that company; and the court rendered unenforceable a patent-licensing agreement with Reynolds and Kaiser that required them to share their inventions with Alcoa, even though neither the Canadian tie nor the patent agreements were in themselves unlawful.

Although the trend has been away from breaking up the monopolist, it is still employed as a potent remedy. In perhaps the largest monopolization case ever brought—*United States v. American Telephone & Telegraph Company*—the government sought divestiture of several of AT&T's constituent companies, including Western Electric and the various local operating companies. To avoid prolonged litigation, AT&T agreed in 1982 to a consent decree that required it to spin off all its operating companies, companies that had been central to AT&T's decades-long monopoly.

KEY TAKEAWAY

Aggressive competition is good for consumers and for the market, but if the company has enough power to control a market, the benefits to society decrease. Under Section 2 of the Sherman Act, it is illegal to monopolize or attempt to monopolize the market. If the company acquires a monopoly in the wrong way, using wrongful tactics, it is illegal under Section 2. Courts will look at three questions to see if a company has illegally monopolized a market: (1) What is the relevant market? (2) Does the company control the market? and (3) How did the company acquire or maintain its control?

EXERCISES

1. Mammoth Company, through three subsidiaries, controls 87 percent of the equipment to operate central station hazard-detecting devices; these devices are used to prevent burglary and detect fires and to provide electronic notification to police and fire departments at a central location. In an antitrust lawsuit, Mammoth Company claims that there are other means of protecting against burglary and it therefore does not have monopoly power. Explain how the Justice Department may be able to prove its claim that Mammoth Company is operating an illegal monopoly.
2. Name the sanctions used to enforce Section 2 of the Sherman Act.
3. Look at any news database or the Department of Justice antitrust website for the past three years and describe a case involving a challenge to the exercise of a US company's monopoly power.

48.7 Acquisitions and Mergers under Section 7 of the Clayton Act

LEARNING OBJECTIVES

1. Distinguish the three kinds of mergers.
2. Describe how the courts will define the relevant market in gauging the potential anticompetitive effects of mergers and acquisitions.

Neither Section 1 nor Section 2 of the Sherman Act proved particularly useful in barring mergers between companies or acquisition by one company of another. As originally written, neither did the Clayton Act, which prohibited only mergers accomplished through the sale of stock, not mergers or acquisitions carried out through acquisition of assets. In 1950, Congress amended the Clayton Act to cover the loophole concerning acquisition of assets. It also narrowed the search for relevant market; henceforth, if competition might be lessened *in any line of commerce in any section of the country*, the merger is unlawful.

As amended, the pertinent part of Section 7 of the Clayton Act reads as follows:

[N]o corporation engaged in commerce shall acquire, directly or indirectly, the whole or any part of the stock or other share capital and no corporation subject to the jurisdiction of the Federal Trade Commission shall acquire the whole or any part of the assets of another corporation engaged also in commerce, where in any line of commerce in any section of the country, the effect of such acquisition may be substantially to lessen competition, or to tend to create a monopoly.

No corporation shall acquire, directly or indirectly, the whole or any part of the stock or other share capital and no corporation subject to the jurisdiction of the Federal Trade Commission shall acquire the whole or any part of the assets of one or more corporations engaged in commerce, where in any line of commerce in any section of the country, the effect of such acquisition, of such stock or assets, or of the use of such stock by the voting or granting of proxies or otherwise, may be substantially to lessen competition, or to tend to create a monopoly.

Definitions

Mergers and Acquisitions

For the sake of brevity, we will refer to both mergers and acquisitions as mergers. Mergers are usually classified into three types: horizontal, vertical, and conglomerate.

Horizontal

A **horizontal merger**¹⁹ is one between competitors—for example, between two bread manufacturers or two grocery chains competing in the same locale.

Vertical

A **vertical merger**²⁰ is that of a supplier and a customer. If the customer acquires the supplier, it is known as backward vertical integration; if the supplier acquires the customer, it is forward vertical integration. For example, a book publisher that buys a paper manufacturer has engaged in backward vertical integration. Its purchase of a bookstore chain would be forward vertical integration.

Conglomerate Mergers

Conglomerate mergers²¹ do not have a standard definition but generally are taken to be mergers between companies whose businesses are not directly related. Many commentators have subdivided this category into three types. In a “pure” conglomerate merger, the businesses are not related, as when a steel manufacturer acquires a movie distributor. In a product-extension merger, the manufacturer of one product acquires the manufacturer of a related product—for instance, a producer of household cleansers, but not of liquid bleach, acquires a producer of liquid bleach. In a market-extension merger, a company in one geographic market acquires a company in the same business in a different location. For example, suppose a bakery operating only in San Francisco buys a bakery operating only in Palo Alto. Since they had not competed before the merger, this would not be a horizontal merger.

19. A merger between competitors—for example, between two bread manufacturers or two grocery chains competing in the same locale.

20. A merger between a supplier and a customer. If the customer acquires the supplier, it is backward vertical integration; if the supplier acquires the customer, it is forward vertical integration.

21. A merger between companies whose businesses are not directly related.

General Principles

As in monopolization cases, a relevant product market and geographic market must first be marked out to test the effect of the merger. But Section 7 of the Clayton Act has a market definition different from that of Section 2. Section 7 speaks of “*any line of commerce in any section of the country*” (emphasis added). And its test for the effect of the merger is the same as that which we have already seen for exclusive

dealing cases governed by Section 3: “may be substantially to lessen competition or to tend to create a monopoly.” Taken together, this language makes it easier to condemn an unlawful merger than an unlawful monopoly. The relevant product market is any *line* of commerce, and the courts have taken this language to permit the plaintiff to prove the existence of “submarkets” in which the relative effect of the merger is greater. The **relevant geographic market**²² is any *section of the country*, which means that the plaintiff can show the appropriate effect in a city or a particular region and not worry about having to show the effect in a national market. Moreover, as we have seen, the effect is one of probability, not actuality. Thus the question is, *Might* competition be substantially lessened? rather than, *Was* competition in fact substantially lessened? Likewise, the question is, Did the merger *tend* to create a monopoly? rather than, Did the merger in fact create a monopoly?

In *United States v. du Pont*, the government charged that du Pont’s “commanding position as General Motors’ supplier of automotive finishes and fabrics” was not achieved on competitive merit alone but because du Pont had acquired a sizable block of GM stock, and the “consequent close intercompany relationship led to the insulation of most of the General Motors’ market from free competition,” in violation of Section 7. *United States v. du Pont*, 353 U.S. 586 (1957). Between 1917 and 1919, du Pont took a 23 percent stock interest in GM. The district court dismissed the complaint, partly on the grounds that at least before the 1950 amendment to Section 7, the Clayton Act did not condemn vertical mergers and partly on the grounds that du Pont had not dominated GM’s decision to purchase millions of dollars’ worth of automotive finishes and fabrics. The Supreme Court disagreed with this analysis and sent the case back to trial. The Court specifically held that even though the stock acquisition had occurred some thirty-five years earlier, the government can resort to Section 7 whenever it appears that the result of the acquisition will violate the competitive tests set forth in the section.

Defining the Market

In the seminal *Brown Shoe* case, the Supreme Court said that the outer boundaries of broad markets “are determined by the reasonable interchangeability of use or the cross elasticity of demand between the product itself and substitutes for it” but that narrower “well defined submarkets” might also be appropriate lines of commerce. *Brown Shoe Co., Inc. v. United States*, 370 U.S. 294 (1962). In drawing market boundaries, the Court said, courts should realistically reflect “[c]ompetition where, in fact, it exists.” Among the factors to consider are “industry or public recognition of the submarket as a separate economic entity, the product’s peculiar characteristics and uses, unique production facilities, distinct customers, distinct prices, sensitivity to price changes and specialized vendors.” To select the geographic market, courts must consider both “the commercial realities” of the industry and the economic significance of the market.

22. The market that is the territory or territories within which a company markets its products or services.

The Failing Company Doctrine

One defense to a Section 7 case is that one of the merging companies is a failing company. In *Citizen Publishing Company v. United States*, the Supreme Court said that the defense is applicable if two conditions are satisfied. *Citizen Publishing Company v. United States*, 394 U.S. 131 (1969). First, a company must be staring bankruptcy in the face; it must have virtually no chance of being resuscitated without the merger. Second, the acquiring company must be the only available purchaser, and the failing company must have made bona fide efforts to search for another purchaser.

Beneficial Effects

That a merger might produce beneficial effects is not a defense to a Section 7 case. As the Supreme Court said in *United States v. Philadelphia National Bank*, “[A] merger, the effect of which ‘may be substantially to lessen competition’ is not saved because, on some ultimate reckoning of social or economic debits or credits, it may be deemed beneficial.” *United States v. Philadelphia National Bank*, 374 U.S. 321, 371 (1963). And in *FTC v. Procter & Gamble Co.*, the Court said, “Possible economies cannot be used as a defense to illegality.” *FTC v. Procter & Gamble Co.*, 386 U.S. 568, 580 (1967). Congress was also aware that some mergers which lessen competition may also result in economies but it struck the balance in favor of protecting competition.

Tests of Competitive Effect

Horizontal Mergers

Three factors are critical in assessing whether a horizontal merger may substantially lessen competition: (1) the market shares of the merging companies, (2) the concentration ratios, and (3) the trends in the industry toward concentration.

The first factor is self-evident. A company with 10 percent or even 5 percent of the market is in a different position from one with less than 1 percent. A concentration ratio indicates the number of firms that constitute an industry. An industry with only four firms is obviously much more concentrated than one with ten or seventy firms. Concentration trends indicate the frequency with which firms in the relevant market have been merging. The first merger in an industry with a low concentration ratio might be predicted to have no likely effect on competition, but a merger of two firms in a four-firm industry would obviously have a pronounced effect.

In the *Philadelphia National Bank* case, the court announced this test in assessing the legality of a horizontal merger: “[A] merger which produces a firm controlling an

undue percentage share of the relevant market, and results in a significant increase in the concentration of firms in that market is so inherently likely to lessen competition substantially that it must be enjoined in the absence of evidence clearly showing that the merger is not likely to have such anticompetitive effects.” In this case, the merger led to a 30 percent share of the commercial banking market in a four-county region around Philadelphia and an increase in concentration by more than one-third, and the court held that those numbers amounted to a violation of Section 7. The court also said that “if concentration is already great, the importance of preventing even slight increases in concentration and so preserving the possibility of eventual de-concentration is correspondingly great.”

The Hart-Scott-Rodino Antitrust Improvements Act of 1976 requires certain companies to notify the Justice Department before actually completing mergers or acquisitions, whether by private negotiation or by public tender offer. When one of the companies has sales or assets of \$100 million or more and the other company \$10 million or more, premerger notification must be provided at least thirty days prior to completion of the deal—or fifteen days in the case of a tender offer of cash for publicly traded shares if the resulting merger would give the acquiring company \$50 million worth or 15 percent of assets or voting securities in the acquired company. The rules are complex, but they are designed to give the department time to react to a merger before it has been secretly accomplished and then announced. The 1976 act gives the department the authority to seek an injunction against the completion of any such merger, which of course greatly simplifies the remedial phase of the case should the courts ultimately hold that the merger would be unlawful. (Note: Section 7 is one of the “tools” in the kit of the lawyer who defends companies against unwelcomed takeover attempts: if the target company can point to lines of its business in which it competes with the acquiring company, it can threaten antitrust action in order to block the merger.)

Vertical Mergers

To prove a Section 7 case involving a vertical merger, the plaintiff must show that the merger forecloses competition “in a substantial share of” a substantial market. But statistical factors alone do not govern in a vertical merger. To illustrate, we see that in *Ford Motor Co. v. United States*, the merger between Ford and Autolite (a manufacturer of spark plugs) was held unlawful because it eliminated Ford’s potential entry into the market as an independent manufacturer of spark plugs and because it foreclosed Ford “as a purchaser of about ten percent of total industry output” of spark plugs. *Ford Motor Co. v. United States*, 405 U.S. 562 (1972). This decision underscores the principle that a company may serve to enhance competition simply by waiting in the wings as a potential entrant to a market. If other companies feel threatened by a company the size of Ford undertaking to compete where it had not done so before, the existing manufacturers will likely

keep their prices low so as not to tempt the giant in. Of course, had Ford entered the market on its own by independently manufacturing spark plugs, it might ultimately have caused weak competitors to fold. As the Court said, “Had Ford taken the internal-expansion route, there would have been no illegality; not, however, because the result necessarily would have been commendable, but simply because that course has not been proscribed.”

Conglomerate Mergers

Recall the definition of a conglomerate merger given in Section 48.7.1 "Definitions". None of the three types listed has a direct impact on competition, so the test for illegality is more difficult to state and apply than for horizontal or vertical mergers. But they are nonetheless within the reach of Section 7. In the late 1960s and early 1970s, the government filed a number of divestiture suits against conglomerate mergers. It did not win them all, and none reached the Supreme Court; most were settled by consent decree, leading in several instances to divestiture either of the acquired company or of another division of the acquiring company. Thus International Telephone & Telegraph Company agreed to divest itself of Canteen Corporation and either of the following two groups: (1) Avis, Levin & Sons, and Hamilton Life Insurance Company; or (2) Hartford Fire Insurance Company. Ling-Temco-Vought agreed to divest itself of either Jones & Laughlin Steel or Braniff Airways and Okonite Corporation. In these and other cases, the courts have looked to specific potential effects, such as raising the barriers to entry into a market and eliminating potential competition, but they have rejected the more general claim of “the rising tide of economic concentration in American industry.”

Entrenching Oligopoly

One way to attack conglomerate mergers is to demonstrate that by taking over a dominant company in an oligopolistic industry, a large and strong acquiring company will further entrench the oligopoly. In an oligopolistic industry, just a few major competitors so dominate the industry that competition is quelled. In *FTC v. Procter & Gamble Co.*, the government challenged Procter & Gamble’s (P&G’s) acquisition of Clorox. P&G was the leading seller of household cleansers, with annual sales of more than \$1 billion. *FTC v. Procter & Gamble Co.*, 386 U.S. 568 (1967). In addition, it was the “nation’s largest advertiser,” promoting its products so heavily that it was able to take advantage of substantial advertising discounts from the media. Clorox had more than 48 percent of national sales for liquid bleach in a heavily **concentrated industry**²³. Since all liquid bleach is chemically identical, advertising and promotion plays the dominant role in selling the product. Prior to the merger, P&G did not make or sell liquid bleach; hence it was a product-extension merger rather than a horizontal one.

23. An industry in which a large percentage of market sales is controlled by either a single firm or a small number of firms.

The Supreme Court concluded that smaller firms would fear retaliation from P&G if they tried to compete in the liquid bleach market and that “a new entrant would be much more reluctant to face the giant Procter than it would have been to face the smaller Clorox.” Hence “the substitution of the powerful acquiring firm for the smaller, but already dominant firm may substantially reduce the competitive structure of the industry by raising entry barriers and by dissuading the smaller firms from aggressively competing.” The entrenchment theory probably applies only to highly concentrated industries and dominant firms, however. Many subsequent cases have come out in favor of the defendants on a variety of grounds—that the merger led simply to a more efficient acquired firm, that the existing competitors were strong and able to compete, or even that the acquiring firm merely gives the acquired company a deep pocket to better finance its operations.

Eliminating Potential Competition

This theory holds that but for the merger, the acquiring company might have competed in the acquired company’s market. In *Procter & Gamble*, for example, P&G might have entered the liquid bleach market itself and thus given Clorox a run for its money. An additional strong company would then have been in the market. When P&G bought Clorox, however, it foreclosed that possibility. This theory depends on proof of some probability that the acquiring company would have entered the market. When the acquired company is small, however, a Section 7 violation is unlikely; these so-called toehold mergers permit the acquiring company to become a competitive force in an industry without necessarily sacrificing any preexisting competition.

Reciprocity

Many companies are both heavy buyers and heavy sellers of products. A company may buy from its customers as well as sell to them. This practice is known in antitrust jargon as reciprocity. Reciprocity is the practice of a seller who uses his volume of purchases from the buyer to induce the buyer to purchase from him. The clearest example arose in *FTC v. Consolidated Foods Corp.* *FTC v. Consolidated Foods Corp.*, 380 U.S. 592 (1965). Consolidated owned wholesale grocery outlets and retail food stores. It wanted to merge with Gentry, which made dehydrated onions and garlic. The Supreme Court agreed that the merger violated Section 7 because of the possibility of reciprocity: Consolidated made bulk purchases from several food processors, which were purchasers of dehydrated onions and garlic from Gentry and others. Processors who did not buy from Gentry might feel pressured to do so in order to keep Consolidated as a customer for their food supplies. If so, other onion and garlic processors would be foreclosed from competing for sales. A merger that raises the mere possibility of reciprocity is not per se unlawful, however. The

plaintiff must demonstrate that it was probable the acquiring company would adopt the practice—for example, by conditioning future orders for supplies on the receipt of orders for onions and garlic—and that doing so would have an anticompetitive effect given the size of the reciprocating companies and their positions in the market.

Joint Ventures

Section 7 can also apply to joint ventures, a rule first announced in 1964. Two companies, Hooker and American Potash, dominated sales of sodium chlorate in the Southeast, with 90 percent of the market. Pennsalt Chemicals Corporation produced the rest in the West and sold it in the Southeast through Olin Mathieson Chemical Corporation. The latter two decided to team up, the better to compete with the giants, and so they formed Penn-Olin, which they jointly owned. The district court dismissed the government's suit, but the Supreme Court reinstated it, saying that a joint venture can serve to blunt competition, or at least potential competition, between the parent companies. The Court said that the lower court must look to a number of factors to determine whether the joint venture was likely to lessen competition substantially:

The number and power of the competitors in the relevant market; the background of their growth; the power of the joint venturers; the relationship of their lines of commerce; competition existing between them and the power of each in dealing with the competitors of the other; the setting in which the joint venture was created; the reasons and necessities for its existence; the joint venture's line of commerce and the relationship thereof to that of its parents; the adaptability of its line of commerce to non-competitive practices; the potential power of the joint venture in the relevant market; and appraisal of what the competition in the relevant market would have been if one of the joint venturers had entered it alone instead of through Penn-Olin; the effect, in the event of this occurrence, of the other joint venturer's potential competition; and such other factors as might indicate potential risk to competition in the relevant market. *United States v. Penn-Olin Chemical Co.*, 378 U.S. 158 (1964).

These numerous factors illustrate how the entire economic environment surrounding the joint venture and mergers in general must be assessed to determine the legalities.

Remedies

The Clayton Act provides that the government may seek divestiture when an acquisition or a merger violates the act. Until relatively recently, however, it was

unresolved whether a private plaintiff could seek divestiture after proving a Clayton Act violation. In 1990, the Supreme Court unanimously agreed that divestiture is an available remedy in private suits, even in suits filed by a state's attorney general on behalf of consumers. *California v. American Stores*, 58 U.S.L.W. 4529 (1990). This ruling makes it more likely that antimerger litigation will increase in the future.

During the years of the Reagan administration in the 1980s, the federal government became far less active in prosecuting antitrust cases, especially merger cases, than it had been in previous decades. Many giant mergers went unchallenged, like the merger between two oil behemoths, Texaco and Getty, resulting in a company with nearly \$50 billion in assets in 1984. With the arrival of the first Bush administration in 1989, the talk in Washington antitrust circles was of a renewed interest in antitrust enforcement. The arrival of the second Bush administration in 2000 brought about an era of less antitrust enforcement than had been undertaken during the Clinton administration. Whether the Obama administration reinvigorates antitrust enforcement remains to be seen.

KEY TAKEAWAY

Section 7 prohibits mergers or acquisitions that might tend to lessen competition in any line of commerce in any section of the country. Mergers and acquisitions are usually classified in one of three ways: horizontal (between competitors), vertical (between different levels of the distribution chain), or conglomerate (between businesses that are not directly related). The latter may be divided into product-extension and market-expansion mergers. The relevant market test is different than in monopolization cases; in a Section 7 action, relevance of market may be proved.

In assessing horizontal mergers, the courts will look to the market shares of emerging companies, industry concentration ratios, and trends toward concentration in the industry. To prove a Section 7 case, the plaintiff must show that the merger forecloses competition "in a substantial share of" a substantial market. Conglomerate merger cases are harder to prove and require a showing of specific potential effects, such as raising barriers to entry into an industry and thus entrenching monopoly, or eliminating potential competition. Joint ventures may also be condemned by Section 7. The Hart-Scott-Rodino Antitrust Improvements Act of 1976 requires certain companies to get premerger notice to the Justice Department.

EXERCISES

1. Sirius Satellite radio and XM satellite radio proposed to merge. Was this a horizontal merger, a vertical merger, or a conglomerate merger? How is the market defined, in terms of both product or service and geographic area?
2. In 2010, Live Nation and Ticketmaster proposed to merge. Was this a horizontal merger, a vertical merger, or a conglomerate merger? How should the market be defined, in terms of both product or service and geographic area? Should the US government approve the merger?

Horizontal Restraints of Trade

National Society of Professional Engineers v. United States

435 U.S. 679 (1978)

MR. JUSTICE STEVENS delivered the opinion of the Court.

This is a civil antitrust case brought by the United States to nullify an association's canon of ethics prohibiting competitive bidding by its members. The question is whether the canon may be justified under the Sherman Act, 15 U.S. c. § 1 et seq. (1976 ed.), because it was adopted by members of a learned profession for the purpose of minimizing the risk that competition would produce inferior engineering work endangering the public safety. The District Court rejected this justification without making any findings on the likelihood that competition would produce the dire consequences foreseen by the association. The Court of Appeals affirmed. We granted certiorari to decide whether the District Court should have considered the factual basis for the proffered justification before rejecting it. Because we are satisfied that the asserted defense rests on a fundamental misunderstanding of the Rule of Reason frequently applied in antitrust litigation, we affirm.

Engineering is an important and learned profession. There are over 750,000 graduate engineers in the United States, of whom about 325,000 are registered as professional engineers. Registration requirements vary from State to State, but usually require the applicant to be a graduate engineer with at least four years of practical experience and to pass a written examination. About half of those who are registered engage in consulting engineering on a fee basis. They perform services in connection with the study, design, and construction of all types of improvements to real property—bridges, office buildings, airports, and factories are examples. Engineering fees, amounting to well over \$2 billion each year, constitute about 5% of total construction costs. In any given facility, approximately 50% to 80% of the cost of construction is the direct result of work performed by an engineer concerning the systems and equipment to be incorporated in the structure.

The National Society of Professional Engineers (Society) was organized in 1935 to deal with the nontechnical aspects of engineering practice, including the promotion of the professional, social, and economic interests of its members. Its present

membership of 69,000 resides throughout the United States and in some foreign countries. Approximately 12,000 members are consulting engineers who offer their services to governmental, industrial, and private clients. Some Society members are principals or chief executive officers of some of the largest engineering firms in the country.

The charges of a consulting engineer may be computed in different ways. He may charge the client a percentage of the cost of the project, may charge fixed rates per hour for different types of work, may perform an assignment for a specific sum, or he may combine one or more of these approaches....This case...involves a charge that the members of the Society have unlawfully agreed to refuse to negotiate or even to discuss the question of fees until after a prospective client has selected the engineer for a particular project. Evidence of this agreement is found in § II(c) of the Society's Code of Ethics, adopted in July 1964.

The District Court found that the Society's Board of Ethical Review has uniformly interpreted the "ethical rules against competitive bidding for engineering services as prohibiting the submission of any form of price information to a prospective customer which would enable that customer to make a price comparison on engineering services." If the client requires that such information be provided, then § II(c) imposes an obligation upon the engineering firm to withdraw from consideration for that job.

[P]etitioner argues that its attempt to preserve the profession's traditional method of setting fees for engineering services is a reasonable method of forestalling the public harm which might be produced by unrestrained competitive bidding. To evaluate this argument it is necessary to identify the contours of the Rule of Reason and to discuss its application to the kind of justification asserted by petitioner.

* * *

The test prescribed in *Standard Oil* is whether the challenged contracts or acts "were unreasonably restrictive of competitive conditions." Unreasonableness under that test could be based either (1) on the nature or character of the contracts, or (2) on surrounding circumstances giving rise to the inference or presumption that they were intended to restrain trade and enhance prices. Under either branch of the test, the inquiry is confined to a consideration of impact on competitive conditions.

* * *

Price is the “central nervous system of the economy,” *United States v. Socony-Vacuum Oil Co.*, 310 U.S. 150, 226 n. 59, and an agreement that “interfere[s] with the setting of price by free market forces” is illegal on its face, *United States v. Container Corp.*, 393 U.S. 333,337. In this case we are presented with an agreement among competitors to refuse to discuss prices with potential customers until after negotiations have resulted in the initial selection of an engineer. While this is not price fixing as such, no elaborate industry analysis is required to demonstrate the anticompetitive character of such an agreement. It operates as an absolute ban on competitive bidding, applying with equal force to both complicated and simple projects and to both inexperienced and sophisticated customers. As the District Court found, the ban “impedes the ordinary give and take of the market place,” and substantially deprives the customer of “the ability to utilize and compare prices in selecting engineering services.” On its face, this agreement restrains trade within the meaning of § 1 of the Sherman Act.

The Society’s affirmative defense confirms rather than refutes the anticompetitive purpose and effect of its agreement. The Society argues that the restraint is justified because bidding on engineering services is inherently imprecise, would lead to deceptively low bids, and would thereby tempt individual engineers to do inferior work with consequent risk to public safety and health. The logic of this argument rests on the assumption that the agreement will tend to maintain the price level; if it had no such effect, it would not serve its intended purpose. The Society nonetheless invokes the Rule of Reason, arguing that its restraint on price competition ultimately inures to the public benefit by preventing the production of inferior work and by insuring ethical behavior. As the preceding discussion of the Rule of Reason reveals, this Court has never accepted such an argument.

It may be, as petitioner argues, that competition tends to force prices down and that an inexpensive item may be inferior to one that is more costly. There is some risk, therefore, that competition will cause some suppliers to market a defective product. Similarly, competitive bidding for engineering projects may be inherently imprecise and incapable of taking into account all the variables which will be involved in the actual performance of the project. Based on these considerations, a purchaser might conclude that his interest in quality—which may embrace the safety of the end product—outweighs the advantages of achieving cost savings by pitting one competitor against another. Or an individual vendor might independently refrain from price negotiation until he has satisfied himself that he fully understands the scope of his customers’ needs. These decisions might be reasonable; indeed, petitioner has provided ample documentation for that thesis. But these are not reasons that satisfy the Rule; nor are such individual decisions subject to antitrust attack.

The Sherman Act does not require competitive bidding; it prohibits unreasonable restraints on competition. Petitioner's ban on competitive bidding prevents all customers from making price comparisons in the initial selection of an engineer, and imposes the Society's views of the costs and benefits of competition on the entire marketplace. It is this restraint that must be justified under the Rule of Reason, and petitioner's attempt to do so on the basis of the potential threat that competition poses to the public safety and the ethics of its profession is nothing less than a frontal assault on the basic policy of the Sherman Act.

The Sherman Act reflects a legislative judgment that ultimately competition will produce not only lower prices, but also better goods and services. "The heart of our national economic policy long has been faith in the value of competition." *Standard Oil Co. v. FTC*, 340 U.S. 231, 248. The assumption that competition is the best method of allocating resources in a free market recognizes that all elements of a bargain—quality, service, safety, and durability—and not just the immediate cost, are favorably affected by the free opportunity to select among alternative offers. Even assuming occasional exceptions to the presumed consequences of competition, the statutory policy precludes inquiry into the question whether competition is good or bad.

* * *

In sum, the Rule of Reason does not support a defense based on the assumption that competition itself is unreasonable. Such a view of the Rule would create the "sea of doubt" on which Judge Taft refused to embark in *Addyston*, 85 F. 271 (1898), at 284, and which this Court has firmly avoided ever since.

* * *

The judgment of the Court of Appeals is affirmed.

CASE QUESTIONS

1. What kinds of harms are likely if there is unrestrained competitive bidding among engineering firms?
2. By what other means (i.e., *not* including deliberate nondisclosure of price information up to the time of contracting) could the National Society of Professional Engineers protect the public from harm?

Vertical Maximum Price Fixing and the Rule of Reason

State Oil Company v. Barkat U Khan and Khan & Associates

522 U.S. 3 (1997)

Barkat U. Khan and his corporation entered into an agreement with State Oil Company to lease and operate a gas station and convenience store owned by State Oil. The agreement provided that Khan would obtain the station's gasoline supply from State Oil at a price equal to a suggested retail price set by State Oil, less a margin of 3.25 cents per gallon. Under the agreement, respondents could charge any amount for gasoline sold to the station's customers, but if the price charged was higher than State Oil's suggested retail price, the excess was to be rebated to State Oil. Respondents could sell gasoline for less than State Oil's suggested retail price, but any such decrease would reduce their 3.25 cents-per-gallon margin.

About a year after respondents began operating the gas station, they fell behind in lease payments. State Oil then gave notice of its intent to terminate the agreement and commenced a state court proceeding to evict respondents. At State Oil's request, the state court appointed a receiver to operate the gas station. The receiver operated the station for several months without being subject to the price restraints in respondents' agreement with State Oil. According to respondents, the receiver obtained an overall profit margin in excess of 3.25 cents per gallon by lowering the price of regular-grade gasoline and raising the price of premium grades.

Respondents sued State Oil in the United States District Court for the Northern District of Illinois, alleging in part that State Oil had engaged in price fixing in violation of § 1 of the Sherman Act by preventing respondents from raising or lowering retail gas prices. According to the complaint, but for the agreement with State Oil, respondents could have charged different prices based on the grades of gasoline, in the same way that the receiver had, thereby achieving increased sales and profits. State Oil responded that the agreement did not actually prevent respondents from setting gasoline prices, and that, in substance, respondents did not allege a violation of antitrust laws by their claim that State Oil's suggested retail price was not optimal.

The District Court entered summary judgment for State Oil on this claim, [finding] that [Khan's allegations, if true]...did not establish the sort of "manifestly anticompetitive implications or pernicious effect on competition" that would justify per se prohibition of State Oil's conduct. The Seventh Circuit reversed. The Court of Appeals for the Seventh Circuit reversed the District Court's grant of summary

judgment for State Oil on the basis of *Albrecht v. Herald Co.*, 390 U.S. 14 (1968). 93 F.3d 1358 (1996). The court first noted that the agreement between respondents and State Oil did indeed fix maximum gasoline prices by making it “worthless” for respondents to exceed the suggested retail prices. After reviewing legal and economic aspects of price fixing, the court concluded that State Oil’s pricing scheme was a *per se* antitrust violation under *Albrecht v. Herald Co.*, *supra*. Although the Court of Appeals characterized *Albrecht* as “unsound when decided” and “inconsistent with later decisions” of this Court, it felt constrained to follow that decision. The Supreme Court granted certiorari.

Justice Sandra Day O’Connor

We granted certiorari to consider two questions, whether State Oil’s conduct constitutes a *per se* violation of the Sherman Act and whether respondents are entitled to recover damages based on that conduct.

* * * *

Although the Sherman Act, by its terms, prohibits every agreement “in restraint of trade,” this Court has long recognized that Congress intended to outlaw only unreasonable restraints. See, e.g., *Arizona v. Maricopa County Medical Soc.*, U.S. Supreme Court (1982). As a consequence, most antitrust claims are analyzed under a “rule of reason,” according to which the finder of fact must decide whether the questioned practice imposes an unreasonable restraint on competition, taking into account a variety of factors, including specific information about the relevant business, its condition before and after the restraint was imposed, and the restraint’s history, nature, and effect.

Some types of restraints, however, have such predictable and pernicious anticompetitive effect, and such limited potential for pro-competitive benefit, that they are deemed unlawful *per se*. *Northern Pacific R. Co. v. United States*, U.S. Supreme Court (1958). *Per se* treatment is appropriate “once experience with a particular kind of restraint enables the Court to predict with confidence that the rule of reason will condemn it.” *Maricopa County* (1982). Thus, we have expressed reluctance to adopt *per se* rules with regard to “restraints imposed in the context of business relationships where the economic impact of certain practices is not immediately obvious.” *FTC v. Indiana Federation of Dentists*, U.S. Supreme Court (1986).

A review of this Court’s decisions leading up to and beyond *Albrecht* is relevant to our assessment of the continuing validity of the *per se* rule established in *Albrecht*. Beginning with *Dr. Miles Medical Co. v. John D. Park & Sons Co.*, U.S. Supreme Court

(1911), the Court recognized the illegality of agreements under which manufacturers or suppliers set the minimum resale prices to be charged by their distributors. By 1940, the Court broadly declared all business combinations “formed for the purpose and with the effect of raising, depressing, fixing, pegging, or stabilizing the price of a commodity in interstate or foreign commerce” illegal *per se*. *United States v. Socony-Vacuum Oil Co.*, U.S. Supreme Court (1940). Accordingly, the Court condemned an agreement between two affiliated liquor distillers to limit the maximum price charged by retailers in *Kiefer-Stewart Co. v. Joseph E. Seagram & Sons, Inc.*, U.S. Supreme Court (1951), noting that agreements to fix maximum prices, “no less than those to fix minimum prices, cripple the freedom of traders and thereby restrain their ability to sell in accordance with their own judgment.”

In subsequent cases, the Court’s attention turned to arrangements through which suppliers imposed restrictions on dealers with respect to matters other than resale price. In *White Motor Co. v. United States*, U.S. Supreme Court (1963), the Court considered the validity of a manufacturer’s assignment of exclusive territories to its distributors and dealers. The Court determined that too little was known about the competitive impact of such vertical limitations to warrant treating them as *per se* unlawful. Four years later, in *United States v. Arnold, Schwinn & Co.*, U.S. Supreme Court (1967), the Court reconsidered the status of exclusive dealer territories and held that, upon the transfer of title to goods to a distributor, a supplier’s imposition of territorial restrictions on the distributor was “so obviously destructive of competition” as to constitute a *per se* violation of the Sherman Act. In *Schwinn*, the Court acknowledged that some vertical restrictions, such as the conferral of territorial rights or franchises, could have pro-competitive benefits by allowing smaller enterprises to compete, and that such restrictions might avert vertical integration in the distribution process. The Court drew the line, however, at permitting manufacturers to control product marketing once dominion over the goods had passed to dealers.

Albrecht, decided [a year after *Schwinn*], involved a newspaper publisher who had granted exclusive territories to independent carriers subject to their adherence to a maximum price on resale of the newspapers to the public. Influenced by its decisions in *Socony-Vacuum*, *Kiefer-Stewart*, and *Schwinn*, the Court concluded that it was *per se* unlawful for the publisher to fix the maximum resale price of its newspapers. The Court acknowledged that “maximum and minimum price fixing may have different consequences in many situations,” but nonetheless condemned maximum price fixing for “substituting the perhaps erroneous judgment of a seller for the forces of the competitive market.”

Nine years later, in *Continental T. V., Inc. v. GTE Sylvania, Inc.*, 433 U.S. 36, 53 L. Ed. 2d 568, 97 S. Ct. 2549 (1977), the Court overruled *Schwinn*, thereby rejecting application of a *per se* rule in the context of vertical nonprice restrictions. The Court

acknowledged the principle of *stare decisis*, but explained that the need for clarification in the law justified reconsideration of *Schwinn*:

“Since its announcement, *Schwinn* has been the subject of continuing controversy and confusion, both in the scholarly journals and in the federal courts. The great weight of scholarly opinion has been critical of the decision, and a number of the federal courts confronted with analogous vertical restrictions have sought to limit its reach. In our view, the experience of the past 10 years should be brought to bear on this subject of considerable commercial importance.”

The Court then reviewed scholarly works supporting the economic utility of vertical nonprice restraints....The Court concluded that, because “departure from the rule-of-reason standard must be based upon demonstrable economic effect rather than—as in *Schwinn*—upon formalistic line drawing,” the appropriate course would be “to return to the rule of reason that governed vertical restrictions prior to *Schwinn*.” *Sylvania* (1977)

* * *

Subsequent decisions of the Court...have hinted that the analytical underpinnings of *Albrecht* were substantially weakened by *Sylvania*. We noted in *Maricopa County* that vertical restraints are generally more defensible than horizontal restraints...and that decisions such as *Sylvania* “recognize the possibility that a vertical restraint imposed by a *single* manufacturer or wholesaler may stimulate interbrand competition even as it reduces intrabrand competition.”

[I]n *Atlantic Richfield Co. v. USA Petroleum Co. (ARCO)*, U.S. Supreme Court (1990), although *Albrecht*'s continuing validity was not squarely before the Court, some disfavor with that decision was signaled by our statement that we would “assume, *arguendo*, that *Albrecht* correctly held that vertical, maximum price fixing is subject to the *per se* rule.” More significantly, we specifically acknowledged that vertical maximum price fixing “may have procompetitive interbrand effects,” and pointed out that, in the wake of *GTE Sylvania*, “the procompetitive potential of a vertical maximum price restraint is more evident...than it was when *Albrecht* was decided, because exclusive territorial arrangements and other nonprice restrictions were unlawful *per se* in 1968.”

Thus, our reconsideration of *Albrecht*'s continuing validity is informed by several of our decisions, as well as a considerable body of scholarship discussing the effects of vertical restraints. Our analysis is also guided by our general view that the primary purpose of the antitrust laws is to protect interbrand competition. See, *e.g.*, *Business*

Electronics Corp. v. Sharp Electronics Corp., 485 U.S. 717, 726, 99 L. Ed. 2d 808, 108 S. Ct. 1515 (1988). “Low prices,” we have explained, “benefit consumers regardless of how those prices are set, and so long as they are above predatory levels, they do not threaten competition.” *ARCO, supra*, at 340. Our interpretation of the Sherman Act also incorporates the notion that condemnation of practices resulting in lower prices to consumers is “especially costly” because “cutting prices in order to increase business often is the very essence of competition.”

So informed, we find it difficult to maintain that vertically-imposed maximum prices could harm consumers or competition to the extent necessary to justify their *per se* invalidation. As Chief Judge Posner wrote for the Court of Appeals in this case:

As for maximum resale price fixing, unless the supplier is a monopsonist he cannot squeeze his dealers’ margins below a competitive level; the attempt to do so would just drive the dealers into the arms of a competing supplier. A supplier might, however, fix a maximum resale price in order to prevent his dealers from exploiting a monopoly position....Suppose that State Oil, perhaps to encourage...dealer services...has spaced its dealers sufficiently far apart to limit competition among them (or even given each of them an exclusive territory); and suppose further that Union 76 is a sufficiently distinctive and popular brand to give the dealers in it at least a modicum of monopoly power. Then State Oil might want to place a ceiling on the dealers’ resale prices in order to prevent them from exploiting that monopoly power fully. It would do this not out of disinterested malice, but in its commercial self-interest. The higher the price at which gasoline is resold, the smaller the volume sold, and so the lower the profit to the supplier if the higher profit per gallon at the higher price is being snared by the dealer.” 93 F.3d at 1362.

We recognize that the *Albrecht* decision presented a number of theoretical justifications for a *per se* rule against vertical maximum price fixing. But criticism of those premises abounds. The *Albrecht* decision was grounded in the fear that maximum price fixing by suppliers could interfere with dealer freedom. 390 U.S. at 152. In response, as one commentator has pointed out, “the ban on maximum resale price limitations declared in *Albrecht* in the name of ‘dealer freedom’ has actually prompted many suppliers to integrate forward into distribution, thus eliminating the very independent trader for whom *Albrecht* professed solicitude.” 7 P. Areeda, *Antitrust Law*, P1635, p. 395 (1989). For example, integration in the newspaper industry since *Albrecht* has given rise to litigation between independent distributors and publishers.

The *Albrecht* Court also expressed the concern that maximum prices may be set too low for dealers to offer consumers essential or desired services. 390 U.S. at 152-153. But such conduct, by driving away customers, would seem likely to harm

manufacturers as well as dealers and consumers, making it unlikely that a supplier would set such a price as a matter of business judgment....In addition, *Albrecht* noted that vertical maximum price fixing could effectively channel distribution through large or specially-advantaged dealers. 390 U.S. at 153. It is unclear, however, that a supplier would profit from limiting its market by excluding potential dealers. See, e.g., Easterbrook, *supra*, at 905-908. Further, although vertical maximum price fixing might limit the viability of inefficient dealers, that consequence is not necessarily harmful to competition and consumers.

Finally, *Albrecht* reflected the Court's fear that maximum price fixing could be used to disguise arrangements to fix minimum prices, 390 U.S. at 153, which remain illegal *per se*. Although we have acknowledged the possibility that maximum pricing might mask minimum pricing, see *Maricopa County*, 457 U.S. at 348, we believe that such conduct—as with the other concerns articulated in *Albrecht*—can be appropriately recognized and punished under the rule of reason....After reconsidering *Albrecht's* rationale and the substantial criticism the decision has received, however, we conclude that there is insufficient economic justification for *per se* invalidation of vertical maximum price fixing.

* * *

Despite what Chief Judge Posner aptly described as *Albrecht's* “infirmities, [and] its increasingly wobbly, moth-eaten foundations,” there remains the question whether *Albrecht* deserves continuing respect under the doctrine of *stare decisis*. The Court of Appeals was correct in applying that principle despite disagreement with *Albrecht*, for it is this Court's prerogative alone to overrule one of its precedents....We approach the reconsideration of decisions of this Court with the utmost caution. *Stare decisis* reflects “a policy judgment that ‘in most matters it is more important that the applicable rule of law be settled than that it be settled right.’” *Agostini v. Felton*, U.S. Supreme Court (1997).

But “*stare decisis* is not an inexorable command.” *Payne v. Tennessee*, U.S. Supreme Court (1991). In the area of antitrust law, there is a competing interest, well-represented in this Court's decisions, in recognizing and adapting to changed circumstances and the lessons of accumulated experience.

...With the views underlying *Albrecht* eroded by this Court's precedent, there is not much of that decision to salvage....[W]e find its conceptual foundations gravely weakened. In overruling *Albrecht*, we of course do not hold that all vertical maximum price fixing is *per se* lawful. Instead, vertical maximum price fixing, like the majority of commercial arrangements subject to the antitrust laws, should be evaluated under the rule of reason.

CASE QUESTIONS

1. What does Judge Posner of the Seventh Circuit mean when he uses the term *monopsonist*? Is he referring to the respondent (Khan and Associates) or to the State Oil Company?
2. Explain why State Oil Company would want to set a maximum price. What business benefit is it for State Oil Company?
3. The court clearly states that setting maximum price is no longer a per se violation of the Sherman Act and is thus a rule of reason analysis in each case. What about setting minimum prices? Is setting minimum prices per se illegal, illegal if it does not pass the rule of reason standard, or entirely legal?

Acquiring and Maintaining a Monopoly

United States v. Aluminum Company of America

148 F.2d 416 (2d Cir. 1945)

JUDGE LEARNED HAND

It does not follow because “Alcoa” had such a monopoly that it “monopolized” the ingot market: it may not have achieved monopoly; monopoly may have been thrust upon it. If it had been a combination of existing smelters which united the whole industry and controlled the production of all aluminum ingot, it would certainly have “monopolized” the market....We may start therefore with the premise that to have combined ninety percent of the producers of ingot would have been to “monopolize” the ingot market; and, so far as concerns the public interest, it can make no difference whether an existing competition is put an end to, or whether prospective competition is prevented....

Nevertheless, it is unquestionably true that from the very outset the courts have at least kept in reserve the possibility that the origin of a monopoly may be critical in determining its legality; and for this they had warrant in some of the congressional debates which accompanied the passage of the Act....This notion has usually been expressed by saying that size does not determine guilt; that there must be some “exclusion” of competitors; that the growth must be something else than “natural” or “normal”; that there must be a “wrongful intent,” or some other specific intent; or that some “unduly” coercive means must be used. At times there has been

emphasis upon the use of the active verb, “monopolize,” as the judge noted in the case at bar.

A market may, for example, be so limited that it is impossible to produce at all and meet the cost of production except by a plant large enough to supply the whole demand. Or there may be changes in taste or in cost which drive out all but one purveyor. A single producer may be the survivor out of a group of active competitors, merely by virtue of his superior skill, foresight, and industry. In such cases a strong argument can be made that, although the result may expose the public to the evils of monopoly, the Act does not mean to condemn the resultant of those very forces which it is its prime object to foster: *finis opus coronal*. The successful competitor, having been urged to compete, must not be turned upon when he wins.

* * *

[As] Cardozo, J., in *United States v. Swift & Co.*, 286 U.S. 106, p. 116, 52 S. Ct. 460, 463, 76 L.Ed. 999,...said, “Mere size...is not an offense against the Sherman Act unless magnified to the point at *which* it amounts to a monopoly...but size carries with it an opportunity for abuse that is not to be ignored when the opportunity is proved to have been utilized in the past.” “Alcoa’s” size was “magnified” to make it a “monopoly”; indeed, it has never been anything else; and its size not only offered it an “opportunity for abuse,” but it “utilized” its size for “abuse,” as can easily be shown.

It would completely misconstrue “Alcoa’s” position in 1940 to hold that it was the passive beneficiary of a monopoly, following upon an involuntary elimination of competitors by automatically operative *economic* forces. Already in 1909, when its last lawful monopoly ended, it sought to strengthen its position by unlawful practices, and these concededly continued until 1912. In that year it had two plants in New York, at which it produced less than 42 million pounds of ingot; in 1934 it had five plants (the original two, enlarged; one in Tennessee; one in North Carolina; one in Washington), and its production had risen to about 327 million pounds, an increase of almost eight-fold. Meanwhile not a pound of ingot had been produced by anyone else in the United States. This increase and this continued and undisturbed control did not fall undesigned into “Alcoa’s” lap; obviously it could not have done so. It could only have resulted, as it did result, from a persistent determination to maintain the control, with which it found itself vested in 1912. There were at least one or two abortive attempts to enter the industry, but “Alcoa” effectively anticipated and forestalled all competition, and succeeded in holding the field alone. True, it stimulated demand and opened new uses for the metal, but not without making sure that it could supply what it had evoked. There is no dispute as

to this; “Alcoa” avows it as evidence of the skill, energy and initiative with which it has always conducted its business: as a reason why, having won its way by fair means, it should be commended, and not dismembered. We need charge it with no moral derelictions after 1912; we may assume that all its claims for itself are true. The only question is whether it falls within the exception established in favor of those who do not seek, but cannot avoid, the control of a market. It seems to us that that question scarcely survives its statement. It was not inevitable that it should always anticipate increases in the demand for ingot and be prepared to supply them. Nothing compelled it to keep doubling and redoubling its capacity before others entered the field. It insists that it never excluded competitors; but we can think of no more effective exclusion than progressively to embrace each new opportunity as it opened, and to face every newcomer with new capacity already geared into a great organization, having the advantage of experience, trade connections and the elite of personnel. Only in case we interpret “exclusion” as limited to maneuvers not honestly industrial, but actuated solely by a desire to prevent competition, can such a course, indefatigably pursued, be deemed not “exclusionary.” So to limit it would in our judgment emasculate the Act; would permit just such consolidations as it was designed to prevent.

We disregard any question of “intent.” Relatively early in the history of the Act—1905—Holmes, J., in *Swift & Co. v. United States*, explained this aspect of the Act in a passage often quoted. Although the primary evil was monopoly, the Act also covered preliminary steps, which, if continued, would lead to it. These may do no harm of themselves; but if they are initial moves in a plan or scheme which, carried out, will result in monopoly, they are dangerous and the law will nip them in the bud....In order to fall within § 2, the monopolist must have both the power to monopolize, and the intent to monopolize. To read the passage as demanding any “specific,” intent, makes nonsense of it, for no monopolist monopolizes unconscious of what he is doing. So here, “Alcoa” meant to keep, and did keep, that complete and exclusive hold upon the ingot market with which it started. That was to “monopolize” that market, however innocently it otherwise proceeded. So far as the judgment held that it was not within § 2, it must be reversed.

CASE QUESTIONS

1. Judge Learned Hand claims there would be no violation of the Sherman Act in any case where a company achieves monopoly through “natural” or “normal” operation of the market.
 - a. What language in the Sherman Act requires the plaintiff to show something more than a company’s monopoly status?
 - b. What specifics, if any, does Judge Hand provide that indicate that Alcoa not only had market dominance but sought to increase its dominance and to exclude competition?
2. Can you think of a single producer in a given product or geographic market that has achieved that status because of “peer skill, foresight, and industry”? Is there anything wrong with Alcoa’s selling the concept of aluminum products to an ever-increasing set of customers and then also ensuring that it had the capacity to meet the increasing demand?
3. To stimulate interbrand competition, would you recommend that Congress change Section 2 so that any company that had over 80 percent of market share would be “broken up” to ensure competition? Why is this a bad idea? Or why do you think it is a good idea?

Innovation and Intent to Monopolize

Berkey Photo, Inc. v. Eastman Kodak Company

603 F.2d 263 (2d Cir. 1979)

IRVING R. KAUFMAN, CHIEF JUDGE

To millions of Americans, the name Kodak is virtually synonymous with photography....It is one of the giants of American enterprise, with international sales of nearly \$6 billion in 1977 and pre-tax profits in excess of \$1.2 billion.

This action, one of the largest and most significant private antitrust suits in history, was brought by Berkey Photo, Inc., a far smaller but still prominent participant in the industry. Berkey competes with Kodak in providing photofinishing services—the conversion of exposed film into finished prints, slides, or movies. Until 1978, Berkey sold cameras as well. It does not manufacture film, but it does

purchase Kodak film for resale to its customers, and it also buys photofinishing equipment and supplies, including color print paper, from Kodak.

The two firms thus stand in a complex, multifaceted relationship, for Kodak has been Berkey's competitor in some markets and its supplier in others. In this action, Berkey claims that every aspect of the association has been infected by Kodak's monopoly power in the film, color print paper, and camera markets, willfully acquired, maintained, and exercised in violation of § 2 of the Sherman Act, 15 U.S.C. § 2....Berkey alleges that these violations caused it to lose sales in the camera and photofinishing markets and to pay excessive prices to Kodak for film, color print paper, and photofinishing equipment.

* * *

[T]he jury found for Berkey on virtually every point, awarding damages totalling \$37,620,130. Judge Frankel upheld verdicts aggregating \$27,154,700 for lost camera and photofinishing sales and for excessive prices on film and photofinishing equipment....Trebled and supplemented by attorneys' fees and costs pursuant to § 4 of the Clayton Act, 15 U.S.C. § 15, Berkey's judgment reached a grand total of \$87,091,309.47, with interest, of course, continuing to accrue.

Kodak now appeals this judgment.

The principal markets relevant here, each nationwide in scope, are amateur conventional still cameras, conventional photographic film, photofinishing services, photofinishing equipment, and color print paper.

The "amateur conventional still camera" market now consists almost entirely of the so-called 110 and 126 instant-loading cameras. These are the direct descendants of the popular "box" cameras, the best-known of which was Kodak's so-called "Brownie." Small, simple, and relatively inexpensive, cameras of this type are designed for the mass market rather than for the serious photographer.

Kodak has long been the dominant firm in the market thus defined. Between 1954 and 1973 it never enjoyed less than 61% of the annual unit sales, nor less than 64% of the dollar volume, and in the peak year of 1964, Kodak cameras accounted for 90% of market revenues. Much of this success is no doubt due to the firm's history of innovation.

Berkey has been a camera manufacturer since its 1966 acquisition of the Keystone Camera Company, a producer of movie cameras and equipment. In 1968 Berkey began to sell amateur still cameras made by other firms, and the following year the Keystone Division commenced manufacturing such cameras itself. From 1970 to 1977, Berkey accounted for 8.2% of the sales in the camera market in the United States, reaching a peak of 10.2% in 1976. In 1978, Berkey sold its camera division and thus abandoned this market.

* * *

One must comprehend the fundamental tension—one might almost say the paradox—that is near the heart of § 2....

The conundrum was indicated in characteristically striking prose by Judge Hand, who was not able to resolve it. Having stated that Congress “did not condone ‘good trusts’ and condemn ‘bad’ ones; it forbade all,” he declared with equal force, “The successful competitor, having been urged to compete, must not be turned upon when he wins.”...We must always be mindful lest the Sherman Act be invoked perversely in favor of those who seek protection against the rigors of competition.

* * *

In sum, although the principles announced by the § 2 cases often appear to conflict, this much is clear. The mere possession of monopoly power does not *ipso facto* condemn a market participant. But, to avoid the proscriptions of § 2, the firm must refrain at all times from conduct directed at smothering competition. This doctrine has two branches. Unlawfully acquired power remains anathema even when kept dormant. And it is no less true that a firm with a legitimately achieved monopoly may not wield the resulting power to tighten its hold on the market.

* * *

As Kodak had hoped, the 110 system proved to be a dramatic success. In 1972—the system’s first year—the company sold 2,984,000 Pocket Instamatics, more than 50% of its sales in the amateur conventional still camera market. The new camera thus accounted in large part for a sharp increase in total market sales, from 6.2 million units in 1971 to 8.2 million in 1972....

Berkey’s Keystone division was a late entrant in the 110 sweepstakes, joining the competition only in late 1973. Moreover, because of hasty design, the original

models suffered from latent defects, and sales that year were a paltry 42,000. With interest in the 126 dwindling, Keystone thus suffered a net decline of 118,000 unit sales in 1973. The following year, however, it recovered strongly, in large part because improvements in its pocket cameras helped it sell 406,000 units, 7% of all 110s sold that year.

Berkey contends that the introduction of the 110 system was both an attempt to monopolize and actual monopolization of the camera market.

* * *

It will be useful at the outset to present the arguments on which Berkey asks us to uphold its verdict: Kodak, a film and camera monopolist, was in a position to set industry standards. Rivals could not compete effectively without offering products similar to Kodak's. Moreover, Kodak persistently refused to make film available for most formats other than those in which it made cameras. Since cameras are worthless without film, this policy effectively prevented other manufacturers from introducing cameras in new formats. Because of its dominant position astride two markets, and by use of its film monopoly to distort the camera market, Kodak forfeited its own right to reap profits from such innovations without providing its rivals with sufficient advance information to enable them to enter the market with copies of the new product on the day of Kodak's introduction. This is one of several "predisclosure" arguments Berkey has advanced in the course of this litigation.

* * *

Through the 1960s, Kodak followed a checkered pattern of predisclosing innovations to various segments of the industry. Its purpose on these occasions evidently was to ensure that the industry would be able to meet consumers' demand for the complementary goods and services they would need to enjoy the new Kodak products. But predisclosure would quite obviously also diminish Kodak's share of the auxiliary markets. It was therefore, in the words of Walter Fallon, Kodak's chief executive officer, "a matter of judgment on each and every occasion" whether predisclosure would be for or against Kodak's self-interest. Kodak decided not to release advance information about the new film and format. The decision was evidently based on the perception of Dr. Louis K. Eilers, Kodak's chief executive officer at that time, that Kodak would gain more from being first on the market for the sale of all goods and services related to the 110 system than it would lose from the inability of other photofinishers to process Kodacolor II.

Judge Frankel did not decide that Kodak should have disclosed the details of the 110 to other camera manufacturers prior to introduction. Instead, he left the matter to the jury....We hold that this instruction was in error and that, as a matter of law, Kodak did not have a duty to predisclose information about the 110 system to competing camera manufacturers.

As Judge Frankel indicated, and as Berkey concedes, a firm may normally keep its innovations secret from its rivals as long as it wishes, forcing them to catch up on the strength of their own efforts after the new product is introduced. It is the possibility of success in the marketplace, attributable to superior performance, that provides the incentives on which the proper functioning of our competitive economy rests....

Withholding from others advance knowledge of one's new products, therefore, ordinarily constitutes valid competitive conduct. Because, as we have already indicated, a monopolist is permitted, and indeed encouraged, by § 2 to compete aggressively on the merits, any success that it may achieve through "the process of invention and innovation" is clearly tolerated by the antitrust laws.

* * *

Moreover, enforced predisclosure would cause undesirable consequences beyond merely encouraging the sluggishness the Sherman Act was designed to prevent. A significant vice of the theory propounded by Berkey lies in the uncertainty of its application. Berkey does not contend, in the colorful phrase of Judge Frankel, that "Kodak has to live in a goldfish bowl," disclosing every innovation to the world at large. However predictable in its application, such an extreme rule would be insupportable. Rather, Berkey postulates that Kodak had a duty to disclose limited types of information to certain competitors under specific circumstances. But it is difficult to comprehend how a major corporation, accustomed though it is to making business decisions with antitrust considerations in mind, could possess the omniscience to anticipate all the instances in which a jury might one day in the future retrospectively conclude that predisclosure was warranted. And it is equally difficult to discern workable guidelines that a court might set forth to aid the firm's decision. For example, how detailed must the information conveyed be? And how far must research have progressed before it is "ripe" for disclosure? These inherent uncertainties would have an inevitable chilling effect on innovation. They go far, we believe, towards explaining why no court has ever imposed the duty Berkey seeks to create here.

* * *

We do not perceive, however, how Kodak's introduction of a new format was rendered an unlawful act of monopolization in the camera market because the firm also manufactured film to fit the cameras. "The 110 system was in substantial part a camera development...."

Clearly, then, the policy considerations militating against predisclosure requirements for monolithic monopolists are equally applicable here. The first firm, even a monopolist, to design a new camera format has a right to the lead time that follows from its success. The mere fact that Kodak manufactured film in the new format as well, so that its customers would not be offered worthless cameras, could not deprive it of that reward.

* * *

Conclusion We have held that Kodak did not have an obligation, merely because it introduced film and camera in a new format, to make any predisclosure to its camera-making competitors. Nor did the earlier use of its film monopoly to foreclose format innovation by those competitors create of its own force such a duty where none had existed before. In awarding Berkey \$15,250,000, just \$828,000 short of the maximum amount demanded, the jury clearly based its calculation of lost camera profits on Berkey's central argument that it had a right to be "at the starting line when the whistle blew" for the new system. The verdict, therefore, cannot stand.

CASE QUESTIONS

1. Consider patent law. Did Kodak have a legal monopoly on the 110 system (having invented it) for seventeen years? Did it have any legal obligation to share the technology with others?
2. Might it have been better business strategy to give predisclosure to Berkey and others about the necessary changes in film that would come about with the introduction of the 110 camera? How so, or why not? Is there any way that some sort of predisclosure to Berkey and others would maintain or sustain good relations with competitors?

48.9 Summary and Exercises

Summary

Four basic antitrust laws regulate the competitive activities of US business: the Sherman Act, the Clayton Act, the Federal Trade Commission Act, and the Robinson-Patman Act. The Sherman Act prohibits restraints of trade and monopolizing. The Clayton Act prohibits a variety of anticompetitive acts, including mergers and acquisitions that might tend to lessen competition. The Federal Trade Commission Act prohibits unfair methods of competition and unfair and deceptive acts or practices in commerce. The Robinson-Patman Act prohibits a variety of price discriminations. (This act is actually an amendment to the Clayton Act.) These laws are enforced in four ways: (1) by the US Department of Justice, Antitrust Division; (2) by the Federal Trade Commission; (3) by state attorneys general; and (4) by private litigants.

The courts have interpreted Section 1 of the Sherman Act, prohibiting every contract, combination, or conspiracy in restraint of trade, by using a rule of reason. Thus reasonable restraints that are ancillary to legitimate business practices are lawful. But some acts are per se unreasonable, such as price-fixing, and will violate Section 1. Section 1 restraints of trade include both horizontal and vertical restraints of trade. Vertical restraints of trade include resale price maintenance, refusals to deal, and unreasonable territorial restrictions on distributors. Horizontal restraints of trade include price-fixing, exchanging price information when doing so permits industry members to control prices, controlling output, regulating competitive methods, allocating territories, exclusionary agreements, and boycotts.

Exclusive dealing contracts and tying contracts whose effects may be to substantially lessen competition violate Section 3 of the Clayton Act and may also violate both Section 1 of the Sherman Act and Section 5 of the Federal Trade Commission Act. Requirements and supply contracts are unlawful if they tie up so much of a commodity that they tend substantially to lessen competition or might tend to do so.

The Robinson-Patman Act (Section 2 of the Clayton Act) prohibits price discrimination for different purchasers of commodities of like grade and quality if the effect may be substantially to (1) lessen competition or tend to create a monopoly in any line of commerce or (2) impair competition with (a) any person who grants or (b) knowingly receives the benefit of the discrimination, or (c) with customers of either of them.

Some industries and groups are insulated from the direct reach of the antitrust laws. These include industries separately regulated under federal law, organized labor, insurance companies, activities mandated under state law, group solicitation government action, and baseball.

Section 2 of the Sherman Act prohibits monopolizing or attempting to monopolize any part of interstate or foreign trade or commerce. The law does not forbid monopoly as such but only acts or attempts or conspiracies to monopolize. The prohibition includes the monopolist who has acquired his monopoly through illegitimate means.

Three factors are essential in a Section 2 case: (1) relevant market for determining dominance, (2) the degree of monopoly power, and (3) the particular acts claimed to be illegitimate.

Relevant market has two dimensions: product market and geographic market. Since many goods have close substitutes, the courts look to the degree to which consumers will shift to other goods or suppliers if the price of the commodity or service in question is priced in a monopolistic way. This test is known as cross-elasticity of demand. If the cross-elasticity is high—meaning that consumers will readily shift—then the other goods or services must be included in the product market definition, thus reducing the share of the market that the defendant will be found to have. The geographic market is not the country as a whole, because Section 2 speaks in terms of “any part” of trade or commerce. Usually the government or private plaintiff will try to show that the geographic market is small, since that will tend to give the alleged monopolist a larger share of it.

Market power in general means the share of the relevant market that the alleged monopolist enjoys. The law does not lay down fixed percentages, though various decisions seem to suggest that two-thirds of the market might be too low but three-quarters high enough to constitute monopoly power.

Acts that were aimed at or had the probable effect of excluding competitors from the market are acts of monopolizing. Examples are predatory pricing and boycotts. Despite repeated claims during the 1970s and 1980s by smaller competitors, large companies have prevailed in court against the argument that innovation suddenly sprung on the market without notice is per se evidence of intent to monopolize.

Remedies for Sherman Act Section 2 violations include damages, injunction, and **divestiture**. These remedies are also available in Clayton Act Section 7 cases.

Section 7 prohibits mergers or acquisitions that might tend to lessen competition in any line of commerce in any section of the country. Mergers and acquisitions are usually classified in one of three ways: horizontal (between competitors), vertical (between different levels of the distribution chain), or conglomerate (between businesses that are not directly related). The latter may be divided into product-extension and market-expansion mergers. The relevant market test is different than in monopolization cases; in a Section 7 action, relevance of market may be proved.

In assessing horizontal mergers, the courts will look to the market shares of emerging companies, industry concentration ratios, and trends toward concentration in the industry. To prove a Section 7 case, the plaintiff must show that the merger forecloses competition “in a substantial share of” a substantial market. Conglomerate merger cases are harder to prove and require a showing of specific potential effects, such as raising barriers to entry into an industry and thus entrenching monopoly, or eliminating potential competition. Joint ventures may also be condemned by Section 7. The Hart-Scott-Rodino Antitrust Improvements Act of 1976 requires certain companies to get premerger notice to the Justice Department.

EXERCISES

1. To protect its state's businesses against ruinous price wars, a state legislature has passed a law permitting manufacturers to set a "suggested resale price" on all goods that they make and sell direct to retailers. Retailers are forbidden to undercut the resale price by more than 10 percent. A retailer who violates the law may be sued by the manufacturer for treble damages: three times the difference between the suggested resale price and the actual selling price. But out-of-state retailers are bound by no such law and are regularly discounting the goods between 35 and 40 percent. As the general manager of a large discount store located within a few miles of a city across the state line, you wish to offer the public a price of only 60 percent of the suggested retail price on items covered by the law in order to compete with the out-of-state retailers to which your customers have easy access. May you lower your price in order to compete? How would you defend yourself if sued by a manufacturer whose goods you discounted in violation of the law?
2. The DiForio Motor Car Company is a small manufacturer of automobiles and sells to three distributors in the city of Peoria. The largest distributor, Hugh's Auras, tells DiForio that it is losing money on its dealership and will quit selling the cars unless DiForio agrees to give it an exclusive contract. DiForio tells the other distributors, whose contracts were renewed from year to year, that it will no longer sell them cars at the end of the contract year. Smith Autos, one of the other dealers, protests, but DiForio refuses to resupply it. Smith Autos sues DiForio and Hugh's. What is the result? Why?
3. Twenty-five local supermarket chains banded together as Topco Associates Incorporated to sell groceries under a private label. Topco was formed in 1940 to compete with the giant chains, which had the economic clout to sell private-label merchandise unavailable to the smaller chains. Topco acted as a purchasing agent for the members. By the late 1960s, Topco's members were doing a booming business: \$1.3 billion in retail sales, with market share ranging from 1.5 percent to 16 percent in the markets that members served. Topco-brand groceries accounted for no more than 10 percent of any store's total merchandise. Under Topco's rules, members were assigned exclusive territories in which to sell Topco-brand goods. A member chain with stores located in another member's exclusive territory could not sell Topco-brand goods in those stores. Topco argued that the market division was necessary to give each chain the economic incentive to advertise and develop brand consciousness and thus to be able to compete more effectively against the large nonmember supermarkets' private labels. If other stores in the

locality could also carry the Topco brand, then it would not be a truly “private” label and there would be no reason to tout it; it would be like any national brand foodstuff, and Topco members did not have the funds to advertise the brand nationally. Which, if any, antitrust laws has Topco violated? Why?

4. In 1983, Panda Bears Incorporated, a small manufacturer, began to sell its patented panda bear robot dolls (they walk, smile, and eat bamboo shoots) to retail toy shops. The public took an immediate fancy to panda bears, and the company found it difficult to meet the demand. Retail shops sold out even before their orders arrived. In order to allocate the limited supply fairly while it tooled up to increase production runs, the company announced to its distributors that it would not sell to any retailers that did not also purchase its trademarked Panda Bear’s Bambino Bamboo Shoots. It also announced that it would refuse to supply any retailer that sold the robots for less than \$59.95. Finally, it said that it would refuse to sell to retailers unless they agreed to use the company’s repair services exclusively when customers brought bears back to repair malfunctions in their delicate, patented computerized nervous system. By the following year, with demand still rising, inferior competitive panda robots and bamboo shoots began to appear. Some retailers began to lower the Panda Bear price to meet the competition. The company refused to resupply them. Panda Bears Incorporated also decreed that it would refuse to sell to retailers who carried any other type of bamboo shoot. What antitrust violations, if any, has Panda Bear Incorporated committed? What additional information might be useful in helping you to decide?
5. Elmer has invented a new battery-operated car. The battery, which Elmer has patented, functions for five hundred miles before needing to be recharged. The car, which he has named The Elmer, is a sensation when announced, and his factory can barely keep up with the orders. Worried about the impact, all the other car manufacturers ask Elmer for a license to use the battery in their cars. Elmer refuses because he wants the car market all to himself. Banks are eager to lend him the money to expand his production, and within three years he has gained a 5 percent share of the national market for automobiles. During these years, Elmer has kept the price of The Elmer high, to pay for his large costs in tooling up a factory. But then it dawns on him that he can expand his market much more rapidly if he drops his price, so he prices the car to yield the smallest profit margin of any car being sold in the country. Its retail price is far lower than that of any other domestic car on the market. Business begins to boom. Within three more years, he has garnered an additional 30 percent of the market, and he announces at a press conference that he confidently expects to have the market “all to

myself” within the next five years. Fighting for their lives now, the Big Three auto manufacturers consult their lawyers about suing Elmer for monopolizing. Do they have a case? What is Elmer’s defense?

6. National Widget Company is the dominant manufacturer of widgets in the United States, with 72 percent of the market for low-priced widgets and 89 percent of the market for high-priced widgets. Dozens of companies compete with National in the manufacture and sale of compatible peripheral equipment for use with National’s widgets, including countertops, holders, sprockets and gear assemblies, instruction booklets, computer software, and several hundred replacements parts. Revenues of these peripherals run upwards of \$100 million annually. Beginning with the 1981 model year, National Widget sprang a surprise: a completely redesigned widget that made most of the peripheral equipment obsolete. Moreover, National set the price for its peripherals below that which would make economic sense for competitors to invest in new plants to tool up for producing redesigned peripherals. Five of the largest peripheral-equipment competitors sued National under Section 2 of the Sherman Act. One of these, American Widget Peripherals, Inc., had an additional complaint: on making inquiries in early 1980, American was assured by National’s general manager that it would not be redesigning any widgets until late 1985 at the earliest. On the basis of that statement, American invested \$50 million in a new plant to manufacture the now obsolescent peripheral equipment, and as a result, it will probably be forced into bankruptcy. What is the result? Why? How does this differ, if at all, from the *Berkey Camera* case?

7. In 1959, The Aluminum Company of America (Alcoa) acquired the stock and assets of the Rome Cable Corporation. Alcoa and Rome both manufactured bare and insulated aluminum wire and cable, used for overhead electric power transmission lines. Rome, but not Alcoa, manufactured copper conductor, used for underground transmissions. Insulated aluminum wire and cable is quite inferior to copper, but it can be used effectively for overhead transmission, and Alcoa increased its share of annual installations from 6.5 percent in 1950 to 77.2 percent in 1959. During that time, copper lost out to aluminum for overhead transmission. Aluminum and copper conductor prices do not respond to one another; lower copper conductor prices do not put great pressure on aluminum wire and cable prices. As the Supreme Court summarized the facts in *United States v. Aluminum Co. of America*, *United States v. Aluminum Co. of America*, 377 U.S. 271 (1964).

In 1958—the year prior to the merger—Alcoa was the leading producer of aluminum conductor, with 27.8% of the market; in bare aluminum conductor, it also led the industry with 32.5%. Alcoa plus Kaiser controlled 50% of the aluminum conductor market and, with its three leading competitors, more than 76%. Only nine concerns (including Rome with 1.3%) accounted for 95.7% of the output of aluminum conductor, Alcoa was third with 11.6%, and Rome was eighth with 4.7%. Five companies controlled 65.4% and four smaller ones, including Rome, added another 22.8%.

The Justice Department sued Alcoa-Rome for violation of Section 7 of the Clayton Act. What is the government's argument? What is the result?

8. Quality Graphics has been buying up the stock of companies that manufacture billboards. Quality now owns or controls 23 of the 129 companies that make billboards, and its sales account for 3.2 percent of the total national market of \$72 million. In Texas, Quality has acquired 27 percent of the billboard market, and in the Dallas–Ft. Worth area alone, about 25 percent. Billboard advertising accounts for only 0.001 percent of total national advertising sales; the majority goes to newspaper, magazine, television, and radio advertising. What claims could the Justice Department assert in a suit against Quality? What is Quality's defense? What is the result?
9. The widget industry consists of six large manufacturers who together account for 62 percent of output, which in 1985 amounted to \$2.1 billion in domestic US sales. The remaining 38 percent is supplied by more than forty manufacturers. All six of the large manufacturers and thirty-one of the forty small manufacturers belong to the Widget Manufacturers Trade Association (WMTA). An officer from at least two of the six manufacturers always serves on the WMTA executive committee, which consists of seven members. The full WMTA board of directors consists of one member from each manufacturer. The executive committee meets once a month for dinner at the Widgeters Club; the full board meets semiannually at the Widget Show. The executive committee, which always meets with the association's lawyer in attendance, discusses a wide range of matters, including industry conditions, economic trends, customer relations, technological developments, and the like, but scrupulously refrains from discussing price, territories, or output. However, after dinner at the bar, five of the seven members meet for drinks and discuss prices in an informal manner. The chairman of the executive committee concludes the discussion with the following

statement: “If I had to guess, I’d guess that the unit price will increase by 5 percent the first of next month.” On the first of the month, his prediction is proven to be correct among the five companies whose officers had a drink, and within a week, most of the other manufacturers likewise increase their prices. At the semiannual meeting of the full board, the WMTA chairman notes that prices have been climbing steadily, and he ventures the hope that they will not continue to do so because otherwise they will face stiff competition from the widget industry. However, following the next several meetings of the executive committee, the price continues to rise as before. The Justice Department gets wind of these discussions and sues the companies whose officers are members of the board of directors and also sues individually the members of the executive committee and the chairman of the full board. What laws have they violated, if any, and who has violated them? What remedies or sanctions may the department seek?

SELF-TEST QUESTIONS

1. A company with 95 percent of the market for its product is
 - a. a monopolist
 - b. monopolizing
 - c. violating Section 2 of the Sherman Act
 - d. violating Section 1 of the Sherman Act

2. Which of the following may be evidence of an intent to monopolize?
 - a. innovative practices
 - b. large market share
 - c. pricing below cost of production
 - d. low profit margins

3. A merger that lessens competition in any line of commerce is prohibited by
 - a. Section 1 of the Sherman Act
 - b. Section 2 of the Sherman Act
 - c. Section 7 of the Clayton Act
 - d. none of the above

4. Which of the following statements is true?
 - a. A horizontal merger is always unlawful.
 - b. A conglomerate merger between companies with unrelated products is always lawful.
 - c. A vertical merger violates Section 2 of the Sherman Act.
 - d. A horizontal merger that unduly increases the concentration of firms in a particular market is always unlawful.

5. A line of commerce is a concept spelled out in
 - a. Section 7 of the Clayton Act
 - b. Section 2 of the Sherman Act
 - c. Section 1 of the Sherman Act
 - d. none of the above

SELF-TEST ANSWERS

1. a

Chapter 49

Unfair Trade Practices and the Federal Trade Commission

LEARNING OBJECTIVES

After reading this chapter, you should understand the following:

1. The general powers of the Federal Trade Commission
2. The general principles of law that govern deceptive acts and practices
3. Several categories of deceptive acts and practices, with examples
4. The remedies that the Federal Trade Commission has at its disposal to police unfair trade practices

49.1 The Federal Trade Commission: Powers and Law Governing Deceptive Acts

LEARNING OBJECTIVES

1. Describe the general powers of the Federal Trade Commission.
2. Describe the general principles that guide laws and regulations against unfair and deceptive trade practices.

General Powers of the Federal Trade Commission

Common law prohibited a variety of trade practices unfair either to competitors or to consumers. These included passing off one's products as though they were made by someone else, using a trade name confusingly similar to that of another, stealing trade secrets, and various forms of misrepresentation. In the Federal Trade Commission Act of 1912, Congress for the first time empowered a federal agency to investigate and deter acts of unfair competition.

Section 5 of the act gave the Federal Trade Commission (FTC) power to enforce a law that said "unfair methods of competition in commerce are hereby declared unlawful." By "unfair methods of competition," Congress originally intended acts that constituted violations of the Sherman and Clayton Antitrust Acts. But from the beginning, the commissioners of the FTC took a broader view of their mandate. Specifically, they were concerned about the problem of false and deceptive advertising and promotional schemes. But the original Section 5 was confining; it seemed to authorize FTC action only when the deceptive advertising injured a competitor of the company. In 1931, the Supreme Court ruled that this was indeed the case: an advertisement that deceived the public was not within the FTC's jurisdiction unless a competitor was injured by the misrepresentation also. Congress responded in 1938 with the Wheeler-Lea Amendments to the FTC Act. To the words "unfair methods of competition" were added these words: "unfair or deceptive acts or practices in commerce." Now it became clear that the FTC had a broader role to play than as a second agency enforcing the antitrust laws. Henceforth, the FTC would be the guardian also of consumers.

Deceptive practices that the FTC has prosecuted are also amenable to suit at common law. A tire manufacturer who advertises that his "special tire" is "new" when it is actually a retread has committed a common-law misrepresentation, and the buyer could sue for rescission of the contract or for damages. But having a few

buyers sue for misrepresentation does not stop the determined fraudster. Moreover, such lawsuits are expensive to bring, and the amount of damages awarded is usually small; thus law actions alone cannot adequately address deliberately fraudulent practices.

Through Section 5, however, the FTC can seek far-reaching remedies against the sham and the phony; it is not limited to proving damages to individual customers case by case. The FTC can issue cease and desist orders and has other sanctions to wield as well. So do its counterpart agencies at the state level.

As an administrative agency, the FTC has broader powers than those vested in the ordinary prosecutorial authority, such as the Department of Justice. It can initiate administrative proceedings in accordance with the Administrative Procedure Act to enforce the several statutes that it administers. In addition to issuing cease and desist orders and getting them enforced in court, the FTC can seek temporary and permanent injunctions, fines, and monetary damages and promulgate **trade regulation rules**¹ (TRRs). Although the FTC's authority to issue TRRs had long been assumed (and was approved by the US court of appeals in Washington in 1973), Congress formalized it in 1975 in the FTC Improvement Act (part of the Magnuson-Moss Warranty Act), which gives the FTC explicit authority to prescribe rules defining unfair or deceptive acts or practices.

A TRR is like a statute. It is a detailed statement of procedures and substantive dos and don'ts. Before promulgating a TRR, the commission must publish its intention to do so in the *Federal Register* and must hold open hearings on its proposals. Draft versions of a TRR must be published to allow the public to comment. Once issued, the final version is published as part of the *Code of Federal Regulations* and becomes a permanent part of the law unless modified or repealed by the FTC itself or by Congress—or overturned by a court on grounds of arbitrariness, lack of procedural regularity, or the like. A violation of a TRR is treated exactly like a violation of a federal statute. Once the FTC proves that a defendant violated a TRR, no further proof is necessary that the defendant's act was unfair or deceptive. Examples of TRRs include the Retail Food Store Advertising and Marketing Practices Rule, Games of Chance in the Food Retailing and Gasoline Industries Rule, Care Labeling of Textile Wearing Apparel Rule, Mail Order Merchandise Rule, Cooling-Off Period for Door-to-Door Sales Rule, and Use of Negative Option Plans by Sellers in Commerce.

1. Made by the FTC, these rules have the same force and effect as a federal statute. Each rule must pass through a long process, including publication of the proposed rule in the *Federal Register*, hearings or written comments, and final publication in the *Code of Federal Regulations*.

General Principles of Law Governing Deceptive Acts and Practices

With a staff of some sixteen hundred and ten regional offices, the FTC is, at least from time to time, an active regulatory agency. The FTC's enforcement vigor waxes and wanes with the economic climate. Critics have often charged that what the FTC

chooses to investigate defies common sense because so many of the cases seem to involve trivial, or at least relatively unimportant, offenses: Does the nation really need a federal agency to guard us against pronouncements by singer Pat Boone on the efficacy of acne medication or to ensure the authenticity of certain crafts sold to tourists in Alaska as “native”? One answer is that through such cases, important principles of law are declared and ratified.

To be sure, most readers of this book, unlikely to be gulled by false claims, may see a certain Alice-in-Wonderland quality to FTC enforcement. But the first principle of FTC action is that it gauges deceptive acts and practices as interpreted by the general public, not by the more sophisticated. As a US court of appeals once said, the FTC Act was not “made for the protection of experts, but for the public—that vast multitude which includes the ignorant, the unthinking, and the credulous.” The deceptive statement or act need not actually deceive. Before 1983, it was sufficient that the statement had a “capacity to deceive.” According to a standard adopted in 1983, however, the FTC will take action against deceptive advertising “if there is a representation, omission or practice that is likely to mislead the consumer acting reasonably in the circumstances, to the consumer’s detriment.” Critics of the new standard have charged that it will be harder to prove deception because an advertisement must be “likely to mislead” rather than merely have a “capacity to deceive.” The FTC might also be put to the burden of showing that consumers reasonably interpreted the ad and that they relied on the ad. Whether the standard will reduce the volume of FTC actions against deceptive advertising remains to be seen.

The FTC also has the authority to proceed against “unfair...acts or practices.” These need not be deceptive but, instead, of such a character that they offend a common sense of propriety or justice or of an honest way of comporting oneself. See [Figure 49.1 "Unfair and Deceptive Practices Laws"](#) for a diagram of the unfair and deceptive practices discussed in this chapter.

Figure 49.1 *Unfair and Deceptive Practices Laws*

KEY TAKEAWAY

Although common law still serves to prohibit certain kinds of trade practices, the FTC has far more extensive powers to police unfair and deceptive trade practices. The FTC's rules, once passed through the processes defined in the Administrative Procedure Act, have the same authority as a federal statute. Trade regulation rules issued by the FTC, if violated, can trigger injunctions, fines, and other remedial actions.

EXERCISE

1. Go to the FTC website and look at its most recent annual report. Find a description of a loan modification scam, and discuss with another student why a regulatory agency is needed. Ask yourselves whether leaving it up to individual consumers to sue the scammers, using common law, would create greater good for society.

49.2 Deceptive Acts and Practices

LEARNING OBJECTIVE

1. Name the categories of deceptive acts and practices that the Federal Trade Commission has found, and give examples.

Failure to Disclose Pertinent Facts

Businesses are under no general obligation to disclose everything. Advertisers may put a bright face on their products as long as they do not make a direct material misrepresentation or misstatement. But under certain circumstances, a business may be required to disclose more than it did in order not to be involved in unfair or deceptive acts and practices. For example, failure to state the cost of a service might constitute deception. Thus a federal court has ruled that it is deceptive for a telephone service to fail to disclose that it cost fifteen dollars per call for customers dialing a special 900 number listed in newspaper advertisements offering jobs. *FTC v. Transworld Courier Services, Inc.*, 59 A&TR Rpt. 174 (N.D. Ga. 1990). Likewise, if a fact not disclosed might have a material bearing on a consumer's decision whether to purchase the product, its omission might be tantamount to deception, as *J. B. Williams Co. v. FTC* (see [Section 49.5.1 "False and Misleading Representations"](#)), suggests.

Descriptions of Products

Although certain words are considered mere puffery (*greatest, best*), other words, which have more precise connotations, can cause trouble if they are misused. One example is the word *new*. In most cases, the Federal Trade Commission (FTC) has held that if a product is more than six months old, it is not new and may not lawfully be advertised as such.

The efficacy of products is perhaps their most often advertised aspect. An ad stating that a product will do more than it can is almost always deceptive if the claim is specific. Common examples that the FTC continues to do battle over are claims that a cream, pill, or other substance will “rejuvenate” the body, “cure” baldness, “permanently remove” wrinkles, or “restore” the vitality of hair.

The composition of goods is another common category of deceptive claims. For example, a product advertised as “wool” had better be 100 percent wool; a mixture

of wool and synthetic fabrics cannot be advertised as wool. The FTC has lists of dozens of descriptive words with appropriate definitions.

Labeling of certain products is strictly regulated by specific statutes. Under the Food, Drug, and Cosmetic Act, artificial colors and flavors must be disclosed. Other specific federal statutes include the Wool Products Labeling Act, the Textile Fiber Products Identification Act, the Fur Products Labeling Act, and the Flammable Fabrics Act; these acts are enforced by the FTC. In 1966, Congress enacted the Fair Packaging and Labeling Act. It governs most consumer products and gives the FTC authority to issue regulations for proper labeling of most of them. In particular, the statute is designed to help standardize quantity descriptions (“small,” “medium,” and “large”) and enable shoppers to compare the value of competing goods in the stores.

Misleading Price and Savings Claims

“Buy one, get another for half price.” “Suggested retail price: \$25. Our price: \$5.95.” “Yours for only \$95. You save \$50.” Claims such as these assault the eye and ear daily. Unless these ads are strictly true, they are violations of Section 5 of the FTC Act. To regulate deceptive price and savings claims, the FTC has issued a series of *Guides against Deceptive Pricing* that set forth certain principles by which the commission will judge the merits of price claims. These guides are not themselves law, but they are important clues to how the FTC will act when faced with a price claim case and they may even provide guidance to state courts hearing claims of deceptive pricing ads.

In general, the guides deal with five claims, as follows:

- **Comparisons of the sale price to a former price.** The former price must have been offered for a substantial period of time in the near past for a seller to be justified in referring to it. A product that once had a price tag of \$50, but that never actually sold for more than \$40, cannot be hawked at “the former price of \$50.” Under the FTC guides, a reduction of at least 10 percent is necessary to make the claim true.
- **Comparable products.** “This same mattress and box spring would cost you \$450 at retail.” The advertisement is true only if the seller is in fact offering the same merchandise and if the price quoted is genuine.
- **“Suggested” retail price.** The same rules apply as those just mentioned. But in the case of a “manufacturer’s suggested” price, an additional wrinkle can occur: the manufacturer might help the retailer deceive by listing a “suggested” price that is in fact considerably greater than the going price in the retailer’s trading area. Whether it is

the manufacturer who is doing his own selling or the retailer who takes advantage of the “list price” ticket on the goods, the resulting claim of a bargain is deceptive if the product does not sell for the list price in any market or in the market of the retailer.

- **Bargain based on the purchase of something else.** The usual statement in these cases is “Buy one, get one free” (or at some percentage of the usual selling price). Again, the watchwords are *literal accuracy*. If the package of batteries normally sells in the advertiser’s store for ninety-nine cents, and two packages are now selling for that price, then the advertisement is unexceptionable. But advertisers are often tempted to raise the original selling price or reduce the size or quantity of the bargain product; doing so is deceptive.
- **False claims to explain a “sale” price.** “Giant clearance sale” or “going out of business” or “limited offer” are common advertising gimmicks. If true, they are legitimate, but it takes very little to make them deceptive. A “limited offer” that goes on forever (or a sale price charged beyond the date on which a sale is said to end) is deceptive. Likewise, false claims that imply the manufacturer is charging the customer a small price are illegitimate. These include claims like “wholesale price,” “manufacturer’s close-outs,” “irregulars,” or “seconds.”

Bait-and-Switch Advertisements

A common sales pitch in retail is the **bait and switch**². The retailer “baits” the prospective customer by dangling an alluring offer, but the offer either disappears or is disparaged once the customer arrives. Suppose someone sees this advertisement: “Steinway Grand Piano—only \$1,000.” But when the customer arrives at the store, he finds that the advertised product has “sold out.” The retailer then tries to sell the disappointed customer a higher priced product. Or the salesperson may have the product, but she will disparage it—pointing out that it does not really live up to the advertised expectations—and will exhort the customer to buy the “better,” more expensive model. These and related tactics are all violations of Section 5 of the FTC Act. In its *Guides Against Bait Advertising*, the FTC lists several such unfair practices, including the following: (1) refusing to demonstrate the advertised product, (2) disparaging the product (e.g., by exhibiting a visibly inferior grade of product next to higher-priced merchandise), (3) failing to stock enough of the advertised product to meet anticipated demand (although the advertiser may say “supplies limited,” if that is the case), (4) stating that delivery of the advertised product will take an inordinate amount of time, (5) demonstrating a defective product, and (6) deliberately discouraging the would-be buyer from purchasing the advertised product.

2. A sales pitch where the retailer “baits” the prospective customer by dangling a very attractive offer, which disappears or is disparaged once the customer arrives in the store.

Free Offers

Careless advertisers will discover that *free*, perhaps the most powerful word in advertising, comes at a cost. As just noted, a product is not free if it is conditional on buying another product and the price of the “free” product is included in the purchased product (“Buy one tube and get another tube free”). Just how far the commission is prepared to take this rule is clear from *F.T.C. v. Mary Carter Paint Co.*³ *F.T.C. v. Mary Carter Paint Co.*, 382 U.S. 46 (1965). In that case, the company offered, from the time it began business, to sell on a two-for-one basis: “every second can FREE, gallon or quart.” The problem was that it had never priced and sold single cans of paint, so the FTC assumed that the price of the second can was included in the first, even though Mary Carter claimed it had established single-can prices that were comparable to those for paint of comparable quality sold by competing manufacturers. The Supreme Court sustained the commission’s finding of deception.

Product Comparisons and Disparagements

Product disparagement³—saying defamatory things about a competitor’s product—is a common-law tort, actionable under state law. It is also actionable under Section 5 of the FTC Act. The FTC brands as disparagement the making of specific untrue statements about a competitor’s product. The agency labels an indirect form of disparagement “comparative misrepresentation”—making false claims of superiority of one’s own product. Again, the common-law puffing rule would permit the manufacturer of an over-the-counter pain reliever to make the general statement “Our pill is the best.” But the claim that a pill “works three times as fast as the leading competitor’s” violates Section 5 if untrue.

Truth has always been a defense to claims of product disparagement, but even that common-law rule has been eroded in recent years with the application of the *significance* doctrine. A statement may be technically true but insignificant and made in such a way as to be misleading. For example, *P. Lorillard Co. v. Federal Trade Commission* ([Section 49.5.2 "Product Comparisons"](#)) concerned a comparative study published in *Reader’s Digest* of tar and nicotine in cigarettes. The article suggested that the differences were inconsequential to health, but the company making the cigarette with the smallest amount of tar and nicotine touted the fact anyway.

3. Saying defamatory things about a competitor’s product. It is a tort of defamation under common law but is actionable under Section 5 of the FTC Act where any specific untrue statement is made about a competitor’s product.

During the 1970s, to help enforce its rules against comparative misrepresentations, the FTC began to insist that advertisers fully document any quantitative claims that their products were superior to others. This meant that the advertiser should have proof of accuracy not only if the commission comes calling; the advertiser should collect the information beforehand. If it does not, the claim will be held presumptively deceptive.

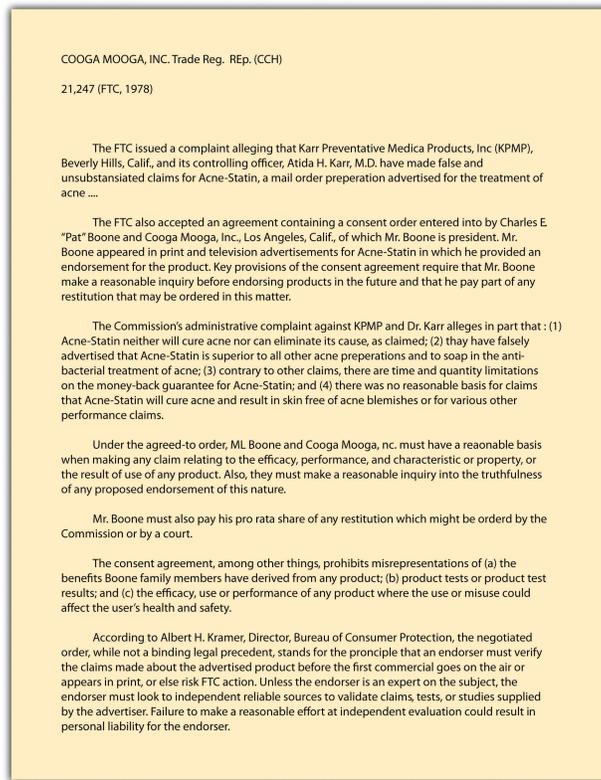

The FTC Act and state laws against misleading advertising are not the only statutes aimed at product comparisons. One important more recent federal law is the Trademark Law Revision Act of 1988, amending the original Lanham Act that protects trademarks as intellectual property (see [Chapter 32 "Intellectual Property"](#)). For many years, the federal courts had ruled that a provision in the Lanham Act prohibiting false statements in advertisements was limited to an advertiser's false statements about its own goods or services only. The 1988 amendments overturned that line of court cases, broadening the rule to cover false statements about someone else's goods or services as well. The amendments also prohibit false or misleading claims about another company's commercial activities, such as the nature of its warranties. The revised Lanham Act now permits a company injured by a competitor's false advertising to sue directly in federal court.

Endorsements

How wonderful to have a superstar (or maybe yesterday's superstar) appear on television drooling over your product. Presumably, millions of people would buy a throat spray if Lady Gaga swore by it, or a pair of jeans if Justin Bieber wore them, or a face cream if Paris Hilton blessed it. In more subtle ways, numerous products are touted every day with one form of testimonial or another: "Three out of four doctors recommend..." or "Drivers across the country use..." In this area, there are endless opportunities for deception.

It is not a deception for a well-known personality to endorse a product without disclosing that she is being paid to do so. But the person giving the testimonial must in fact use the product; if she does not, the endorsement is deceptive. Suppose an astronaut just returned to Earth is talked into endorsing suspenders ("They keep your pants from floating away") that he was seen to be wearing on televised shots of the orbital mission. If he has customarily worn them, he may properly endorse them. But if he stops wearing them for another brand or because he has decided to go back to wearing belts, reruns of the TV commercials must be pulled from the air.

Figure 49.2

Consent Decree: Pat Boone and Cooga Mooga, Inc.

That a particular consumer is in fact ecstatic about a product does not save a false statement: it is deceptive to present this glowing testimonial to the public if there are no facts to back up the customer's claim. The assertion "I was cured by apricot pits" to market a cancer remedy would not pass FTC muster. Nor may an endorser give a testimonial involving subjects known only to experts if the endorser is not himself that kind of expert, as shown in the consent decree negotiated by the FTC with singer Pat Boone (Figure 49.2).

Pictorial and Television Advertising

Pictorial representations create special problems because the picture can belie the caption or the announcer's words. A picture showing an expensive car may be deceptive if the dealer does not stock those cars or if the only readily available cars are different models. The ways of deceiving by creating false inferences through pictures are limited only by imagination. White-coated "doctors," seals of the British monarchy, and plush offices can connote various things about a product,

even if the advertisement never says that the man in the white coat is a doctor, that the product is related to the British crown, or that the company has its operations in the building depicted.

Television demonstrations may also suggest nonexistent properties or qualities in a product. In one case, the commission ordered the manufacturer of a liquid cleaner to cease showing it in use near hot stoves and candles, implying falsely that it was nonflammable. A commercial showing a knife cutting through nails is deceptive if the nails were precut and different knives were used for the before and after shots.

KEY TAKEAWAY

A variety of fairly common acts and practices have been held by the FTC to be deceptive (and illegal). These include the failure to disclose pertinent facts, misleading price and savings claims, bait and switch advertisements, careless use of the word “free,” and comparative misrepresentation—making misleading comparisons between your product and the product of another company.

EXERCISES

1. Look around this week for an example of a merchant offering something for “free.” Do you think there is anything deceptive about the merchant’s offer? If they offer “free shipping,” how do you know that the shipping cost is not hidden in the price? In any case, why do consumers need protection from an agency that polices merchant offerings that include the word *free*?
2. Find the FTC’s guide against deceptive pricing (<http://www.ftc.gov/bcp/guides/decptprc.htm>). Can you find any merchants locally that appear to be in violation of the FTC’s rules and principles?

49.3 Unfair Trade Practices

LEARNING OBJECTIVES

1. Explain how unfair trade practices are different from deceptive trade practices.
2. Name three categories of unfair trade practices, and give examples.

We turn now to certain practices that not only have deceptive elements but also operate unfairly in ways beyond mere deception. In general, three types of unfair practices will be challenged: (1) failing to substantiate material representations in advertisements before publishing them or putting them on the air, (2) failing to disclose certain material information necessary for consumers to make rational comparisons of price and quality of products, and (3) taking unconscionable advantage of certain consumers or exploiting their weakness. The Federal Trade Commission (FTC) has enjoined many ads of the first type. The second type of unfairness has led the commission to issue a number of trade regulation rules (TRRs) setting forth what must be disclosed—for example, octane ratings of gasoline. In this section, we focus briefly on the third type.

Contests and Sweepstakes

In 1971, the FTC obtained a consent order from *Reader's Digest* barring it from promoting a mail-order sweepstakes—a sweepstakes in which those responding had a chance to win large monetary or other prizes by returning numbered tickets—unless the magazine expressly disclosed how many prizes would be awarded and unless all such prizes were in fact awarded. *Reader's Digest* had heavily promoted the size and number of prizes, but few of the winning tickets were ever returned, and consequently few of the prizes were ever actually awarded. *Reader's Digest Assoc.*, 79 F.T.C. 599 (1971).

Beginning in the 1960s, the retail food and gasoline industries began to heavily promote games of chance. Investigations by the FTC and a US House of Representatives small business subcommittee showed that the games were rigged: winners were “picked” early by planting the winning cards early on in the distribution, winning cards were sent to geographic areas most in need of the promotional benefits of announcing winners, not all prizes were awarded before many games terminated, and local retailers could spot winning cards and cash them in or give them to favored customers. As a result of these investigations, the FTC in

1969 issued its Trade Regulation Rule for Games of Chance in the Food Retailing and Gasoline Industries, strictly regulating how the games may operate and be promoted.

Many marketers use contests, as opposed to sweepstakes, in merchandising their products. In a contest, the consumer must actually do something other than return a ticket, such as fill in a bingo card or come up with certain words. It is an unfair practice for the sponsoring company not to abide by its own rules in determining winners.

Door-to-Door, Direct Mail, and Unsolicited Merchandise

In 1974, the FTC promulgated a TRR requiring a three-day cooling-off period within which any door-to-door sales contract can be cancelled. The contract must state the buyer's right to the cooling-off period.

For many years, certain unscrupulous distributors would mail unsolicited merchandise to consumers and demand payment through a series of dunning letters and bills. In 1970, Congress enacted legislation that declares any unsolicited mailing and subsequent dunning to be an unfair trade practice under Section 5 of the FTC Act. Under this law, if you receive an unsolicited product in the mail, you may treat it as a gift and use it; you are under no obligation to return it or pay for it.

Another regulation of mail-order sales is the FTC's TRR concerning mail-order merchandise. Any direct-mail merchandiser must deliver the promised goods within thirty days or give the consumer an option to accept delayed delivery or a prompt refund of his money or cancellation of the order if it has not been prepaid.

Negative-Option Plans

The "negative option" was devised in the 1920s by the Book-of-the-Month Club. It is a marketing device through which the consumer responds to the seller only if she wishes *not* to receive the product. As used by book clubs and other distributors of goods that are sent out periodically, the customer agrees, when "joining," to accept and pay for all items unless she specifically indicates, before they arrive, that she wishes to reject them. If she does nothing, she must pay. Difficulties arise when the negative-option notice arrives late in the mail or when a member quits and continues to receive the monthly notices. Internet users will recognize the negative option in current use as the "opt out" process, where you are "in" unless you notice what's going on and specifically opt out.

In 1974, the FTC issued a TRR governing use of negative-option plans by sellers. The TRR laid down specific notice requirements. Among other things, a subscriber is entitled to ten days in which to notify sellers that she has rejected the particular item about to be sent. If a customer has cancelled her membership, the seller must take back and pay the former member's mailing expenses for any merchandise mailed after cancellation. The former member may treat any shipments beyond one after cancellation as unsolicited merchandise and keep it without having to pay for it or return it.

Breach of Contract

Under certain circumstances, a company's willful breach of contract can constitute an unfair trade practice, thus violating section 5 of the FTC Act. In one recent case, a termite and pest exterminating company signed contracts with its customers guaranteeing "lifetime" protection against termite damage to structures that the company treated. The contract required a customer to renew the service each year by paying an unchanging annual fee. Five years after signing these contracts, the company notified 207,000 customers that it was increasing the annual fee because of inflation. The FTC challenged the fee hike on the ground that it was a breach of contract amounting to an unfair trade practice. The FTC's charges were sustained on appeal. The eleventh circuit approved the FTC's three-part test for determining unfairness: (1) the injury "must be substantial," (2) "it must not be outweighed by countervailing benefits to consumers," and (3) "it must be an injury that consumers themselves could not reasonably have avoided." In the termite case, all three parts were met: consumers were forced to pay substantially higher fees, they received no extra benefits, and they could not have anticipated or prevented the price hike, since the contract specifically precluded them. *Orkin Exterminating Co. v. FTC*, 849 F.2d 1354 (11th Cir. 1988), *cert. denied*, 488 U.S. 1041 (1989).

KEY TAKEAWAY

Market efficiency is premised on buyers being able to make rational choices about their purchases. Where sellers fail to substantiate material representations or to disclose material information that is necessary for buyers to act rationally, the FTC may find an unfair trade practice. In addition, some sellers will take "unconscionable advantage" of certain buyers or exploit their weakness. This takes place in various contests and sweepstakes, door-to-door and mail-order selling, and negative-option plans. The FTC has issued a number of TRRs to combat some of these unfair practices.

EXERCISES

1. The FTC receives over ten thousand complaints every year about sweepstakes and prizes. Using the Internet or conversations with people you know, name two ways that sweepstakes or contests can be unfair to consumers.
2. As economic hard times return, many scam artists have approached people in debt or people who are in danger of losing their homes. Describe some of the current practices of such people and companies, and explain why they are unfair.
3. With regard to Exercise 2, discuss and decide whether government serves a useful public function by protecting consumers against such scam artists or whether use of the common law—by the individuals who have been taken advantage of—would create greater good for society.

49.4 Remedies

LEARNING OBJECTIVES

1. Describe the various remedies the Federal Trade Commission has used against unfair and deceptive acts and practices.
2. Understand that the states also have power to regulate unfair and deceptive trade practices and often do.

The Federal Trade Commission (FTC) has a host of weapons in its remedial arsenal. It may issue cease and desist orders against unfair and deceptive acts and practices and let the punishment fit the crime. For instance, the FTC can order a company to remove or modify a deceptive trade name. It may order companies to substantiate their advertising. Or if a company fails to disclose facts about a product, the commission may order the company to affirmatively disclose the facts in future advertising. In the *J. B. Williams* case ([Section 49.5.2 "Product Comparisons"](#)), the court upheld the commission's order that the company tell consumers in future advertising that the condition Geritol is supposed to treat—iron-poor blood—is only rarely the cause of symptoms of tiredness that Geritol would help cure.

The FTC has often exercised its power to order affirmative disclosures during the past decade, but its power to correct advertising deceptions is even broader. In *Warner Lambert Co. v. Federal Trade Commission*, the US court of appeals in Washington, using **corrective advertising**⁴, approved the commission's power to order a company to *correct* in future advertisements its former misleading and deceptive statements regarding Listerine mouthwash should it choose to continue to advertise the product. *Warner Lambert Co. v. Federal Trade Commission*, 562 F.2d 749 (D.C. Cir. 1977), *cert. denied*, 435 U.S. 950 (1978). The court also approved the FTC's formula for determining how much the company must spend: an amount equal to the average annual expenditure on advertising the mouthwash during the ten years preceding the case.

4. A rarely used power of the FTC to require a company to correct previously misleading advertising. It does so by requiring the company to pay for further advertising that admits to the deception and makes corrected statements that are not misleading.

In addition to its injunctive powers, the FTC may seek civil penalties of \$10,000 for violation of final cease and desist orders, and if the violation is a continuing one—an advertising campaign that lasts for weeks or months—each day is considered a separate violation. The commission may also sue for up to \$10,000 per violation, as just described, for violations of its trade regulation rules (TRRs). Under the FTC Improvement Act of 1975, the commission is authorized to seek injunctions and collect monetary damages on behalf of injured consumers in cases involving

violations of TRRs. It may also seek restitution for consumers in cases involving cease and desist orders if the party continuing to commit the unfair or deceptive practice should have known that it would be dishonest or fraudulent to continue doing so. The exact reach of this power to seek restitution, which generally had not been available before 1975, remains to be tested in the courts. As for *private* parties, though they have rights under the antitrust statutes, they have no right to sue under Section 5 of the FTC Act.

Little FTC Acts

Even when consumers have no direct remedy under federal law for unfair or deceptive acts and practices, they may have recourse under state laws modeled on the FTC Act, known as little FTC acts. All states have some sort of consumer protection act, and these acts are often more liberal than the federal unfair trade rules; they permit consumers—and in several states, even aggrieved businesses—to sue when injured by a host of “immoral, unethical, oppressive, or unscrupulous” commercial acts. Often, a successful plaintiff can recover treble damages and attorneys’ fees.

The acts are helpful to consumers because common-law fraud is difficult to prove. Its elements are rigorous and unyielding: an intentional misrepresentation of material facts, reliance by the recipient, causation, and damages. Many of these elements are omitted from consumer fraud statutes. While most statutes require some aspect of willfulness, some do not. In fact, many states relax or even eliminate the element of reliance, and some states do not even require a showing of causation or injury.

KEY TAKEAWAY

The FTC has many weapons to remedy unfair and deceptive trade practices. These include civil penalties, cease and desist orders, restitution for consumers, and corrective advertising. States have supplemented common law with their own consumer protection acts, known as little FTC acts. Remedies are similar for state statutes, and private parties may bring lawsuits directly.

EXERCISE

1. Doan's Pills are an over-the-counter medicine for low back pain. Using the Internet, find out what claims Doan's was making and why the FTC thought corrective advertising was necessary.

49.5 Cases

False and Misleading Representations

J. B. Williams Co. v. FTC

381 F.2d 884 (6th Cir. 1967)

CELEBREEZE, CIRCUIT JUDGE

The question presented by this appeal is whether Petitioners' advertising of a product, Geritol, for the relief of iron deficiency anemia, is false and misleading so as to violate Sections 5 and 12 of the Federal Trade Commission Act.

The J. B. Williams Company, Inc. is a New York corporation engaged in the sale and distribution of two products known as Geritol liquid and Geritol tablets. Geritol liquid was first marketed in August, 1950; Geritol tablets in February, 1952. Geritol is sold throughout the United States and advertisements for Geritol have appeared in newspapers and on television in all the States of the United States.

Parkson Advertising Agency, Inc. has been the advertising agency for Williams since 1957. Most of the advertising money for Geritol is spent on television advertising....

The Commission's Order requires that not only must the Geritol advertisements be expressly limited to those persons whose symptoms are due to an existing deficiency of one or more of the vitamins contained in the preparation, or due to an existing deficiency of iron, but also the Geritol advertisements must affirmatively disclose the negative fact that a great majority of persons who experience these symptoms do not experience them because they have a vitamin or iron deficiency; that for the great majority of people experiencing these symptoms, Geritol will be of no benefit. Closely related to this requirement is the further requirement of the Order that the Geritol advertisements refrain from representing that the symptoms are generally reliable indications of iron deficiency.

* * *

The main thrust of the Commission's Order is that the Geritol advertising must affirmatively disclose the negative fact that a great majority of persons who

experience these symptoms do not experience them because there is a vitamin or iron deficiency.

The medical evidence on this issue is conflicting and the question is not one which is susceptible to precise statistical analysis.

* * *

While the advertising does not make the affirmative representation that the majority of people who are tired and rundown are so because of iron deficiency anemia and the product Geritol will be an effective cure, there is substantial evidence to support the finding of the Commission that most tired people are not so because of iron deficiency anemia, and the failure to disclose this fact is false and misleading because the advertisement creates the impression that the tired feeling is caused by something which Geritol can cure.

* * *

Here the advertisements emphasize the fact that if you are often tired and run-down you will feel stronger fast by taking Geritol. The Commission, in looking at the overall impression created by the advertisements on the general public, could reasonably find these advertisements were false and misleading. The finding that the advertisements link common, non-specific symptoms with iron deficiency anemia, and thereby create a false impression because most people with these symptoms are not suffering from iron deficiency anemia, is both reasonable and supported by substantial evidence. The Commission is not bound to the literal meaning of the words, nor must the Commission take a random sample to determine the meaning and impact of the advertisements.

Petitioners argue vigorously that the Commission does not have the legal power to require them to state the negative fact that “in the great majority of persons who experience such symptoms, these symptoms are not caused by a deficiency of one or more of the vitamins contained in the preparation or by iron deficiency or iron deficiency anemia”; and “for such persons the preparation will be of no benefit.”

We believe the evidence is clear that Geritol is of no benefit in the treatment of tiredness except in those cases where tiredness has been caused by a deficiency of the ingredients contained in Geritol. The fact that the great majority of people who experience tiredness symptoms do not suffer from any deficiency of the ingredients in Geritol is a “material fact” under the meaning of that term as used in Section 15 of the Federal Trade Commission Act and Petitioners’ failure to reveal this fact in

this day when the consumer is influenced by mass advertising utilizing highly developed arts of persuasion, renders it difficult for the typical consumer to know whether the product will in fact meet his needs unless he is told what the product will or will not do....

* * *

The Commission forbids the Petitioners' representation that the presence of iron deficiency anemia can be self-diagnosed or can be determined without a medical test. The danger to be remedied here has been fully and adequately taken care of in the other requirements of the Order. We can find no Congressional policy against self-medication on a trial and error basis where the consumer is fully informed and the product is safe as Geritol is conceded to be. In fact, Congressional policy is to encourage such self-help. In effect the Commission's Order l(f) tends to place Geritol in the prescription drug field. We do not consider it within the power of the Federal Trade Commission to remove Geritol from the area of proprietary drugs and place it in the area of prescription drugs. This requirement of the Order will not be enforced. We also find this Order is not unduly vague and fairly apprises the Petitioners of what is required of them. Petition denied and, except for l(f) of the Commission's Order, enforcement of the Order will be granted

Video 49.1

[\(click to see video\)](#)

Students may be interested in a Geritol ad from 1960.

CASE QUESTIONS

1. Did the defendant actually make statements that were false? If so, what were they? Or, rather than being clearly false, were the statements deceptive? If so, how so?
2. Whether or not you feel that you have "tired blood" or "iron-poor blood," you may be amused by a Geritol ad from 1960. See Video 49.1. Do the disclaimers at the start of the ad that "the majority of tired people don't feel that way because of iron-poor blood" sound like corrective advertising? Is the ad still deceptive in some way? If so, how? If not, why not?

Product Comparisons

P. Lorillard Co. v. Federal Trade Commission

186 F.2d 52 (4th Cir. 1950)

Parker, Chief Judge

This is a petition to set aside an order of the Federal Trade Commission which directed that the P. Lorillard Company cease and desist from making certain representations found to be false in the advertising of its tobacco products. The Commission has filed an answer asking that its order be enforced. The company was ordered to cease and desist “from representing by any means directly or indirectly”:

That Old Gold cigarettes or the smoke therefrom contains less nicotine, or less tars and resins, or is less irritating to the throat than the cigarettes or the smoke therefrom of any of the six other leading brands of cigarettes.

* * *

Laboratory tests introduced in evidence show that the difference in nicotine, tars and resins of the different leading brands of cigarettes is insignificant in amount; and there is abundant testimony of medical experts that such difference as there is could result in no difference in the physiological effect upon the smoker. There is expert evidence, also, that the slight difference in the nicotine, tar and resin content of cigarettes is not constant between different brands, but varies from place to place and from time to time, and that it is a practical impossibility for the manufacturer of cigarettes to determine or to remove or substantially reduce such content or to maintain constancy of such content in the finished cigarette. This testimony gives ample support to the Commission’s findings.

* * *

The company relies upon the truth of the advertisements complained of, saying that they merely state what had been truthfully stated in an article in the Reader’s Digest. An examination of the advertisements, however, shows a perversion of the meaning of the Reader’s Digest article which does little credit to the company’s advertising department—a perversion which results in the use of the truth in such a way as to cause the reader to believe the exact opposite of what was intended by the

writer of the article. A comparison of the advertisements with the article makes this very plain. The article, after referring to laboratory tests that had been made on cigarettes of the leading brands, says:

“The laboratory’s general conclusion will be sad news for the advertising copy writers, but good news for the smoker, who need no longer worry as to which cigarette can most effectively nail down his coffin. For one nail is just about as good as another. Says the laboratory report: ‘The differences between brands are, practically speaking, small, and no single brand is so superior to its competitors as to justify its selection on the ground that it is less harmful.’ How small the variations are may be seen from the data tabulated on page 7.”

The table referred to in the article was inserted for the express purpose of showing the insignificance of the difference in the nicotine and tar content of the smoke from the various brands of cigarettes. It appears therefrom that the Old Gold cigarettes examined in the test contained less nicotine, tars and resins than the others examined, although the difference, according to the uncontradicted expert evidence, was so small as to be entirely insignificant and utterly without meaning so far as effect upon the smoker is concerned. The company proceeded to advertise this difference as though it had received a citation for public service instead of a castigation from the Reader’s Digest. In the leading newspapers of the country and over the radio it advertised that the Reader’s Digest had had experiments conducted and had found that Old Gold cigarettes were lowest in nicotine and lowest in irritating tars and resins, just as though a substantial difference in such content had been found. The following advertisement may be taken as typical:

OLD GOLDS FOUND LOWEST IN NICOTINE

OLD GOLDS FOUND LOWEST IN

THROAT-IRRITATING TARS AND RESINS

“See Impartial Test by Reader’s Digest July Issue.” See How Your Brand Compares with Old Gold.

“Reader’s Digest assigned a scientific testing laboratory to find out about cigarettes. They tested seven leading cigarettes and Reader’s Digest published the results.

“The cigarette whose smoke was lowest in nicotine was Old Gold. The cigarette with the least throat-irritating tars and resins was Old Gold.

“On both these major counts Old Gold was best among all seven cigarettes tested.

“Get July Reader’s Digest. Turn to Page 5. See what this highly respected magazine reports.

“You’ll say, ‘From now on, my cigarette is Old Gold.’ Light one? Note the mild, interesting flavor. Easier on the throat? Sure: And more smoking pleasure: Yes, it’s the new Old Gold—finer yet, since ‘something new has been added’.”

The fault with this advertising was not that it did not print all that the Reader’s Digest article said, but that it printed a small part thereof in such a way as to create an entirely false and misleading impression, not only as to what was said in the article, but also as to the quality of the company’s cigarettes. Almost anyone reading the advertisements or listening to the radio broadcasts would have gained the very definite impression that Old Gold cigarettes were less irritating to the throat and less harmful than other leading brands of cigarettes because they contained substantially less nicotine, tars and resins, and that the Reader’s Digest had established this fact in impartial laboratory tests; and few would have troubled to look up the Reader’s Digest to see what it really had said. The truth was exactly the opposite. There was no substantial difference in Old Gold cigarettes and the other leading brands with respect to their content of nicotine, tars and resins and this was what the Reader’s Digest article plainly said. The table whose meaning the advertisements distorted for the purpose of misleading and deceiving the public was intended to prove that there was no practical difference and did prove it when properly understood. To tell less than the whole truth is a well-known method of deception; and he who deceives by resorting to such method cannot excuse the deception by relying upon the truthfulness per se of the partial truth by which it has been accomplished.

In determining whether or not advertising is false or misleading within the meaning of the statute regard must be had, not to fine spun distinctions and arguments that may be made in excuse, but to the effect which it might reasonably be expected to have upon the general public. “The important criterion is the net impression which the advertisement is likely to make upon the general populace.” As was well said by Judge Coxe in *Florence Manufacturing Co. v. J. C. Dowd & Co.*, with reference to the law relating to trademarks: “The law is not made for the protection of experts, but for the public—that vast multitude which includes the ignorant, the unthinking and the credulous, who, in making purchases, do not stop to analyze, but are governed by appearances and general impressions.”

* * *

For the reasons stated, the petition to set aside the order will be denied and the order will be enforced.

CASE QUESTIONS

1. From a practical perspective, what (if anything) is wrong with caveat emptor—"let the buyer beware"? The careful consumer could have looked at the *Reader's Digest* article; the magazine was widely available in libraries and newsstands.
2. Why isn't this just an example of "puffing" the company's wares? (Puffing presents opinions rather than facts; statements like "This car is a real winner" and "Your wife will love this watch" constitute puffing.)

49.6 Summary and Exercises

Summary

Section 5 of the Federal Trade Commission (FTC) Act gives the FTC the power to enforce a provision prohibiting “unfair methods of competition and unfair or deceptive acts or practices in commerce.” Under this power, the FTC may bring enforcement proceedings against companies on a case-by-case basis or may promulgate trade regulation rules.

A deceptive act or practice need not actually deceive as long as it is “likely to mislead.” An unfair act or practice need not deceive at all but must offend a common sense of propriety or justice or of an honest way of acting. Among the proscribed acts or practices are these: failure to disclose pertinent facts, false or misleading description of products, misleading price and savings claims, bait-and-switch advertisements, free-offer claims, false product comparisons and disparagements, and endorsements by those who do not use the product or who have no reasonable basis for making the claims. Among the unfair trade practices that the FTC has sought to deter are certain types of contests and sweepstakes, high-pressure door-to-door and mail-order selling, and certain types of negative-option plans.

The FTC has a number of remedial weapons: cease and desist orders tailored to the particular deception or unfair act (including affirmative disclosure in advertising and corrections in future advertising), civil monetary penalties, and injunctions, damages, and restitution on behalf of injured consumers. Only the FTC may sue to correct violations of Section 5; private parties have no right to sue under Section 5, but they can sue for certain kinds of false advertising under the federal trademark laws.

EXERCISES

1. Icebox Ike, a well-known tackle for a professional football team, was recently signed to a multimillion-dollar contract to appear in a series of nationally televised advertisements touting the pleasures of going to the ballet and showing him in the audience watching a ballet. In fact, Icebox has never been to a ballet, although he has told his friends that he “truly believes” ballet is a “wonderful thing.” The FTC opens an investigation to determine whether there are grounds to take legal action against Icebox and the ballet company ads. What advice can you give Icebox Ike? What remedies can the FTC seek?
2. Door-to-door salespersons of an encyclopedia company offer a complete set of encyclopedias to “selected” customers. They tell customers that their only obligation is to pay for a ten-year updating service. In fact, the price of the updating service includes the cost of the encyclopedias. The FTC sues, charging deception under Section 5 of the FTC Act. The encyclopedia company defends itself on the ground that no one could possibly have been misled because everyone must have understood that no company could afford to give away a twenty-volume set of books for free. What is the result?
3. Vanessa Cosmetics takes out full-page advertisements in the local newspaper stating that “this Sunday only” the Vanessa Makeup Kit will be “reduced to only \$25.” In fact, the regular price has been \$25.50. Does this constitute deceptive advertising? Why?
4. Lilliputian Department Stores advertises a “special” on an electric carrot slicer, priced “this week only at \$10.” When customers come to the store, they find the carrot slicer in frayed boxes, and the advertised special is clearly inferior to a higher-grade carrot slicer priced at \$25. When customers ask about the difference, the store clerk tells them, “You wouldn’t want to buy the cheaper one; it wears out much too fast.” What grounds, if any, exist to charge Lilliputian with violations of the FTC Act?
5. A toothpaste manufacturer advertises that special tests demonstrate that use of its toothpaste results in fewer cavities than a “regular toothpaste.” In fact, the “regular” toothpaste was not marketed but was merely the advertiser’s brand stripped of its fluoride. Various studies over the years have demonstrated, however, that fluoride in toothpaste will reduce the number of cavities a user will get. Is this advertisement deceptive under Section 5 of the FTC Act?
6. McDonald’s advertises a sweepstakes through a mailing that says prizes are to be reserved for 15,610 “lucky winners.” The mailing further states, “You may be [a winner] but you will never know if you don’t claim your prize. All prizes not claimed will never be given away, so

hurry.” The mailing does not give the odds of winning. The FTC sues to enjoin the mailing as deceptive. What is the result?

SELF-TEST QUESTIONS

1. Section 5 of the Federal Trade Commission Act is enforceable by
 - a. a consumer in federal court
 - b. a consumer in state court
 - c. the FTC in an administrative proceeding
 - d. the FTC suing in federal court

2. The FTC
 - a. is an independent federal agency
 - b. is an arm of the Justice Department
 - c. supersedes Congress in defining deceptive trade practices
 - d. speaks for the president on consumer matters

3. A company falsely stated that its competitor's product "won't work." Which of the following statements is false?
 - a. The competitor may sue the company under state law.
 - b. The competitor may sue the company for violating the FTC Act.
 - c. The competitor may sue the company for violating the Lanham Act.
 - d. The FTC may sue the company for violating the FTC Act.

4. The FTC may order a company that violated Section 5 of the FTC Act by false advertising
 - a. to go out of business
 - b. to close down the division of the company that paid for false advertising
 - c. to issue corrective advertising
 - d. to buy back from its customers all the products sold by the advertising

5. The ingredients in a nationally advertised cupcake must be disclosed on the package under
 - a. state common law

- b. a trade regulation rule promulgated by the FTC
- c. the federal Food, Drug, and Cosmetic Act
- d. an executive order of the president

Chapter 50

Employment Law

LEARNING OBJECTIVES

After reading this chapter, you should understand the following:

1. How common-law employment at will is modified by common-law doctrine, federal statutes, and state statutes
2. Various kinds of prohibited discrimination under Title VII and examples of each kind
3. The various other protections for employees imposed by federal statute, including the Age Discrimination in Employment Act (ADEA) and the Americans with Disabilities Act (ADA)

In the next chapter, we will examine the laws that govern the relationship between the employer and the employee who belongs, or wants to belong, to a union. Although federal labor law is confined to that relationship, laws dealing with the employment relationship—both state and federal—are far broader than that. Because most employees do not belong to unions, a host of laws dealing with the many faces of discrimination shapes employers' power over and duties to their employees. Beyond the issue of discrimination, the law also governs a number of other issues, such as the extent to which an employer may terminate the relationship itself. We examine these issues later in this chapter.

Even before statutes governing collective bargaining and various state and federal discrimination laws, the common law set the boundaries for employer-employee relationships. The basic rule that evolved prior to the twentieth century was "employment at will." We will look at employment at will toward the end of this chapter. But as we go through the key statutes on employment law and employment discrimination, bear in mind that these statutes stand as an important set of exceptions to the basic common-law rule of **employment at will**¹. That rule holds that in the absence of a contractual agreement otherwise, an employee is free to leave employment at any time and for any reason; similarly, an employer is free to fire employees at any time and for any reason.

1. The common-law doctrine that allows employers to discharge an employee at any time and for any reason or for no reason. Courts have created exceptions for "bad reasons."

50.1 Federal Employment Discrimination Laws

LEARNING OBJECTIVES

1. Know the various federal discrimination laws and how they are applied in various cases.
2. Distinguish between disparate impact and disparate treatment cases.
3. Understand the concept of affirmative action and its limits in employment law.

As we look at federal **employment discrimination**² laws, bear in mind that most states also have laws that prohibit various kinds of discriminatory practices in employment. Until the 1960s, Congress had intruded but little in the affairs of employers except in union relationships. A company could refuse to hire members of racial minorities, exclude women from promotions, or pay men more than women for the same work. But with the rise of the civil rights movement in the early 1960s, Congress (and many states) began to legislate away the employer's frequently exercised power to discriminate. The most important statutes are Title VII of the Civil Rights Act of 1964, the Equal Pay Act of 1963, the Age Discrimination in Employment Act of 1967, and the Americans with Disabilities Act of 1990.

Title VII of the Civil Rights Act of 1964

The most basic antidiscrimination law in employment is in Title VII of the federal Civil Rights Act of 1964. The key prohibited discrimination is that based on race, but Congress also included sex, religion, national origin, and color as prohibited bases for hiring, promotion, layoff, and discharge decisions. To put the Civil Rights Act in its proper context, a short history of racial discrimination in the United States follows.

The passage of the Civil Rights Act of 1964 was the culmination of a long history that dated back to slavery, the founding of the US legal system, the Civil War, and many historical and political developments over the ninety-nine years from the end of the Civil War to the passage of the act. The years prior to 1964 had seen a remarkable rise of civil disobedience, led by many in the civil rights movement but most prominently by Dr. Martin Luther King Jr. Peaceful civil disobedience was sometimes met with violence, and television cameras were there to record most of it.

2. Treating employees or job applicants unequally on the basis of race, color, national origin, religion, sex (gender), age, or disability; prohibited by federal statutes and many state statutes.

While the Civil War had addressed slavery and the secession of Southern states, the Thirteenth, Fourteenth, and Fifteenth Amendments, ratified just after the war, provided for equal protection under the law, guaranteed citizenship, and protected the right to vote for African Americans. The amendments also allowed Congress to enforce these provisions by enacting appropriate, specific legislation.

But during the Reconstruction Era, many of the Southern states resisted the laws that were passed in Washington, DC, to bolster civil rights. To a significant extent, decisions rendered by the US Supreme Court in this era—such as *Plessy v. Ferguson*, condoning “separate but equal” facilities for different races—restricted the utility of these new federal laws. The states effectively controlled the public treatment of African Americans, and a period of neglect set in that lasted until after World War II. The state laws essentially mandated segregated facilities (restaurants, hotels, schools, water fountains, public bathrooms) that were usually inferior for blacks.

Along with these Jim Crow laws in the South, the Ku Klux Klan was very strong, and lynchings (hangings without any sort of public due process) by the Klan and others were designed to limit the civil and economic rights of the former slaves. The hatred of blacks from that era by many whites in America has only gradually softened since 1964. Even as the civil rights bill was being debated in Congress in 1964, some Young Americans for Freedom in the right wing of the GOP would clandestinely chant “Be a man, join the Klan” and sing “We will hang Earl Warren from a sour apple tree,” to the tune of “Battle Hymn of the Republic,” in anger over the Chief Justice’s presiding over *Brown v. Board of Education*, which reversed *Plessy v. Ferguson*.

But just a few years earlier, the public service and heroism of many black military units and individuals in World War II had created a perceptual shift in US society; men of many races who had served together in the war against the Axis powers (fascism in Europe and the Japanese emperor’s rule in the Pacific) began to understand their common humanity. Major migrations of blacks from the South to industrial cities of the North also gave impetus to the civil rights movement.

Bills introduced in Congress regarding employment policy brought the issue of civil rights to the attention of representatives and senators. In 1945, 1947, and 1949, the House of Representatives voted to abolish the poll tax. The poll tax was a method used in many states to confine voting rights to those who could pay a tax, and often, blacks could not. The Senate did not go along, but these bills signaled a growing interest in protecting civil rights through federal action. The executive branch of government, by presidential order, likewise became active by ending discrimination in the nation’s military forces and in federal employment and work done under government contract.

The Supreme Court gave impetus to the civil rights movement in its reversal of the “separate but equal” doctrine in the *Brown v. Board of Education* decision. In its 1954 decision, the Court said, “To separate black children from others of similar age and qualifications solely because of their race generates a feeling of inferiority as to their status in the community that may affect their hearts and minds in a way never to be undone....We conclude that in the field of public education the doctrine of separate but equal has no place. Separate educational facilities are inherently unequal.”

This decision meant that white and black children could not be forced to attend separate public schools. By itself, however, this decision did not create immediate gains, either in public school desegregation or in the desegregation of other public facilities. There were memorable standoffs between federal agents and state officials in Little Rock, Arkansas, for example; the Democratic governor of Arkansas personally blocked young black students from entering Little Rock’s Central High School, and it was only President Eisenhower’s order to have federal marshals accompany the students that forced integration. The year was 1957.

But resistance to public school integration was widespread, and other public facilities were not governed by the *Brown* ruling. Restaurants, hotels, and other public facilities were still largely segregated. Segregation kept blacks from using public city buses, park facilities, and restrooms on an equal basis with whites. Along with inferior schools, workplace practices throughout the South and also in many Northern cities sharply limited African Americans’ ability to advance economically. Civil disobedience began to grow.

The bus protests in Montgomery, Alabama, were particularly effective. Planned by civil rights leaders, Rosa Parks’s refusal to give up her seat to a white person and sit at the back of the public bus led to a boycott of the Montgomery bus system by blacks and, later, a boycott of white businesses in Montgomery. There were months of confrontation and some violence; finally, the city agreed to end its long-standing rules on segregated seating on buses.

There were also protests at lunch counters and other protests on public buses, where groups of Northern protesters—Freedom Riders—sometimes met with violence. In 1962, James Meredith’s attempt to enroll as the first African American at the University of Mississippi generated extreme hostility; two people were killed and 375 were injured as the state resisted Meredith’s admission. The murders of civil rights workers Medgar Evers and William L. Moore added to the inflamed sentiments, and whites in Birmingham, Alabama, killed four young black girls who were attending Sunday school when their church was bombed.

These events were all covered by the nation's news media, whose photos showed beatings of protesters and the use of fire hoses on peaceful protesters. Social tensions were reaching a postwar high by 1964. According to the government, there were nearly one thousand civil rights demonstrations in 209 cities in a three-month period beginning May 1963. Representatives and senators could not ignore the impact of social protest. But the complicated political history of the Civil Rights Act of 1964 also tells us that the legislative result was anything but a foregone conclusion. See CongressLink, "Major Features of the Civil Rights Act of 1964," at http://www.congresslink.org/print_basics_histmats_civilrights64text.htm.

In Title VII of the Civil Rights Act of 1964, Congress for the first time outlawed discrimination in employment based on race, religion, sex, or national origin. Title VII declares: "It shall be an unlawful employment practice for an employer to fail or refuse to hire or to discharge any individual, or otherwise to discriminate against any individual with respect to his compensation, terms, conditions, or privileges of employment, because of such individual's race, color, religion, sex, or national origin." Title VII applies to (1) employers with fifteen or more employees whose business affects interstate commerce, (2) all employment agencies, (3) labor unions with fifteen or more members, (4) state and local governments and their agencies, and (5) most federal government employment.

In 1984, the Supreme Court said that Title VII applies to partnerships as well as corporations when ruling that it is illegal to discriminatorily refuse to promote a female lawyer to partnership status in a law firm. This applies, by implication, to other fields, such as accounting. *Hishon v. King & Spalding*, 467 U.S. 69 (1984). The remedy for unlawful discrimination is back pay and hiring, reinstatement, or promotion.

Title VII established the Equal Employment Opportunity Commission (EEOC) to investigate violations of the act. A victim of discrimination who wishes to file suit must first file a complaint with the EEOC to permit that agency to attempt conciliation of the dispute. The EEOC has filed a number of lawsuits to prove statistically that a company has systematically discriminated on one of the forbidden bases. The EEOC has received perennial criticism for its extreme slowness in filing suits and for failure to handle the huge backlog of complaints with which it has had to wrestle.

3. A form of employment discrimination that results when an employer intentionally discriminates against employees who are members of protected classes.

The courts have come to recognize two major types of Title VII cases:

1. Cases of **disparate treatment**³

- In this type of lawsuit, the plaintiff asserts that because of race, sex, religion, or national origin, he or she has been treated less favorably than others within the organization. To prevail in a disparate treatment suit, the plaintiff must show that the company *intended* to discriminate because of one of the factors the law forbids to be considered. Thus in *McDonnell Douglas Corp. v. Green*, the Supreme Court held that the plaintiff had shown that the company intended to discriminate by refusing to rehire him because of his race. *McDonnell Douglas Corp. v. Green*, 411 U.S. 792 (1973). In general, there are two types of disparate treatment cases: (1) pattern-and-practice cases, in which the employee asserts that the employer systematically discriminates on the grounds of race, religion, sex, or national origin; and (2) reprisal or retaliation cases, in which the employee must show that the employer discriminated against him or her because that employee asserted his or her Title VII rights.

2. Cases of **disparate impact**⁴

- In this second type of Title VII case, the employee need not show that the employer intended to discriminate but only that the effect, or impact, of the employer's action was discriminatory. Usually, this impact will be upon an entire class of employees. The plaintiff must demonstrate that the reason for the employer's conduct (such as refusal to promote) was not job related. Disparate impact cases often arise out of practices that appear to be neutral or nondiscriminatory on the surface, such as educational requirements and tests administered to help the employer choose the most qualified candidate. In the seminal case of *Griggs v. Duke Power Co.*, the Supreme Court held that under Title VII, an employer is not free to use any test it pleases; the test must bear a genuine relationship to job performance. *Griggs v. Duke Power Co.*, 401 U.S. 424 (1971). *Griggs* stands for the proposition that Title VII "prohibits employment practices that have discriminatory effects as well as those that are intended to discriminate."

4. A form of employment discrimination resulting from employer practices that appear to be neutral but that have a discriminatory impact on protected classes.

Figure 50.1 A Checklist of Employment Law

Discrimination Based on Religion

An employer who systematically refuses to hire Catholics, Jews, Buddhists, or members of any other religious group engages in unlawful disparate treatment under Title VII. But refusal to deal with someone because of his or her religion is not the only type of violation under the law. Title VII defines religion as including religious observances and practices as well as belief and requires the employer to “reasonably accommodate to an employee’s or prospective employee’s religious observance or practice” unless the employer can demonstrate that a reasonable accommodation would work an “undue hardship on the conduct of the employer’s business.” Thus a company that refused even to consider permitting a devout Sikh to wear his religiously prescribed turban on the job would violate Title VII.

But the company need not make an accommodation that would impose more than a minimal cost. For example, an employee in an airline maintenance department, open twenty-four hours a day, wished to avoid working on his Sabbath. The employee belonged to a union, and under the collective bargaining agreement, a rotation system determined by seniority would have put the worker into a work shift that fell on his Sabbath. The Supreme Court held that the employer was not

required to pay premium wages to someone whom the seniority system would not require to work on that day and could discharge the employee if he refused the assignment. *Trans World Airlines v. Hardison*, 432 U.S. 63 (1977).

Title VII permits religious organizations to give preference in employment to individuals of the same religion. Obviously, a synagogue looking for a spiritual leader would hire a rabbi and not a priest.

Sex Discrimination

A refusal to hire or promote a woman simply because she is female is a clear violation of Title VII. Under the Pregnancy Act of 1978, Congress declared that discrimination because of pregnancy is a form of sex discrimination. Equal pay for equal or comparable work has also been an issue in sex (or gender) discrimination. *Barbano v. Madison County* (see [Section 50.4.1 "Disparate Treatment: Burdens of Proof"](#)), presents a straightforward case of sex discrimination. In that case, notice how the plaintiff has the initial burden of proving discriminatory intent and how the burden then shifts to the defendant to show a plausible, nondiscriminatory reason for its hiring decision.

The late 1970s brought another problem of sex discrimination to the fore: **sexual harassment**⁵. There is much fear and ignorance about sexual harassment among both employers and employees. Many men think they cannot compliment a woman on her appearance without risking at least a warning by the human resources department. Many employers have spent significant time and money trying to train employees about sexual harassment, so as to avoid lawsuits. Put simply, sexual harassment involves unwelcome sexual advances, requests for sexual favors, and other verbal or physical conduct of a sexual nature.

There are two major categories of sexual harassment: (1) quid pro quo and (2) hostile work environment.

Quid pro quo comes from the Latin phrase “one thing in return for another.” If any part of a job is made conditional on sexual activity, there is quid pro quo sexual harassment. Here, one person’s power over another is essential; a coworker, for example, is not usually in a position to make sexual demands on someone at his same level, unless he has special influence with a supervisor who has power to hire, fire, promote, or change work assignments. A supervisor, on the other hand, typically has those powers or the power to influence those kinds of changes. For example, when the male foreman says to the female line worker, “I can get you off of the night shift if you’ll sleep with me,” there is quid pro quo sexual harassment.

5. Demands for sexual favors in return for job promotions or other benefits, or language or conduct so sexually offensive that it creates a hostile work environment, disadvantaging the employee on the basis of sex.

In *Harris v. Forklift Systems, Inc.*, 510 U.S. 17 (1993), and in *Meritor v. Vinson*, 477 U.S. 57 (1986), we see examples of hostile work environment. Hostile work environment claims are more frequent than quid pro quo claims and so are more worrisome to management. An employee has a valid claim of sexual harassment if sexual talk, imagery, or behavior becomes so pervasive that it interferes with the employee's ability to work to her best capacity. On occasion, courts have found that offensive jokes, if sufficiently frequent and pervasive in the workplace, can create a hostile work environment. Likewise, comments about body parts or public displays of pornographic pictures can also create a hostile work environment. In short, the plaintiff can be detrimentally offended and hindered in the workplace even if there are no measurable psychological injuries.

In the landmark hostile work environment case of *Meritor v. Vinson*, the Supreme Court held that Title VII's ban on sexual harassment encompasses more than the trading of sexual favors for employment benefits. Unlawful sexual harassment also includes the creation of a hostile or offensive working environment, subjecting both the offending employee and the company to damage suits even if the victim was in no danger of being fired or of losing a promotion or raise.

In recalling *Harris v. Forklift Systems* ([Chapter 1 "Introduction to Law and Legal Systems", Section 1.6 "A Sample Case"](#)), we see that the "reasonable person" standard is declared by the court as follows: "So long as the environment would reasonably be perceived, and is perceived, as hostile or abusive there is no need for it also to be psychologically injurious." In *Duncan v. General Motors Corporation* (see [Section 50.4.2 "Title VII and Hostile Work Environment"](#)), *Harris* is used as a precedent to deny relief to a woman who was sexually harassed, because the court believed the conditions were not severe or pervasive enough to unreasonably interfere with her work.

Sex discrimination in terms of wages and benefits is common enough that a number of sizeable class action lawsuits have been brought. A class action lawsuit is generally initiated by one or more people who believe that they, along with a group of other people, have been wronged in similar ways. Class actions for sexual harassment have been successful in the past. On June 11, 1998, the EEOC reached a \$34 million settlement with Mitsubishi over allegations of widespread sexual harassment at the Normal, Illinois, auto plant. The settlement involved about five hundred women who split the \$34 million, although only seven received the maximum \$300,000 allowed by law. The others received amounts ranging from \$8,000 to \$225,000.

Class action lawsuits involve specific plaintiffs (called class plaintiffs or class representatives) who are named in the class action lawsuit to assert the claims of the unnamed or absent members of the class; thus all those with a common complaint need not file their own separate lawsuit. From the point of view of plaintiffs who may have lost only a few thousand dollars annually as a result of the discrimination, a class action is advantageous: almost no lawyer would take a complicated civil case that had a potential gain of only a few thousand dollars. But if there are thousands of plaintiffs with very similar claims, the judgment could be well into the millions. Defendants can win the procedural battle by convincing a court that the proposed class of plaintiffs does not present common questions of law or of fact.

In the Wal-Mart class action case decided by the Supreme Court in 2011, three named plaintiffs (Dukes, Arana, and Kwapnoski) represented a proposed class of 1.5 million current or former Wal-Mart employees. The plaintiffs' attorneys asked the trial court in 2001 to certify as a class all women employed at any Wal-Mart domestic retail store at any time since December of 1998. As the case progressed through the judicial system, the class grew in size. If the class was certified, and discrimination proven, Wal-Mart could have been liable for over \$1 billion in back pay. So Wal-Mart argued that as plaintiffs, the cases of the 1.5 million women did not present common questions of law or of fact—that is, that the claims were different enough that the Court should not allow a single class action lawsuit to present such differing kinds of claims. Initially, a federal judge disagreed, finding the class sufficiently coherent for purposes of federal civil procedure. The US Court of Appeals for the Ninth Circuit upheld the trial judge on two occasions.

But the US Supreme Court agreed with Wal-Mart. In the majority opinion, Justice Scalia discussed the commonality condition for class actions.

Quite obviously, the mere claim by employees of the same company that they have suffered a Title VII injury, or even a disparate impact Title VII injury, gives no cause to believe that all their claims can productively be litigated at once. Their claims must depend upon a common contention—for example, the assertion of discriminatory bias on the part of the same supervisor. That common contention, moreover, must be of such a nature that it is capable of classwide resolution—which means that determination of its truth or falsity will resolve an issue that is central to the validity of each one of the claims in one stroke.⁵⁶⁴ U.S. ___ (2011).

Finding that there was no common contention, the Supreme Court reversed the lower courts. Many commentators, and four dissenting Justices, believed that the majority opinion has created an unnecessarily high hurdle for class action plaintiffs in Title VII cases.

Discrimination Based on Race, Color, and National Origin

Title VII was primarily enacted to prohibit employment discrimination based on race, color, and national origin. Race refers to broad categories such as black, Caucasian, Asian, and Native American. Color simply refers to the color of a person's skin, and national origin refers to the country of the person's ancestry.

Exceptions to Title VII

Merit

Employers are allowed to select on merit and promote on merit without offending title VII's requirements. Merit decisions are usually based on work, educational experience, and ability tests. All requirements, however, must be job related. For example, the ability to lift heavy cartons of sixty pounds or more is appropriate for certain warehouse jobs but is not appropriate for all office workers. The ability to do routine maintenance (electrical, plumbing, construction) is an appropriate requirement for maintenance work but not for a teaching position. Requiring someone to have a high school degree, as in *Griggs vs. Duke Power Co.*, is not appropriate as a qualification for common labor.

Seniority

Employers may also maintain seniority systems that reward workers who have been with the company for a long time. Higher wages, benefits, and choice of working hours or vacation schedules are examples of rewards that provide employees with an incentive to stay with the company. If they are not the result of intentional discrimination, they are lawful. Where an employer is dealing with a union, it is typical to see seniority systems in place.

Bona Fide Occupational Qualification (BFOQ)

For certain kinds of jobs, employers may impose **bona fide occupational qualifications (BFOQs)**⁶. Under the express terms of Title VII, however, a bona fide (good faith) occupational qualification of race or color is never allowed. In the area of religion, as noted earlier, a group of a certain religious faith that is searching for a new spiritual leader can certainly limit its search to those of the same religion. With regard to sex (gender), allowing women to be locker-room attendants only in a women's gym is a valid BFOQ. One important test that the courts employ in evaluating an employer's BFOQ claims is the "essence of the business" test.

In *Diaz v. Pan American World Airways, Inc.*, the airline maintained a policy of exclusively hiring females for its flight attendant positions. *Diaz v. Pan American*

6. Employers may require that employees be of a certain religion, sex, or national origin where that requirement is made in good faith and goes to the essence of the business. Race and color cannot be BFOQs.

World Airways, Inc., 442 F.2d 385 (5th Cir. 1971). The essence of the business test was established with the court's finding that "discrimination based on sex is valid only when the essence of the business operation would be undermined by not hiring members of one sex exclusively." Although the court acknowledged that females might be better suited to fulfill the required duties of the position, this was not enough to fulfill the essence of the business test:

The primary function of an airline is to transport passengers safely from one point to another. While a pleasant environment, enhanced by the obvious cosmetic effect that female stewardesses provide as well as...their apparent ability to perform the non-mechanical functions of the job in a more effective manner than most men, may all be important, they are tangential to the essence of the business involved. No one has suggested that having male stewards will so seriously affect the operation of an airline as to jeopardize or even minimize its ability to provide safe transportation from one place to another. *Diaz v. Pan American World Airways, Inc.*, 442 F.2d 385 (5th Cir. 1971).

The reason that airlines now use the gender-neutral term *flight attendant* is a direct result of Title VII. In the 1990s, Hooters had some difficulty convincing the EEOC and certain male plaintiffs that only women could be hired as waitstaff in its restaurants. With regard to national origin, directors of movies and theatrical productions would be within their Title VII BFOQ rights to restrict the roles of fictional Asians to those actors whose national origin was Asian, but could also permissibly hire Caucasian actors made up in "yellow face."

Defenses in Sexual Harassment Cases

In the 1977 term, the US Supreme Court issued two decisions that provide an affirmative defense in some sexual harassment cases. In *Faragher v. City of Boca Raton*, 524 U.S. 775 (1998). and in *Burlington Industries, Inc. v. Ellerth*, 524 U.S. 742 (1998). female employees sued for sexual harassment. In each case, they proved that their supervisors had engaged in unconsented-to touching as well as verbal sexual harassment. In both cases, the plaintiff quit her job and, after going through the EEOC process, got a right-to-sue letter and in fact sued for sexual harassment. In *Faragher*, the employer had never disseminated the policy against sexual harassment to its employees. But in the second case, *Burlington Industries*, the employer had a policy that was made known to employees. Moreover, a complaints system had been established that was not used by the female employee.

Both opinions rejected the notion of strict or automatic liability for employers when agents (employees) engage in sexual harassment. But the employer can have a

valid defense to liability if it can prove (1) that it exercised reasonable care to prevent and correct any sexual harassment behaviors and (2) that the plaintiff employee unreasonably failed to take advantage of any preventive or corrective opportunities provided by the employer or to otherwise avoid harm. As with all affirmative defenses, the employer has the burden of proving this defense.

Affirmative Action

Affirmative action⁷ is mentioned in the statutory language of Title VII, as courts have the power to order affirmative action as a remedy for the effects of past discriminatory actions. In addition to court-ordered affirmative action, employers may voluntarily use an affirmative action plan to remedy the effects of past practices or to achieve diversity within the workforce to reflect the diversity in their community. In *Johnson v. Santa Clara County Transportation Agency*, *Johnson v. Santa Clara County Transportation Agency*, 480 U.S. 616 (1987), the agency had an affirmative action plan. A woman was promoted from within to the position of dispatcher, even though a male candidate had a slightly higher score on a test that was designed to measure aptitude for the job. The man brought a lawsuit alleging sex discrimination. The Court found that voluntary affirmative action was not reverse discrimination in this case, but employers should be careful in hiring and firing and layoff decisions versus promotion decisions. It is in the area of promotions that affirmative action is more likely to be upheld.

In government contracts, President Lyndon Johnson's Executive Order 11246 prohibits private discrimination by federal contractors. This is important, because one-third of all US workers are employed by companies that do business with the federal government. Because of this executive order, many companies that do business with the government have adopted voluntary affirmative action programs. In 1995, the Supreme Court limited the extent to which the government could require contractors to establish affirmative action programs. The Court said that such programs are permissible only if they serve a "compelling national interest" and are "narrowly tailored" so that they minimize the harm to white males. To make a requirement for contractors, the government must show that the programs are needed to remedy past discrimination, that the programs have time limits, and that nondiscriminatory alternatives are not available. *Adarand Constructors, Inc. v. Peña*, 515 U.S. 200 (1995).

7. Actions by an employer, either court-ordered or voluntary, that are designed to make up for past discrimination by hiring or promoting previously disadvantaged classes of workers.

The Age Discrimination in Employment Act

The Age Discrimination in Employment Act (ADEA) of 1967 (amended in 1978 and again in 1986) prohibits discrimination based on age, and recourse to this law has been growing at a faster rate than any other federal anti-bias employment law. In particular, the act protects workers over forty years of age and prohibits forced

retirement in most jobs because of age. Until 1987, federal law had permitted mandatory retirement at age seventy, but the 1986 amendments that took effect January 1, 1987, abolished the age ceiling except for a few jobs, such as firefighters, police officers, tenured university professors, and executives with annual pensions exceeding \$44,000. Like Title VII, the law has a BFOQ exception—for example, employers may set reasonable age limitations on certain high-stress jobs requiring peak physical condition.

There are important differences between the ADEA and Title VII, as *Gross v. FBL Financial Services, Inc.* ([Section 50.4.3 "Age Discrimination: Burden of Persuasion"](#)) makes clear. It is now more difficult to prove an age discrimination claim than a claim under Title VII.

Disabilities: Discrimination against the Handicapped

The 1990 Americans with Disabilities Act (ADA) prohibits employers from discriminating on the basis of disability. A disabled person is someone with a physical or mental impairment that substantially limits a major life activity or someone who is regarded as having such an impairment. This definition includes people with mental illness, epilepsy, visual impairment, dyslexia, and AIDS. It also covers anyone who has recovered from alcoholism or drug addiction. It specifically does not cover people with sexual disorders, pyromania, kleptomania, exhibitionism, or compulsive gambling.

Employers cannot disqualify an employee or job applicant because of disability as long as he or she can perform the essential functions of the job, with reasonable accommodation. Reasonable accommodation might include installing ramps for a wheelchair, establishing more flexible working hours, creating or modifying job assignments, and the like.

Reasonable accommodation means that there is no undue hardship for the employer. The law does not offer uniform standards for identifying what may be an undue hardship other than the imposition on the employer of a “significant difficulty or expense.” Cases will differ: the resources and situation of each particular employer relative to the cost or difficulty of providing the accommodation will be considered; relative cost, rather than some definite dollar amount, will be the issue.

As with other areas of employment discrimination, job interviewers cannot ask questions about an applicant’s disabilities before making a job offer; the interviewer may only ask whether the applicant can perform the work. Requirements for a medical exam are a violation of the ADA unless the exam is job related and required

of all applicants for similar jobs. Employers may, however, use drug testing, although public employers are to some extent limited by the Fourth Amendment requirements of reasonableness.

The ADA's definition of disability is very broad. However, the Supreme Court has issued several important decisions that narrow the definition of what constitutes a disability under the act.

Two kinds of narrowing decisions stand out: one deals with "correctable conditions," and the other deals with repetitive stress injuries. In 1999, the Supreme Court reviewed a case that raised an issue of whether severe nearsightedness (which can be corrected with lenses) qualifies as a disability under the ADA. *Sutton v. United Airlines, Inc.*, 527 U.S. 471 (1999). The Supreme Court ruled that disability under the ADA will be measured according to how a person functions with corrective drugs or devices and not how the person functions without them. In *Orr v. Wal-Mart Stores, Inc.*, a federal appellate court held that a pharmacist who suffered from diabetes did not have a cause of action against Wal-Mart under the ADA as long as the condition could be corrected by insulin. *Orr v. Wal-Mart Stores, Inc.*, 297 F.3d 720 (8th Cir. 2002).

The other narrowing decision deals with repetitive stress injuries. For example, carpal tunnel syndrome—or any other repetitive stress injury—could constitute a disability under the ADA. By compressing a nerve in the wrist through repetitive use, carpal tunnel syndrome causes pain and weakness in the hand. In 2002, the Supreme Court determined that while an employee with carpal tunnel syndrome could not perform all the manual tasks assigned to her, her condition did not constitute a disability under the ADA because it did not "extensively limit" her major life activities. (See [Section 50.4.4 "Disability Discrimination"](#).)

Equal Pay Act

The Equal Pay Act of 1963 protects both men and women from pay discrimination based on sex. The act covers all levels of private sector employees and state and local government employees but not federal workers. The act prohibits disparity in pay for jobs that require equal skill and equal effort. Equal skill means equal experience, and equal effort means comparable mental and/or physical exertion. The act prohibits disparity in pay for jobs that require equal responsibility, such as equal supervision and accountability, or similar working conditions.

In making their determinations, courts will look at the stated requirements of a job as well as the actual requirements of the job. If two jobs are judged to be equal and similar, the employer cannot pay disparate wages to members of different sexes.

Along with the EEOC enforcement, employees can also bring private causes of action against an employer for violating this act. There are four criteria that can be used as defenses in justifying differentials in wages: seniority, merit, quantity or quality of product, and any factor other than sex. The employer will bear the burden of proving any of these defenses.

A defense based on merit will require that there is some clearly measurable standard that justifies the differential. In terms of quantity or quality of product, there may be a commission structure, piecework structure, or quality-control-based payment system that will be permitted. Factors “other than sex” do not include so-called market forces. In *Glenn v. General Motors Corp.*, the US Court of Appeals for the Eleventh Circuit rejected General Motor’s argument that it was justified in paying three women less than their male counterparts on the basis of “the market force theory” that women will work for less than a man. *Glenn v. General Motors Corp.*, 841 F.2d 1567 (1988).

KEY TAKEAWAY

Starting with employment at will as a common-law doctrine, we see many modifications by statute, particularly after 1960. Title VII of the Civil Rights Act of 1964 is the most significant, for it prohibits employers engaged in interstate commerce from discriminating on the basis of race, color, sex, religion, or national origin.

Sex discrimination, especially sexual harassment, has been a particularly fertile source of litigation. There are many defenses to Title VII claims: the employer may have a merit system or a seniority system in place, or there may be bona fide occupational qualifications in religion, gender, or national origin. In addition to Title VII, federal statutes limiting employment discrimination are the ADEA, the ADA, and the Equal Pay Act.

EXERCISES

1. Go to the EEOC website. Describe the process by which an employee or ex-employee who wants to make a Title VII claim obtains a right-to-sue letter from the EEOC.
2. Again, looking at the EEOC website, find the statistical analysis of Title VII claims brought to the EEOC. What kind of discrimination is most frequent?
3. According to the EEOC website, what is “retaliation”? How frequent are retaliation claims relative to other kinds of claims?
4. Greg Connolly is a member of the Church of God and believes that premarital sex and abortion are sinful. He works as a pharmacist for Wal-Mart, and at many times during the week, he is the only pharmacist available to fill prescriptions. One product sold at his Wal-Mart is the morning-after pill (RU 468). Based on his religious beliefs, he tells his employer that he will refuse to fill prescriptions for the morning-after pill. Must Wal-Mart make a reasonable accommodation to his religious beliefs?

50.2 Employment at Will

LEARNING OBJECTIVES

1. Understand what is meant by employment at will under common law.
2. Explain the kinds of common-law (judicially created) exceptions to the employment-at-will doctrine, and provide examples.

At common law, an employee without a contract guaranteeing a job for a specific period was an employee at will and could be fired at any time and for any reason, or even for no reason at all. The various federal statutes we have just examined have made inroads on the at-will doctrine. Another federal statute, the Occupational Safety and Health Act, prohibits employers from discharging employees who exercise their rights under that law.

The courts and legislatures in more than forty states have made revolutionary changes in the at-will doctrine. They have done so under three theories: tort, contract, and duty of good faith and fair dealing. We will first consider the tort of wrongful discharge.

Courts have created a major exception to the employment-at-will rule by allowing the tort of wrongful discharge. *Wrongful discharge* means firing a worker for a bad reason. What is a bad reason? A bad reason can be (1) discharging an employee for refusing to violate a law, (2) discharging an employee for exercising a legal right, (3) discharging an employee for performing a legal duty, and (4) discharging an employee in a way that violates public policy.

Discharging an Employee for Refusing to Violate a Law

Some employers will not want employees to testify truthfully at trial. In one case, a nurse refused a doctor's order to administer a certain anesthetic when she believed it was wrong for that particular patient; the doctor, angry at the nurse for refusing to obey him, then administered the anesthetic himself. The patient soon stopped breathing. The doctor and others could not resuscitate him soon enough, and he suffered permanent brain damage. When the patient's family sued the hospital, the hospital told the nurse she would be in trouble if she testified. She did testify according to her oath in the court of law (i.e., truthfully), and after several months of harassment, was finally fired on a pretext. The hospital was held liable for the

tort of wrongful discharge. As a general rule, you should not fire an employee for refusing to break the law.

Discharging an Employee for Exercising a Legal Right

Suppose Bob Berkowitz files a claim for workers' compensation for an accident at Pacific Gas & Electric, where he works and where the accident that injured him took place. He is fired for doing so, because the employer does not want to have its workers' comp premiums increased. In this case, the right exercised by Berkowitz is supported by public policy: he has a legal right to file the claim, and if he can establish that his discharge was caused by his filing the claim, he will prove the tort of wrongful discharge.

Discharging an Employee for Performing a Legal Duty

Courts have long held that an employee may not be fired for serving on a jury. This is so even though courts do recognize that many employers have difficulty replacing employees called for jury duty. Jury duty is an important civic obligation, and employers are not permitted to undermine it.

Discharging an Employee in a Way That Violates Public Policy

This is probably the most controversial basis for a tort of wrongful discharge. There is an inherent vagueness in the phrase "basic social rights, duties, or responsibilities." This is similar to the exception in contract law: the courts will not enforce contract provisions that violate public policy. (For the most part, public policy is found in statutes and in cases.) But what constitutes public policy is an important decision for state courts. In *Wagenseller v. Scottsdale Memorial Hospital*, *Wagenseller v. Scottsdale Memorial Hospital*, 147 Ariz. 370; 710 P.2d 1025 (1985). for example, a nurse who refused to "play along" with her coworkers on a rafting trip was discharged. The group of coworkers had socialized at night, drinking alcohol; when the partying was near its peak, the plaintiff refused to be part of a group that bared their buttocks to the tune of "Moon River" (a composition by Henry Mancini that was popular in the 1970s). The court, at great length, considered that "mooning" was a misdemeanor under Arizona law and that therefore her employer could not discharge her for refusing to violate a state law.

Other courts have gone so far as to include professional oaths and codes as part of public policy. In *Rocky Mountain Hospital and Medical Services v. Diane Mariani*, the Colorado Supreme Court reviewed a trial court decision to refuse relief to a certified public accountant who was discharged when she refused to violate her professional code. *Rocky Mountain Hospital and Medical Services v. Diane Mariani*, 916 P.2d 519 (Colo.

1996). (Her employer had repeatedly required her to come up with numbers and results that did not reflect the true situation, using processes that were not in accord with her training and the code.) The court of appeals had reversed the trial court, and the Supreme Court had to decide if the professional code of Colorado accountants could be considered to be part of public policy. Given that accountants were licensed by the state on behalf of the public, and that the Board of Accountancy had published a code for accounting professionals and required an oath before licensing, the court noted the following:

The Colorado State Board of Accountancy is established pursuant to section 12-2-103, 5A C.R.S. (1991). The Board has responsibility for making appropriate rules of professional conduct, in order to establish and maintain a high standard of integrity in the profession of public accounting. § 12-2-104, 5A C.R.S. (1991). These rules of professional conduct govern every person practicing as a certified public accountant. *Id.* Failure to abide by these rules may result in professional discipline. § 12-2-123, 5A C.R.S. (1991). The rules of professional conduct for accountants have an important public purpose. They ensure the accurate reporting of financial information to the public. They allow the public and the business community to rely with confidence on financial reporting. Rule 7.1, 3 C.C.R. 705-1 (1991). In addition, they ensure that financial information will be reported consistently across many businesses. The legislature has endorsed these goals in section 12-2-101, 5A C.R.S.

The court went on to note that the stated purpose of the licensing and registration of certified public accountants was to “provide for the maintenance of high standards of professional conduct by those so licensed and registered as certified public accountants.” Further, the specific purpose of Rule 7.1 provided a clear mandate to support an action for wrongful discharge. Rule 7.1 is entitled “Integrity and Objectivity” and states, “A certificate holder shall not in the performance of professional services knowingly misrepresent facts, nor subordinate his judgment to others.” The fact that Mariani’s employer asked her to knowingly misrepresent facts was a sufficient basis in public policy to make her discharge wrongful.

Contract Modification of Employment at Will

Contract law can modify employment at will. Oral promises made in the hiring process may be enforceable even though the promises are not approved by top management. Employee handbooks may create implied contracts that specify personnel processes and statements that the employees can be fired only for a “just cause” or only after various warnings, notice, hearing, or other procedures.

Good Faith and Fair Dealing Standard

A few states, among them Massachusetts and California, have modified the at-will doctrine in a far-reaching way by holding that every employer has entered into an implied covenant of good faith and fair dealing with its employees. That means, the courts in these states say, that it is “bad faith” and therefore unlawful to discharge employees to avoid paying commissions or pensions due them. Under this implied covenant of fair dealing, any discharge without good cause—such as incompetence, corruption, or habitual tardiness—is actionable. This is not the majority view, as the case in [Section 50.4.4 "Disability Discrimination"](#) makes clear.

KEY TAKEAWAY

Although employment at will is still the law, numerous exceptions have been established by judicial decision. Employers can be liable for the tort of wrongful discharge if they discharge an employee for refusing to violate a law, for exercising a legal right or performing a legal duty, or in a way that violates basic public policy.

EXERCISES

1. Richard Mudd, an employee of Compuserve, is called for jury duty in Wayne County, Michigan. His immediate supervisor, Harvey Lorie, lets him know that he “must” avoid jury duty at all costs. Mudd tells the judge of his circumstances and his need to be at work, but the judge refuses to let Mudd avoid jury duty. Mudd spends the next two weeks at trial. He sends regular e-mails and texts to Lorie during this time, but on the fourth day gets a text message from Lorie that says, “Don’t bother to come back.” When he does return, Lorie tells him he is fired. Does Mudd have a cause of action for the tort of wrongful discharge?
2. Olga Monge was a schoolteacher in her native Costa Rica. She moved to New Hampshire and attended college in the evenings to earn US teaching credentials. At night, she worked at the Beebe Rubber Company after caring for her husband and three children during the day. When she applied for a better job at the plant, the foreman offered to promote her if she would be “nice” and go out on a date with him. She refused, and he assigned her to a lower-wage job, took away her overtime, made her clean the washrooms, and generally ridiculed her. She finally collapsed at work, and he fired her. Does Monge have any cause of action?

50.3 Other Employment-Related Laws

LEARNING OBJECTIVE

1. Understand the various federal and state statutes that affect employers in the areas of plant closings, pensions, workers' compensation, use of polygraphs, and worker safety.

The Federal Plant-Closing Act

A prime source of new jobs across the United States is the opening of new industrial plants—which accounted for millions of jobs a year during the 1970s and 1980s. But for every 110 jobs thus created, nearly 100 were lost annually in plant closings during that period. In the mid-1980s alone, 2.2 million plant jobs were lost each year. As serious as those losses were for the national economy, they were no less serious for the individuals who were let go. Surveys in the 1980s showed that large numbers of companies provided little or no notice to employees that their factories were to be shut down and their jobs eliminated. Nearly a quarter of businesses with more than 100 employees provided no specific notice to their employees that their particular work site would be closed or that they would suffer mass layoffs. More than half provided two weeks' notice or less.

Because programs to support dislocated workers depend heavily on the giving of advance notice, a national debate on the issue in the late 1980s culminated in 1988 in Congress's enactment of the Worker Adjustment and Retraining Notification (WARN) Act, the formal name of the federal plant-closing act. Under this law, businesses with 100 or more employees must give employees or their local bargaining unit, along with the local city or county government, at least sixty days' notice whenever (1) at least 50 employees in a single plant or office facility would lose their jobs or face long-term layoffs or a reduction of more than half their working hours as the result of a shutdown and (2) a shutdown would require long-term layoffs of 500 employees or at least a third of the workforce. An employer who violates the act is liable to employees for back pay that they would have received during the notice period and may be liable to other fines and penalties.

An employer is exempted from having to give notice if the closing is caused by business circumstances that were not reasonably foreseeable as of the time the notice would have been required. An employer is also exempted if the business is actively seeking capital or business that if obtained, would avoid or postpone the

shutdown and the employer, in good faith, believes that giving notice would preclude the business from obtaining the needed capital or business.

The Employee Polygraph Protection Act

Studies calling into question the reliability of various forms of lie detectors have led at least half the states and, in 1988, Congress to legislate against their use by private businesses. The Employee Polygraph Protection Act forbids private employers from using lie detectors (including such devices as voice stress analyzers) for any reason. Neither employees nor applicants for jobs may be required or even asked to submit to them. (The act has some exceptions for public employers, defense and intelligence businesses, private companies in the security business, and manufacturers of controlled substances.)

Use of polygraphs, machines that record changes in the subject's blood pressure, pulse, and other physiological phenomena, is strictly limited. They may be used in conjunction with an investigation into such crimes as theft, embezzlement, and industrial espionage, but in order to require the employee to submit to polygraph testing, the employer must have "reasonable suspicion" that the employee is involved in the crime, and there must be supporting evidence for the employer to discipline or discharge the employee either on the basis of the polygraph results or on the employee's refusal to submit to testing. The federal polygraph law does not preempt state laws, so if a state law absolutely bars an employer from using one, the federal law's limited authorization will be unavailable.

Occupational Safety and Health Act

In a heavily industrialized society, workplace safety is a major concern. Hundreds of studies for more than a century have documented the gruesome toll taken by hazardous working conditions in mines, on railroads, and in factories from tools, machines, treacherous surroundings, and toxic chemicals and other substances. Studies in the late 1960s showed that more than 14,000 workers were killed and 2.2 million were disabled annually—at a cost of more than \$8 billion and a loss of more than 250 million worker days. Congress responded in 1970 with the Occupational Safety and Health Act, the primary aim of which is "to assure so far as possible every working man and woman in the Nation safe and healthful working conditions."

The act imposes on each employer a general duty to furnish a place of employment free from recognized hazards likely to cause death or serious physical harm to employees. It also gives the secretary of labor the power to establish national health and safety standards. The standard-making power has been delegated to the

Occupational Safety and Health Administration (OSHA), an agency within the US Department of Labor. The agency has the authority to inspect workplaces covered by the act whenever it receives complaints from employees or reports about fatal or multiple injuries. The agency may assess penalties and proceed administratively to enforce its standards. Criminal provisions of the act are enforced by the Justice Department.

During its first two decades, OSHA was criticized for not issuing standards very quickly: fewer than thirty national workplace safety standards were issued by 1990. But not all safety enforcement is in the hands of the federal government: although OSHA standards preempt similar state standards, under the act the secretary may permit the states to come up with standards equal to or better than federal standards and may make grants to the states to cover half the costs of enforcement of the state safety standards.

Employee Retirement Income Security Act

More than half the US workforce is covered by private pension plans for retirement. One 1988 estimate put the total held in pension funds at more than \$1 *trillion*, costing the federal Treasury nearly \$60 billion annually in tax write-offs. As the size of the private pension funds increased dramatically in the 1960s, Congress began to hear shocking stories of employees defrauded out of pension benefits, deprived of a lifetime's savings through various ruses (e.g., by long vesting provisions and by discharges just before retirement). To put an end to such abuses, Congress, in 1974, enacted the Employee Retirement Income Security Act (ERISA).

In general, ERISA governs the vesting of employees' pension rights and the funding of pension plans. Within five years of beginning employment, employees are entitled to vested interests in retirement benefits contributed on their behalf by individual employers. Multiemployer pension plans must vest their employees' interests within ten years. A variety of pension plans must be insured through a federal agency, the Pension Benefit Guaranty Corporation, to which employers must pay annual premiums. The corporation may assume financial control of underfunded plans and may sue to require employers to make up deficiencies. The act also requires pension funds to disclose financial information to beneficiaries, permits employees to sue for benefits, governs the standards of conduct of fund administrators, and forbids employers from denying employees their rights to pensions. The act largely preempts state law governing employee benefits.

Fair Labor Standards Act

In the midst of the Depression, Congress enacted at President Roosevelt's urging a national minimum wage law, the Fair Labor Standards Act of 1938 (FLSA). The act prohibits most forms of child labor and established a scale of minimum wages for the regular workweek and a higher scale for overtime. (The original hourly minimum was twenty-five cents, although the administrator of the Wage and Hour Division of the US Department of Labor, a position created by the act, could raise the minimum rate industry by industry.) The act originally was limited to certain types of work: that which was performed in transporting goods in interstate commerce or in producing goods for shipment in interstate commerce.

Employers quickly learned that they could limit the minimum wage by, for example, separating the interstate and intrastate components of their production. Within the next quarter century, the scope of the FLSA was considerably broadened, so that it now covers all workers in businesses that do a particular dollar-volume of goods that move in interstate commerce, regardless of whether a particular employee actually works in the interstate component of the business. It now covers between 80 and 90 percent of all persons privately employed outside of agriculture, and a lesser but substantial percentage of agricultural workers and state and local government employees. Violations of the act are investigated by the administrator of the Wage and Hour Division, who has authority to negotiate back pay on the employee's behalf. If no settlement is reached, the Labor Department may sue on the employee's behalf, or the employee, armed with a notice of the administrator's calculations of back wages due, may sue in federal or state court for back pay. Under the FLSA, a successful employee will receive double the amount of back wages due.

Workers' Compensation Laws

Since the beginning of the twentieth century, work-related injuries or illnesses have been covered under state workers' compensation laws that provide a set amount of weekly compensation for disabilities caused by accidents and illnesses suffered on the job. The compensation plans also pay hospital and medical expenses necessary to treat workers who are injured by, or become ill from, their work. In assuring workers of compensation, the plans eliminate the hazards and uncertainties of lawsuits by eliminating the need to prove fault. Employers fund the compensation plans by paying into statewide plans or purchasing insurance.

Other State Laws

Although it may appear that most employment law is federal, employment discrimination is largely governed by state law because Congress has so declared it.

The Civil Rights Act of 1964 tells federal courts to defer to state agencies to enforce antidiscrimination provisions of parallel state statutes with remedies similar to those of the federal law. Moreover, many states have gone beyond federal law in banning certain forms of discrimination. Thus well before enactment of the Americans with Disabilities Act, more than forty states prohibited such discrimination in private employment. More than a dozen states ban employment discrimination based on marital status, a category not covered by federal law. Two states have laws that protect those that may be considered “overweight.” Two states and more than seventy counties or municipalities ban employment discrimination on the basis of sexual orientation; most large companies have offices or plants in at least one of these jurisdictions. By contrast, federal law has no statutory law dealing with sexual orientation.

KEY TAKEAWAY

There are a number of important federal employment laws collective bargaining or discrimination. These include the federal plant-closing act, the Employee Polygraph Protection Act, the Occupational Safety and Health Act, the Employee Retirement Income Security Act, and the Fair Labor Standards Act. At the state level, workers’ compensation laws preempt common-law claims against employers for work-related injuries, and state equal opportunity employment laws provide remedies for certain kinds of workplace discrimination that have no parallel at the federal level.

EXERCISES

1. United Artists is a corporation doing business in Texas. United Pension Fund is a defined-contribution employee pension benefit plan sponsored by United Artists for employees. Each employee has his or her own individual pension account, but plan assets are pooled for investment purposes. The plan is administered by the board of trustees. From 1977 to 1986, seven of the trustees made a series of loans to themselves from the plan. These trustees did not (1) require the borrowers to submit a written application for the loans, (2) assess the prospective borrower's ability to repay loans, (3) specify a period in which the loans were to be repaid, or (4) call the loans when they remained unpaid. The trustees also charged less than fair-market-value interest for the loans. The secretary of labor sued the trustees, alleging that they had breached their fiduciary duty in violation of ERISA. Who won? *Mc Laughlin v. Rowley*, 69 F.Supp. 1333 (N.D. Tex. 1988).
2. Arrow Automotive Industries remanufactures and distributes automobile and truck parts. Its operating plants produce identical product lines. The company is planning to open a new facility in Santa Maria, California. The employees at the Arrow plant in Hudson, Massachusetts, are represented by a union, the United Automobile, Aerospace, and Agricultural Implement Workers of America. The Hudson plant has a history of unprofitable operations. The union called a strike when the existing collective bargaining agreement expired and a new agreement could not be reached. After several months, the board of directors of the company voted to close the striking plant. The closing would give Arrow a 24 percent increase in gross profits and free capital and equipment for the new Santa Maria plant. In addition, the existing customers of the Hudson plant could be serviced by the Spartanburg, South Carolina, plant, which is currently being underutilized. What would have to be done if the plant-closing act applied to the situation? *Arrow Automotive Industries, Inc. v. NLRB*, 853 F.2d 233 (4th Cir. 1989).

50.4 Cases

Disparate Treatment: Burdens of Proof

Barbano v. Madison County

922 F.2d 139 (2d Cir. 1990)

Factual Background

At the Madison County (New York State) Veterans Service Agency, the position of director became vacant. The County Board of Supervisors created a committee of five men to hold interviews for the position. The committee interviewed Maureen E. Barbano and four others. When she entered the interview room, she heard someone say, “Oh, another woman.” At the beginning of the interview, Donald Greene said he would not consider “some woman” for the position. Greene also asked Barbano some personal questions about her family plans and whether her husband would mind if she transported male veterans. Ms. Barbano answered that the questions were irrelevant and discriminatory. However, Greene replied that the questions were relevant because he did not want to hire a woman who would get pregnant and quit. Another committee member, Newbold, agreed that the questions were relevant, and no committee member said the questions were not relevant.

None of the interviewers rebuked Greene or objected to the questions, and none of them told Barbano that she need not answer them. Barbano did state that if she decided to have a family she would take no more time off than medically necessary. Greene once again asked whether Barbano’s husband would object to her “running around the country with men” and said he would not want his wife to do it. Barbano said she was not his wife. The interview concluded after Barbano asked some questions about insurance.

After interviewing several other candidates, the board hired a man. Barbano sued the county for sex discrimination in violation of Title VII, and the district court held in her favor. She was awarded \$55,000 in back pay, prejudgment interest, and attorney’s fees. Madison County appealed the judgment of Federal District Judge McAvoy; Barbano cross-appealed, asking for additional damages.

The court then found that Barbano had established a prima facie case of discrimination under Title VII, thus bringing into issue the appellants’ purported reasons for not hiring her. The appellants provided four reasons why they chose

Wagner over Barbano, which the district court rejected either as unsupported by the record or as a pretext for discrimination in light of Barbano's interview. The district court then found that because of Barbano's education and experience in social services, the appellants had failed to prove that absent the discrimination, they still would not have hired Barbano. Accordingly, the court awarded Barbano back pay, prejudgment interest, and attorney's fees. Subsequently, the court denied Barbano's request for front pay and a mandatory injunction ordering her appointment as director upon the next vacancy. This appeal and cross-appeal followed.

From the Opinion of FEINBERG, CIRCUIT JUDGE

Appellants argue that the district court erred in finding that Greene's statements during the interview showed that the Board discriminated in making the hiring decision, and that there was no direct evidence of discrimination by the Board, making it improper to require that appellants prove that they would not have hired Barbano absent the discrimination. Barbano in turn challenges the adequacy of the relief awarded to her by the district court.

A. Discrimination

At the outset, we note that Judge McAvoy's opinion predated *Price Waterhouse v. Hopkins*, 490 U.S. 228, 109 S. Ct. 1775, 104 L. Ed. 2d 268 (1990), in which the Supreme Court made clear that a "pretext" case should be analyzed differently from a "mixed motives" case. *Id.* 109 S. Ct. at 1788-89. Judge McAvoy, not having the benefit of the Court's opinion in *Price Waterhouse*, did not clearly distinguish between the two types of cases in analyzing the alleged discrimination. For purposes of this appeal, we do not think it is crucial how the district court categorized the case. Rather, we need only concern ourselves with whether the district court's findings of fact are supported by the record and whether the district court applied the proper legal standards in light of its factual findings.

Whether the case is one of pretext or mixed motives, the plaintiff bears the burden of persuasion on the issue of whether gender played a part in the employment decision. *Price Waterhouse v. Hopkins*, at 1788. Appellants contend that Barbano did not sustain her burden of proving discrimination because the only evidence of discrimination involved Greene's statements during the interview, and Greene was an elected official over whom the other members of the Board exercised no control. Thus, appellants maintain, since the hiring decision was made by the 19-member board, evidence of discrimination by one member does not establish that the Board discriminated in making the hiring decision.

We agree that discrimination by one individual does not necessarily imply that a collective decision-making body of which the individual is a member also discriminated. However, the record before us supports the district court's finding that the Board discriminated in making the hiring decision.

First, there is little doubt that Greene's statements during the interview were discriminatory. He said he would not consider "some woman" for the position. His questioning Barbano about whether she would get pregnant and quit was also discriminatory, since it was unrelated to a bona fide occupational qualification. *King v. Trans World Airlines*, 738 F.2d 255, 258 n.2 (8th Cir. 1984). Similarly, Greene's questions about whether Barbano's husband would mind if she had to "run around the country with men," and that he would not want his wife to do it, were discriminatory, since once again the questions were unrelated to bona fide occupational qualifications. *Hopkins*, at 1786.

Moreover, the import of Greene's discriminatory questions was substantial, since apart from one question about her qualifications, none of the interviewers asked Barbano about other areas that allegedly formed the basis for selecting a candidate. Thus, Greene's questioning constituted virtually the entire interview, and so the district court properly found that the interview itself was discriminatory.

Next, given the discriminatory tenor of the interview, and the acquiescence of the other Committee members to Greene's line of questioning, it follows that the judge could find that those present at the interview, and not merely Greene, discriminated against Barbano. Judge McAvoy pointed out that the Chairman of the Committee, Newbold, thought Greene's discriminatory questions were relevant. Significantly, Barbano protested that Greene's questions were discriminatory, but no one agreed with her or told her that she need not answer. Indeed, no one even attempted to steer the interview in another direction. This knowing and informed toleration of discriminatory statements by those participating in the interview constitutes evidence of discrimination by all those present. That each member was independently elected to the Board does not mean that the Committee itself was unable to control the course of the interview. The Committee had a choice of how to conduct the interview, and the court could find that the Committee exercised that choice in a plainly discriminatory fashion.

This discrimination directly affected the hiring decision. At the end of the interviewing process, the interviewers evaluated the candidates, and on that basis submitted a recommendation as to which candidate to hire for the position. "Evaluation does not occur in a vacuum. By definition, when evaluating a candidate to fill a vacant position, one compares that candidate against other eligible candidates." *Berl v. County of Westchester*, 849 F.2d 712, 715 (2d Cir. 1988).

Appellants stipulated that Barbano was qualified for the position. Again, because Judge McAvoy could find that the evaluation of Barbano was biased by gender discrimination, the judge could also find that the Committee's recommendation to hire Wagner, which was the result of a weighing of the relative merits of Barbano, Wagner and the other eligible candidates, was necessarily tainted by discrimination.

The Board in turn unanimously accepted the Committee's recommendation to hire Wagner, and so the Board's hiring decision was made in reliance upon a discriminatory recommendation. The Supreme Court in *Hopkins v. Price Waterhouse* found that a collective decision-making body can discriminate by relying upon discriminatory recommendations, and we are persuaded that the reasoning in that case applies here as well.

In Hopkins' case against Price Waterhouse, Ann Hopkins, a candidate for partnership at the accounting firm of Price Waterhouse, alleged that she was refused admission as a partner because of sex discrimination. Hopkins's evidence of discrimination consisted largely of evaluations made by various partners. Price Waterhouse argued that such evidence did not prove that its internal Policy Board, which was the effective decision-maker as to partnership in that case, had discriminated. The Court rejected that argument and found the evidence did establish discrimination:

Hopkins showed that the partnership solicited evaluations from all of the firm's partners; that it generally relied very heavily on such evaluations in making its decision; that some of the partners' comments were the product of [discrimination]; and that the firm in no way disclaimed reliance on those particular comments, either in Hopkins' case or in the past. Certainly, a plausible—and, one might say, inevitable—conclusion to draw from this set of circumstances is that the Policy Board in making its decision did in fact take into account all of the partners' comments, including the comments that were motivated by [discrimination].

Hopkins, at 1794.

In a very significant sense, Barbano presents an even stronger case of discrimination because the only recommendation the Board relied upon here was discriminatory, whereas in *Price Waterhouse*, not all of the evaluations used in the decision-making process were discriminatory. On the other hand, it is true that the discriminatory content of some of the evaluations in *Price Waterhouse* was apparent from reading them, whereas here, the recommendation was embodied in a resolution to the Board and a reading of the resolution would not reveal that it was tainted by discrimination. Nonetheless, the facts in this case show that the

Board was put on notice before making the appointment that the Committee's recommendation was biased by discrimination.

Barbano was a member of the public in attendance at the Board meeting in March 1980 when the Board voted to appoint Wagner. Before the Board adopted the resolution appointing Wagner, Barbano objected and asked the Board if male applicants were asked the questions she was asked during the interview. At this point, the entire Board membership was alerted to the possibility that the Committee had discriminated against Barbano during her interview. The Committee members did not answer the question, except for Newbold, who evaded the issue by stating that he did not ask such questions. The Board's ability to claim ignorance at this point was even further undermined by the fact that the Chairman of the Board, Callahan, was present at many of the interviews, including Barbano's, in his role as Chairman of the Board. Callahan did not refute Barbano's allegations, implying that they were worthy of credence, and none of the Board members even questioned Callahan on the matter.

It is clear that those present understood Barbano was alleging that she had been subjected to discrimination during her interview. John Patane, a member of the Board who had not interviewed Barbano, asked Barbano whether she was implying that Madison County was not an equal opportunity employer. Barbano said yes. Patane said the County already had their "token woman." Callahan apologized to Barbano for "any improper remarks that may have been made," but an apology for discrimination does not constitute an attempt to eliminate the discrimination from the hiring decision. Even though the Board was aware of possible improprieties, it made no investigation whatsoever into the allegations and did not disclaim any reliance upon the discrimination. In short, the circumstances show the Board was willing to rely on the Committee's recommendation even if Barbano had been discriminated against during her interview. On these facts, it was not clearly erroneous for the district court to conclude that Barbano sustained her burden of proving discrimination by the Board.

B. The Employer's Burden

Having found that Barbano carried her burden of proving discrimination, the district court then placed the burden on appellants to prove by a preponderance of the evidence that, absent the discrimination, they would not have hired Barbano for the position. Appellants argue that this burden is only placed on an employer if the plaintiff proves discrimination by direct evidence, and since Barbano's evidence of discrimination was merely circumstantial, the district court erred by placing the burden of proof on them. Appellants, however, misapprehend the nature of Barbano's proof and thus the governing legal standard.

The burden is properly placed on the defendant “once the plaintiff establishes by direct evidence that an illegitimate factor played a motivating or substantial role in an employment decision.” *Grant v. Hazelett Strip-Casting Corp.*, 880 F.2d 1564, 1568 (2d Cir. 1989). Thus, the key inquiry on this aspect of the case is whether the evidence is direct, that is, whether it shows that the impermissible criterion played some part in the decision-making process. See *Hopkins*, at 1791; *Grant*, 880 F.2d at 1569. If plaintiff provides such evidence, the fact-finder must then determine whether the evidence shows that the impermissible criterion played a motivating or substantial part in the hiring decision. *Grant*, 880 F.2d at 1569.

As we found above, the evidence shows that Barbano’s gender was clearly a factor in the hiring decision. That the discrimination played a substantial role in that decision is shown by the importance of the recommendation to the Board. As Rafté testified, the Board utilizes a committee system, and so the Board “usually accepts” a committee’s recommendation, as it did here when it unanimously voted to appoint Wagner. Had the Board distanced itself from Barbano’s allegations of discrimination and attempted to ensure that it was not relying upon illegitimate criteria in adopting the Committee’s recommendation, the evidence that discrimination played a substantial role in the Board’s decision would be significantly weakened. The Board showed no inclination to take such actions, however, and in adopting the discriminatory recommendation allowed illegitimate criteria to play a substantial role in the hiring decision.

The district court thus properly required appellants to show that the Board would not have hired Barbano in the absence of discrimination. “The employer has not yet been shown to be a violator, but neither is it entitled to the...presumption of good faith concerning its employment decisions. At this point the employer may be required to convince the fact-finder that, despite the smoke, there is no fire.” *Hopkins*, at 1798-99 (O’Connor, J., concurring).

Judge McAvoy noted in his opinion that appellants claimed they chose Wagner over Barbano because he was better qualified in the following areas: (1) interest in veterans’ affairs; (2) experience in the military; (3) tactfulness; and (4) experience supervising an office. The judge found that the evidence before him supported only appellants’ first and second reasons for refusing to hire Barbano, but acknowledged that the Committee members “were enamored with Wagner’s military record and involvement with veterans’ organizations.” However, neither of these is listed as a job requirement in the job description, although the district court found that membership in a veterans’ organization may indicate an interest in veterans’ affairs. Nonetheless, the district court found that given Barbano’s “education and experience in social services,” appellants failed to carry their burden of proving by a preponderance of the evidence that, absent discrimination, they would not have hired Barbano.

The district court properly held appellants to a preponderance of the evidence standard. *Hopkins*, 109 S. Ct. at 1795....

At the time of the hiring decision in 1980, Barbano had been a Social Welfare Examiner for Madison County for the three previous years. In this position, she determined the eligibility of individuals for public assistance, medicaid or food stamps, and would then issue or deny the individual's application based on all federal, state and local regulations pertaining to the program from which the individual was seeking assistance. Barbano was thus familiar with the operation of public assistance programs, knew how to fill out forms relating to benefits and had become familiar with a number of welfare agencies that could be of use to veterans. Barbano was also working towards an Associate Degree in Human Services at the time. Rafte testified that Barbano's resume was "very impressive." Moreover, Barbano, unlike Wagner, was a resident of Madison County, and according to Rafte, a candidate's residency in the county was considered to be an advantage. Finally, Barbano had also enlisted in the United States Marine Corps in 1976, but during recruit training had been given a vaccine that affected her vision. She had received an honorable discharge shortly thereafter.

Wagner had nine years experience as an Air Force Personnel Supervisor, maintaining personnel records, had received a high school equivalency diploma and took several extension classes in management. He had been honorably discharged from the Air Force in 1965 with the rank of Staff Sergeant. Wagner was a member of the American Legion, and his application for the position included recommendations from two American Legion members. However, for the six years prior to his appointment as Director, Wagner's sole paid employment was as a school bus driver and part-time bartender at the American Legion. Wagner admitted that before he was hired he had no knowledge of federal, state and local laws, rules and regulations pertaining to veterans' benefits and services, or knowledge of the forms, methods and procedures used to process veteran benefits claims. Wagner also had not maintained liaison with welfare agencies and was unfamiliar with the various welfare agencies that existed in the county.

To be sure, both candidates were qualified for the Director's position, and it is not our job—nor was it the district court's—to decide which one was preferable. However, there is nothing to indicate that Judge McAvoy misconceived his function in this phase of the case, which was to decide whether appellants failed to prove by a preponderance of the evidence that they would not have hired Barbano even if they had not discriminated against her. The judge found that defendants had not met that burden. We must decide whether that finding was clearly erroneous, and we cannot say that it was.

CASE QUESTIONS

1. Madison County contended that Barbano needed to provide “direct evidence” of discrimination that had played a motivating or substantial part in the decision. What would such evidence look like? Is it likely that most plaintiffs who are discriminated against because of their gender would be able to get “direct evidence” that gender was a motivating or substantial factor?
2. The “clearly erroneous” standard is applied here, as it is in many cases where appellate courts review trial court determinations. State the test, and say why the appellate court believed that the trial judge’s ruling was not “clearly erroneous.”

Title VII and Hostile Work Environment

Duncan v. General Motors Corporation

300 F.3d 928 (8th Cir. 2002)

OPINION BY HANSEN, Circuit Judge.

The Junior College District of St. Louis (the College) arranged for Diana Duncan to provide in-house technical training at General Motors Corporation’s (GMC) manufacturing facility in Wentzville, Missouri. Throughout her tenure at GMC, Duncan was subjected to unwelcome attention by a GMC employee, James Booth, which culminated in Duncan’s resignation. Duncan subsequently filed this suit under Title VII of the Civil Rights Act and the Missouri Human Rights Act, see 42 U.S.C. §§ 2000e-2000e-17; Mo. Rev. Stat. §§ 213.010-213.137,² alleging that she was sexually harassed and constructively discharged. A jury found in favor of Duncan and awarded her \$4600 in back pay, \$700,000 in emotional distress damages on her sexual harassment claim, and \$300,000 in emotional distress damages on her constructive discharge claim. GMC appeals from the district court’s denial of its post trial motion for judgment as a matter of law, and the district court’s award of attorneys’ fees attendant to the post trial motion. We reverse.

I.

Diana Duncan worked as a technical training clerk in the high-tech area at GMC as part of the College’s Center for Business, Industry, and Labor program from August 1994 until May 1997. Duncan provided in-house training support to GMC employees.

Duncan first learned about the College's position at GMC from Booth, a United Auto Workers Union technology training coordinator for GMC. Booth frequented the country club where Duncan worked as a waitress and a bartender. Booth asked Duncan if she knew anyone who had computer and typing skills and who might be interested in a position at GMC. Duncan expressed interest in the job. Booth brought the pre-employment forms to Duncan at the country club, and he forwarded her completed forms to Jerry Reese, the manager of operations, manufacturing, and training for the College. Reese arranged to interview Duncan at GMC. Reese, Booth, and Ed Ish, who was Booth's management counterpart in the high-tech area of the GMC plant, participated in the interview. Duncan began work at GMC in August 1994.

Two weeks after Duncan began working at GMC, Booth requested an off-site meeting with her at a local restaurant. Booth explained to Duncan that he was in love with a married coworker and that his own marriage was troubled. Booth then propositioned Duncan by asking her if she would have a relationship with him. Duncan rebuffed his advance and left the restaurant. The next day Duncan mentioned the incident to the paint department supervisor Joe Rolen, who had no authority over Booth. Duncan did not report Booth's conduct to either Reese (her supervisor) at the College or Ish (Booth's management counterpart) at GMC. However, she did confront Booth, and he apologized for his behavior. He made no further such "propositions." Duncan stated that Booth's manner toward her after she declined his advance became hostile, and he became more critical of her work. For example, whenever she made a typographical error, he told her that she was incompetent and that he should hire a "Kelly Services" person to replace her. Duncan admitted that Booth's criticisms were often directed at other employees as well, including male coworkers.

Duncan testified to numerous incidents of Booth's inappropriate behavior. Booth directed Duncan to create a training document for him on his computer because it was the only computer with the necessary software. The screen saver that Booth had selected to use on his computer was a picture of a naked woman. Duncan testified to four or five occasions when Booth would unnecessarily touch her hand when she handed him the telephone. In addition, Booth had a planter in his office that was shaped like a slouched man wearing a sombrero. The planter had a hole in the front of the man's pants that allowed for a cactus to protrude. The planter was in plain view to anyone entering Booth's office. Booth also kept a child's pacifier that was shaped like a penis in his office that he occasionally showed to his coworkers and specifically to Duncan on two occasions.

In 1995, Duncan requested a pay increase and told Booth that she would like to be considered for an illustrator's position. Booth said that she would have to prove her artistic ability by drawing his planter. Duncan objected, particularly because

previous applicants for the position were required to draw automotive parts and not his planter. Ultimately, Duncan learned that she was not qualified for the position because she did not possess a college degree.

Additionally in 1995, Booth and a College employee created a “recruitment” poster that was posted on a bulletin board in the high-tech area. The poster portrayed Duncan as the president and CEO of the Man Hater’s Club of America. It listed the club’s membership qualifications as: “Must always be in control of: (1) Checking, Savings, all loose change, etc.; (2) (Ugh) Sex; (3) Raising children our way!; (4) Men must always do household chores; (5) Consider T.V. Dinners a gourmet meal.”...

On May 5, 1997, Booth asked Duncan to type a draft of the beliefs of the “He-Men Women Hater’s Club.” The beliefs included the following:

—Constitutional Amendment, the 19th, giving women [the] right to vote should be repealed. Real He-Men indulge in a lifestyle of cursing, using tools, handling guns, driving trucks, hunting and of course, drinking beer.

—Women really do have coodies [sic] and they can spread.

—Women [are] the cause of 99.9 per cent of stress in men.

—Sperm has a right to live.

—All great chiefs of the world are men.

—Prostitution should be legalized.

Duncan refused to type the beliefs and resigned two days later.

Duncan testified that she complained to anyone who would listen to her about Booth’s behavior, beginning with paint department supervisor Joe Rolen after Booth propositioned her in 1994. Duncan testified that between 1994 and 1997 she complained several times to Reese at the College about Booth’s behavior, which would improve at least in the short term after she spoke with Reese....

Duncan filed a charge of sex discrimination with the Equal Employment Opportunity Commission (EEOC) on October 30, 1997. The EEOC issued Duncan a right to sue notice on April 17, 1998. Alleging sexual harassment and constructive

discharge, Duncan filed suit against the College and GMC under both Title VII of the Civil Rights Act and the Missouri Human Rights Act. Duncan settled with the College prior to trial. After the jury found in Duncan's favor on both counts against GMC, GMC filed a post-trial motion for judgment as a matter of law or, alternatively, for a new trial. The district court denied the motion. The district court also awarded Duncan attorneys' fees in conjunction with GMC's post-trial motion. GMC appeals.

II.

A. Hostile Work Environment

GMC argues that it was entitled to judgment as a matter of law on Duncan's hostile work environment claim because she failed to prove a prima facie case. We agree....

It is undisputed that Duncan satisfies the first two elements of her prima facie case: she is a member of a protected group and Booth's attention was unwelcome. We also conclude that the harassment was based on sex....Although there is some evidence in the record that indicates some of Booth's behavior, and the resulting offensive and disagreeable atmosphere, was directed at both male and female employees, GMC points to ten incidents when Booth's behavior was directed at Duncan alone. GMC concedes that five of these ten incidents could arguably be based on sex: (1) Booth's proposition for a "relationship"; (2) Booth's touching of Duncan's hand; (3) Booth's request that Duncan sketch his planter; (4) the Man Hater's Club poster; and (5) Booth's request that Duncan type the He-Men Women Haters beliefs. "A plaintiff in this kind of case need not show...that only women were subjected to harassment, so long as she shows that women were the primary target of such harassment." We conclude that a jury could reasonably find that Duncan and her gender were the overriding themes of these incidents. The evidence is sufficient to support the jury finding that the harassment was based on sex.

We agree, however, with GMC's assertion that the alleged harassment was not so severe or pervasive as to alter a term, condition, or privilege of Duncan's employment....To clear the high threshold of actionable harm, Duncan has to show that "the workplace is permeated with discriminatory intimidation, ridicule, and insult." *Harris v. Forklift Systems, Inc.*, 510 U.S. 17, 21, 126 L. Ed. 2d 295, 114 S. Ct. 367 (1993) (internal quotations omitted). "Conduct that is not severe or pervasive enough to create an objectively hostile or abusive work environment—an environment that a reasonable person would find hostile or abusive—is beyond Title VII's purview." *Oncale*, 523 U.S. at 81 (internal quotation omitted). Thus, the fourth part of a hostile environment claim includes both objective and subjective components: an environment that a reasonable person would find hostile and one that the victim actually perceived as abusive. *Harris*, 510 U.S. at 21-22. In determining whether the conduct is sufficiently severe or pervasive, we look to the

totality of the circumstances, including the “frequency of the discriminatory conduct; its severity; whether it is physically threatening or humiliating, or a mere offensive utterance; and whether it unreasonably interferes with an employee’s work performance.”...These standards are designed to “filter out complaints attacking the ordinary tribulations of the workplace, such as the sporadic use of abusive language, gender-related jokes, and occasional teasing.” *Faragher v. City of Boca Raton*, 524 U.S. 775, 788, 141 L. Ed. 2d 662, 118 S. Ct. 2275 (1998) (internal quotations omitted).

The evidence presented at trial illustrates that Duncan was upset and embarrassed by the posting of the derogatory poster and was disturbed by Booth’s advances and his boorish behavior; but, as a matter of law, she has failed to show that these occurrences in the aggregate were so severe and extreme that a reasonable person would find that the terms or conditions of Duncan’s employment had been altered....Numerous cases have rejected hostile work environment claims premised upon facts equally or more egregious than the conduct at issue here. See, e.g., *Shepherd v. Comptroller of Pub. Accounts*, 168 F.3d 871, 872, 874 (5th Cir.) (holding that several incidents over a two-year period, including the comment “your elbows are the same color as your nipples,” another comment that plaintiff had big thighs, repeated touching of plaintiff’s arm, and attempts to look down the plaintiff’s dress, were insufficient to support hostile work environment claim), cert. denied, 528 U.S. 963, 145 L. Ed. 2d 308, 120 S. Ct. 395 (1999); *Adusumilli v. City of Chicago*, 164 F.3d 353, 357, 361-62 (7th Cir. 1998) (holding conduct insufficient to support hostile environment claim when employee teased plaintiff, made sexual jokes aimed at her, told her not to wave at police officers “because people would think she was a prostitute,” commented about low-necked tops, leered at her breasts, and touched her arm, fingers, or buttocks on four occasions), cert. denied, 528 U.S. 988, 145 L. Ed. 2d 367, 120 S. Ct. 450 (1999); *Black v. Zaring Homes, Inc.*, 104 F.3d 822, 823-24, 826 (6th Cir.) (reversing jury verdict and holding behavior merely offensive and insufficient to support hostile environment claim when employee reached across plaintiff, stating “nothing I like more in the morning than sticky buns” while staring at her suggestively; suggested to plaintiff that parcel of land be named “Hootersville,” “Titsville,” or “Twin Peaks”; and asked “weren’t you there Saturday night dancing on the tables?” while discussing property near a biker bar), cert. denied, 522 U.S. 865, 139 L. Ed. 2d 114, 118 S. Ct. 172 (1997); *Weiss v. Coca-Cola Bottling Co.*, 990 F.2d 333, 337 (7th Cir. 1993) (holding no sexual harassment when plaintiff’s supervisor asked plaintiff for dates, asked about her personal life, called her a “dumb blond,” put his hand on her shoulder several times, placed “I love you” signs at her work station, and attempted to kiss her twice at work and once in a bar).

Booth’s actions were boorish, chauvinistic, and decidedly immature, but we cannot say they created an objectively hostile work environment permeated with sexual

harassment. Construing the evidence in the light most favorable to Duncan, she presented evidence of four categories of harassing conduct based on her sex: a single request for a relationship, which was not repeated when she rebuffed it, four or five isolated incidents of Booth briefly touching her hand, a request to draw a planter, and teasing in the form of a poster and beliefs for an imaginary club. It is apparent that these incidents made Duncan uncomfortable, but they do not meet the standard necessary for actionable sexual harassment. It is worth noting that Duncan fails to even address this component of her prima facie case in her brief. We conclude as a matter of law that she did not show a sexually harassing hostile environment sufficiently severe or pervasive so as to alter the conditions of her employment, a failure that dooms Duncan's hostile work environment claim. See *Meritor Sav. Bank, FSB v. Vinson*, 477 U.S. 57, 67, 91 L. Ed. 2d 49, 106 S. Ct. 2399 (1986).

For the foregoing reasons, we reverse the district court's denial of judgment as a matter of law. Because GMC should have prevailed on its post-trial motion, the award of attorneys' fees is likewise vacated.

RICHARD S. ARNOLD, Circuit Judge, dissenting.

The Court concludes that the harassment suffered by Ms. Duncan was not so severe or pervasive as to alter a term, condition, or privilege of her employment, and that, therefore, GMC is entitled to judgment as a matter of law on her hostile-work environment and constructive-discharge claims. I respectfully disagree.

Ms. Duncan was subjected to a long series of incidents of sexual harassment in her workplace, going far beyond "gender-related jokes and occasional teasing." *Faragher v. City of Boca Raton*, 524 U.S. 775, 788 (1988). When the evidence is considered in the light most favorable to her, and she is given the benefit of all reasonable inferences, there is "substantial evidence to sustain the cause of action." *Stockmen's Livestock Market, Inc. v. Norwest Bank of Sioux City*, 135 F.3d 1236, 1240 (8th Cir. 1998) In Ms. Duncan's case, a jury reached the conclusion that Mr. Booth's offensive behavior created a hostile work environment. I believe this determination was reasonable and supported by ample evidence.

Ms. Duncan was subjected to a sexual advance by her supervisor within days of beginning her job. This proposition occurred during work hours and was a direct request for a sexual relationship. The Court characterizes this incident as a "single request," (but) [t]his description minimizes the effect of the sexual advance on Ms. Duncan's working conditions. During the months immediately following this incident, Mr. Booth became hostile to Ms. Duncan, increased his criticism of her work, and degraded her professional capabilities in front of her peers. Significantly,

there is no suggestion that this hostile behavior occurred *before* Ms. Duncan refused his request for sex. From this evidence, a jury could easily draw the inference that Mr. Booth changed his attitude about Ms. Duncan's work because she rejected his sexual advance.

Further, this sexual overture was not an isolated incident. It was only the beginning of a string of degrading actions that Mr. Booth directed toward Ms. Duncan based on her sex. This inappropriate behavior took many forms, from physical touching to social humiliation to emotional intimidation. For example, Mr. Booth repeatedly touched Ms. Duncan inappropriately on her hand. He publicly singled her out before her colleagues as a "Man Hater" who "must always be in control of" sex. He required her to choose between drawing a vulgar planter displayed in his office or not being considered for a promotion, an unfair choice that would likely intimidate a reasonable person from seeking further career advancement.

The Court cites cases in which our sister Circuits have rejected hostile-work environment claims premised upon facts that the Court determines to be "equally or more egregious" than the conduct at issue here. I do not agree that Ms. Duncan experienced less severe harassment than those plaintiffs. For example, in *Weiss v. Coca-Cola Bottling Co.*, 990 F.2d 333 (7th Cir. 1993), the plaintiff did not allege that her work duties or evaluations were different because of her sex. This is not the situation Ms. Duncan faced. She was given specific tasks of a sexually charged nature, such as typing up the minutes of the "He-Man Women Hater's Club." Performing this "function" was presented to her as a required duty of her job.

Also Ms. Duncan was subjected to allegations that she was professionally "incompetent because of her sex."...She adduced evidence of this factor when she testified that after she rejected his sexual advance, Mr. Booth became more critical of her work. With the request for her to draw the planter for a promotion, Ms. Duncan also faced "conduct that would prevent her from succeeding in the workplace," a fact that Ms. Shepherd could not point to in her case. Additionally, Ms. Duncan was "propositioned" to sleep with her employer...a claim not made by Ms. Shepherd.

Finally, we note that in Ms. Duncan's case the harassing acts were directed specifically at her. The Court in *Black v. Zaring Homes*, 104 F.3d 822, 826 (6th Cir.), cert. denied, 522 U.S. 865, 139 L. Ed. 2d 114, 118 S. Ct. 172 (1997), stated that the lack of specific comments to the plaintiff supported the conclusion that the defendant's conduct was not severe enough to create actionable harm. By contrast, in the present case, a jury could reasonably conclude that Ms. Duncan felt particularly humiliated and degraded by Mr. Booth's behavior because she alone was singled out for this harassment.

Our own Court's Title VII jurisprudence suggests that Ms. Duncan experienced enough offensive conduct to constitute sexual harassment. For example, in *Breeding v. Arthur J. Gallagher and Co.* we reversed a grant of summary judgment to an employer, stating that a supervisor who “fondled his genitals [**25] in front of” a female employee and “used lewd and sexually inappropriate language” could create an environment severe enough to be actionable under Title VII. 164 F.3d 1151, 1159 (8th Cir. 1999). In *Rorie v. United Parcel Service*, we concluded that a work environment in which “a supervisor pats a female employee on the back, brushes up against her, and tells her she smells good” could be found by a jury to be a hostile work environment. 151 F.3d 757, 762 (8th Cir. 1998). Is it clear that the women in these cases suffered harassment greater than Ms. Duncan? I think not.

We have acknowledged that “there is no bright line between sexual harassment and merely unpleasant conduct, so a jury's decision must generally stand unless there is trial error.” *Hathaway v. Runyon*, 132 F.3d 1214, 1221 (8th Cir. 1998). We have also ruled that “once there is evidence of improper conduct and subjective offense, the determination of whether the conduct rose to the level of abuse is largely in the hands of the jury.” *Howard v. Burns Bros., Inc.*, 149 F.3d 835, 840 (8th Cir. 1998). The Court admits that Ms. Duncan took subjective offense to Mr. Booth's behavior and characterizes Mr. Booth's behavior as “boorish, chauvinistic, and decidedly immature.” Thus, the Court appears to agree that Mr. Booth's behavior was “improper conduct.” I believe the Court errs in deciding as a matter of law that the jury did not act reasonably in concluding that Ms. Duncan faced severe or pervasive harassment that created a hostile work environment.

Therefore, I dissent from the Court's conclusion that Ms. Duncan did not present sufficient evidence to survive judgment as a matter of law on her hostile work-environment and constructive-discharge claims.

CASE QUESTIONS

1. Which opinion is more persuasive to you—the majority opinion or the dissenting opinion?
2. “Numerous cases have rejected hostile work environment claims premised upon facts equally or more egregious than the conduct at issue here.” By what standard or criteria does the majority opinion conclude that Duncan's experiences were no worse than those mentioned in the other cases?
3. Should the majority on the appeals court substitute its judgment for that of the jury?

Age Discrimination: Burden of Persuasion

Gross v. FBL Financial Services, Inc.

557 U.S. ___ (2009)

JUSTICE CLARENCE THOMAS delivered the opinion of the court.

I

Petitioner Jack Gross began working for respondent FBL Financial Group, Inc. (FBL), in 1971. As of 2001, Gross held the position of claims administration director. But in 2003, when he was 54 years old, Gross was reassigned to the position of claims project coordinator. At that same time, FBL transferred many of Gross' job responsibilities to a newly created position—claims administration manager. That position was given to Lisa Kneeskern, who had previously been supervised by Gross and who was then in her early forties. Although Gross (in his new position) and Kneeskern received the same compensation, Gross considered the reassignment a demotion because of FBL's reallocation of his former job responsibilities to Kneeskern.

In April 2004, Gross filed suit in District Court, alleging that his reassignment to the position of claims project coordinator violated the ADEA, which makes it unlawful for an employer to take adverse action against an employee "because of such individual's age." 29 U. S. C. §623(a). The case proceeded to trial, where Gross introduced evidence suggesting that his reassignment was based at least in part on his age. FBL defended its decision on the grounds that Gross' reassignment was part of a corporate restructuring and that Gross' new position was better suited to his skills.

At the close of trial, and over FBL's objections, the District Court instructed the jury that it must return a verdict for Gross if he proved, by a preponderance of the evidence, that FBL "demoted [him] to claims projec[t] coordinator" and that his "age was a motivating factor" in FBL's decision to demote him. The jury was further instructed that Gross' age would qualify as a "motivating factor," if [it] played a part or a role in [FBL]'s decision to demote [him]." The jury was also instructed regarding FBL's burden of proof. According to the District Court, the "verdict must be for [FBL]...if it has been proved by the preponderance of the evidence that [FBL] would have demoted [Gross] regardless of his age." *Ibid.* The jury returned a verdict for Gross, awarding him \$46,945 in lost compensation. FBL challenged the jury instructions on appeal. The United States Court of Appeals for the Eighth Circuit reversed and remanded for a new trial, holding that the jury had been incorrectly

instructed under the standard established in *Price Waterhouse v. Hopkins*, 490 U. S. 228 (1989). In *Price Waterhouse*, this Court addressed the proper allocation of the burden of persuasion in cases brought under Title VII of the Civil Rights Act of 1964, when an employee alleges that he suffered an adverse employment action because of both permissible and impermissible considerations—*i.e.*, a “mixed-motives” case. 490 U. S., at 232, 244–247 (plurality opinion). The *Price Waterhouse* decision was splintered. Four Justices joined a plurality opinion, and three Justices dissented. Six Justices ultimately agreed that if a Title VII plaintiff shows that discrimination was a “motivating” or a “substantial” factor in the employer’s action, the burden of persuasion should shift to the employer to show that it would have taken the same action regardless of that impermissible consideration. Justice O’Connor further found that to shift the burden of persuasion to the employer, the employee must present “direct evidence that an illegitimate criterion was a substantial factor in the [employment] decision.”...

Because Gross conceded that he had not presented direct evidence of discrimination, the Court of Appeals held that the District Court should not have given the mixed-motives instruction. *Ibid.* Rather, Gross should have been held to the burden of persuasion applicable to typical, non-mixed-motives claims; the jury thus should have been instructed only to determine whether Gross had carried his burden of “prov[ing] that age was the determining factor in FBL’s employment action.”

We granted certiorari, 555 U.S. ___ (2008), and now vacate the decision of the Court of Appeals.

II

The parties have asked us to decide whether a plaintiff must “present direct evidence of discrimination in order to obtain a mixed-motive instruction in a non-Title VII discrimination case.” Before reaching this question, however, we must first determine whether the burden of persuasion ever shifts to the party defending an alleged mixed-motives discrimination claim brought under the ADEA. We hold that it does not.

A

Petitioner relies on this Court’s decisions construing Title VII for his interpretation of the ADEA. Because Title VII is materially different with respect to the relevant burden of persuasion, however, these decisions do not control our construction of the ADEA.

In *Price Waterhouse*, a plurality of the Court and two Justices concurring in the judgment determined that once a “plaintiff in a Title VII case proves that [the plaintiff’s membership in a protected class] played a motivating part in an employment decision, the defendant may avoid a finding of liability only by proving by a preponderance of the evidence that it would have made the same decision even if it had not taken [that factor] into account.” 490 U. S., at 258; see also *id.*, at 259–260 (opinion of White, J.); *id.*, at 276 (opinion of O’Connor, J.). But as we explained in *Desert Palace, Inc. v. Costa*, 539 U. S. 90, 94–95 (2003), Congress has since amended Title VII by explicitly authorizing discrimination claims in which an improper consideration was “a motivating factor” for an adverse employment decision. See 42 U. S. C. §2000e–2(m) (providing that “an unlawful employment practice is established when the complaining party demonstrates that race, color, religion, sex, or national origin was *a motivating factor* for any employment practice, even though other factors also motivated the practice” (emphasis added))...

This Court has never held that this burden-shifting framework applies to ADEA claims. And, we decline to do so now. When conducting statutory interpretation, we “must be careful not to apply rules applicable under one statute to a different statute without careful and critical examination.” Unlike Title VII, the ADEA’s text does not provide that a plaintiff may establish discrimination by showing that age was simply a motivating factor. Moreover, Congress neglected to add such a provision to the ADEA when it amended Title VII to add §§2000e–2(m) and 2000e–5(g)(2)(B), even though it contemporaneously amended the ADEA in several ways....

We cannot ignore Congress’ decision to amend Title VII’s relevant provisions but not make similar changes to the ADEA. When Congress amends one statutory provision but not another, it is presumed to have acted intentionally....As a result, the Court’s interpretation of the ADEA is not governed by Title VII decisions such as *Desert Palace* and *Price Waterhouse*.

B

Our inquiry therefore must focus on the text of the ADEA to decide whether it authorizes a mixed-motives age discrimination claim. It does not. “Statutory construction must begin with the language employed by Congress and the assumption that the ordinary meaning of that language accurately expresses the legislative purpose.”...The ADEA provides, in relevant part, that “[i]t shall be unlawful for an employer...to fail or refuse to hire or to discharge any individual or otherwise discriminate against any individual with respect to his compensation, terms, conditions, or privileges of employment, *because of* such individual’s age.” 29 U. S. C. §623(a)(1) (emphasis added).

The words “because of” mean “by reason of; on account of.” Webster’s Third New International Dictionary 194 (1966); see also Oxford English Dictionary 746 (1933) (defining “because of” to mean “By reason of, on account of” (italics in original)); The Random House Dictionary of the English Language 132 (1966) (defining “because” to mean “by reason; on account”). Thus, the ordinary meaning of the ADEA’s requirement that an employer took adverse action “because of” age is that age was the “reason” that the employer decided to act....To establish a disparate-treatment claim under the plain language of the ADEA, therefore, a plaintiff must prove that age was the “but-for” cause of the employer’s adverse decision....

It follows, then, that under §623(a)(1), the plaintiff retains the burden of persuasion to establish that age was the “but-for” cause of the employer’s adverse action. Indeed, we have previously held that the burden is allocated in this manner in ADEA cases. See *Kentucky Retirement Systems v. EEOC*, 554 U. S. _____. And nothing in the statute’s text indicates that Congress has carved out an exception to that rule for a subset of ADEA cases. Where the statutory text is “silent on the allocation of the burden of persuasion,” we “begin with the ordinary default rule that plaintiffs bear the risk of failing to prove their claims.” *Schaffer v. Weast*, 546 U. S. 49, 56 (2005)...

Hence, the burden of persuasion necessary to establish employer liability is the same in alleged mixed-motives cases as in any other ADEA disparate-treatment action. A plaintiff must prove by a preponderance of the evidence (which may be direct or circumstantial), that age was the “but-for” cause of the challenged employer decision.

III

Finally, we reject petitioner’s contention that our interpretation of the ADEA is controlled by *Price Waterhouse*, which initially established that the burden of persuasion shifted in alleged mixed-motives Title VII claims. In any event, it is far from clear that the Court would have the same approach were it to consider the question today in the first instance.

Whatever the deficiencies of *Price Waterhouse* in retrospect, it has become evident in the years since that case was decided that its burden-shifting framework is difficult to apply. For example, in cases tried to a jury, courts have found it particularly difficult to craft an instruction to explain its burden-shifting framework....Thus, even if *Price Waterhouse* was doctrinally sound, the problems associated with its application have eliminated any perceivable benefit to extending its framework to ADEA claims.

IV

We hold that a plaintiff bringing a disparate-treatment claim pursuant to the ADEA must prove, by a preponderance of the evidence, that age was the “but-for” cause of the challenged adverse employment action. The burden of persuasion does not shift to the employer to show that it would have taken the action regardless of age, even when a plaintiff has produced some evidence that age was one motivating factor in that decision. Accordingly, we vacate the judgment of the Court of Appeals and remand the case for further proceedings consistent with this opinion.

It is so ordered.

CASE QUESTIONS

1. What is the practical effect of this decision? Will plaintiffs with age-discrimination cases find it harder to win after *Gross*?
2. As Justice Thomas writes about it, does “but-for” cause here mean the “sole cause”? Must plaintiffs now eliminate any other possible cause in order to prevail in an ADEA lawsuit?
3. Based on this opinion, if the employer provides a nondiscriminatory reason for the change in the employee’s status (such as “corporate restructuring” or “better alignment of skills”), does the employer bear any burden of showing that those are not just words but that, for example, the restructuring really does make sense or that the “skills” really do line up better in the new arrangement?
4. If the plaintiff was retained at the same salary as before, how could he have a “discrimination” complaint, since he still made the same amount of money?
5. The case was decided by a 5-4 majority. A dissent was filed by Justice Stevens, and a separate dissent by Justice Breyer, joined by Justices Ginsburg and Souter. You can access those at <http://www.law.cornell.edu/supct/pdf/08-441P.ZD1>.

Disability Discrimination

Toyota v. Williams

534 U.S. 184 (2000)

Factual Background

Ella Williams's job at the Toyota manufacturing plant involved using pneumatic tools. When her hands and arms began to hurt, she consulted a physician and was diagnosed with carpal tunnel syndrome. The doctor advised her not to work with any pneumatic tools or lift more than twenty pounds. Toyota shifted her to a different position in the quality control inspection operations (QCIO) department, where employees typically performed four different tasks. Initially, Williams was given two tasks, but Toyota changed its policy to require all QCIO employees to rotate through all four tasks. When she performed the "shell body audit," she had to hold her hands and arms up around shoulder height for several hours at a time.

She soon began to experience pain in her neck and shoulders. When she asked permission to do only the two tasks that she could perform without difficulty, she was refused. According to Toyota, Williams then began missing work regularly.

In 1997, Toyota Motor Manufacturing, Kentucky, Inc. terminated Ella Williams, citing her poor attendance record. Subsequently, claiming to be disabled from performing her automobile assembly line job by carpal tunnel syndrome and related impairments, Williams sued Toyota for failing to provide her with a reasonable accommodation as required by the Americans with Disabilities Act (ADA) of 1990.

Granting Toyota summary judgment, the district court held that Williams's impairment did not qualify as a disability under the ADA because it had not substantially limited any major life activity and that there was no evidence that Williams had had a record of a substantially limiting impairment. In reversing, the court of appeals found that the impairments substantially limited Williams in the major life activity of performing manual tasks. Because her ailments prevented her from doing the tasks associated with certain types of manual jobs that require the gripping of tools and repetitive work with hands and arms extended at or above shoulder levels for extended periods of time, the appellate court concluded that Williams demonstrated that her manual disability involved a class of manual activities affecting the ability to perform tasks at work.

JUSTICE SANDRA DAY O'CONNOR delivered the unanimous opinion of the court.

When it enacted the ADA in 1990, Congress found that some 43 million Americans have one or more physical or mental disabilities. If Congress intended everyone with a physical impairment that precluded the performance of some isolated, unimportant, or particularly difficult manual task to qualify as disabled, the number of disabled Americans would surely have been much higher. We therefore

hold that to be substantially limited in performing manual tasks, an individual must have an impairment that prevents or severely restricts the individual from doing activities that are of central importance to most people's daily lives. The impairments impact must also be permanent or long-term.

When addressing the major life activity of performing manual tasks, the central inquiry must be whether the claimant is unable to perform the variety of tasks central to most people's daily lives, not whether the claimant is unable to perform the tasks associated with her specific job. In this case, repetitive work with hands and arms extended at or above shoulder levels for extended periods of time is not an important part of most people's daily lives. The court, therefore, should not have considered respondent's inability to do such manual work in or specialized assembly line job as sufficient proof that she was substantially limited in performing manual tasks.

At the same time, the Court of Appeals appears to have disregarded the very type of evidence that it should have focused upon. It treated as irrelevant "[t]he fact that [respondent] can...ten[d] to her personal hygiene [and] carr[y]out personal or household chores." Yet household chores, bathing, and brushing one's teeth are among the types of manual tasks of central importance to people's daily lives, and should have been part of the assessment of whether respondent was substantially limited in performing manual tasks.

The District Court noted that at the time respondent sought an accommodation from petitioner, she admitted that she was able to do the manual tasks required by her original two jobs in QCIO. In addition, according to respondent's deposition testimony, even after her condition worsened, she could still brush her teeth, wash her face, bathe, tend her flower garden, fix breakfast, do laundry, and pick up around the house. The record also indicates that her medical conditions caused her to avoid sweeping, to quit dancing, to occasionally seek help dressing, and to reduce how often she plays with her children, gardens, and drives long distances. But these changes in her life did not amount to such severe restrictions in the activities that are of central importance to most people's daily lives that they establish a manual task disability as a matter of law. On this record, it was therefore inappropriate for the Court of Appeals to grant partial summary judgment to respondent on the issue of whether she was substantially limited in performing manual tasks, and its decision to do so must be reversed.

Accordingly, we reverse the Court of Appeals' judgment granting partial summary judgment to respondent and remand the case for further proceedings consistent with this opinion.

CASE QUESTIONS

1. What is the court's most important "finding of fact" relative to hands and arms? How does this relate to the statutory language that Congress created in the ADA?
2. The case is remanded to the lower courts "for further proceedings consistent with this opinion." In practical terms, what does that mean for this case?

50.5 Summary and Exercises

Summary

For the past forty-eight years, Title VII of the Civil Rights Act of 1964 has prohibited employment discrimination based on race, religion, sex, or national origin. Any employment decision, including hiring, promotion, and discharge, based on one of these factors is unlawful and subjects the employer to an award of back pay, promotion, or reinstatement. The Equal Employment Opportunity Commission (EEOC) may file suits, as may the employee—after the commission screens the complaint.

Two major types of discrimination suits are those for disparate treatment (in which the employer intended to discriminate) and disparate impact (in which, regardless of intent, the impact of a particular non-job-related practice has a discriminatory effect). In matters of religion, the employer is bound not only to refrain from discrimination based on an employee's religious beliefs or preferences but also to accommodate the employee's religious practices to the extent that the accommodation does not impose an undue hardship on the business.

Sex discrimination, besides refusal to hire a person solely on the basis of sex, includes discrimination based on pregnancy. Sexual harassment is a form of sex discrimination, and it includes the creation of a hostile or offensive working environment. A separate statute, the Equal Pay Act, mandates equal pay for men and women assigned to the same job.

One major exception to Title VII permits hiring people of a particular religion, sex, or nationality if that feature is a bona fide occupational qualification. There is no bona fide occupational qualification (BFOQ) exception for race, nor is a public stereotype a legitimate basis for a BFOQ.

Affirmative action plans, permitting or requiring employers to hire on the basis of race to make up for past discrimination or to bring up the level of minority workers, have been approved, even though the plans may seem to conflict with Title VII. But affirmative action plans have not been permitted to overcome bona fide seniority or merit systems.

The Age Discrimination in Employment Act protects workers over forty from discharge solely on the basis of age. Amendments to the law have abolished the age ceiling for retirement, so that most people working for employers covered by the law cannot be forced to retire.

The Americans with Disabilities Act of 1990 prohibits discrimination based on disability and applies to most jobs in the private sector.

At common law, an employer was free to fire an employee for any reason or for no reason at all. In recent years, the employment-at-will doctrine has been seriously eroded. Many state courts have found against employers on

the basis of implied contracts, tortious violation of public policy, or violations of an implied covenant of good faith and fair dealing.

Beyond antidiscrimination law, several other statutes have an impact on the employment relationship. These include the plant-closing law, the Employee Polygraph Protection Act, the Occupational Safety and Health Act, the Employee Retirement Income Security Act, and the Fair Labor Standards Act.

EXERCISES

1. Rainbow Airlines, a new air carrier headquartered in Chicago with routes from Rome to Canberra, extensively studied the psychology of passengers and determined that more than 93 percent of its passengers felt most comfortable with female flight attendants between the ages of twenty-one and thirty-four. To increase its profitability, the company issued a policy of hiring only such people for jobs in the air but opened all ground jobs to anyone who could otherwise qualify. The policy made no racial distinction, and, in fact, nearly 30 percent of the flight attendants hired were black. What violations of federal law has Rainbow committed, if any?
2. Tex Olafson worked for five years as a messenger for Pressure Sell Advertising Agency, a company without a unionized workforce. On his fifth anniversary with the company, Tex was called in to the president's office, was given a 10 percent raise, and was complimented on his diligence. The following week, a new head of the messenger department was hired. He wanted to appoint his nephew to a messenger job but discovered that a company-wide hiring freeze prevented him from adding another employee to the messenger ranks. So he fired Tex and hired his nephew. What remedy, if any, does Tex have? What additional facts might change the result?
3. Ernest lost both his legs in combat in Vietnam. He has applied for a job with Excelsior Products in the company's quality control lab. The job requires inspectors to randomly check products coming off the assembly line for defects. Historically, all inspectors have stood two-hour shifts. Ernest proposes to sit in his wheelchair. The company refuses to hire him because it says he will be less efficient. Ernest's previous employment record shows him to be a diligent, serious worker. Does Ernest have a legal right to be hired? What additional facts might you want to know in deciding?
4. Marlene works for Frenzied Traders, a stockbrokerage with a seat on the New York Stock Exchange. For several years, Marlene has been a floor trader, spending all day in the hurly-burly of stock trading, yelling herself hoarse. Each year, she has received a large bonus from the company. She has just told the company that she is pregnant. Citing a company policy, she is told she can no longer engage in trading because it is too tiring for pregnant women. Instead, she may take a backroom job, though the company cannot guarantee that the floor job will be open after she delivers. Marlene also wants to take six months off after her child is born. The company says it cannot afford to give her that time. It has a policy of granting paid leave to anyone recuperating from

a stay in the hospital and unpaid leave for four months thereafter. What legal rights does Marlene have, and what remedies is she entitled to?

5. Charlie Goodfellow works for Yum-burger and has always commanded respect at the local franchise for being the fastest server. One day, he undergoes a profound religious experience, converts to Sikhism, and changes his name to Sanjay Singh. The tenets of his religion require him to wear a beard and a turban. He lets his beard grow, puts on a turban, and his fellow workers tease him. When a regional vice president sees that Sanjay is not wearing the prescribed Yum-Burger uniform, he fires him. What rights of Sanjay, if any, has Yum-burger violated? What remedies are available to him?

SELF-TEST QUESTIONS

1. Affirmative action in employment
 - a. is a requirement of Title VII of the Civil Rights Act of 1964
 - b. is prohibited by Title VII of the Civil Rights Act of 1964
 - c. is a federal statute enacted by Congress
 - d. depends on the circumstances of each case for validity

2. The Age Discrimination in Employment Act protects
 - a. all workers of any age
 - b. all workers up to age seventy
 - c. most workers over forty
 - d. no workers over seventy

3. Federal laws barring discrimination against the handicapped and disabled
 - a. apply to all disabilities
 - b. apply to most disabilities in private employment
 - c. apply to all disabilities in public employment
 - d. apply to most disabilities in public employment

4. Under Title VII, a bona fide occupational qualification exception may never apply to cases involving
 - a. racial discrimination
 - b. religious discrimination
 - c. sex discrimination
 - d. age discrimination

5. The employment-at-will doctrine derives from
 - a. Title VII of the Civil Rights Act of 1964
 - b. employment contracts
 - c. the common law
 - d. liberty of contract under the Constitution

SELF-TEST ANSWERS

1. d
2. c
3. b
4. a
5. c

Chapter 51

Labor-Management Relations

LEARNING OBJECTIVES

After reading this chapter, you should understand the following:

1. How collective bargaining was resisted for many years in the United States, and how political and economic changes resulted in legalization of labor unions
2. The four major federal labor laws in the United States
3. The process by which bargaining units are recognized by the National Labor Relations Board
4. The various kinds of unfair labor practices that employers might engage in, and those that unions and their members might engage in

Over half a century, the federal law of labor relations has developed out of four basic statutes into an immense body of cases and precedent regulating the formation and governance of labor unions and the relationships among employers, unions, and union members. Like antitrust law, labor law is a complex subject that has spawned a large class of specialized practitioners. Though specialized, it is a subject that no employer of any size can ignore, for labor law has a pervasive influence on how business is conducted throughout the United States. In this chapter, we examine the basic statutory framework and the activities that it regulates.

It is important to note at the outset that legal rights for laborers in the United States came about through physical and political struggles. The right of collective bargaining and the right to strike (and corresponding rights for employers, such as the lockout) were hard-won and incremental. The legislation described in this chapter began only after many years of labor-management strife, including judicial opposition to unions and violent and deadly confrontations between prounion workers and management.

In 1806, the union of Philadelphia Journeymen Cordwainers was convicted of and bankrupted by charges of criminal conspiracy after a strike for higher wages, setting a precedent by which the US government would combat unions for years to

come. Andrew Jackson became a strikebreaker in 1834 when he sent troops to the construction sites of the Chesapeake and Ohio Canal. In 1877, a general strike halted the movement of US railroads. In the following days, strike riots spread across the United States. The next week, federal troops were called out to force an end to the nationwide strike. At the Battle of the Viaduct in Chicago, federal troops (recently returned from an Indian massacre) killed thirty workers and wounded over one hundred. Numerous other violent confrontations marked the post-Civil War period in America, including the violent rail strikes of 1877, when President Rutherford B. Hayes sent troops to prevent obstruction of the mails. President Grover Cleveland used soldiers to break the Pullman strike of 1894. Not until the anthracite coal strikes in Pennsylvania in 1902 did the US government become a mediator between labor and management rather than an enforcer for industry.

Many US labor historians see the first phase of the labor movement in terms of the struggles in the private sector that led to the labor legislation of the New Deal, described in [Section 51.1 "A Brief History of Labor Legislation"](#). The second phase of the movement, post-World War II, saw less violent confrontation and more peaceful resolution of labor issues in collective bargaining. Yet right-to-work states in the southern part of the United States and globalization weakened the attractiveness of unions in the private sector. Right-to-work states provided a haven for certain kinds of manufacturing operations that wanted no part of bargaining with unions. Globalization meant that companies could (realistically) threaten to relocate outside the United States entirely. Unions in the public sector of the United States began to grow stronger relative to unions in the private sector: governments could not relocate as companies could, and over the last half century, there has been a gradual decline in private sector unionism and growth in public sector unionism.

51.1 A Brief History of Labor Legislation

LEARNING OBJECTIVES

1. Understand and explain the rise of labor unions in the United States.
2. Explain what common-law principles were used by employers and courts to resist legalized collective bargaining.
3. Be able to put US labor law in its historical context.

Labor and the Common Law in the Nineteenth Century

Labor unions appeared in modern form in the United States in the 1790s in Boston, New York, and Philadelphia. Early in the nineteenth century, employers began to seek injunctions against union organizing and other activities. Two doctrines were employed: (1) *common-law conspiracy* and (2) *common-law restraint of trade*. The first doctrine held that workers who joined together were acting criminally as conspirators, regardless of the means chosen or the objectives sought.

The second doctrine—common-law restraint of trade—was also a favorite theory used by the courts to enjoin unionizing and other joint employee activities. Workers who banded together to seek better wages or working conditions were, according to this theory, engaged in concerted activity that restrained trade in their labor. This theory made sense in a day in which conventional wisdom held that an employer was entitled to buy labor as cheaply as possible—the price would obviously rise if workers were allowed to bargain jointly rather than if they were required to offer their services individually on the open market.

Labor under the Antitrust Laws

The Sherman Act did nothing to change this basic judicial attitude. A number of cases decided early in the act's history condemned labor activities as violations of the antitrust law. In particular, in the *Danbury Hatters' case* (*Loewe v. Lawlor*) the Supreme Court held that a "secondary boycott" against a nonunionized company violated the Sherman Act. The hatters instigated a boycott of retail stores that sold hats manufactured by a company whose workers had struck. The union was held liable for treble damages. *Loewe v. Lawlor*, 208 U.S. 274 (1908).

By 1912, labor had organized widely, and it played a pivotal role in electing Woodrow Wilson and giving him a Democratic Congress, which responded in 1914

with the Clayton Act's "labor exemption." Section 6 of the Clayton Act says that labor unions are not "illegal combinations or conspiracies in restraint of trade, under the antitrust laws." Section 20 forbids courts from issuing injunctions in cases involving strikes, boycotts, and other concerted union activities (which were declared to be lawful) as long as they arose out of disputes between employer and employees over the terms of employment.

But even the Clayton Act proved of little lasting value to the unions. In 1921, the Supreme Court again struck out against a secondary boycott that crippled the significance of the Clayton Act provisions. In the case, a machinists' union staged a boycott against an employer (by whom the members were not employed) in order to pressure the employer into permitting one of its factories to be unionized. The Court ruled that the Clayton Act exemptions applied only in cases involving an employer and its own employees. *Duplex Printing Press Co. v. Deering*, 254 U.S. 443 (1921). Without the ability to boycott under those circumstances, and with the threat of antitrust prosecutions or treble-damage actions, labor would be hard-pressed to unionize many companies. More antiunion decisions followed.

Moves toward Modern Labor Legislation

Collective bargaining appeared on the national scene for the first time in 1918 with the creation of the War Labor Conference Board. The National War Labor Board was empowered to mediate or reconcile labor disputes that affected industries essential to the war, but after the war, the board was abolished.

In 1926, Congress enacted the Railway Labor Act. This statute imposed a duty on railroads to bargain in good faith with their employees' elected representatives. The act also established the National Mediation Board to mediate disputes that were not resolved in contract negotiations. The stage was set for more comprehensive national labor laws. These would come with the Great Depression.

The Norris-La Guardia Act

The first labor law of the Great Depression was the Norris-La Guardia Act of 1932. It dealt with the propensity of federal courts to issue preliminary injunctions, often *ex parte* (i.e., after hearing only the plaintiff's argument), against union activities. Even though the permanent injunction might later have been denied, the effect of the vaguely worded preliminary injunction would have been sufficient to destroy the attempt to unionize. The Norris-La Guardia Act forbids federal courts from temporarily or permanently enjoining certain union activities, such as peaceful picketing and strikes. The act is applicable to any "labor dispute," defined as embracing "any controversy concerning terms or conditions of employment, or

concerning the association or representation of persons in negotiating, fixing, maintaining, changing, or seeking to arrange terms or conditions of employment, regardless of whether or not the disputants stand in the proximate relation of employer and employee.” This language thus permitted the secondary boycott that had been held a violation of the antitrust laws in *Duplex Printing Press v. Deering*. The act also bars the courts from enforcing so-called yellow-dog contracts—agreements that employees made with their employer not to join unions.

The National Labor Relations Act (the Wagner Act)

In 1935, Congress finally enacted a comprehensive labor statute. The National Labor Relations Act (NLRA), often called the Wagner Act after its sponsor, Senator Robert F. Wagner, declared in Section 7 that workers in interstate commerce “have the right to self-organization, to form, join or assist labor organizations, to bargain collectively through representatives of their own choosing, and to engage in concerted activities for the purpose of collective bargaining or other mutual aid or protection.” Section 8 sets out five key **unfair labor practices**¹:

1. Interference with the rights guaranteed by Section 7
2. Interference with the organization of unions, or dominance by the employer of union administration (this section thus outlaws “company unions”)
3. Discrimination against employees who belong to unions
4. Discharging or otherwise discriminating against employees who seek relief under the act
5. Refusing to bargain collectively with union representatives

The procedures for forming a union to represent employees in an appropriate “bargaining unit” are set out in Section 9. Finally, the Wagner Act established the National Labor Relations Board (NLRB) as an independent federal administrative agency, with power to investigate and remedy unfair labor practices.

The Supreme Court upheld the constitutionality of the act in 1937 in a series of five cases. In the first, *NLRB v. Jones & Laughlin Steel Corp.*, the Court ruled that congressional power under the Commerce Clause extends to activities that might affect the flow of interstate commerce, as labor relations certainly did. *NLRB v. Jones & Laughlin Steel Corp.*, 301 U.S. 1 (1937). Through its elaborate mechanisms for establishing collective bargaining as a basic national policy, the Wagner Act has had a profound effect on interstate commerce during the last half-century.

1. Acts that violate the National Labor Relations Act, such as failing to bargain in good faith. Unfair labor practices can be committed by employers and by unions.

The Taft-Hartley Act (Labor-Management Relations Act)

The Wagner Act did not attempt to restrict union activities in any way. For a dozen years, opponents of unions sought some means of curtailing the breadth of opportunity opened up to unions by the Wagner Act. After failing to obtain relief in the Supreme Court, they took their case to Congress and finally succeeded after World War II when, in 1947, Congress, for the first time since 1930, had Republican majorities in both houses. Congress responded to critics of “big labor” with the Taft-Hartley Act, passed over President Truman’s veto. Taft-Hartley—known formally as the Labor-Management Relations Act—did not repeal the protections given employees and unions under the NLRA. Instead, it balanced union power with a declaration of rights of employers. In particular, Taft-Hartley lists six unfair labor practices of unions, including secondary boycotts, strikes aimed at coercing an employer to fire an employee who refuses to join a union, and so-called jurisdictional strikes over which union should be entitled to do specified jobs at the work site.

In addition to these provisions, Taft-Hartley contains several others that balance the rights of unions and employers. For example, the act guarantees both employers and unions the right to present their views on unionization and collective bargaining. Like employers, unions became obligated to bargain in good faith. The act outlaws the **closed shop**² (a firm in which a worker must belong to a union), gives federal courts the power to enforce collective bargaining agreements, and permits private parties to sue for damages arising out of a secondary boycott. The act also created the Federal Mediation and Conciliation Service to cope with strikes that create national emergencies, and it declared strikes by federal employees to be unlawful. It was this provision that President Reagan invoked in 1981 to fire air traffic controllers who walked off the job for higher pay.

The Landrum-Griffin Act

Congressional hearings in the 1950s brought to light union corruption and abuses and led in 1959 to the last of the major federal labor statutes, the Landrum-Griffin Act (Labor-Management Reporting and Disclosure Act). It established a series of controls on internal union procedures, including the method of electing union officers and the financial controls necessary to avoid the problems of corruption that had been encountered. Landrum-Griffin also restricted union picketing under various circumstances, narrowed the loopholes in Taft-Hartley’s prohibitions against secondary boycotts, and banned “hot cargo” agreements (see [Section 51.3.6 "Hot Cargo Agreement"](#)).

2. A firm where potential employees must belong to a union before being hired and must remain a member during employment.

KEY TAKEAWAY

Common-law doctrines were used in the early history of the labor movement to enjoin unionizing and other joint employee activities. These were deemed to be restraints of trade that violated antitrust laws. In addition, common-law conspiracy charges provided criminal enforcement against joint employee actions and agreements. Politically, the labor movement gained some traction in 1912 and got an antitrust-law exemption in the Clayton Act. But it was not until the Great Depression and the New Deal that the right of collective bargaining was recognized by federal statute in the National Labor Relations Act. Subsequent legislation (Taft-Hartley and Landrum-Griffin) added limits to union activities and controls over unions in their internal functions.

EXERCISES

1. Use the Internet to find stories of government-sponsored violence against union activities in the late 1900s and early part of the twentieth century. What were some of the most violent confrontations, and what caused them? Discuss why business and government were so opposed to collective bargaining.
2. Use the Internet to find out which countries in the world have legal systems that support collective bargaining. What do these countries have in common with the United States? Does the People's Republic of China support collective bargaining?

51.2 The National Labor Relations Board: Organization and Functions

LEARNING OBJECTIVE

1. Explain the process that leads to recognition of bargaining units by the National Labor Relations Board.

The National Labor Relations Board (NLRB) consists of five board members, appointed by the president and confirmed by the Senate, who serve for five-year, staggered terms. The president designates one of the members as chairman. The president also appoints the general counsel, who is in charge of the board's investigatory and prosecutorial functions and who represents the NLRB when it goes (or is taken) to court. The general counsel also oversees the thirty-three regional offices scattered throughout the country, each of which is headed by a regional director.

The NLRB serves two primary functions: (1) it investigates allegations of unfair labor practices and provides remedies in appropriate cases, and (2) it decides in contested cases which union should serve as the exclusive bargaining agent for a particular group of employees.

Unfair Labor Practice Cases

Unfair labor practice cases are fairly common; some twenty-two thousand unfair labor practice claims were filed in 2008. Volume was considerably higher thirty years ago; about forty thousand a year was typical in the early 1980s. A charge of an unfair labor practice must be presented to the board, which has no authority to initiate cases on its own. Charges are investigated at the regional level and may result in a complaint by the regional office. A regional director's failure to issue a complaint may be appealed to the general counsel, whose word is final (there is no possible appeal).

A substantial number of charges are dismissed or withdrawn each year—sometimes as many as 70 percent. Once issued, the complaint is handled by an attorney from the regional office. Most cases, usually around 80 percent, are settled at this level. If not settled, the case will be tried before an administrative law judge, who will take evidence and recommend a decision and an order. If no one objects, the decision and order become final as the board's opinion and order. Any party may appeal the decision to the board in Washington. The board acts on written briefs, rarely on

oral argument. The board's order may be appealed to the US court of appeals, although its findings of fact are not reviewable "if supported by substantial evidence on the record considered as a whole." The board may also go to the court of appeals to seek enforcement of its orders.

Representation Cases

The NLRB is empowered to oversee representative elections—that is, elections by employees to determine whether or not to be represented by a union. The board becomes involved if at least 30 percent of the members of a potential bargaining unit petition it to do so or if an employer petitions on being faced with a claim by a union that it exclusively represents the employees. The board determines which bargaining unit is appropriate and which employees are eligible to vote. A representative of the regional office will conduct the election itself, which is by secret ballot. The regional director may hear challenges to the election procedure to determine whether the election was valid.

KEY TAKEAWAY

The NLRB has two primary functions: (1) it investigates allegations of unfair labor practices and provides remedies in appropriate cases, and (2) it decides in contested cases which union should serve as the exclusive bargaining agent for a particular group of employees.

EXERCISES

1. Go to the website for the NLRB. Find out how many unfair labor practice charges are filed each year. Also find out how many "have merit" according to the NLRB.
2. How many of these unfair labor practice charges that "have merit" are settled through the auspices of the NLRB?

51.3 Labor and Management Rights under the Federal Labor Laws

LEARNING OBJECTIVES

1. Describe and explain the process for the National Labor Relations Board to choose a particular union as the exclusive bargaining representative.
2. Describe and explain the various duties that employers have in bargaining.
3. Indicate the ways in which employers may commit unfair labor practice by interfering with union activity.
4. Explain the union's right to strike and the difference between an economic strike and a strike over an unfair labor practice.
5. Explain secondary boycotts and hot cargo agreements and why they are controversial.

Choosing the Union as the Exclusive Bargaining Representative Determining the Appropriate Union

As long as a union has a valid contract with the employer, no rival union may seek an election to oust it except within sixty to ninety days before the contract expires. Nor may an election be held if an election has already been held in the bargaining unit during the preceding twelve months.

Whom does the union represent? In companies of even moderate size, employees work at different tasks and have different interests. Must the secretaries, punch press operators, drivers, and clerical help all belong to the same union in a small factory? The National Labor Relations Board (NLRB) has the authority to determine which group of employees will constitute the appropriate bargaining unit. To make its determination, the board must look at the history of collective bargaining among similar workers in the industry; the employees' duties, wages, skills, and working conditions; the relationship between the proposed unit and the structure of the employer's organization; and the desires of the employees themselves.

Two groups must be excluded from any bargaining unit—supervisory employees and independent contractors. Determining whether or not a particular employee is a supervisor is left to the discretion of the board.

Interfering with Employee Communication

To conduct an organizing drive, a union must be able to communicate with the employees. But the employer has valid interests in seeing that employees and organizers do not interfere with company operations. Several different problems arise from the need to balance these interests.

One problem is the protection of the employer's property rights. May nonemployee union organizers come onto the employer's property to distribute union literature—for example, by standing in the company's parking lots to hand out leaflets when employees go to and from work? May organizers, whether employees or not, picket or hand out literature in private shopping centers in order to reach the public—for example, to protest a company's policies toward its nonunion employees? The interests of both employees and employers under the NLRB are twofold: (1) the right of the employees (a) to communicate with each other or the public and (b) to hear what union organizers have to say, and (2) the employers' (a) property rights and (b) their interest in managing the business efficiently and profitably.

The rules that govern in these situations are complex, but in general they appear to provide these answers: (1) If the persons doing the soliciting are not employees, the employer may bar them from entering its private property, even if they are attempting to reach employees—assuming that the employer does not discriminate and applies a rule against use of its property equally to everyone. *NLRB v. Babcock Wilcox Co.*, 351 U.S. 105 (1956). (2) If the solicitors are not employees and they are trying to reach the public, they have no right to enter the employer's private property. (3) If the solicitors are employees who are seeking to reach the public, they have the right to distribute on the employer's property—in a common case, in a shopping center—unless they have a convenient way to reach their audience on public property off the employer's premises. *Hudgens v. NLRB*, 424 U.S. 507 (1976). (4) If the solicitors are employees seeking to reach employees, the employer is permitted to limit the distribution of literature or other solicitations to avoid litter or the interruption of work, but it cannot prohibit solicitation on company property altogether.

In the leading case of *Republic Aviation Corp. v. NLRB*, the employer, a nonunion plant, had a standing rule against any kind of solicitation on the premises. *Republic Aviation Corp. v. NLRB*, 324 U.S. 793 (1945). Thereafter, certain employees attempted to organize the plant. The employer fired one employee for soliciting on behalf of the union and three others for wearing union buttons. The Supreme Court upheld the board's determination that the discharges constituted an unfair labor practice under Section 8(a) of the NLRA. It does not matter, the Court said, whether the employees had other means of communicating with each other or that the

employer's rule against solicitation may have no effect on the union's attempt to organize the workers. In other words, the employer's intent or motive is irrelevant. The only question is whether the employer's actions might tend to interfere with the employees' exercise of their rights under the NLRB.

Regulating Campaign Statements

A union election drive is not like a polite conversation over coffee; it is, like political campaigns, full of charges and countercharges. Employers who do not want their employees unionized may warn darkly of the effect of the union on profitability; organizers may exaggerate the company's financial position. In a 1982 NLRB case, *NLRB v. Midland National Life Ins. Co.*, the board said it would not set aside an election if the parties misrepresented the issues or facts but that it would do so if the statements were made in a deceptive manner—for example, through forged documents. *Midland National Life Ins. Co.*, 263 N.L.R.B. 130 (1982). The board also watches for threats and promises of rewards; for example, the employer might threaten to close the plant if the union succeeds. In *NLRB v. Gissel Packing Co.*, the employer stated his worries throughout the campaign that a union would prompt a strike and force the plant to close. *NLRB v. Gissel Packing Co.*, 395 U.S. 575 (1969). The board ruled that the employer's statements were an impermissible threat. To the employer's claim that he was simply exercising his First Amendment rights, the Supreme Court held that although employers do enjoy freedom of speech, it is an unfair labor practice to threaten consequences that are not rooted in economic realities.

A union campaign has become an intricate legal duel, heavily dependent on strategic considerations of law and public relations. Neither management nor labor can afford to wage a union campaign without specialized advisers who can guide the thrust and parry of the antagonists. Labor usually has such advisers because very few organizational drives are begun without outside organizers who have access to union lawyers. A business person who attempts to fight a union, like a labor organizer or an employee who attempts to organize one, takes a sizeable risk when acting alone, without competent advice. For example, an employer's simple statement like "We will get the heating fixed" in response to a seemingly innocent question about the "drafty old building" at a meeting with employees can lead to an NLRB decision to set aside an election if the union loses, because the answer can easily be construed as a promise, and under Section 8(c) of the National Labor Relations Act (NLRA), a promise of reward or benefit during an organization campaign is an unfair labor practice by management. Few union election campaigns occur without questions, meetings, and pamphleteering carefully worked out in advance.

The results of all the electioneering are worth noting. In the 1980s, some 20 percent of the total US workforce was unionized. As of 2009, the union membership rate was 12.3 percent, and more union members were public employees than private sector employees. Fairly or unfairly, public employee unions were under attack as of 2010, as their wages generally exceeded the average wages of other categories of workers.

Exclusivity

Once selected as the bargaining representative for an appropriate group of employees, the union has the **exclusive right to bargain**³. Thereafter, individual employees may not enter into separate contracts with the employer, even if they voted against the particular union or against having a union at all. The principle of exclusivity is fundamental to the collective bargaining process. Just how basic it is can be seen in *Emporium Capwell Co. v. Western Addition Community Organization* (Section 51.4.1 "Exclusivity"), in which one group of employees protested what they thought were racially discriminatory work assignments, barred under the **collective bargaining agreement**⁴ (the contract between the union and the employer). Certain of the employees filed grievances with the union, which looked into the problem more slowly than the employees thought necessary. They urged that the union permit them to picket, but the union refused. They picketed anyway, calling for a consumer boycott. The employer warned them to desist, but they continued and were fired. The question was whether they were discharged for engaging in concerted activity protected under Section 7 of the NLRA.

The Duty to Bargain

The Duty to Bargain in Good Faith

The NLRA holds both employer and union to a duty to "bargain in good faith." What these words mean has long been the subject of controversy. Suppose Mr. Mardian, a company's chief negotiator, announces to Mr. Ulasewicz, the company's chief union negotiator, "I will sit down and talk with you, but be damned if I will agree to a penny more an hour than the people are getting now." That is not a refusal to bargain: it is a statement of the company's position, and only Mardian's actual conduct during the negotiations will determine whether he was bargaining in good faith. Of course, if he refused to talk to Ulasewicz, he would have been guilty of a failure to bargain in good faith.

3. After a union election, the union will be, by law, the exclusive bargaining agent for a group of employees.

4. The contract between the union and the employer.

Suppose Mardian has steadily insisted during the bargaining sessions that the company must have complete control over every aspect of the labor relationship, including the right to hire and fire exactly as it saw fit, the right to raise or lower wages whenever it wanted, and the right to determine which employee was to do which job. The Supreme Court has said that an employer is not obligated to accept any particular term in a proposed collective bargaining agreement and that the

NLRB may not second-guess any agreement eventually reached. *NLRB v. American National Insurance Co.*, 343 U.S. 395 (1962). However, the employer must actually engage in bargaining, and a stubborn insistence on leaving everything entirely to the discretion of management has been construed as a failure to bargain. *NLRB v. Reed St Prince Manufacturing Co.*, 205 F.2d 131 (1st Cir. 1953).

Suppose Mardian had responded to Ulasewicz's request for a ten-cent-an-hour raise: "If we do that, we'll go broke." Suppose further that Ulasewicz then demanded, on behalf of the union, that Mardian prove his contention but that Mardian refused. Under these circumstances, the Supreme Court has ruled, the NLRB is entitled to hold that management has failed to bargain in good faith, for once having raised the issue, the employer must in good faith demonstrate veracity. *NLRB v. Truitt Manufacturer Co.*, 351 U.S. 149 (1956).

Mandatory Subjects of Bargaining

The NLRB requires employers and unions to bargain over "terms and condition of employment." Wages, hours, and working conditions—whether workers must wear uniforms, when the lunch hour begins, the type of safety equipment on hand—are well-understood terms and conditions of employment. But the statutory phrase is vague, and the cases abound with debates over whether a term insisted on by union or management is within the statutory phrase. No simple rule can be stated for determining whether a desire of union or management is mandatory or nonmandatory. The cases do suggest that management retains the right to determine the scope and direction of the enterprise, so that, for example, the decision to invest in labor-saving machinery is a nonmandatory subject—meaning that a union could not insist that an employer bargain over it, although the employer may negotiate if it desires. Once a subject is incorporated in a collective bargaining agreement, neither side may demand that it be renegotiated during the term of the agreement.

The Board's Power to Compel an Agreement

A mere refusal to agree, without more, is not evidence of bad-faith bargaining. That may seem a difficult conclusion to reach in view of what has just been said. Nevertheless, the law is clear that a company may refuse to accede to a union's demand for any reason other than an unwillingness to consider the matter in the first place. If a union negotiator cannot talk management into accepting his demand, then the union may take other actions—including strikes to try to force management to bow. It follows from this conclusion that the NLRB has no power to *compel* agreement—even if management is guilty of negotiating in bad faith. The federal labor laws are premised on the fundamental principle that the parties are free to bargain.

Interference and Discrimination by the Employer Union Activity on Company Property

The employer may not issue a rule flatly prohibiting solicitation or distribution of literature during “working time” or “working hours”—a valid rule against solicitation or distribution must permit these activities during employees’ free time, such as on breaks and at meals. A rule that barred solicitation on the plant floor during actual work would be presumptively valid. However, the NLRB has the power to enjoin its enforcement if the employer used the rule to stop union soliciting but permitted employees during the forbidden times to solicit for charitable and other causes.

“Runaway Shop”

A business may lawfully decide to move a factory for economic reasons, but it may not do so to discourage a union or break it apart. The removal of a plant from one location to another is known as a runaway shop. An employer’s representative who conceals from union representatives that a move is contemplated commits an unfair labor practice because the union is deprived of the opportunity to negotiate over an important part of its members’ working conditions. If a company moves a plant and it is later determined that the move was to interfere with union activity, the board may order the employer to offer affected workers employment at the new site and the cost of transportation.

Other Types of Interference

Since “interference” is not a precise term but descriptive of a purpose embodied in the law, many activities lie within its scope. These include hiring professional strikebreakers to disrupt a strike, showing favoritism toward a particular union to discourage another one, awarding or withholding benefits to encourage or discourage unionization, engaging in misrepresentations and other acts during election campaigns, spying on workers, making employment contracts with individual members of a union, blacklisting workers, attacking union activists physically or verbally, and disseminating various forms of antiunion propaganda.

Discrimination against Union Members

Under Section 8(a)(3) of the NLRA, an employer may not discriminate against employees in hiring or tenure to encourage or discourage membership in a labor organization. Thus an employer may not refuse to hire a union activist and may not fire an employee who is actively supporting the union or an organizational effort if the employee is otherwise performing adequately on the job. Nor may an employer discriminate among employees seeking reinstatement after a strike or

discriminatory layoff or **lockout**⁵ (a closing of the job site to prevent employees from coming to work), hiring only those who were less vocal in their support of the union.

The provision against employer discrimination in hiring prohibits certain types of compulsory unionism. Four basic types of **compulsory unionism**⁶ are possible: the closed shop, the union shop, maintenance-of-membership agreements, and preferential hiring agreements. In addition, a fifth arrangement—the agency shop—while not strictly compulsory unionism, has characteristics similar to it. Section 8(a)(3) prohibits the closed shop and preferential hiring. But Section 14 permits states to enact more stringent standards and thus to outlaw the union shop, the agency shop, and maintenance of membership as well.

1. **Closed shop.** This type of agreement requires a potential employee to belong to the union before being hired and to remain a member during employment. It is unlawful, because it would require an employer to discriminate on the basis of membership in deciding whether to hire.
2. **Union shop**⁷. An employer who enters into a union shop agreement with the union may hire a nonunion employee, but all employees who are hired must then become members of the union and remain members so long as they work at the job. Because the employer may hire anyone, a union or nonunion member, the union shop is lawful unless barred by state law.
3. **Maintenance-of-membership agreements.** These agreements require employees who are members of the union before being hired to remain as members once they are hired unless they take advantage of an “escape clause” to resign within a time fixed in the collective bargaining agreement. Workers who were not members of the union before being hired are not required to join once they are on the job. This type of agreement is lawful unless barred by state law.
4. **Preferential hiring.** An employer who accepts a preferential hiring clause agrees to hire only union members as long as the union can supply him with a sufficient number of qualified workers. These clauses are unlawful.
5. **Agency shop.** The agency shop is not true compulsory unionism, for it specifically permits an employee not to belong to the union. However, it does require the employee to pay into the union the same amount required as dues of union members. The legality of an agency shop is determined by state law. If permissible under state law, it is permissible under federal law.

5. A management tactic designed to gain bargaining advantage for the company by refusing to allow union members to work (and thus depriving them of their pay).

6. Employers must not discriminate where there is a closed shop, a union shop, maintenance-of-membership agreements, or preferential hiring agreements.

7. This exists where the bargaining unit and the employer have agreed that the employer can hire either labor union members or nonmembers but that all nonunion employees must become union members within a specified period of time.

The Right to Strike

Section 13 of the NLRA says that “nothing in this Act, except as specifically provided for herein, shall be construed so as either to interfere with or impede or diminish in any way the right to strike, or to affect the limitations or qualifications on that right.” The labor statutes distinguish between two types of strikes: the **economic strike**⁸ and the strike over an unfair labor practice. In the former, employees go on strike to try to force the employer to give in to the workers’ demands. In the latter, the strikers are protesting the employer’s committing an unfair labor practice. The importance of the distinction lies in whether the employees are entitled to regain their jobs after the strike is over. In either type of strike, an employer may hire substitute employees during the strike. When it concludes, however, a difference arises. In *NLRB v. International Van Lines*, the Supreme Court said that an employer may hire permanent employees to take over during an economic strike and need not discharge the substitute employees when it is done. *NLRB v. International Van Lines*, 409 U.S. 48 (1972). That is not true for a strike over an unfair labor practice: an employee who makes an unconditional offer to return to his job is entitled to it, even though in the meantime the employer may have replaced him.

These rules do not apply to unlawful strikes. Not every walkout by workers is permissible. Their collective bargaining agreement may contain a no-strike clause barring strikes during the life of the contract. Most public employees—that is, those who work for the government—are prohibited from striking. Sit-down strikes, in which the employees stay on the work site, precluding the employer from using the facility, are unlawful. So are wildcat strikes, when a faction within the union walks out without authorization. Also unlawful are violent strikes, jurisdictional strikes, secondary strikes and boycotts, and strikes intended to force the employer to sign “hot cargo” agreements (see [Section 51.3.6 "Hot Cargo Agreement"](#)).

To combat strikes, especially when many employers are involved with a single union trying to bargain for better conditions throughout an industry, an employer may resort to a lockout. Typically, the union will call a whipsaw strike, striking some of the employers but not all. The whipsaw strike puts pressure on the struck employers because their competitors are still in business. The employers who are not struck may lawfully respond by locking out all employees who belong to the multiemployer union. This is known as a defensive lockout. In several cases, the Supreme Court has ruled that an offensive lockout, which occurs when the employer, anticipating a strike, locks the employees out, is also permissible.

8. Employees go on strike to force an employer to give in to workers’ demands.

9. Union picketing directed at one business, designed to induce that business to stop doing business with the union’s employer.

Secondary Boycotts

Section 8(b)(4), added to the NLRA by the Taft-Hartley Act, prohibits workers from engaging in **secondary boycotts**⁹—strikes, refusals to handle goods, threats,

coercion, restraints, and other actions aimed at forcing any person to refrain from performing services for or handling products of any producer other than the employer, or to stop doing business with any other person. Like the Robinson-Patman Act ([Chapter 48 "Antitrust Law"](#)), this section of the NLRA is extremely difficult to parse and has led to many convoluted interpretations. However, its essence is to prevent workers from picketing employers not involved in the primary labor dispute.

Suppose that the Amalgamated Widget Workers of America puts up a picket line around the Ace Widget Company to force the company to recognize the union as the exclusive bargaining agent for Ace's employees. The employees themselves do not join in the picketing, but when a delivery truck shows up at the plant gates and discovers the pickets, it turns back because the driver's policy is never to cross a picket line. This activity falls within the literal terms of Section (8)(b)(4): it seeks to prevent the employees of Ace's suppliers from doing business with Ace. But in *NLRB v. International Rice Milling Co.*, the Supreme Court declared that this sort of primary activity—aimed directly at the employer involved in the primary dispute—is not unlawful. *NLRB v. International Rice Milling Co.*, 341 U.S. 665 (1951). So it is permissible to throw up a picket line to attempt to stop anyone from doing business with the employer—whether suppliers, customers, or even the employer's other employees (e.g., those belonging to other unions). That is why a single striking union is so often successful in closing down an entire plant: when the striking union goes out, the other unions “honor the picket line” by refusing to cross it and thus stay out of work as well. The employer might have been able to replace the striking workers if they were only a small part of the plant's labor force, but it becomes nearly impossible to replace all the workers within a dozen or more unions.

Suppose the United Sanders Union strikes the Ace Widget Company. Nonunion sanders refuse to cross the picket line. So Ace sends out its unsanded widgets to Acme Sanders, a job shop across town, to do the sanding job. When the strikers learn what Ace has done, they begin to picket Acme, at which point Acme's sanders honor the picket line and refuse to enter the premises. Acme goes to court to enjoin the pickets—an exception to the Norris-La Guardia Act permits the federal courts to enjoin picketing in cases of unlawful secondary boycotts. Should the court grant the injunction? It might seem so, but under the so-called ally doctrine, the court will not. Since Acme is joined with Ace to help it finish the work, the courts deem the second employer an ally (or extension) of the first. The second picket line, therefore, is not secondary.

Suppose that despite the strike, Ace manages to ship its finished product to the Dime Store, which sells a variety of goods, including widgets. The union puts up a picket around the store; the picketers bear signs that urge shoppers to refrain from buying any Ace widgets at the Dime Store. Is this an unlawful secondary boycott?

Again, the answer is no. A proviso to Section 8(b)(4) permits publicity aimed at truthfully advising the public that products of a primary employer with whom the union is on strike are being distributed by a secondary employer.

Now suppose that the picketers carried signs and orally urged shoppers not to enter the Dime Store at all until it stopped carrying Ace's widgets. That would be unlawful: a union may not picket a secondary site to persuade consumers to refrain from purchasing any of the secondary employer's products. Likewise, the union may not picket in order to cause the secondary employees (the salesclerks at the Dime Store) to refuse to go to work at the secondary employer. The latter is a classic example of inducing a secondary work stoppage, and it is barred by Section 8(b)(4). However, in *DeBartolo Corp. v. Florida Gulf Coast Building and Construction Trades Council*, the Supreme Court opened what may prove to be a significant loophole in the prohibition against secondary boycotts. *DeBartolo Corp. v. Florida Gulf Coast Building and Construction Trades Council*, 485 U.S. 568 (1988). Instead of picketing, the union distributed handbills at the entrance to a shopping mall, asking customers not to patronize any stores in the mall until the mall owner, in building new stores, promised to deal only with contractors paying "fair wages." The Court approved the handbilling, calling it "only an attempt to persuade customers not to shop in the mall," distinguishing it from picketing, which the Court said would constitute a secondary boycott.

Hot Cargo Agreement

A union might find it advantageous to include in a collective bargaining agreement a provision under which the employer agrees to refrain from dealing with certain people or from purchasing their products. For example, suppose the Teamsters Union negotiates a contract with its employers that permits truckers to refuse to carry goods to an employer being struck by the Teamsters or any other union. The struck employer is the primary employer; the employer who has agreed to the clause—known as a hot cargo clause—is the secondary employer. The Supreme Court upheld these clauses in *United Brotherhood of Carpenters and Joiners, Local 1976 v. NLRB*, but the following year, Congress outlawed them in Section 8(e), with a partial exemption for the construction industry and a full exemption for garment and apparel workers. *United Brotherhood of Carpenters and Joiners, Local 1976 v. NLRB*, 357 U.S. 93 (1958).

Discrimination by Unions

A union certified as the exclusive bargaining representative in the appropriate bargaining unit is obligated to represent employees within that unit, even those who are not members of the union. Various provisions of the labor statutes prohibit unions from entering into agreements with employers to discriminate against

nonmembers. The laws also prohibit unions from treating employees unfairly on the basis of race, creed, color, or national origin.

Jurisdictional Disputes

Ace Widget, a peaceful employer, has a distinguished labor history. It did not resist the first union, which came calling in 1936, just after the NLRA was enacted; by 1987, it had twenty-three different unions representing 7,200 workers at forty-eight sites throughout the United States. Then, because of increasingly more powerful and efficient machinery, United Widget Workers realized that it was losing jobs throughout the industry. It decided to attempt to bring within its purview jobs currently performed by members of other unions. United Widget Workers asked Ace to assign all sanding work to its members. Since sanding work was already being done by members of the United Sanders, Ace management refused. United Widget Workers decided to go on strike over the issue. Is the strike lawful? Under Section 8(b)(4)(D), regulating jurisdictional disputes, it is not. It is an unfair labor practice for a union to strike or engage in other concerted actions to pressure an employer to assign or reassign work to one union rather than another.

Bankruptcy and the Collective Bargaining Agreement

An employer is bound by a collective bargaining agreement to pay the wages of unionized workers specified in the agreement. But obviously, no paper agreement can guarantee wages when an insolvent company goes out of business. Suppose a company files for reorganization under the bankruptcy laws (see [Chapter 30 "Bankruptcy"](#)). May it then ignore its contractual obligation to pay wages previously bargained for? In the early 1980s, several major companies—for example, Continental Airlines and Oklahoma-based Wilson Foods Corporation—sought the protection of federal bankruptcy law in part to cut union wages. Alarmed, Congress, in 1984, amended the bankruptcy code to require companies to attempt to negotiate a modification of their contracts in good faith. In Bankruptcy Code Section 1113, Congress set forth several requirements for a debtor to extinguish its obligations under a collective bargaining agreement (CBA). Among other requirements, the debtor must make a proposal to the union modifying the CBA based on accurate and complete information, and meet with union leaders and confer in good faith after making the proposal and before the bankruptcy judge would rule.

If negotiations fail, a bankruptcy judge may approve the modification if it is necessary to allow the debtor to reorganize, and if all creditors, the debtor, and affected parties are treated fairly and equitably. If the union rejects the proposal without good cause, and the debtor has met its obligations of fairness and consultation from section 1113, the bankruptcy judge can accept the proposed

modification to the CBA. In 1986, the US court of appeals in Philadelphia ruled that Wheeling-Pittsburgh Steel Corporation could not modify its contract with the United Steelworkers simply because it was financially distressed. The court pointed to the company's failure to provide a "snap-back" clause in its new agreement. Such a clause would restore wages to the higher levels of the original contract if the company made a comeback faster than anticipated. *Wheeling-Pittsburgh Steel Corp. v. United Steelworkers of America*, 791 F.2d 1071 (3d Cir. 1986). But in the 2006 case involving Northwest Airlines Chapter 11 reorganization, *In re Northwest Airlines Corp.*, 2006 Bankr. LEXIS 1159 (So. District N.Y.), the court found that Northwest had to reduce labor costs if it were going to successfully reorganize, that it had made an equitable proposal and consulted in good faith with the union, but that the union had rejected the proposed modification without good cause. Section 1113 was satisfied, and Northwest was allowed to modify its CBA with the union.

KEY TAKEAWAY

The NLRB determines the appropriate bargaining unit and also supervises union organizing drives. It must balance protecting the employer's rights, including property rights and the right to manage the business efficiently, with the right of employees to communicate with each other. The NLRB will select a union and give it the exclusive right to bargain, and the result will usually be a collective bargaining unit. The employer should not interfere with the unionizing process or interfere once the union is in place. The union has the right to strike, subject to certain very important restrictions.

EXERCISES

1. Suppose that employees of the Shop Rite chain elect the Allied Food Workers Union as their exclusive bargaining agent. Negotiations for an initial collective bargaining agreement begin, but after six months, no agreement has been reached. The company finds excess damage to merchandise in its warehouse and believes that this was intentional sabotage by dissident employees. The company notifies the union representative that any employees doing such acts will be terminated, and the union, in turn, notifies the employees. Soon thereafter, a Shop Rite manager notices an employee in the flour section—where he has no right to be—making quick motions with his hands. The manager then finds several bags of flour that have been cut. The employee is fired, whereupon a fellow employee and union member leads more than two dozen employees in an immediate walkout. The company discharges these employees and refuses to rehire them. The employees file a grievance with the NLRB. Are they entitled to get their jobs back? *NLRB v. Shop Rite Foods*, 430 F.2d 786 (5th Cir. 1970).
2. American Shipbuilding Company has a shipyard in Chicago, Illinois. During winter months, it repairs ships operating on the Great Lakes, and the workers at the shipyard are represented by several different unions. In 1961, the unions notified the company of their intention to seek a modification of the current collective bargaining agreement. On five previous occasions, agreements had been preceded by strikes (including illegal strikes) that were called just after ships arrived in the shipyard for repairs. In this way, the unions had greatly increased their leverage in bargaining with the company. Because of this history, the company was anxious about the unions' strike plans. In August 1961, after extended negotiations, the company and the unions reached an impasse. The company then decided to lay off most of the workers and sent the following notice: "Because of the labor dispute which has been unresolved since August of 1961, you are laid off until further notice." The unions filed unfair labor practice charges with the NLRB. Did the company engage in an unfair labor practice? *American Shipbuilding Company v. NLRB*, 380 U.S. 300 (1965).

51.4 Case

Exclusivity

Emporium Capwell Co. v. Western Addition Community Organization

420 U.S. 50 (1975)

The Emporium Capwell Company (Company) operates a department store in San Francisco. At all times relevant to this litigation it was a party to the collective-bargaining agreement negotiated by the San Francisco Retailer's Council, of which it was a member, and the Department Store Employees Union (Union), which represented all stock and marketing area employees of the Company. The agreement, in which the Union was recognized as the sole collective-bargaining agency for all covered employees, prohibited employment discrimination by reason of race, color, creed, national origin, age, or sex, as well as union activity. It had a no-strike or lockout clause, and it established grievance and arbitration machinery for processing any claimed violation of the contract, including a violation of the anti-discrimination clause.

On April 3, 1968, a group of Company employees covered by the agreement met with the secretary-treasurer of the Union, Walter Johnson, to present a list of grievances including a claim that the Company was discriminating on the basis of race in making assignments and promotions. The Union official agreed to certain of the grievances and to investigate the charge of racial discrimination. He appointed an investigating committee and prepared a report on the employees' grievances, which he submitted to the Retailer's Council and which the Council in turn referred to the Company. The report described "the possibility of racial discrimination" as perhaps the most important issue raised by the employees and termed the situation at the Company as potentially explosive if corrective action were not taken. It offers as an example of the problem the Company's failure to promote a Negro stock employee regarded by other employees as an outstanding candidate but a victim of racial discrimination.

Shortly after receiving the report, the Company's labor relations director met representatives and agreed to "look into the matter" of discrimination, and see what needed to be done. Apparently unsatisfied with these representations, the Union held a meeting in September attended by Union officials, Company employees, and representatives of the California Fair Employment Practices Committee (FEPC) and the local anti-poverty agency. The secretary-treasurer of the

Union announced that the Union had concluded that the Company was discriminating, and that it would process every such grievance through to arbitration if necessary. Testimony about the Company's practices was taken and transcribed by a court reporter, and the next day the Union notified the Company of its formal charge and demanded that the union-management Adjustment Board be convened "to hear the entire case."

At the September meeting some of the Company's employees had expressed their view that the contract procedures were inadequate to handle a systemic grievance of this sort; they suggested that the Union instead begin picketing the store in protest. Johnson explained that the collective agreement bound the Union to its processes and expressed his view that successful grievants would be helping not only themselves but all others who might be the victims of invidious discrimination as well. The FEPC and anti-poverty agency representatives offered the same advice. Nonetheless, when the Adjustment Board meeting convened on October 16, James Joseph Hollins, Torn Hawkins, and two other employees whose testimony the Union had intended to elicit refused to participate in the grievance procedure. Instead, Hollins read a statement objecting to reliance on correction of individual inequities as an approach to the problem of discrimination at the store and demanding that the president of the Company meet with the four protestants to work out a broader agreement for dealing with the issue as they saw it. The four employees then walked out of the hearing.

...On Saturday, November 2, Hollins, Hawkins, and at least two other employees picketed the store throughout the day and distributed at the entrance handbills urging consumers not to patronize the store. Johnson encountered the picketing employees, again urged them to rely on the grievance process, and warned that they might be fired for their activities. The pickets, however, were not dissuaded, and they continued to press their demand to deal directly with the Company president.

On November 7, Hollins and Hawkins were given written warnings that a repetition of the picketing or public statements about the Company could lead to their discharge. When the conduct was repeated the following Saturday, the two employees were fired.

[T]he NLRB Trial Examiner found that the discharged employees had believed in good faith that the Company was discriminating against minority employees, and that they had resorted to concerted activity on the basis of that belief. He concluded, however, that their activity was not protected by § 7 of the Act and that their discharges did not, therefore, violate § 8(a)(1).

The Board, after oral argument, adopted the findings and conclusions of its Trial Examiner and dismissed the complaint. Among the findings adopted by the Board was that the discharged employees' course of conduct was no mere presentation of a grievance but nothing short of a demand that the [Company] bargain with the picketing employees for the entire group of minority employees.

The Board concluded that protection of such an attempt to bargain would undermine the statutory system of bargaining through an exclusive, elected representative, impede elected unions' efforts at bettering the working conditions of minority employees, "and place on the Employer an unreasonable burden of attempting to placate self-designated representatives of minority groups while abiding by the terms of a valid bargaining agreement and attempting in good faith to meet whatever demands the bargaining representative put forth under that agreement."

On respondent's petition for review the Court of Appeals reversed and remanded. The court was of the view that concerted activity directed against racial discrimination enjoys a "unique status" by virtue of the national labor policy against discrimination....The issue, then, is whether such attempts to engage in separate bargaining are protected by 7 of the Act or proscribed by § 9(a).

Central to the policy of fostering collective bargaining, where the employees elect that course, is the principle of majority rule. If the majority of a unit chooses union representation, the NLRB permits it to bargain with its employer to make union membership a condition of employment, thus, imposing its choice upon the minority.

In vesting the representatives of the majority with this broad power, Congress did not, of course, authorize a tyranny of the majority over minority interests. First, it confined the exercise of these powers to the context of a "unit appropriate" for the purposes of collective bargaining, i.e., a group of employees with a sufficient commonality of circumstances to ensure against the submergence of a minority with distinctively different interests in the terms and conditions of their employment. Second, it undertook in the 1959 Landrum-Griffin amendments to assure that minority voices are heard as they are in the functioning of a democratic institution. Third, we have held, by the very nature of the exclusive bargaining representative's status as representative of all unit employees, Congress implicitly imposed upon it a duty fairly and in good faith to represent the interests of minorities within the unit. And the Board has taken the position that a union's refusal to process grievances against racial discrimination in violation of that duty is an unfair labor practice....

* * *

The decision by a handful of employees to bypass a grievance procedure in favor of attempting to bargain with their employer...may or may not be predicated upon the actual existence of discrimination. An employer confronted with bargaining demands from each of several minority groups who would not necessarily, or even probably, be able to agree to remain real steps satisfactory to all at once. Competing claims on the employer's ability to accommodate each group's demands, e.g., for reassignments and promotions to a limited number of positions, could only set one group against the other even if it is not the employer's intention to divide and overcome them....In this instance we do not know precisely what form the demands advanced by Hollins, Hawkins, et al, would take, but the nature of the grievance that motivated them indicates that the demands would have included the transfer of some minority employees to sales areas in which higher commissions were paid. Yet the collective-bargaining agreement provided that no employee would be transferred from a higher-paying to a lower-paying classification except by consent or in the course of a layoff or reduction in force. The potential for conflict between the minority and other employees in this situation is manifest. With each group able to enforce its conflicting demands—the incumbent employees by resort to contractual processes and minority employees by economic coercion—the probability of strife and deadlock is high; the making headway against discriminatory practices would be minimal.

* * *

Accordingly, we think neither aspect of respondent's contention in support of a right to short-circuit orderly, established processes eliminating discrimination in employment is well-founded. The policy of industrial self-determination as expressed in § 7 does not require fragmentation of the bargaining unit along racial or other lines in order to consist with the national labor policy against discrimination. And in the face of such fragmentation, whatever its effect on discriminatory practices, the bargaining process that the principle of exclusive representation is meant to lubricate could not endure unhampered.

* * *

Reversed.

CASE QUESTIONS

1. Why did the picketers think that the union's response had been inadequate?
2. In becoming members of the union, which had a contract that included an antidiscrimination clause along with a no-strike clause and a no-lockout clause, did the protesting employees waive all right to pursue discrimination claims in court?

51.5 Summary and Exercises

Summary

Federal labor law is grounded in the National Labor Relations Act, which permits unions to organize and prohibits employers from engaging in unfair labor practices. Amendments to the National Labor Relations Act (NLRA), such as the Taft-Hartley Act and the Landrum-Griffin Act, declare certain acts of unions and employees also to be unfair labor practices.

The National Labor Relations Board supervises union elections and decides in contested cases which union should serve as the exclusive bargaining unit, and it also investigates allegations of unfair labor practices and provides remedies in appropriate cases.

Once elected or certified, the union is the exclusive bargaining unit for the employees it represents. Because the employer is barred from interfering with employee communications when the union is organizing for an election, he may not prohibit employees from soliciting fellow employees on company property but may limit the hours or spaces in which this may be done. The election campaign itself is an intricate legal duel; rewards, threats, and misrepresentations that affect the election are unfair labor practices.

The basic policy of the labor laws is to foster good-faith collective bargaining over wages, hours, and working conditions. The National Labor Relations Board (NLRB) may not compel agreement: it may not order the employer or the union to adopt particular provisions, but it may compel a recalcitrant company or union to bargain in the first place.

Among the unfair labor practices committed by employers are these:

1. Discrimination against workers or prospective workers for belonging to or joining unions. Under federal law, the closed shop and preferential hiring are unlawful. Some states outlaw the union shop, the agency shop, and maintenance-of-membership agreements.
2. Interference with strikes. Employers may hire replacement workers during a strike, but in a strike over an unfair labor practice, as opposed to an economic strike, the replacement workers may be temporary only; workers are entitled to their jobs back at the strike's end.

Among the unfair labor practices committed by unions are these:

1. Secondary boycotts. Workers may not picket employers not involved in the primary labor dispute.
2. Hot cargo agreements. An employer's agreement, under union pressure, to refrain from dealing with certain people or purchasing their products is unlawful.

EXERCISES

1. After years of working without a union, employees of Argenta Associates began organizing for a representation election. Management did not try to prevent the employees from passing out leaflets or making speeches on company property, but the company president did send out a notice to all employees stating that in his opinion, they would be better off without a union. A week before the election, he sent another notice, stating that effective immediately, each employee would be entitled to a twenty-five-cents-an-hour raise. The employees voted the union down. The following day, several employees began agitating for another election. This time management threatened to fire anyone who continued talking about an election on the ground that the union had lost and the employees would have to wait a year. The employees' organizing committee filed an unfair labor practice complaint with the NLRB. What was the result?
2. Palooka Industries sat down with Local 308, which represented its telephone operators, to discuss renewal of the collective bargaining agreement. Palooka pressed its case for a no-strike clause in the next contract, but Local 308 refused to discuss it at all. Exasperated, Palooka finally filed an unfair labor practice claim with the NLRB. What was the result?
3. Union organizers sought to organize the punch press operators at Dan's Machine Shop. The shop was located on a lot surrounded by heavily forested land from which access to employees was impossible. The only practical method of reaching employees on the site was in the company parking lot. When the organizers arrived to distribute handbills, the shop foreman, under instructions from Dan, ordered them to leave. At a hearing before the NLRB, the company said that it was not antiunion but that its policy, which it had always strictly adhered to, forbade nonemployees from being on the property if not on company business. Moreover, company policy barred any activities that would lead to littering. The company noted that the organizers could reach the employees in many other ways—meeting the employees personally in town after hours, calling them at home, writing them letters, or advertising a public meeting. The organizers responded that these methods were far less effective means of reaching the employees. What was the result? Why?

SELF-TEST QUESTIONS

1. Which of the following is not a subject of mandatory bargaining?
 - a. rate of pay per hour
 - b. length of the workweek
 - c. safety equipment
 - d. new products to manufacture

2. Under a union shop agreement,
 - a. an employer may not hire a nonunion member
 - b. an employer must hire a nonunion member
 - c. an employee must join the union after being hired
 - d. an employee must belong to the union before being hired

3. Which of the following is always unlawful under federal law?
 - a. union shop
 - b. agency shop
 - c. closed shop
 - d. runaway shop

4. An employer's agreement with its union to refrain from dealing with companies being struck by other unions is a
 - a. secondary boycott agreement
 - b. hot cargo agreement
 - c. lockout agreement
 - d. maintenance-of-membership agreement

5. Striking employees are entitled to their jobs back when they are engaged in
 - a. economic strikes
 - b. jurisdictional strikes
 - c. both economic and jurisdictional strikes
 - d. neither economic nor jurisdictional strikes

SELF-TEST ANSWERS

1. d
2. c
3. c
4. b
5. a

Chapter 52

International Law

LEARNING OBJECTIVES

After reading this chapter, you should understand the following:

1. The concepts of sovereignty, self-determination, failed states, and failing states
2. The sources of international law, and examples of treaties, conventions, and customary international law
3. How civil-law disputes between the parties from different nation-states can be resolved through national court systems or arbitration
4. The well-recognized bases for national jurisdiction over various parties from different nation-states
5. The doctrines of *forum non conveniens*, sovereign immunity, and act of state

52.1 Introduction to International Law

J. L. Austin, the legal realist, famously defined law as “the command of a sovereign.” He had in mind the fact that legal enforcement goes beyond negotiation and goodwill, and may ultimately have to be enforced by some agent of the government. For example, if you fail to answer a summons and complaint, a default judgment will be entered against you; if you fail to pay the judgment, the sheriff (or US marshal) will actually seize assets to pay the judgment, and will come armed with force, if necessary.

The force and authority of a government in any given territory is fundamental to sovereignty. Historically, that was understood to mean a nation’s “right” to issue its own currency, make and enforce laws within its borders without interference from other nations (the “right of self-determination” that is noted in the Charter of the United Nations), and to defend its territory with military force, if necessary. In a nation at relative peace, sovereignty can be exercised without great difficulty. But many countries are in civil war, and others experience “breakaway” areas where force must be used to assert continued sovereignty. In some countries, civil war may lead to the formation of new nation-states, such as in Sudan in 2011.

In the United States, there was a Civil War from 1860 to 1864, and even now, there are separatist movements, groups who refuse to recognize the authority of the local, state, or national governments. From time to time, these groups will declare their independence of the sovereign, raise their own flag, refuse to pay taxes, and resist government authority with arms. In the United States, the federal government typically responds to these “mini-secessionist” movements with force.

In Canada, the province of Quebec has considered separating from Canada, and this came close to reality in 1995 on a referendum vote for secession that gained 49.4 percent of the votes. Away from North America, claims to exclusive political and legal authority within some geographic area are often the stuff of civil and regional wars. Consider Kosovo’s violent secession from Yugoslavia, or Chechnya’s attempted secession from Russia. At stake in all these struggles is the uncontested right to make and enforce laws within a certain territory. In some nation-states, government control has failed to achieve effective control over substantial areas, leaving factions, tribal groups, or armed groups in control. For such nations, the phrase “failed states” or “failing states” has sometimes been used. A **failing state**¹ usually has some combination of lack of control over much of its territory, failure to provide public services, widespread corruption and criminality, and sharp economic decline. Somalia, Chad, and Afghanistan, among others, head the list as of 2011.

1. A nation-state where substantial parts of the geographic territory in that nation are no longer effectively controlled by the central government.

In a functioning state, the right to make and enforce law is not contested or in doubt. But in the international arena, there is no sovereign lawgiver and law enforcer. If a criminal burglarizes your house and is caught, the legal authorities in your state have little difficulty bringing him to justice. But suppose a dictator or military-run government oppresses some of the citizenry, depriving these citizens of the chance to speak freely, to carry on a trade or profession, to own property, to be educated, or to have access to water and a livable environment, or routinely commits various atrocities against ethnic groups (forced labor, rape, pillage, murder, torture). Who will bring the dictator or government to justice, and before what tribunal?

There is still no forum (court or tribunal) that is universally accepted as a place to try to punish such people. The International Criminal Court has wide support and has prosecuted several individuals for crimes, but the United States has still not agreed to its jurisdiction.

During the 1990s, the United States selectively “policed” certain conflicts (Kosovo, Haiti, Somalia), but it cannot consistently serve over a long period of time as the world’s policeman. The United States has often allowed human rights to be violated in many nations without much protest, particularly during the Cold War with the Union of Soviet Socialist Republics (USSR), where alliances with dictatorships and nondemocratic regimes were routinely made for strategic reasons.

Still, international law is no myth. As we shall see, there are enforceable treaties and laws that most nations abide by, even as they are free to defect from these treaties. Yet the recent retreat by the United States from pending international agreements (the Kyoto Protocol, the International Criminal Court, and others) may be a sign that multilateralism is on the wane or that other nations and regional groupings (the European Union, China) will take a more prominent role in developing binding multilateral agreements among nations.

KEY TAKEAWAY

International law is based on the idea of the nation-state that has sovereignty over a population of citizens within a given geographical territory. In theory, at least, this sovereignty means that nation-states should not interfere with legal and political matters within the borders of other nation-states.

EXERCISES

1. Using news sources, find at least one nation in the world where other nations are officially commenting on or objecting to what goes on within that nation's borders. Are such objections or comments amounting to an infringement of the other nation's sovereignty?
2. Using news sources, find at least one nation in the world that is engaged in trying to change the political and legal landscape of another nation. What is it doing, and why? Is this an infringement of the other nation's sovereignty?
3. What is a failed state? What is a failing state? What is the difference? Is either one a candidate for diplomatic recognition of its sovereignty? Discuss.

52.2 Sources and Practice of International Law

LEARNING OBJECTIVES

1. Explain what a treaty is and how it differs from a convention.
2. Understand that a treaty can be a voluntary relinquishment of some aspects of sovereignty.
3. Describe customary international law, and explain how it is different from treaties as a source of international law.
4. Describe some of the difficulties in enforcing one nation's judicial judgments in another nation.

In this section, we shall be looking at a number of different sources of international law. These sources include treaties and conventions, decisions of courts in various countries (including decisions in your own state and nation), decisions of regional courts (such as the European Court of Justice), the World Trade Organization (WTO), resolutions of the United Nations (UN), and decisions by regional trade organizations such as the North American Free Trade Agreement (NAFTA). These sources are different from most of the cases in your textbook, either because they involve parties from different nations or because the rule makers or decision makers affect entities beyond their own borders.

In brief, the sources of international law include everything that an international tribunal might rely on to decide international disputes. International disputes include arguments between nations, arguments between individuals or companies from different nations, and disputes between individuals or companies and a foreign nation-state. Article 38(1) of the Statute of the International Court of Justice (ICJ) lists four sources of international law: treaties and conventions, custom, general principles of law, and judicial decisions and teachings.

The ICJ only hears lawsuits between nation-states. Its jurisdiction is not compulsory, meaning that both nations in a dispute must agree to have the ICJ hear the dispute.

Treaties and Conventions

Even after signing a treaty or convention, a nation is always free to go it alone and repudiate all regional or international bodies, or refuse to obey the dictates of the United Nations or, more broadly and ambiguously, “the community of nations.” The

United States *could* repudiate NAFTA, *could* withdraw from the UN, and *could* let the WTO know that it would no longer abide by the post-World War II rules of free trade embodied in the General Agreement on Tariffs and Trade (GATT). The United States would be within its rights as a sovereign to do so, since it owes allegiance to no global or international sovereign. Why, however, does it not do so? Why is the United States so involved with the “entangling alliances” that George Washington warned about? Simply put, nations will give away part of their sovereignty if they think it’s in their self-interest to do so. For example, if Latvia joins the European Union (EU), it gives up its right to have its own currency but believes it has more to gain.

A **treaty**² is nothing more than an agreement between two sovereign nations. In international law, a nation is usually called a state or **nation-state**³. This can be confusing, since there are fifty US states, none of which has power to make treaties with other countries. It may be helpful to recall that the thirteen original states under the Articles of Confederation were in fact able to have direct relations with foreign states. Thus New Jersey (for a few brief years) could have had an ambassador to France or made treaties with Spain. Such a decentralized confederation did not last long. Under the present Constitution, states gave up their right to deal directly with other countries and vested that power in the federal government.

There are many treaties to which the United States is a party. Some of these are **conventions**⁴, which are treaties on matters of common concern, usually negotiated on a regional or global basis, sponsored by an international organization, and open to adoption by many nations. For example, as of 2011, there were 192 parties (nation-states) that had signed on to the Charter of the UN, including the United States, Uzbekistan, Ukraine, Uganda, United Arab Emirates, United Kingdom of Great Britain and Northern Ireland, and Uruguay (just to name a few of the nations starting with U).

The most basic kind of treaty is an agreement between two nation-states on matters of trade and friendly relations. Treaties of friendship, commerce, and navigation (FCN treaties) are fairly common and provide for mutual respect for each nation-state’s citizens in (1) rights of entry, (2) practice of professions, (3) right of navigation, (4) acquisition of property, (5) matters of expropriation or nationalization, (6) access to courts, and (7) protection of patent rights. Bilateral investment treaties (BITs) are similar but are more focused on commerce and investment. The commercial treaties may deal with a specific product or product group, investment, tariffs, or taxation.

2. An agreement between two or more nation-states. In US law, a treaty has the same standing as a federal statute.

3. Under international law, the common term for a country or a nation.

4. Multilateral treaties that are sponsored by an international agency or institution (e.g., the United Nations).

Nation-states customarily enter not only into FCN treaties and BITs but also into peace treaties or weapons limitations treaties, such as the US-Russia Strategic Arms Reduction Talks (START) treaty. Again, treaties are only binding as long as each party continues to recognize their binding effect. In the United States, the procedure for ratifying a treaty is that the Senate must approve it by a two-thirds vote (politically, an especially difficult number to achieve). Once ratified, a treaty has the same force of law within the United States as any statute that Congress might pass.

Custom

Custom between nations is another source of international law. Custom is practice followed by two or more nations in the course of dealing with each other. These practices can be found in diplomatic correspondence, policy statements, or official government statements. To become custom, a consistent and recurring practice must go on over a significant period of time, and nations must recognize that the practice or custom is binding and must follow it because of legal obligation and not mere courtesy. Customs may become codified in treaties.

General Principles of Law, or Customary International Law

Even without treaties, there would be some international law, since not all disputes are confined to the territory of one nation-state. For example, in *In re the Bremen*, a US company's disagreement with a German company was heard in US courts. The US courts had to decide *where* the dispute would properly be heard. In giving full effect to a forum-selection clause, the US Supreme Court set out a principle that it hoped would be honored by courts of other nations—namely, that companies from different states should honor any **forum-selection clause**⁵ in their contract to settle disputes at a specific place or court. (See the *Bremen* case, [Section 52.5.1 "Forum-selection clauses"](#)). If that principle is followed by enough national court systems, it could become a principle of **customary international law**⁶. As an example, consider that for many years, courts in many nations believed that **sovereign immunity**⁷ was an established principle of international law.

Judicial Decisions in International Tribunals; Scholarly Teachings

The Statute of the International Court of Justice recognizes that international tribunals may also refer to the teachings of preeminent scholars on international law. The ICJ, for example, often referred to the scholarly writings of Sir Hersch Lauterpacht in its early decisions. Generally, international tribunals are not bound by *stare decisis* (i.e., they may decide each case on its merits). However, courts such as the ICJ do refer to their own past decisions for guidance.

5. In a contract, national or international, the parties may specify the court where any disputes between the parties will be settled. See the *Bremen* case.
6. Rules of law derived from the consistent conduct of nation-states acting out of the belief that the law required them to act that way.
7. A long-standing doctrine under customary international law that recognizes a nation-state's immunity from legal claims. Although absolute sovereign immunity was widely held through the greater part of the twentieth century, a more restrictive doctrine began to take hold after World War II, one that denied sovereign immunity for a sovereign's commercial or private acts.

There are many international tribunals, including the European Court of Justice, the ICJ, and the International Criminal Court. Typically, however, disputes between corporations or between individuals that cross national boundaries must be resolved in national court systems or in arbitration. In other words, there is no international civil court, and much complexity in international law derives from the fact that national court systems must often choose from different sources of law, using different legal traditions in order to resolve international disputes. For example, a court in one nation may have some difficulty accepting the judgment of a foreign nation's court system, as we see in *Koster v. Automark* (see [Section 52.5.2 "Due process in the enforcement of judgments"](#)).

Due Process and Recognition of Foreign Judgments

Issues surrounding recognition of foreign judgments arise when one nation's courts have questions about the fairness of procedures used in foreign courts to acquire the judgment. Perhaps the defendant was not notified or did not have ample time in which to prepare a defense, or perhaps some measure of damages was assessed that seemed distinctly unfair. If a foreign state makes a judgment against a US company, the judgment will not be recognized and enforced in the United States unless the US court believes that the foreign judgment provided the US company with due process. But skepticism about a foreign judgment works the other way, as well. For example, if a US court were to assess punitive damages against a Belgian company, and the successful plaintiff were to ask for enforcement of the US judgment in Belgium, the Belgian court would reject that portion of the award based on punitive damages. Compensatory damages would be allowed, but as Belgian law does not recognize punitive damages, it might not recognize that portion of the US court's award.

Concerns about notice, service of process, and the ability to present certain defenses are evident in *Koster v. Automark*. Many such concerns are eliminated with the use of forum-selection clauses. The classic case in US jurisprudence is the *Bremen* case, which resolves difficult questions of where the case should be tried between a US and German company by approving the use of a forum-selection clause indicating that a court in the United Kingdom would be the only forum that could hear the dispute.

Part of what is going on in *Bremen* is the Supreme Court's concern that due process should be provided to the US company. What is fair (procedurally) is the dominant question in this case. One clear lesson is that issues of fairness regarding personal jurisdiction can be resolved with a forum-selection clause—if both parties agree to a forum that would have subject matter jurisdiction, at least minimal fairness is evident, because both parties have “consented” to have the forum decide the case.

Arbitration

The idea that a forum-selection clause could, by agreement of the parties, take a dispute out of one national court system and into another court system is just one step removed from the idea that the parties can select a fair resolution process that does not directly involve national court systems. In international arbitration, parties can select, either before or after a dispute arises, an arbitrator or arbitral panel that will hear the dispute. As in all arbitration, the parties agree that the arbitrator's decision will be final and binding. Arbitration is generally faster, can be less expensive, and is always private, being a proceeding not open to media scrutiny.

Typically, an arbitration clause in the contract will specify the arbitrator or the means of selecting the arbitrator. For that purpose, there are many organizations that conduct international arbitrations, including the American Arbitration Association, the International Chamber of Commerce, the International Centre for Settlement of Investment Disputes, and the United Nations Commission on International Trade Law. Arbitrators need not be judges or lawyers; they are usually business people, lawyers, or judges who are experienced in global commercial transactions. The arbitration clause is thus in essence a forum-selection clause and usually includes a choice of law for the arbitrator or arbitral panel to follow.

An arbitral award is not a judgment. If the losing party refuses to pay the award, the winning party must petition a court somewhere to enforce it. Fortunately, almost every country that is engaged in international commerce has ratified the United Nations Convention on the Recognition and Enforcement of Arbitral Awards, sometimes known as the New York Convention. The United States adopted this convention in 1970 and has amended the Federal Arbitration Act accordingly. Anyone who has an arbitral award subject to the convention can attach property of the loser located in any country that has signed the convention.

KEY TAKEAWAY

Treaties and conventions, along with customary international law, are the primary sources of what we call international law. Disputes involving parties from different nation-states are resolved in national (federal) court systems, and one nation's recognition and enforcement of another nation's judicial orders or judgments will require reciprocal treaties or some review that the order or judgment was fairly obtained (that there was due process in the determination of the order or judgment).

EXERCISES

1. At the US Senate website, read about the history of treaties in the United States. What is an “executive agreement,” and why has the use of executive agreements grown so fast since World War II?
2. Is NAFTA a treaty or an executive agreement? What practical difference does it make if it is one rather than the other?

52.3 Important Doctrines of Nation-State Judicial Decisions

LEARNING OBJECTIVES

1. Define and describe the three traditional bases for a nation's jurisdiction over those individuals and entities from other nation-states.
2. Explain *forum non conveniens* and be able to apply that in a case involving citizens from two different nation-states.
3. Describe and explain the origins of both sovereign immunity and the act-of-state doctrine, and be able to distinguish between the two.

Bases for National Jurisdiction under International Law

A nation-state has jurisdiction to make and enforce laws (1) within its own borders, (2) with respect to its citizens (nationals") wherever they might be, and (3) with respect to actions taking place outside the territory but having an objective or direct impact within the territory. In the Restatement (Third) of Foreign Relations Law, these three jurisdictional bases are known as (1) the territorial principle, (2) the nationality principle, and (3) the objective territoriality principle.

As we have already seen, many difficult legal issues involve jurisdictional problems. When can a court assert authority over a person? (That's the personal jurisdiction question.) When can a court apply its own law rather than the law of another state? When is it obligated to respect the legal decisions of other states? All these problems have been noted in the context of US domestic law, with its state-federal system; the resolution of similar problems on a global scale are only slightly more complicated.

The **territorial principle**⁸ is fairly simple. Anything that happens within a nation's borders is subject to its laws. A German company that makes direct investment in a plant in Spartanburg, South Carolina, is subject to South Carolina law and US law as well.

Nationality jurisdiction⁹ often raises problems. The citizens of a nation-state are subject to its laws while within the nation and beyond. The United States has passed several laws that govern the conduct of US nationals abroad. United States companies may not, for example, bribe public officials of foreign countries in order to get contracts (Foreign Corrupt Practices Act of 1976). Title VII of the Civil Rights

8. A nation-state has the power to make and enforce laws with regard to events taking place within its political/geographic territory.

9. Under customary international law, nation-states may exercise jurisdiction over their citizens (nationals) even when the citizens' actions in question take place beyond their borders.

Act also applies extraterritorially—where a US citizen is employed abroad by a US company.

For example, suppose Jennifer Stanley (a US citizen) is discriminated against on the basis of gender by Aramco (a US-based company) in Saudi Arabia, and she seeks to sue under Title VII of the Civil rights Act of 1964. The extraterritorial reach of US law seems odd, especially if Saudi Arabian law or custom conflicts with US law. Indeed, in *EEOC v. Arabian American Oil Co.*, the Supreme Court was hesitant to say that US law would “reach” across the globe to dictate proper corporate conduct. *EEOC v. Arabian American Oil Co.* 499 U.S. 244 (1991). Later that year, Congress made it clear by amending Title VII so that its rules would in fact reach that far, at least where US citizens were the parties to a dispute. But if Saudi Arabian law directly conflicted with US law, principles of customary international law would require that territorial jurisdiction would trump nationality jurisdiction.

Note that where the US laws conflict with local or host country laws, we have potential conflict in the extraterritorial application of US law to activities in a foreign land. See, for example, *Kern v. Dynalelectron*. *Kern v. Dynalelectron*, 746 F.2d 810 (1984). In *Kern*, a Baptist pilot (US citizen) wanted to work for a company that provided emergency services to those Muslims who were on a pilgrimage to Mecca. The job required helicopter pilots to occasionally land to provide emergency services. However, Saudi law required that all who set foot in Mecca must be Muslim. Saudi law provided for death to violators. Kern (wanting the job) tried to convert but couldn't give up his Baptist roots. He sued Dynalelectron (a US company) for discrimination under Title VII, claiming that he was denied the job because of his religion. Dynalelectron did not deny that they had discriminated on the basis of his religion but argued that because of the Saudi law, they had no viable choice. Kern lost on the Title VII claim (his religion was a bona fide occupational qualification). The court understood that US law would apply extraterritorially because of his nationality and the US nationality of his employer.

The principle of **objective territoriality**¹⁰ is fairly simple: acts taking place within the borders of one nation can have a direct and foreseeable impact in another nation. International law recognizes that nation-states act appropriately when they make and enforce law against actors whose conduct has such direct effects. A lawsuit in the United States against Osama bin Laden and his relatives in the Middle East was based on objective territoriality. (Based in Afghanistan, the Al Qaeda leader who claimed credit for attacks on the United States on September 11, 2001.)

10. Under customary international law, nation-states may exercise jurisdiction over noncitizens when the actions of those noncitizens have a direct and foreseeable impact on the nation-state claiming jurisdiction.

Where a defendant is not a US national or is not located in the United States when prosecution or a civil complaint is filed, there may be conflicts between the United States and the country of the defendant's nationality. One of the functions of

treaties is to map out areas of agreement between nation-states so that when these kinds of conflicts arise, there is a clear choice of which law will govern. For example, in an extradition treaty, two nation-states will set forth rules to apply when one country wants to prosecute someone who is present in the other country. In general, these treaties will try to give priority to whichever country has the greater interest in taking jurisdiction over the person to be prosecuted.

Once jurisdiction is established in US courts in cases involving parties from two different nations, there are some important limiting doctrines that business leaders should be aware of. These are **forum non conveniens**¹¹, sovereign immunity, and the **act-of-state doctrine**¹². Just as conflicts arise over the proper venue in US court cases where two states' courts may claim jurisdiction, so do conflicts occur over the proper forum when the court systems of two nation-states have the right to hear the case.

Forum Non Conveniens; Forum-Selection Clauses

Forum non conveniens is a judicial doctrine that tries to determine the proper forum when the courts of two different nation-states can claim jurisdiction. For example, when Union Carbide's plant in Bhopal, India, exploded and killed or injured thousands of workers and local citizens, the injured Indian plaintiffs could sue Union Carbide in India (since Indian negligence law had territorial effect in Bhopal and Union Carbide was doing business in India) or Union Carbide in the United States (since Union Carbide was organized and incorporated in the United States, which would thus have both territorial and nationality bases for jurisdiction over Union Carbide). Which nation's courts should take a primary role? Note that *forum non conveniens* comes into play when courts in two different nation-states both have subject matter and personal jurisdiction over the matter. Which nation's court system should take the case? That, in essence, is the question that the *forum non conveniens* doctrine tries to answer.

In the *Bremen* case (Section 52.5.1 "Forum-selection clauses"), the German contractor (Unterweser) had agreed to tow a drilling rig owned by Zapata from Galveston, Texas, to the Adriatic Sea. The drilling rig was towed by Unterweser's vessel, The Bremen. An accident in the Gulf damaged the drilling rig, and Zapata sued in US district court in Florida. Unterweser argued that London was a "better," or more convenient, forum for the resolution of Zapata's claim against Unterweser, but the district court rejected that claim. Had it not been for the forum-selection clause, the claim would have been resolved in Tampa, Florida. The *Bremen* case, although it does have a *forum non conveniens* analysis, is better known for its holding that in cases where sophisticated parties engage in arms-length bargaining and select a forum in which to settle their disputes, the courts will not second-guess

11. A common-law doctrine used in cases where two different federal court systems have both subject matter jurisdiction and personal jurisdiction over the parties. Using *forum non conveniens*, a court may refuse to hear a case if there is an alternative forum that is available and adequate and if public and private interest factors point to the other nation's legal system as the proper venue.
12. A US judicial doctrine that avoids making any determination on the merits of the case if doing so would cause the court to sit in judgment of the legal validity of public acts by a foreign sovereign.

that selection unless there is fraud or unless one party has overwhelming bargaining power over the other.

In short, parties to an international contract can select a forum (a national court system and even a specific court within that system, or an arbitral forum) to resolve any disputes that might arise. In the *Bremen* case, Zapata was held to its choice; this tells you that international contracting requires careful attention to the forum-selection clause. Since the *Bremen* case, the use of arbitration clauses in international contracting has grown exponentially. The arbitration clause is just like a forum-selection clause; instead of the party's selecting a judicial forum, the arbitration clause points to resolution of the dispute by an arbitrator or an arbitral panel.

Where there is no forum-selection clause, as in most tort cases, corporate defendants often find it useful to invoke *forum non conveniens* to avoid a lawsuit in the United States, knowing that the lawsuit elsewhere cannot as easily result in a dollar-value judgment. Consider the case of *Gonzalez v. Chrysler Corporation* (see [Section 52.5.3 "Forum non conveniens"](#)).

Sovereign Immunity

For many years, sovereigns enjoyed complete immunity for their own acts. A king who established courts for citizens (subjects) to resolve their disputes would generally not approve of judges who allowed subjects to sue the king (the sovereign) and collect money from the treasury of the realm. If a subject sued a foreign sovereign, any judgment would have to be collectible in the foreign realm, and no king would allow another king's subjects to collect on his treasury, either. In effect, claims against sovereigns, domestic or foreign (at home or abroad), just didn't get very far. Judges, seeing a case against a sovereign, would generally dismiss it on the basis of "sovereign immunity." This became customary international law.

In the twentieth century, the rise of communism led to state-owned companies that began trading across national borders. But when a state-owned company failed to deliver the quantity or quality of goods agreed upon, could the disappointed buyer sue? Many tried, but sovereign immunity was often invoked as a reason why the court should dismiss the lawsuit. Indeed, most lawsuits were dismissed on this basis. Gradually, however, a few courts began distinguishing between governmental acts and commercial acts: where a state-owned company was acting like a private, commercial entity, the court would not grant immunity. This became known as the "restrictive" version of sovereign immunity, in contrast to "absolute" sovereign immunity. In US courts, decisions as to sovereign immunity after World War II were

often political in nature, with the US State Department giving advisory letters on a case-by-case basis, recommending (or not recommending) that the court grant immunity to the foreign state. Congress moved to clarify matters in 1976 by passing the Foreign Sovereign Immunities Act, which legislatively recognized the restrictive theory. Note, especially, Section 1605(a)(2).

Jurisdictional Immunities of Foreign States

28 USCS § 1602 (1998)

§ 1602. *Findings and declaration of purpose*

The Congress finds that the determination by United States courts of the claims of foreign states to immunity from the jurisdiction of such courts would serve the interests of justice and would protect the rights of both foreign states and litigants in United States courts. Under international law, states are not immune from the jurisdiction of foreign courts insofar as their commercial activities are concerned, and their commercial property may be levied upon for the satisfaction of judgments rendered against them in connection with their commercial activities. Claims of foreign states to immunity should henceforth be decided by courts of the United States and of the States in conformity with the principles set forth in this chapter [28 USCS §§ 1602 et seq.].

§ 1603. *Definitions*

For purposes of this chapter [28 USCS §§ 1602 et seq.]—

(a) A “foreign state”, except as used in section 1608 of this title, includes a political subdivision of a foreign state or an agency or instrumentality of a foreign state as defined in subsection (b).

(b) An “agency or instrumentality of a foreign state” means any entity—

(1) which is a separate legal person, corporate or otherwise, and

(2) which is an organ of a foreign state or political subdivision thereof, or a majority of whose shares or other ownership interest is owned by a foreign state or political subdivision thereof, and

(3) which is neither a citizen of a State of the United States as defined in section 1332(c) and (d) of this title nor created under the laws of any third country.

(c) The “United States” includes all territory and waters, continental or insular, subject to the jurisdiction of the United States.

(d) A “commercial activity” means either a regular course of commercial conduct or a particular commercial transaction or act. The commercial character of an activity shall be determined by reference to the nature of the course of conduct or particular transaction or act, rather than by reference to its purpose.

(e) A “commercial activity carried on in the United States by a foreign state” means commercial activity carried on by such state and having substantial contact with the United States.

§ 1604. *Immunity of a foreign state from jurisdiction*

Subject to existing international agreements to which the United States is a party at the time of enactment of this Act [enacted Oct. 21, 1976] a foreign state shall be immune from the jurisdiction of the courts of the United States and of the States except as provided in sections 1605 to 1607 of this chapter.

§ 1605. *General exceptions to the jurisdictional immunity of a foreign state*

(a) A foreign state shall not be immune from the jurisdiction of courts of the United States or of the States in any case—

(1) in which the foreign state has waived its immunity either explicitly or by implication, notwithstanding any withdrawal of the waiver which the foreign state may purport to effect except in accordance with the terms of the waiver;

(2) in which the action is based upon a commercial activity carried on in the United States by the foreign state; or upon an act performed in the United States in connection with a commercial activity of the foreign state elsewhere; or upon an act outside the territory of the United States in connection with a commercial activity of the foreign state elsewhere and that act causes a direct effect in the United States;

(3) in which rights in property taken in violation of international law are in issue and that property or any property exchanged for such property is present in the United States in connection with a commercial activity carried on in the United States by the foreign state; or that property or any property exchanged for such property is owned or operated by an agency or instrumentality of the foreign state and that agency or instrumentality is engaged in a commercial activity in the United States;

(4) in which rights in property in the United States acquired by succession or gift or rights in immovable property situated in the United States are in issue;

(5) not otherwise encompassed in paragraph (2) above, in which money damages are sought against a foreign state for personal injury or death, or damage to or loss of property, occurring in the United States and caused by the tortious act or omission of that foreign state or of any official or employee of that foreign state while acting within the scope of his office or employment; except this paragraph shall not apply to—

(A) any claim based upon the exercise or performance or the failure to exercise or perform a discretionary function regardless of whether the discretion be abused, or

(B) any claim arising out of malicious prosecution, abuse of process, libel, slander, misrepresentation, deceit, or interference with contract rights;

Act of State

A foreign country may expropriate private property and be immune from suit in the United States by the former owners, who might wish to sue the country directly or seek an order of attachment against property in the United States owned by the foreign country. In the United States, the government may constitutionally seize private property under certain circumstances, but under the Fifth Amendment, it must pay “just compensation” for any property so taken. Frequently, however, foreign governments have seized the assets of US corporations without recompensing them for the loss. Sometimes the foreign government seizes all private property in a certain industry, sometimes only the property of US citizens. If the seizure violates the standards of international law—as, for example, by failing to pay just compensation—the question arises whether the former owners may sue in US courts. One problem with permitting the courts to hear such claims is that by

time of suit, the property may have passed into the hands of bona fide purchasers, perhaps even in other countries.

The Supreme Court has enunciated a doctrine governing claims to recover for acts of expropriation. This is known as the act-of-state doctrine. As the Supreme Court put it in 1897, “Every sovereign State is bound to respect the independence of every other sovereign State, and the courts of one country will not sit in judgment on...[and thereby adjudicate the legal validity of] the acts of the government of another done within its own territory.” *Underhill v. Hernandez*, 168 U.S. 250, 252 (1897). This means that US courts will “reject private claims based on the contention that the damaging act of another nation violates either US or international law.” *Mannington Mills, Inc. v. Congoleum Corp.*, 595 F.2d 1287 (3d Cir. 1979). Sovereign immunity and the act-of-state doctrine rest on different legal principles and have different legal consequences. The doctrine of sovereign immunity bars a suit altogether: once a foreign-government defendant shows that sovereign immunity applies to the claims the plaintiff has raised, the court has no jurisdiction even to consider them and must dismiss the case. By contrast, the act-of-state doctrine does not require dismissal in a case properly before a court; indeed, the doctrine may be invoked by plaintiffs as well as defendants. Instead, it precludes anyone from arguing against the legal validity of an act of a foreign government. In a simple example, suppose a widow living in the United States is sued by her late husband’s family to prevent her from inheriting his estate. They claim she was never married to the deceased. She shows that while citizens of another country, they were married by proclamation of that country’s legislature. Although legislatures do not marry people in the United States, the act-of-state doctrine would bar a court from denying the legal validity of the marriage entered into in their home country.

The Supreme Court’s clearest statement came in a case growing out of the 1960 expropriation of US sugar companies operating in Cuba. A sugar broker had entered into contracts with a wholly owned subsidiary of *Compania Azucarera Vertientes-Camaguey de Cuba (C.A.V.)*, whose stock was principally owned by US residents. When the company was nationalized, sugar sold pursuant to these contracts had been loaded onto a German vessel still in Cuban waters. To sail, the skipper needed the consent of the Cuban government. That was forthcoming when the broker agreed to sign contracts with the government that provided for payment to a Cuban bank rather than to C.A.V. The Cuban bank assigned the contracts to *Banco Nacional de Cuba*, an arm of the Cuban government. However, when C.A.V. notified the broker that in its opinion, C.A.V. still owned the sugar, the broker agreed to turn the process of the sale over to Sabbatino, appointed under New York law as receiver of C.A.V.’s assets in the state. *Banco Nacional de Cuba* then sued Sabbatino, alleging that the broker’s refusal to pay Banco the proceeds amounted to common-law conversion.

The federal district court held for Sabbatino, ruling that if Cuba had simply failed to abide by its own law, C.A.V.'s stockholders would have been entitled to no relief. But because Cuba had violated international law, the federal courts did not need to respect its act of appropriation. The violation of international law, the court said, lay in Cuba's motive for the expropriation, which was retaliation for President Eisenhower's decision to lower the quota of sugar that could be imported into the United States, and not for any public purpose that would benefit the Cuban people; moreover, the expropriation did not provide for adequate compensation and was aimed at US interests only, not those of other foreign nationals operating in Cuba. The US court of appeals affirmed the lower court's decision, holding that federal courts may always examine the validity of a foreign country's acts.

But in *Banco Nacional de Cuba v. Sabbatino*, the Supreme Court reversed, relying on the act-of-state doctrine. *Banco Nacional de Cuba v. Sabbatino*, 376 U.S. 398 (1964). This doctrine refers, in the words of the Court, to the "validity of the public acts a recognized foreign sovereign power commit[s] within its own territory." If the foreign state exercises its own jurisdiction to give effect to its public interests, however the government defines them, the expropriated property will be held to belong to that country or to bona fide purchasers. For the act-of-state doctrine to be invoked, the act of the foreign government must have been completely executed within the country—for example, by having enacted legislation expropriating the property. The Supreme Court said that the act-of-state doctrine applies even though the United States had severed diplomatic relations with Cuba and even though Cuba would not reciprocally apply the act-of-state doctrine in its own courts.

Despite its consequences in cases of expropriations, the act-of-state doctrine is relatively narrow. As *W. S. Kirkpatrick Co., Inc. v. Environmental Tectonics Co.* ([Section 52.5.4 "Act of State"](#)) shows, it does not apply merely because a judicial inquiry in the United States might embarrass a foreign country or even interfere politically in the conduct of US foreign policy.

KEY TAKEAWAY

Each nation-state has several bases of jurisdiction to make and enforce laws, including the territorial principle, nationality jurisdiction, and objective territoriality. However, nation-states will not always choose to exercise their jurisdiction: the doctrines of *forum non conveniens*, sovereign immunity, and act of state limit the amount and nature of judicial activity in one nation that would affect nonresident parties and foreign sovereigns.

EXERCISES

1. Argentina sells bonds on the open market, and buyers all around the world buy them. Five years later, Argentina declares that it will default on paying interest or principal on these bonds. Assume that Argentina has assets in the United States. Is it likely that a bondholder in the United States can bring an action in US courts that will not be dismissed for lack of subject matter jurisdiction?
2. During the Falkland Island war between Argentina and Great Britain, neutral tanker traffic was at risk of being involved in hostilities. Despite diplomatic cables from the United States assuring Argentina of the vessels' neutrality, an oil tanker leased by Amerada Hess, traveling from Puerto Rico to Valdez, Alaska, was repeatedly bombed by the Argentine air force. The ship had to be scuttled, along with its contents. Will a claim by Amerada Hess be recognized in US courts?

52.4 Regulating Trade

LEARNING OBJECTIVES

1. Understand why nation-states have sometimes limited imports but not exports.
2. Explain why nation-states have given up some of their sovereignty by lowering tariffs in agreement with other nation-states.

Before globalization, nation-states traded with one another, but they did so with a significant degree of protectiveness. For example, one nation might have imposed very high tariffs (taxes on imports from other countries) while not taxing exports in order to encourage a favorable “balance of trade.” The balance of trade is an important statistic for many countries; for many years, the US balance of trade has been negative because it imports far more than it exports (even though the United States, with its very large farms, is the world’s largest exporter of agricultural products). This section will explore import and export controls in the context of the global agreement to reduce import controls in the name of free trade.

Export Controls

The United States maintains restrictions on certain kinds of products being sold to other nations and to individuals and firms within those nations. For example, the Export Administration Act of 1985 has controlled certain exports that would endanger national security, drain scarce materials from the US economy, or harm foreign policy goals. The US secretary of commerce has a list of controlled commodities that meet any of these criteria.

More specifically, the Arms Export Control Act permits the president to create a list of controlled goods related to military weaponry, and no person or firm subject to US law can export any listed item without a license. When the United States has imposed sanctions, the International Emergency Economic Powers Act (IEEPA) has often been the legislative basis; and the act gives the president considerable power to impose limitations on trade. For example, in 1979, President Carter, using IEEPA, was able to impose sanctions on Iran after the diplomatic hostage crisis. The United States still imposes travel restrictions and other sanctions on Cuba, North Korea, and many other countries.

Import Controls and Free Trade

Nation-states naturally wish to protect their domestic industries. Historically, protectionism has come in the form of import taxes, or tariffs, also called duties. The tariff is simply a tax imposed on goods when they enter a country. Tariffs change often and vary from one nation-state to another. Efforts to implement free trade began with the General Agreement on Tariffs and Trade (GATT) and are now enforced through the World Trade Organization (WTO); the GATT and the WTO have sought, through successive rounds of trade talks, to decrease the number and extent of tariffs that would hinder the free flow of commerce from one nation-state to another. The theory of comparative advantage espoused by David Ricardo is the basis for the gradual but steady of tariffs, from early rounds of talks under the GATT to the Uruguay Round, which established the WTO.

The GATT was a huge multilateral treaty negotiated after World War II and signed in 1947. After various “rounds” of re-negotiation, the Uruguay Round ended in 1994 with the United States and 125 other nation-states signing the treaty that established the WTO. In 1948, the worldwide average tariff on industrial goods was around 40 percent. That number is now more like 4 percent as globalization has taken root. Free-trade proponents claim that globalization has increased general well-being, while opponents claim that free trade has brought outsourcing, industrial decline, and the hollowing-out of the US manufacturing base. The same kinds of criticisms have been directed at the North American Free Trade Agreement (NAFTA).

The Uruguay Round was to be succeeded by the Doha Round. But that round has not concluded because developing countries have not been satisfied with the proposed reductions in agricultural tariffs imposed by the more developed economies; developing countries have been resistant to further agreements unless and until the United States and the European Union lower their agricultural tariffs.

There are a number of regional trade agreements other than NAFTA. The European Union, formerly the Common Market, provides for the free movement of member nations’ citizens throughout the European Union (EU) and sets union-wide standards for tariffs, subsidies, transportation, human rights, and many other issues. Another regional trade agreement is Mercosur—an organization formed by Brazil, Argentina, Uruguay, and Paraguay to improve trade and commerce among those South American nations. Almost all trade barriers between the four nations have been eliminated, and the organization has also established a broad social agenda focusing on education, culture, the environment, and consumer protection.

KEY TAKEAWAY

Historically, import controls were more common than export controls; nation-states would typically impose tariffs (taxes) on goods imported from other nation-states. Some nation-states, such as the United States, nevertheless maintain certain export controls for national security and military purposes. Most nation-states have voluntarily given up some of their sovereignty in order to gain the advantages of bilateral and multilateral trade and investment treaties. The most prominent example of a multilateral trade treaty is the GATT, now administered by the WTO. There are also regional free-trade agreements, such as NAFTA and Mercosur, that provide additional relaxation of tariffs beyond those agreed to under the WTO.

EXERCISES

1. Look at various sources and describe, in one hundred or fewer words, why the Doha Round of WTO negotiations has not been concluded.
2. What is the most recent bilateral investment treaty (BIT) that has been concluded between the United States and another nation-state? What are its key provisions? Which US businesses are most helped by this treaty?

52.5 Cases

Forum-selection clauses

In re the Bremen

407 U.S. 1 (1972)

MR. CHIEF JUSTICE BURGER delivered the opinion of the Court.

We granted certiorari to review a judgment of the United States Court of Appeals for the Fifth Circuit declining to enforce a forum-selection clause governing disputes arising under an international towage contract between petitioners and respondent. The circuits have differed in their approach to such clauses. For the reasons stated hereafter, we vacate the judgment of the Court of Appeals.

In November 1967, respondent Zapata, a Houston-based American corporation, contracted with petitioner Unterweser, a German corporation, to tow Zapata's ocean-going, self-elevating drilling rig Chaparral from Louisiana to a point off Ravenna, Italy, in the Adriatic Sea, where Zapata had agreed to drill certain wells.

Zapata had solicited bids for the towage, and several companies including Unterweser had responded. Unterweser was the low bidder and Zapata requested it to submit a contract, which it did. The contract submitted by Unterweser contained the following provision, which is at issue in this case:

Any dispute arising must be treated before the London Court of Justice.

In addition the contract contained two clauses purporting to exculpate Unterweser from liability for damages to the towed barge. After reviewing the contract and making several changes, but without any alteration in the forum-selection or exculpatory clauses, a Zapata vice president executed the contract and forwarded it to Unterweser in Germany, where Unterweser accepted the changes, and the contract became effective.

On January 5, 1968, Unterweser's deep sea tug Bremen departed Venice, Louisiana, with the Chaparral in tow bound for Italy. On January 9, while the flotilla was in international waters in the middle of the Gulf of Mexico, a severe storm arose. The

sharp roll of the Chaparral in Gulf waters caused its elevator legs, which had been raised for the voyage, to break off and fall into the sea, seriously damaging the Chaparral. In this emergency situation Zapata instructed the Bremen to tow its damaged rig to Tampa, Florida, the nearest port of refuge.

On January 12, Zapata, ignoring its contract promise to litigate “any dispute arising” in the English courts, commenced a suit in admiralty in the United States District Court at Tampa, seeking \$3,500,000 damages against Unterweser in personam and the Bremen *in rem*, alleging negligent towage and breach of contract. Unterweser responded by invoking the forum clause of the towage contract, and moved to dismiss for lack of jurisdiction or on forum non conveniens grounds, or in the alternative to stay the action pending submission of the dispute to the “London Court of Justice.” Shortly thereafter, in February, before the District Court had ruled on its motion to stay or dismiss the United States action, Unterweser commenced an action against Zapata seeking damages for breach of the towage contract in the High Court of Justice in London, as the contract provided. Zapata appeared in that court to contest jurisdiction, but its challenge was rejected, the English courts holding that the contractual forum provision conferred jurisdiction.

In the meantime, Unterweser was faced with a dilemma in the pending action in the United States court at Tampa. The six-month period for filing action to limit its liability to Zapata and other potential claimants was about to expire, but the United States District Court in Tampa had not yet ruled on Unterweser’s motion to dismiss or stay Zapata’s action. On July 2, 1968, confronted with difficult alternatives, Unterweser filed an action to limit its liability in the District Court in Tampa. That court entered the customary injunction against proceedings outside the limitation court, and Zapata refiled its initial claim in the limitation action.

It was only at this juncture, on July 29, after the six-month period for filing the limitation action had run, that the District Court denied Unterweser’s January motion to dismiss or stay Zapata’s initial action. In denying the motion, that court relied on the prior decision of the Court of Appeals in *Carbon Black Export, Inc.* In that case the Court of Appeals had held a forum-selection clause unenforceable, reiterating the traditional view of many American courts that “agreements in advance of controversy whose object is to oust the jurisdiction of the courts are contrary to public policy and will not be enforced.”

* * *

Thereafter, on January 21, 1969, the District Court denied another motion by Unterweser to stay the limitation action pending determination of the controversy in the High Court of Justice in London and granted Zapata’s motion to restrain

Unterweser from litigating further in the London court. The District Judge ruled that, having taken jurisdiction in the limitation proceeding, he had jurisdiction to determine all matters relating to the controversy. He ruled that Unterweser should be required to “do equity” by refraining from also litigating the controversy in the London court, not only for the reasons he had previously stated for denying Unterweser’s first motion to stay Zapata’s action, but also because Unterweser had invoked the United States court’s jurisdiction to obtain the benefit of the Limitation Act.

On appeal, a divided panel of the Court of Appeals affirmed, and on rehearing *en banc* the panel opinion was adopted, with six of the 14 *en banc* judges dissenting. The term *en banc* means that all the judges of a circuit court of appeals heard oral arguments and voted to decide the outcome of the case. As had the District Court, the majority rested on the *Carbon Black* decision, concluding that “at the very least” that case stood for the proposition that a forum-selection clause “will not be enforced unless the selected state would provide a more convenient forum than the state in which suit is brought.” From that premise the Court of Appeals proceeded to conclude that, apart from the forum-selection clause, the District Court did not abuse its discretion in refusing to decline jurisdiction on the basis of *forum non conveniens*. It noted that (1) the flotilla never “escaped the Fifth Circuit’s mare nostrum, and the casualty occurred in close proximity to the district court”; (2) a considerable number of potential witnesses, including Zapata crewmen, resided in the Gulf Coast area; (3) preparation for the voyage and inspection and repair work had been performed in the Gulf area; (4) the testimony of the Bremen crew was available by way of deposition; (5) England had no interest in or contact with the controversy other than the forum-selection clause. The Court of Appeals majority further noted that Zapata was a United States citizen and “[t]he discretion of the district court to remand the case to a foreign forum was consequently limited”—especially since it appeared likely that the English courts would enforce the exculpatory clauses. In the Court of Appeals’ view, enforcement of such clauses would be contrary to public policy in American courts under *Bisso v. Inland Waterways Corp.*, 349 U.S. 85 (1955), and *Dixilyn Drilling Corp. v. Crescent Towing & Salvage Co.*, 372 U.S. 697 (1963). Therefore, “[t]he district court was entitled to consider that remanding Zapata to a foreign forum, with no practical contact with the controversy, could raise a bar to recovery by a United States citizen which its own convenient courts would not countenance.”

We hold, with the six dissenting members of the Court of Appeals, that far too little weight and effect were given to the forum clause in resolving this controversy. For at least two decades we have witnessed an expansion of overseas commercial activities by business enterprises based in the United States. The barrier of distance that once tended to confine a business concern to a modest territory no longer does so. Here we see an American company with special expertise contracting with a

foreign company to tow a complex machine thousands of miles across seas and oceans. The expansion of American business and industry will hardly be encouraged if, notwithstanding solemn contracts, we insist on a parochial concept that all disputes must be resolved under our laws and in our courts. Absent a contract forum, the considerations relied on by the Court of Appeals would be persuasive reasons for holding an American forum convenient in the traditional sense, but in an era of expanding world trade and commerce, the absolute aspects of the doctrine of the *Carbon Black* case have little place and would be a heavy hand indeed on the future development of international commercial dealings by Americans. We cannot have trade and commerce in world markets and international waters exclusively on our terms, governed by our laws, and resolved in our courts.

Forum-selection clauses have historically not been favored by American courts. Many courts, federal and state, have declined to enforce such clauses on the ground that they were “contrary to public policy,” or that their effect was to “oust the jurisdiction” of the court. Although this view apparently still has considerable acceptance, other courts are tending to adopt a more hospitable attitude toward forum-selection clauses. This view...is that such clauses are prima facie valid and should be enforced unless enforcement is shown by the resisting party to be “unreasonable” under the circumstances.

We believe this is the correct doctrine to be followed by federal district courts sitting in admiralty. It is merely the other side of the proposition recognized by this Court in *National Equipment Rental, Ltd. v. Szukhent*, 375 U.S. 311 (1964), holding that in federal courts a party may validly consent to be sued in a jurisdiction where he cannot be found for service of process through contractual designation of an “agent” for receipt of process in that jurisdiction. In so holding, the Court stated: “[I]t is settled...that parties to a contract may agree in advance to submit to the jurisdiction of a given court, to permit notice to be served by the opposing party, or even to waive notice altogether.”

This approach is substantially that followed in other common-law countries including England. It is the view advanced by noted scholars and that adopted by the Restatement of the Conflict of Laws. It accords with ancient concepts of freedom of contract and reflects an appreciation of the expanding horizons of American contractors who seek business in all parts of the world. Not surprisingly, foreign businessmen prefer, as do we, to have disputes resolved in their own courts, but if that choice is not available, then in a neutral forum with expertise in the subject matter. Plainly, the courts of England meet the standards of neutrality and long experience in admiralty litigation. The choice of that forum was made in an arm’s-length negotiation by experienced and sophisticated businessmen, and absent some compelling and countervailing reason it should be honored by the parties and enforced by the courts.

* * *

The judgment of the Court of Appeals is vacated and the case is remanded for further proceedings consistent with this opinion.

Vacated and remanded.

MR. JUSTICE DOUGLAS, dissenting.

* * *

The Limitation Court is a court of equity and traditionally an equity court may enjoin litigation in another court where equitable considerations indicate that the other litigation might prejudice the proceedings in the Limitation Court. Petitioners' petition for limitation [407 U.S. 1, 23] subjects them to the full equitable powers of the Limitation Court.

Respondent is a citizen of this country. Moreover, if it were remitted to the English court, its substantive rights would be adversely affected. Exculpatory provisions in the towage control provide (1) that petitioners, the masters and the crews "are not responsible for defaults and/or errors in the navigation of the tow" and (2) that "[d]amages suffered by the towed object are in any case for account of its Owners." Under our decision in *Dixilyn Drilling Corp v. Crescent Towing & Salvage Co.*, 372 U.S. 697, 698, "a contract which exempts the tower from liability for its own negligence" is not enforceable, though there is evidence in the present record that it is enforceable in England. That policy was first announced in *Bisso v. Inland Waterways Corp.*, 349 U.S. 85; and followed in *Boston Metals Co. v. The Winding Gulf*, 349 U.S. 122.

* * *

Moreover, the casualty occurred close to the District Court, a number of potential witnesses, including respondent's crewmen, reside in that area, and the inspection and repair work were done there. The testimony of the tower's crewmen, residing in Germany, is already available by way of depositions taken in the proceedings. [407 U.S. 1, 24]

All in all, the District Court judge exercised his discretion wisely in enjoining petitioners from pursuing the litigation in England.

I would affirm the judgment below.

CASE QUESTIONS

1. Without a forum-selection clause, would the court in England have personal jurisdiction over either party?
2. Under *forum non conveniens*, there will be two courts, both of which have subject matter and personal jurisdiction—and the court will defer jurisdiction to the more “convenient” forum. If there were no forum-selection clause here, could the US court defer jurisdiction to the court in London?
3. Will Zapata recover anything if the case is heard in London?
4. Is it “fair” to let Unterweser excuse itself from liability? If not, under what ethical perspective does it “make sense” or “seem reasonable” for the court to allow Zapata to go to London and recover very little or nothing?

Due process in the enforcement of judgments

Koster v. Automark

640 F.2d 77 (N.D. Ill. 1980)

MARVIN E. ASPEN, District Judge:

On November 23, 1970, plaintiff Koster and defendant Automark Industries Incorporated (“Automark”) consummated a five-month course of negotiation by entering into an agreement whereby Automark promised to purchase 600,000 valve cap gauges during 1971. As a result of Automark’s alleged breach of this agreement, plaintiff brought an action for damages in the District Court in Amsterdam, 3rd Lower Chamber A. On October 16, 1974, plaintiff obtained a default judgment in the amount of Dutch Florins 214,747,50—\$66,000 in American currency at the rate of exchange prevailing on December 31, 1971—plus costs and interest. Plaintiff filed this diversity action on January 27, 1978, to enforce that foreign judgment.

The case now is before the Court on plaintiff’s motion for summary judgment pursuant to Federal Rules of Civil Procedure (Fed.R.Civ.P) 56(a). Defendant contests this motion on three grounds: (1) that service was inadequate, (2) that defendant lacked the minimum contacts necessary to render it subject to in personam jurisdiction in Amsterdam, and (3) that defendant has meritorious defenses to the

action which it could not present in the foreign proceeding. For the reasons that follow, however, the Court finds defendant's contentions unavailing.

[Note: The discussion on inadequate service has been omitted from what follows.]

As the court noted in *Walters*...service of process cannot confer personal jurisdiction upon a court in the absence of minimum contacts. The requirement of minimum contacts is designed to ensure that it is reasonable to compel a party to appear in a particular forum to defend against an action. *Shaffer v. Heitner*, 433 U.S. 186 (1977); *International Shoe Co. v. Washington*, 326 U.S. 317 (1945). Here, it is undisputed that Automark initiated the negotiations by a letter to plaintiff dated June 25, 1970. The five-month period of negotiations, during which time defendant sent several letters and telegrams to plaintiff in Amsterdam, led to the agreement of November 23, 1970. Moreover, although there is no evidence as to the contemplated place of performance, plaintiff attests—without contradiction—that the payment was to be made in Amsterdam.

On facts not dissimilar from these, the Illinois courts have found the existence of minimum contacts sufficient to justify long-arm personal jurisdiction under the Illinois statute. Ill.Rev.Stat. Ch. 110, § 17(a)(1). In *Colony Press, Inc. v. Fleeman*, 17 Ill.App.3d 14, 308 N.E.2d 78 (1st Dist. 1974), the court found that minimum contacts existed where the defendant had initiated the negotiations by submitting a purchase order to an Illinois company and the contract was to be performed in Illinois. And in *Cook Associates, Inc. v. Colonial Broach & Machine Co.*, 14 Ill.App.3d 965, 304 N.E.2d 27 (1st Dist. 1973), the court found that a single telephone call into Illinois initiating a business transaction that was to be performed in Illinois by an Illinois agency was enough to establish personal jurisdiction in Illinois. Thus, the Court finds that the Amsterdam court had personal jurisdiction over Automark.

Finally, defendant suggests that it has meritorious defenses which it could not present because of its absence at the judicial proceeding in Amsterdam; specifically, that there was no binding agreement and, alternatively, that its breach was justified by plaintiff's failure to perform his end of the bargain. It is established beyond question, however, that a default judgment is a conclusive and final determination that is accorded the same *res judicata* effect as a judgment after a trial on the merits. Such a judgment may be attacked collaterally only on jurisdictional grounds, or upon a showing that the judgment was obtained by fraud or collusion. Thus, defendant is foreclosed from challenging the underlying merits of the judgment obtained in Amsterdam.

[In a footnote, the court says:] "*Again, even assuming that defendant could attack the judgment on the merits, it has failed to raise any genuine issue of material fact....An affidavit*

by defendant's secretary states only that "to the best of [his] knowledge" there was no contract with anyone in Amsterdam. Yet, there is no affidavit from the party who negotiated and allegedly contracted with plaintiff; nor is there any explanation why such an affidavit was not filed. In the face of the copy of a letter of agreement provided by plaintiff, this allegation is insufficient to create a factual question. Moreover, defendant offers no extrinsic material in support of its allegation of non-performance by plaintiff. Thus, even were the Court to consider defendant's alleged defenses to the contract action, it would grant summary judgment for plaintiff on the merits."

Accordingly, the Court finds that plaintiff is entitled to enforcement of the foreign judgment. Thus, plaintiff's motion for summary judgment is granted. It is so ordered.

CASE QUESTIONS

1. Why do you think Automark did not go to Amsterdam to contest this claim by Koster?
2. Why does the Illinois court engage in a due process analysis of personal jurisdiction?
3. What if the letter of agreement had an arbitration clause? Would the court in Amsterdam have personal jurisdiction over Automark?

Forum non conveniens

Gonzalez v. Chrysler Corporation

301 F.3d 377 (5th Cir. 2002)

[Note: Although the court's opinion was appealed to the Supreme Court, no writ of certiorari was issued, so the following decision stands as good precedent in *forum non conveniens* cases.]

Opinion by E. GRADY JOLLY, Circuit Judge.

In this *forum non conveniens* case, we first consider whether the cap imposed by Mexican law on the recovery of tort damages renders Mexico an inadequate forum for resolving a tort suit by a Mexican citizen against an American manufacturer and an American designer of an air bag. Holding that Mexico—despite its cap on damages—represents an adequate alternative forum, we next consider whether the

district court committed reversible error when it concluded that the private and public interest factors so strongly pointed to Mexico that Mexico, instead of Texas, was the appropriate forum in which to try this case. Finding no reversible error, we affirm the district court's judgment dismissing this case on the ground of forum non conveniens.

In 1995, while in Houston, the plaintiff, Jorge Luis Machuca Gonzalez ("Gonzalez") saw several magazine and television advertisements for the Chrysler LHS. The advertisements sparked his interest. So, Gonzalez decided to visit a couple of Houston car dealerships. Convinced by these visits that the Chrysler LHS was a high quality and safe car, Gonzalez purchased a Chrysler LHS upon returning to Mexico.

On May 21, 1996, the wife of the plaintiff was involved in a collision with another moving vehicle while driving the Chrysler LHS in Atizapan de Zaragoza, Mexico. The accident triggered the passenger-side air bag. The force of the air bag's deployment instantaneously killed Gonzalez's three-year-old son, Pablo.

Seeking redress, Gonzalez brought suit in Texas district court against (1) Chrysler, as the manufacturer of the automobile; (2) TRW, Inc. and TRW Vehicle Safety Systems, Inc., as the designers of the front sensor for the air bag; and (3) Morton International, Inc., as designer of the air bag module. Gonzalez asserted claims based on products liability, negligence, gross negligence, and breach of warranty. As noted, Gonzalez chose to file his suit in Texas. Texas, however, has a tenuous connection to the underlying dispute. Neither the car nor the air bag module was designed or manufactured in Texas. The accident took place in Mexico, involved Mexican citizens, and only Mexican citizens witnessed the accident. Moreover, Gonzalez purchased the Chrysler LHS in Mexico (although he shopped for the car in Houston, Texas). Because of these factors, the district court granted the defendants' identical motions for dismissal on the ground of forum non conveniens. Gonzalez now appeals.

II. A

The primary question we address today involves the threshold inquiry in the forum non conveniens analysis: Whether the limitation imposed by Mexican law on the award of damages renders Mexico an inadequate alternative forum for resolving a tort suit brought by a Mexican citizen against a United States manufacturer.

We should note at the outset that we may reverse the grant or denial of a motion to dismiss on the ground of forum non conveniens only "where there has been a clear

abuse of discretion.” *Baumgart v. Fairchild Aircraft Corp.*, 981 F.2d 824, 835 (5th Cir. 1993).

The forum non conveniens inquiry consists of four considerations. First, the district court must assess whether an alternative forum is available. See *Alpine View Co. Ltd. v. Atlas Copco AB*, 205 F.3d 208, 221 (5th Cir. 2000). An alternative forum is available if “the entire case and all parties can come within the jurisdiction of that forum.” *In re Air Crash Disaster Near New Orleans, La.* on July 9, 1982, 821 F.2d 1147, 1165 (5th Cir. 1987) (en banc), vacated on other grounds sub nom., *Pan Am. World Airways, Inc. v. Lopez*, 490 U.S. 1032, 104 L. Ed. 2d 400, 109 S. Ct. 1928 (1989). Second, the district court must decide if the alternative forum is adequate. See *Alpine View*, 205 F.3d at 221. An alternative forum is adequate if “the parties will not be deprived of all remedies or treated unfairly, even though they may not enjoy the same benefits as they might receive in an American court.” *In re Air Crash*, 821 F.2d at 1165 (internal citation omitted).

If the district court decides that an alternative forum is both available and adequate, it next must weigh various private interest factors. See *Baumgart*, 981 F.2d at 835-36. If consideration of these private interest factors counsels against dismissal, the district court moves to the fourth consideration in the analysis. At this stage, the district court must weigh numerous public interest factors. If these factors weigh in the moving party’s favor, the district court may dismiss the case. *Id.* at 837.

B. 1

The heart of this appeal is whether the alternative forum, Mexico, is adequate. (The court here explains that Mexico is an amenable forum because the defendants have agreed to submit to the jurisdiction of the Mexican courts.) The jurisprudential root of the adequacy requirement is the Supreme Court’s decision in *Piper Aircraft Co. v. Reyno*, 454 U.S. 235, 70 L. Ed. 2d 419, 102 S. Ct. 252 (1981). The dispute in *Piper Aircraft* arose after several Scottish citizens were killed in a plane crash in Scotland. A representative for the decedents filed a wrongful death suit against two American aircraft manufacturers. The Court noted that the plaintiff filed suit in the United States because “[US] laws regarding liability, capacity to sue, and damages are more favorable to her position than are those of Scotland.” *Id.* The Court further noted that “Scottish law does not recognize strict liability in tort.” *Id.* This fact, however, did not deter the Court from reversing the Third Circuit. In so doing, the Court held that “although the relatives of the decedent may not be able to rely on a strict liability theory, and although their potential damage award may be smaller, there is no danger that they will be deprived of any remedy or treated unfairly [in Scotland].” Thus, the Court held that Scotland provided an adequate alternative

forum for resolving the dispute, even though its forum provided a significantly lesser remedy. In a footnote, however, Justice Marshall observed that on rare occasions this may not be true:

At the outset of any forum non conveniens inquiry, the court must determine whether there exists an alternative forum. Ordinarily, this requirement will be satisfied when the defendant is “amenable to process” in the other jurisdiction. In rare circumstances, however, where the remedy offered by the other forum is clearly unsatisfactory, the other forum may not be an adequate alternative, and the initial requirement may not be satisfied. Thus, for example, dismissal would not be appropriate where the alternative forum does not permit litigation of the subject matter of the dispute.

....

Citing the language from this footnote, Gonzalez contends that a Mexican forum would provide a clearly unsatisfactory remedy because (1) Mexican tort law does not provide for a strict liability theory of recovery for the manufacture or design of an unreasonably dangerous product and (2) Mexican law caps the maximum award for the loss of a child’s life at approximately \$ 2,500 (730 days’ worth of wages at the Mexican minimum wage rate). Thus, according to Gonzalez, Mexico provides an inadequate alternative forum for this dispute.

B.2

(a) Gonzalez’s first contention may be quickly dismissed based on the explicit principle stated in *Piper Aircraft*. As noted, there the Supreme Court held that Scotland’s failure to recognize strict liability did not render Scotland an inadequate alternative forum. *Id.* at 255. There is no basis to distinguish the absence of a strict products liability cause of action under Mexican law from that of Scotland. *Piper Aircraft* therefore controls. Accordingly, we hold that the failure of Mexican law to allow for strict liability on the facts of this case does not render Mexico an inadequate forum.

(b) Gonzalez’s second contention—that the damage cap renders the remedy available in a Mexican forum “clearly unsatisfactory”—is slightly more problematic. Underlying this contention are two distinct arguments: First, Gonzalez argues that if he brings suit in Mexico, the cap on damages will entitle him to a *de minimis* recovery only—a clearly unsatisfactory award for the loss of a child. Second, Gonzalez argues that because of the damage cap, the cost of litigating this case in Mexico will exceed the potential recovery. As a consequence, the lawsuit will never

be brought in Mexico. Stated differently, the lawsuit is not economically viable in Mexico. It follows, therefore, that Mexico offers no forum (much less an adequate forum) through which Gonzalez can (or will) seek redress. We address each argument in turn.

(b)(i)

In addressing Gonzalez's first argument, we start from basic principles of comity. Mexico, as a sovereign nation, has made a deliberate choice in providing a specific remedy for this tort cause of action. In making this policy choice, the Mexican government has resolved a trade-off among the competing objectives and costs of tort law, involving interests of victims, of consumers, of manufacturers, and of various other economic and cultural values. In resolving this trade-off, the Mexican people, through their duly-elected lawmakers, have decided to limit tort damages with respect to a child's death. It would be inappropriate—even patronizing—for us to denounce this legitimate policy choice by holding that Mexico provides an inadequate forum for Mexican tort victims. In another *forum non conveniens* case, the District Court for the Southern District of New York made this same point observing (perhaps in a hyperbolic choice of words) that “to retain the litigation in this forum, as plaintiffs request, would be yet another example of imperialism, another situation in which an established sovereign inflicted its rules, its standards and values on a developing nation.” *In re Union Carbide Corp. Gas Plant Disaster at Bhopal, India* in December, 1984, 634 F. Supp. 842, 867 (S.D.N.Y. 1986), *aff'd* as modified, 809 F.2d 195 (2d Cir. 1987). In short, we see no warrant for us, a United States court, to replace the policy preference of the Mexican government with our own view of what is a good policy for the citizens of Mexico.

Based on the considerations mentioned above, we hold that the district court did not err when it found that the cap on damages did not render the remedy available in the Mexican forum clearly unsatisfactory.

(b) (ii) We now turn our attention to Gonzalez's “economic viability” argument—that is, because there is no economic incentive to file suit in the alternative forum, there is effectively no alternative forum.

The practical and economic realities lying at the base of this dispute are clear. At oral argument, the parties agreed that this case would never be filed in Mexico. In short, a dismissal on the ground of *forum non conveniens* will determine the outcome of this litigation in Chrysler's favor. We nevertheless are unwilling to hold as a legal principle that Mexico offers an inadequate forum simply because it does not make economic sense for Gonzalez to file this lawsuit in Mexico. Our reluctance arises out of two practical considerations.

First, the plaintiff's willingness to maintain suit in the alternative (foreign) forum will usually depend on, *inter alia*, (1) whether the plaintiff's particular injuries are compensable (and to what extent) in that forum; (2) not whether the forum recognizes some cause of action among those applicable to the plaintiff's case, but whether it recognizes his most provable and compensable action; (3) similarly, whether the alternative forum recognizes defenses that might bar or diminish recovery; and (4) the litigation costs (i.e., the number of experts, the amount of discovery, geographic distances, attorney's fees, etc.) associated with bringing that particular case to trial. These factors will vary from plaintiff to plaintiff, from case to case. Thus, the forum of a foreign country might be deemed inadequate in one case but not another, even though the only difference between the two cases might be the cost of litigation or the recovery for the plaintiff's particular type of injuries. In sum, we find troublesome and lacking in guiding principle the fact that the adequacy determination could hinge on constantly varying and arbitrary differences underlying the "economic viability" of a lawsuit.

Second, if we allow the economic viability of a lawsuit to decide the adequacy of an alternative forum, we are further forced to engage in a rudderless exercise of line drawing with respect to a cap on damages: At what point does a cap on damages transform a forum from adequate to inadequate? Is it, as here, \$2,500? Is it \$50,000? Or is it \$100,000? Any recovery cap may, in a given case, make the lawsuit economically unviable. We therefore hold that the adequacy inquiry under Piper Aircraft does not include an evaluation of whether it makes economic sense for Gonzalez to file this lawsuit in Mexico.

C.

Having concluded that Mexico provides an adequate forum, we now consider whether the private and public interest factors nonetheless weigh in favor of maintaining this suit in Texas. As noted, the district court concluded that the public and the private interest factors weighed in favor of Mexico and dismissed the case on the ground of forum non conveniens. Our review of this conclusion is restricted to abuse of discretion. See *Alpine View*, 205 F.3d at 220.

The district court found that almost all of the private and public interest factors pointed away from Texas and toward Mexico as the appropriate forum. It is clear to us that this finding does not represent an abuse of discretion. After all, the tort victim was a Mexican citizen, the driver of the Chrysler LHS (Gonzalez's wife) is a Mexican citizen, and the plaintiff is a Mexican citizen. The accident took place in Mexico. Gonzalez purchased the car in Mexico. Neither the car nor the air bag was designed or manufactured in Texas. In short, there are no public or private interest

factors that would suggest that Texas is the appropriate forum for the trial of this case.

III.

For the foregoing reasons, the district court's dismissal of this case on the ground of forum non conveniens is

AFFIRMED.

CASE QUESTIONS

1. How can an alternative forum be "adequate" if no rational lawyer would take Gonzalez's case to file in a Mexican state court?
2. To what extent does it strike you as "imperialism" for a US court to make a judgment that a Mexican court is not "adequate"?

Act of State

W. S. Kirkpatrick Co., Inc. v. Environmental Tectonics Co.

493 U.S. 400 (1990)

Justice Scalia delivered the Court's opinion.

In 1981, Harry Carpenter, who was then Chairman of the Board and Chief Executive Officer of petitioner W. S. Kirkpatrick & Co., Inc. (Kirkpatrick) learned that the Republic of Nigeria was interested in contracting for the construction and equipment of an aeromedical center at Kaduna Air Force Base in Nigeria. He made arrangements with Benson "Tunde" Akindele, a Nigerian Citizen, whereby Akindele would endeavor to secure the contract for Kirkpatrick. It was agreed that in the event the contract was awarded to Kirkpatrick, Kirkpatrick would pay to two Panamanian entities controlled by Akindele an amount equal to 20% of the contract price, which would in turn be given as a bribe to officials of the Nigerian government. In accordance with this plan, the contract was awarded to petitioner W. S. Kirkpatrick & Co., International (Kirkpatrick International), a wholly owned subsidiary of Kirkpatrick; Kirkpatrick paid the promised "commission" to the appointed Panamanian entities; and those funds were disbursed as bribes. All

parties agree that Nigerian law prohibits both the payment and the receipt of bribes in connection with the award of a government contract.

Respondent Environmental Tectonics Corporation, International, an unsuccessful bidder for the Kaduna contract, learned of the 20% “commission” and brought the matter to the attention of the Nigerian Air Force and the United States Embassy in Lagos. Following an investigation by the Federal Bureau of Investigation, the United States Attorney for the District of New Jersey brought charges against both Kirkpatrick and Carpenter for violations of the Foreign Corrupt Practices Act of 1977 and both pleaded guilty.

Respondent then brought this civil action in the United States District Court of the District of New Jersey against Carpenter, Akindele, petitioners, and others, seeking damages under the Racketeer Influenced and Corrupt Organizations Act, the Robinson-Patman Act, and the New Jersey Anti-Racketeering Act. The defendants moved to dismiss the complaint under Rule 12(b)(6) of the Federal Rules of Civil Procedure on the ground that the action was barred by the act of state doctrine.

The District Court concluded that the act of state doctrine applies “if the inquiry presented for judicial determination includes the motivation of a sovereign act which would result in embarrassment to the sovereign or constitute interference in the conduct of foreign policy of the United States.” Applying that principle to the facts at hand, the court held that respondents suit had to be dismissed because in order to prevail respondents would have to show that “the defendants or certain other than intended to wrongfully influenced the decision to award the Nigerian contract by payment of a bribe, that the government of Nigeria, its officials or other representatives knew of the offered consideration forewarning the Nigerian contract to Kirkpatrick, that the bribe was actually received or anticipated and that but for the payment or anticipation of the payment of the bribed, ETC would have been awarded the Nigerian contract.”

The Court of Appeals for the Third Circuit reversed.

...

This Courts’ description of the jurisprudential foundation for the act of state doctrine has undergone some evolution over the years. We once viewed the doctrine as an expression of international law, resting upon “the highest considerations of international comity and expediency,” *Oetjen v. Central Leather Co.*, 246 U.S. 297, 303-304 (1918). We have more recently described it, however, as a consequence of domestic separation of powers, reflecting “the strong sense of the

Judicial Branch that its engagement in the task of passing on the validity of foreign acts of state may hinder” the conduct of foreign affairs, *Banco Nacional de Cuba v. Sabbatino*, 376 U.S. 398, 423 (1964). Some Justices have suggested possible exceptions to application of the doctrine, where one or both of the foregoing policies would seemingly not be served: an exception, for example, for acts of state that consist of commercial transactions, since neither modern international comity nor the current position of our Executive Branch accorded sovereign immunity to such acts...or an exception for cases in which the executive branch has represented that it has no objection to denying validity to the foreign sovereign act, since then the court should be impeding no foreign-policy goals.

We find it unnecessary, however, to pursue those inquiries, since the factual predicate for application of the act of state doctrine does not exist. Nothing in the present suit requires the court to declare invalid, and thus ineffective as “a rule of decision for the courts of this country,” the official act of a foreign sovereign.

In every case in which we have held the act of state doctrine applicable, the relief sought or the defense interposed would have required a court in the United States to declare invalid the official acts of a foreign sovereign performed within its own territory....In *Sabbatino*, upholding the defendant’s claim to the funds would have required a holding that Cuba’s expropriation of goods located in Havana was null and void. In the present case, by contrast, neither the claim nor any asserted defense requires a determination that Nigeria’s contract with Kirkpatrick International was, or, was not effective.

Petitioners point out, however, that the facts necessary to establish respondent’s claim will also establish that the contract was unlawful. Specifically, they note that in order to prevail respondent must prove that petitioner Kirkpatrick made, and Nigerian officials received, payments that violate Nigerian law, which would, they assert, support a finding that the contract is invalid under Nigerian law. Assuming that to be true, it still does not suffice. The act of state doctrine is not some vague doctrine of abstention but a “principle of decision binding on federal and state courts alike.” As we said in *Ricaud*, “the act within its own boundaries of one sovereign State...becomes a rule of decision for the courts of this country.” Act of state issues only arise when a court *must* decide—that is, when the outcome of the case turns upon—the effect of official action by a foreign sovereign. When that question is not in the case, neither is the act of state doctrine. This is the situation here. Regardless of what the court’s factual findings may suggest as to the legality of the Nigerian contract, its legality is simply not a question to be decided in the present suit, and there is thus no occasion to apply the rule of decision that the act of state doctrine requires.

* * *

The short of the matter is this: Courts in the United States have the Power, and ordinarily the obligation, to decide cases and controversies properly presented to them. The act of state doctrine does not establish an exception for cases and controversies that may embarrass foreign governments, but merely requires that; in the process of deciding, the acts of foreign sovereigns taken within their own jurisdictions shall be deemed valid: That doctrine has no application to the present case because the validity of no foreign sovereign act is at issue.

The judgment of the Court for the Third Circuit is affirmed.

CASE QUESTIONS

1. Why is this case not about sovereign immunity?
2. On what basis does the US court take jurisdiction over an event or series of events that takes place in Nigeria?
3. If the court goes on to the merits of the case and determines that an unlawful bribe took place in Nigeria, is it likely that diplomatic relations between the United States and Nigeria will be adversely affected?

52.6 Summary and Exercises

Summary

International law is not like the domestic law of any one country. The sovereign, or lawgiver, in any particular nation-state has the power to make and enforce laws within its territory. But globally, there is no single source of law or law enforcement. Thus international law is a collection of agreements between nation-states (treaties and conventions), customary international law (primarily based on decisions of national court systems), and customary practice between nation-states. There is an international court of justice, but it only hears cases between nation-states. There is no international court for the resolution of civil disputes, and no regional courts for that purpose, either.

The lack of unified law and prevalence of global commerce means that local and national court systems have had to devise ways of forcing judgments from one national court system or another to deal with claims against sovereigns and to factor in diplomatic considerations as national judicial systems encounter disputes that involve (directly or indirectly) the political and diplomatic prerogatives of sovereigns. Three doctrines that have been devised are sovereign immunity, act of state, and *forum non conveniens*. The recognition of forum-selection clauses in national contracting has also aided the use of arbitration clauses, making international commercial-dispute resolution more efficient. Arbitral awards against any individual or company in most nations engaged in global commerce are more easily enforceable than judgments from national court systems.

In terms of regulating trade, the traditional practice of imposing taxes (tariffs) on imports from other countries (and not taxing exports to other countries) has been substantially modified by the emergence of the General Agreement on Tariffs and Trade (GATT) rules as now enforced by the World Trade Organization (WTO). The United States has a practice of regulating exports, however, to take into account national security and other foreign policy considerations. For example, the Export Administration Act of 1985 has controlled certain exports that would endanger national security, drain scarce materials from the US economy, or harm foreign policy goals. The US secretary of commerce has a list of controlled commodities that meet any of these criteria.

EXERCISES

1. Assume that the United States enters into a multilateral treaty with several third-world countries under which then-existing private claims to molybdenum and certain other minerals in the United States are assigned to an international agency for exploitation. When the owner of a US mine continues to dig for ore covered by the treaty, the Justice Department sues to enjoin further mining. What is the result? Why?
2. A foreign government enters into a contract with a US company to provide computer equipment and services for the intelligence arm of its military forces. After the equipment has been supplied, the foreign government refuses to pay. The US company files suit in federal court in the United States, seeking to attach a US bank account owned by the foreign government. The foreign government claims that the US court has no jurisdiction and that even if it does, the government is immune from suit. What is the result?
3. Would the result in Exercise 2 be any different if the US company had maintained its own equipment on a lease basis abroad and the foreign government had then expropriated the equipment and refused to pay the US company its just value?
4. The Concentrated Phosphate Export Association consists of the five largest phosphate producers. The Agency for International Development (AID) undertook to sell fertilizer to Korea and solicited bids. The association set prices and submitted a single bid on 300,000 tons. A paid the contract price, determined the amounts to be purchased, coordinated the procedure for buying, and undertook to resell to Korea. The Justice Department sued the association and its members, claiming that their actions violated Section 1 of the Sherman Act. What defense might the defendants have? What is the result?
5. Canada and Russia have competing claims over fishing and mining rights in parts of the Arctic Ocean. Assuming they cannot settle their competing claims through diplomatic negotiation, where might they have their dispute settled?

SELF-TEST QUESTIONS

1. International law derives from
 - a. the US Constitution
 - b. the common law
 - c. treaties
 - d. customary international law
 - e. c and d

2. Foreign nations are immune from suit in US courts for governmental acts because of
 - a. the international sovereign immunity treaty
 - b. a United Nations law forbidding suits against foreign sovereigns
 - c. the Foreign Sovereign Immunities Act
 - d. precedent created by the US Supreme Court

3. A foreign government's expropriation of private assets belonging to a nonresident is
 - a. a violation of international law
 - b. a violation of the US Constitution
 - c. permitted by the domestic law of most nation-states
 - d. in violation of the act-of-state doctrine

4. Arbitration of business disputes is
 - a. frowned upon by courts for replacing public dispute resolution with private dispute resolution
 - b. permissible when a country's laws permit it
 - c. permissible if the parties agree to it
 - d. a and b
 - e. b and c

SELF-TEST ANSWERS
